KIRKMAN & SON.

Mr. CAFFERY. The Senator from Nevada says that the duty on soap is very considerable and the soap makers have all they want and do not want anybody else to get more or to get anything. That may be very true as regards the selfishness of the soap makers, but there are others to be considered in this matter, and they are the consumers. If there is a burden on them already, why put on them another burden? Have they not got as much as they can stand? We ought to equalize the burdens, and they should not all fall upon the consumers of soap.

I understand that cotton-seed oil, or some of the output of the cotton-seed mill, makes excellent soap. They have their raw material here; they do not have to import it. They may be protected by a tariff on soap and they may not be. I have not looked into that question to any great extent, but that has nothing to do with this additional tariff. The tariff of a quarter of a cent has been found to be sufficient. It nas not been found that under that tariff the imports increased; on the contrary, they decreased. I should like to hear some sufficient reason why at this late day, when this duty has stood under the McKinley law from 1890 down to this date without any complaint, without any demands for this increase, this additional burden of an eighth of a cent a pound should be put upon the consumers in the United States of this necessary article.

I suppose the Senator from Nevada does not want our poor people in the South to wash themselves. Why make soap higher? We can not afford to keep dirty for the purpose of building up an additional amount of income to the soda-ash and caustic-soda factories of Nevada. I do not say that they are dirty by any means. They manage to keep clean, and will do so no matter how high a duty is imposed upon the ingredients of soap. I should like to have the Senator in charge of the bill give us some reason why upon this very essential article to the poor as well as the rich this increase of an eighth of a cent per pound should be placed.

Mr. STEWART. Does not the Senator from Louisiana wish to have the reason stated by anyone else? I will say that I have no faith in a letter from a manufacturer who has got everything he produces thoroughly protected and is pleading for raw material to come to him cheaply. That is the substance of every one of these letters. They come from some person who demands high tariff for himself and free trade for everything that comes to him.

As far as this particular duty is concerned, there is a very large amount imported. There were imported in 1893, 288,841,970 pounds, and in 1896, 254,063,927 pounds. The duty all the time has been one-fourth of 1 cent. Probably the reason why there was not more imported last year was owing to the fact that times were so hard that nobody could import, that nobody was doing anything, and there was a falling off generally. But the amount imported when we have an abundance of it in this country is altogether too large, and the slight increase of one-eighth of a cent is asking very little. The soap men are the last men on earth to develop a great business, and they are the last men to complain, because if you look back in this same Schedule A, you will find the soap men well protected. I see no reason why we might not develop that industry in this country by this slight rise of one-eighth of 1 cent. I hope there will be no further objection to it.

Mr. WALTHALL. In this connection, I should like to read an extract from a letter which I hold in my hand.

Mr. STEWART. From a manufacturer?

Mr. WALTHALL. From a manufacturer, though the Senator from Nevada seems not to have any special respect for the manufacturer.

Mr. STEWART. Not when he speaks of the other article, which is an ingredient of his manufacture.

Mr. WALTHALL. This letter is from Mr. John A. Lewis, vice-president of the Mississippi Cotton Oil Company, a gentleman of very high standing, and I wish to read it specially to show why I addressed the inquiry to the Senator from Rhode Island which I did as to the exportation of caustic soda.

Mr. ALDRICH. We are now dealing with soda ash, and the Senator asked me about caustic soda.

Mr. WALTHALL. Mr. Lewis deals with the two together. He says:

> The cotton seed oil industry of the South is also indirectly affected by the tariff upon caustic soda and soda ash. These articles are used very largely in the refined oil and soap departments, and, if kept where they were under the Wilson bill, will be of great benefit. We feel safe in asserting that the American manufacturers of caustic soda and soda ash do not need any more protection than they are getting at present. Statistics show that they have actually exported caustic soda to England, the home of the heavy chemical industry, and they are shipping regularly to South America in competition with foreign manufacturers. Statistics further show that since the duty was placed at half cent per pound on caustic soda, which is present rate in effect, the imports are actually less than when the duty was higher. This conclusively shows that the American manufacturers are steadily increasing their plants under the present rate of duty.
>
> Soap makers are already suffering greatly on account of keen competition, and any increase in the price of raw material caused by additional duty will work a great hardship.

Mr. BACON. I desire to call the attention of the Senator from Nevada to the fact that, as appears by the relative prices and imports given in the comparative statement, the price of soda ash has very materially decreased. Am I correct in that?

Mr. STEWART. The price of everything has decreased.

Mr. BACON. I am speaking of this particular article.

Mr. STEWART. I am speaking of prices generally.

Mr. BACON. Is it not a fact that the price of soda ash has very materially decreased?

Mr. STEWART. Yes, sir.

Mr. BACON. Therefore the duty per pound is necessarily increased, even though the rate of duty is not increased. The rate of duty is proposed to be increased in this bill to the amount of 50 per cent. Am I correct in that statement?

Mr. VEST. Yes; the total duty is 50 per cent.

Mr. WHITE. The total duty now is 50 per cent.

Mr. BACON. But I say the increase is 50 per cent over the former rate.

Mr. WHITE. No; the Senator is mistaken. The rate is now given in the comparative statement at .48 per cent and a fraction, which is the total rate. That does not mean an increase of that amount over the total rate.

Mr. CHILTON. What was the former rate?

Mr. BACON. The former rate was two-eighths; that is, one-fourth, and this is three-eighths. That is certainly an increase of 50 per cent.

Mr. WHITE. I am speaking of ad valorem.

Mr. BACON. I am not speaking of ad valorem.

Mr. WHITE. I did not understand the Senator from Georgia.

Mr. BACON. It would amount to the same thing, though, if it was per pound. If the price remained at the same figure, it would be 50 per cent. If the price is decreasing, it is more than 50 per cent.

Now, I will state the point to which I wish to call the attention of the Senator from Nevada. I quite agree with the principle that if we must have an impost upon articles there should be a proper proportion between duties upon raw material and the manufactured article, but I do not think that for that reason there should be an excessive duty upon raw material. It strikes me that where the price is decreasing and the rate of duty is per pound and not ad valorem, that decrease would give sufficient advance in the ad valorem without increasing the rate per pound.

Mr. STEWART. Mr. President——

Mr. ALDRICH. I should like to make a very brief statement, and then I will be very glad to yield to the Senator from Nevada.

Mr. STEWART. Certainly.

Mr. ALDRICH. The question involved in this amendment is a very interesting one and affects a very important industry. The manufacture of soda ash in the United States was not commenced until 1884, and it has developed to a very considerable extent with two effects—one to reduce importations and the other to largely reduce the price of the article. I will have published in the RECORD a statement of the prices for the years 1887 to 1897, showing a decline from the maximum price of $33 down to a price in 1897 of from $14.50 to $15.71 per ton.

The statement referred to is as follows:

N. B.—In explanation of the figures here given as the range for the past ten years, I beg to say that the price per ton of 58 per cent soda ash would be as follows:

1887	$25.98 to $26.58	1893	$24.17 to $29.00
1888	25.98 to 26.58	1894	20.54 to 22.36
1889	25.98 to 26.58	1895	20.54 to 22.36
1890	32.63 to 33.83	1896	18.13 to 19.53
1891	32.63 to 35.04	1897	14.50 to 15.71
1892	31.04 to 33.83		

Mr. ALDRICH. In this connection, I desire also to make the statement that the price of soda ash which the United Alkali Company charge their own customers in Great Britain is nearly double what they charge to the people of the United States, the purpose of the great reduction for exportation being, of course, to try to destroy the American manufacture.

Mr. WHITE. There is no export, is there?

Mr. ALDRICH. There is no export. This company say:

> The English market at the present time and for some time past being relatively in the same position of about £4 to £4 10s., while for shipment to this country it has been sold as low as £1 15s., and in instances considerably under that figure, allowing the English maker to reap a profit at home while he was endeavoring to financially embarrass the independent undertakings in this country, ash being sold in the United States at the same time at about $12 per ton, forcing the American manufacturers to sell at prices irrespective of cost or close down their works.

I have not the slightest doubt but that if this duty is imposed, within five years the American producers will supply the entire home market. The number of American producers is increasing every year. It is not confined to any one company, nor are they confined to any one section of the country. A very important establishment has been lately built at Saltville, in Virginia, another one is being built at Niagara Falls, another one at Cleveland, another one at Detroit, and all over the country there are springing up establishments for the manufacture of soda ash. I believe that we can do nothing that is better to develop a great American industry than to make an increase in the rate in the way proposed.

Mr. CAFFERY. I inquire of the Senator from Rhode Island his authority for the figures he has given from the English manufacturer?

Mr. ALDRICH. The prices?

Mr. CAFFERY. Yes.

Mr. ALDRICH. They come from the Mathieson Alkali Works, the people who own the establishment in Virginia to which I have just alluded, and about whose accuracy and authority there can be no question.

Mr. CAFFERY. It does not occur to me that the Senator from Rhode Island has fully covered the question asked him as to why it is that the American product is supplanting the foreign product. The importations of this article under the present tariff rate of a quarter of a cent a pound under the valuation of 1893 would be about 20 per cent, and under the valuation of to-day, with the increased specific and with a lower price, it comes to some 48.80 per cent. There is an increase of double the ad valorem rate; and although the Senator from Rhode Island states that the product of this article is growing in this country, he has not shown deleterious competition on behalf of the foreign importer, and therefore he has shown no necessity of an increase in the amount of tariff.

Mr. ALDRICH. The statistics show an importation of $2,000,000 worth of soda ash per annum, even under present conditions. Does the Senator from Louisiana believe that it would be for the interests of the American people to have that soda ash produced here, provided it did not bring about an increase in the rate of duty?

Mr. CAFFERY. What is the question?

Mr. ALDRICH. Does the Senator from Louisiana think it would be desirable to have $2,000,000 worth of soda ash made in the United States instead of Great Britain, provided it can be done without the bringing about of any increase in the price?

Mr. CAFFERY. It is already made here. The Senator is asking me if something ought not to be done when we are doing it already.

Mr. ALDRICH. We imported last year $2,000,000 worth. I

am talking about the $2,000,000 worth we imported, not about what has been made here.

Mr. CAFFERY. It is nearly the amount stated by the Senator; it is $1,970,000, but on the ratio of decrease of importation under the present tariff we will soon make it all and not import any. The importations have fallen off from $4,800,000 to $1,970,000, and why, under that state of facts, are we called upon to increase the duty?

Mr. CHILTON. The question of the increase of duty on soda ash involves also the rearrangement of the duties on soap, glass, paper, and various other manufactures into which it enters. As I understand it, no effort was made in the House to increase this duty from one-fourth to three-eighths of a cent a pound, on the theory that it would involve the rearrangement of all the other schedules. I desire to ask the Senator from Rhode Island if any such rearrangement has been made by the Senate committee of the tariff on soap, glass, paper, and other things into which soda ash enters as an element of manufacture?

The Senator from Louisiana [Mr. CAFFERY] has pointed out, which of course is known to all who have examined the subject, that the importations of soda ash were less in 1896 than they were in 1893. They have been less under the Wilson Act than they were under the McKinley Act. I can not see, to save my life, how that is reconcilable with the statement which is referred to by the Senator from Rhode Island, that English manufacturers have rushed soda ash into this country for the purpose of cheapening the price and driving out of business the American manufacturers when we see a diminution in the importations of this article.

It does seem to me that one-fourth of a cent a pound on soda ash is an ample duty. That was the duty, I understand, under the McKinley Act, it was the duty under the Wilson Act, and now we are called upon actually to increase the duty of the McKinley Act and the duty of the Wilson Act over 50 per cent, although in the progress of these years the importations of this article have steadily declined.

Mr. ALDRICH. Mr. President, just a word in reply to the question of the Senator from Texas [Mr. CHILTON]. No readjustment of rates upon any of the articles named will be necessary if this rate is imposed. The additional rate is $2.80 a ton, or something like that, while the decline in price from 1896 to 1897 was over $4 a ton. If the whole duty should be added to the present price, we then would not go back to the conditions of a year ago.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 75, page 14, line 24, after the word "silicate," to strike out "three-eighths of 1 cent" and insert "one-half of 1 cent;" so as to make the paragraph read:

75. Silicate of soda, or other alkaline silicate, one-half of 1 cent per pound.

The amendment was agreed to.

The next paragraph was read as, follows:

76. Sulphate of soda, or salt cake, or niter cake, $1.25 per ton.

Mr. VEST. I want to call attention to the fact that under the McKinley Act, where the duty was $1.25 per ton, the imports were $221,846, while under the Wilson Act, where the duty was entirely taken off, the imports were only $71,801. The price also fell from $11.25 to $6.25 a ton. Now, instead of putting it upon the free list, in order to make it cheaper to the people of the United States, and in order to protect the manufacturers of the United States, because under the free list the imports fell off, we go back to a duty of 25 per cent ad valorem.

The next amendment was, on page 15, after line 2, to insert as an additional paragraph:

76½. Sea moss, 10 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 77, page 15, line 4, after the word "sponges," to strike out "crude or in their natural state;" so as to read:

77. Sponges, 20 per cent ad valorem; manufactures of sponges, or of which sponge is the component material of chief value, not specially provided for in this act, 40 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed, as follows:

78. Strychnia, or strychnine, and all salts thereof, 30 cents per ounce.
79. Sulphur, refined or sublimed, or flowers of, $8 per ton.

Mr. JONES of Arkansas. I will not make any motion in connection with the last paragraph read, but I desire to call the attention of the Senate to the fact that the imposition of $8 a ton on refined sulphur instead of the 20 per cent that exists now is an increase of more than 100 per cent in the rate of taxation on that article, and the same is true in regard to flowers of sulphur. It is an increase of more than 100 per cent in the rate of taxation.

Mr. ALDRICH. It is less than the McKinley rate, however.

Mr. BACON. I want to call attention to the fact that that article of sulphur enters very largely into the manufacture of commercial fertilizers.

Mr. ALDRICH. Not this kind of sulphur.

Mr. BACON. Possibly not. I do not know all the different varieties.

Mr. ALDRICH. The sulphur that enters into the manufacture of sulphuric acid is on the free list.

Mr. BACON. In what paragraph is that?

Mr. ALDRICH. Paragraph 646, on the free list.

The PRESIDENT pro tempore. The amendment of the committee will be considered as agreed to, if there be no objection.

Mr. WHITE. It seems to me that where an amendment is criticised by any Senator on this side of the Chamber it should not be entered as agreed to without objection.

The PRESIDENT pro tempore. The paragraph will be held open if there is criticism of it.

Mr. JONES of Arkansas. There is a decided objection to all of these increases on this side of the Chamber. They are agreed to because the majority is on the other side, but they are not agreed to without objection.

The PRESIDENT pro tempore. The next amendment of the committee will be stated.

The next amendment of the Committee on Finance was, on page 15, line 12, after the word "ground," to strike out "four-tenths" and insert "three-tenths;" so as to read:

80. Sumac, ground, three-tenths of 1 cent per pound.

The amendment was agreed to.

The next amendment was, on page 15, line 14, after the word "vanillin," to strike out "70 cents per ounce" and insert "50 per cent ad valorem;" so as to read:

81. Vanillin, 50 per cent ad valorem.

Mr. QUAY. My colleague [Mr. PENROSE] has, within a few minutes, been called from the Chamber, and may not return for an hour or two. I understood him to desire the committee to have this item go over. I know nothing about it, but shall be glad to have it passed over until my colleague returns to the Chamber.

Mr. ALDRICH. I have no objection to that course.

The PRESIDENT pro tempore. The item will be passed over.

Mr. JONES of Arkansas. Before that is passed over, I desire to present an article clipped from the New York Times some time ago. I know nothing myself as to the correctness of the statement, but I present it to the Senate. It says, among other things:

Francis C. Dodge, of Dodge & Olcott, said yesterday that the spirit in which the bill is conceived may be shown by a single illustration. "There are," said he, "a number of ingredients, oils, essences, etc., that we must import. They are not made in this country, and a high tariff can not possibly give any encouragement or aid to anybody. It can only injure those of us who are manufacturing certain products for the American market. Take vanillin, for instance.

"Vanillin is a synthetic product, largely used as a substitute for vanilla in confections and extracts. I believe that only one man in this country manufactures it, and he produces only an infinitesimal part of what is used; and yet the duty has been put at 100 per cent, I believe, thus doubling the cost to us of an article that is necessary and which can not be obtained in the United States.

"Similar duties on other necessary ingredients make the Dingley bill very offensive to us. It seems to me to reveal a settled hostility to this section of the country. I believe that the effect of its high duties on drugs and chemicals will be to drive the manufacture of a large number of articles from America to France and other countries of Europe.

"There can be no claim after this injury is done that the members of Congress were not aware of the danger with which the bill threatened our own trade interests. I know that the Senators have been fully advised of the injury to our business. The bill will fail, I believe, as a revenue measure, and it can only bring injury and disaster to the drug and chemical trade."

I know nothing of the merits of the case.

Mr. ALDRICH. We must have suggested, then, a reduction of 50 per cent in our rates if that statement is correct.

Mr. JONES of Arkansas. The writer says you have increased the rate 100 per cent.

Mr. ALDRICH. Oh, no. The writer means the House rate. We have reduced it to 50 per cent. It certainly can not be more than that.

Mr. JONES of Arkansas. There are no data in the comparative statement furnished by the majority of the committee so that we can know what the present cost of the article is, and I have no idea what the rate of taxation is except it is stated at 50 per cent ad valorem in the Senate bill, whereas it was 70 cents an ounce in the House bill. I have no means of comparing the rates. I do not know whether one is an increase over the other or not.

Mr. SEWELL. The only factory in this country engaged in the manufacture of vanillin is located in my city. The price was $5 an ounce some time ago, but the German chemists, in order to crowd out this factory, have been diminishing the price until they have brought it down to $1.50, so that the works are closed. A mere ad valorem would not answer any good purpose at all. Therefore I should like the item to go over for a further consideration.

The PRESIDENT pro tempore. The item will be passed over, in the absence of objection.

Mr. ALDRICH. Before we pass over the chemical schedule, I have an amendment to the phraseology on page 8, lines 13 and 14,

which I desire to offer for the committee. I move to strike out the paragraph as it stands and insert in lieu of it what I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. It is proposed to strike out paragraph 6 and insert in lieu thereof:

6. Tartarate of soda and potash, or Rochelle salts, and partly refined argols, tartars, and less crystals, 3 cents per pound; cream of tartar, 5 cents per pound.

Mr. ALDRICH. That makes no change in the rates, but simply a change of description.

The amendment was agreed to.

The reading of the bill was resumed at Schedule B—Earths, earthenware, and glassware. The next amendment of the Committee on Finance was, on page 15, line 22, after the word "decorated," to strike out "thirty" and insert "forty-five;" and on page 16, line 2, after the word "manner," to strike out "thirty" and insert "forty-five;" so as to make the paragraph read:

82. Fire brick, not glazed, enameled, ornamented, or decorated in any manner, $1.25 per ton; glazed, enameled, ornamented, or decorated, 45 per cent ad valorem; brick, other than fire brick, not glazed, enameled, painted, vitrified, ornamented, or decorated in any manner, 25 per cent ad valorem; if glazed, enameled, painted, vitrified, ornamented, or decorated in any manner, 45 per cent ad valorem.

The amendment was agreed to.

Mr. ALDRICH. Before we leave paragraph 82, I have an amendment to suggest for the committee, after the words "fire brick," in line 19, to insert "weighing not more than 10 pounds each."

Mr. JONES of Arkansas. Where does that amendment come in?

Mr. ALDRICH. After the words "fire brick," in line 19, on page 15. It limits the weight of the fire brick provided for at $1.25 per ton to 10 pounds each.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Rhode Island will be stated.

The SECRETARY. On page 15, line 19, after the words "fire brick," it is proposed to insert "weighing not more than 10 pounds each."

Mr. BACON. Will the Senator please state the object of that amendment?

Mr. ALDRICH. It is to make the description of fire brick apply to what are commercially known as fire brick entirely, and not to apply to other products of fire clay, such as tank blocks and blocks of various kinds, made in various shapes, which have become dutiable under an ad valorem rate instead of a specific.

Mr. WHITE. I should like to ask the Senator whether it is not a fact that under the Wilson law rates, which are proposed to be increased here, the importation of these bricks is very slight? The record which we have before us seems to show that there are comparatively no importations. I notice on page 28 of the comparative statement that the importations of bricks amounted to practically nothing, and I should like to inquire the reasons for this general increase?

Mr. ALDRICH. If the Senator will look under the last item, he will find there were importations of 2,521.68 tons, valued at $28,510.14.

Mr. WHITE. We find that "not glazed, enameled, ornamented, or decorated in any manner," in value the importations amount to $74,443.22; "glazed, enameled, ornamented, or decorated," to $10,379.59; "brick, other than fire," $14,929.96; "ornamented, glazed, painted, enameled, vitrified, or decorated," $48,662; "brick (act of 1894) not glazed, enameled, ornamented, or decorated in any manner," $89,605.06; "glazed, enameled, ornamented, or decorated," $12,054.32; "magnesic fire brick," $28,510.14.

Those importations seem to me to constitute but a very small part of the consumption. That is the fact, I suppose. They appear to be quite insignificant; but it strikes me as rather remarkable that it should be found necessary to raise not only the rate in the Senate bill, but also the rate fixed by the House of Representatives.

Mr. ALDRICH. Fire brick remains the same.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Rhode Island [Mr. ALDRICH].

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 16, beginning in line 4, to strike out paragraph 83, as follows:

83. Tiles, glazed or unglazed, encaustic, ceramic mosaic, vitrified, flint, spar, embossed, enameled, ornamental, hand painted, gold decorated, and all other earthenware tiles for floors and walls, valued at not exceeding 40 cents per square foot, 8 cents per square foot; exceeding 40 cents per square foot, 10 cents per square foot and 25 per cent ad valorem.

And in lieu thereof to insert:

83. Tiles, not enameled, embossed, glazed, painted, vitrified, ornamented, or decorated in any manner, 25 per cent ad valorem; if enameled, embossed, glazed, painted, vitrified, ornamented, or decorated in any manner, including flint, spar, and encaustic tiles, 45 per cent ad valorem.

Mr. ALDRICH. I suggest that that paragraph may go over. The committee are investigating as to some changes proposed to be made to it.

Mr. TURPIE. Will the Senator from Rhode Island say when it will be considered?

Mr. ALDRICH. It is being considered now by the committee. We are considering some changes of the House rates.

Mr. TURPIE. When shall we return here to its consideration?

Mr. ALDRICH. Probably to-morrow.

The reading of the bill was resumed at line 19, on page 16, as follows:

Cement, lime, and plaster:

84. Roman, Portland, and other hydraulic cement, in barrels, sacks, or other packages, 8 cents per 100 pounds, including weight of barrel or package; in bulk, 7 cents per 100 pounds; other cement, 20 per cent ad valorem.

Mr. ALDRICH. On behalf of the committee, I move to strike out in line 21 the word "eight," before "cents," and insert "eleven," and in line 23, before the word "cents," to strike out "seven" and insert "ten."

Mr. VEST. Mr. President, that is an increase of 3 cents over the McKinley Act and 3 cents over the act of 1894. Under what sort of argument can such an increase as that be made? I should like to hear from the Senator. There are some special interests now considered in this matter, I suppose.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Rhode Island [Mr. ALDRICH] will be stated from the desk.

The SECRETARY. In line 21, on page 16, after the word "packages," it is proposed to strike out "eight" and insert "eleven;" and in line 23, after the word "bulk," to strike out "seven" and insert "ten;" so as to make the clause read:

84. Roman, Portland, and other hydraulic cement, in barrels, sacks, or other packages, 11 cents per 100 pounds, including weight of barrel or package; in bulk, 10 cents per 100 pounds; other cement, 20 per cent ad valorem.

Mr. WHITE. This article is used, of course, all over the United States, and although we have what is called Portland cement manufactured in the United States, it is the experience of those who have been engaged in the portion of the country from which I come in the manufacturing or making of dams designed to resist great pressure that the quality of the American cement is not equal to that of the real, true Portland cement, which is imported, and hence as to many of these works it is absolutely impossible to substitute the American article. While there is now a cement being made in this country which is very good, yet I believe for a large class of work it can not be used with equal success as can the Portland cement.

I observe that the law of 1890 fixed the rate at 8 cents per 100 pounds, the law of 1894 the same, the House bill the same, and the bill as reported to the Senate by the committee fixed it also at the same sum. It must certainly be an impediment in the construction of public buildings, and so on, to add this increased duty. The American manufacturers of the article are not now in a position to meet the demand, and the rates, especially in those portions of the United States remote from the Eastern seaboard, will be greatly affected by this amendment. Of course, on the Western coast, whose supply will necessarily come from England by water anyhow, the result of this tariff imposition will be to add that specific amount to all of the article there consumed.

But it seems to me, as the rate has stood so long, as it has been satisfactory to all parties heretofore, and as the article is used so generally and so necessarily in construction of all kinds, there ought to be some adequate reason, some very strong reason, susceptible of being urged for this great rise. A change from 8 cents to 11 cents is decidedly marked, and I have not seen anything in the hearings before the House committee or elsewhere to justify it.

Mr. PETTIGREW. Mr. President, we manufacture in this country two kinds of cement. We manufacture 7,000,000 barrels per year of common cement, made from rock roasted and ground. We also manufactured 1,000,000 barrels last year of Portland cement, equal in quality to the best imported foreign cement. Portland cement is made from a mixture of chalk and clay. The proportions have to be exactly right. It is pulverized, and then mixed with water so that it will flow; it is then dried, broken up into chunks, dried in the sun, or dried artificially, and placed in kilns with coke and burned to a cinder—burned very hard; it is then again broken under rock pressure; then ground with burr stones as fine as flour. That is the process of making Portland cement. An immense amount of labor is employed in the manufacture of this cement. The difference between the labor cost of a barrel of cement in the United States and in Germany is 71 cents.

The industry started in this country in 1882. We then manufactured 85,000 barrels. Last year we manufactured 1,000,000 barrels. We imported last year 3,000,000 barrels. The average freight on a barrel of cement from Stettin, Germany, where most of our cement comes from, to Chicago is just the same as the freight on a barrel of cement from South Dakota to Chicago. We manufacture in South Dakota—the tariff, I think, is a local issue

largely—the best Portland cement in the world, we having immense deposits of chalk and black clay, having a large per cent of aluminum in it. We have raw material enough to supply the universe for all time to come.

We made the year before last 48,000 barrels. If the Government owned the railroads and established honest and decent freight rates, and we had duty enough so as to make up the difference in wages between this country and foreign countries, we should have made a million barrels in South Dakota, and supplied the entire country west of Cleveland. As it is, we supply but a little area about the mills, because the cement comes from Germany in ballast during certain seasons of the year, and then they meet us with a freight rate from Stettin to Chicago as cheap as that from South Dakota to Chicago, besides having the advantage of cheaper labor in those countries. Therefore I intended to move to increase the duty from 8 cents a hundred pounds to 12½ cents, which is the Canadian rate; but I am willing to accept the amendment offered by the committee of 11 cents a hundred pounds. That I believe will enable us to reach Chicago, because our cement is superior to the imported cement.

This cement is used in building great buildings and building bridges and works beneath the surface and works constructed in the water. A large proportion of the cement used in this country is consumed in New York and the other large cities in the erection of their great fifteen, twenty, and twenty-five story buildings. It is a revenue duty almost entirely, and so far as they are concerned, I am willing that they should pay it. I think it ought to be higher than it is. I am willing that the millionaires who are erecting those great buildings shall pay this additional duty on the cement they use, which is all brought into New York and Philadelphia and into the great coast and interior cities.

This increase of duty will give the American manufacturers the trade of the interior cities of this country, and they may be able to sell some cement on the seaboard. About 500,000 barrels are manufactured in Pennsylvania and New York. There are twenty-two factories making this cement in the United States. I therefore believe that this amendment ought to be adopted.

In this connection, I ask to have the paper which I send to the desk printed in the RECORD and printed also as a document for the use of the Senate.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it will be so ordered.

The paper referred to is as follows:

THE PORTLAND CEMENT INDUSTRY.

Statement of the Portland cement industry in the United States as an argument in behalf of a protective rate of duty on the imported product.

The seventeenth annual report of the United States Geological Survey—subject, "Mineral resources of the United States, 1895"—contains these statements:

"The production of Portland cement in the United States during the year 1895 reached a total of 990,324 barrels, as compared with 798,757 barrels in 1894, an increase of 191,567 barrels, or 24 per cent. The increase is to be found almost wholly in the output of the larger factories in New York, New Jersey, Pennsylvania, and Ohio, several of which showed nearly double the production reported for 1894. * * * The only new factory started in 1895 was one at Phillipsburg, N. J. There were therefore 22 factories producing Portland cement in 1895, as compared with 24 in the previous year. * * * The imports of cement for the year 1895 were 2,907,395 barrels, a decided increase over 1894. From this it appears that the increased production of the American factories has by no means kept pace with the growing demand for Portland cement in this country."

In the same report are tabulated statements (page 882) showing that in five years the increase in the domestic production of Portland cement was 191,567 barrels and the increase in importation was 359,288 barrels. The report continues:

"From this it appears that the increased production of the American factories has fallen far short of supplying the increased demand. New uses for Portland cement are being found every day, and the rapid adoption of concrete construction causes a steadily increasing demand. Portland cement is also coming rapidly into use for building purposes in place of cheaper natural rock cements, the production of which in 1895 shows only a very slight increase over the previous year. To meet the increased importation of Portland cement, if the increase in demand should be maintained, as appears decidedly probable, it would be necessary to establish a factory every year capable of producing 1,000 barrels per day.

"With the general extension of knowledge of correct methods of testing, American Portland cements are rapidly gaining recognition as fully equal to imported, and the prejudice which once existed against the domestic product has almost entirely disappeared. The writer believes that careful study of the tests of American and foreign cements, as shown by the records of city and Government engineers in various parts of the country, will show that there is no cement made in any foreign country which will show as high tests, at long or short periods, as the product of any one of the three or four leading American factories. During the year 1895 the capacity of all the American works was taxed to the utmost, and it is safe to say that had the supply of the domestic product been equal to the demand, the increased importation would not have taken place."

The quality of American Portland cement is thus officially vouched for in the report of the Geological Survey. Unofficial testimony coincides with that given by the Government experts, and shows, further, that in some localities within the United States a Portland cement is produced which tests even higher in grade than the best imported article. Results of this satisfactory character have been obtained in South Dakota, where one factory is in operation at Yankton, and has been producing cement for a number of years from the chalk rock and clay of the Missouri River bluffs. There is enough of the raw material in the State of South Dakota to supply the United States with Portland cement of the very best quality, the deposits of chalk rock and clay along the Missouri River being practically inexhaustible.

The cement manufacturers of South Dakota find themselves limited to a small area of sale territory for the reason that even in that far West region foreign competition restricts their operations to a narrow field. Portland cement from Germany, Denmark, and other European countries can be laid down in Chicago as cheaply as from South Dakota, and the product of South Dakota is unable to meet foreign competition farther east than the Mississippi River.

The same restrictive conditions apply to the Portland cement manufactured in the States of Pennsylvania, Ohio, New Jersey, California, New York, Colorado, Indiana, Illinois, Texas, and Utah. Everywhere the native product meets the results of European cheap labor and cheap ocean freights, and is unable to thrive in competition without a reduction of wages to the starvation level. This occurs with an abundance of raw material awaiting the creative skill of the American workman.

In South Dakota, with the opening of the 1897 cement-manufacturing season, the wages of quarrymen were reduced from $1.25 to $1.10 per day, the men being told that competition rendered this cut necessary.

The total number of barrels of Portland cement produced for the years 1894 and 1895 in the eleven cement States was:

State.	1894.	1895.
California	19,300	16,283
Colorado	15,000	.....
Illinois	300	750
Indiana	4,000	.....
New York	117,000	159,320
New Jersey	72,223	155,000
Ohio	80,653	136,698
Pennsylvania	437,106	504,276
South Dakota	43,500	6,497
Texas	8,000	10,000
Utah	1,400	1,500

The United States produced in these two years 1,789,081 barrels of Portland cement, and imported for the same period 5,635,502 barrels, giving a total domestic consumption of 7,424,583 barrels. The bulk value of Portland cement in 1894 was $1.73 per barrel, and in 1895, $1.60 per barrel. The importation for the two years aggregated in value $9,359,757. The barrel value of this imported cement for the period considered is not available for this statement, but it was considerably more than the bulk value. The importations for the two years approximated $10,000,000, all of which would have been saved to the United States under an adequate protective clause in the tariff law.

To place the American manufacturers of Portland cement in a position to utilize the vast supply of raw material at hand, there should be placed upon the commodity a duty of 13 cents per 100 pounds in barrels, and 12 cents per 100 pounds in bulk.

The present duty on Portland cement does not equal the difference between the cost of labor in manufacturing in Germany and in this country.

By the report of the directors of the various German Portland cement companies, volume 16, Nos. 24, 29, etc., of the Thon Industrie Zeitung, of Berlin, Germany, it appears that it takes about one day's labor to make 1¼ barrels of Portland cement (the best equipped plants there only averaging 1.5 to 1.6 barrels to the day's labor).

The greater portion of the best Portland cement brought to this country comes from north Germany.

Half or three-fourths of the laborers in a Stettin or North German factory get three-fourths of a mark to a mark per day, or 18 to 24 cents per day, while the common laborers in the Portland cement factories in the United States get not less than $1.10 per day. The difference is 89 cents per day, or 71 cents per barrel.

Over three-fourths of all the Portland cement used in this country is and has always been imported, and the quantity imported has increased year by year.

An increased duty on Portland cement would increase the income of this Government on that article for a number of years; but after a few years a sufficient number of new factories would be built in this country to supply the home demand, and it would not be long, under adequate protection, before the stimulus of competition would, by inventing improved methods and machinery, enable the American Portland cement factories to defy any competition.

As the tariff has not protected the home plants, European competition has ruined many American Portland cement manufacturers and resulted in the loss of over a million dollars.

Some of these plants were located at Kalamazoo, Mich.; New Brunswick, N. J.; East Kingston, Wallkill, Rondout, and Cassadaga, N. Y.; South Bend, Ind.; Austin, Tex.; Newport, Ky.; Chicago, Ill.; Los Angeles and San Diego, Cal., and Portland, Oreg.

The 300 plants in Europe have used this country as a dumping ground for their surplus and dregs, and often sell here at less than cost.

It would be only long-delayed justice if the Portland cement industry in this country were recognized by Congress and were accorded adequate protection.

Russia, to start the production of Portland cement, levied a duty of 72 cents per barrel, and Austria of 46 cents per barrel; although labor is lower in those countries than in Germany and England, who were formerly supplying the cement.

Germany levies protective duties regardless of the difference in the wages, which difference is usually in her favor.

Canada imposes a duty of 12½ cents per hundredweight on Portland cement.

There is probably no industry in this country that deserves encouragement and protection more than the manufacture of Portland cement.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Rhode Island [Mr. ALDRICH].

Mr. VEST. I ask for the yeas and nays on that amendment.

Mr. BACON. Before the vote is taken, I desire to say that the Senator from South Dakota [Mr. PETTIGREW] is very much mistaken when he suggests that the use of cement is limited to cities where millionaires are building twenty-story houses. There is scarcely a community in the whole United States that does not use a very considerable amount of cement, and while 3 cents per 100 pounds looks like a very small addition, it is in fact an increase of nearly 40 per cent over the present rate.

Mr. PETTIGREW. I should like to say this is Portland cement.

Mr. BACON. I understand.

Mr. PETTIGREW. We manufacture 7,000,000 barrels of common cement, which the duty does not affect, and supply the market for all the country places and for all works above ground.

Mr. BACON. It is a mistake to say that cement of that class supplies all of the country places. I know from personal knowledge that the imported Portland cement is very largely used all through the portion of the country in which I live, where it is considered absolutely essential for all high-class work.

Mr. President, I do not understand from the statement of the Senator from South Dakota that the industry which he speaks of in his State is one which is not profitable at the present rate; and to put this additional duty of nearly 40 per cent over the present rate is to impose a very serious burden upon a great many people other than the class of which the Senator speaks.

Mr. PETTIGREW. I wish to say, in reply to the Senator, that two years ago we produced 48,000 barrels; but we can not reach Chicago or even Dubuque because of the imported cement. All that we produced, 48,000 barrels, was used west of the Mississippi River, west of Dubuque. We supply that whole country, and it took but 48,000 barrels to do it.

Mr. BACON. Are not these enterprises profitable at the present rates?

Mr. PETTIGREW. On the contrary, last year we produced but 6,000 barrels. The production fell off from 48,000 to 6,000 barrels, because we could not reach the cities in the country, and the people are impoverished, and they are unable to buy or build or use any cement at all. The cement being used in this country is for building the great structures in the centers of business, where the men live who are filching from the producers, who live in the country, the little they produce.

Mr. BACON. The Senator is very much mistaken when he limits it to that class of people.

Mr. CAFFERY. I do not perceive any demand for any increased tariff on Portland cement or Roman cement from those who have appeared before the Committee on Ways and Means of the House of Representatives. Those persons appeared to represent all the companies engaged in the business of the cement industry, and some of them say—I have not read the statements very particularly—that there ought to be a reduction of duty. One very large firm state that the duty ought to be reduced to 5 cents per 100 pounds from 8, but none of them asked for an increase. They all say that the industry will flourish under the present rate of 8 cents per 100 pounds, and here we are asked, without any opportunity of looking into the matter any further than is disclosed by these tariff hearings, to increase this duty very largely.

I think, Mr. President, that this is running protection a little mad. The imports have not increased under these rates. There is no danger of foreign competition running this industry out, but there is danger that this additional 3 cents per 100 pounds will lay a very heavy burden upon the American people. Portland cement is used in every structure of stone and iron, and in jetties and works of that description.

Mr. BACON. And in all works under ground.

Mr. CAFFERY. Yes; and this is an unnecessary raise, uncalled for either by protection or revenue. If the purpose is to decrease revenue, to make a perfect prohibition against the introduction of any foreign cement, then I can perceive why the additional tariff is asked.

Here, according to the tariff hearings, there are some eighty-two establishments engaged in the work of making cement, scattered all over the United States, and from what the Senator from South Dakota says I understand he wants this tariff rate raised to equalize transportation. Some of the gifts of nature and natural advantages ought to be left alone. Those on the seaboard ought to enjoy the benefit of living there. When there is a tariff that is universally accepted, that nobody complains of, to have the gifts of nature thrown aside for the individual or local interest of some locality remote from the seaboard, I think is a little too hard for us to bear.

Mr. BACON. I call the attention of the Senator from Louisiana to the fact that the Senator from South Dakota states an additional motive. He states that one trouble they are under is that the people of the country are too poor to buy that which the manufacturers now produce, and he proposes by this increased tariff to give them additional means for that purpose.

Mr. PETTIGREW. I propose to give them an additional market, so as to let them reach cities where they can buy, such as Dubuque and Chicago. That is the point I make, and I trust the Senator does not intend to misrepresent me.

Mr. CAFFERY. To make them rich by making them poor. That is the process of the tariff all the way along the line.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Rhode Island [Mr. ALDRICH], on which the Senator from Missouri [Mr. VEST] has called for the yeas and nays.

The yeas and nays were ordered.

Mr. COCKRELL. Let the amendment be again stated.

The SECRETARY. On page 16, line 21, after the word "packages," it is proposed to strike out "eight" and insert "eleven;" and in line 23, after the word "bulk," to strike out "seven" and insert "ten;" so as to make the paragraph read:

84. Roman, Portland, and other hydraulic cement, in barrels, sacks, or other packages, 11 cents per 100 pounds, including weight of barrel or package; in bulk, 10 cents per 100 pounds; other cement, 20 per cent ad valorem.

The Secretary proceeded to call the roll.

Mr. BATE (when his name was called). I am paired with the junior Senator from Kentucky [Mr. DEBOE]. If he were here, I should vote "nay."

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. If he were here, I should vote "nay."

Mr. DANIEL (when his name was called). I am paired with the Senator from Connecticut [Mr. HAWLEY]. If he were here, I should vote "nay."

Mr. PASCO (when his name was called). I am paired on this vote with the Senator from Utah [Mr. CANNON]. In his absence I withhold my vote.

Mr. WALTHALL (when his name was called). I am paired with the junior Senator from Wisconsin [Mr. SPOONER]. If he were present, I should vote "nay."

The roll call was concluded.

Mr. KENNEY. I announce that I have a general pair with the junior Senator from Pennsylvania [Mr. PENROSE]. He not being present, I withhold my vote.

Mr. JONES of Arkansas (after having voted in the negative). I withdraw my vote. I am paired with the Senator from Maine [Mr. HALE].

Mr. WILSON. I desire to announce that my colleague [Mr. TURNER] is paired with the senior Senator from Massachusetts [Mr. HOAR].

Mr. BATE. I desire to announce that my colleague [Mr. HARRIS of Tennessee] is detained from the Senate by sickness. He is paired with the Senator from Vermont [Mr. MORRILL]. I make that announcement for the day.

Mr. GRAY (after having voted in the negative). I ask if the senior Senator from Illinois [Mr. CULLOM] has voted?

The PRESIDENT pro tempore. The Chair is informed that he has not voted.

Mr. GRAY. I have a general pair with that Senator, and withdraw my vote.

The result was announced—yeas 30, nays 18; as follows:

YEAS—30.

Aldrich,	Fairbanks,	Kyle,	Quay,
Allison,	Foraker,	McMillan,	Shoup,
Baker,	Frye,	Perkins,	Stewart,
Burrows,	Gallinger,	Pettigrew,	Warren,
Carter,	Gear,	Platt, Conn.	Wetmore,
Chandler,	Hanna,	Platt, N. Y.	Wilson.
Clark,	Hansbrough,	Pritchard,	
Elkins,	Jones, Nev.	Proctor,	

NAYS—18.

Bacon,	Faulkner,	Mills,	Turpie,
Berry,	Heitfeld,	Morgan,	Vest,
Caffery,	Lindsay,	Murphy,	White.
Chilton,	McEnery,	Pettus,	
Cockrell,	Mallory,	Rawlins,	

NOT VOTING—40.

Allen,	Gorman,	McBride,	Sewell,
Bate,	Gray,	Mantle,	Smith,
Butler,	Hale,	Martin,	Spooner,
Cannon,	Harris, Kans.	Mason,	Teller,
Clay,	Harris, Tenn.	Mitchell,	Thurston,
Cullom,	Hawley,	Morrill,	Tillman,
Daniel,	Hoar,	Nelson,	Turner,
Davis,	Jones, Ark.	Pasco,	Walthall,
Deboe,	Kenney,	Penrose,	Wellington,
George,	Lodge,	Roach,	Wolcott.

So the amendment was agreed to.

The reading of the bill was resumed and continued to the end of paragraph 86, on page 17.

Mr. BAKER. I desire to have paragraph 86 passed over for the present, if there is no objection.

Mr. ALLISON. There is no objection.

The PRESIDENT pro tempore. Without objection, the paragraph will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 87, page 17, line 8, after the word "manufactured," to strike out "one-half of 1 cent per pound" and insert "15 per cent ad valorem;" and in line 10, before the words "per centum," to strike out "twenty" and insert "ten;" so as to make the paragraph read:

87. Pumice stone, wholly or partially manufactured, 15 per cent ad valorem; unmanufactured, 10 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 88, line 21, after the word "ton," to strike out "bauxite, or beauxite, crude, not refined

or otherwise advanced in condition from its natural state, $1 per ton;" so as to make the paragraph read:

Clays or earths:

88. Clays or earths, unwrought or unmanufactured, not specially provided for in this act, $1 per ton; wrought or manufactured, not specially provided for in this act, $2 per ton; china clay or kaolin, $2 per ton; asphaltum and bitumen, crude, if not dried, or otherwise advanced in any manner, $1.50 per ton; if dried or otherwise advanced in any manner, $3 per ton.

Mr. PRITCHARD. I desire to have the amendment passed over informally.

Mr. VEST. The paragraph or the amendment?

Mr. PRITCHARD. The paragraph.

Mr. ALLISON. There is no objection to passing the amendment over.

Mr. PRITCHARD. Let the whole paragraph be passed over.

Mr. QUAY. I rise to ask that paragraph 88 in full be passed over for the present.

The PRESIDENT pro tempore. It will be passed over.

Mr. ALLISON. Before the paragraph is passed over, the committee desire to submit an amendment. In line 17, before the word "asphaltum," we propose to insert "limestone-rock asphalt containing not more than 15 per cent of bitumen, 50 cents per ton;" and after the word "bitumen," in line 18, insert "not specially provided for in this act." Does the Senator from Pennsylvania desire the amendment to be passed over, or can it be agreed to?

Mr. QUAY. I think it had better go over for the present. I do not know that I shall object to it.

Mr. ALLISON. Let it be passed over.

The PRESIDENT pro tempore. The amendment will be passed over.

Mr. GRAY. I should like the attention of the Senator from Iowa for one moment while I make a short statement in regard to paragraph 74½, on page 14, "soda ash, three-eighths of 1 cent per pound." That is another ingredient which is objected to by me on behalf of paper manufacturers and wood-pulp manufacturers in my State, and I should like to have it go over, as the chlorate of lime item went over, until next week.

Mr. PLATT of Connecticut. It has been voted upon.

Mr. GRAY. I was called out of the Senate temporarily when the matter was under consideration, and I ask unanimous consent that it may be passed over.

Mr. STEWART. We had a yea-and-nay vote on it, and I shall object to its going over.

Mr. PLATT of Connecticut. We had a yea-and-nay vote on it.

Mr. GRAY. I should be very much obliged if the Senate would give unanimous consent to its going into the same category. It is a matter about which I have something to say, and I was called away from the Senate.

Mr. ALLISON. I hope the Senator from Nevada will allow this item to be passed over.

Mr. STEWART. When will it be called up?

Mr. GRAY. Say on Tuesday. Monday is Decoration Day. I will agree that it shall be called up on Tuesday.

Mr. STEWART. I have no objection if it will be called up soon.

Mr. GRAY. Oh, yes; I was away from the Senate when it was under consideration.

The PRESIDENT pro tempore. Is there objection to passing over the paragraph?

Mr. STEWART. Until next Tuesday.

Mr. BATE. Which paragraph?

The PRESIDENT pro tempore. Paragraph 74½, on page 14.

Mr. ALLISON. The vote by which the amendment was agreed to ought to be reconsidered by unanimous consent before the paragraph is passed over.

Mr. GRAY. It ought to be reconsidered by unanimous consent.

The PRESIDENT pro tempore. Is there objection to reconsidering the vote by which the amendment was adopted? The Chair hears none. The vote is reconsidered; and the paragraph, without objection, will stand over until Tuesday.

Mr. CLAY. Has paragraph 88 been passed over?

Mr. WHITE. It has been passed over.

The PRESIDENT pro tempore. It has been passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 89, on page 17, line 25, after the word "yellow," to strike out the comma and the word "and;" in the same line, after the word "brown," to strike out the comma and insert the words "and gray;" on page 18, line 1, after the word "plain," to strike out the comma and the word "or;" in the same line, after the word "embossed," to insert "or salt-glazed;" in line 2, after the word "crucibles," to insert "all the foregoing;" and in line 4, after the words "ad valorem," to strike out "Rockingham earthenware, 40 per cent ad valorem;" so as to make the paragraph read:

89. Common yellow brown and gray earthenware, plain embossed, or salt-glazed common stoneware, and crucibles, all the foregoing not decorated in any manner, 25 per cent ad valorem.

Mr. JONES of Arkansas. This being the lowest grade of earthenware and the cheap grade, it certainly ought to bear as low a rate as is consistent with the idea of getting revenue. The tax on it now is 20 per cent. I believe the bill proposes to make it 25 per cent. The revenue was only $66,000 under the 25 per cent rate, and $55,000 under the 20 per cent rate. There is a smaller revenue under the decreased rate of taxation by the extent of about ten or eleven thousand dollars, but the total amount of revenue from it shows there is a very small amount of importation. It seems to me that it is not proper to increase the rate by the small rise of 5 per cent. However, as the committee proposes in this respect no change in the bill as it came from the other House, I will make no motion in connection with it.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was agreed to.

Mr. ALLISON. I ask to have paragraphs 90, 91, 92, and 93 passed over for the present, perhaps until to-morrow. The committee intend to propose some modifications of all the amendments reported to those paragraphs.

Mr. JONES of Arkansas. Will the Senator be ready to take up those paragraphs to-morrow?

Mr. ALLISON. I hope so and think so.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Iowa? The Chair hears none.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 21, after line 15, to strike out paragraph 94, as follows:

94. Plain green or colored, molded or pressed, and flint and lime glass bottles, holding more than 1 quart, and demijohns and carboys, covered or uncovered, and other plain green or colored, molded or pressed bottle glassware, not specially provided for in this act, 1 cent per pound; plain green or colored, molded or pressed, flint or lime glass bottles and vials, holding not more than 1 quart and not less than 1½ pints, 1½ cents per pound; holding not more than 1½ pints and not less than one-fourth of 1 pint, 1½ cents per pound; if holding less than one-fourth of a pint, 50 cents per gross: *Provided*, That none of the above articles shall pay a less rate of duty than 40 per cent ad valorem: *And provided further*, That any of the above articles, if filled and not otherwise specially provided for in this act, and the contents are subject to an ad valorem rate of duty, or to a rate of duty regulated in any manner by the value thereof, the value of such bottles, vials, or other vessels shall be added to the value of the contents for the ascertainment of the dutiable value of the latter, but if filled and not otherwise provided for in this act, and the contents are not subject to an ad valorem rate of duty or to a rate of duty regulated in any manner by the value thereof, or if free of duty, such bottles, vials, or other vessels shall pay, in addition to the duty, if any, on their contents, the rates prescribed in this paragraph.

And insert:

94. Plain green or colored, molded or pressed, and flint, lime, or lead glass bottles, vials, jars, and covered or uncovered demijohns and carboys, any of the foregoing, filled or unfilled, and whether their contents be dutiable or free, except such as contain merchandise subject to an ad valorem rate of duty, or to a rate of duty based in whole or in part upon the value thereof, shall pay duty as follows: If holding more than 1 pint, seven-eighths of 1 cent per pound; if holding not more than 1 pint and not less than one-fourth of a pint, 1½ cents per pound; if holding less than one-fourth of a pint, 45 cents per gross: *Provided*, That none of the above articles shall pay a less rate of duty than 40 per cent ad valorem.

Mr. SEWELL. I ask to have the paragraph go over. I do not object to the rate particularly so much as to the classification, which is different from that agreed to by the House.

Mr. ALDRICH. There is no change of classification from the present law or the act of 1890, I will say to the Senator from New Jersey.

Mr. SEWELL. I am aware of that fact; but there is from the bill as it comes from the other House. One part of the classification is left out, and a very important one.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from New Jersey?

Mr. ALDRICH. I am not going to object to the Senator's request, but we have already passed over quite a number of paragraphs at his request, and it will be necessary to take some of them up in the immediate future.

Mr. SEWELL. The Senator has passed over quite a number, and I am very much obliged to the committee for doing so; but I represent a State which has great manufacturing interests, and this is an essential one and one of our largest. The committee have left out a part of the classification under which the quart bottle is taxed less than the pint; or less protection is given it. I think they ought to give it further consideration before passing upon the paragraph.

Mr. ALDRICH. I will say that we have left out no part of the classification, but if the Senator wants to have the paragraph go over I shall not object.

The PRESIDENT pro tempore. The paragraph will be passed over. The next amendment reported by the Committee on Finance will be stated.

The SECRETARY. On page 23, after line 13, it is proposed to strike out paragraph 95, as follows:

95. Articles of flint, lime, or other glass, molded, pressed, or blown, not specially provided for in this act and not cut, engraved, painted, etched, printed, decorated, stained, silvered, gilded, or otherwise ornamented, 60 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 23, after line 19, to strike out paragraph 96, as follows:

96. Articles of glass, cut, engraved, painted, colored, stained, decorated, silvered, gilded, etched, frosted, printed in any manner, or otherwise ornamented, not specially provided for in this act, and porcelain or opal glassware, 60 per cent ad valorem.

And insert:

96. Glass bottles, decanters, or other vessels or articles of glass, cut, engraved, painted, colored, stained, silvered, gilded, etched, frosted, printed in any manner or otherwise ornamented, decorated, or ground (except such grinding as is necessary for fitting stoppers), and porcelain and opal glassware; all the foregoing, filled or unfilled, and whether their contents be dutiable or free, 60 per cent ad valorem.

Mr. VEST. I wish to call attention to the fact that this is a return to the McKinley rate. The duties in the existing law are 40 and 45 per cent upon the two classifications. We go back to the highest duties that ever have been imposed upon these goods, which were placed upon these articles in 1890.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the Committee on Finance.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 97, as follows:

97. Glass bottles, decanters, or other vessels or articles of glass, when engraved, painted, colored, printed, stained, etched, or otherwise ornamented or decorated, or when cut, frosted, or ground, except only such grinding as is necessary for fitting stoppers, shall, if filled, pay duty in addition to any duty on their contents as if not filled, unless otherwise specially provided for in this act.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 98, page 24, line 20, before the word "cents," to strike out "three-eighths" and insert "one-fourth;" so as to read:

98. Unpolished, cylinder, crown, and common window glass, not exceeding 10 by 15 inches square, 1¼ cents per pound.

The PRESIDENT pro tempore. If there be no objection, the amendment will be considered as agreed to.

Mr. WHITE. I do not think these amendments should be entered as agreed to, for personally I wish to be considered as objecting to all of them.

Mr. JONES of Arkansas. The rate on this unpolished, cylinder, crown, and common window glass under the law as it stands now is 1 cent per pound. The bill as it passed the other House provides for a tax of 1⅛ cents, an increase over the present law of three-eighths of a cent per pound. The Senate committee moves to strike out three-eighths and insert one-fourth. I hope that the Senate will strike out "three-eighths" and will not insert "one-fourth."

I believe that the tax ought to remain as it is now in the Wilson Act, at 1 cent a pound. That gives an ad valorem tax of 39.57 per cent. The bill as it comes from the House proposes to increase it from 39 per cent to 55 per cent, and the Senate proposes to reduce it from 55 per cent to 49 per cent; but it is an increase over 39 per cent.

Mr. MILLS. That is the first part.

Mr. JONES of Arkansas. In the first bracket.

This is an article which enters into universal consumption, as we all know. It is useless to discuss it. There is not a family or a home in the United States which this provision does not propose to tax, and to tax most unreasonably. The glass tax existing at this time is unfair. It is outrageously high. The glass business of the United States is under the control of trusts. There is practically no competition. The men who have combined the glass interests control the trade. They dictate the market. They regulate the output and the handling of the entire product, and there is no occasion, there is no reason, there is no apology for attempting further to strengthen the hands of those men. The profits paid these people are said to be enormous already, and whether they are or not, two window-glass associations control the entire output or almost the whole output of the United States.

Mr. LINDSAY. I will ask the Senator from Arkansas if there has been any increase in importation under the 1-cent tax?

Mr. JONES of Arkansas. There seems to have been a slight increase. There were 12,778,588 pounds imported in 1893, under the particular paragraph we are discussing, and there were 13,154,689 pounds imported in 1896, a very small increase.

Mr. LINDSAY. There has been a decrease in value.

Mr. JONES of Arkansas. There has been a decline in price in that way.

Mr. CHILTON. There has been a decrease in the other bracket.

Mr. JONES of Arkansas. There was a decrease in the more expensive glass, above 16 by 24 inches and not exceeding 24 by 30 inches. There was a decrease of nearly 3,000,000 pounds in the importations.

There was also a large decrease in glass exceeding 24 by 36 inches, and another large decrease by 3,000,000 pounds in the bracket above that, a still larger size. It was only as to the smaller sizes that this prevailed.

Mr. President, in the hearing before the House committee a statement was submitted by the Boston Plate and Window Glass Company. They make statements of fact which the Senate can not afford to ignore, and which the American people will not overlook. I propose to call the attention of the Senate to those statements as well as some others which I have in my possession. Amongst all the iniquities that are involved in the pending bill—and their name is legion—the tax imposed in the window-glass schedule, for the size of it, is perhaps the most monstrous of the whole measure. The crockery schedule is bad enough, but the tax on window glass is absolutely unpardonable. This statement is:

As importers and jobbers of cylinder common window glass, we beg to request that there be no advance in the rates of duties over those now imposed on this article by Schedule B of the present law of August 28, 1894, and that if any change be made in the same there be a reduction of said rates, and for the following reasons——

Mr. SEWELL. What is the Senator reading from?

Mr. JONES of Arkansas. I am reading from a statement made by the president of the Boston Plate and Window Glass Company to the House Committee on Ways and Means in the hearing before the tariff bill was brought in by the committee.

Mr. SEWELL. They are importers?

Mr. JONES of Arkansas. It is signed by Mr. Hills, president.

Mr. CHILTON. What is the page?

Mr. JONES of Arkansas. Page 259.

Mr. GEAR. They are importers?

Mr. JONES of Arkansas. They are importers. They make the statement that they are importers. They say:

As importers and jobbers of cylinder common window glass, etc.

So there is no effort on their part to conceal the fact that they are importers of glass, but they propose to give the reasons. They claim to state the facts. If what they state is true, their contention is certainly correct:

The total yearly consumption of such glass in the United States is at present about 3,000,000 to 3,500,000 boxes of 50 square feet each. Of this total there is imported about 600,000 to 800,000 boxes of 50 square feet. At the present rate of duty there is a protection to the American manufacturers which enables them to supply about three-fourths, at least, of the total consumption.

The present duty is a specific one, but as our own importations of this article are at least as large in quantity as those of any other importer in the United States, they may safely be taken as a guide to show what percentage the rate of duty now paid on the total importations of this article into this country bears to the foreign cost to the importer of the same.

The total duties paid by us on our total importations of common cylinder window glass during the year 1896 amounts to 91.7 per cent of the total cost abroad to us of these importations. This "total cost abroad" includes the cost there to us, on board steamer, of all such glass, and the cost of the boxes and envelopes in which it is packed. In addition to the above, there is the freight from Europe to this country and other charges.

The present tariff, therefore, gives the American manufacturers of this article the enormous protection of nearly 100 per cent over the average cost abroad to the importer. We beg also to strongly oppose the adoption of any additional brackets or divisions to the present tariff. It is now so adjusted that the rate on small-sized glass is lower than that assessed on larger sizes. The small sizes are used principally by the poorer classes of the community and for factories. Any increase of duties on such sizes will bear heavily on these classes. Few, if any, articles of such large use, and the cost of which affects the whole community to the extent that does the cost of window glass, are protected so enormously as is this article.

We have thought it best to state simply the above facts and not trouble your committee with further figures and details, trusting that the above plain statement will be enough to convince your honorable committee that an increase of duties over the present tariff is unwarranted, and that a decrease of 25 per cent on all the schedules of the present tariff would be lessening a tax which bears heavily on the living and business expenses of the whole people and would increase the revenues of the Government by enabling us and other importers to increase importations.

We would add that the business is conducted by us without any combination or agreement on selling prices with any of our competitors or with any manufacturers, and that the manufacturers abroad, from whom we and other importers obtain our supplies, sell in competition with each other and without any combination on selling prices between themselves.

BOSTON PLATE AND WINDOW GLASS COMPANY,
By E. A. HILLS, *President.*

A subsequent statement was submitted by him to the same committee. He says:

We beg to protest against any increase in the present tariff on polished plate glass.

That is plate glass. I will not read the statement at this time, although the arguments applicable to one are to a great extent applicable to the other.

I ask Senators who have not taken the trouble to read these statements over to listen to me while I read a statement made by Messrs. Holbrook Bros., of New York, to the same committee on January 9. It is not long, but it is clear and distinct:

NEW YORK, *January 9, 1897.*

Committee on Ways and Means:

We beg to take the liberty of entering our protest against any increase in the duty on window glass, for the reason that we claim the duty already excessive, being very nearly 100 per cent. Taking as an average for the whole country our own importations for the past year, you will see by the inclosed schedule, which can be readily verified at the customs department, that our average ad valorem duty is 98.58 per cent. As an offset to Mr. BODINE'S argument that the increase in importations since the Wilson bill is over 70 per cent, we beg to give you a list of the importations at this port of entry since 1890:

	Boxes.		Boxes.
1890	594,784	1894	393,335
1891	481,350	1895	226,411
1892	522,014	1896	337,274
1893	430,207		

Showing steady decrease constantly, except between the years 1895 and 1896, and the increase in importations in 1896, as every man who has paid any attention to the subject knows, came from the strikes in the glass works in the United States, their inability to meet the demand, and the increased price—

We account for the increase of 1896 over 1895 as being due to the lockout by the manufacturers.

The total consumption of this country is about 4,000,000 boxes per year, and you can readily see that the importations amount to only about one-seventh.

Four million boxes consumed, 337,000 boxes imported—

It is needless for me to say that a large part of this glass is consumed in building the poorer class of houses, and it would therefore inflict a serious injury to them as well as the florists and gardeners, who are large consumers.

HOLBROOK BROS.

In connection with this letter they set out a table of the importations of unpolished cylinder window glass by Holbrook Bros. from Antwerp for 1896. They give the number of boxes. I will not take the time of the Senate to read the table. I will insert it in the RECORD, so that Senators may see what the actual shipments of this glass paid. It shows the rate per cent by the months that were paid by these people on all of their shipments, which ranged from 1,800 to 4,800 boxes for each month.

The table referred to is as follows:

Importations of unpolished cylinder window glass by Holbrook Bros. from Antwerp for 1896.

Date.	Steamer.	Boxes.	Value.	Duty.	Per cent.
January 3	Rialto	2,521	$3,105.00	$3,158.87	101
January 10	St. Cuthbert	1,255	1,213.00	1,095.54	101
February 4	British King	1,332	1,095.00	1,332.23	101
March 7	St. Enoch	2,245	2,408.00	2,312.23	96
March 26	British King	2,220	2,795.00	2,393.42	85½
April 8	St. Cuthbert	1,885	1,775.00	1,872.49	105
April 29	St. Enoch	2,896	2,698.00	2,979.32	110
May 7	British Queen	2,835	2,771.00	2,708.53	100
May 22	St. Cuthbert	999	1,304.00	1,511.20	116
June 4	British King	2,931	2,749.00	2,507.90	91½
June 22	British Queen	3,678	3,347.00	3,670.40	109½
July 6	St. Cuthbert	4,800	5,540.00	5,352.61	96½
July 20	Britsh King	1,839	1,781.00	1,687.71	90½
August 3	British Queen	1,600	2,190.00	1,801.20	82
August 15	St. Cuthbert	1,794	2,330.00	2,397.10	102½
August 31	British King	1,825	2,458.00	2,585.47	105
September 12	British Queen	104	193.00	171.10	89
September 28	St. Cuthbert	3,032	3,715.00	3,647.38	98
October 12	British King	1,484	1,736.00	1,618.03	95
October 24	British Queen	1,716	1,701.00	1,701.79	100
November 6	St. Cuthbert	2,190	2,924.00	2,763.94	94
November 24	British King	3,091	4,231.00	3,817.62	90
December 8	British Queen	2,507	2,465.00	2,432.38	100
December 19	St. Cuthbert	3,488	4,469.00	4,485.49	100
Total		54,287	60,991.00	60,124.00	.....

Average duty, about 98.58.

Mr. JONES of Arkansas. As I said a few moments ago, it is well known to all gentlemen who have paid any attention to the question that the window-glass production in the United States is in the hands of two companies. They have divided the territory. They do not trespass on each other's territory. One is called the Western Window Glass Association and the other, I believe, is called the Pittsburg Window Glass Association. They have equally divided the country between themselves, and they absolutely control the markets of window glass in their own territory. They sell the glass for whatever price they please, and it is a practical impossibility to bring glass from abroad. With the breakage, the high tariff, the loss in shipment, time, freight, insurance, and its transportation across the country it is practically impossible for the foreign article to enter into consumption at all, and the small percentage of 337,000 boxes, coming into a total consumption of 4,000,000 boxes, is consumed along the Atlantic Seaboard, where they have access by cheap ocean freight to the markets abroad with somewhat less difficulty than the people who live in the central parts of the country and in the West.

It does seem to me, as I said in the beginning, that in the midst of all the iniquities that swarm through this bill from beginning to end none is more absolutely indefensible, none is so outrageous as this proposition to levy a tax on the poor all over this country in this unreasonable and outrageous way, and not for the purpose of building up an infant industry, but for the purpose of upholding the hand of an organized trust that absolutely controls a well-established industry which is old enough to take care of itself. The argument about taking care of infants can not certainly apply now to the conditions existing in this case. They have gone far enough, even under the rates existing under the Wilson Act. This trust has continued to exist and still exists now.

I am one of those who believe that whenever a trust is organized under a tariff existing in this country all the benefit they get by the tariff ought to be taken away from that trust, and we should bring them face to face with any competition that can come to them from any part of the world.

Mr. SEWELL. I do not wish to allow that statement to go unchallenged. I am intimately acquainted and connected with the glass manufacture which is struggling along. A few glass manufacturers in my section have closed down at the present time by reason of the fact that they can not compete with the undervaluation on the other side.

Mr. JONES of Arkansas. I did not understand the Senator's first statement. I thought he said he did not intend to allow the statement that this was controlled by a trust to go unchallenged.

Mr. SEWELL. That is it exactly.

Mr. JONES of Arkansas. Before we get through I think I will establish it.

Mr. SEWELL. I say the glass blowers and manufacturers in my section are struggling along without any trust.

Mr. JONES of Arkansas. There may be individual glass manufacturers in the United States who do not belong to the trust, but I think I will establish the fact, before I get through with this discussion, that nine-tenths of the production of window glass in this country is controlled absolutely by the two associations I have mentioned.

Mr. SEWELL. I do not think the Senator can do that, from the very fact I have stated.

Mr. JONES of Arkansas. If I can not, it is all right.

Mr. SEWELL. New Jersey is one of the largest manufacturers of window glass, and there is no trust there. Not one establishment there belongs to a trust.

Mr. MILLS. The paragraphs in the bill which we are now considering have duties ranging from 107 to 168 per cent.

Mr. ALDRICH. I hope the Senator from Texas will qualify that statement as to the rates suggested by the Senate committee.

Mr. MILLS. I am speaking from the book before me.

Mr. ALDRICH. There is no such rate in the Senate committee's suggestions as 168 per cent.

Mr. MILLS. I find here, above 10 by 15 inches, not exceeding 16 by 24 inches square, 1¾ cents per pound, and it runs out 107.2 per cent. I find above 16 by 24 inches and not exceeding 24 by 30 inches, 2 cents per pound, as fixed by the Senate committee, and it runs out 115.16 per cent. I find in the next paragraph the Senate rate at 2¾ cents per pound, making 126.46 per cent. I find on all above 24 by 36 the Senate rate is 2¾ cents per pound, running out 168.82 per cent.

Mr. ALDRICH. That is evidently a mistake in the computation. I myself noticed that the other day. If the Senator will look at the price per pound, it is 2.2 cents, and at the rate of 2¾ cents the average ad valorem would not be as great as that sum.

Mr. JONES of Arkansas. Where does the Senator find 2.2 cents a pound as the price?

Mr. ALDRICH. In the computations on the bill.

Mr. JONES of Arkansas. I do not find it.

Mr. GRAY. On page 88.

Mr. WHITE. I think the Senator will find that those computations are correct.

Mr. JONES of Arkansas. Two and two-hundredths is given as the price per pound of that glass.

Mr. ALDRICH. No; 2.2.

Mr. JONES of Arkansas. I believe the Senator is right.

Mr. MILLS. Mr. President, there may be some slight error in these figures, but they are approximately correct. We can assume that. I want to know on what principle a tax of 115, or 120, or 130, or 140, or 150, or 168 per cent can be levied on any article. In the early days of our Government, when we were without manufactures, we felt the necessity of having them, and especially the manufacture of articles necessary to carry on a war for the defense of our Government. In those days there were high taxes, but they did not approach within a thousand miles the rate we have to-day. High rates were imposed to build up infant industries to make this country independent and enable us to stand against all the powers of the world. So our factories were built up to a certain extent; and now, sir, they go beyond those of any other nation in the world. We manufacture more than Great Britain and France together, and striking Great Britain out of the list, we manufacture more than the whole Continent of Europe, or somewhere approximately near that point.

It has been stated in the last fifteen or twenty years that our tariff system is alone to be justified by the necessity of making up the difference in the wage cost paid in this country and in foreign countries. A few years ago, when a tariff discussion was precipitated upon the country, and Mr. Blaine returned from Paris and came home, he said that tariff rates were not being imposed for the benefit of the manufacturer. He said the capitalists can take care of themselves; they do not need protection; it is the labor that needs the protection; and he said it was a question of labor from skin to core, and from core back to skin again. I quote his exact words. He said it was a question purely of labor.

Now, then, what is the labor cost on $100 worth of glass as shown by our census returns? Fifty-four dollars. The foreign cost is $44. I give the statement of a manufacturer before the Ways and Means Committee. Ten dollars is the difference in cost of $100

worth of glass. But here we give them the whole labor cost, all the cost of the material, all the cost paid out for interest on their capital, and all the cost expended for the repairs of machinery and keeping up their plants. In addition to that we give them from 107 to 168 per cent as a clear bonus, besides giving them everything that they expend for their labor and for their material and for all other purposes.

Now, they must produce this glass at some profit, after paying for labor and material. In $100 worth of glass they ought to make a profit of ten, fifteen, or twenty dollars; but if they make only $5, they must make something. Why, then, is it that we should give them this enormous duty of $68 on $100 worth of glass or $25 or $50 on $100 worth of glass?

Mr. President, there are two things to consider in these rates. We are imposing upon imported goods two most serious things to our country. One is the enormous burden of taxation that we are imposing upon the great body of our people. We talk about taxing 100 per cent as though it were a trifle. Lay a tax of 3, 4, or 5 per cent upon the capital of this country; go into your cities or into your towns, and you would raise a revolution if you should impose a tax of 5 per cent on the wealth of this country. Yet we stand here with perfect indifference and pile up a taxation of 100, 200, and 300 per cent. We pass over an article here carrying a duty of over 300 per cent, if these figures are correct, and it seems not to attract any attention. The people are exhausted with taxation—indirect taxation. They do not see it, but so much the worse for them. Such a direct tax would produce a revolution in the country. A 5 per cent tax on the wealth of the country would produce a revolution all over the country if it were direct and the people saw it.

That is one serious consideration; and the other pernicious effect from these excessive duties is the restriction of importation. But we do not stop to think how that affects our country, especially the poorer parts of the country, the almost destroyed South, that lives by the production of cotton. I represent in part the largest cotton State in the whole Union. Two-thirds of that product has got to seek a foreign market. Only one-third is consumed in this country. Every time we prohibit $100 worth of goods from coming into this country we prohibit the export of an equivalent amount from the country. Cotton is one of the chief exports. Cotton, breadstuffs, and provisions are the chief exports, and what cuts down the price of exports impoverishes the people. At the same time you are piling excessive taxes upon them to support not the Government—there is no pretense that it is to support the Government—but it is to keep imports from coming to the country, to pile up wealth in the pockets of the trusts, corporations, and combinations to control the politics and government of the country.

Here common window glass is taxed $168 on $100 worth. Is it a crime to look through a window pane? Why are the poor people singled out, who have their little windows to let the light of heaven into their humble habitations; and are they to be told that it is a crime in the eyes of the National Government for them to have window panes?

But what good does all this do? These high rates will be put on, and worse rates will be put on. Your exports will be cut off or reduced in value; your people will be further and further oppressed, and money will be made scarcer, without which it will be impossible to pay debts or to pay the dues to the National, State, and local governments.

Mr. President, there ought to be some reason assigned why these duties are put in here. It is not to protect infant industries. It is not to cover the difference in labor between the cheaper labor of foreign countries and ours. It is to give a bounty to wealth, a bounty to powerful corporations and trusts. The whole country seems to be absolutely in the hands of these powerful creatures, against whom we are powerless to contend.

Mr. GRAY. Mr. President, it would seem as if the tax that is now being discussed before the Senate is one that ought to be made and laid upon the shoulders of the people with great caution and with great consideration. This is practically and really a window tax, the most odious form of taxation that is known to the history of the English-speaking people. It has more than once, in the history of the country from which we derived our laws and most of our early colonists, been the cause of revolution. It has always been the cause of protest whenever it was laid.

It is taxing one of those articles that enter into the use of the masses of the people. It concerns the shelter of the masses of the people. It concerns the building of homes, and is a tax on every humble home in the United States. No rooftree can be erected without paying a tax as proposed by this section, and for what purpose is it paid? Not for revenue into the Treasury of the United States, but paid into the coffers of a protected class. What right have they to levy toll upon this common necessity of life, upon this article absolutely essential to the comfort and decency of the living of the masses of the people? If it is a necessary revenue tax, let us put it at a revenue basis, and all the people of the country, while they may feel the burden, will say, "We are honest and patriotic people, and we are willing to bear our share of the burden of necessary taxation." But why should they be called upon to pay this unnecessary and this burdensome tax, not to the Government, but to the beneficiaries of this legislation?

Mr. President, I only rose to add my voice to the protest on behalf of my people and the people of the whole country against such a tax as this. It seems to me it violates those fundamental principles which ought to govern in the taxation of a free people, and that we can not be a free people in the proper sense of that term if we submit to the imposition of a tax like this.

How is it that when this tax bill is brought in here to fill the depleted coffers of the United States Treasury we are told that they are not to be refilled unless a toll is levied by the protected classes out of every dollar that goes into the Treasury? There is a deficit, they tell us, in the Treasury of the United States, a gap between expenditure and income, and these people tell us, "You shall not fill up that deficit unless you pay toll to us, and dollars and dollars must go into our pockets before one dollar can go into the Treasury of the United States." This tax on glass is one of those odious taxes which will be felt in every remote hamlet in the United States, and they well may inquire why it is that this burden has been added to the back of American labor.

Mr. WHITE. Mr. President, the section now under consideration and those following it are of course very closely related. There are several documents which have been transmitted to me, and, I presume, to all other Senators, that bear more or less upon this subject, and in so far as their accuracy is demonstrated by reference to the statistics of the Government there should be no question as to the applicability of the argument.

I have here a statement of New York dealers in window glass. They, of course, are importers and interested adversely to the manufacturers of glass. The statement made by one is unfair unless accompanied by that presented by the other:

The New York dealers in window glass respectfully submit this analysis of the Dingley tariff bill, with the simple statement that the figures contained herein are in no instance estimated, but are actual and susceptible of proof by comparison with invoices in the possession of the Treasury Department.

The next statement refers to paragraph 99. I will ask to have the whole of the analysis contained in this document printed as a part of my remarks.

The Senate committee reduced the amount suggested in the House bill, and I understand the Senator from Arkansas has either suggested or moved that the amendment proposed by the Senate committee be amended by reducing the amount to the sum specified in the Wilson bill. Am I correct in that?

Mr. JONES of Arkansas. Yes, sir; my motion was, as a substitute for the Senate amendment, to strike out 1¼ cents and insert 1 cent, which is the Wilson rate.

Mr. WHITE. It is in support of that amendment to paragraph 98 that I am now addressing my remarks. Of course, if the reduction asked for by those of us who believe the amount should be reduced is voted down, naturally we will prefer the Senate amendment to permitting the bill to rest as it came from the House.

The schedules contained in the document to which I have already adverted, and which I will incorporate as a part of my remarks, are very suggestive, and there are a few matters contained therein upon which I will comment. In a note to the first page I find the following:

NOTE.—The brackets, 36 by 40 and 40 by 60, did not exist in either the McKinley or Wilson bills, and the introduction of them in the Dingley bill makes an increase in the last three rates, respectively, of 8 per cent, 24 per cent, and 106 per cent over the McKinley bill.

The writer refers to the classification under paragraph 99 in the following words:

[Extract from Dingley tariff bill—Schedule B, paragraph 99.]

Unpolished cylinder, crown, and common window glass:

	Cents.
Not exceeding 10 by 15 inches square.....per pound..	1¼
Above that and not exceeding 16 by 24 inches square.....do....	1¾
Above that and not exceeding 24 by 30 inches square.....do....	2¼
Above that and not exceeding 24 by 36 inches square.....do....	2½
Above that and not exceeding *30 by 40 inches square.....per pound..	3¼
Above that and not exceeding *40 by 60 inches square.....do....	3½
Above that.....do....	4¼

Provided, That unpolished cylinder, crown, and common window glass imported in boxes shall contain 50 square feet, as nearly as sizes will permit, and the duty shall be computed thereon according to the actual weight of the glass.

* NOTE—The brackets, 30 by 40 and 40 by 60, did not exist in either the McKinley or Wilson bills, and the introduction of them in the Dingley bill makes an increase in the last three rates respectively, of 8 per cent, 24 per cent, and 106 per cent over the McKinley bill.

So here is a new classification, and in amount largely in excess of the McKinley Act.

The document then proceeds as follows:

Basis for calculating duty.

Boxes containing 50 square feet of glass.

Weight, computed by the custom-house, per box of 50 square feet: Single thickness, 52 pounds per box; double thickness, 80 pounds per box.

On sizes above 40 by 60 inches:

	Pounds.
40 by 65 inches (double thickness only)	90
40 by 70 inches (double thickness only)	98
40 by 75 inches (double thickness only)	106
40 by 80 inches (double thickness only)	114

Single thickness, 52 pounds, at rate per pound, and double thickness, 80 pounds, at rate per pound, produce duty per box of 50 square feet of glass.

Comparison of the duties levied under the McKinley, Wilson, and Dingley tariff bills.

[Per box of 50 square feet of contents.]

Sizes.	Single thickness.			Double thickness.			
	McKinley duty.	Wilson duty.	Dingley duty.	McKinley duty.	Wilson duty.	Dingley duty.	Pounds per box.
10 by 15	$0.72	$0.52	$0.72	$1.10	$0.80	$1.10	
16 by 24	.98	.65	.98	1.50	1.00	1.50	
24 by 30	1.24	.91	1.24	1.90	1.40	1.90	
24 by 36	1.50	1.04	1.50	2.30	1.60	2.30	
30 by 40	1.63	1.11	1.76	2.50	1.70	2.70	
40 by 60	1.63	1.11	2.62	2.60	1.70	3.10	
40 by 62 to 40 by 65*				2.81	1.91	3.95	90
40 by 66 to 40 by 70*				3.06	2.08	4.29	98
40 by 72 to 40 by 75*				3.31	2.25	4.64	106
40 by 76 to 40 by 80*				3.56	2.42	5.00	114

*No single imported.

Percentage of advance of specific rates in Dingley bill over the specific rates in the Wilson bill.

	Per cent.
Not exceeding 10 by 15 inches square	37½
Not exceeding 16 by 24 inches square	50
Not exceeding 24 by 30 inches square	35-7/9
Not exceeding 24 by 36 inches square	43¾
Not exceeding 30 by 40 inches square	58-3/11
Not exceeding 40 by 60 inches square	82-4/9
Above 40 by 60 inches square	100

Ad valorem rates on first cost of common window glass, according to the experience of the largest importers in New York City during the year 1896, under the present law, and the ad valorem on the same importations at the rates proposed in the Dingley bill.

Under the Wilson bill ad valorem equivalent of 94½ per cent.

Under the Dingley bill the duty on same importations would be an ad valorem equivalent of 140½ per cent.

It is true that the Senate committee proposes a reduction, but that reduction, while it reduces the evil suggested by the original bill, does not reach a point even approximately similar to that of the Wilson bill.

The document continues:

Comparison of cost of foreign window glass, f. o. b. Antwerp, with cost of American window glass, f. o. b. Pittsburg.

[Ocean freight, marine insurance, interest, and custom-house charges amount to 15 per cent of cost, which must be added to the protection afforded by the tariff rates.]

SINGLE THICKNESS.

Sizes.	First quality.		Second quality.		Third quality.	
	Antwerp.	Pittsburg.	Antwerp.	Pittsburg.	Antwerp.	Pittsburg.
10 by 15	$0.87	$1.58	$0.78	$1.47	$0.72	$1.41
16 by 24	.96	2.00	.87	1.63	.78	1.58
24 by 30	1.58	2.60	1.36	2.25	1.19	2.08
24 by 36	1.58	2.70	1.36	2.37	1.19	2.15
30 by 40	1.72	2.88	1.53	2.65	1.16	2.81
40 by 60	2.94	4.28	2.62	3.78	2.38	3.55

DOUBLE THICKNESS.

10 by 15	$1.09	$2.15	$0.96	$1.93	$0.90	$1.86
16 by 24	1.22	2.43	1.09	2.20	.96	2.15
24 by 30	1.95	3.45	1.69	3.10	1.33	2.76
24 by 36	1.95	3.60	1.69	3.27	1.33	2.98
30 by 40	2.18	3.88	1.92	3.50	1.42	3.15
40 by 60	3.75	5.75	3.32	5.18	3.01	4.95

Prices net per 50-foot box.

French at 82 per cent on single, 84 per cent on double, foreign list.

American at 75 and 10 per cent, American list.

This is the present foreign discount, and also the highest price for five years past.

Illustration of the two new dimensions inserted in the Dingley bill not in any former bill.

Sizes "not exceeding 30 by 40 inches square" and "above that and not exceeding 40 by 60 inches square" are introduced in the Dingley bill classification, and never existed in any former bill. One effect is to make the rate of the final bracket in the bill (above 40 by 60) 4½ cents per pound against 2½ cents per pound on same in the Wilson bill.

An enormous rate—over 100 per cent.

These new rates increase enormously the cost of sizes used to a large extent in the construction of houses of moderate cost by people of limited means—sizes known as "square glazing sizes." They are used principally in third quality of double thickness, and the following comparisons of cost and duty will indicate the weight of the burden laid upon men of moderate means:

Inches square.	Cost, f. o. b. Antwerp.	Wilson duty.	Dingley duty.	Dingley ad valorem.
				Per cent.
26 by 28 to 24 by 36	$1.33	$1.60	$2.30	175
26 by 34 to 26 by 44	1.42	1.70	2.70	190
26 by 46 to 30 by 50	1.54	1.70	3.10	200
30 by 52 to 30 by 54	1.67	1.70	3.10	190

These tables may be studied more effectually when they are incorporated in full in the RECORD.

The Senator from New Jersey [Mr. SEWELL] spoke of certain manufacturers in his State which were not in the combination. Of course, if the Senator makes the assertion, I know it must be correct, but I wish to call the attention of the Senate to the statement contained in this document, not inconsistent with the assertion of that Senator at all, but still showing the practical control, though not exclusive and universal, but the practical control of the trust in the premises. I read again from the same document:

WINDOW-GLASS MANUFACTURERS' COMBINATION.

The total consumption of the country is from 3,500,000 to 4,000,000 boxes of 50 square feet per annum, of which about one-sixth is imported, the remaining five-sixths being supplied by the American manufacturers.

The domestic industry is controlled by two consolidated organizations—the Pittsburg Window Glass Company and the Western Window Glass Company—and four or five cooperating factories. Seven-eighths of the productive capacity of the country is controlled by these organizations, and they also regulate price of labor, duration of operations, and make fixed prices for jobbers, dealers, and consumers.

The ramifications of this combination will readily be understood by reference to the official schedules issued by the "national executive committee" of the consolidated organizations.

The last page of this document is interesting reading in connection with the particular subject now before us and the whole schedule. I read:

FORECAST OF THE LEADING GLASS MANUFACTURER IN THE UNITED STATES.

[Published in the National Glass Budget, March 27, 1897.]

The window-glass situation.

Under recent date the Chambers Glass Company, New Kensington, Pa., has issued the following circular to the trade:

"The Ways and Means Committee of the present Congress have reported the Dingley tariff bill, which restores the McKinley duties on window glass, besides adding two more brackets, 30 by 40 and 40 by 60, which increases the duties over the McKinley bill on those and on all larger sizes.

The writer has been in Washington several days, returning from there the first of the week, and from the very best information obtainable has no doubt the tariff bill will pass the Senate and become a law not later than July 1, and in all probability by June 1, or earlier. This means increased cost, as both wages and material will be very much higher. This, taken in connection with the further fact that stocks are small and factories have not an average of over three months' additional time to run this fire—a part of this time being the hot months, when production is reduced very materially—makes it almost certain that there will not be glass enough to supply even a moderate consumption up to the middle of next September, which is the earliest time new glass from next fire could possibly come onto the market.

With these conditions, we feel that we are justified in predicting a stiff market and a full demand for all the glass which will be made, with probabilities altogether in favor of higher prices. We therefore do not hesitate to advise our friends to buy at present prices all the glass they believe they will require up to the 1st of October next.

CHAMBERS GLASS COMPANY,
J. A. CHAMBERS, *President.*

I take it that this assertion is well founded, or it would not have been made in this public manner.

I have before me a letter accompanying a document illustrating this situation, which comes from the city of New York, and is signed by Theodore W. Morris & Co., which is as follows:

NEW YORK, *April 12, 1897.*

DEAR SIR: We hand you herewith an analysis of the Dingley tariff bill which has been prepared from actual experience in the importation of common window glass—

They refer to the statement already read—

The figures contained in the document are in no instance estimated, but are susceptible of proof by comparison with documents in the possession of the Government. The enactment of the Dingley bill will practically prohibit the importation of window glass and reduce the revenue to that extent. The ad valorem equivalent of the duty levied under the existing law is 94 per cent, and it is based not upon any exceptionally low cost, but upon the highest prices ruling in Europe for the past five or more years. Upon the same valuation the duties levied upon the same goods under the Dingley bill would amount to 140 per cent ad valorem. We feel confident that the documents submitted herewith will influence the action of your honorable committee.

We have the honor to remain,

Yours, very truly,

THE. W. MORRIS & CO.

Hon. STEPHEN M. WHITE,
United States Senate, Washington, D. C.

If we look at the comparative table under which we are acting, we fail to find any reason for the additional duty designed to be imposed consistent with the theory announced as the theory governing the framing of this bill. It is not true that there is any foreign competition resulting from any anterior legislation. It is not true that the foreign competition is of such a character as to prevent the profitable carrying on of this industry under the high rate of 94 per cent. And this I reason from the fact that but a very small portion of the actual consumption of the United States is

supplied by the imported goods. Of this there seems to be no doubt; and, looking at the comparative table on page 36, we find that in 1893 "cylinder, crown, and common window glass, unpolished, not exceeding 10 by 15 inches square," showed an importation of 12,778,538 pounds, as compared with 13,154,689 pounds in 1896—a very trifling increase, exceedingly so.

Taking the size "above 10 by 15 inches and not exceeding 16 by 24 inches," the importations in 1893 were 15,298,276 pounds, and in 1896, 15,373,922 pounds, or almost the same; the figures compare quite closely. "Above 16 by 24 inches and not exceeding 24 by 30 inches," we had in 1893 an importation of 17,471,344 pounds, and in 1896, 12,318,075, or more than 5,000,000 less in 1896 than in 1893.

Mr. GRAY. Under the Wilson law and under the McKinley law?

Mr. WHITE. Yes. So, as I have already said, if it be an excuse that there have been excessive importations supplied from foreign parts, that excuse has no applicability here, because the supply, instead of increasing in this grade, has actually diminished, and the duty already written in the Wilson law as to that particular item was 1¼ cents per pound, making an ad valorem of 100 per cent and a little over. The committee proposition is 115.16; the House proposition 139.70.

It is interesting to note the extent of the reductions proposed by the Senate committee upon this particular item. Thus, in the size of "not exceeding 10 by 15" the House bill is 55, the Senate bill 49.46, and the old rate was 43.15; in the size "above 10 by 15" the House bill is 125 and the Senate bill 107.02; in the size "above 16 by 24" the House bill is 139.70 and the Senate bill 115.16; in the "cylinder, crown, and common window glass, unpolished, not exceeding 24 by 36 inches" the House rate is 151.31, the Senate bill 126.46, and the rate in the Wilson law is 103.24.

Mr. President, this schedule has attracted much attention all over the country. I have a communication here from a very prominent wholesale dealer in the city in which I live. He refers not only to this schedule, but also to the earthenware schedule. I intended to present his remarks in connection with another schedule, and will do so, perhaps, later on as to the paragraphs that were passed over to-day. I will, however, ask the Secretary to read the letter, as it applies not only to earthenware, but also to crockery increases in general. The firm forwarding this communication is a reputable and well-established institution and deals not in foreign goods alone, but deals in domestic articles as well, having a general assortment and meeting the demands of the trade in both particulars.

The PRESIDENT pro tempore. The Secretary will read as requested.

The Secretary read as follows:

LOS ANGELES, CAL., *April 13, 1897.*

DEAR SIR: We call to your attention the crockery and glassware changes in the new tariff bill, which we think is entirely wrong, and give you reasons for so thinking, and, if there is any possible way to do so, we would like to have you bring this matter before the Senate committee who has charge of the tariff. If the changes are made the way the House has passed the bill, it will produce great dissatisfaction among all people.

Our reasons are as follows:

1. English ware, under the present Wilson tariff, costs at port of entry about 15 per cent more than the same grade of American ware is selling for.

2. This difference of about 15 per cent shows that either the American manufacturer did not get the protection afforded him or could not take advantage of it on account of the difference in quality between the foreign and domestic productions.

3. As the present nominal duty of 30 per cent is applied to the package and package charges, as well as to the ware itself, and added to this is the foreign freight, ocean freight, and marine insurance, the American manufacturer, under the Wilson bill, is actually afforded a protection of about 69 per cent on white earthenware and over 100 per cent on glassware.

4. Since the change from the McKinley tariff to the Wilson, there have been but few failures for the last three years, which shows plainly that they are in good condition at the rate at which they are selling goods.

5. The proposed rate of duty of 55 per cent in white earthenware increases the protection to the American manufacturer from 69 per cent, as noted in paragraph 3, to about 92 per cent.

6. The object of the Ways and Means Committee, as given out, is to increase the revenue as well as to afford additional protection.

7. Obviously, if the American manufacturer takes the full advantage of the protection afforded, 92 per cent, it forces the consumer to pay an abnormal profit or tribute. If the American manufacturers do not take the full advantage afforded them, but use it to undersell foreign wares, will not reaction fall on the Government by reducing the importations?

8. Past experience in the china and earthenware industries has proven that an increase of protection does not always bring an increase of wages to the workingmen. Should, however, the American potters restore the reduction of 12½ per cent in wages, there would still remain a margin of over 20 per cent additional profits to the American potter under this proposed rate of duty. To be more explicit, the American manufacturers, under the Wilson bill, have a protection of 69 per cent, and it is presumed have made a profit, as they have continued and some have increased their business and new companies have started. Consequently, if they are given an additional protection of the difference between 69 and 92 per cent, or 23 per cent, the last amount added to the 15 per cent they are now underselling English ware, it would make a total of 38 per cent, and deducting a possible restoration of 12½ per cent in wages, it would leave a net approximate margin of 25½ per cent.

9. As to glassware, it is a noteworthy fact, to which we call your attention, that to-day, under the Wilson tariff, American glass manufacturers pay the highest scale of wages.

10. No business should be subject, by legislation, to such extreme changes as shown, between a duty of 30 and 55 per cent and 35 and 60 per cent.

11. Few, if any other, schedules on the new tariff bill have been advanced in such a relatively large degree.

12. We are dealers in both the American and foreign wares to meet the demands of trade, having no interest in any foreign factories, our functions, as merchants, being to find the best value for the consumer; and we add that, as crockery and glassware are used in every household in the land, there is no family necessity on which the new tariff protection will be so severely felt, for the reason that an increase from 30 to 55 and from 35 to 60 per cent will add fully 25 per cent to the retail prices which every family will feel.

In case you should wish any other information regarding this tariff, you may write to Charles S. Dennis, secretary of the Wholesale Crockery and Glassware Association, room 60, Borden Block, Chicago.

Yours, respectfully,

MEYBERG BROS.

Hon. STEPHEN M. WHITE,
United States Senate, Washington, D. C.

Mr. WHITE. Mr. President, the Senator from Arkansas [Mr. JONES] read a communication which has been transmitted to the honorable chairman of the Ways and Means Committee of the House of Representatives by the Boston Plate and Window Glass Company. That institution inclosed a copy of the same letter to me. I shall not read the inclosure, however, as it is now in the RECORD in the remarks of the Senator from Arkansas, but I will read the note which was transmitted to me at the time the inclosure was sent. The letter is as follows:

BOSTON, *March 31, 1897.*

DEAR SIR: We beg to inclose copy of a letter we sent on January 5 last to the Hon. NELSON DINGLEY, Jr., Chairman of the Committee on Ways and Means, and we beg to make an additional protest against any increase whatsoever in the present rates of duties on unpolished cylinder window glass (Schedule B).

The rates of duties on this article by the present or Wilson tariff give the American manufacturers a protection of nearly 100 per cent over the cost of the glass packed and delivered on board steamers abroad.

That is a very remarkable statement, but it seems to be entirely verified and vindicated by the figures already presented—

This was the average percentage of protection during the whole year 1896, and is the case to-day.

This is made by taking our total importations for the year 1896, and shows the average duty on the average sizes and qualities used in a year.

The rates by the present tariff come so near to being prohibitory that three-quarters or more of the yearly consumption of about 3,500,000 boxes of glass in this country is furnished by the American makers.

Any increase whatsoever over present rates of duties will tend to lessen the now small proportion imported, or prohibit any importation of this article, will therefore work injury to the importers and their many employees and will lessen the Government's revenue.

We beg to suggest that if revenue and not prohibition is the desired object of the present tariff revision, a reduction of 50 per cent of the rates of the present tariff on unpolished cylinder window glass will increase the revenue and will still afford the American makers a protection of about 50 per cent on an article that is a necessity and that affects the cost of living of many millions of our people, while any benefit to be derived from an increase in the present tariff rates on this article will accrue solely to only a few manufacturers and their workmen.

We beg also to point out that on some of the larger sizes of this article the duty as proposed by the bill now under discussion amounts to 160 per cent of the present cost (including boxing) abroad.

Any additional information regarding this subject which you may desire we will be happy to furnish you, if possible.

Respectfully, yours,

BOSTON PLATE AND WINDOW GLASS CO.,
By E. A. HILLS, *President.*

Hon. S. M. WHITE,
United States Senate, Washington, D. C.

Mr. President, it must be obvious that the criticism which is now being directed against this schedule is not in any sense an attack upon the theory that the American manufacturer must be protected, because, so far as I am concerned, I am assuming that the policy indicated by the majority here must prevail, and I do not care, except for the purpose of illustration, to argue the matter upon any other basis; but there is nothing yet before the Senate indicating that the present tariff is not adequate; there is nothing before the Senate indicating that it is not extremely protective. The American manufacturer is gradually obtaining possession of the American market, and is obtaining this possession not by any slow movement, but obtaining it thoroughly and rapidly. As that is the case, it seems to me we have reached the point where we can afford to rest.

There is no motion before the Senate to reduce this high rate, which is 100 per cent now upon some grades, and much higher upon others; but there is very properly, as is suggested by the Senate committee, a reduction of the rates in the House bill, but no attempt to go back to the rates in the Wilson bill; which, upon any theory of protection, are adequate and complete. It is adequate, because under it there has been no substantial increase of importations; it is adequate, because under it the American manufacturer practically has the market; and I do not understand that absolute prohibition is attempted here.

We have the statement of the chairman of the committee, very correctly made, that it is not easy to procure adequate revenue under present conditions. There is a remarkable matter to which I might direct the attention of the Senate in connection with this subject of revenue, showing, as the Senator from Rhode Island has stated, the difficulty of obtaining sufficient money in the ordinary way to meet the expenses of the Government, and which discloses very clearly that the Wilson Act, so-called, is a much better revenue producer than was the McKinley Act. I shall not

delay the Senate at this time to find the figures, but I will state the result, and afterwards can refer to the matter again.

The last fiscal year of the McKinley Act, during which it was enforced throughout the whole of the year, terminated June 30, 1894. The Wilson Act did not go into effect until January, 1895, but the last year of the McKinley Act terminated, when we refer to the fiscal year, on June 30, 1894. If we take the first fiscal year during which the Wilson law was in full force, to wit, the fiscal year terminating on the 30th day of June, 1896, we find that the Wilson law produced more revenue by many million dollars than did the McKinley Act during its last fiscal year, showing that during hard times—for the times were hard in both instances; the markets were in bad condition; they are in a bad condition now, and it might be difficult, perhaps, to determine whether they were in a worse condition during the former period than the latter—but, at all events, depression was the rule, and yet the Wilson Act yielded more revenue than the McKinley Act, thus demonstrating, whatever may be its imperfections—and no doubt they are many—that as a revenue producer, as a means of obtaining money wherewith to supply the expenses of the Government, it was an enactment superior to the McKinley law.

Why was that? Obviously, among other reasons, because of the high duties on certain lines. True, another reason can be found, and a valid one, in this, that the people had no means wherewith to purchase; but that unfortunate condition yet prevails, and I have not yet heard anyone who undertakes to assert when a change will take place; that is, to assert that he has absolute knowledge on that point.

Can it be the policy of the Senate, or of either of the parties in the Senate, to pass a bill containing provisions of a character so excessive with relation to the Wilson Act as to prohibit all importations? If we simply desire to equalize the labor cost and to put the American producer in that respect upon a level with the foreigner, to give him an advantage and to afford him an opportunity to take possession of the American market, we have done all that any advocate of protection could legitimately ask us to do.

But, apart from this theory, and entirely independent of the notions of extreme protection or halfway protection, we have staring in our faces the truth that the McKinley rates were so extensively prohibitive that a revenue was not afforded sufficient to maintain the Government, and the view of the present enactment is to increase the revenue. The chairman of the committee informs us that the conditions are such, and the financial results of the bill so problematical, that he is compelled to resort unwillingly to sources which he would far rather be permitted to call on at some later and more exigent time.

Now, I submit that when we have reached the point where the American manufacturer has possession of the market, and where the statistics showing importations under the Wilson law indicate that that possession is not to be disturbed, we can afford to rest our theories, whether free trade, or protection, or anything else, and say, "We have gone far enough."

There is a great deal of literature on the glass subject, applying generally to the various subdivisions of the bill, some of which possibly I may place before the Senate later on. My knowledge of the rates and of the effect of the proposed tariff is derived, of course, from what I read about it. I have before me a paper called the National Glass Budget and two or three other papers issued by those interested on one side or the other in the business—I mean on the part of manufacturers or importers—and looking over the whole subject I can not find any disagreement as to the facts I have stated here; the hearings before the House committee disclose no error in the figures which have been given to the Senate, and the computations made by the Senate Finance Committee and submitted to us for our guidance are directly confirmatory of the criticisms which we have made here to-day. If there is any reason to suppose that the conclusions reached are not right, I would cheerfully support the tariff suggested by the committee, but as the matter now stands I will certainly support the amendment offered by the Senator from Arkansas.

Mr. CAFFERY. The Senator from Rhode Island [Mr. ALDRICH], in his speech setting forth the merits of the pending bill, said it is a moderate measure. If his mind adverted to the tariff on ordinary window glass, he certainly must have smiled inwardly to himself, for the bill, instead of being moderate, is excessive in its rates. Notwithstanding the fact of a decline in the value of glass along the lines of nearly every one of these schedules or parts of paragraphs, higher specific rates of duty have been levied, so that, as stated by the Senator from Texas [Mr. MILLS], the rates have run up to the excessive point of 168 per cent ad valorem.

Mr. President, if there is a period when the greed for protection will cease, it has never yet been discovered. It would seem that the rates imposed upon glassware by the Wilson Act itself were high enough for any purposes of protection, or even of prohibition. Those rates are very high. Glass worth 2 cents a pound sometimes is rated at a cent a pound, about 50 per cent ad valorem. Under 2 cents a pound, on cylinder, crown, and common window glass, unpolished, not exceeding 10 by 15 inches, under the Wilson Act the duty is 1 cent a pound, the equivalent ad valorem being 47 per cent. Those rates were high enough to satisfy the excessive greed for protection, and why raise the specific rates on a declining value, unless it be to wall up the United States, completely shut out all foreign importations, and allow the home producers to charge whatever price they choose for the article?

Is that the purpose of the pending bill? Is it not confessed here in the excessive rates upon glass—the common glass of the people—that the people are to have no protection whatever against any rates that the home manufacturers choose to impose upon them? No relief can come from foreign importations. The rates are excessive, and the people are to be turned over to the tender mercies of the trusts in glassware.

It is stated by the Senator from New Jersey [Mr. SEWELL] that there is no trust, but the trust naturally forms itself. There is no need of any trust when you have a barrier that keeps out all competitors in the same line of goods. That period will never come, dreamed of by philosophic and humane protectionists, when the home competition will cut down the prices. It has never come. It will never come. There has to be an outside influence to hold in check the rapacity of the home producer. He naturally unites, and, with or without a trust, the whole range of tariff history shows that the domestic price is held up to the price of the imported article all the time.

I only rose to express my indignation at the excessive rate of duties in paragraph 98, which we are now discussing. The Senator from Rhode Island has been predicting estimates; I will predict results. I predict that these excessive rates will destroy the very principle which they seek to uphold—the tariff principle of the protectionists. You have made your wall too high. You have allowed rates to be excessive. Under the guise of those rates the American consumers can be absolutely fleeced. There is no relief for the consumer. Every time an importer of any article comes before the Senate there is an exclamation of derision from the other side of the Chamber. "He is an importer, and therefore his testimony or his statements should be utterly despised and rejected and scorned before the Senate."

From the nature of his position he more or less represents the consumer. The consumers can never be heard except through this indirect channel. They can not come here to represent themselves. The body is too vast, the consumers are too poor, while the manufacturers have paid representatives to advance their interests before committees having in charge the formation of bills of this sort.

It should be made very clear to the Senate that under the rates of the Wilson Act, as high as they were and as un-Democratic as they were in this particular instance, no importations have come in to threaten the home manufacturer. The importations have decreased. Wherefore is it, we ask, that you want now to impose higher and higher rates, if not to turn over the consumer to the tender mercies of the home seller?

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the Committee on Finance.

Mr. JONES of Arkansas. Before the vote is taken, in view of the statement made by the Senator from New Jersey [Mr. SEWELL], though I do not want to be understood as saying at all that there was any mistake about his statement that the glass manufacturers in his locality are not connected with the trust, I wish to present to the Senate a communication which I received from James A. Pugh, manager of a glasshouse in Chicago, in which he says:

> The manufacturers of unpolished cylinder or common window glass are located in Indiana and Pennsylvania, in the natural-gas belts, fuel being a large item in the expense of manufacturing this glass. The window-glass manufacturers have formed themselves into two associations, one known as the Pittsburg Window Glass Association, which controls the distribution of the product for the Eastern market, and the other as the Western Window Glass Association, controlling the distribution of the production for the Western market, these two associations controlling about 95 per cent of the production in this country. These associations fix a price at which window glass shall be sold, and all orders are divided pro rata among the factories.
>
> The importations of window glass are comparatively small, compared with the production in this country, and what glass there is imported is for the Eastern market, the freight being too much to send it out West.
>
> The manufacturers, through these associations, at the beginning of each season, sign a scale of prices to be paid their workmen, the blowers, the flatteners, the cutters, etc., which scale determines the wages for the year. Last November, after a long struggle, the manufacturers signed a scale which was the same as the year before, but provided, in the event of a higher duty being placed on sheet glass, the men were to receive a certain advance out of whatever advance was made in the duty. The duty on unpolished cylinder or crown window glass is covered by paragraph 98, and when ornamented, by paragraph 104.

As bearing on this question, I will read a short extract from the National Glass Budget, which I imagine is good authority among glass men. Under the head "Window glass," of date May 8, 1897, the following occurs:

> WINDOW GLASS.
>
> There is very little new to note in window glass, except that there is no material change. Jobbers are buying a little freer, but glass is still being

stocked up in large quantities. The changes in the tariff rates made by the Senate reduces those originally fixed by the Ways and Means Committee, but still leaves a very fair advance. At any rate, American window glass does not at present require any tariff prop, and it is a question whether a good, stiff reduction would not be the best thing that could happen for the industry. The combines now have the matter of production, distribution, and prices down so fine that they can fairly dictate conditions to jobbers and consumers. The workers this year are divided into four factions, each bent on securing separate craft advantages.

The settlement of wages will be slow and difficult next fall, and even if no tariff advances were likely, a late start in the factories may be looked for, as manufacturers are not going to make higher-priced glass with their stock sheds full of cheaper glass out of which it is in their power to squeeze all the trade will bear. It is stated by the officials of the combine that present stocks are considerably lighter than they were last year at this time, and that being the case, with more pots in operation than last year, and more constant production, it follows that consumption has been slowly increasing, and that jobbers are holding more glass than a year ago. Everything points to the wisdom of buying glass at present prices. No one at all informed on the conditions of the market believes that glass will be lower. It is dead certain that wages, and perhaps raw materials, will be higher next blast, and as soon as the tariff bill is passed, manufacturers are certain to advance prices on stock then held.

This seems to show, from the standpoint of the glass people, what the object and intention of this increase in the tariff taxation are, that the American people are to be required to pay higher rates for this absolute necessary of life than they have heretofore been paying. I ask for the yeas and nays on the question of agreeing to the amendment.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. The Committee on Finance report an amendment, in paragraph 98, line 20, to strike out "three-eighths" and insert "one-fourth;" so as to read:

Unpolished, cylinder, crown, and common window glass, not exceeding 10 by 15 inches square, 1¼ cents per pound.

Mr. JONES of Arkansas. My motion was, as a substitute for the committee amendment, to strike out "one and three-eighths" and insert "1 cent."

The PRESIDENT pro tempore. In the opinion of the Chair under the agreement made that the committee amendments shall be first voted upon, it is entirely competent, if the amendment be adopted, for the Senator to offer an amendment striking out "and one-fourth."

Mr. JONES of Arkansas. If no question is raised about the right of the Senate to strike out what it has just voted in, I will agree to that course.

The PRESIDENT pro tempore. The Chair will now that the Senator from Arkansas can do so.

Mr. JONES of Arkansas. I have no doubt the Chair will carry it through. I do not care for the yeas and nays on the question, then. I withdraw the demand.

Mr. PLATT of Connecticut. Then, I suppose, if the amendment of the committee is agreed to, the Senator from Arkansas will propose his amendment.

The PRESIDENT pro tempore. Is there objection to the committee amendment?

Mr. JONES of Arkansas. There is objection, but the other side have the vote necessary to have it agreed to.

The PRESIDENT pro tempore. The amendment will be considered as agreed to. The Senator from Arkansas moves to strike out "1¼ cents" and insert "1 cent," which is entirely in order.

Mr. JONES of Arkansas. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BUTLER (when his name was called). I am paired with the Senator from Maryland [Mr. WELLINGTON], and therefore withhold my vote.

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. Were he present, I should vote "yea."

Mr. DANIEL (when his name was called). I am paired with the Senator from Connecticut [Mr. HAWLEY].

Mr. ELKINS (when his name was called). I am paired with my colleague [Mr. FAULKNER].

The PRESIDENT pro tempore (when Mr. FRYE's name was called). As this seems to be a test vote on an important schedule, the Senator from Maine will announce his pair with the senior Senator from Maryland [Mr. GORMAN].

Mr. HANNA (when his name was called). I have a permanent pair on the pending bill with the junior Senator from Utah [Mr. RAWLINS], and therefore withhold my vote.

Mr. PLATT of Connecticut (when Mr. HAWLEY'S name was called). I desire to announce that my colleague [Mr. HAWLEY] has been called from the city, and, I understand, is paired with the Senator from Virginia [Mr. DANIEL]. If my colleague were present, he would vote "nay."

Mr. JONES of Arkansas (when his name was called). I have a pair with the Senator from Maine [Mr. HALE]. If he were present, I should vote "yea."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL].

Mr. PASCO (when his name was called). On this vote I am paired with the Senator from Utah [Mr. CANNON]. If he were present, I should vote "yea."

Mr. PENROSE (when his name was called). I have a permanent pair with the Senator from Delaware [Mr. KENNEY], which includes the pending bill. I therefore withhold my vote.

Mr. WALTHALL (when his name was called). I am paired with the junior Senator from Wisconsin [Mr. SPOONER]. Otherwise I should vote "yea."

The roll call was concluded.

Mr. BATE (after having voted in the affirmative). I desire to inquire if the junior Senator from Kentucky [Mr. DEBOE] has voted?

The PRESIDENT pro tempore. He has not voted, the Chair is informed.

Mr. BATE. I withdraw my vote, being paired with that Senator for to-day.

The result was announced—yeas 18, nays 28; as follows:

YEAS—18.

Bacon,	Gray,	Morgan,	Turpie,
Berry,	Heitfeld,	Murphy,	Vest,
Caffery,	Lindsay,	Pettigrew,	White.
Chilton,	Mallory,	Pettus,	
Cockrell,	Mills,	Roach,	

NAYS—28.

Aldrich,	Fairbanks,	McEnery,	Proctor,
Allison,	Foraker,	McMillan,	Quay,
Burrows,	Gallinger,	Mason,	Shoup,
Carter,	Gear,	Nelson,	Stewart,
Chandler,	Hansbrough,	Perkins,	Warren,
Cullom,	Jones, Nev.	Platt, Conn.	Wetmore,
Davis,	McBride,	Pritchard,	Wilson.

NOT VOTING—42.

Allen,	Frye,	Kyle,	Smith,
Baker,	George,	Lodge,	Spooner,
Bate,	Gorman,	Mantle,	Teller,
Butler,	Hale,	Martin,	Thurston,
Cannon,	Hanna,	Mitchell,	Tillman,
Clark,	Harris, Kans.	Morrill,	Turner,
Clay,	Harris, Tenn.	Pasco,	Walthall,
Daniel,	Hawley,	Penrose,	Wellington,
Deboe,	Hoar,	Platt, N. Y.	Wolcott.
Elkins,	Jones, Ark.	Rawlins,	
Faulkner,	Kenney,	Sewell,	

So the amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 98, page 24, line 23, before the word "cents," to strike out "seven-eighths" and insert "five-eighths;" so as to read:

Unpolished, cylinder, crown, and common window glass, not exceeding 10 by 15 inches square, 1½ cents per pound; above that, and not exceeding 16 by 24 inches square, 1¾ cents per pound.

The amendment was agreed to.

Mr. JONES of Arkansas. I propose to move an amendment. The committee reported to strike out "seven-eighths" and insert "five-eighths," which has been agreed to. I move to strike out "five-eighths" and insert "one-fourth."

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. In paragraph 98, line 22, it is proposed to strike out "five-eighths" and insert "one-fourth;" so as to read:

One and one-fourth cents per pound.

Mr. JONES of Arkansas. The last yea-and-nay vote would seem to indicate that there is not much hope of undertaking to get our friends on the other side to relent at all in the exorbitant tax on this necessary of life, but as I have heard "while the lamp holds out to burn," etc., I propose to have one more vote on the subject to see if we can not get some additional help.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Arkansas.

Mr. JONES of Arkansas. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BATE (when his name was called). I am paired with the Senator from Kentucky [Mr. DEBOE]. If he were here, I should vote "yea."

Mr. BUTLER (when his name was called). I am paired with the Senator from Maryland [Mr. WELLINGTON].

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. Were he present, I should vote "yea."

Mr. DANIEL (when his name was called). I am paired with the Senator from Connecticut [Mr. HAWLEY]. If he were here, I should vote "yea."

Mr. ELKINS (when his name was called). I am paired with my colleague [Mr. FAULKNER].

Mr. HANNA (when his name was called). I am paired with the Senator from Utah [Mr. RAWLINS].

Mr. JONES of Arkansas (when his name was called). I am paired with the Senator from Maine [Mr. HALE]. I should vote "yea," if he were present.

Mr. PASCO (when his name was called). I again announce my

pair with the Senator from Utah [Mr. CANNON]. If he were present, I should vote "yea."

Mr. WALTHALL (when his name was called). I am paired with the junior Senator from Wisconsin [Mr. SPOONER]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. CLARK. I am paired with the Senator from Kansas [Mr. HARRIS].

Mr. WILSON. I again announce the pair of my colleague [Mr. TURNER] with the senior Senator from Massachusetts [Mr. HOAR].

Mr. MITCHELL. I am paired with the Senator from New Jersey [Mr. SEWELL].

The result was announced—yeas 18, nays 27; as follows:

YEAS—18.

Bacon,	Gray,	Morgan,	Turpie,
Berry,	Heitfeld,	Murphy,	Vest,
Caffery,	Lindsay,	Pettigrew,	White.
Chilton,	Mallory,	Pettus,	
Cockrell,	Mills,	Roach,	

NAYS—27.

Aldrich,	Fairbanks,	McEnery,	Quay,
Allison,	Foraker,	McMillan,	Shoup,
Burrows,	Gallinger,	Mason,	Stewart,
Carter,	Gear,	Perkins,	Warren,
Chandler,	Hansbrough,	Platt, Conn.	Wetmore,
Cullom,	Jones, Nev.	Pritchard,	Wilson.
Davis,	McBride,	Proctor,	

NOT VOTING—43.

Allen,	Frye,	Kyle,	Sewell,
Baker,	George,	Lodge,	Smith,
Bate,	Gorman,	Mantle,	Spooner,
Butler,	Hale,	Martin,	Teller,
Cannon,	Hanna,	Mitchell,	Thurston,
Clark,	Harris, Kans.	Morrill,	Tillman,
Clay,	Harris, Tenn.	Nelson,	Turner,
Daniel,	Hawley,	Pasco,	Walthall,
Deboe,	Hoar,	Penrose,	Wellington,
Elkins,	Jones, Ark.	Platt, N. Y.	Wolcott.
Faulkner,	Kenney,	Rawlins,	

So the amendment was rejected.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The next amendment of the Committee on Finance will be stated.

The next amendment was, in paragraph 98, page 24, line 25, to strike out "and three-eighths;" so as to read:

Above that, and not exceeding 24 by 30 inches square, 2 cents per pound.

The amendment was agreed to.

Mr. JONES of Arkansas. I move to strike out "two" and insert "one and three-fourths;" so as to read:

Above that, and not exceeding 24 by 30 inches square, 1¾ cents per pound.

That is the present rate. The Senate having voted on two amendments in the same line in this paragraph and having voted them down, I will not occupy the time of the Senate by asking for the yeas and nays. Although it is quite an important paragraph and I should be glad to have a record made, I will not take up the time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 98, page 25, line 2, after the word "and," to strike out "seven-eighths" and insert "three-eighths;" so as to read:

Above that, and not exceeding 24 by 36 inches square, 2¼ cents per pound.

The amendment was agreed to.

Mr. JONES of Arkansas. I move to strike out "two and three-eighths" and insert the word "two," which is the present rate; so as to read:

Above that, and not exceeding 24 by 36 inches square, 2 cents per pound.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 98, page 25, line 3, after the word "pound," to insert "all;" and in the same line, after the word "that," to strike out "and not exceeding 30 by 40 inches square, three and three-eighths" and insert "two and three-fourths;" so as to read:

All above that, 2¼ cents per pound.

The amendment was agreed to.

Mr. JONES of Arkansas. I move to strike out the words "two and three-fourths" and insert "two and one-eighth;" so as to read:

All above that, 2⅛ cents per pound.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 98, page 25, line 6, after the word "pound" to strike out:

Above that, and not exceeding 40 by 60 inches square, 3¼ cents per pound; above that, 4¼ cents per pound.

The amendment was agreed to.

Mr. TURPIE. Mr. President, I wish to call attention to the proviso of paragraph 98, and I offer the following amendment to it: In line 9 I move to insert the word "upon" before the word "unpolished;" in line 11 to strike out the words "shall contain" and insert the word "containing," and in the same line insert the words "more or less" after "feet" and strike out "and" in the twelfth line. The proviso now reads:

Provided, That unpolished cylinder, crown, and common window glass, imported in boxes, shall contain 50 square feet, as nearly as sizes will permit, and the duty shall be computed thereon according to the actual weight of glass.

I always entertain a very honest suspicion about a proviso in any statute. It is the natural site of an ambush; and whether it was so intended here or not, I wish to make it very plain that we are not to be led into it without knowing that there is one. I think that under the text of the proviso as reported it is possible to prohibit entirely the importation of unpolished cylinder, crown, and common window glass imported in boxes, because, in the first place, it may be said that it contains "50 square feet as nearly as sizes will permit."

Now, what will the custom-house officer do in reference to the boxes of glass? It would depend entirely upon his discretion whether he would admit it or not. He might say that it contained less than 50 square feet, and that would prevent the importation. He might say that it contained more than 50 square feet, and it would have the same result. He might say that it was a box not as nearly as sizes would permit containing 50 square feet, and defeat the importation. So there are three methods, and very plain ones, in the proviso for the absolute prohibition of the importation of glass of the character mentioned in it. It would be a great deal better, a great deal plainer, and, according to my view, more candid to make the prohibition absolute at once than to do it by indirection, as is sought to be done in the text of the proviso.

I move to amend the proviso so that it will read:

Provided, That upon unpolished cylinder, crown, and common window glass, imported in boxes containing 50 square feet, more or less as nearly as sizes will permit, the duty shall be computed thereon according to the actual weight of glass.

This amendment does not come in conflict with the notion of computing the duty upon the weight of the glass. After the Senate has voted the very excessive increase upon common window glass and unpolished cylinder, and crown glass, the estimate of it by weight is perhaps as just and fair as any other. The amendment does not disturb that method, but the amendment does prevent the arbitrary discretion of the custom-house officer from prohibiting the importation entirely.

I believe, sir, that the duties upon all glass certainly are high enough under existing law; that no increase of duty is needed for purposes of revenue and none is needed for purposes of encouragement, for there are two things in the title of the bill. I will say to the authors of it, whoever they are, that this title is the most modest which has ever been suggested for a bill of this kind, from the political parties downward upon the other side of the aisle or the other end of the Capitol. I recollect the last one was a bill to reduce taxation and to protect American industries and manufactures. This title has only two features—to provide revenue for the Government and to encourage the industries of the United States. Revenue and encouragement! It is not needful, either for encouragement or revenue, for either of these purposes, that there should be any increase upon the rates on glass. It is entirely a mistake to think that a high rate of duty—not prohibitory—necessarily increases or encourages importations. It does not do so.

The home manufacturer can prevent importation at any time by selling his ware under the duty line, and he can always command the market. The opportunity to import affects prices in the same way as importation itself. The ability and the opportunity to import affects prices in the same manner as actual importation. That is the reason why we voted, not only with respect to this section, but with respect to others, against the increase in tariff rates.

I do not know whether it was the intention by this proviso to make an absolute prohibition of the importation of the commoner and cheaper grades of window glass and other glass goods, but I am certain, under any construction of the proviso, that result will follow, and I would a great deal sooner make the correction now than to trust the discretion of the custom-house officer or the rules and regulations of the Secretary of the Treasury upon the text of such a statute.

Mr. ALDRICH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Indiana yield to the Senator from Rhode Island?

Mr. TURPIE. With inexpressible pleasure.

The PRESIDING OFFICER. The Senator from Rhode Island will suspend a moment. The amendment of the Senator from Indiana will be read.

The SECRETARY. On page 25, paragraph 98, in line 9, before the word "unpolished," insert the word "upon;" in line 11, strike out the words "shall contain" and insert the word "containing;"

after the word "feet," in the same line, insert the words "more or less;" and after the word "permit," in line 12, strike out the word "and;" so that if amended the proviso will read:

Provided, That upon unpolished cylinder, crown, and common window glass, imported in boxes containing 50 square feet more or less, as nearly as sizes will permit, the duty shall be computed thereon according to the actual weight of glass.

Mr. ALDRICH. The suggestion I was about to make to the Senator from Indiana when he took his seat is that the language found in the proviso is precisely the language used in the existing law, the act of 1894, in a proviso, and it is precisely the language used in the act of 1890. As far as my recollection goes (I have not the bill here, but I think I am right about it), it is precisely the language used in the act of 1883. So I do not think it possible to be open to the construction the Senator gives it.

Mr. CHANDLER. What is the object of the proviso? Will the Senator state?

Mr. ALDRICH. The object is to have the importations made in a regular form as near as can be done.

Mr. TURPIE. Oh, no; pardon me; the object of the proviso is to calculate the rate of duties upon weight. That is the object of the proviso. I do not interfere with that.

Mr. ALDRICH. I do not see any objection to the language which the Senator from Indiana suggests.

Mr. JONES of Arkansas. There can be none.

Mr. ALDRICH. I do not see any objection to it, and I think I will accept the amendment.

Mr. ALLISON. I suggest to the Senator from Rhode Island that if the proviso is to read as the Senator from Indiana suggests, it is wholly unnecessary, because, of course, if they are imported in boxes containing 50 square feet as nearly as sizes will permit, they will pay a duty according to the weight just as they would if imported in boxes of 100 feet.

Mr. TURPIE. Nothing would improve my sentiment in respect to the whole paragraph better than to strike out the proviso. I accept the suggestion of the Senator from Iowa.

Mr. WHITE. The act of 1883 is somewhat different. I have it here.

Mr. ALLISON. I ask that the proviso may be again read.

The PRESIDING OFFICER. The proviso will be again read.

The SECRETARY. If amended the proviso would read:

Provided, That upon unpolished cylinder, crown, and common window glass, imported in boxes containing 50 square feet more or less, as nearly as sizes will permit, the duty shall be computed thereon according to the actual weight of glass.

Mr. JONES of Arkansas. I can see no objection to the adoption of the suggestion of the Senator from Indiana. If it is the intention that this paragraph shall be construed as we all think it ought to be, the words proposed by the Senator from Indiana will only make it more certain and can not bring in any complication.

Mr. ALDRICH. Let it go in; and if we see any objection to it hereafter, we will call the attention of the Senator from Indiana to it.

The PRESIDING OFFICER. Without objection, the amendment will be considered as agreed to. It is agreed to. The next amendment of the committee will be stated.

The next amendment of the Committee on Finance was, in paragraph 99, page 25, line 20, after the word "square," to strike out "twenty" and insert "fifteen;" and in line 21, after the word "that," to strike out "forty" and insert "twenty;" so as to make the paragraph read:

99. Cylinder and crown glass, polished, not exceeding 16 by 24 inches square, 4 cents per square foot; above that, and not exceeding 24 by 30 inches square, 6 cents per square foot; above that, and not exceeding 24 by 60 inches square, 15 cents per square foot; above that, 20 cents per square foot.

The amendment was agreed to.

Mr. JONES of Arkansas. In line 16 of the paragraph just read I move to strike out "four" and insert "two and one-half;" so as to read:

Cylinder and crown glass, polished, not exceeding 16 by 24 inches square, 2½ cents per square foot.

The PRESIDING OFFICER put the question; and declared that the noes appeared to prevail.

Mr. JONES of Arkansas. If there is a doubt about it, I should like to have the yeas and nays. It is an important vote anyhow.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BATE (when his name was called). I am paired with the Senator from Kentucky [Mr. DEBOE]. If he were present, I would vote "yea."

Mr. BUTLER (when his name was called). I am paired with the junior Senator from Maryland [Mr. WELLINGTON].

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE]. I should vote "yea," if he were present.

Mr. DANIEL (when his name was called). I am paired with the Senator from Connecticut [Mr. HAWLEY].

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea" and he would vote "nay."

Mr. PENROSE (when his name was called). The Senator from Delaware [Mr. KENNEY] will stand paired with the junior Senator from Massachusetts [Mr. LODGE], and therefore I will vote. I vote "nay."

Mr. CLAY. Upon that announcement I will have my vote recorded. I vote "yea."

Mr. WALTHALL (when his name was called). I would vote "yea" but for my pair with the Senator from Wisconsin [Mr. SPOONER].

The roll call was concluded.

Mr. JONES of Arkansas (after having voted in the affirmative). I voted inadvertently. I am paired with the Senator from Maine [Mr. HALE], and I withdraw my vote.

Mr. FRYE. If necessary to make a quorum, I will vote. I vote "nay."

Mr. JONES of Arkansas. For the purpose of making a quorum, I will vote. I vote "yea."

The result was announced—yeas 20, nays 27; as follows:

YEAS—20.

Bacon,	Cockrell,	Mallory,	Pettus,
Berry,	Gray,	Mills,	Roach,
Caffery,	Heitfeld,	Morgan,	Turpie,
Chilton,	Jones, Ark.	Murphy,	Vest,
Clay,	Lindsay,	Pettigrew,	White.

NAYS—27.

Aldrich,	Foraker,	McMillan,	Proctor,
Allison,	Frye,	Mason,	Quay,
Burrows,	Gallinger,	Nelson,	Shoup,
Chandler,	Gear,	Penrose,	Stewart,
Cullom,	Hansbrough,	Perkins,	Warren,
Davis,	McBride,	Platt, Conn.	Wetmore.
Fairbanks,	McEnery,	Pritchard,	

NOT VOTING—41.

Allen,	George,	Lodge,	Teller,
Baker,	Gorman,	Mantle,	Thurston,
Bate,	Hale,	Martin,	Tillman,
Butler,	Hanna,	Mitchell,	Turner,
Cannon,	Harris, Kans.	Morrill,	Walthall,
Carter,	Harris, Tenn.	Pasco,	Wellington,
Clark,	Hawley,	Platt, N. Y.	Wilson,
Daniel,	Hoar,	Rawlins,	Wolcott.
Deboe,	Jones, Nev.	Sewell,	
Elkins,	Kenney,	Smith,	
Faulkner,	Kyle,	Spooner,	

So the amendment was rejected.

Mr. JONES of Arkansas. In line 18 I move to strike out, after the word "square," the word "six" and insert the word "four," which will make it the present rate. It would then read:

99. Cylinder and crown glass, polished, not exceeding 16 by 24 inches square, 4 cents per square foot; above that, and not exceeding 24 by 30 inches square, 4 cents per square foot.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was rejected.

Mr. VEST. I wish to call attention to the generosity of the Senators who framed this bill as to the last two classifications of this paragraph. They have put in the Wilson rate, while they increased upon the first two classifications 1¼ cents on one and 2 cents upon the other. If Senators will turn to the comparative statement, they will understand at once why this generosity was exhibited. There was under that last classification but one pane of glass that came into the United States in 1896.

Mr. ALLISON. That simply shows that the duty was protective under the Wilson rate.

Mr. JONES of Arkansas. It is now past 5 o'clock, and I suggest to the Senator from Rhode Island that he allow us to adjourn.

Mr. ALDRICH. I hope to go on until half past 5, so as to complete this schedule. I think there is nothing else in it that will lead to debate.

Mr. JONES of Arkansas. There are some important matters in this schedule that must be considered, and, as far as I am concerned, I have been here to-day as long as I feel like staying. I am tired and I want to have the Senate adjourn.

Mr. ALDRICH. I think we ought not to adjourn before half past 5.

Mr. WHITE. I was going to suggest to the Senator from Rhode Island that we have been compelled to pass over a number of provisions that were not yet ready for final action. I think we have been getting along quite rapidly. I do not see any necessity for keeping us here later at this time. In case of any pressure hereafter, any delay by making speeches or anything of that kind, it may be necessary to stay in session longer. In the early consideration of the bill, I think we ought to adjourn at 5 o'clock unless some difficulty is experienced in getting ahead, and I feel like insisting on it as far as I am concerned.

Mr. VEST. I wish to call the attention of the Senator from Rhode Island to the historic fact that we have made more progress in three days' time than we made in three weeks on the Wilson bill.

Mr. ALDRICH. We have not made much progress upon the bill to-day.

Mr. JONES of Arkansas. It has not been our fault.

Mr. ALDRICH. I do not know whose fault it is, but the fact remains that we have not.

Mr. JONES of Arkansas. I think we have done very well.

Mr. ALDRICH. I suggest that there can be no possible objection to most of the paragraphs which now remain in the pending schedule.

Mr. JONES of Arkansas. For myself, I want to examine these paragraphs before they are taken up in the Senate, and it will take less time for me to examine them quietly in my own room than in the Senate Chamber; but if we are compelled to make the examination here, I shall have to read a great many papers to the Senate that I should prefer to first read over myself, so as to determine which of them ought to be presented for the consideration of the Senate.

I have not attempted to delay the consideration of the bill one minute. I have done all that I could in the interests of a fair discussion, such as we set out in the beginning to have, and nothing more. I have not intended to delay the progress of the bill in any way. We have done the best we could to facilitate its consideration, and we have given only such consideration to each paragraph as we believed was fair and right.

I am not prepared to go on with the further discussion of the bill this evening, so far as I am concerned, and I insist that the Senate ought to adjourn.

Mr. ALDRICH. In view of the wish of a large number of Senators about me that we should have an executive session, I yield the floor for the purpose of allowing a motion of that kind to be made.

EXECUTIVE SESSION.

Mr. McMILLAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After eight minutes spent in executive session the doors were reopened, and (at 5 o'clock and 15 minutes p. m.) the Senate adjourned until to-morrow, Saturday, May 29, 1897, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 27, 1897.

UNITED STATES ATTORNEY.

William Vaughan, of Alabama, to be attorney of the United States for the northern district of Alabama, vice Emmet O'Neal, removed.

UNITED STATES MARSHAL.

Solomon F. Stahl, of Arkansas, to be marshal of the United States for the western district of Arkansas, vice George J. Crump, whose term will expire May 28, 1897.

COLLECTOR OF CUSTOMS.

Alexander R. Avery, of Michigan, to be collector of customs for the district of Huron, in the State of Michigan, to succeed Thomas M. Crocker, whose term of office has expired by limitation.

DEPUTY AUDITOR FOR NAVY DEPARTMENT.

John M. Ewing, of Wisconsin, to be deputy auditor for the Navy Department, to succeed E. N. Bowman, resigned.

PROMOTIONS IN THE ARMY.

General officers.

Col. James Franklin Wade, Fifth Cavalry, to be brigadier-general, May 26, 1897, vice Forsyth, who vacated on accepting commission as major-general.

Col. John Kemp Mizner, Tenth Cavalry, to be brigadier-general, May 26, 1897, vice Bliss, who vacated on accepting commission as major-general.

Col. William Montrose Graham, Fifth Artillery, to be brigadier-general, May 26, 1897, vice Brooke, who vacated on accepting commission as major-general.

CHIEF BUREAU OF ORDNANCE, NAVY DEPARTMENT.

Commander Charles O'Neil, United States Navy, to be Chief of the Bureau of Ordnance, in the Department of the Navy, with the relative rank of commodore, for the term of four years from the 1st day of June, 1897, vice Capt. William T. Sampson, resigned.

CHAPLAIN IN THE NAVY.

Thaddius S. K. Freeman, a citizen of Indiana, to be a chaplain in the Navy (subject to the examination required by law), to fill a vacancy existing in that grade.

POSTMASTERS.

W. L. Paine, to be postmaster at Argenta, in the county of Pulaski and State of Arkansas, in the place of Thomas W. Baldwin, removed.

C. H. Cornell, to be postmaster at Corona (late South Riverside), in the county of Riverside and State of California, in the place of Virgil O. Harter, superseded.

C. G. Brown, to be postmaster at Eastman, in the county of Dodge and State of Georgia, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1897.

Peter B. Smith, to be postmaster at Adams, in the county of Berkshire and State of Massachusetts, in the place of Fred W. Smith, resigned.

Percy R. Trubshaw, to be postmaster at Cooperstown, in the county of Griggs and State of North Dakota, the appointment of a postmaster for the said office having, by law, become vested in the President on and after October 1, 1896, William C. Jimeson, appointed by the President, and by him nominated to the Senate, not having been confirmed.

Ezra W. Woodward, to be postmaster at Newberg, in the county of Yamhill and State of Oregon, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1896, Joseph C. Sawyer, appointed by the President, and by him nominated to the Senate, not having been confirmed.

Almon K. Goodwin, to be postmaster at Pawtucket, in the county of Providence and State of Rhode Island, in the place of Almon K. Goodwin, whose commission expired December 14, 1896. (Reappointed.)

Executive nominations received by the Senate May 28, 1897.

CONSULS.

Max Bouchsein, of Illinois, to be consul of the United States at Barmen, Germany, vice Henry F. Merritt, resigned.

Ferdinand W. Neumann, of Illinois, to be consul of the United States at Cologne, Germany, vice William D. Wamer, deceased.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 28, 1897.

ASSISTANT ATTORNEY-GENERAL.

James Edmund Boyd, of North Carolina, to be Assistant Attorney-General.

PROMOTION IN THE NAVY.

Commander Charles O'Neil, United States Navy, to be Chief of the Bureau of Ordnance, in the Department of the Navy, with the relative rank of commodore.

SECRETARY OF LEGATION.

François S. Jones, of Louisiana, to be secretary of the legation of the United States at Buenos Ayres, Argentine Republic.

COLLECTOR OF CUSTOMS.

Kenneth R. Pendleton, of North Carolina, to be collector of customs for the district of Albemarle, in the State of North Carolina.

POSTMASTERS.

John B. Hinds, to be postmaster at Decatur, in the county of Morgan and State of Alabama.

J. D. Wilson, to be postmaster at Cloverport, in the county of Breckinridge and State of Kentucky.

SENATE.

SATURDAY, *May 29, 1897.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The VICE-PRESIDENT resumed the chair.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. QUAY, and by unanimous consent, the further reading was dispensed with.

VISITOR TO WEST POINT.

The VICE-PRESIDENT. The Chair appoints the Senator from Ohio, Mr. FORAKER, as one of the Visitors to attend the annual examination of cadets at the Military Academy at West Point, in the place of the Senator from Rhode Island, Mr. WETMORE, excused.

LABOR ON RIVER AND HARBOR IMPROVEMENTS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, in further response to a resolution of the 16th ultimo, a supplemental report from the Chief of Engineers, United States Army, relating to all orders, circulars, and instructions issued to and all correspondence with engineer officers in charge of public works relative to the application of civil-service rules to the operations in charge of the Engineer Department; which, with the accompanying papers, was referred to the Committee on Civil Service and Retrenchment, and ordered to be printed.

PETITIONS AND MEMORIALS.

Mr. FAIRBANKS presented a petition of sundry citizens of Muncie, Ind., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. PERKINS presented sundry petitions of citizens of California, transmitted through the various boards of supervisors of Chico, Colusa, San Bernardino, Monterey, Los Gatos, Willow, and Campbell, Santa Cruz, Alameda, San Francisco, Los Angeles, San Benito, Napa County, and of San Jose and Santa Clara, all in the State of California, praying for the abrogation of the Hawaiian reciprocity treaty; which were referred to the Committee on Foreign Relations.

He also presented a memorial of sundry merchants of San Francisco, Cal., remonstrating against the abrogation of the Hawaiian reciprocity treaty; which was referred to the Committee on Foreign Relations.

Mr. GALLINGER presented the petition of K. D. Webster and 51 other citizens of Gilsum, N. H., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. PRITCHARD presented a memorial of the North Carolina Liquor Dealers, Distillers', and Grape Growing Association, of Rowan County, N. C., remonstrating against an increase of the duty on beer; which was ordered to lie on the table.

He also presented a memorial of sundry lumbermen of Wilmington, N. C., remonstrating against the imposition of a duty on aniline dyes; which was ordered to lie on the table.

AMENDMENT OF PUBLIC-LAND LAWS.

Mr. WARREN. I have certain papers which I desire to have printed as a miscellaneous document. I will explain briefly that they are papers which refer to a subject or to a group of subjects that are perhaps the most important before the American people in an economic way next to the bill under consideration. Indeed, they are so important that while this session was called admittedly to consider the one matter of revenue, and notwithstanding very grave foreign relations have entered in here, this subject has cropped out in various ways and has been discussed to a considerable extent. For instance, the matter of forestry has come before us very sharply for consideration; the matter of fortifying the country in the Lower Mississippi against the floods that occasionally devastate that country has become a subject of grave concern; the matter of reservoirs to contain the head waters has received some attention; and the matter of the cession of the public lands to the States in which they lie has also been presented, and very ably so, by several Senators, especially by the distinguished Senator from Alabama [Mr. MORGAN.]

These papers contain resolutions passed by the Society of American Irrigation Engineers at their late meeting in Denver, and also letters and papers from various engineers in the United States and Canada bearing upon these questions. It seems to be the consensus of opinion of those educated and experienced men that the public-land laws of the present are inapplicable to very much of the public domain now left, and that there is need of legislation as to our lands and our water supply and in relation to forestry.

I ask unanimous consent that the papers may be printed as a miscellaneous document.

The VICE-PRESIDENT. Is there any objection to the request of the Senator from Wyoming? The Chair hears none, and that is the order.

DUTY ON PINEAPPLES.

Mr. PASCO. I present a statement by the Indian River and Lake Worth Pineapple Growers' Association of the East Coast of Florida, together with comparisons, giving the reasons why pineapples grown in the United States are justly entitled to the protection of a higher duty than that now proposed by the so-called Dingley tariff bill. I move that the statement and accompanying comparison be printed as a document.

The motion was agreed to.

REPORT OF A COMMITTEE.

Mr. QUAY, from the Committee on Public Buildings and Grounds, to whom was referred the bill (S. 925) to provide for the erection of a public building at San Angelo, Tex., reported it without amendment, and submitted a report thereon.

BILLS INTRODUCED.

Mr. PASCO introduced a bill (S. 2043) to establish a term of the district and circuit courts of the United States at Ocala, in the southern judicial district of Florida; which was read twice by its title, and referred to the Committee on the Judiciary.

He also introduced a bill (S. 2044) to confirm the Andrew Drouillard grant in the State of Florida; which was read twice by its title, and referred to the Committee on Private Land Claims.

Mr. FAIRBANKS introduced a bill (S. 2045) to remove the charge of desertion from the record of Jacob Clark, of Laughery, Ohio County, Ind.; which was read twice by its title, and referred to the Committee on Military Affairs.

He also introduced a bill (S. 2046) granting a pension to Robert H. Brown; which was read twice by its title, and referred to the Committee on Pensions.

Mr. McENERY introduced a bill (S. 2047) granting a pension to Peter Browman; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

Mr. NELSON introduced a bill (S. 2048) for the erection of a public building at Fergus Falls, Minn.; which was read twice by its title, and referred to the Committee on Public Buildings and Grounds.

He also introduced a bill (S. 2049) granting a pension to Julia M. Johnson; which was read twice by its title, and referred to the Committee on Pensions.

Mr. TILLMAN introduced a bill (S. 2050) to establish a sanitarium at Castle Pinckney, in Charleston Harbor, South Carolina, for the use of disabled officers and enlisted men of the Regular and Volunteer Army and Navy of the United States; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

Mr. COCKRELL introduced a bill (S. 2051) to carry out the finding of the Court of Claims in the case of Mangram E. Langston; which was read twice by its title, and referred to the Committee on Claims.

He also introduced a bill (S. 2052) granting a pension to Frank Schnider; which was read twice by its title, and referred to the Committee on Pensions.

Mr. STEWART introduced a joint resolution (S. R. 46) declaratory of the intent and meaning of a certain act of Congress therein named; which was read twice by its title.

Mr. STEWART. I present a letter to accompany the joint resolution, which I move be printed and referred with the joint resolution to the Committee on Claims.

The motion was agreed to.

RELIEF OF SUFFERERS BY OVERFLOW OF THE RIO GRANDE.

Mr. MILLS. I introduce a joint resolution and ask unanimous consent for its present consideration. I will make a statement after it is read.

The joint resolution (S. R. 45) authorizing the Secretary of War to use rations for the relief of destitute persons in the district overflowed by the Rio Grande River at and near El Paso, Tex., was read the first time by its title, and the second time at length, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the sum of $10,000 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be expended by and under the direction of the Secretary of War in the purchase and distribution of subsistence stores to such destitute persons as may require assistance in the district overflowed by the Rio Grande River at and near El Paso, Tex.

Mr. MILLS. There has been a most extraordinary overflow of the Rio Grande at and near the city of El Paso, Tex. I have received a telegram, signed by the mayor of the city, Hon. Joseph Magoffin; W. V. Niles, president of the board of health, and Charles S. Davis, collector of customs, which says:

EL PASO, TEX., *May 28, 1897.*

To R. Q. MILLS:

The Rio Grande has overflowed lower part of city, inhabited by poorer classes. Five hundred houses destroyed. Three thousand people homeless and destitute. Suffering too great and widespread for local charity. Many will suffer hunger, perhaps starvation, if not relieved immediately. Ask Congress to appropriate $10,000, to be expended under War Department, to feed them.

JOSEPH MAGOFFIN, *Mayor.*
W. V. NILES,
President Board of Health.
CHARLES S. DAVIS,
Collector of Customs.

This is the condition which confronts us, and I ask that the Senate pass the joint resolution at once, so that the Secretary of War can make provision to feed those people. By passing it to-day the House may take it up and consider it when it meets on Monday. Our people at El Paso are doing everything that they can, but the suffering is too great for them to relieve, and I hope the joint resolution will be passed.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENTS TO THE TARIFF BILL.

Mr. DAVIS submitted four amendments intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which were ordered to lie on the table and to be printed.

WICHITA INDIAN LANDS.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution submitted on a former day by the Senator from Pennsylvania [Mr. QUAY] relative to the Wichita Indian lands.

Mr. QUAY. The resolution may go over, retaining its place.

The VICE-PRESIDENT. The resolution will go over. There being no further morning business, the Calendar under Rule VIII is in order.

DISPOSAL OF REFUSE IN THE DISTRICT OF COLUMBIA.

The bill (S. 1238) to regulate, in the District of Columbia, the disposal of certain refuse, and for other purposes, was announced as first in order on the Calendar; and the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SALE OF POISONS IN THE DISTRICT OF COLUMBIA.

The bill (S. 470) to regulate the sale of poisons in the District of Columbia was announced as next in order.

Mr. GALLINGER. While I reported that bill, and am personally in favor of it, I know that if the Senator from Utah [Mr. CANNON] were here he would object to its present consideration. So I think it had better go over, retaining its place.

The VICE-PRESIDENT. The bill will lie over.

ADULTERATION OF FOODS AND DRUGS IN DISTRICT OF COLUMBIA.

The bill (S. 471) relating to adulteration of foods and drugs in the District of Columbia was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

THE TARIFF BILL.

Mr. ALDRICH. I ask unanimous consent that the Senate now proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. ALDRICH. I ask that we return to the consideration of paragraphs 90 and 91, on the eighteenth and nineteenth pages, relating to earthenware and china. I will state that I propose, for the committee, to withdraw all amendments to the House provision in those paragraphs, allowing the paragraphs to stand as they came from the House. The committee suggested in their revision of the bill compound rates applicable to these two paragraphs. They stated that those rates were more or less experimental in their character and that they intended perhaps to suggest certain amendments to the rates. They have not been able to agree upon any amendment that was satisfactory to them as to the provisions if compound rates were to be retained. The importers and dealers in crockery objected very strenuously to the compound rates on the ground that they could not be applied equitably to the various articles contained in these two important paragraphs.

As the result of our examination and deliberations in regard to this matter, we have concluded that it is safer and wiser to fall back upon the provisions as they came from the House, and the committee therefore withdraw all their amendments to those two paragraphs.

Mr. CHILTON. As I understand the Senator from Rhode Island, the rates will be the same that they were under the McKinley Act.

Mr. ALDRICH. Yes, sir; precisely.

Mr. JONES of Arkansas. What is the proposition of the Senator from Rhode Island?

Mr. ALDRICH. To withdraw the amendments that we have suggested to both paragraphs 90 and 91.

Mr. JONES of Arkansas. What do you propose to do with paragraphs 92 and 93?

Mr. ALDRICH. We propose to allow those to be passed by for the present until we can——

Mr. JONES of Arkansas. Why not let all of those paragraphs go over together?

Mr. ALDRICH. We would like to get rid of this question. We will go on with paragraphs 92 and 93 if Senators prefer that course.

Mr. JONES of Arkansas. It seems to me that the minority ought to have some notice of changes proposed by the majority in the management of the bill. Yesterday morning we came here expecting to take up this schedule. I had been told on the street the day before that it would be passed over yesterday, but I had no intimation of anything of the sort from the majority of the committee. We came here and the committee had it passed over and took up another schedule. This morning we supposed we would go on with the schedule we had under discussion last night. Now we come here and we are met with a proposition to go back and take up still another schedule. I respectfully submit that the minority ought to have some notice of the intention on the part of the majority to move from place to place in the bill, as we are not to take up the schedules, as we would naturally suppose they would come up, in the order in which they succeed each other.

I do not want to find any fault with proceeding with the bill as the committee wants to proceed with it; but I do think we ought to know what the committee expects to do as to taking up these different paragraphs. I can not tell at a glance just what the effect of the Senator's proposition is. I must have a minute or two to look at it, so that I can make up my mind about it. Then, so far as I am concerned, I shall be willing to go ahead with it.

Mr. ALDRICH. It is certainly our disposition to consult the wishes and convenience of Senators on the other side of the aisle in all these questions. We did not yesterday morning decide that we would pass over these paragraphs until we arrived in the Senate Chamber. So any intimation the Senator had on that subject must have been premature, to say the least.

Mr. JONES of Arkansas. I had it, and the events proved that it was correct. I confess I was a little surprised to get it on the street instead of from the majority of the committee, if such was the intention. I did not believe it when I heard it, but I found the event as the prediction stated.

Mr. ALLISON. I hope the Senator will not rely on street information. It was the intention of the committee to go on with that schedule until yesterday morning, just before the session began, when we found we had made a mistake as respects some of the provisions and they needed revision, and at the last moment, within five minutes of the sitting, it was agreed that those paragraphs should be passed over in order that we might revise the schedule. That the street could know what no one else knew seems to me impossible.

Mr. WHITE. It seems to me that that is readily explained. The Senator from Iowa and the other members of the committee undoubtedly came in contact with a mind reader.

Mr. ALLISON. I will say that the Senator from Arkansas must have found the mind reader.

Mr. JONES of Arkansas. It was not the street that gave me my information; it was a gentleman, and I can give his name when wanted.

Mr. ALLISON. It is not necessary; it is not an important matter. I asked that these paragraphs might be passed over, because I saw that our arrangement was not a wise one, and I think I gave notice that the schedule would be taken up to-day, although I am not certain about that. It is a matter of no moment whatever. Of course the Senators are entitled to notice of any important changes; I agree to that.

Mr. ALDRICH. The Senator asked me to tell him what the effect of the changes now suggested by the committee would be.

Mr. JONES of Arkansas. The Senator from Texas [Mr. CHILTON] asked the Senator from Rhode Island if the withdrawal of the proposed amendments would restore the Wilson rate.

Mr. ALDRICH. No; the McKinley rate, I understood him.

Mr. WHITE. The McKinley rate.

Mr. CHILTON. The McKinley rate was 60 per cent and the Wilson rate 35 per cent.

Mr. ALDRICH. The effect of the withdrawal of our amendments would be to leave the bill exactly as it came from the House, which would lead to a reenactment of the McKinley rate.

Mr. JONES of Arkansas. If a part of the china schedule is to be taken up, I should think it had all better go over and be taken up hereafter.

Mr. ALDRICH. I have no objection to that course, if Senators on the other side think it preferable.

Mr. WHITE. I suggest that if when sections are passed over the Senators upon the other side of the Chamber would notify us when they are to be brought up we should be better able to proceed.

Mr. ALDRICH. I suggest that at the next sitting of the Senate after to-day, whenever it will be, we shall ask the Senate to take up the remaining parts of this schedule.

Mr. VEST. I should like to ask the Senator from Rhode Island a question before this matter is passed over. I wish to ask him what, in his judgment, is the increase in the proposed Senate amendments over the House bill in paragraphs 90 and 91?

Mr. ALDRICH. The experts who have examined the subject say that they think the average ad valorem rate would be a little less than the House bill. Of course it would apply unequally to any specific duty. Covering so large a range, it necessarily would apply unequally to some parts or articles. The importers and dealers claim that it would largely increase the rates of the House bill on many articles. Whether that is true I am not able at this time to say.

Mr. VEST. In my calculation I make it a very considerable increase; that is, in some of the classifications of the Senate amendment.

Mr. ALDRICH. You make it an increase?

Mr. VEST. I make it an increase in the Senate amendments.

Mr. ALDRICH. Then I suppose the Senator will be gratified to know that we have withdrawn these amendments.

Mr. JONES of Arkansas. Gratified to that extent.

Mr. VEST. I do not know that I shall make any strenuous objection to it, if I understand it correctly.

Mr. JONES of Arkansas. I understand the Senator from Rhode Island gave notice that at the next sitting of the Senate he would take up all the paragraphs in the schednle that have been passed over.

Mr. ALDRICH. Yes, sir; that have been passed over.

Mr. JONES of Arkansas. The paragraphs in the previous schedule which have been passed over will not be taken up yet?

Mr. ALDRICH. Not yet, if it suits the convenience of Senators on the other side.

Mr. JONES of Arkansas. That suits me. All we want is to have notice of what we are likely to have considered.

Mr. QUAY. I wish to be informed exactly what paragraphs are to be passed over under the arrangement between the Senator from Rhode Island and the Senator from Arkansas. I understand that the arrangement applies at least to paragraphs 90 and 91.

Mr. ALLISON. And 93 and 94.

Mr. ALDRICH. And 92 as well.

Mr. QUAY. Paragraphs 90, 91, 92, and 93?

Mr. ALDRICH. Yes, sir.

The VICE-PRESIDENT. The bill will be proceeded with.

The next amendment of the Committee on Finance was, in paragraph 100, page 25, line 23, after the word "rolled," to insert "ribbed;" so as to read:

100. Fluted, rolled, ribbed, or rough plate glass, or the same containing a wire netting within itself, not including crown, cylinder, or common window glass.

The amendment was agreed to.

The next amendment was, in paragraph 100, page 26, line 1, after the words "common window glass," to strike out the words "not exceeding 10 by 15 inches square, three-fourths of 1 cent per square foot; above that, and."

Mr. VEST. As I understand the effect of the action of the Senate committee, it is to increase the rate one-fourth of 1 cent on two of these classifications and let the others remain as they are by existing law.

Mr. ALDRICH. Oh, no; it is a reduction on all. It is a reduction in one case, I think, below the Wilson rate.

Mr. VEST. I beg the Senator's pardon; on two classifications it is an increase of one-fourth of 1 cent over the Wilson Act.

Mr. ALDRICH. That is not my recollection.

Mr. VEST. Over the Wilson Act.

Mr. ALDRICH. I think not.

Mr. WHITE. On the goods over 24 by 30 it is an increase.

Mr. VEST. Yes; on two classifications there is an increase of one-fourth of 1 cent.

Mr. WHITE. The rate of duty provided in the Senate bill on the goods over 24 by 30 has an ad valorem equivalent of from 116 to 122 per cent. The Wilson bill rate is 1½ cents.

Mr. ALDRICH. I beg the Senator's pardon; there is a quarter of a cent increase on one bracket or two.

Mr. VEST. On two classifications.

Mr. ALDRICH. But it is a reduction from the House rate on all.

Mr. VEST. I am talking about the rate as compared with the Wilson bill.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 100, page 26, line 5, after the word "square," to insert "three-fourths of;" so as to read:

Not exceeding 16 by 24 inches square, three-fourths of 1 cent per square foot.

The amendment was agreed to.

The next amendment was, in the same paragraph, page 26, line 7, after the word "and," to strike out "one-half" and insert "one-fourth;" so as to read:

Above that, and not exceeding 24 by 30 inches square, 1¼ cents per square foot.

The amendment was agreed to.

The next amendment was, in the same paragraph, page 26, line 8, after the word "that," to strike out "two" and insert "one and three-fourths;" so as to read:

All above that, 1¾ cents per square foot.

The amendment was agreed to.

The next amendment was, in the same paragraph, page 26, line 10, after the word "rolled," to insert "ribbed;" so as to read:

And all fluted, rolled, ribbed, or rough plate glass, weighing over 100 pounds per 100 square feet, shall pay an additional duty on the excess at the same rates herein imposed.

The amendment was agreed to.

The next amendment was, in the same paragraph, page 26, line 16, after the word "as," to insert the word "finished;" so as to make the proviso read:

Provided, That all of the above plate glass, when ground, smoothed, or otherwise obscured, shall be subject to the same rate of duty as finished cast polished plate glass unsilvered.

Mr. WHITE. In relation to this particular portion of the paragraph, the following statement has been made to me, to which I attract the attention of the Senator in charge of the bill. It is said that—

Fluted, rolled, and ribbed glass of large sizes is valued at 4 cents per square foot, and under the provisions of the proviso, when obscured, is subject to a duty equal to 50 cents per square foot, or 1,250 per cent ad valorem. This proviso was inadvertently added to the paragraph in the Wilson bill and is prohibitive, there having been but one importation made, in which the importer was compelled to pay an additional duty on a decision of the court of several thousand dollars on a few dollars' worth of material. This error should be remedied by striking out the proviso, as above suggested.

I do not know that the attention of the Senator from Rhode Island has been called to this matter, but it seems to me a subject worthy of examination. I obtained this information from a member of the Board of General Appraisers, who stated it to be a fact.

Mr. ALDRICH. As the Senator from California says, this provision was in the act of 1894 precisely as it appears here. It appears by the report of the Bureau of Statistics that the informant of the Senator from California must be incorrect in his statement, because there were importations under each one of these paragraphs at the rate of 81 per cent; 22 per cent on the first.

Mr. WHITE. Mr. Sharretts informed me, and he is very likely to know about it.

Mr. JONES of Arkansas. There certainly could have been no importations under the proviso, because the rate of taxation given on this glass, if the Senator will notice the comparative statement, is from 1 cent a foot to 4½ cents a foot. The highest value of this glass is 4½ cents a foot. How could it be possible to have the glass imported at 5 cents a foot as the very lowest, and from that running up to 22½ cents? It seems to be simply impossible that there should have been any glass imported under this proviso. The statement made by the General Appraiser spoken of by the Senator from California is that there was but a single importation under this paragraph, and that a very heavy penalty, amounting to a great sum of money, was visited on men who had innocently supposed that they were not violating the law or not bringing in glass under this particular proviso. I suggest that it be passed over, and that the Senator from Rhode Island examine this question. I am strongly inclined to think that he, on examination, will agree to strike out the proviso.

Mr. ALDRICH. I have great confidence in the judgment of Mr. Sharretts, and I am quite willing that the paragraph should go over, but I suggest that the price on obscured glass, according to the Bureau of Statistics, is 24 to 36 cents.

Mr. WHITE. Not of this particular glass.

Mr. ALDRICH. Yes, of this particular glass—"Plate glass, fluted, rolled or rough, ground or smoothed, or otherwise obscured," as will be seen by referring to the bottom of the thirty-eighth page of the comparative statement. I am quite willing that the proviso shall go over, and I will consult Mr. Sharretts in regard to it.

Mr. WHITE. This seems to be the character of proviso alluded to by the Senator from Indiana [Mr. TURPIE] yesterday, though it was not born in this bill.

Mr. ALDRICH. I am willing to have the proviso stricken out now with an understanding that subsequently, if the information suggested by the Senator is not correct, we may reinsert it. For the present I am willing that the proviso shall be stricken out in accordance with the suggestion of the Senator from Arkansas.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to strike out the proviso of paragraph 100, in the following words:

Provided, That all of the above plate glass, when ground, smoothed, or otherwise obscured, shall be subject to the same rate of duty as cast polished plate glass unsilvered.

The VICE-PRESIDENT. Without objection, the amendment will be agreed to.

The next amendment of the Committee on Finance was, in paragraph 101, page 26, line 22, after the word "square," to strike out "twelve" and insert "ten;" so as to make the paragraph read:

101. Cast polished plate glass, finished or unfinished and unsilvered, not exceeding 16 by 24 inches square, 8 cents per square foot; above that, and not exceeding 24 by 30 inches square, 10 cents per square foot; above that, and not exceeding 24 by 60 inches square, 22½ cents per square foot; all above that, 35 cents per square foot.

Mr. JONES of Arkansas. I call the attention of the Senator from Rhode Island to the comparative statement on page 40. I move, in line 20, before "cents," to strike out "eight" and insert "five;" so as to read:

Not exceeding 16 by 24 inches square, 5 cents per square foot.

This proposition would restore the Wilson rate of tariff on plate glass. The propositions of the majority of the committee in this connection are very striking. In the first division, on plate glass 16 by 24 inches, the McKinley rate was 5 cents a foot. The Senate committee proposes to make it 8 cents per foot. The House had fixed that same rate. This is an increase over the McKinley rate of 60 per cent. In the very next clause the Senate committee proposes to increase the McKinley rate of 8 cents to 10 cents. The rate in the McKinley Act was 8 cents per square foot on that particular kind of glass. The Senate committee proposes to make it 10. The House had it 12 cents. If the House proposition had

prevailed, there would have been an increase over the McKinley rate on this plate glass of 50 per cent, and the Senate committee proposition is to increase the McKinley rate 25 per cent.

Now turn to the next paragraph, paragraph 102. I will call attention to the increases proposed by the Senate committee all along through this plate-glass schedule. They are simply astounding. I hope Senators will pay attention to what is proposed. In paragraph 102, which will be the next one to be taken up, the Senate committee proposes to increase the tax on the smaller size above the McKinley Act in the proportion of 6 to 11 cents. The McKinley Act imposed a tax on this class of glass of 6 cents per square foot, and the Senate committee solemnly asks us to change that 6 to 11 cents, increasing the rate above the McKinley bill 83⅓ per cent—a bill which was repudiated by the American people, a bill which up to that time had been the most monstrous proposition of tariff taxation that had ever been conceived or proposed to Congress. Yet, when that bill has been swept aside, this committee comes to the Senate and proposes to increase the rate on this plate glass 83 per cent above the McKinley taxation.

Mr. ALDRICH. Eighty-three per cent?

Mr. JONES of Arkansas. Yes, sir; 83 per cent.

Mr. ALDRICH. On what quality?

Mr. JONES of Arkansas. In paragraph 102, the next paragraph you are coming to. I am calling attention to these iniquities in this matter.

Mr. ALDRICH. You are getting ahead.

Mr. JONES of Arkansas. I am considering all of them at once. I am showing the policy that is pursued here.

Mr. ALLISON. The rate fixed by the House was 12 cents, and the committee make it 10.

Mr. JONES of Arkansas. It was 6 cents under the McKinley law. The House made it 9 cents and you make it 11. You are looking at paragraph 101, I presume, and I was talking about paragraph 102.

Mr. ALLISON. I beg pardon.

Mr. JONES of Arkansas. In the subdivision of the same paragraph, 102, you propose to raise the McKinley rates from 10 to 13 cents, an addition of 30 per cent.

There is another peculiar thing about these increases to which I should like to call the attention of the Senate. In the smaller sizes, in the lower-priced brackets, in the smaller grades of this glass, enormous increases are proposed in this bill. In the higher-priced glass, in the large-sized glass, in the glass that costs a great deal of money, the rates are very materially and nicely adjusted so as to have a reduction of taxation. Why is it that the cost of the cheaper glass that finds its way into the cheaper work is to be increased by 83 per cent over the McKinley rate, and in the high-priced glass, every Senator will notice if he will take the trouble to look into the comparative statement, that there are in many cases no increases at all; but the Senate committee proposes liberally to let us have these plates of glass at something under the McKinley rates? As a specimen of that, take the next subdivision, "above 24 by 30 inches and not exceeding 24 by 60 inches." Under the McKinley law the rate was 35 cents per square foot, and the Senate committee was liberal enough to propose to reduce that to 25 cents per square foot. In the next clause, 60 cents per square foot was the rate of the McKinley law, but in this large-sized glass the Senate committee is liberal enough to propose, on American plate, that large-sized plate glass shall be at 38 cents instead of at 60 cents, as in the McKinley law.

While we are making these comparisons I think we may as well run down the whole schedule. As to "cylinder and crown glass, polished, silvered, and looking-glass plates not exceeding 16 by 24 inches," the Senate committee proposes to raise the tax from what it was in the McKinley law, 6 cents per square foot, to 11 cents per square foot.

I am satisfied that many Senators do not understand the full significance of these important increases. We shall discuss them more fully when we come to them. I see by the smile on the face of the Senator from Rhode Island that he fully understands the matter. He knows where it cuts. This is a proposition to increase the tax on looking-glasses and mirrors that go into the cheap furniture sets that the poor men are compelled to have by an enormous rate of taxation, and the fine French plate mirrors can not be bought to go on the furniture of the poor people.

The mirrors of the cheaper furniture sets are made of what are called French plates. They are made nowhere except in Bohemia. I have some samples in my room that I intend to have here to exhibit to the Senate at the proper time. They are of thin glass. The heavy, highly polished, fine French mirrors that are used by the wealthy are a very different thing from the cylinder-glass plates which come in as German plates, and which are used for the purpose of making furniture for the poor. There are thousands of factories in Michigan and other States of the West devoted to this business alone, who do nothing but make this class of cheap furniture for the poor. These people are compelled to use this German plate glass; it can not be used in any other way, and now it is the purpose of the committee to raise the rates on that kind of glass to such an extent as to make it impossible for this class of people to afford this glass, and they must either take the French plate glass or nothing.

Mr. President, in the class of "cylinder and crown glass, polished, silvered, and looking-glass plates not exceeding 16 by 24 inches," the McKinley law charged a rate of 16 cents per square foot. The House of Representatives raised it 50 per cent. They proposed to make it 9 cents per square foot; but the Senate committee, not satisfied with an increase of 50 per cent, have levied upon the poverty of the poor and increased the rate to 11 cents per square foot, making it 83⅓ per cent higher than was the McKinley rate.

In the next subdivision there is a little higher class and a little more expensive kind of glass provided for, "above 16 by 24 and not exceeding 24 by 30." The committee propose, instead of the McKinley rate of 10 cents per square foot, to impose a tariff of 13 cents per square foot. That is an increase of 30 per cent. But when you get down to a still higher class, to a still more expensive class, "above 24 by 30 inches and not exceeding 24 by 60 inches," a large-sized plate, then, whereas the McKinley law imposed a tariff of 35 cents per square foot, the Senate committee, in its liberality, proposes that this class of people may have their glass imported at a tax of 25 cents per square foot. That is a peculiarity running through this entire bill. There is not an exception to it from the beginning to the end of the glass schedule.

On the very largest sizes of this glass, "all above 24 by 60 inches square," the tax was 60 cents per square foot under the McKinley law, and the Senate committee proposes that that shall be allowed to come in now at 38 cents per square foot; when on the glass of small sizes, the kind of glass that must be used for the very cheapest and poorest class of furniture, the rate of taxation is increased over 83 per cent. When we come to the higher classes, the higher styles, then the increase is nearly 50 per cent. It seems that the Senator from Rhode Island and his colleagues have read the old injunction from the Bible that "whosoever hath, to him shall be given: and whosoever hath not, from him shall be taken away even that which he seemeth to have." In other words, from the poor, miserable devil shall be taken that which he has.

Mr. President, there are other paragraphs in this glass schedule in which the same rates of increase over the McKinley law will be found to exist. In all of the cheaper and lower grades there are increases running from 83 per cent to 50 per cent, and then down to 30 per cent, until you get to the higher-priced and more expensive grades, and then the rates of taxation go down with a uniform step until you get to the very highest and most expensive class.

When the present schedule was under consideration in the House of Representatives, and the examinations were made, a representative of the plate-glass interest appeared before that committee and made some interesting statements. I read from the statement of Mr. John Pitcairn as follows:

> Mr. Chairman and gentlemen of the committee, from a very small industry fifteen years ago the plate-glass business of this country has developed into a large business, which now gives employment, directly and indirectly, to at least 10,000 persons, and is a striking example of what can be accomplished under a protective policy, for, without any material change in the duty prior to that fixed by the Wilson bill, protection has established this very large industry, and competition has reduced the cost to the consumer from $2.50 per foot at the inception of the business in this country to an average price of less than 50 cents per foot. So that while plate glass was originally considered a luxury, it has now become a necessity within the reach of all.
>
> We come to you as business men, appreciating that the best interests of the country demand that the new tariff bill shall be a conservative one.

Senators ought not to lose sight of the opinion of this great glass manufacturer, that this tariff ought to be a conservative one. He says in the course of his argument:

> It is interesting to note that these imports have averaged about 3,000,000 square feet per year, and also that there has been less and less of the large glass imported in recent years, and about a corresponding increase in the imports of the small sizes.

Further on he says:

> In view of the foregoing, all of which you can easily verify, we, the undersigned, representing all the plate-glass works in this country, feel that we are fully justified in respectfully suggesting the following as a new schedule for duties on plate glass.

This gentleman certainly could not consider this rate of 83 per cent increase over the McKinley law as conservative. The Senator from Rhode Island, in the very inception of this debate, stated as follows:

> In the readjustment of rates suggested, the committee have tried in every instance to make them sufficiently protective to domestic interests without being prohibitive.

"Sufficiently protective to American interests without being prohibitive." The McKinley law was a prohibitive law, and yet this committee comes and solemnly asks the Senate to agree to an increase of 83 per cent above the McKinley law in this article, which is manufactured by an organization which operates the largest plate-glass manufactory in the world, which is an establishment having millions of dollars of capital, and which pays enormous dividends, on the ground that we are taking care of an infant industry!

Mr. PLATT of Connecticut. What company is it that pays enormous dividends?

Mr. JONES of Arkansas. The trust; the whole business; all of it together.

Mr. ALDRICH. Does the Senator state that this business is controlled entirely by one company?

Mr. JONES of Arkansas. Perhaps not all the product, but pretty nearly all of it; at least 85 per cent of the product is in the hands of one concern. I think no Senator will deny that.

Mr. PLATT of Connecticut. It has not paid any dividends for the last three years.

Mr. VEST. I want to call the attention of the Senator from Arkansas, when he is discussing the question of whether these duties are prohibitive or not, to the importations. Under the first classification of paragraph 102, where the committee propose to make this enormous increase over the McKinley Act, the importation of plate glass in 1895 was $768 only, showing that the American manufacturers have the absolute control of the domestic market. Under the second classification, where the committee made another increase, the whole importation for 1896 was $13,722.

It is a notorious fact that this association, which controls the plate-glass manufacture in the United States, meets every year at Pittsburg. There is a concern in my State, called the Crystal City Manufacturing Company, that is a member of that association, and I believe its president is the vice-president of the national association. The plate-glass product of this country, as the Senator from Rhode Island knows, is controlled virtually by that association. There are some plate-glass manufacturers outside of it, but the bulk of the product comes from them; and these statements as to exports and imports all show that they have absolute control of the market in the United States.

Mr. JONES of Arkansas. Mr. President, I have a letter signed by a number of glass dealers, dated May 28, 1897. I should like Senators to listen to these statements, for I believe they involve matters of serious concern, and matters that ought to touch the consciences of the members of this Senate. The letter is as follows:

NEW YORK, *May 28, 1897.*

DEAR SIR: We beg to protest against the proposed increase in duty on looking-glass plates (Schedule B, paragraphs 102 and 104).

The present and proposed rates are as follows:

Rate of duty per square foot.

Size.	Present rate.	Proposed rate.
	Cents.	*Cents.*
Over 1 square foot and up to 16 by 24	6	11
Over 16 by 24 and up to 24 by 30	10	13

Here is a contemplated advance ranging from 30 to 82 per cent. In addition, an ad valorem rate on such plates, when beveled, of 10 per cent is proposed by the Senate bill, making the total percentage of advance over existing rates from 60 to 120 per cent.

These goods go into cheap furniture used by the laboring classes and are not made in this country. An increase of duty can inure only to the benefit of the Pittsburg Plate Glass Company, a consolidation effected two years ago of the principal plate-glass factories of the country.

An advance in duty as contemplated will so enhance the cost of importation as practically to hand this business over to the Pittsburg Plate Glass Company, who could then compel the trade to buy glass of them to be made into mirrors at a greatly advanced cost to the masses and a profit only to the plate-glass trust. We request that present rates of duty remain unchanged.

Yours, truly,

SHRENK & CO.
BENDIT, DREY & CO.,
186 and 188 Franklin Street.
THE. W. MORRIS & CO.
VANHORNE, GRIFFIN & CO.
SEMON BACHE & CO.

Hon. JAMES K. JONES,
United States Senate.

The gentlemen who signed this letter deal in this article.

Now, as to the question whether there has been any profit paid by these plate-glass people, I propose to present a few figures to the Senate. I hold in my hand the advertisement of the Pittsburg Plate Glass Company, which appears regularly in the Paint, Oil, and Drug Review.

Mr. ALDRICH. Importers.

Mr. JONES of Arkansas. The advertisement is as follows:

PITTSBURG PLATE GLASS COMPANY.

Largest producers of plate glass in the world, operating nine plants.

No. 1, Creighton, Pa. No. 4, Ford City, Pa. No. 7, Elwood, Ind.
No. 2, Tarentum, Pa. No. 5, Duquesne, Pa. No. 8, Kokomo, Ind.
No. 3, Ford City, Pa. No. 6, Charlerol, Pa. No. 9, Crystal City, Mo.

Manufacturers of

POLISHED PLATE AND SILVERING PLATE
of all thicknesses.

Skylight and floor glass. Glass bending a specialty.

General office, Carnegie Building, Pittsburg, Pa.

With warehouses in the cities named below, where we shall keep large stocks of plate glass constantly on hand, and where purchasers can always obtain their supplies without delay:

New York, 49-53 Lafayette Place; Boston, 30 Sudbury street; Detroit, 124-128 W. Larned street; Chicago, 442-452 Wabash avenue; St. Louis, corner Twelfth and St. Charles streets; Cincinnati, 115-117 W. Front street; Minneapolis, 124-128 N. Third street.

I have in my hand a report made upon this great Pittsburg concern, which the Senator from Connecticut [Mr. PLATT] tells us has not paid any dividends in such a long time. The report is made by R. G. Dun & Co. I will read it:

PITTSBURG PLATE GLASS COMPANY.

PITTSBURG, PA., *February 5, 1897.*

Would make no statement until after the annual meeting for the purpose of appointing their directors for the current year and deciding upon important matters concerning the management of the company. Some friction on account of lack of unanimity among the directors was noticeable for some time and led to depression in the value of stock, as indicated by the selling price of the same on local exchange. It fell in a few months from 65 to less than 50, but there may not have been a special cause for this, so far as the intrinsic value of the stock is concerned, beyond the fact that some of the stockholders would eventually sell out rather than adopt the plan insisted upon by some of the others. One faction proposed to issue $500,000 five-year 6 per cent debenture bonds, to be sold and the proceeds applied to the payment of bonds falling due, this operation to continue year after year until the entire indebtedness is liquidated. The second plan, proposed by President Edward Ford, was to issue at once $2,500,000 fifteen-year 6 per cent mortgage bonds, with a redemption clause by which at any time after three years all or any part of the bonds could be redeemed. When it came to a vote on their propositions it was found that the notice advertising the proposed increase was illegal and that no action could be taken. It was somewhat of a surprise when Judge Coler offered a resolution that the policy of the incoming board be one of the strictest economy consistent with good business, and that the proposed economy commence with the reduction of all the high salaried officers and a vacation or doubling up of light duties. The resolution was seconded by President Ford and passed. Their assets and liabilities are said to be as follows:

ASSETS.

Plant accounts	$11,936,163.73
Material on hand	302,239.49
Stock in warehouses	685,431.22
Stock in factories	236,000.88
Accounts receivable	483,404.63
Bills receivable	43,434.90
Cash on hand	91,609.50
	13,838,286.40

LIABILITIES.

Preferred stock	150,000.00
Common stock	9,850,000.00
Bonds, Ford City mortgage	313,000.00
Bonds, Creighton mortgage	60,000.00
Bonds, Howard plant	140,000.00
Debenture bonds (out)	1,574,000.00
Bills payable	414,458.66
Interest on bonds not called for	19,734.22
Due on salaries of officers	13,829.22
Due on salaries of superintendents	2,674.97
Accounts payable	194,643.73
Profits carried over for 1895	380,473.71

The profits carried over for 1895 by this company, which the Senator from Connecticut assures us has not been making any money, were $380,473.71.

Profits carried over for 1896	$725,471.89
Total	13,838,286.40

Here is a company that we are told pays no dividends, a company that is making no money, with an alleged capital stock of $10,000,000, embracing nine of the great glass manufactories of the United States, and yet we are asked to increase the rate of taxation 83 per cent above that of the McKinley law to enable these people, struggling infants, to keep their body and soul together!

Mr. BATE. How many trusts are there?

Mr. JONES of Arkansas. There is one, and that is enough.

Mr. BATE. Where is it located?

Mr. JONES of Arkansas. At Pittsburg, Pa.

The report from which I am reading continues:

A member of the board is said to have remarked as follows: "In report of 1896 the plant account of the company was $12,082,419.36, while the report for last year gave the value of the properties as only $11,936,163.73, a decrease of $96,253.54, yet during the year repairs representing much more than $100,000 have been made on the different plants."

Now, mark this:

Notwithstanding the fact that princely salaries have been paid to those in high official positions, the following statement for the twenty-two months of the company's existence will show its earnings: Debenture bonds paid off, $413,000; gross amount expended in improvement, $700,000; interest paid on bonds (estimated), $210,000; profits for twenty-two months, as per company's statements, $1,105,945.60; total earnings, $2,428,945.60, or an average monthly earning of $110,472.30.

Here we have, as the total earnings in twenty-two months in the existence of this trust, $2,428,945.60.

Mr. ALDRICH. Net?

Mr. JONES of Arkansas. Total earnings, or an average monthly earning of $110,472.30.

In the methods of bookkeeping used by the company the item of $700,000 must make its appearance under the head of expenses, as it appears no place else. The business of the company is believed to have been quite large and profitable during the past year, but their expenses may have been much more than some would deem necessary. Edward and Emory Ford have withdrawn from the board of directors, and in their place are elected George W. Crouse and Charles B. McLean, the latter cashier of the Lincoln National Bank here. The other directors are John Pitcairn (president), of Philadelphia—

The gentlemen who made these kindly explanations to the Ways and Means Committee why these rates ought to be increased—

A. L. Conger, A. U. Howard, E. A. Hitchcock, Artemas Pitcairn, comptroller, and A. N. Howard, secretary. The probabilities are that the proposition to issue $2,500,000 fifteen-year mortgage bonds to cover the existing indebtedness

will be the plan adopted. This will enable the company to pay dividends, it is said. The liabilities to the public——

Mr. PLATT of Connecticut. The sum and substance of that is that somebody who wanted to put out a prospectus and to issue bonds claimed that in twenty-two months the company had earned about 10 per cent on their capital.

Mr. JONES of Arkansas. Not by any manner of means; but the substance of it is that R. G. Dun & Co., who are the reporters of the financial standing of all concerns in the United States, report these as being the facts connected with the Pittsburg Plate Glass Company. It is no prospectus for the purpose of getting gullible men to subscribe to bonds.

Mr. PLATT of Connecticut. Does the Senator think that 10 per cent in twenty-two months is an enormous profit?

Mr. JONES of Arkansas. Two and one-half million dollars on an alleged capital of $10,000,000 in twenty-two months.

Mr. PLATT of Connecticut. No.

Mr. JONES of Arkansas. That does not by any means sustain the statement of the Senator from Connecticut that this poor infant has been getting nothing all of this time.

Mr. PLATT of Connecticut. I did not say any such thing.

Mr. JONES of Arkansas. The Senator said they paid no dividends.

Mr. PLATT of Connecticut. I made that statement on the strength of a communication to me from a friend of mine, who happened to own $5,000 of stock of the company, that he had not been able to get any dividends since he took stock in the company.

Mr. JONES of Arkansas. Perhaps that is true, but the company has been going along, and if it has not seen fit to pay dividends, nobody can deny the statement which I have presented here.

Mr. ALDRICH. I did not understand the Senator from Arkansas to make any statement as to the net profits of this concern. I asked him whether the earnings to which he referred were net or gross, and he did not seem to know. If he now has any statement which shows the actual profits in twenty-two months, I should like to have him produce it to the Senate.

Mr. JONES of Arkansas. I read the statement as given by R. G. Dun & Co.

Mr. QUAY. If the Senator from Arkansas will permit me to interrupt him, I will mention what the Pittsburg Plate Glass Company have to say in relation to this question.

Mr. PLATT of Connecticut. Will the Senator permit me a moment?

Mr. QUAY. Yes; and as soon as the Senator has finished his remarks, I desire to state the company's side of the case.

Mr. PLATT of Connecticut. I thought I caught the statement that the profits of this company for twenty-two months were $1,105,000. That is about 10 or 11 per cent on the capital for twenty-two months, or about 5 per cent a year. I thought I caught it correctly.

Mr. QUAY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Arkansas yield to the Senator from Pennsylvania?

Mr. JONES of Arkansas. With pleasure.

Mr. QUAY. In the correspondence to which I have referred it is stated that any intimation, statement, or charge that the Pittsburg Plate Glass Company is a trust, or that it has been or is directly or indirectly in combination or conspiracy in restraint of trade, or for the purpose of regulating the output or prices with any other company or companies, in violation of either any Federal or State antitrust law, is wholly unwarranted and absolutely untrue.

The Pittsburg Plate Glass Company was organized many years ago for the manufacture of plate glass in this country, and in the spring of 1895 increased its capital in order by actual purchase to acquire the property, real and personal, of several other companies engaged in like manufacture, namely, two properties in Pennsylvania, two in Indiana, and one in Missouri, the object of the purchase being to enable it by economic administration and production to make and offer to the consumers of this country a better article at a lower cost.

In furtherance of this policy the Pittsburg Plate Glass Company has established its own warehouses in the cities of Boston, New York, Philadelphia, Chicago, St. Louis, Cincinnati, Detroit, and Minneapolis for the sale and distribution of its product direct to consumers and at prices showing reductions about equal to the profits realized by those who had previously monopolized the business, namely, the importers and jobbers, who had unitedly been acting under a national association, which was distinctly a trust, the breaking up of which must accordingly be directly credited to the Pittsburg Plate Glass Company.

It is easily understood, therefore, why these importers and jobbers have personally and by correspondence made the charge to members of the committee, and would have the public believe, that the Pittsburg Plate Glass Company is a trust.

This company is to-day in active and legitimate competition with three other independent companies of like character, two in Pennsylvania and one in Indiana, all of whom unite with it in asking such protection as will enable them to compete with foreign combinations and their representatives in this country, who use this market as the dumping ground for their surplus product manufactured on a basis of wages with which our manufacturers can not compete without the protection for which they ask.

The plate-glass business of the country is on anything but a profitable basis at this time. The Pittsburg Plate Glass Company is not even a close corporation. Its stock is owned and held by over 600 shareholders residing in Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Missouri, Kentucky, California, and elsewhere.

They say further that the plates of foreign manufacture to which the Senator from Arkansas refers are made almost exclusively in Bavaria, under the control of a verein or trust, with headquarters at Fürth, of which trust several of the New York importers who urge a reduction of duty on such glass are members. Continuing, they say:

> Over 3,000,000 square feet of such glass were imported for the year ending June 30, 1896; and if the American factories can increase their output by that amount, they can and will give employment to many idle workmen.

So that even if this were a trust, contrary to this absolute denial, it is a question between a German or a foreign trust and an American trust, and so far as I am concerned, I am in favor of the American trust.

Mr. JONES of Arkansas. Mr. President, I have read the standing advertisement of the Pittsburg Plate Glass Company. Whether you call it a trust or not, here, according to their own statement, is an organization of nine large plate-glass manufacturers. They claim to be the largest plate-glass manufacturers in the world. There are three other small plate-glass manufacturers, I understand—two in Pennsylvania and one in Indiana or Missouri—and but three, and they produce but an infinitesimal part of the plate glass produced in this country. The overwhelming part of the production is by the Pittsburg Plate Glass Company from its nine manufactories, all of which are controlled by a central authority, and all of which make the terms of the sales to suit themselves.

Mr. President, that these people absolutely control the sales, make them on such terms and in such ways as they see fit, without regard to the convenience or the wishes of their customers, I imagine no man informed about the facts will deny. When a man engaged in the business wants small sizes of plate glass, he is told that he can not have them unless he buys a certain larger proportion of larger sizes. The large plates are those on which they make their money. They refuse to make or sell small plates unless a larger number of the larger size are taken with them.

I have somewhere among my papers quite an interesting correspondence on this question, which I propose to present to the Senate. I am unable to lay my hand on it at this moment, but I hope to do so before I conclude.

I have an order sent by one of the concerns signing the letter which I presented to the Senate a short time ago, asking for certain sizes of plate glass, and I ask the attention of the Senate to the answer made by the Pittsburg Plate Glass Company, which the Senator from Pennsylvania considers in no sense a trust. They say:

> We beg to acknowledge receipt of your order of 30,000 feet silvering quality, but as we find that the allotment of 18 by 40 and 24 by 30 amounts to 15,000 feet of the order, we regret that we can not forward the same to the factory under such conditions. Under no circumstance will they accept orders for these two sizes at a greater proportion than 20 per cent of the entire quantity under 5 square feet.

They are told that they can not have it; that under no circumstances will they sell more than 20 per cent of the order in sizes less than 5 square feet. In other words, if a man wants to buy one part of a suit of clothes, he has to take the balance of the suit, boots, overcoat, and everything else, whether he wants it or not. He is bound to do it.

> Your memorandum shows 8,445 feet from 5 to 10 feet, and 6,647 under 5 square feet, without either of the two sizes. Under the conditions that our factory makes you would be entitled to 133 lights of each size or 1,330 square feet in 18 by 40 and 24 by 30, instead of 1,500 lights of each. We would thank you if you will kindly amend the order.
>
> We note your request as to impressing upon the factory the necessity of using every care in selecting the glass.

Here is a copy of the reply of the party making the order:

> We are in receipt of your favor of the 30th, and note the conditions that you impose. Inasmuch as we can not, in turn, do the same with our trade, we see that we have to look abroad for our supply in assortments such as our business requires.

But if these gentlemen can succeed in having this rate of taxation put upon glass, then the people who want to buy glass need not attempt to look abroad to get any of their supply. They will see to it that it is impossible that any American dealer shall have the audacity to go anywhere else upon the face of the earth except to the Pittsburg Plate Glass Company to get his supply on hand.

I have a letter from the same concern, written only a few weeks ago, in which they take the same position—that they will not sell unless 20 per cent of the amount ordered be for glass less than

5-foot pieces; that they will not furnish any more. The writer says:

Replying to your favor of the 13th instant, would say that the order for small glass placed through our New York house does not entitle you to any 18-40's or 24-30's, as the 20 per cent allotment applies to orders for silvering quality glass.

This company not only monopolizes the American market, not only controls the sale of plate glass everywhere through its agents, not only controls the production, but the distribution of the glass, and, in addition, they absolutely insist that they shall dictate to a man who wants to use glass the sizes he shall use. He can not be allowed to use the glass he wants, and yet we are told by the Senator from Pennsylvania that it is not a trust. Whatever you call it makes no difference; it is un-American, it is outrageous, and the American Senate ought not by any legislation to allow the continuance of such tyranny on the part of a commercial organization created in this country.

I have a letter from the Boston Plate and Window Glass Company, of Boston, Mass., dated April 4:

We beg to protest against any increase in the present rate of duties on polished plate glass (Schedule B), and to pray for a large reduction of the present rates, for the following reasons:

The yearly consumption of this article in this country is about twelve to fifteen million square feet.

It is an article of necessity.

The present duty is practically a prohibitory one, and, with its different schedules, amounts to an average of more than 125 per cent, taking the yearly consumption of glass in each schedule.

The present rates of duties, with the percentages of same, compared with the selling prices of foreign makers f. o. b. steamers in Europe, are as follows, viz:

Sizes.	Present duty per square foot.	Percentage of duty upon foreign cost.	Per cent used of total consumption (about).
	Cents.		
16 by 24	5	35	6
24 by 30	8	50	9
24 by 60	22½	156	24
Larger sizes	35	(*)	61
			100

* From 132 per cent to 156 per cent, depending on sizes.

The above figures of percentages of present duty on foreign cost are somewhat smaller than what they will actually amount to.

About two years ago the principal plate-glass factories consolidated, forming the Pittsburg Plate Glass Company, capital $10,000,000. There are only three other, and small, factories in the country.

We earnestly pray for a reduction of two-thirds of the present rates.

And that prayer is responded to by an increase of 83 per cent, not only above the present rate, but above the McKinley Act.

With the duties fixed at one-third only of present rates the four American factories will still have a protection of more than 40 per cent, and this is the only way by which the Government can obtain any revenue on this article.

Mr. President, the only pretense, the only justification we can have for levying this tax upon that article at all is to raise revenue for the Government. There is practically, to which point the attention of the Senate was called by the Senator from Missouri a short while ago, no revenue from the present rate of taxation, and yet the Senate is asked to increase that rate enormously. It would not have any effect on the importation. A little is coming in now, but what little comes in will be stopped by this proposition, and the price of American glass can go on and on, higher and higher, especially on the grades of glass consumed by poor people.

I have run somewhat hastily over these different propositions. There are a number of other important things connected with it, which I am sure other Senators will bring out. I hope they will be fully and thoroughly presented to the Senate. An important matter of this kind, it seems to me, ought to be fairly understood and fully discussed. If it is the purpose of the majority, without regard to the fact that the production of glass in this country is practically in the hands of one concern, and that a concern with a capital of $10,000,000, one which, according to the Senator from Rhode Island and the Senator from Connecticut, has made a profit of more than a million dollars in twenty-two months, during which it has been an organization, while other industries just as meritorious have been profitless, or losing money—if it is their purpose, notwithstanding these facts, to increase the taxes levied on the American people to swell the price of plate glass for the purpose of increasing the fortunes of this organization, then let them take the full responsibility for doing so, but those who have some regard for the wishes of their constituents, those who have some regard for the interest of the poor consumers throughout the country, those who are unwilling to increase the cost of the plate glasses that ornament the homes of the poor and add some sort of comfort to the masses of the people of the United States, I hope will be found recording their votes in antagonism to every single one of these propositions.

Mr. WHITE. Mr. President, I have here two or three statements, some of which, I presume, were submitted to the committee when this particular schedule was under consideration. The communication which I hold in my hand is from Van Horn, Griffin & Co., plate and sheet glass, Laight street, New York. This document purports to be a copy of a letter addressed to the chairman of the subcommittee of the Committee on Finance, the Senator from Rhode Island, and is as follows:

We respectfully protest against the proposed increase in the rate of duty on polished plate glass, and at the same time request a reduction.

The present rate of duty on all plates containing over 5 square feet is now equivalent to from 117 to 175 per cent ad valorem, as shown in the accompanying table.

On small sizes of 5 square feet or less the present rate varies from 50 to 66 per cent, but the consumption of these sizes is only about 5 per cent of the whole. It is now proposed to raise the duties on these small sizes to make it equivalent to from 80 to 100 per cent ad valorem.

And this notwithstanding the fact, I might add, that it appears that the consumption of those glasses amounts to but 5 per cent of the whole. The letter continues:

The annual consumption of plate glass for glazing purposes is about 15,000,000 feet. The importation is nothing. The only plate glass now imported is the finest quality for mirror purposes. About two years ago the principal plate-glass companies of the country consolidated, forming the Pittsburg Plate Glass Company, with a capital of $10,000,000. They practically control the situation. There are only three other small factories in the country.

Then follows a table which I will insert without reading:

Size.	Polished plate glass f. o. b. Europe.			Dingley bill.	
	Cost per square foot.	Present duty per square foot.	Percentage of duty to cost in Europe.	Duty per square foot.	Percentage of duty to cost in Europe.
Containing up to—	*Cents.*	*Cents.*		*Cents.*	
2½ square feet	10	5	50	8	80
5 square feet	12	8	66⅔	12	100
10 square feet	16	22½	140	22½	140
25 square feet	20	35	175	35	175
40 square feet	23	35	152	35	152
50 square feet	24	35	146	35	146
75 square feet	26	35	135	35	135
100 square feet	30	35	117	35	117

The firm continues as follows:

We would request that no increase of duty be made on small sizes, as proposed by the Dingley bill, and that the duty on sizes containing over 5 square feet be reduced one-half, which would still leave a duty equivalent to from 60 to 90 per cent ad valorem as a protection to the American manufacturer, and also permit of some plate glass being imported, thus adding to the revenue of our Government.

I notice that the committee has not reported any changes as to certain items in this schedule, and by referring to the importations it appears it was manifestly because there were no importations under those particular paragraphs. Where it is disclosed that the Wilson Act or any anterior measure has fixed a rate which is absolutely prohibitive, and where it is conceded that we need revenue, it appears in those cases, as in the case of steel rails, triumphantly referred to by the Senator from Rhode Island, that there ought to have been some reduction even for the sake of looks, although in that case it would not amount to anything as a matter of fact.

I have also another communication from the same firm, of a later date, with certain additional facts set forth, as follows:

Supplementing our letter to you of April 6, regarding proposed duty on plate glass as per the Dingley bill, we beg to summarize the conditions that will exist with the enactment of the Senate bill:

Size.	Polished plate glass f. o. b. Europe.			Senate bill.	
	Cost per square foot.	Present duty per square foot.	Percentage of duty to cost in Europe.	Duty per square foot.	Percentage of duty to cost in Europe.
Containing up to—	*Cents.*	*Cents.*		*Cents.*	
2½ square feet	10	5	50	8	80
5 square feet	12	8	66⅔	10	83
10 square feet	16	22½	140	22½	140
25 square feet	20	35	175	35	175
40 square feet	23	35	152	35	152
50 square feet	24	35	146	35	146
75 square feet	26	35	135	35	135
100 square feet	30	35	117	35	117

We would again state that the annual consumption of plate glass for glazing purposes is about 15,000,000 square feet, and that the importation, owing to the enormous duty, is nothing. The only plate glass now imported is the finest quality for mirror purposes. The business in plate glass in this country is practically controlled by the Pittsburg Plate Glass Company, which was formed about two years ago by the consolidation of the principal factories in the country.

We again request that no increase of duty be made on small sizes (up to 5 square feet), as proposed by the Senate bill, and that the duty on sizes containing over 5 square feet may be reduced at least one-half, which would still leave a duty equivalent to from 60 to 90 per cent ad valorem as a protection to the American manufacturer, and also permit of some plate glass again being imported, thus adding to the revenue of our Government.

I have also a letter from a firm of importers in New York, Sutphen & Myer, as follows:

We beg to call your attention regarding proposed duty on plate glass according to the duties of the Senate bill.

Then follows a computation, in which they figure the matter out similarly to the correspondent already referred to, and continuing, they say:

The annual consumption of plate glass for glazing purposes is over 14,000,000 square feet, and the revenue accruing to our Government is absolutely nothing by reason of the excessive duty. The Pittsburg Plate Glass Company, which consists of a consolidation of the principal plate glass companies, practically control the situation. There are but three small plate glass factories in the country outside of the Pittsburg Plate Glass Company.

We would request that no further increase of duty be made on sizes up to 5 square feet, and that the duty on sizes containing over 5 square feet be reduced one-half. This reduction would still leave as a protection to the American manufacturer a duty equal to from 60 to 90 per cent ad valorem, and by reason of the importation of plate glass being resumed, a most material addition would be made to the revenue of our Government.

The Senator from Arkansas has run over many of these items, and at present I do not wish to add anything further until one of the paragraphs not yet read has been reached. I ask that these communications may be inserted in the RECORD as read.

Mr. BACON. I should like to ask the Senator from Rhode Island whether, since the date of the McKinley Act, the market price of these various kinds of glass has or has not fallen; and if so, to what extent?

Mr. ALDRICH. Some have increased and some have decreased. There is no general answer that would apply to the question of the Senator from Georgia.

Mr. BACON. Is it not a fact that there has been a very material decrease in the market price of most of these grades of glass?

Mr. ALDRICH. I think not, of most of them. If the Senator will ask me as to any particular one, I will give him an answer.

Mr. BACON. I will ask as to common glass, glass commonly used for window glass and looking-glass.

Mr. ALDRICH. Window glass is not now under consideration.

Mr. BACON. I understand that.

Mr. ALDRICH. There is no common glass included in this particular paragraph. We are not now providing for common window glass.

Mr. BACON. So I understand, but the inquiry was made generally.

Mr. ALDRICH. On paragraph 101 the unit of value in 1893, under the act of 1890, was 23 cents a square foot, and in 1896, 20 cents.

Mr. BACON. Very well. That shows a decrease from 23 to 20 cents. Therefore, if the specific duty is increased, it is a much larger increase than it would appear to be on its face. With a decrease in price and an increase in the specific duty, the duty is much larger than it appears. That is the point. I wish to ask the Senator if that is not a fact?

Mr. ALDRICH. Persons sitting in the galleries and listening to the discussion, if they were neither familiar with the facts in the case nor the methods which are adopted at times in regard to tariff discussions in the Senate, would think that some outrageous duty was being imposed by the provisions of these paragraphs upon an article of necessity for the common people of the United States.

The fact is that neither of those things is true. These paragraphs refer to plate glass, and nothing else, and plate glass is not used by the common people of the United States for any purpose or at any time. The changes in rates suggested by the Senate committee, retaining largely the provisions of the bill as it came from the House in that regard, are simply a readjustment of rates provided in the act of 1890, and to some extent in the act of 1894, upon the various descriptions of plate glass. It is true that we have suggested an increase of rate upon some of the brackets, but a very much larger decrease upon most of them below the rates of 1890.

The Senator from Arkansas has taken one of those items out of twenty or thirty upon which an increase of rate is suggested, and he rings the changes upon that one item as though it applied to the whole paragraph.

Mr. JONES of Arkansas. In every paragraph in this schedule, the smaller brackets, the cheaper glass, the duty is increased from 30 to 80 per cent. The decreases are on the high glass, the high-priced glass, as I pointed out in the beginning.

Mr. ALDRICH. The quality of the glass is the same. It is true that a large plate costs more per square foot than a small one, for obvious reasons, but there is no difference in their uses or the classes of people who do use them.

Mr. TILLMAN. Will the Senator from Rhode Island allow me to ask him whether, in traveling over the country, he has ever seen any of these large plate glasses in windows?

Mr. ALDRICH. In the houses of the people?

Mr. TILLMAN. Yes.

Mr. ALDRICH. No, sir; I never see them.

Mr. TILLMAN. The country people, the farmers, can not buy them; and yet they do buy the small glass.

Mr. ALDRICH. They do not buy any of the glass referred to in this paragraph, I will say to the Senator from South Carolina, either in South Carolina or in any other part of the country. He can rest assured of that.

Mr. TILLMAN. Where do they buy them?

Mr. ALDRICH. They buy them for looking-glass plates and for more expensive houses in cities. I am willing to venture the statement that there is not a house in South Carolina, outside of the city of Charleston, which has a plate-glass window in it. I do not believe there is one. But that is not a matter of consequence.

Mr. TILLMAN. We are very poor, but I think the Senator is a little mistaken.

Mr. ALDRICH. I do not know. The Senator from South Carolina of course knows more about it than I do. I am only stating my belief about it.

As to the reasons which led to the change and to the readjustment, the Senator from Arkansas, in a long address to the Senate, has stated as the principal reason against the increase of these duties that the production of plate glass in the United States is largely controlled by one single company, who advertise themselves as the largest plate-glass manufacturers in the world. I should like to ask the Senator from Arkansas, in all candor, whether he thinks that is any reason why these duties ought to be changed up or down? Does it affect the merits of this case at all whether the gentlemen control 40 per cent or 50 per cent or 60 per cent of the production of plate glass in the United States? Certainly it is no crime, according to my notion, for an American establishment to be the largest manufacturer of plate glass in the world. It is an evidence, to my mind, of the energy and the enterprise of those people, and it certainly is no reason why they should be denounced upon the floor of the Senate or elsewhere, in my judgment.

Mr. JONES of Arkansas. But is it not a reason why they ought not to be allowed to plead the baby act and to ask to be taken care of by high protection?

Mr. ALDRICH. I do not understand that they plead the baby act at all, or that they are asking at the hands of the American Congress anything but equal and exact justice.

Mr. LINDSAY. I will ask the Senator from Rhode Island, if he will permit me, whether, if this combination controls the majority of the production of this kind of glass and fixes the price——

Mr. ALDRICH. It does not fix the price.

Mr. LINDSAY. And dictates the terms upon which it will sell certain kinds of glass, that is not a good reason why we should refuse to give it additional protection?

Mr. ALDRICH. They deny most emphatically (and there has been no evidence submitted to the committee to the contrary, and I think there is no such evidence in existence) that there is any combination on their part with other manufacturers to control the prices or to limit production or to do anything else that is generally understood to be a restraint upon trade. There is no evidence of that kind before the committee at all.

Now, the Senator from Arkansas says that these men have a monopoly of the American market; that there is practically no importation. The comparative statement which was before him and is now before me shows conclusively that that statement is far from being an accurate statement of the facts in the case. The importations of plate glass in 1896 amounted to more than $2,000,000, and it extended over almost every single one of these paragraphs.

Mr. WHITE. If the Senator will permit me, was there not about $1,000,000 worth of glass exported during the last year?

Mr. ALDRICH. I think very likely there was. I should think very likely there might be a considerable amount of plate glass exported. But the fact is that upon the sizes on which the increase is suggested by the committee and by the House bill the importations have been constantly increasing, as I shall show very briefly.

For instance, upon this first bracket, which was made the first subject of discussion and criticism by the Senator from Arkansas, the importations in 1893, when the duty was 5 cents a square foot, amounted to $84,000. In 1896, with the same duty, they amounted to $126,000, or an increase of nearly 50 per cent. As to the rates of duty which are suggested by the committee, if the Senate committee rate had been applied to the importations of 1896, the average ad valorem would have been 39.42 per cent. So the ultimate rates that will result from this increase is less than 40 per cent.

One would have supposed to have listened to the Senator from Arkansas and the Senator from California that we have reached an enormously high rate by the suggestions which we have made. We have simply sought to equalize the rates between the different paragraphs in the bill. For the information of the Senate, I will read the resulting ad valorem in this whole column, so that there will be no question about it.

In the first one it is 39.42; in the next, 44.34; in the next, 88.39; in the next, 46.23; in the next, 34.31; in the next, 34.11; in the next, 22.79; in the next, 43.25; in the next, 42.52, and so on throughout the whole list of the changes which have been made by the Senate committee. In some cases the rate is as low as 16 and 17

per cent and 29 per cent. In only one case is the rate of 88 per cent suggested, and that rate is exactly the same rate imposed by the Wilson Act, prepared by the Senator from Arkansas and his associates. So in all these other changes the rates are very much less than the average which was imposed upon the glass schedule, and almost half less than what was proposed by the Senators themselves upon some of the articles covered by this very paragraph.

Mr. WHITE. If the Senator from Rhode Island will permit me, I wish to call attention to the matter he is now considering, on page 43 of the comparative statement. In all above 24 by 36 inches we find that under the law of 1890 the rate was 3½ cents. It is now 3½ cents, and the ad valorem equivalent is given in the document before us as 118.73. That is a case where the Senate committee has evidently increased the rate as compared with the law of 1890.

Mr. ALDRICH. As my colleague from Connecticut [Mr. PLATT] suggests to me, that certainly does not prove that the suggestion made by the Senator from Arkansas that we have increased the duties upon the smaller size glass is correct, because that is the largest size of any, and a very unimportant one, in the whole schedule.

Mr. WHITE. I think the statement of the Senator from Arkansas had reference to the value. I notice that the unit of value is very low in this particular instance.

Mr. JONES of Arkansas. If the Senator will allow me on that point, I believe we are on paragraph 101——

Mr. ALDRICH. I am discussing paragraph 101, but the Senator from California calls attention to an article in 104.

Mr. JONES of Arkansas. The Senator from Rhode Island said my statement was not sustained that the Senate committee were increasing the rate much more greatly on the smaller size glass than the larger size. I propose to refer the Senator to the comparative statement. Take paragraph 101, page 41 of the comparative statement. In the very first bracket you increase the rate from 5 cents in the McKinley Act to 8 cents here.

Mr. ALDRICH. I understand that.

Mr. JONES of Arkansas. Scarcely anyone will deny that that is an increase.

Mr. ALDRICH. And I am pointing out what the effect of that is, if the Senator will allow me.

Mr. JONES of Arkansas. But the Senator was saying that my statement that you were increasing the rates on the smaller size glass and not increasing the rates in the same proportion on the larger size glass is not sustained by the facts.

Mr. ALDRICH. I understood the Senator from Arkansas to make the statement that we propose to increase the rates of duty on the smaller size glass until the equivalent ad valorem is much higher than on the larger size.

Mr. JONES of Arkansas. I instituted no comparison between the equivalent ad valorem on the two classes.

Mr. ALDRICH. Then I——

Mr. JONES of Arkansas. What I said was that as a matter of fact you are increasing, and increasing enormously, the rates of tax on small-size glass and that you are not increasing the tax in the same proportion on the larger size.

Mr. ALDRICH. For obvious reasons, if the Senator from Arkansas will permit me, we have increased the rate, as I say, on the smaller size glass, for purposes of readjustment; but the effect of that increase is at the end only to impose one-half the rate of duty which the Senator himself imposed by the act of 1894 upon most of the articles of plate glass included in this schedule. Now, that is the fact about it.

Mr. JONES of Arkansas. Will the Senator point out where he has increased it?

Mr. ALDRICH. I am just pointing out that the result of the 8 cents out of this computation is to impose in the end only 39.42 per cent ad valorem, while his own rate, suggested by his own committee, on sizes from 24 to 60 was, under his own bill, 88.89 per cent ad valorem, more than double the duties which we now suggest upon this item. The reason for that readjustment, as I have already shown, is the largely increased importations on the smaller sizes, and the necessity, if we intend to do justice by these various articles, to reduce the rates and make them equal upon all concerned.

Mr. JONES of Arkansas. Will the Senator have the goodness to show one bracket, one single paragraph, one single lot of glass on which he has proposed a lower rate than was proposed in the Wilson bill?

Mr. ALDRICH. I am not saying that we do? We simply retain the rates which the Senator himself retained upon the larger sizes, which in many cases amounted to 100 per cent ad valorem, double the rate which we now suggest upon the small sizes. The readjustment made in 1890 was not a correct one, and it is to correct the inequality made by the act of 1890 in regard to the different sizes of glass that these changes are made. They are not excessive, they are not unnecessary, they are reasonable, and proper, and just.

Mr. CHILTON. Mr. President, a few days ago we had from the distinguished Senator from Rhode Island [Mr. ALDRICH] a very able speech, to which we listened with attention. Near the beginning of that speech I find the following paragraph:

> It was, I believe, thoroughly understood throughout the country in the last political campaign that if the Republican party should be again intrusted with power no extreme tariff legislation would follow. It was believed that in the changed conditions of the country a return to the duties imposed by the act of 1890 would not be necessary, even from a protective standpoint.

When we take up this glass schedule and examine it in the light of this declaration, it seems to me that the Senator from Rhode Island owes it to the country not to insist upon such great increases over the McKinley rates. According to his conception of the obligation due by the Republican party, it would not be necessary. But stronger than this, it is a special imposition upon that class of the people who are best entitled to Government favor to raise the duty upon the particular items of glass now under consideration.

The Senator from Rhode Island a few minutes ago asserted, I believe, that the glass mentioned in paragraphs 101 and 102 was not in use among the mass of people. I think he can not be correct in that. The glass mentioned in paragraph 102 is the silvered glass of the kind which is used for mirrors. Many mirrors are framed in this country, and these are the mirrors which are generally used by the working people. They are used in folding beds, in bureaus, in washstands, and in many other articles of furniture.

Now, sir, if you analyze paragraphs 101 and 102, you find that the increases are at the point where they bear most heavily upon the common people. Take the first bracket in 101, plate glass 16 by 24 inches square. In the McKinley Act this was 5 cents a square foot. The Wilson rate was 5 cents, like the McKinley rate. Both have been increased to 8 cents a square foot.

Now, take the second bracket, plate glass not exceeding 24 by 30. The Wilson rate was 8 cents, the McKinley rate was 8 cents, and it has been raised by the Senate committee to 10 cents a square foot.

Now, take the third bracket, and you find that the Wilson rate, 22½ cents a square foot, is continued.

In the fourth bracket you find also that the Wilson rate is preserved without change.

Now, sir, the point to which I wish to attract attention is that the glass mentioned in the third and fourth brackets is largely unaffected by the tariff rates, because the American factories have complete control of the home market on these sizes. About 75 per cent of the production of this country is glass such as is described in the fourth bracket. Fifteen per cent of the American product is such as that mentioned in the third bracket.

Ninety per cent of all the glass produced in this country would be included in these two brackets of large-sized glass, and it is no concession to consumers to leave the duty at the Wilson rate. But on the first two brackets—the small-sized plate glass and mirrors—the result will be oppressive if the duty is increased. While this glass constitutes only 10 per cent of the total domestic output, and in relative value is small, it is the only plate glass which is sold to the great body of the people.

The Senator from Rhode Island ought not to close his ears to these appeals. He ought not to steadily resist every demonstration of the inequalities of these paragraphs. He ought to leave the McKinley rate stand.

Now, taking up 102, the silvered-glass paragraph. I believe the Senate Finance Committee have designated a more accurate proportion between the rates on silvered and unsilvered glass than that stated in the Dingley bill. I believe that the House bill was an inartistic measure in that respect. But, sir, while your proportions between plain and silvered glass are right, I contend that you have put the small sizes of glass far too high in both paragraphs.

The rates in the first two brackets of both paragraphs should be here reduced to the McKinley rates. That is certainly a reasonable concession to ask at the hands of the Finance Committee.

The increases are even greater in paragraph 102 than they are in the unsilvered paragraph. On silvered glass not exceeding 16 by 24 inches square the McKinley rate was 6 cents a square foot, and yet it has been raised to 11 cents a square foot, or nearly double the McKinley rate.

In the size not exceeding 24 by 30 inches square the Wilson rate was 10 cents a square foot, the McKinley rate 10 cents a square foot, and it has been raised to 13 cents a square foot.

Now, sir, I appeal to the Senator from Rhode Island to put both those small sizes, which are those used by the common people, back to the McKinley rate.

Mr. VEST. Mr. President, it is a remarkable fact that whenever the Senator from Rhode Island makes a readjustment he always raises the lower duties, but never thinks of cutting down the higher ones. I have heard him preach that doctrine of readjustment before, and it invariably comes out the same way. He readjusts always by keeping the enormous duties, and then by raising the lower duties, so as to reach something like a level with the higher. Here is a conspicuous example of what has been noticed here again and again.

Take the sizes up to 2¾. The present duty is 5 cents; the European cost is 10 cents; the ad valorem under existing law is 50 per cent.

Mr. ALDRICH. Which paragraph does the Senator from Missouri refer to?

Mr. VEST. I refer to that upon the two smaller sizes up to 2¾ square feet and then up to 5 square feet. The next is up to 10 square feet, and then to 25 square feet, to 40, 50, 75, and to 100 square feet. As a matter of course, the common people of the country are only interested in the lower grade, the smaller sizes.

As I was proceeding to say, the duty under existing law is 5 cents upon the glass up to 2¾ square feet in size, which makes 50 per cent ad valorem on the European cost of 10 cents. That is increased by the Senate committee's bill to 8 cents from 5 cents, making an increase of 30 per cent ad valorem, the Senate amendment making 180 per cent, and so on the next grade up to 5 square feet. The ordinary common people, as Lincoln called them, are interested only in these two grades. The European cost is 12 cents to the square foot, and under the existing law the duty is 8 cents, or 66⅔ per cent ad valorem. The Senate committee has raised it from 8 cents to 10 cents, making it 83 per cent instead of 66⅔ per cent. But when it comes to the larger sizes, which are articles of luxury, used only by people of large means and by storekeepers who are able to buy such articles, and by rich people in their houses, and in mirror and pier glasses, the duties remain, both in the Senate bill and in the existing law, 140, 175, 153, 146, 135, and 117 per cent.

Mr. ALDRICH. What is the Senator reading from?

Mr. VEST. I am reading from a calculation made by Sutphen & Mayer, of New York, which, when compared with the comparative statement, you will find to be correct.

Mr. ALDRICH. I have just compared it and I find it to be strangely incorrect. If the Senator will look at the table furnished by the Bureau of Statistics, he will find that the average value of looking-glass plates, 16 by 24, of all that were imported, was 31 cents in 1893 and 25 cents in 1896. That was the average value of all, and the Senator is basing his figures, upon the computation of somebody, at 10 cents a square foot.

Mr. VEST. I am basing it upon a computation of 35 cents, and if I take the Senator's reduction it still leaves an enormous duty upon that grade.

Mr. ALDRICH. The average duty is 43.25 per cent of the total importation for 1896 on the highest grade which we propose.

Mr. VEST. That may be very true, but still upon these higher grades that is the ad valorem duty.

Mr. ALDRICH. The Senator was trying to make it appear, as I understood him, that upon the importations of 16 by 24 and smaller looking-glass plates we are imposing some excessive duty. I say upon the average value as shown by the Bureau of Statistics we are only proposing to impose a rate of 43.25 per cent.

Mr. VEST. Take the grade up to size 25; I will ask the Senator what is the rate of duty imposed by the Senate committee's bill?

Mr. ALDRICH. On looking-glass plates not exceeding 16 by 24 inches square the rate we propose is 11 cents. That is the highest increase in the whole schedule, and even at that rate the increase to 11 cents amounts only to 43.25 per cent.

Mr. CHILTON. The business grew up in this country under the old rate.

Mr. ALDRICH. It did not grow up very much. There was a million dollars' worth imported last year. It shows that it has not grown to the stature of manhood yet.

Mr. CHILTON. The whole plate-glass industry has been built up in the last fifteen years in this country under that rate.

Mr. ALDRICH. I know it has, from the very fact that we have been imposing protective duties; and we want to continue that policy until we have secured the $2,000,000 worth now imported, made by foreign manufacturers.

Mr. VEST. It is remarkable that the Senator from Rhode Island never has thought of reducing the higher duties, but has persistently engaged himself and his committee in increasing the lower duties. That is the point I make. Why has it never suggested itself to him?

Mr. ALDRICH. The Senator can not point to half a dozen instances in this bill where rates have been increased over those imposed by the act of 1890.

Mr. VEST. Does the Senator mean to say that he has not increased the two sizes here?

Mr. ALDRICH. I say we have.

Mr. VEST. Exactly.

Mr. ALDRICH. But the Senator can not point to a half dozen instances outside of this particular paragraph in which the increase is above the act of 1890.

Mr. VEST. Half a dozen! I have already called attention to more than twenty——

Mr. ALDRICH. I have not noticed them.

Mr. VEST. In the schedules through which we have gone.

Mr. ALDRICH. I have not noticed them.

Mr. VEST. I did not enumerate them; but there has not been half an hour since the debate commenced that I have not called attention to an increase over the McKinley Act, and I will undertake to do so all through the whole bill from beginning to the end. But the Senator can not evade the salient point in the discussion. The two grades in which the common people of the country are interested are the two smaller grades, and he admits himself that he has increased the rate on those. In one instance he has increased it from 50 to 80 per cent and in the other from 66⅔ to 83 per cent.

Mr. ALDRICH. I deny the accuracy of the Senator's figures. I take the average value of importations as the best possible test we can get, and I do not take——

Mr. VEST. I will settle the question by asking the Senator just this single question: Has he not made an increase in those two grades?

Mr. ALDRICH. Unquestionably, and I have so stated, time after time.

Mr. VEST. Very good. That is enough for my purpose. It has never suggested itself to the Senator to reduce the higher grades in which the common people are not interested, but he persists in keeping up the duties on the two lower grades, and calls that a readjustment. His readjustments always are in one direction—in the shape of higher duties. I have never known the Senator to bring down duties in order to readjust a schedule—never.

Mr. ALDRICH. But the Senator will agree that we propose a very large reduction below the act of 1890 on these higher schedules? That is what I call a readjustment.

Mr. VEST. If we take into consideration the prices and the condition of the trade of the country, it is not a reduction.

Mr. ALDRICH. On the two higher brackets in paragraph 102, to which the Senator has alluded, we have reduced, first, from 35 cents a square foot to 25 cents, and in the next one from 66 cents a square foot to 38 cents. Is not that a readjustment?

Mr. VEST. Of course, and the Senator has always readjusted rates in order to decrease the importations. Whenever there is a large importation, it invariably follows as the night follows the day that there is an increase of duty in this whole bill.

Mr. ALDRICH. But does not the Senator from Missouri agree with me that a very large increase in importations would be very good evidence that the duties were not protective?

Mr. VEST. No; not always.

Mr. ALDRICH. From my standpoint; not from the Senator's.

Mr. VEST. It depends upon the amount consumed in this country.

Mr. ALDRICH. Other things being equal.

Mr. VEST. Certainly. We consume in the United States, for instance, from twelve to fourteen million square feet of this glass. And because a million feet came in, is that any reason for putting up the duties? Suppose only 2 or 3 per cent of a certain article comes into the United States out of an enormous consumption of millions upon millions, is that any reason for putting up duties upon the whole aggregate mass?

Now, take the importations of plate glass; what proportion do they bear to the consumption in the United States? That is the question. Whenever the Senator from Rhode Island (and I undertake to say it is the unvarying rule) finds large importations anywhere upon any article in this bill, he immediately puts up the duty. He might just as well put up an advertisement, that "there shall be no competing imports; we propose to shut out competition; we propose to have the sort of tariff that Henry Carey, the great father of protection, announced when he said he wished to God the Atlantic Ocean was an ocean of fire, across which no ship could ever pass."

Mr. ALDRICH. The Senator does not want to misquote me, I am sure.

Mr. VEST. Oh, no.

Mr. ALDRICH. What I said was that where I found there was a large and abnormal increase in importations, especially in articles in which we have equal natural advantages with those of other countries, other things being equal, I would take that as an indication that the duties had ceased to be, for some reason, protective, and that there ought to be some readjustment.

Mr. VEST. I would not take that as a rule in all cases. It is not an inflexible rule by any means. There is an increase of population in this country; there are thousands of things that go to affect the condition of trade between us and foreign countries; and it by no means follows that whenever you find even the equal natural resources and an increase in importations, therefore you ought to increase the duties.

I may be mistaken, I am not an expert in the business, but I understand that the rule adopted by the leaders of the Republican party is that there should be a tariff for revenue connected with the tariff that will protect American productions, equalizing the cost of labor between foreign countries and the United States. That I understand to be the conservative and just rule as

announced from the hustings and in the public press of the Republican party. Are we, then, to be governed by the amount of importations simply and alone? If that be so, you throw away the other conditions and the other qualifications, and as soon as the imports increase upon any article, no matter on what account, you increase the duties, although we know that imports and exports vary from causes beyond our control—climatic, productive, war, famine; all these things go to make up imports and to make up exports between the nations of the earth, and there can be no Procrustean rule, and there ought to be none.

Mr. President, the Senator from Rhode Island and the Senator from Pennsylvania, as I understood, declared that there was no trust in regard to this article. I happen to know that they are mistaken. I do not care how much the Plate Glass Company of Pittsburg advertise that it is not a trust, there is no court in the land that would not declare it to be a trust by any of the rules that govern such discussions in courts of justice. I happen to know that in my State there is a large plate-glass factory, called the Crystal City Plate Glass Company. I have great respect personally for the gentlemen who own that establishment, although they have been my determined political enemies, never, I am glad to say, my personal enemies; but I never had a canvass in which I did not meet the influence of that institution. Until a few years ago it has been continued, and, I have always understood, with great ability. It had large capital; it was in a flourishing condition. Four or five years ago, possibly less than that, some two or three years ago, the establishment closed, and it has been closing from time to time, putting its men out of employment and taking them back again into employment in a spasmodic, peripatetic, and nomadic way that nobody in Missouri could understand except the few men interested in it.

I remember in the recent canvass I spoke at Crystal City, and I was antagonized, as usual, by the political influence of the owners of this great corporation. I found by conversation with some of the men that they were out of employment, and I said to them, "Do you propose to support the Republican ticket, when you are here hunting for work? Do you think now that the Crystal City Company, with its high protection upon plate glass, is not able to give you employment on account of the want of tariff duties?" They answered me that the proprietors had told them it was only a temporary suspension and that they would in a few days commence and give them their wages again.

In the city of St. Louis there is a very respectable firm, the largest dealers in plate glass and mirrors in the city, Messrs. Drey & Kahn, and I will ask the Secretary to read a communication from them which explains the condition of this trust and the position of the Crystal City Plate Glass Company in connection with it.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

ST. LOUIS, MO., *May 25, 1897.*

DEAR SIR: We respectfully call your attention to the proposed schedule on cast polished plate glass, which specifies an enormous increase in the rates on glass containing less than 5 square feet. The existing rate affords more than an ample protection to our manufacturers, and a further increase in the tariff would be prohibitive; and while the Government would suffer from the decreased revenue, a large profit would flow in the pockets of the millionaire clan doing business under the corporate name of Pittsburg Plate Glass Company, better known as the plate-glass trust.

This trust operates 9 factories, of which 6 are located in Pennsylvania, 2 in Indiana, and 1 in Missouri. The latter was known, until the formation of the trust, as the Crystal Plate Glass Company, and was in a flourishing condition until the withering hand of the trust has touched it, but since then has often been shut down or only partially operated. Wages in all these factories have been reduced enormously, not on account of adverse trade conditions, but to supply the sinews of war, which this trust is waging since its formation to crush out all honorable competition, whether they be manufacturers or jobbers in plate glass.

The increased duties are asked on the smaller sizes of glass only, which in effect are a raw product only, as they have to undergo the process of beveling and silvering before they enter into use as mirrors for furniture and household goods. The present rates on plate glass of larger dimensions are so outrageously high and entirely prohibitive that even the greed of our manufacturer patriots is satiated, but on the little by-product of smaller sizes, comprising less than 10 per cent of a factory's output, a chance is left for the importer to bring in a very limited share of the amount consumed.

This, of course, must be stopped and every household in the land be taxed for the sole benefit of the glass trust.

We respectfully beg to enter with you our earnest protest to the proposed action, and pray you to give voice to our entreaties and make the Senate Chamber ring in your denouncement of the plate-glass trust.

Yours, most respectfully,

DREY & KAHN.

HON. GEORGE G. VEST,
United States Senator from the State of Missouri, Washington, D. C.

Mr. VEST. I shall not attempt to make the Senate Chamber ring, because I know that would be utterly ineffectual, and even if I were able to produce that sort of harmony, the Senator from Rhode Island and his colleagues are beyond any such process as that. They intend to put up these duties. I think they make a mistake in doing so. I think in a case like this, where, with great respect to them, there can be no reasonable excuse given for these enormous increases, they make a mistake and they injure the system they are defending when they insist upon these indefensible elevations of duty.

I do not care to say anything more upon the subject, because it seems to me that in all this debate there has been no answer to the proposition that these duties are too high, and especially upon those grades of this article which are used by the ordinary plain people of the country.

Mr. CAFFERY. I want to inquire of the Senator in charge of the bill what are the particular brackets under these different paragraphs, where the Senator says importations are so large that the tariff has to be raised in order to make a readjustment of it, etc.?

Mr. ALDRICH. In the brackets in which the increases have been made?

Mr. CAFFERY. Where you raise, for instance, from 5 to 8 cents on page 40, paragraph 101, "plate glass, cast, polished, finished or unfinished, and unsilvered, not exceeding 16 by 24 inches square." There is the first rise, I perceive, from 5 to 8 cents per square foot. I understand that these different increases are made to meet excessive importations under this paragraph.

Mr. ALDRICH. I said they were to equalize the rates as between the different paragraphs.

Mr. CAFFERY. Now, I call the attention of the Senate to the fact that under paragraph 101, as to all "above 16 by 24 inches, and not exceeding 24 by 30 inches," the importations for 1893 were 1,638,407.92 square feet. The rate on that class under the law of 1890 and under the law of 1894 was 8 cents per square foot; in the bill as it came from the other House it was 12 cents, and in the committee's proposition it is 10 cents per square foot, and the importations in 1896 were 1,968,657.62 square feet. Is it for this trifling increase that the tariff is to be raised from 8 to 12 cents a square foot?

Mr. ALDRICH. Ten cents per square foot is the suggestion of the Senate committee.

Mr. CAFFERY. Ten cents, I beg pardon. Again, in the class above that, the increase is from 5 to 8 cents per square foot, and the importations in 1893 were 375,507.89 square feet, and in 1896, 620,900.83 square feet. There is a very considerable rise. Then, again, discussing all these paragraphs, as the Senator from Arkansas, I believe, embraced the paragraphs beyond paragraph 101 in his discussion, I will refer to paragraph 102, where the rise is from 6 to 11 cents per square foot, and the importations for 1893 were 52,785.15 square feet, and in 1896, 3,228 square feet. So that we see there can not be any sufficient reason alleged why these increases of the tariff are necessary to meet increased importations.

I should like to inquire whether or not the object of this bill is, not only in these paragraphs which we are now discussing, but throughout the bill, absolutely to cut off importations? The distinguished Senator from Rhode Island [Mr. ALDRICH], in his opening speech upon this bill, stated that, in his opinion, the time was not far distant when the revenues from importations must be laid aside and the Congress of the United States would have to resort more and more to internal taxation. Is this the ultimate outcome of the duties of a tariff for protection? I understand the object of the other side to have been not entirely to cut off importations, as the object now seems to be, but to let the foreigner come in and enjoy the blessings of paying our tariff for us, for it is gravely urged upon the other side of the Chamber that the foreigner pays the tariff—pays the taxes upon imported articles. Is it possible that the Senator from Rhode Island now formulates a bill upon lines that would exclude the foreigner from enjoying that blessed privilege? It would appear so.

There is no necessity whatever for these increases. Take the increases, again, in cylinder and crown glass under paragraph 102, where there is an increase from 6 cents a square foot to 11 cents a square foot, and the importations under that paragraph in 1893 were 1,030,091.91 square feet and in 1896, 585,487.50 square feet, a decline of nearly 50 per cent in importations.

The whole sum and substance of the object of raising the tariff upon decreased importations is simply to raise the wall so high as absolutely to prevent any importations whatever. Then that brings us down to the theory announced by the Senator from Rhode Island in his opening speech, that the end-all, that the terminal, of high protection was internal-revenue taxation. I want to know whether the American people are ready for that. I want to know whether the exportations of our merchandise will not by a policy of that sort be utterly destroyed, for we see that these revenue duties are more largely laid, or as largely laid, upon the absolutely necessary raw materials for the complete, finished product of our manufactures as upon the finished products themselves. If, therefore, this policy is to be continued, the ultimate result of it will be to pen us up, to corral us, to turn us over to the tender mercy of the home manufacturer, to exclude our flourishing manufacturers from any export trade, and to make the United States a perfect likeness of the ancient Kingdom of China, where nothing can come in and nothing will go out. That is the evident purpose of this bill; that is the end and purpose of this taxation.

Such a policy can not be defended upon any line of protection. As I understand that theory, it is not to cramp our industries.

The original theory of protection was to protect the infant industry until it could stand on its legs, and then turn it loose and let it battle for itself. The theory now is to pile up taxes higher and higher just in proportion to the age of this infant, and instead of the squealing, puling cry of the tender infant clamoring for protection, we have now the lusty voice of the ancient Methuselah, louder and louder, clearer and clearer, fiercer and fiercer, as his desire increases to fleece the home consumer.

There is not a line of mercy in this bill for the consumer; there is not a line of consideration for him. It is the very acme, the very summit of protection, and protection in its insanest mood.

The reason urged by the Senator from Rhode Island in answer to the criticism of the Senator from Missouri is about as clear and as distinct as his exposition of the sugar schedule. It is one of those clear expositions that the longer you look at it the muddier it seems. Here is a distinct charge made by the Senator from Missouri that wherever the taxes were low they have been raised in order to meet the unnecessarily high taxation in some other direction, and the answer is that that is necessary for readjustment. Readjustment how, where, and for what purpose? Where high taxes exist, you do not import anything. Is it not absolutely unnecessary, therefore, to put any higher duties there? The only purpose, then, of these high taxes upon the low-priced article is to pile up additional burdens upon the toiling consumers of the United States. That is the only pretext, the only motive, that underlies this inverse order of raising tariff—the highest upon the lowest and the lowest upon the highest.

I do hope my colleagues on this side of the Chamber who are more familiar with the details of these schedules than I am and more able to handle the facts at their command will so expose the enormities of these schedules that the American people will finally see that they are being fleeced; that the hand of extortion is being laid upon them for the pretended interests of manufacturing industries whose business does not require this additional blood to be let from the veins of the American people.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The question is on the amendment proposed by the Senator from Missouri [Mr. VEST].

Mr. JONES of Arkansas. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. JONES of Arkansas. Let the amendment be stated at the desk.

The SECRETARY. In paragraph 101, page 26, line 20, before the word "cents," it is proposed to strike out "eight" and insert "five;" so as to read:

101. Cast polished plate glass, finished or unfinished and unsilvered, not exceeding 16 by 24 inches square, 5 cents per square foot, etc.

The Secretary proceeded to call the roll.

Mr. BUTLER (when his name was called). I am paired with the Senator from Maryland [Mr. WELLINGTON]. If he were present, I would vote "yea."

Mr. CLARK (when his name was called). I have a general pair with the junior Senator from Kansas [Mr. HARRIS], but I will transfer that pair to my colleague [Mr. WARREN], and vote "nay."

Mr. CLAY (when his name was called). I am paired with the junior Senator from Massachusetts [Mr. LODGE], but I transfer that pair to the junior Senator from Delaware [Mr. KENNEY], so that the junior Senator from Delaware will stand paired with the junior Senator from Massachusetts, and that will permit the junior Senator from Pennsylvania [Mr. PENROSE] and myself to vote. I vote "yea."

Mr. DANIEL (when his name was called). I am paired with the Senator from Connecticut [Mr. HAWLEY], otherwise I should vote "yea."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea" and he would vote "nay."

Mr. PASCO (when his name was called). I am paired with the Senator from Utah [Mr. CANNON]. If he were present, I should vote "yea."

Mr. PENROSE (when his name was called). In accordance with the explanation made by the Senator from Georgia [Mr. CLAY], I am at liberty to vote. I vote "nay."

Mr. PLATT of Connecticut. My colleague [Mr. HAWLEY] is necessarily absent from the Senate. He is paired, as has already been announced, with the Senator from Virginia [Mr. DANIEL]. My colleague would vote "nay," if present.

Mr. PROCTOR (when his name was called). I am paired with the junior Senator from Florida [Mr. MALLORY].

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. FRYE. I am paired with the senior Senator from Maryland [Mr. GORMAN].

The result was announced—yeas 21, nays 29; as follows:

YEAS—21.

Bacon,	Cockrell,	Mills,	Vest,
Bate,	Gray,	Morgan,	Walthall,
Berry,	Heitfeld,	Murphy,	White.
Caffery,	Jones, Ark.	Pettigrew,	
Chilton,	Kyle,	Pettus,	
Clay,	Lindsay,	Turpie,	

NAYS—29.

Aldrich,	Fairbanks,	McBride,	Quay,
Allison,	Foraker,	McMillan,	Shoup,
Burrows,	Gallinger,	Mason,	Spooner,
Carter,	Gear,	Nelson,	Wetmore,
Chandler,	Hale,	Penrose,	Wilson.
Clark,	Hanna,	Perkins,	
Davis,	Hansbrough,	Platt, Conn.	
Deboe,	Jones, Nev.	Pritchard,	

NOT VOTING—38.

Allen,	Gorman,	Martin,	Stewart,
Baker,	Harris, Kans.	Mitchell,	Teller,
Butler,	Harris, Tenn.	Morrill,	Thurston,
Cannon,	Hawley,	Pasco,	Tillman,
Cullom,	Hoar,	Platt, N. Y.	Turner,
Daniel,	Kenney,	Proctor,	Warren,
Elkins,	Lodge,	Rawlins,	Wellington,
Faulkner,	McEnery,	Roach,	Wolcott.
Frye,	Mallory,	Sewell,	
George,	Mantle,	Smith,	

So the amendment was rejected.

Mr. QUAY. Before the Senate thins out this afternoon, it seems to me there ought to be some understanding as to whether or not we shall sit on Decoration Day, on Monday next. I shall be glad to know from the Finance Committee what is their desire.

Mr. ALDRICH. Personally, I should be very glad if the Senate would continue in session every day. It is the proper course to remain in session until this bill is disposed of. I should be very glad to have a session of the Senate on Monday, unless Senators should see fit to vote otherwise.

Mr. COCKRELL. And you expect them to vote otherwise?

Mr. ALDRICH. No; I do not. I expect them to vote to remain in session.

Mr. QUAY. Mr. President, there are some of us connected with military organizations made up of ex-soldiers of the Union Army, which ought to demand the sympathy and respect of Senators upon the other side of the Chamber who served in the Confederate army, who can not well attend here on Monday. We are all interested in this bill, and as to the expedition of the bill, if the Finance Committee will, in their wisdom, suggest that the Senate shall meet at 11 o'clock on Tuesday, and sit during the week from 11 o'clock until the ordinary hour of adjournment, all the time lost by passing over Monday can be made up. I appeal to the Finance Committee and the Senate that the Senate, when it adjourns to-day, shall adjourn over until 11 o'clock on Tuesday next.

Mr. BATE. Oh, no; say 12 o'clock on Tuesday.

Mr. VEST. Do I understand the Senator from Pennsylvania to make the suggestion or the proposition that we meet on Tuesday and from that time on at 11 o'clock?

Mr. QUAY. That was my suggestion.

Mr. VEST. For one, I should not make any such agreement, and shall defeat it if possible. We have now had this bill under discussion about a week. We have made, as I said the other day, more progress in a week on the pending bill than we made in the first five weeks in the consideration of the act of 1894. It is a little too soon to commence 11 o'clock sessions, when our friends upon the other side have had this bill in the other House and in the Senate for nearly three months and a half, and those of them who have had charge of it must be necessarily familiar with every detail of the bill. It has been furnished to us a very short time, and the comparative statement only came to us a little over a week ago, and then in a very defective form, and we have been compelled to wait until the Senator from Rhode Island made his opening speech to find absolutely what were his calculations as to the estimated revenue under this bill. Until we heard that speech we had no idea what were the expectations of the framers of the bill in regard to the revenue to be produced. I had occasion to say the other day that we do not propose—and I think I can speak for my colleagues as I do for myself—that we do not propose any factious opposition, but we shall oppose the unusual proceeding of 11 o'clock sessions commencing upon next Tuesday.

As to the adjournment over, that is a matter to be decided by the other side of the Chamber, although of course we shall vote for the proposition when it is brought up.

Mr. CHANDLER. Mr. President——

Mr. QUAY. I desire merely to say, in response to the suggestion of the Senator from Missouri, that I for one, and I have no doubt all the Senators on this side of the Chamber, appreciate the generosity and fairness of Senators upon the other side in their conduct of this bill; and if it is not their desire to meet at an earlier hour than 12 o'clock next Tuesday, I do not desire to press that upon them, and will change the motion to one that when the Senate adjourn, it be to meet at 12 o'clock on Tuesday next.

Mr. VEST. I have no objection to that.

Mr. CHANDLER. I was about to suggest to the Senator from Pennsylvania to make that modification of his request. I for one am not disposed to urge any method of procedure at this time upon Senators upon the other side of the Chamber that is not agreeable to them. Sometimes I have noticed that there seemed to be an impression on that side of the Chamber to the effect that we were complaining of them. I do not think there has been any complaint, and certainly there has been no just ground of complaint. I am perfectly satisfied myself with the disposition which Senators upon the other side are manifesting, and perfectly satisfied with the way they are treating this bill. I believe they mean to discuss it no more than is necessary to a fair elucidation of its details, and that they expect to render all reasonable assistance toward a speedy and final vote upon the bill. Therefore I should be glad if the Senator from Pennsylvania would withdraw the suggestion that we should begin to meet at 11 o'clock next Tuesday. A little later on in the discussion, perhaps, that hour may be agreed to by the other side; but, under the circumstances, there having been no disposition manifested to unduly delay the bill, I hope we shall not sit on Monday next.

The PRESIDING OFFICER. Did the Chair understand the Senator from Pennsylvania to make a motion?

Mr. ALDRICH. Mr. President, being charged with a certain measure of responsibility in regard to the progress of this bill, I will say that I feel bound to press it upon the consideration of the Senate at every available hour during every session and upon every day.

The Senator from Missouri says that we have made more progress now than we did in the discussion of the act of 1894. We have, it is true, on some of the days made some progress; but this whole day has been taken up in the discussion of one paragraph of this bill and in the reading of papers in connection with it. It looks to me as if the progress we have made in the past two or three days is all to be neutralized by a prolongation of the discussion upon the paragraphs which are to come.

Mr. VEST. Will the Senator from Rhode Island permit me? What I am about to say is not by way of apology, but simply an explanation. I have no apology to make.

The PRESIDING OFFICER. The Senator from Missouri will pardon the Chair. The Chair will state to Senators that the debate is proceeding by unanimous consent.

Mr. VEST. Of course. I merely wish to state, in explanation of what has happened here to-day, that no one knows possibly as well, certainly no one knows better, than the Senator from Rhode Island that in every tariff bill there are certain salient features, certain points of debate, which stand out from the remainder of the bill and which must be disposed of not rapidly, but with great deliberation. Senators are called upon by their constituents to oppose certain features in the bill, and they feel themselves compelled and justly compelled to do so.

Now, here is a duty which we consider monstrous, if the term is not offensive. I think it is utterly beyond any sort of question one of the worst features of the whole bill. It has two most objectionable features, and we felt it to be our duty to bring them out as strongly and plainly as possible before the whole country. The first is an increase of duty upon articles used by the common, plain people of the country; an increase, as we conceive, directly against that class of people, and without any sort of justification, in our opinion. In the second place, it is a duty in the interest of a trust, admitted to be a trust, which controls the whole trade virtually and absolutely.

I do not think I am claiming too much when I say there never has been a tariff bill in the Senate which has been treated more fairly by the opposition than the present one. We have passed over here increase after increase over the Wilson Act without a word, and it is only when our friends upon the other side have gone beyond the McKinley Act, which was the ideal protective measure of the Republican party, that we have ventured to make opposition. And yet, because upon the plate-glass schedule, which I think every fair man will concede to be one of the most objectionable in the whole bill, we have taken up some two hours and a half or three hours, the Senator from Rhode Island says the day has been wasted.

Mr. ALDRICH. Oh, I beg the Senator's pardon.

Mr. VEST. I probably used another word than the one the Senator did, but he objected to the delay.

Mr. President, it depends entirely upon the point from which the observation is made whether you use the word "wasted" or not. We thought it was our duty to act in the way we have done, and it was not done in any factious spirit.

Mr. WHITE. Mr. President, I simply wish to say that my recollection of the consideration of the Wilson bill leads me to remark that the celerity advised by the Senator from Rhode Island is a late creation of his somewhat vivid fancy. At that time he did not seem to adopt any such procedure. Indeed, day after day we stood here and sat here, sometimes seeking the cloakrooms, not only for purposes of relaxation, but for an opportunity to give vent to the feelings which we were compelled to smother here; and still upon the other side of this Chamber, as no doubt you, Mr. President [Mr. GALLINGER in the chair], will well recollect, reading, reading, reading progressed day by day, while one-half of the American people were yawning and the other portion were perhaps swearing.

Under the circumstances now prevailing, because we see fit to refer to the glass schedule, which we think deserves criticism—we may be wrong about it, perhaps; we will not be able to agree in this Chamber upon that point—we are mildly censured. We feel that we are giving to the bill only such consideration as duty requires us to give it. If we were maliciously disposed toward the American people, we would wish for its immediate enactment.

Mr. FRYE. I suppose the Senator from California does not marvel at the magnanimity of the Senator from New Hampshire, as expressed a few minutes ago, and his compliment to the Democratic side for allowing the bill to progress reasonably.

Mr. President, I believe that the highest exhibition of patriotism on our part is to sit here on Monday and continue the discussion of the pending bill, and I do not believe there is a Union soldier to be found in the United States who would not say that we were doing more honor by undertaking to save a day from the time to be consumed in perfecting and passing this bill than by giving it to him apparently in honor on next Monday.

Mr. PETTUS. Mr. President, I rise simply to protest against the idea of the Senate of the United States being in session next Monday. If the people of the United States, especially in this part of the land, owe any debt of gratitude, they owe it to the Army of the United States, or at least to that part of the Army intended to be honored on Monday. The devotion of those men to the Union, as it was then claimed and as to which I am not now disputing, was such that there is no business on earth more important than doing honor to the dead of that Army.

Mr. PROCTOR. Mr. President, I should be as loath as anyone to transact any improper business on the day that is set apart in honor of the soldiers, but I do not understand that Monday is the day generally set apart. I know that in my own State to-day is being observed entirely, and I have been informed by several other Senators that it is true as to their States. That is the opinion of the Senator from Maine [Mr. HALE], I believe. I know that in our State they have followed strictly the orders of the commander of the Grand Army, and that to-day is the day which is being observed.

Mr. JONES of Arkansas obtained the floor.

Mr. QUAY. Will the Senator from Arkansas yield to me for a moment?

Mr. JONES of Arkansas. Certainly.

Mr. QUAY. Decoration Day properly falls upon Sunday this year. In this city and in the District of Columbia, in this department, Monday is to be observed in lieu of Sunday. On Monday next all the Departments are to be closed. The Government here is going to respect the day, and I do not think that the Senator from Maine [Mr. HALE], or the Senator from Vermont [Mr. PROCTOR] either, would think it is proper for this body to travel outside of the line of respect shown by the other Departments of the Government and to proceed to argue here about the difference in the rate of a quarter of a cent on plate glass or window glass while the streets of the city of Washington are resounding to the beat of the dead march and all the soldiers in this city are marching to the decoration of the graves of their comrades.

Mr. HALE. Let me ask the Senator from Pennsylvania a question before he sits down. Where is he going to make any progress in getting any more time? The Senator himself is in favor of adjourning over Monday on account of its being Decoration Day; but when, in order to relieve that situation, he proposes that the Senate shall meet at 11 o'clock, thereby getting an additional hour each day, he is met with the determined opposition on the other side against that proposition.

Mr. President, with this bill pending and the general desire of the country for speed, not undue, but all that is possible, where are we going to get any more time? We lose one day and another day. We can not get meetings at 11 o'clock. If the Senator from Rhode Island should propose evening sessions, I have no doubt it would be met upon the other side with the same objection which the Senator from Missouri has raised to meeting at 11 o'clock. In the meantime the country is earnestly and painfully intent upon the proceedings here, and desires the dispatch of business.

I have been called away for the last few days imperatively and have been in my own State, and I have heard but one expression, and that was the desire that the tariff bill should be pushed early and late. I do not see from the thread of the discussion here to-day where we are likely to gain one single additional hour for the discussion of the pending bill, and sooner or later it must, it seems to me, come to a test, and those who are against putting in more time may have the opportunity of deciding that no more time shall be put in.

There are no committees at work, or few that need to consume time. There is nothing in the evening at this time of the year. When the weather is good, I appeal to the experience of Senators how much better it is for us to use the present time in long sessions, even in evening sessions, than in the heat of late June and July. But if it is the will of the majority here, of the Senators who make a majority, that we only continue along as we do about other business—meet at 12 o'clock and go through the morning hour, and then take what time we can and adjourn at 5 or 6 o'clock—of course we are helpless; but I do think the attempt should be made, seriously, to get all the time that is possible for the consideration of the pending bill.

Mr. MORGAN. I understand that according to law Decoration Day is a holiday in the District of Columbia. Am I mistaken about that?

Mr. WHITE. That is correct.

Mr. HALE. It is everywhere.

Mr. MORGAN. Occurring on Sunday, it is of course changed to Monday, in deference to the superior claims of the Sabbath. The President of the United States and all the executive officers of the Government, I believe, on that day suspend business and go out for the purpose of making a patriotic and grateful demonstration in favor of the soldiers of the Union who were killed in the civil war.

I am in favor, as is my colleague, of paying due respect and deference to that event. The United States has not passed through all the wars that it has to fight by a good many, I am afraid, and whenever we get to that period in our history that it is perfectly understood that we are never going to have another war, from that moment of time this Republic is going to degenerate, and her sons are going to forget the lessons and duties of patriotism. We are to have many wars, very likely, in the future, and there can be no encouragement to that high and sacrificial sense of gratitude which could be greater or more pertinent than the respect and deference which are paid annually by all the Departments of the Government of the United States in Washington City around the graves of the men who lie buried on the other side of the Potomac River and in the Government reserve near Rock Creek.

So for one, Mr. President, if I had ever so great a desire and purpose to pass any measure before Congress, I should yield it unhesitatingly to that national demand, now expressed in the law, that we shall observe this as a sacred holiday. The only regret I have is that the House of Representatives is compelled to meet on Monday. There is a great Republican majority there—gentlemen who are supposed to be more devoted to the reminiscences and memories of the patriotic days in which men died for their country than Democrats are supposed to be. The House of Representatives, with that majority, is compelled, by a rule which it seems to be impossible to evade or avoid, to meet on Monday, and in that act there is a sort of public desecration that I lament very much.

I wish, Mr. President, that the House had been in session to-day, so that it might have changed its purpose of meeting on Monday, and so that it would not have been compelled to have obeyed that automatic resolution which convenes it and disperses it like you open or shut a door, with no requirement of any other guardian or any other care taker than somebody to pull the string—some doorkeeper, who is now represented in the person of the Speaker of that great House, who pulls the door open and slams it for the purpose of admitting the Representatives of the people to their seats or excluding them at his will and pleasure. The House is in an unfortunate predicament in this matter.

Mr. FRYE. Will the Senator from Alabama allow me?

Mr. MORGAN. Certainly.

Mr. FRYE. I noticed that one time, when severe restrictions were being made in the House of Representatives on a coordinate branch of the Government, the United States Senate, the Speaker of the House very promptly called the speaker to order; and it seems to me, with all due deference to the Senator from Alabama, that he is exceeding, in a slight degree, the proprieties as between the two Houses.

Mr. MORGAN. If I am exceeding only in a slight degree the proprieties between the two Houses, I think I ought to felicitate myself that the degree is so slight, for it deserves much severer treatment than I had proposed to give it.

I find on looking up the business in the two Houses accomplished at this session that the Senate of the United States has passed 111 bills and 16 joint resolutions. Every one of those measures has met the sanction of this august body after debate and after consideration by its committees. I suppose that our action here has not been mere child's play, something perfunctory that we might or might not do, performed in the presence of the nation and of the House. Out of those 111 bills I find a number which pertained to general topics. Among them were bills providing for a settlement between the United States and the State of Arkansas; for the erection of public buildings at Aberdeen, S. Dak.; Evanston, Wyo.; Indianapolis, Ind.; Deadwood, S. Dak.; in Yellowstone Park; at Oakland, Cal.; Abilene, Tex.; Altoona, Pa.; Salt Lake City; amending the timber-culture laws; to provide free homes on public domains, etc.; to settle accounts between Florida and the United States; to grant to the State of Montana 50,000 acres for a blind asylum; regulating the pay of noncommissioned officers; pertaining to selection of lands in North Dakota by the State of North Dakota; to amend section 714, Revised Statutes, in relation to the salary of judges; providing regulations to prevent collisions on rivers, harbors, etc., in the United States.

Among the joint resolutions were those providing for the distribution of public documents; to ascertain the estimated cost of improvements in Bridgeport Harbor, Connecticut; to supply tents for the Mississippi River overflow sufferers; for improving the Mississippi River from the Head of the Passes to mouth of Ohio River, $250,000; to transport contributions to sufferers in India; granting Cuban belligerency; for the relief of flood sufferers in the Mississippi Valley; to provide for the expense of the Universal Postal Union; appropriating $50,000 in aid of destitute Americans in Cuba; to provide for a deficiency in the Public Printer's Office, and a very important general bankruptcy law.

Those are the measures that have been passed by the Senate. The Senate has also passed three bills that have come over from the other House for appropriations, one of which I believe is still in conference.

Under any ordinary circumstances and in any contemplation that the founders of our Government had when they ordained the Constitution of the United States, the House of Representatives ought to be in session to consider these and many other very important matters that are included in bills, thousands of which have been offered and placed, not in the hands of committees, but in a box in the House. There are no committees in the House of Representatives except a Committee on Ways and Means, I believe, and a Committee on Rules. That is not the constitutional organization of the House of Representatives. That is not the organization according to the Constitution of the United States or the rules of that House.

We are here engaged in passing a certain bill that the House of Representatives have sent to us, and which is taken up by the Republicans in this Chamber and by some Democrats and put forward as the solution of all the unhappiness and all the difficulties that environ the people of this country. On our side we regard it as a bill that will have for its necessary effect the destruction of the industries and the business and happiness of a large number, a great number, of the industrial people of the United States. That is our view of it.

In order to compel us to pass the bill, the House of Representatives is held in this unorganized condition. The Constitution of the United States is palpably violated. This idea of having a House to meet on a resolution and having it to adjourn on a resolution passed several weeks before the resolution operates or is to take effect as a rule of the House can not be a compliance with that requirement of the Constitution which forbids either House to adjourn for more than three days at a time without the consent of the other House. The Senate has, therefore, under the Constitution, a rightful, lawful, and perfect interest in the sessions of the House. The House can not adjourn for six days at a time. Why? Because the Constitution requires it to remain in session, and does not permit an adjournment for more than three days at a time whenever Congress is in session. But the resolution under which the House meets and will meet on Monday, in violation of the traditions both of the Republican party and of the whole people of the United States on the subject of decorating the graves of deceased soldiers, is a resolution that is self-operating. On Monday it will open the door, it will seat such members as may come there, and even without a vote it will adjourn them until Thursday.

Mr. President, that is not a compliance with the requirements of the Constitution of the United States, and it is a matter of most serious doubt—and I suggest it here for the reflection of men who still have left some regard for the structure of our constitutional system—whether or not to-day Congress is actually in session; whether or not one of the Houses has not abandoned its constitutional post and duty, and has not withdrawn itself from the session of Congress, and thereby worked a dissolution or some disabling effect upon the whole Congress, contrary to the Constitution of our country. There may be a time when, as to events and purposes that reach a little closer to the human heart than those which are now prominent in the public mind, than this tariff question with which we are now confronted, that may prove to be of the most serious and dangerous character that the human mind can conceive of.

I will suppose that we are in a controversy with some great foreign power; that the question of prolonging a war is on hand, or a question of the declaration of peace, and the Senate of the United States wants to vote for peace, and thinks the war has proceeded long enough, and the House of Representatives, in order to refuse to act upon our proposition, meets under a resolution and adjourns

on Monday to Thursday and on Thursday until Monday, and again on Monday until Thursday, and keeps the country in a state of suspended animation and Congress in a state of dislocation and disorganization, to prevent its carrying out a purpose of that kind.

Now, whatever the purpose might be, the danger of that departure from constitutional obligation can not be overrated. We can not look too cautiously or too guardedly upon the attitude that the Constitution of the United States assigns to us in respect to this serious matter. As a matter of public convenience, as a matter of duty to the country, can any man state a reason why the Senate of the United States, having passed the 111 bills and 16 joint resolutions, should not be permitted to call upon the House of Representatives to consider those measures? Have we descended so low in the dignity of our office and its importance in a constitutional as well as in a practical sense that the House of Representatives can close its doors upon us permanently and refuse to consider these important matters, which we think legitimately attract and demand the attention of the Congress of the United States?

Mr. President, it is a shocking outrage upon the Government and people of the United States. It is a letting down, in the estimation of the people and of Congress itself, of the sense of duty that ought to inspire both these Houses, and it brings the Congress of the United States into deserved and sovereign contempt. Here are hundreds of Representatives assembled in the city of Washington, chewing the cud of reflection or in idle distress, standing about and waiting for a word from the lips of a single man to determine whether they shall have a voice and exercise it in the government of the United States, and whether in fact they shall have any of the powers of Representatives of their States or their districts.

The patience and patriotism of the American people as exhibited under these very peculiar and trying circumstances is of itself an example that our children may have to point to some of these times in order to justify a humiliating escape from greater evils than any that are now in contemplation. But we are pushing the idea of patriotic submission to the technicalities of an arbitrary rule and the arbitrary disposal of a single mind as to whether he will recognize a man upon the floor to make a motion to such an extremity that the people of the United States now begin to see and to feel that the Congress of the United States is dishonoring itself by submission to a flagrant wrong. They begin to feel it.

There has been something said about the pressure to have this bill put through the Senate. "Pushed through the Senate," "jammed through the Senate," are the ordinary expressions. My correspondents on this subject, who chiefly reside in the North and the West, for the South feels that its hands are tied upon this question, inform me of objections against the bill, and if I were to consider them in the spirit in which they state them, I would be found here doing my best to prevent the passage of the bill until the meeting of the next Congress. I do not intend to follow their indications or their demands.

I intend, so far as I am concerned, to let the bill have free passage through this House. It is no more now than a mere stiff laid upon a dissecting table. We are examining it with our scalpels to find what is in it and what is its anatomy. We can not infuse into this bill any amendment whatever, it makes no difference how important it may be, how just, how true, or how well established in common sense and public decency. We know that we have no power to amend this bill. We know what is its destiny, a cast-iron destiny, fixed up by the majority of a committee who never invited their confrères on the committee into a consultation upon its merits or its terms, or any item of it, until it was agreed upon, printed, and submitted to them, and that one day was given, and only one day, before the bill was reported to the Senate of the United States as a conclusion of this Committee on Finance. Now, there is no liberty in such legislation as that.

The committee is only the representative of the Senate, and as such representative you might just as well close debate now and say to this side of the Chamber, "You shall not open your mouths, and you shall not even hear the bill read that you are acting upon," as for that committee, the representative of the Senate, to say to their colleagues, "We have agreed upon this bill; one day will be given to you to look at this enormous mass of printing here, all our amendments, which makes it impossible for you to consider them—one day—and at the end of one day you are to come in and upon your oaths you are to vote for your people and for your State upon the merits of this proposition."

That is not legislation in a deliberative and parliamentary sense, and if it has got to be legislation in the American sense, then the members of the House and of the Senate are excusable for being driven back and forth by the lash of a single man who says, "Pass this bill, and do it quick. Stand and deliver!" Ah, sir, I remember other days in which the demand was made in this Chamber to stand and deliver, and we had to stand and deliver frequently, but after a while the people marshaled to our support, and since that time our voice has been heard everywhere else except in the House of Representatives. Everywhere else. It is not heard there now. We are as dead in the House of Representatives as if we were in the Capulets. We have neither the voice nor the sign of life about us—a poor, wrecked, miserable relic of Representatives of the great body of the people of the United States.

Mr. HALE. Mr. President, I rise to a question of order.

The PRESIDING OFFICER. The Senator from Maine rises to a question of order. The Senator will state his question of order.

Mr. HALE. It is that the Senator from Alabama, whether intentionally or not, is violating the fundamental rule of parliamentary law in arraigning a coordinate branch of the Legislature of the Government.

Mr. MORGAN. Mr. President——

Mr. HALE. I ask that the Chair enforce the rule.

The PRESIDING OFFICER. The Senator from Alabama will be seated until the Chair rules upon the question of order raised by the Senator from Maine.

Mr. MORGAN. Oh, yes.

The PRESIDING OFFICER. The Chair will first state that there is no provision in the rules of the Senate touching this matter.

Mr. MORGAN. Not any.

The PRESIDING OFFICER. But in Jefferson's Manual is found the following, which the Secretary will read.

Mr. HALE. It is on page 94.

The PRESIDING OFFICER. The Secretary will read from page 94 of Jefferson's Manual.

The Secretary read as follows:

It is a breach of order in debate to notice what has been said on the same subject in the other House, or the particular votes or majorities on it there, because the opinion of each House should be left to its own independency, not to be influenced by the proceedings of the other, and the quoting them might beget reflections leading to a misunderstanding between the two Houses. (8 Grey, 22.)

Neither House can exercise any authority over a member or officer of the other, but should complain to the House of which he is, and leave the punishment to them. Where the complaint is of words disrespectfully spoken by a member of another House, it is difficult to obtain punishment, because of the rules supposed necessary to be observed (as to the immediate noting down of words) for the security of members. Therefore it is the duty of the House, and more particularly of the Speaker, to interfere immediately, and not to permit expressions to go unnoticed which may give a ground of complaint to the other House, and introduce proceedings and mutual accusations between the two Houses, which can hardly be terminated without difficulty and disorder. (3 Hats., 51.)

Mr. QUAY. Mr. President, my friend the distinguished Senator from Alabama, I have no doubt, will acquit me of any intentional disrespect or of any design to muzzle him when I say that when I made this motion I had no idea that the debate would cover so wide a scope as that over which it has since ranged. I did not desire to check the progress of the discussion on the tariff bill, and I supposed that the question which I raised would be disposed of within five minutes after its introduction. I now, therefore, feel it to be my duty, in order that we may return to the legitimate subject of this afternoon's deliberations, to make the point of order that all discussion upon my motion is out of order, and to object to its continuance.

The PRESIDING OFFICER. The Chair will state that the debate has proceeded by consent. The Chair took occasion to call the attention of the Senate to that fact. The Chair did not feel it to be his duty under the generous interpretation of our rules here as regards debate to interpose a personal objection to the debate, but notified the Senate of the parliamentary status, so that any Senator might have terminated the debate at any moment. The debate has proceeded by consent.

The Senator from Maine has now called to order the Senator from Alabama on the ground that he has violated the rules of the Senate as they are found in Jefferson's Manual, which the present occupant of the chair understands to have been adopted by the Senate for its guidance. The present occupant of the chair is very loath to impose any views of his own upon the Senate in a matter of this kind, and yet, in view of the language which has been read by the Secretary, the Chair is compelled to rule that the point of order made by the Senator from Maine is well taken, and that the Senator from Alabama can only proceed in order.

Mr. MORGAN. Mr. President——

Mr. QUAY. Now, I desire a ruling upon the point of order which I raised.

The PRESIDING OFFICER. The point of order being made that this debate is out of order, the Chair must rule that the point is well taken, and that debate can only proceed by unanimous consent.

Mr. MORGAN. Before that is done I have a right to appeal.

The PRESIDING OFFICER. The Senator from Alabama takes an appeal from the decision of the Chair on the point of order raised by the Senator from Pennsylvania.

Mr. MORGAN. The Senator from Maine.

Mr. HALE. That has to be decided without debate. As the question is not debatable, the appeal is not debatable.

The PRESIDING OFFICER. That is correct.

Mr. QUAY. From which decision has the Senator from Alabama appealed?

Mr. MORGAN. I have appealed from the decision of the Chair made after the Senator from Pennsylvania had interposed his objection that further debate of any kind was not in order, the decision being made at that time that I was out of order in the references I made to the House of Representatives—not to its action, but to its nonaction. Now, Mr. President——

Mr. HALE. I rise to a point of order. I make the point that no discussion can be had.

The PRESIDING OFFICER. The appeal from the decision of the Chair upon the point of order, the Chair would hold, is not debatable.

Mr. MORGAN. I was going to ask the unanimous consent of the Senate that I might state what my point is, in reply to the Senator from Maine.

Mr. HALE. The Chair has ruled and the Senator has appealed; and upon that the Chair has ruled that the appeal is not debatable.

Mr. WHITE. Mr. President, I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Chair will first ask a question of the Senator from Alabama, that we may have a perfect understanding of this matter. The Chair would inquire of the Senator from Alabama from which decision he took an appeal?

Mr. MORGAN. I took an appeal from the decision of the Chair that I was out of order.

The PRESIDING OFFICER. Upon the point made by the Senator from Pennsylvania?

Mr. MORGAN. Upon the point made by the Senator from Maine.

Mr. WHITE. I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from California will state his parliamentary inquiry.

Mr. WHITE. I did not happen to be in the Chamber when this proceeding began. What is the question before the Senate upon which the Chair rules?

The PRESIDING OFFICER. The Senator from Maine made a point of order that the Senator from Alabama was out of order in indulging in certain strictures upon the other House. The rule was read from the desk, and the Chair sustained the point of order made by the Senator from Maine.

Mr. HALE. In view of the point made by the Senator from Pennsylvania, I withdraw my point of order. The ruling can be made upon the other point.

The PRESIDING OFFICER. The point of order made by the Senator from Maine having been withdrawn, and the Senator from Pennsylvania having made a point of order that the debate is out of order, the Chair rules that the point of order is well taken and that no further debate can proceed.

Mr. MORGAN. What is the question before the Senate?

The PRESIDING OFFICER. The only question before the Senate is the motion made by the Senator from Pennsylvania, that when the Senate adjourn to-day it adjourn until Tuesday next at 12 o'clock.

Mr. HALE. Let us have the yeas and nays upon that question.

The yeas and nays were ordered.

The Secretary proceeded to call the roll, and called the name of Mr. ALDRICH.

Mr. HALE. Before the vote is taken, let the motion be again stated.

The PRESIDING OFFICER. The motion is that when the Senate adjourn to-day it adjourn until Tuesday next at 12 o'clock.

Mr. HALE. I move to amend the motion by inserting 11 o'clock.

Mr. MORGAN. I object to any amendment. Let the roll call proceed.

Mr. HALE. I will withdraw the amendment.

The Secretary resumed the call of the roll.

Mr. BACON (when his name was called). I understood the Senator from Maine to have withdrawn his amendment. Am I correct?

Mr. HALE. That is withdrawn. The vote is being taken on the original motion.

The PRESIDING OFFICER. That is, the motion of the Senator from Pennsylvania, that when the Senate adjourn to-day it adjourn to meet on Tuesday next.

Mr. BACON. I vote "yea."

The Secretary resumed the call of the roll.

Mr. CLARK (when his name was called). I am paired with the junior Senator from Kansas [Mr. HARRIS]. I will transfer that pair to my colleague [Mr. WARREN] and vote. I vote "nay."

Mr. DANIEL (when his name was called). I am paired with the Senator from Connecticut [Mr. HAWLEY]. If I am at liberty to do so, I will vote "yea."

Mr. PLATT of Connecticut. I can not state how my colleague would vote. I think if he were here, however, under the circumstances he would vote "nay."

Mr. DANIEL. Then I will withhold my vote.

Mr. GRAY (when his name was called). I have a general pair with the senior Senator from Illinois [Mr. CULLOM], and therefore withhold my vote.

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL].

Mr. PASCO (when his name was called). I am paired with the Senator from Utah [Mr. CANNON]. If he were present, I should vote "yea."

Mr. PENROSE (when his name was called). In accordance with the transfer of my pair which has been made, I will vote. I vote "yea."

Mr. PERKINS (when his name was called). I have a general pair with the junior Senator from North Dakota [Mr. ROACH]. As he is absent from the Chamber, I will withhold my vote.

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON] on all party questions. As this is not a party question, and as I think the Senate ought to adjourn, I will vote "yea."

Mr. WILSON (when his name was called). On this question I am paired with the junior Senator from Arkansas [Mr. BERRY]. If he were present, he would vote "yea" and I should vote "nay."

The roll call was concluded.

Mr. CLAY. I am paired with the junior Senator from Massachusetts [Mr. LODGE]. I transfer that pair to the junior Senator from Delaware [Mr. KENNEY]. The junior Senator from Delaware will stand paired with the junior Senator from Massachusetts, and I will vote. I vote "yea."

Mr. BUTLER (after having voted in the negative). I see that the junior Senator from Maryland [Mr. WELLINGTON] has not voted, and I withdraw my vote.

The result was announced—yeas 34, nays 17; as follows:

YEAS—34.

Bacon,	Deboe,	Mason,	Spooner,
Bate,	Foraker,	Morgan,	Stewart,
Caffery,	Hanna,	Murphy,	Tillman,
Carter,	Heitfeld,	Penrose,	Turpie,
Chandler,	Jones, Ark.	Pettigrew,	Vest,
Chilton,	Kyle,	Pettus,	Walthall,
Clay,	Lindsay,	Pritchard,	White.
Cockrell,	McBride,	Quay,	
Davis,	Mallory,	Rawlins,	

NAYS—17.

Aldrich,	Frye,	McMillan,	Shoup,
Allison,	Gallinger,	Mills,	Wetmore.
Burrows,	Gear,	Nelson,	
Clark,	Hale,	Platt, Conn.	
Fairbanks,	Hansbrough,	Proctor,	

NOT VOTING—37.

Allen,	Gorman,	Mantle,	Teller,
Baker,	Gray,	Martin,	Thurston,
Berry,	Harris, Kans.	Mitchell,	Turner,
Butler,	Harris, Tenn.	Morrill,	Warren,
Cannon,	Hawley,	Pasco,	Wellington,
Cullom,	Hoar,	Perkins,	Wilson,
Daniel,	Jones, Nev.	Platt, N. Y.	Wolcott.
Elkins,	Kenney,	Roach,	
Faulkner,	Lodge,	Sewell,	
George,	McEnery,	Smith,	

So the motion was agreed to.

The PRESIDING OFFICER. The next amendment of the Committee on Finance will be read.

The SECRETARY. In paragraph 101, page 26, line 22, before the word "cents," strike out "twelve" and insert "ten;" so as to make the paragraph read:

101. Cast polished plate glass, finished or unfinished and unsilvered, not exceeding 16 by 24 inches square, 8 cents per square foot; above that, and not exceeding 24 by 30 inches square, 10 cents per square foot; above that, and not exceeding 24 by 60 inches square, 22½ cents per square foot; all above that, 35 cents per square foot.

Mr. JONES of Arkansas. I move to amend the committee amendment by striking out "ten" and inserting "eight," which is the rate at present in the Wilson Act.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Arkansas to the amendment of the committee.

Mr. MORGAN. Mr. President, in the discussion of this amendment I propose to institute an inquiry whether the Congress of the United States is now in session, and whether we have a right to proceed in the consideration of this bill. In the debate of that proposition I desire to raise a parliamentary inquiry and address it to the Chair. Would I have, in debating that proposition, the right, or would I be in order if I should speak about something that the House was not doing or had not done, or if I should speak about a vote or a majority that had not been given or that had not existed and does not exist?

I read now a rule, upon which I ask the ruling of the Chair, for I propose to say something about what the House has not done, and about a vote that has not been given, and about a majority that has not existed and does not exist, but nothing at all that the House has done, except to speak from the record here about a rule or a vote of the House, which I suppose I still have a right to refer to, inasmuch as it concerns the question whether the Senate is

now in proper deliberation constitutionally upon the amendment which was submitted by the Senator from Arkansas. It reads in this wise—I read from Jefferson's Manual, which the Chair stated a few moments ago, and correctly stated, has been adopted by the Senate as a part of the law of this tribunal:

It is a breach of order in debate to notice what has been said on the same subject in the other House—

As nothing has been said in the other House, I propose to discuss the fact that nothing has been said and not something that has been said—

or the particular votes or majorities on it there—

As no votes have been given and no majorities have been ascertained, I wish to comment on the fact that no votes have been given and no majorities ascertained, which can not influence the action of the House. That is something that is in the past, I suppose, and I am referring to these matters historically and not with a view of influencing any legislation by the House. I hear that the House is not engaged in any sort of legislative effort, and they are in no danger that what I may say here can influence their legislation.

Now, the reason stated by Mr. Jefferson for that declaration is—

because the opinion of each House should be left to its own independency, not to be influenced by the proceedings of the other, and the quoting them might beget reflections leading to a misunderstanding between the two Houses.

I am compelled to leave the House to its own independency, because it seems not to be in a state of legislative action, or even of organized existence. So the House is in no danger of bias because of anything I could do or say. The House is, fortunately, safe.

I wish to know if, in speaking on this subject on this point, I will be in order if I should refer to the fact that the House has not been in session for many weeks, or in fact at all in any regular and constitutional way, and therefore that the Senate can not be regularly and constitutionally at work, not having its constitutional coordinate and partner in business in session at the same time that the Senate is in session. This seems to be a curious and dangerous situation.

I wish to refer to that. I wish to refer to the fact that none of the 111 bills and 16 joint resolutions that I suppose I am at liberty to speak about as having been passed by the Senate have been acted upon by the House, and they are not likely to be so far as I can see.

Then I wish also to say something about the pressure or the necessity for putting sudden and emergent and very heavy taxes on the people while the House of Representatives is debarred from relieving them in any other direction. I would have supposed that a people who were about to be very heavily and enormously taxed ought to have the benefit, whatever it is, of representation in the House of Representatives, to see if their immediate Representatives in that body could not devise some financial system or means by which they could relieve against this awful burden of taxation that we are about to put upon them.

I dislike very much indeed to see either party in this House, particularly the party that has now control of the Administration of the Government, lay the heavy hand of taxation upon the people who so recently elected them, not to raise revenue—we know that is not it, for the Senator who reported this bill said it would raise very little revenue, not enough—but to raise bounty for the purpose of paying certain classes of men who are engaged in certain descriptions of business in the United States, engaged in levying that bounty upon the great industrial body of the people of the United States, without giving them any means to pay it. That is this bill; and, Mr. President, we may whitewash and sugarcoat it here for a year and we can not make anything else out of it. It is a bill to tax the people into deeper poverty and distress.

Whenever the people at the polls get hold of the bill that we are preparing here, they will strip the disguises off of it, and they will kick it out of existence, because they can not stand it. If it were an appeal to their patriotism for the benefit of the country, if we were to ask them now, "Put up your money here to keep this Government in order and to keep it going, even upon an extravagant scale of expenditure," these good people of the United States would take upon themselves additional labor; they would strip themselves and their families of absolute necessities; they would keep their children away from day school and from Sunday school, because they could not dress them well enough to go there; they would cut down their rations at the breakfast table; they would allow their children to go barefooted; they would make any sacrifice that they were called upon to make for their country, if we could only satisfy them that it was necessary to be made for the good of their Government, for they love their Government.

But, Mr. President, when we are told—and we know, and the other side of the Chamber can not deny it—that very much the larger part of this bill, and the most oppressive part of it, is for the purpose of levying money out of the great industrial body of the country in order to pay bounties—bounties, sir, not protection—to further enrich certain favored and specified classes of men, who already have grown rich and powerful in this land, then, I repeat, when people come to discern the true merits of this bill, they will kick it into thin air the next time they get to the ballot box.

I am trying to possess my soul in patience, finding myself and my colleagues on this side of the Chamber in the minority, trying to be patient and quiet until the people can get a chance at this bill. They see here that on the average we are 7 in the minority in one way and another; they see that in the division of these spoils across the bargain counter we have not any chance to take care of them. The people see that, and they are going to be forbearing to us until they get a chance at it; and when they do, Mr. President, then your tariff and this protection, as you call it, this bounty and this bribery, will go into ruin in a hurry. There will not be anything left of it.

Now, sir, I desire to speak to that question, and I respectfully ask the Chair to rule whether I am now in order in referring to the fact that the House of Representatives is not in session and has not been in session for many weeks; and that I understand, and believe, and know, in fact, that it is the fixed policy of the House of Representatives and the Speaker thereof—more especially the Speaker and the Republican party—that that House shall not consider at this session anything except this tariff bill. Am I in order, Mr. President?

The PRESIDING OFFICER. Does the Senator from Alabama propound that question to the present occupant of the chair?

Mr. MORGAN. I do, and I ask for a ruling upon it.

The PRESIDING OFFICER. The present occupant of the chair must decline to answer a hypothetical question on a point of order. When the point of order is raised, if it shall be raised, the occupant of the chair will endeavor to rule upon it correctly.

Mr. MORGAN. Well, Mr. President, Jefferson's Manual says it is the duty of the Chair to raise the question if any Senator is out of order.

Mr. LINDSAY. It is the duty of the Chair.

Mr. MORGAN. Yes, it is the duty of the Chair; and I want to know whether I am in order or not.

Mr. CHILTON. Mr. President, I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Texas will state his parliamentary inquiry.

Mr. CHILTON. It seems to me, Mr. President, that there is a very wide distinction between an ordinary debate upon the action of the other House and the constitutional question which the Senator from Alabama raises. He claims, as I understand, that the Congress of the United States is not in session at this time because of the fact that the other House has adjourned for more than three days.

Mr. MORGAN. That is my point, and that is the point I was discussing when I was called to order and told to take my seat.

Mr. CHILTON. It seems to me that it would be a very serious interference with the privileges of a member of the Senate to say that he can not discuss a question of that kind. How else could he raise an issue on the legal point involved? Suppose, for example, the House of Representatives did not even nominally meet on Monday and Thursday, is the Senate powerless to call attention to the subject?

The PRESIDING OFFICER. The Senator from Texas will permit the Chair, in vindication of himself, to say that, as he understood the discussion as it proceeded, it did not involve alone that question. The Chair decided that the Senator from Alabama was not in order, and ruled that he should proceed in order. The Senator from Alabama can now proceed, and unless the question of order is again raised he can discuss the question as he sees proper.

Mr. MORGAN. I suppose the Chair might have had in his mind at the time something that I had in my mind and resolved not to say. [Laughter.] I had in mind some reference to the Cuban question, which, I think, brought the Senator from Maine to his feet. [Laughter.] He was afraid that I would say something about Cuba if I went along, and hence he imagined that I was out of order. I have been twenty years in this Senate, and I was never ordered to take my seat before, and I congratulate myself that on this occasion it has occurred when I am trying to defend the constitutional rights of the Senate. I do not feel any humiliation at all at the idea of being seated by a Republican in this Chamber because I am defending the constitutional rights of the Senate.

The PRESIDING OFFICER. The Senator will permit the Chair to further say that in asking him to take his seat he was simply executing the rule of the Senate.

Mr. MORGAN. That is right, and I am not complaining of it at all.

The PRESIDING OFFICER. And the Chair will add that it was with the profoundest reluctance, having the highest regard for the Senator from Alabama, that he made the ruling that he did.

Mr. MORGAN. I am not complaining about the ruling, and

not complaining about having to take my seat, because I am felicitating myself that I had to do it in defense of the Constitution of my country.

Now, being strictly in order, I will recur again to the proposition that this House has the constitutional right, on every day that it is in session, either to send a bill that it passes directly into the other House, or to be met at the threshold of that House with a resolution of that body passed within three days prior—mark you the words, now—passed within three days prior to that time, that the House was not in session. The resolution under which I understand the House to be adjourned to-day until Monday was passed more than twelve days ago, and has not been renewed. It is an automatic trapdoor resolution, by which the House is admitted to session and excluded from session by the act of a single man, and without a vote of a quorum.

That, sir, is no resolution of the House within the meaning of the Constitution. If a House, for any public reason or for a capricious reason, chooses to adjourn for three days, it has the constitutional right to do so; and when we send a bill over there, it makes no difference what the emergency might be, although it might be to meet a declaration of war by one of the greatest powers in the world, suddenly jumped upon us, and we find that that House is not in session, there must be, in order to comply with the Constitution of the United States, a recorded vote upon a resolution, not more than three days old, that that House took an adjournment until a certain day. In that case it is a misfortune. Otherwise, Mr. President, the Congress is delinquent. It is just as much disorganized as if it had never been called by the President.

The Constitution contemplates that when a three days' adjournment takes place it shall be from one of the periods or days to the other, and each time the adjournment must be had by a separate vote of the House. They might as well—and that would be the effect of it—say that they would meet no more except upon Mondays and Thursdays until the meeting of the next session of Congress as to resolve that they will only meet on Thursdays and Mondays. They can leave us absolutely without the power to take a final adjournment on a concurrent resolution by simply putting that self-operating resolution upon their books and walking off and leaving one man to attend the door and take care of the affairs of the House of Representatives. No, sir; that is a violation of the Constitution of the United States, plain, manifest, and outrageous, tyrannical and usurpatory to the last degree.

Mr. HALE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from Maine?

Mr. MORGAN. Yes.

Mr. HALE. I can not, with my view of parliamentary courtesy, discuss with the Senator the proceedings of the House of Representatives, even when I think the Senator is making a statement which the facts will not bear out; but I can ask him whether the Senate does not repeatedly, especially in the first part of the long session, adjourn from Monday until Thursday, and still oftener from Thursday until Monday, without regard to the House? The Senator will remember that we generally do that in this body.

I can only say, applying the remark to the other body, that I do not understand that anywhere else any body has attempted by a continuing resolution to do anything more than that. I do not understand that anywhere any other course is taken, except upon Monday to adjourn until Thursday, and upon Thursday to adjourn until Monday; and I ask the Senator whether, in his experience, which is longer here than mine, he has not seen that repeatedly done by the Senate? Of course, I do not go into the constitutional right. The Senator does not dispute the right of either body to adjourn for three days; and I only ask him if the Senate has not done that repeatedly?

Mr. MORGAN. I have great sympathy, Mr. President, for the timidity of the Senator from Maine, who wants to argue this question, but is afraid to do it, lest he might trample on the feelings of the House of Representatives or on some parliamentary rule. Still, I will answer his question.

Mr. HALE. I wish the Senator would.

Mr. MORGAN. Since I have been here there has never been an adjournment under a standing resolution of the Senate.

Mr. HALE. I do not understand that there is anything of that kind anywhere else.

Mr. MORGAN. I understand there is, and there is the difference.

Mr. HALE. I understand that nowhere else is there any adjournment from Monday until Thursday and from Thursday till Monday except by a motion put on the day of the adjournment.

Mr. MORGAN. It is the standing rule of the House now, as I understand it—if I may be allowed to say so in the shadow of the frown of the Senator from Maine—it is the standing rule of the House that the House shall meet only on Monday and on Thursday, and shall stand adjourned without further order, although no quorum is present. Am I correct?

Mr. LINDSAY. I will ask the Senator from Maine whether there can be any standing rule that will authorize an adjournment from Thursday to Monday in the absence of a quorum of the House at the time?

Mr. HALE. I understand—I am not very familiar with parliamentary law—that no standing rule could in any way take away from the power of either body or the right of either body, when the day came, to adjourn as it pleased from that day. I understand that all such proceedings are in that way. I do not think that any continuing rule, if there is one anywhere else, could in any way change the right. If we had a continuing rule here, I do not understand that it would prevent us on Monday night, if we chose, from adjourning to any day, and, as I have read the proceedings, the course taken in any other body is that way.

I will say to the Senator that I am not timid about encroaching upon the privileges of the other House, for that body, and everything about it, is thoroughly well capable of taking care of itself. There is no doubt about that. But, generally speaking, it is not well that either body should permit any member of it to comment harshly in the way of arraignment of the proceedings of the other body. I am more interested in that than I am especially about the other House. I should not like the House to interfere and arraign us.

Mr. PETTUS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Alabama yield to his colleague?

Mr. MORGAN. Certainly.

Mr. PETTUS. I desire to ask the Senator from Maine if he asserts as a proposition that this body or the other body can adjourn for three days without a quorum to act on that motion to adjourn?

Mr. HALE. I do not know what the rule of the other House is upon that subject. I know that constantly we here, where no point is taken, adjourn from Thursday until Monday when there are not a dozen Senators in the Chamber, and it is good law under which we do it, and it is a parliamentary proceeding. Nobody raises the question whether we can do it. That I have not looked into. We could adjourn without a quorum, no doubt.

Mr. LINDSAY. For three days?

Mr. HALE. I say we could adjourn.

Mr. LINDSAY. From day to day.

Mr. HALE. The question of whether we could adjourn for three days without a quorum is a question I have not looked into. I know we do it constantly, and no harm comes from it, and no point is raised.

Mr. MORGAN. I take issue with the Senator from Maine. He is mistaken about that.

Mr. HALE. That we do adjourn over without a quorum?

Mr. MORGAN. We can not do anything of the kind without a quorum.

Mr. HALE. I say we constantly do it when not more than a dozen Senators are here.

Mr. MORGAN. Then it never appears that no quorum was present.

Mr. HALE. No; no question is raised.

Mr. MORGAN. When no quorum is present, we can only adjourn from day to day. That is the express language of the Constitution. When no quorum is present, an adjournment may be had from day to day. Then in subdivision 4 of section 5 of Article I of the Constitution is the following provision:

> Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

"Neither House." What is a House? Not a half dozen Senators nor a half dozen Representatives. It is a quorum. Without a quorum present, the House is not present, except merely for the purpose of adjourning from day to day and sending for absentees. It can do no business.

Mr. VEST. In order to make a House.

Mr. MORGAN. In order to make a House, there must be a quorum; therefore the action, when it is taken, must be taken by a House; and the question put by my colleague [Mr. PETTUS] is not only perfectly relevant, but it is crushing. A resolution can not be adopted as a standing rule that the House shall meet on Monday and on Thursday and on no other days, and shall be adjourned without a vote, or without a quorum. The House of Representatives, if it has met and adjourned without a quorum for three days, has, so far as it is concerned, and for the time being, dissolved this Congress.

This is not a flimsy or a fine point. It is a broad, constitutional question that we have got to take our part and our share in considering and acting upon. Otherwise some of these times we shall find ourselves in a category or an emergency here from which there is no possible escape except in the destruction of the peace of our country.

Sir, if an insurrection were to break out in five of the great States of this Union—I will say in New England, if you please—and it was telegraphed to the President of the United States, and he should immediately demand a vote of supplies, or demand a

law to call the militia into active service to put such insurrection down, and if we had passed such bill to-day in that most emergent condition of the country, and we should send it to the House of Representatives, we would not find them there, but we would find that on last Thursday they had met, and had then gone to their retreats—their places of amusement—and were not to be found, nobody at his post, not even the Speaker, ready to take the chair if they should suddenly assemble.

What would be the condition of this country in such an emergency as that? Why, Mr. President, deplorable to the last degree, and there would not be a man in either House of Congress who would not bow his head in shame when he looked the people in the face and heard their accusations of how basely we had deserted our duty under the Constitution. Here we are now liable to that very condition; and it is only through the mercy of God that we are not thrust to-day upon some condition of affairs that would prove to the people of the world that this Republic, through the indulgence, and lassitude, and carelessness of its Representatives, had been allowed to go to wreck and ruin for the purpose of forcing the passage through the Senate of this tariff bill.

Mr. RAWLINS. Will the Senator allow me to ask him a question?

Mr. MORGAN. Certainly.

Mr. RAWLINS. If I understand the position of the Senator correctly, it is that an attempt on the part of the House, without the consent of the Senate, to adjourn for more than three days would operate as a dissolution of that body?

Mr. MORGAN. I would not say a "dissolution." I do not know how to portray the consequences of such a fatal act as that.

Mr. RAWLINS. What I want to ask the Senator is this: Is it not the purpose of that provision of the Constitution to prevent a dissolution of Congress without the concurrence of both bodies?

Mr. MORGAN. Unquestionably so.

Mr. RAWLINS. And would not a vote by a minority of either body to adjourn for three days, and in violation of the provision that the minority can only adjourn from day to day, be a nullity, and in legal effect the body remain in session—that is, constructively in session, if not absolutely?

Mr. MORGAN. I do not think there is such a thing here as a constructive session of Congress or a constructive House of Representatives. I think it must be actual. That is what the Constitution requires. These representatives in both Houses are required to swear to do their duty and to obey the Constitution. They can not go off and throw down this duty, like a discarded garment, and say, "At my convenience I will come back and pick you up and wear you." They can not do that. It is unnecessary to characterize such a dereliction of duty. The President of the United States could remedy it by calling Congress into session again. There is no doubt of that, whether it is a dissolution of Congress or only a temporary disorganization.

Mr. President, I do not care about elaborating this matter. I have said as much about it as I choose to say just now. The people of this country had got hold of this question before I took it up. Not only are they murmuring about it, but they are in an almost belligerent state of mind about it. I get letters from time to time asking me what has become of bills that were passed through the Senate in which the people are largely concerned. I can only answer that the House of Representatives has not taken action. Perhaps in an unparliamentary way, in my private correspondence, I go even further than that, and say that they do not intend to take any action; perhaps I may say that the purpose of not taking any action is to coerce the Senate into the passage of a certain bill.

Sir, we see the newspapers are full of the shameful and humiliating statement that this Congress was called together by the President of the United States to pass upon a certain bill, and that the Congress of the United States have no business touching anything else. When did the Constitution empower the President to call Congress together in a limited way, as some of the governors of the States may do the legislatures, to pass certain measures, and none other? When a Congress comes here, Mr. President, it comes with all the majesty and power that belongs to it under the Constitution of the United States, with no limitation upon its powers. The President of the United States, when he assembles this august legislative body of two Houses, must stand by and take their will and pleasure as to what they will do in the way of legislation.

Congress, Mr. President, is the foremost political body in the United States. The destiny of this country is in our hands, not in the hands of the President or of the judiciary—it is in the hands of Congress; and it was a wise thing that our fathers did when they left our hands unfettered, and when they placed it out of the power of the Executive to assemble this tribunal here to perform the Executive will by acting upon certain measures and leaving others without consideration. That was not the miserable plight in which the Congress of the United States was left by the framers of the Constitution. We were not called here to pass a tariff bill, and if the President of the United States had said in his message, "You are called to pass a tariff bill and are not expected to do anything else," I think there would have been enough of self-respect in these Houses the day after they got here and organized to have adjourned sine die and gone home, just because the Executive had attempted to put that limitation upon us. The Executive has not attempted it, but a political party has attempted it, and is doing it.

The outcome of a certain convention in this country has been the issuance of a ukase that nobody in the House of Representatives shall be recognized to speak to any public business except to the business of the tariff when that is before the House, or such business as a committee of three in that body may permit to come before it. When you offer a resolution or a bill there you stick it in a box. If you want to call up such a resolution or bill, you are not recognized, or, if you are recognized, you are told you are out of order.

Now, Mr. President, for the purpose of this party scheme of robbing the industries of this country and taking from the pockets of the laborers of the land hard-earned money to fatten the chiefs who stand at the "pie counter" and receive their reward for political power and preferment—for these reasons, we are required to submit to all of this humiliation and this wrong; and yet we are urged here by the other side of the Chamber to hasten in inflicting this wrong upon the country. They think, I suppose—they say they do—that it is going to bring about a certain sort of relief to the people. That depends, Mr. President, upon who "the people" are.

The men who get the bounties and benefits of this bill undoubtedly will be greatly relieved, and very speedily; but when you come to the consumers, when you come to the men who have to earn money to pay these taxes and these largesses and these tributes and bounties, instead of their being relieved, Mr. President, we are destroying them. We are dooming them to a lower condition of penury and more humiliating sacrifice, not for their flag and their country, but a sacrifice to the moloch of money, for what we extract from them by this increased taxation, they being so poor now that they are unable to perform the ordinary functions of parents to their children, and hand over to these lordly masters of the spindle and the loom, and the manufactories, and the railroad companies, and the trusts and combines, is blood money extorted from the poor to fatten and benefit the rich. Therefore I am not going to be in a hurry to do it. I am going to move slowly.

This is the order of the House upon which I have been commenting:

That from and after this day, the House shall meet only on Monday and Thursday of each week, until the further order of the House.

There is a positive prohibition to the meeting of the House, and if we were to send a bill there of the character I mentioned a while ago, or any other, a bill of the highest possible emergency, we should be met there at the door of the House with the order which forbids the House to meet except on Monday and Thursday; and in order to get three days between Thursday and Monday again they have to hold that Sunday is dies non juridicus. They have jumped a day; yet we have been here many a Sunday doing good work. It has not been more than three months ago when we were in session here nearly all Sunday on an appropriation bill.

We have got into a condition by this stress of political command that we should reverse these wheels and obey the Constitution of our country. It is necessary to do it, not from self-respect merely, but to preserve the integrity of our action under the Constitution of the United States.

Mr. LINDSAY. The RECORD shows that there was no quorum present.

Mr. MORGAN. There was no quorum present at the last adjournment, and the Speaker so announced, and they had to adjourn under the rule.

Here, then, is a House without a quorum, a meeting which had no power in the world, no quorum being present, except to adjourn from day to day or to send for absent members. It could not transact any business. It quietly dissolved under the rule which I have just read, and the members went off.

Mr. LINDSAY. The RECORD shows that fact.

Mr. MORGAN. I know it does.

I thought I would bring this to the attention of the Senators on the other side who are in such great haste to press the consideration of the pending measure. Senators had better relax a little. They are putting a weapon in our hands much stronger than the antagonism due to the wrongs of this tariff bill.

For political reasons simply, they had better reconsider their ground. Nothing would be so grateful to me as to see the House of Representatives in session regularly under the Constitution, although they have a great majority against my views on political questions, for there are many questions that we send to them in the course of our legislation which are not political at all, for the purpose of providing for our people. So I should rejoice to see the House back in its place, for to see it scattered about, to see great and brave and strong and powerful men subdued with the lash of

party, and that lash in the hands of a political enemy, and taking it like truant boys at a country school, is something that does not suit my views in respect of American honor or legislation.

Mr. President, the question upon the amendment to the tariff bill is an important one, and I will hear from the Senator from Arkansas upon that point, if he has any remarks to make.

I ask unanimous consent to publish in my remarks the RECORD containing the proceedings of the House of Representatives—page 1622 of the RECORD, Thursday, May 27. It is not long, and I desire to put the entire action of the House on that day in the RECORD, in order, as I think, to prove the point I have contended for, that less than a quorum of the House voted an adjournment of that body from Thursday until next Monday, and in doing so has violated the Constitution of the United States.

The VICE-PRESIDENT. Unless there is objection, that will be the order.

The extract from the RECORD is as follows:

HOUSE OF REPRESENTATIVES.

THURSDAY, *May 27, 1897.*

The House met at 12 o'clock m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The Journal of the proceedings of Monday, May 24, was read and approved.

MESSAGE FROM THE PRESIDENT.

A message in writing from the President of the United States was communicated to the House by Mr. PRUDEN, one of his secretaries.

ORDER OF BUSINESS.

Mr. TERRY. Mr. Speaker——

The SPEAKER. The House will receive a message from the Senate.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had disagreed to the amendment of the House of Representatives to the amendment of the Senate numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. PETTIGREW, Mr. TELLER, and Mr. COCKRELL as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the amendment of the Senate numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes.

The message also announced that the Senate had passed bills and joint resolutions of the following titles; in which the concurrence of the House was requested:

A bill (S. 1978) extending the time for the commencement and completion of the railroad bridge across the Illinois River, near Grafton, Ill., by the St. Louis, Perry and Chicago Railroad;

A bill (S. 1944) to authorize the construction of a bridge across the Clinch River, Kingston, Tenn.;

A bill (S. 1337) to authorize the President to commission First Lieut. Benjamin W. Loring a captain;

Joint resolution (S. R. 26) declaring that a condition of public war exists in Cuba, and that strict neutrality shall be maintained;

Joint resolution (S. R. 44) making an appropriation to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897; and

Joint resolution (S. R. 43) in amendment of the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India.

The message also announced that the Senate had passed the following resolutions; in which the concurrence of the House was requested:

"*Resolved by the Senate (the House of Representatives concurring)*, That the Secretary of War be requested to furnish the Senate with such information as he may have in his possession with reference to the present condition of the harbor of Cumberland Sound, and to inform the Senate whether any immediate action is necessary to protect the entrance from being closed against the commerce usually entering the port of Fernandina."

The message also announced that the Senate had passed the following resolutions:

"*Resolved*, That the Senate has heard with profound sorrow the announcement of the death of the Hon. JOSEPH H. EARLE, late a Senator from the State of South Carolina.

"*Resolved*, That the Secretary communicate these resolutions to the House of Representatives.

"*Resolved*, That, as a mark of respect to the memory of the deceased, the Senate do now adjourn."

"*Resolved*, That the Secretary be directed to request the House of Representatives to return to the Senate the bill (S. 426) to authorize the construction of bridges across the Missouri River, between its mouth and the mouth of the Dakota or James River; and across the Mississippi River, between the mouth of the Minnesota River, in the State of Minnesota, and Donaldsonville, in the State of Louisiana; and across the Illinois and Des Plaines rivers, between the mouth of the Illinois and the city of Joliet, in the State of Illinois; and to prescribe the character, location, and dimensions of the same."

Mr. TERRY. Mr. Speaker——

QUESTION OF PRIVILEGE.

Mr. LEWIS of Washington. Mr. Speaker, I rise to a matter of privilege.

The SPEAKER. The gentleman will state his matter of privilege.

Mr. LEWIS of Washington. Mr. Speaker, I send to the Clerk's desk a resolution which, I respectfully urge, raises a question of a privilege of the House, and one of the highest order, and I respectfully request that the resolution be now read, in order that the question may be ascertained and——

Mr. DINGLEY (interposing). Mr. Speaker, I make the point of order that the gentleman should state his question of privilege.

Mr. LEWIS of Washington. I will accept the suggestion of the esteemed gentleman from Maine. The resolution suggests that as there has been passed in the Senate and reported to this House a resolution recognizing the belligerency——

Mr. DINGLEY. Mr. Speaker, I make the point of order that the gentleman is not raising any question of personal privilege.

Mr. LEWIS of Washington. If the gentleman will but be patient, he will soon see that I do raise a question of privilege. My resolution calls for action by this House upon a question of foreign policy——

Mr. DINGLEY. Mr. Speaker, that raises no question of personal privilege.

Mr. LEWIS of Washington. Mr. Speaker, I ask the opportunity of asserting and establishing that this is a question of privilege, and has been so decided by the parliaments of the present English-speaking world, and particularly in recent years upon a motion made by the honorable gentleman from Maine himself.

I respectfully assert that a resolution proposing that this House shall express its sense of a foreign policy is always a question of privilege, superseding and subordinating any other question, that it does not require unanimous consent for its consideration, and that no point of order can be addressed constitutionally to it. Mr. Speaker, I will not violate the courtesy of this occasion by entering into an argument as to the merits of the resolution itself.

I shall be so grateful to the gentleman for allowing me this opportunity that I shall but state my position on this subject from a legal standpoint, seeking to establish that this question, as one of the sovereignty of the House, is of the highest privilege and entitled to consideration prior to any other. As early as 1782, when this country presented to England her peace-conference report, Mr. Grattan, of Ireland, having then up for consideration his bill in relation to Irish rights, raised the point that it was not in order, according to the rule prescribing that day's business. Mr. Fox contended that a proposition of a foreign policy, or of the recognition of a foreign country, for any purpose, was at all times a question of precedence which subordinated all other questions, and that point was sustained.

Subsequently to that time the question has been considered at different periods. In this country the question arose upon a resolution of Mr. Clay, of Kentucky, made upon the floor of the House of Representatives as early as 1822, resolving that the United States recognize the Spanish republics and that the House prescribe a policy concerning the same. The point was made against it that it was not in order, when the gentleman from Kentucky contended that a proposition which went to the foreign policy of this country as against another country, and especially an intercontinental and not merely an international country, was a matter of privilege of the highest order. He was sustained on an appeal, though Speaker Barbour had held to the contrary.

In 1827, Mr. Webster, of Massachusetts, addressing himself to the question of the attitudes, respectively, of Greece and Turkey, contended that his resolution authorizing the President to name an ambassador and the House to propose, on behalf of Congress, a foreign policy, had precedence, and was entitled to consideration against any point of order that could be made, and his contention was sustained.

Later, in 1837, upon Senator Clay's motion in respect to Mexico, in the second session of that Congress, the point of order was made that the resolution could not be considered because the order of the day had been prescribed by a previous resolution. It was insisted by Mr. Foote, of Mississippi, that such a question always took precedence, as it went to the sovereignty of Congress, and that contention was sustained.

On other occasions subsequently the question has arisen in this House. In the second session of the Fifty-third Congress a resolution was introduced by the honorable gentleman from Maine, Mr. BOUTELLE, looking to the establishment of a foreign policy in respect to Hawaii. On that occasion the point of order was made by Mr. McCreary, of Kentucky, a member of the Foreign Relations Committee, that the proposition was not in order and did not present a question of privilege, and the honorable gentleman now occupying the chair is reported to have said that it had long been settled that questions relating to the foreign policy of the country as connected with other countries were always matters of privilege.

The Chair ruled the contrary. An appeal was taken; and the House decided that the question of a foreign policy was a question of privilege. I refer you, Mr. Speaker, to the Journal of the Fifty-third Congress, second session, page 44. The rules adopted at the present session on that subject embody that decision. Therefore, under that decision and under the rules of this House, my resolution becomes at once a privileged question of the first order; and it takes precedence for consideration, notwithstanding the point of the estimable gentleman from Maine. I read from the Manual of the present session, pages 490, 497:

"Resolution expressing sense of the House relative to the foreign policy of the United States is privileged."

In page 495 of the Manual begins a recital of those questions which are privileged; and after giving them in collated form the Manual concludes on page 496 the recital with the announcement of the position I urge here. Therefore, that decision having become a part of the rules of this House, being there embodied from the ruling previously made upon a suggestion by the estimable gentleman now occupying the chair as well as from one of the other gentlemen from Maine, I can not understand how it can now be held that the question is not both privileged and entitled to precedence. I respectfully insist that my resolution is privileged, and should be submitted to the House and acted upon as a privileged question. [Applause.] I ask that my resolution be read.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

"By Mr. LEWIS of Washington.

"Resolution of the House of Representatives upon the right of the House to declare a foreign policy upon the subject of belligerency and neutrality and recognition both by treaty and commercial relations with the Republic of Cuba or any other country.

"Whereas the United States Senate assembled has duly by a proper form of resolution declared for a state of neutrality and the according to the Island of Cuba all rights as a belligerent as against Spain; and

"Whereas it is asserted that such right of recognition exists only with the Executive of the United States: Therefore,

"*Be it resolved by the House of Representatives of Congress*, That as a foreign policy of the United States it is the right and authority of the Senate and House of Representatives in adopting a foreign policy of the United States to recognize as Congress the belligerency of and declare the attitude of neutrality of the United States to the Island of Cuba or any other government or country when in the sense of the House such course is demanded by existing conditions."

Mr. LEWIS of Washington. I move the adoption of the resolution just read.

Mr. DINGLEY. I make the point of order that the resolution does not raise a privileged question.

Mr. LEWIS of Washington. I have already answered the point of order as fully as demanded, and offered what I think sufficient precedent to prove my position that this is both a privileged question and entitled to precedence for consideration. I now call for a ruling on the question.

The SPEAKER. The Chair think this is not a question of privilege. Under the rules of the House such a resolution can be presented in the regular course and should have the report of a committee upon the subject.

Mr. LEWIS of Washington. A parliamentary inquiry, Mr. Speaker. Would the Chair suggest what would be "the regular course" at this time?

The SPEAKER. The regular course would be to file the resolution under the rules.

Mr. LEWIS of Washington. Does the honorable Speaker mean to suggest

that the resolution shall be filed to await the appointment of a Committee on Foreign Affairs to consider it?

The SPEAKER. Certainly.

Mr. LEWIS of Washington. I did not understand the remark of the Chair.

The SPEAKER. Certainly, it should be filed under the rules of the House.

Mr. LEWIS of Washington. Then the Chair holds that my resolution is not privileged, and sustains the gentleman from Maine upon that point of order?

The SPEAKER. The Chair does.

Mr. LEWIS of Washington. I take an appeal from the decision of the Chair.

Mr. DINGLEY. I move that the appeal lie on the table.

The SPEAKER (having put the question). The ayes seem to have it.

Mr. LEWIS of Washington. I call for a division.

The question being again taken, there were—ayes 91, noes 57.

Mr. LEWIS of Washington. Yeas and nays, Mr. Speaker.

The yeas and nays were ordered.

The question was taken; and there were—yeas 89, nays 51, answered "present" 17, not voting 196; as follows:

YEAS—89.

The following pairs were announced:

Until further notice:

Mr. LOVERING with Mr. WHEELER of Alabama.

Mr. STEWART of New Jersey with Mr. TAYLOR of Alabama.

Mr. POWERS with Mr. GAINES.

Mr. REEVES with Mr. BALL.

Mr. MILLS with Mr. SULLIVAN.

Mr. SULLOWAY with Mr. TALBERT.

Mr. SAUERHERING with Mr. STRAIT.

Mr. DOVENER with Mr. DAVIS.

Mr. BARNEY with Mr. BANKHEAD.

Mr. ACHESON with Mr. WILSON of South Carolina.

Mr. HOOKER with Mr. CATCHINGS.

Mr. PEARCE of Missouri with Mr. VANDIVER.

Mr. DAVIDSON of Wisconsin with Mr. CLARK of Missouri.

Mr. OVERSTREET with Mr. ZENOR.

Mr. TONGUE with Mr. DE ARMOND.

Mr. MCINTIRE with Mr. HOWARD of Georgia.

Mr. QUIGG with Mr. BLAND.

Mr. HULL with Mr. BAILEY.

Mr. WARD with Mr. BARLOW.

Mr. MCCLEARY with Mr. JONES of Virginia.

Mr. WANGER with Mr. MEEKISON.

Mr. BISHOP with Mr. NORTON.

Mr. MAHON with Mr. BENNER of Pennsylvania.

Mr. LANDIS with Mr. CRANFORD.

Mr. GILLETT of Massachusetts with Mr. MCDOWELL.

Mr. MITCHELL with Mr. LOVE.

Mr. KULP with Mr. STALLINGS.

Mr. ODELL with Mr. BARTLETT.

Mr. CORLISS with Mr. LATIMER.

Mr. HICKS with Mr. OTEY.

Mr. HEATWOLE with Mr. DINSMORE.

Mr. SMITH of Illinois with Mr. MCCULLOCH.

Mr. ALEXANDER with Mr. COONEY.

Mr. ROYSE with Mr. MADDOX.

Mr. SHELDEN with Mr. BIXEY.

Mr. JOHNSON of Indiana with Mr. MOON.

Mr. BROSIUS with Mr. ERMENTROUT.

Mr. LACEY with Mr. MCRAE.

Mr. WRIGHT with Mr. ADAMSON.

Mr. MCCALL with Mr. MCLAURIN.

Mr. JENKINS with Mr. STOKES.

Mr. PITNEY with Mr. CARMACK.

Mr. BRUMM with Mr. COX.

Mr. ADAMS with Mr. ELLIOTT.

Mr. BINGHAM with Mr. DOCKERY.

Mr. KERR with Mr. ROBB.

Mr. MESICK with Mr. PETERS.

Mr. LORIMER with Mr. BERRY.

Mr. MILLER with Mr. CLARDY.

Mr. STEVENS of Minnesota with Mr. JONES of Washington.

Mr. DORR with Mr. MADDOX.

Mr. LYBRAND with Mr. LENTZ.

Mr. HOPKINS with Mr. MCALEER.

Mr. BELKNAP with Mr. MAGUIRE.

Mr. HAGER with Mr. ALLEN.

Mr. YOUNG of Pennsylvania with Mr. BENTON.

Mr. WILLIAMS of Pennsylvania with Mr. ROBERTSON of Louisiana.

Mr. JOY with Mr. MARSHALL.

Mr. HAMILTON with Mr. TODD.

Mr. WM. ALDEN SMITH with Mr. BRUCKER.

Mr. CHICKERING with Mr. BRADLEY.

Mr. DAYTON with Mr. PIERCE of Tennessee.

Mr. FOSS with Mr. DAVEY.

Mr. MCEWAN with Mr. VEHSLAGE.

Mr. BELDEN with Mr. SULZER.

Mr. SIMPKINS of Massachusetts with Mr. LESTER.

Mr. PUGH with Mr. SUTHERLAND.

Mr. BARHAM with Mr. LITTLE.

For this day:

Mr. PAYNE with Mr. RICHARDSON.

Mr. WHITE of Illinois with Mr. HUNTER.

Mr. HURLEY with Mr. DAVIS.

Mr. CRUMP with Mr. HANDY.

Mr. WILBER with Mr. FOX.

Mr. MADDOX. Mr. Speaker, I am paired with the gentleman from Indiana, Mr. ROYSE, on all political questions, and as this seems to be considered by some to be a political question, I withdraw my vote.

Mr. VANDIVER. I voted "no," but being paired with the gentleman from Missouri, Mr. PEARCE, on political questions, I withdraw the vote.

Mr. TERRY. Mr. Speaker, I rise to a parliamentary inquiry, and to a question affecting the rights and privileges of this House.

Mr. WHEELER of Alabama. Will the gentleman withhold his statement one moment, until I make an announcement with reference to my vote? I find that I am paired with the gentleman from Massachusetts, Mr. LOVERING, and therefore I wish to change my vote to "present."

Mr. TERRY. Mr. Speaker——

Mr. LEWIS of Washington. Mr. Speaker, I merely wish to make the point of order to my friend from Arkansas [Mr. TERRY] that until the vote is announced I do not yield the floor.

Mr. COOPER of Texas. I desire to be recorded as present. I am paired with the gentleman from Iowa, Mr. PERKINS. If he were present, I would vote "no."

Mr. TERRY. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. TERRY. I stated to the Chair that I rose to a question relating to the rights and privileges of the House, and to a parliamentary inquiry.

The SPEAKER. Will the gentleman state his parliamentary inquiry?

Mr. TERRY. I will state, Mr. Speaker, preliminary to it——

The SPEAKER. Does it relate to the present vote that is being taken?

Mr. TERRY. It does not relate to the present vote, Mr. Speaker.

The SPEAKER. The only thing in order is the announcement of the vote. On this question the yeas are 89, the nays 51, present 17—not a quorum.

Mr. DINGLEY. Mr. Speaker, inasmuch as it seems there is no quorum present for the transaction of business, I move that the House do now adjourn.

The question was taken.

Mr. JETT. Mr. Speaker, before the——

Mr. LEWIS of Washington demanded a division on the motion to adjourn, and then withdrew the demand.

Mr. RICHARDSON. I rise to a parliamentary inquiry. Would it not be in order to move a call of the House? We might get a quorum here for the transaction of business.

The SPEAKER. On that question——
Mr. TERRY. I demand a division.
The House divided; and there were—ayes 92, noes 35.
Accordingly, the motion of Mr. DINGLEY was agreed to; and (at 12 o'clock and 53 minutes p. m.) the House, under the order heretofore adopted, adjourned until Monday, May 31, 1897, at 12 o'clock noon.

The VICE-PRESIDENT. The question is on agreeing to the amendment to the amendment, which will be stated.

The SECRETARY. In line 22, page 26, paragraph 101, it is proposed to strike out the word "ten" in the committee amendment and insert the word "eight;" so as to read:

Cast polished plate glass, finished or unfinished and unsilvered, not exceeding 16 by 24 inches square, 8 cents per square foot; above that, and not exceeding 24 by 30 inches square, 8 cents per square foot.

Mr. VEST. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BUTLER (when his name was called). I again announce my pair with the junior Senator from Maryland [Mr. WELLINGTON].

Mr. DANIEL (when his name was called). I am paired with the Senator from Connecticut [Mr. HAWLEY]. If he were present, I should vote "yea."

Mr. FRYE (when his name was called). I am paired with the senior Senator from Maryland [Mr. GORMAN].

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea."

Mr. PERKINS (when his name was called). I have a general pair with the junior Senator from North Dakota [Mr. ROACH]. In his absence I withhold my vote.

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON].

The roll call was concluded.

Mr. PASCO. I again announce my pair with the Senator from Utah [Mr. CANNON]. If he were present, I should vote "yea."

Mr. CLARK. I am paired with the junior Senator from Kansas [Mr. HARRIS]. I transfer my pair to my colleague [Mr. WARREN] and will vote. I vote "nay."

Mr. CLAY. I have a pair with the Senator from Massachusetts [Mr. LODGE], which I will transfer to the Senator from Delaware [Mr. KENNEY] and vote. I vote "yea."

The result was announced—yeas 18, nays 28; as follows:

YEAS—18.

Bacon,	Cockrell,	Morgan,	Vest,
Bate,	Jones, Ark.	Murphy,	Walthall,
Berry,	Lindsay,	Pettus,	White.
Caffery,	Mallory,	Rawlins,	
Clay,	Mills,	Turpie,	

NAYS—28.

Aldrich,	Fairbanks,	Jones, Nev.	Pritchard,
Allison,	Foraker,	McBride,	Proctor,
Burrows,	Gallinger,	McMillan,	Quay,
Chandler,	Gear,	Mason,	Shoup,
Clark,	Hale,	Nelson,	Spooner,
Davis,	Hanna,	Penrose,	Wetmore,
Deboe,	Hansbrough,	Platt, Conn.	Wilson.

NOT VOTING—42.

Allen,	George,	McEnery,	Smith,
Baker,	Gorman,	Mantle,	Stewart,
Butler,	Gray,	Martin,	Teller,
Cannon,	Harris, Kans.	Mitchell,	Thurston,
Carter,	Harris, Tenn.	Morrill,	Tillman,
Chilton,	Hawley,	Pasco,	Turner,
Cullom,	Heitfeld,	Perkins,	Warren,
Daniel,	Hoar,	Pettigrew,	Wellington,
Elkins,	Kenney,	Platt, N. Y.	Wolcott.
Faulkner,	Kyle,	Roach,	
Frye,	Lodge,	Sewell,	

So the amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on agreeing to the amendment of the Committee on Finance to strike out "twelve" and insert "ten."

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, after the word "plates," in line 5, paragraph 102, page 27, to insert "exceeding in size 144 square inches and;" and in line 7, to strike out "nine" and insert "eleven;" so as to read:

Cast polished plate glass, silvered, cylinder and crown glass, silvered, and looking-glass plates, exceeding in size 144 square inches and not exceeding 16 by 24 inches square, 11 cents per square foot.

Mr. LINDSAY. Mr. President, before the amendment is voted on, I wish to call the attention of the Senate to the comparison of the duties levied upon this article under the act of 1890 and the proposed act. I read:

Plate glass, cast, polished, silvered, exceeding in size 144 inches; not exceeding 16 by 24 inches.

In 1893 the importations were 52,785 square feet. Under the act of 1894 there were 3,228 square feet imported, a decline of nearly 50,000 feet. In 1896 only $768 worth of this glass was imported. Yet the pending bill proposes to increase the duty from 6 cents per square foot to 11 cents per square foot.

I understood the Senator from Rhode Island to say a while ago, where two or three million feet had been imported under the existing duty, that that was a good reason why the duty should be increased. Here the importation has fallen off until the importations have almost entirely ceased, and I will ask him if that reason applies as well to this instance as it did a while ago.

The Senator from Rhode Island said in his opening address the other day:

In the readjustment of rates suggested the committee have tried in every instance to make them sufficiently protective to domestic interests without being prohibitive.

If at 6 cents per square foot we import only 3,228 square feet now, and the tax is practically doubled, is not this an instance in which the duty has been made absolutely prohibitive? The bill is denominated "A bill to provide revenue for the Government and to encourage the industries of the United States." Certainly this provision is not intended to provide revenue for the Government, when it absolutely prevents any of the article from being imported at all.

The next is, "above 16 by 24 inches and not exceeding 24 by 30 inches." In 1893 the importations were 204,158 square feet, and in 1896, 36,211 square feet, or about one-sixth the quantity imported three years ago, and yet the tax is raised from 10 cents a square foot to 13 cents a square foot.

The next is "cylinder and crown glass, polished, silvered, and looking-glass plates, not exceeding 16 by 24 inches." In 1893 the importations were 1,030,000 square feet; in 1896, 585,000 square feet, and yet the tax there is increased from 6 cents a square foot to 11 cents a square foot.

Again, "above 16 by 24 inches and not exceeding 24 by 30 inches." The importations there fell away 600,000 square feet, or about 15 per cent, and the tax is raised from 10 cents to 13 cents a square foot. There certainly can be no reason for these increases, unless it is to prevent importation, and if it be to prohibit absolutely importations, then these provisions are intended to defeat the operation of the bill to the extent that it is intended to provide revenue for the Government.

The Senator from Rhode Island said a while ago that a half dozen instances could not be found in which the rates in the McKinley Act have been increased, and yet here are four material increases, nearly from 50 to 75 per cent, in paragraph 101? In this equalization of or readjustment of rates I do find a few instances in which the McKinley duties have been diminished, but none of them relate to anything that is alleged to be controlled by combinations which are in general estimation regarded as trusts. Wherever you find a diminution of the McKinley duty, it relates to something that the trusts do not control and that nobody suspects any trust of controlling.

It is a little peculiar that when we strike the glass trust or the lead trust or the borax trust or the sugar trust, the articles manufactured and controlled by those combinations always receive gracious and liberal treatment at the hands of the gentlemen on the other side who prepared the bill. But the glass combination stands out in bolder relief than any other, and these four items are striking illustrations of the increase of taxation where there is no necessity to increase it for the purposes of protection and where the increases are manifestly intended to defeat the collection of revenue from those articles.

Mr. ALDRICH. In response to the suggestions made by the Senator from Kentucky [Mr. LINDSAY], I will say that there are more decreases than increases as compared with the act of 1890 in the paragraphs we have had under consideration. This increase, I will repeat, is simply to make the schedule symmetrical. The differences in rates between silvered and unsilvered glass are made to make one correspond with the other, considering the question of cost of silvering.

Mr. LINDSAY. I will ask the Senator——

Mr. ALDRICH. No; hold on a minute, if you please. When they are increased, the only result is to increase the rate to 32½ per cent in one case and 16.48 per cent in the other, among the lowest rates in the bill, and less than half the rates which the Senator himself and his political colleagues imposed upon three-quarters of the articles contained in this schedule.

Mr. LINDSAY. I will ask the Senator whether the symmetry of the bill requires that many of the items shall be taxed so that they shall be absolutely excluded from importation to this country?

Mr. ALDRICH. Certainly not, and there is no such item in the bill of any nature or description.

Mr. LINDSAY. Under the present tariff law, during the year 1896, only 3,228 feet of one character of this glass were imported, and you have increased the duty on that particular class of glass from 6 cents a square foot to 11 cents a square foot, and yet you claim that this is not prohibitive in its operation, and you claim that it is only such reasonable increase as is necessary to make your bill symmetrical.

Now, I insist that you do very little in the way of adding symmetry to a revenue bill, even if it does contain protective features,

when you levy duties which absolutely exclude the possibility of importation along some of the lines of the bill.

Mr. CHILTON. Mr. President, I wish to call attention to just one point further in connection with this matter. The Senator from Rhode Island referred to the fact that the Senate committee has not increased the rates of duty on brackets Nos. 3 and 4 of these two paragraphs, but the fact is that the Pittsburg Glass Company did not ask for any increase of the duty on bracket 4. Bracket 4 embraces 75 per cent of the plate-glass manufacture of this country. On that bracket the rate of tariff which the glass men themselves ask for is contained in the bill. I repeat, and I wish to make it as emphatic as possible, that the increases in the bill are on the small sizes of glass, silvered and unsilvered, which go into the homes of the poor people of the country, and which constitute only 10 per cent of the American product of glass.

Furthermore, the same companies in this country make both the small sizes and the large sizes. As they are now protected to the point of extortion in the large sizes, they ask for no further increase there. But the Finance Committee of the Senate now proposes to give them also what is practically a prohibitive duty upon the small sizes.

The McKinley duty was not a reduction from the duty that theretofore existed. The duties on these small sizes of plate glass had never been higher than they were under the McKinley Act, and yet under that rate of duty the plate-glass industry of this country has developed until it has become the wonder of the world. Only fifteen years ago it was comparatively unknown as a business in America, but under this very rate of duty which they now propose to increase it has developed until, as I say, it is now one of the largest industries in the United States.

Another thing, sir. I am informed—I can not speak advisedly about it—that taking the glass business as a whole, it is among the most flourishing industries now conducted in the United States. I am informed that there has been an increase in the wages of laborers in that business, not in every branch, perhaps, but in many lines, since the Wilson Act went into operation. Especially is that so, according to my information, in that part of the glass business embracing the manufacture of vases, lamp chimneys, bottles, etc.

The glass industry is not in a decaying condition; it is not in a depressed condition. There are more manufactures of glass exported from this country than there are imported into it, and yet we are told that this particular business should receive signal favor at the hands of the Congress of the United States.

Mr. JONES of Arkansas. In paragraph 102, line 7, I move to strike out of the committee amendment "eleven" and insert "six," so as to read "6 cents," for the reasons already stated by the Senator from Kentucky [Mr. LINDSAY] and the Senator from Texas [Mr. CHILTON]. I call attention in this connection to the third bracket under this paragraph, where the importations last year were only 131 feet, I presume perhaps a single pane of glass, and yet there is an increase, a small one, it is true, but an increase over the present rate of taxation from 23 cents to 25 cents. Yet the Senator from Rhode Island defied the Senator from Kentucky to point out a single instance where there has been an increased rate of tax where there was practically no importation under the ruling rate. In the next bracket there were but 407 feet of glass imported. True, there is no increase in the rate of taxation, but it is left at 38 cents.

When the Senator from Rhode Island assures the Senate and the country that the intention is to provide proper protection, but not to exclude importations, it seems to me he has been singularly blind, when, looking at the statement of importations under these different schedules, he has not reduced the taxes at all.

In this connection, I wish to call the attention of the Senate for a few moments only to two or three points. The Boston Plate and Window Glass Company, on the question of plate glass, submitted this statement to the Ways and Means Committee in the House of Representatives:

BOSTON, *January 6, 1897.*

Committee on Ways and Means:

We beg to protest against any increase in the present tariff on polished plate glass and to pray for a decrease on same of 50 per cent. The annual consumption of this article in this country is about 12,000,000 square feet. This manufacture in this country is almost wholly in the hands of one company, which is a monopoly, and substantially control the business of the country, and by selling just under the cost of importation is now succeeding in excluding the imported article.

The present duty on this article averages more than 100 per cent on the present cost abroad. If the duty was made at one-half of present rates there would be larger importations, larger additional revenues to the Government, and a large reduction to consumers on present selling price of this article.

BOSTON PLATE AND WINDOW GLASS CO.,
E. A. HILLS, *President.*

All their statements seem to me to carry conviction by the mere statement. It is not necessary to argue them at all.

In this same connection, I have two letters from Vanhorne, Griffen & Co. One of them is printed. It was inclosed to me, addressed to the gentlemen in charge of the bill. I believe the Senator from California put this letter in the RECORD.

Mr. WHITE. Yes.

Mr. JONES of Arkansas. Both of these letters have, however, been presented to the Senate, and I will not present them further.

As a curious instance of the way this plate-glass company has increased in power and strength, I wish to present the statement of Dun & Co. of this same plate-glass company in January, 1896, a year ago, eight or nine months after this organization had first been made and this business had practically gone into the hands of these people.

PITTSBURG PLATE GLASS COMPANY.

PITTSBURG, ALLEGHENY COUNTY, PA., *January 10, 1896.*

An old and well-established corporation, the capital stock of which has been increased from $2,750,000 to $10,000,000 by the consolidation of the following concerns: Howard Plate Glass Company, Duquesne, Pa.; Charleroi Plate Glass Company, Charleroi, Pa.; Diamond Plate Glass Company, located at Ellwood and Kokomo, Ind., and the Crystal Plate Glass Company, located at Crystal City, Mo.

The nine companies which I read this morning.

The officers of this consolidated company are: John Pitcairn, chairman; Edward Ford, president; A. L. Conger, of Akron, Ohio, vice-president; A. E. Howard, secretary; E. L. Ford, treasurer, and A. Pitcairn, comptroller. The consolidation was formed on April 1, 1895, the stockholders of the new company are practically the same as formerly in their respective concerns, and it is a strong organization. Their works are at the following places: Creighton, Pa.; Tarentum, Pa.; Ford City, Pa.; Duquesne, Pa.; Charleroi, Pa.; Ellwood, Ind.; Kokomo, Ind., and Crystal City, Mo.

Those are the names and places which I read this morning.

A. E. Howard, the secretary of the company, states that they have no occasion to make a detailed showing, as they pay cash for all supplies, give no paper, do not owe anything to any bank, and have no liabilities outside their bonds and current monthly or quarterly bills, which are always paid as soon as due and are generally less than their cash balances. He declines to give the total of their assets, but it is believed to be upward of $5,000,000 since the recent consolidation of the above-named companies, the highest quotation for the stock so far being 70 per cent. The bonded indebtedness is $2,500,000, of which one-fifth is being paid every year. They have a practical monopoly of the trade, and are believed to be making money at present, as they are operating under more favorable conditions than heretofore. Their plants are not employed to their fullest capacity, but are run to the best advantage, as they do not wish to furnish any occasion to reduce price by overproduction. The company as now constituted is virtually a trust; and although probably capitalized above the intrinsic value of its available assets, its earning capacity is considerable, and its credit for business needs is first-class. The officers who are identified with the corporation are regarded as successful business men of large experience and good business ability. M. B. Rate (AAA1.) 10.

Mr. President, the statement has been made in a private way that the laborers are very much interested in this glass industry, that they are very much interested in these increased prices, because, by a recent scale made between the employers and the laborers, it has been agreed to give the laborers 10 per cent of whatever advance is made in these rates by reason of the tariff, and that, if there is an average of 15 per cent—as the understanding is that these increases will make—it would seem on the face of the proposition that the laborers get two-thirds of the whole of it. Now, analyzed and brought down to a common-sense analysis, I will state what the situation is. I asked the president of that laborers' association what classes of men under this new schedule get this increased price, and he said the blowers and one other class. I do not remember what they were. I asked him the prices paid to these men, and he said $100 a month was paid to the blower. I asked him what they made, and he said 196 boxes of 120 pounds to the box, or 19,000 pounds of glass per month. That five-eighths increase in the tariff amounts to $178.75 a month upon the product of a single laborer.

This statement says that they are managing so as to get the full benefit of this increase. Now, this is 15 per cent only, but it amounts to $178.75 on a box. The laborer gets an advance of 10 per cent on his wages. He gets $10. His hundred dollars will be increased to $110, and in the innocence of his soul, while he is getting $10 out of $178.75, he imagines that he is getting two-thirds of what the company gets. This is the kind of stuff with which laborers of this sort are misled, and these men, shrewd, sharp, and unscrupulous, as many of them are, succeed in having the Congress of the United States levy heavy taxes upon the masses of the people to enable them to pay this increased rate of wages, as they pretend.

Mr. President, I will not detain the Senate by a discussion of this question further, but will ask for a yea-and-nay vote on my amendment.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Arkansas to the amendment of the committee, to insert the word "six" in place of "eleven" on the seventh line of page 27, paragraph 102, so as to read "not exceeding 16 by 24 inches square, 6 cents per square foot." On that question the yeas and nays are demanded.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLARK (when his name was called). I again announce my pair with the junior Senator from Kansas [Mr. HARRIS], but transfer that pair to my colleague [Mr. WARREN] and vote. I vote "nay."

Mr. CLAY (when his name was called). I am paired with the

Senator from Massachusetts [Mr. LODGE]. I transfer that pair to the Senator from Delaware [Mr. KENNEY] and vote. I vote "yea."

Mr. PASCO (when his name was called). I again announce my pair with the Senator from Utah [Mr. CANNON]. If he were present, I should vote "yea."

Mr. PENROSE (when his name was called). In accordance with the explanation already given of my pair, I will vote. I vote "nay."

Mr. PERKINS (when his name was called). I again announce my pair with the junior Senator from North Dakota [Mr. ROACH]. He is absent, and I withhold my vote.

The roll call was concluded.

Mr. WILSON. I desire to announce the pair of my colleague [Mr. TURNER] with the senior Senator from Massachusetts [Mr. HOAR].

Mr. CAFFERY. I desire to announce my pair with the Senator from Michigan [Mr. BURROWS]. If he were present, I should vote "yea."

Mr. DANIEL. I beg leave to state that I am paired with the Senator from Connecticut [Mr. HAWLEY]. If he were here, I should vote "yea."

Mr. WETMORE (after having voted in the negative). Has the senior Senator from Georgia [Mr. BACON] voted?

The VICE-PRESIDENT. The senior Senator from Georgia has not voted.

Mr. WETMORE. I withdraw my vote. I am paired with that Senator.

Mr. FRYE. I am paired with the senior Senator from Maryland [Mr. GORMAN]. I will transfer that pair to the Senator from Utah [Mr. CANNON], and that will allow both the Senator from Florida [Mr. PASCO] and myself to vote. I vote "nay."

Mr. PASCO. I vote "yea."

The result was announced—yeas 19, nays 26; as follows:

YEAS—19.

Bate,	Jones, Ark.	Murphy,	Turpie,
Berry,	Lindsay,	Pasco,	Vest,
Chilton,	Mallory,	Pettigrew,	Walthall,
Clay,	Mills,	Pettus,	White.
Cockrell,	Morgan,	Rawlins,	

NAYS—26.

Aldrich,	Foraker,	McBride,	Proctor,
Allison,	Frye,	McMillan,	Quay,
Baker,	Gallinger,	Mason,	Shoup,
Chandler,	Gear,	Nelson,	Spooner,
Clark,	Hale,	Penrose,	Wilson.
Deboe,	Hanna,	Platt, Conn.	
Fairbanks,	Jones, Nev.	Pritchard,	

NOT VOTING—43.

Allen,	Faulkner,	Kyle,	Smith,
Bacon,	George,	Lodge,	Stewart,
Burrows,	Gorman,	McEnery,	Teller,
Butler,	Gray,	Mantle,	Thurston,
Caffery,	Hansbrough,	Martin,	Tillman,
Cannon,	Harris, Kans.	Mitchell,	Turner,
Carter,	Harris, Tenn.	Morrill,	Warren,
Cullom,	Hawley,	Perkins,	Wellington,
Daniel,	Heitfeld,	Platt, N. Y.	Wetmore,
Davis,	Hoar,	Roach,	Wolcott.
Elkins,	Kenney,	Sewell,	

So the amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on the amendment of the Committee on Finance, which will be stated.

The SECRETARY. In paragraph 102, after the word "plates," in line 4, page 27, insert, the words "exceeding in size 144 square inches;" and in line 7, after the word "square," strike out "nine" and insert "eleven;" so as to read:

102. Cast polished plate glass, silvered, cylinder and crown glass, silvered, and looking-glass plates, exceeding in size 144 square inches and not exceeding 16 by 24 inches square, 11 cents per square foot.

The amendment was agreed to.

Mr. JONES of Arkansas. I desire to move, in paragraph 102, page 27, line 9, to strike out "thirteen" and insert "ten," after the word "square;" so as to read:

Above that, and not exceeding 24 by 30 inches square, 10 cents per square foot.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Arkansas.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 102, page 27, line 13, before the word "cents," to strike out "forty" and insert "thirty-eight;" so as to read:

Above that, and not exceeding 24 by 60 inches square, 25 cents per square foot; all above that, 38 cents per square foot.

The amendment was agreed to.

Mr. JONES of Arkansas. Now, I move to amend paragraph 102 by striking out, in lines 3 and 4, on page 27, the words "cylinder and crown glass, silvered, and looking-glass plates."

The VICE-PRESIDENT. The question is on the amendment of the Senator from Arkansas.

Mr. JONES of Arkansas. I earnestly hope that the committee will not object to this amendment. I understand, of course, that it is absolutely useless, no matter how meritorious an amendment may be, for us to offer an amendment here. But the Senator from Rhode Island a short time ago said that a number of people sitting in the galleries might imagine that some poor man in the country was interested in this plate-glass business, that no plate glass entered into the homes of the poor; and he assured the Senator from South Carolina that there was not a plate-glass window in his State outside of Charleston, and so on. I will not discuss that feature of it; but the proposition I now make to amend the bill the Senator will not say does not concern the poorer class of people all over the United States. It is unreasonable, it is not right, that German plate glass, which is used for mirrors in the cheapest class of furniture and used for mirrors in the cheapest homes in the country, should be taxed on exactly the same basis and at the same rate that high-grade French plate mirrors are taxed.

Mr. President, I have at my desk samples of this glass. An object lesson is worth a great deal to Senators, and I wish Senators taking an interest in this question would examine these samples. That is a specimen [exhibiting] of German plate glass, thin and light, easily broken, and of course not valuable. But it is the glass made only in Bohemia, and the cheaper furniture is supplied only with mirrors of this character. Plate glass can not be used in the cheap chamber sets that are made for the houses of the poor. It is not right—it is, it seems to me, a monstrous outrage and iniquity—that the same rate of taxation should be levied upon this glass that is levied upon this superior and higher character of glass. [Exhibiting.] Now, this heavy, costly, and expensive glass is included in this paragraph with the light-weight glass, cast polished plate glass, which is of this high character, and silvered, cylinder, and ground glass, which is this light-blown glass [exhibiting], not rolled at all. Silvered and looking-glass plates are included in the same rate of taxation.

I am glad to see the Senator from Michigan [Mr. BURROWS] giving me his attention. All over his State there are large manufactories of this cheap grade of furniture, every one of which use for every single mirror that goes upon their furniture this grade of glass, and when he votes, if he does, with the majority of the committee to retain this rate of taxation, which will absolutely keep this grade of glass intended for the use of the poor out of the United States and away from consumption, he practically votes for closing up the establishments in his State. It is utterly impossible for those men to use this high-grade French plate glass to carry on their industries. It is a gross wrong; it can not be defended on any principle of right or fairness. This glass ought to be taken care of in paragraph 99; it ought not to be in paragraph 102; and I move to strike it out of paragraph 102 for that reason.

Mr. ALDRICH. Mr. President, you would judge from the vehement eloquence of my friend from Arkansas that this is entirely a new departure in including looking-glass plates in this paragraph. In reference to polished plate glass, silvered, etc., I will read to him for his information the provision in the corresponding paragraph in the act of 1894, which he prepared himself and secured the adoption of by the Senate:

Cast polished plate glass, silvered, and looking-glass plates.

The same language exactly; and you would think from his eloquent denunciation of this bill that this was entirely the first time in the history of the country that it had been done.

Mr. JONES of Arkansas. Mr. President, if this grade of glass was put in the wrong paragraph in 1894, that is no justification for the Senator from Rhode Island to put it there now. If the Senator would follow the bill of 1894, we might be able to rectify the mistakes. There were mistakes made through that bill. We were compelled to put grades of glass in that bill that we did not want to put in the bill. We did not do it voluntarily. If the Senator will take that glass schedule all the way through, it will be less objectionable than it is now. But the fact that we did not put this in the proper paragraph at that time is no justification for his putting it in the wrong paragraph now; and I want the Senate to note that he does not deny the truth of one single statement made by me.

Mr. ALDRICH. I do.

Mr. JONES of Arkansas. And he can not deny it.

Mr. ALDRICH. I deny it most emphatically.

Mr. JONES of Arkansas. Then state what the facts are.

Mr. ALDRICH. I had not got to that part.

Mr. JONES of Arkansas. You had taken your seat after you made a speech.

Mr. ALDRICH. I was simply calling the attention of the Senate to the fact that this was not a new departure at all; that looking-glass plates had always been included in this paragraph. They were included in this paragraph in 1890; they were included in this paragraph in 1894, and they were included in this bill, and

properly included, because I can see no reason under heaven why one class of glass silvered should pay a different rate of duty from any other glass silvered. Take polished, crown, or common window glass silvered and it is quite as valuable at times and sometimes more valuable than plate glass silvered.

Mr. JONES of Arkansas. The Senator certainly is not serious when he states that the process of silvering adds enormously to the cost of glass plate?

Mr. ALDRICH. It does.

Mr. JONES of Arkansas. It is a comparatively cheap process. It amounts to but little in addition to the other cost. The process of silvering can be easily taken care of in another part of the bill, and it ought to be.

Mr. WHITE. I should like to ask the Senator from Rhode Island, who is familiar with this subject, whether the German glass shown by the Senator from Arkansas is not less valuable than the French plate shown by him.

Mr. ALDRICH. There is no doubt about that.

Mr. WHITE. Then, if that be true, when the silvering occurs, does that raise the value of the German plate to a level with the other grade?

Mr. ALDRICH. Not at all; the silvering costs about as much on one plate as the other.

Mr. WHITE. Certainly; that is what I supposed. Therefore the criticism appears to me to be just, because the inferior glass is taxed just the same as the superior. If you were taxing it by an ad valorem rate, it would be different, but you put a specific rate upon it, which excludes the one practically or places a great burden upon it, when, as I understand it, it is not manufactured in this country; but if it were manufactured here, there seems to me to be no reason for the imposition of the same duty upon the two classes of plate which vary materially as to their intrinsic worth. That seems to be the point of the criticism, not whether a mistake was made in the other bill, or in this, or in any other measure.

Mr. ALDRICH. The Senator from California must be aware that Congress can not put one rate of duty upon German plate glass and another rate of duty upon French plate glass. I do not know of any possible description that can be given.

Mr. JONES of Arkansas. The Senator knows that this is not plate glass at all.

Mr. ALDRICH. That is not plate glass perhaps.

Mr. JONES of Arkansas. And the German glass is not plate glass at all.

Mr. ALDRICH. There is a difference of opinion whether it is or not.

Mr. JONES of Arkansas. There is not a man in the world who would say so.

Mr. WHITE. Is it not what is called cylinder glass?

Mr. JONES of Arkansas. It is cylinder glass.

Mr. ALDRICH. It is cylinder glass and polished, and sometimes it is even more valuable.

Mr. WHITE. It seems to me the Senator utterly gives away the case when he supposes these two pieces of glass are entirely different and one is worth much more than the other. I am certain the ingenuity of the Senator from Rhode Island, who has prepared the numerous compounds, differentiating and scientific scales found in this and other bills, can be adequate to the task of preparing something that will make a discrimination between these two utterly different pieces of glass. We can all see the difference, and possibly might be able to describe them without any very great effort.

Mr. ALDRICH. The fact is that there is no special discrimination shown by paragraphs in regard to these articles in all the laws that have been passed since 1883.

Mr. JONES of Arkansas. The process of silvering is very much cheaper now than it was.

Mr. ALDRICH. I understand that, but relatively to all articles. That does not apply to German plates more than to French plates or any other plates, and the fact that the articles always have been included together is the very best evidence, I assume, that no great injustice has been done to either.

Mr. WHITE. The following criticism has been made to me with reference to this matter:

> The character of the glass is different, and it should not be provided for in connection with plate glass. Cylinder glass is manufactured entirely in Bohemia and on the borders of Bavaria. It is made in no other place, and has to be imported. It is silvered extensively in this country, and all that is necessary is to give a proper differential between the silvered and the unsilvered, as in paragraph 99. The changes suggested have met with the approval of the people who silver cylinder glass, and the furniture people who have to use it and who can not use plate glass. Pittsburg people may possibly object, but it can only be on the ground that the silvered cylinder glass may take the place of their plate glass, which, I am informed, can not be the case, as the furniture costing from six to fifteen dollars per set is usually made of thin wood, which will not hold plate glass, and they can not afford to pay the price which would be charged for plate glass. I think the change, if made, would be eminently satisfactory to those who are most deeply interested in the material.

The suggestion seems to be a very appropriate one.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Arkansas [Mr. JONES].

Mr. JONES of Arkansas. I call for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. TURPIE. Mr. President, I have had a good deal of serious reflection as to what may be the cause of these largely increased rates and this largely increased taxation against the consumers of window glass and the classes of glass mentioned in the paragraph now under consideration. It would appear upon the surface that this action is a very deliberate raid against all sorts of building and improvement, and that it is a crusade against the establishment of homes in the United States. It does not only affect the exterior of dwellings and other places of resort, but the interior, as was said by the honorable Senator from Arkansas [Mr. JONES], and the furniture which a family may use, a family in moderate circumstances, hardly able to pay the taxes now levied.

Sir, in traveling through this country, especially in the towns and smaller cities, and very frequently in the larger cities, you will see at present a very significant and brief legend, "To let;" "To let;" "To let," repeated in endless repetition. Sometimes the legend is upon dwellings, but not so often. It is more frequently to be found upon shops, storerooms, storehouses, and warehouses. Sir, it has become epidemic. I am told that on a very large and well-known apartment at the other end of the Capitol the legend is put up there over the door, "To let," and that the former inmates of that apartment have been placed within the limitation of the decree of the Captain-General of Cuba, in a state of incommunicado, and that all the former inhabitants are suffering under the condition of a pacific blockade, subject to all the hardships and privations of a beleaguered city.

It follows, then, that there ought to be some method of ridding this country of this great plague "To let," almost as dangerous as the bubonic plague of the Indies; and I have concluded, after great deliberation, that the majority of the Finance Committee have thought that it was the best way to repeople these vacant habitations by preventing the building of new ones, and therefore they have increased the taxation on all sorts of building material, without reference to the question either of revenue or encouragement, two principal features of this bill, for if you consider for a moment, this is not only a tax on a man who is about to build a new house, a new storeroom, or a new apartment for any purpose, but it is a direct tax upon all sorts of mechanics engaged in such work, and it is a direct tax upon all sorts of material men who are interested in the progress of building and improvement in this country. It is an imposition which proposes to place additional prices upon everything requisite and necessary for new and valuable improvements, especially when they are undertaken by persons of moderate means and fortune.

No doubt, to use the title of this bill, sir, our action in adopting these enormous rates will "provide revenue," but the revenue will go to the great trusts, the plate-glass trust and others, and it will not go into the Treasury of the United States.

The action of the majority here is of such a nature as to make the Government itself a compulsory coparcener in the plate-glass trust—not a silent partner, because a silent partner may share in the profits; not a dormant partner, because a dormant partner has a right also to file a bill for an accounting and to share in the profits, but a compulsory, honorary partner, who contributes his means, his hoard, his influence, his good will to the firm and yet can not touch a penny of the profits or returns.

Sir, I am opposed to this sort of coparcenership. I believe that the Treasury of the United States is itself in more need of being replenished than the treasury of the great plate-glass trust, and I shall therefore vote against this and every other prurient prostitution of the taxing power.

The VICE-PRESIDENT. The Secretary will call the roll on the adoption of the amendment proposed by the Senator from Arkansas [Mr. JONES].

Mr. BUTLER (when his name was called). I again announce my pair with the Senator from Maryland [Mr. WELLINGTON].

Mr. CLAY (when his name was called). I rise again to announce that I am paired with the junior Senator from Massachusetts [Mr. LODGE], and that that pair has been transferred to the junior Senator from Delaware [Mr. KENNEY]. I vote "yea."

Mr. DANIEL (when his name was called). I am paired with the Senator from Connecticut [Mr. HAWLEY]. If he were present, I should vote "yea."

Mr. PASCO (when his name was called). The Senator from Maine [Mr. FRYE] and I have again transferred our pairs; and I vote "yea."

Mr. PERKINS (when his name was called). I again announce my pair with the Senator from North Dakota [Mr. ROACH].

Mr. WETMORE (when his name was called). I announce my pair with the Senator from Georgia [Mr. BACON].

The roll call was concluded.

Mr. BATE. I desire to state that my colleague [Mr. HARRIS of Tennessee] is absent on account of sickness, and that he is paired with the Senator from Vermont [Mr. MORRILL].

Mr. PERKINS. The senior Senator from Virginia [Mr. DANIEL] is paired with the Senator for Connecticut [Mr. HAWLEY]. With his permission, I will transfer my pair with the Senator from North Dakota [Mr. ROACH] to the Senator from Connecticut [Mr. HAWLEY], and that will permit the Senator from Virginia and myself to vote.

Mr. DANIEL. That is satisfactory to me.

Mr. PERKINS. I vote "nay."

Mr. DANIEL. I vote "yea."

The result was announced—yeas 21, nays 25; as follows:

YEAS—21.

Bate,	Daniel,	Murphy,	Vest,
Berry,	Jones, Ark.	Pasco,	Walthall,
Caffery,	Lindsay,	Pettigrew,	White.
Chilton,	Mallory,	Pettus,	
Clay,	Mills,	Rawlins,	
Cockrell,	Morgan,	Turpie,	

NAYS—25.

Aldrich,	Fairbanks,	Mason,	Shoup,
Allison,	Foraker,	Penrose,	Spooner,
Burrows,	Frye,	Perkins,	Warren,
Carter,	Gear,	Platt, Conn.	Wilson.
Chandler,	Hanna,	Pritchard,	
Davis,	McBride,	Proctor,	
Deboe,	McMillan,	Quay,	

NOT VOTING—42.

Allen,	Gorman,	Kyle,	Smith,
Bacon,	Gray,	Lodge,	Stewart,
Baker,	Hale,	McEnery,	Teller,
Butler,	Hansbrough,	Mantle,	Thurston,
Cannon,	Harris, Kans.	Martin,	Tillman,
Clark,	Harris, Tenn.	Mitchell,	Turner,
Cullom,	Hawley,	Morrill,	Wellington,
Elkins,	Heitfeld,	Nelson,	Wetmore,
Faulkner,	Hoar,	Platt, N. Y.	Wolcott.
Gallinger,	Jones, Nev.	Roach,	
George,	Kenney,	Sewell,	

So the amendment was rejected.

The reading of the bill was resumed at paragraph 103, on page 27. The next amendment of the Committee on Finance was, in paragraph 104, after the word "unsilvered," at the end of line 20, on page 27, to strike out "looking-glass plates;" so as to read:

103. Cast polished plate glass, silvered or unsilvered, and cylinder, crown, or common window glass, silvered or unsilvered, when bent, ground, obscured, frosted, sanded, enameled, beveled, etched, embossed, engraved, flashed, stained, colored, painted, or otherwise ornamented or decorated, shall be subject to a duty of 10 per cent ad valorem in addition to the rates otherwise chargeable thereon.

The amendment was agreed to.

Mr. ALDRICH. I move to insert before the word "cylinder," in line 21 of that paragraph, the word "polished."

Mr. JONES of Arkansas. Where is that to come in?

Mr. ALDRICH. Before the word "cylinder," in line 21. I will give the Senator the whole amendment, so that he may understand it.

After the word "crown," in the same line, I move to insert "glass, silvered;" so as to read:

And polished cylinder crown glass, silvered, or common window glass, etc.

The purpose of that is that unsilvered crown glass shall not pay the additional 10 per cent.

Mr. JONES of Arkansas. I was going to offer an amendment, after the word "unsilvered," to cover that; but it may be that the amendment offered by the Senator from Rhode Island will cover it.

Mr. ALDRICH. I think the amendment I proposed covers it.

Mr. JONES of Arkansas. I was going to offer an amendment at that point.

Mr. ALDRICH. I think the amendment I propose will cover what the Senator desires. This only applies to polished silvered glass.

Mr. JONES of Arkansas. Let the amendment be stated from the desk.

The VICE-PRESIDENT. The amendment proposed by the Senator from Rhode Island [Mr. ALDRICH] will be stated.

The SECRETARY. In paragraph 104, line 21, page 27, before the word "cylinder," it is proposed to insert "polished;" and after the word "crown," in the same line, to insert "glass, silvered;" so as to read:

104. Cast polished plate glass, silvered or unsilvered, and polished cylinder crown glass, silvered, or common window glass, etc.

Mr. ALDRICH. I think that covers the ground.

Mr. JONES of Arkansas. I think that covers it.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Rhode Island [Mr. ALDRICH].

The amendment was agreed to.

Mr. ALDRICH. I do not propose to go on further with the bill to-night, as I understand Senators desire an executive session.

EXECUTIVE SESSION.

Mr. McMILLAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After eight minutes spent in executive session the doors were reopened, and (at 5 o'clock and 30 minutes p. m.) the Senate adjourned until Tuesday, June 1, 1897, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate May 29, 1897.

POSTMASTERS.

A. L. Thompson, to be postmaster at Springdale, in the county of Washington and State of Arkansas, in the place of Thomas J. Davis, resigned.

Samuel M. Griffin, to be postmaster at Quitman, in the county of Brooks and State of Georgia, in the place of Lewis L. Joiner, removed.

Robert N. Foster, to be postmaster at Gilman, in the county of Iroquois and State of Illinois, in the place of C. M. Wright, removed.

W. Morton Mills, to be postmaster at Ladoga, in the county of Montgomery and State of Indiana, in the place of John E. Talbott, resigned.

William W. Woods, to be postmaster at Wabash, in the county of Wabash and State of Indiana, in the place of John I. Hoover, removed.

Joseph A. McIntire, to be postmaster at Sidney, in the county of Fremont and State of Iowa, in the place of James A. McIntire, to correct error in name.

L. I. Sturgis, to be postmaster at Oelwein, in the county of Fayette and State of Iowa, in the place of Henry R. Martin, resigned.

Thomas H. Baker, to be postmaster at Louisville, in the county of Jefferson and State of Kentucky, in the place of Charles P. Weaver, resigned.

Elwyn J. Barrow, to be postmaster at St. Francisville, in the parish of West Feliciana and State of Louisiana, in the place of Francis M. Mumford, removed.

Winslow Gray, to be postmaster at Campello, in the county of Plymouth and State of Massachusetts, in the place of Walter L. Keith, deceased.

A. M. Chisholm, to be postmaster at Hibbing, in the county of St. Louis and State of Minnesota, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1897.

William D. Ellsworth, to be postmaster at Eveleth, in the county of St. Louis and State of Minnesota, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1897.

Peter C. Van Matre, to be postmaster at Warrensburg, in the county of Johnson and State of Missouri, in the place of James W. Williams, removed.

Ada M. Bennett, to be postmaster at Miles City, in the county of Custer and State of Montana, in the place of Emerson S. Beeman, removed.

Charles Burg, to be postmaster at Livingston, in the county of Park and State of Montana, in the place of Joseph E. Swindlehurst, whose commission expired March 23, 1897.

Fred W. Kiefer, to be postmaster at Antigo, in the county of Langlade and State of Wisconsin, in the place of Paul J. Millard, whose commission expired March 23, 1897.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 29, 1897.

CONSULS.

Max Bouchsein, of Illinois, to be consul of the United States at Barmen, Germany.

Ferdinand W. Neumann, of Illinois, to be consul of the United States at Cologne, Germany.

APPOINTMENT IN THE NAVY.

Thaddius S. K. Freeman, a citizen of Indiana, to be a chaplain.

PROMOTIONS IN THE ARMY.

General officers.

Col. James Franklin Wade, Fifth Cavalry, to be brigadier-general.

Col. John Kemp Mizner, Tenth Cavalry, to be brigadier-general.

Col. William Montrose Graham, Fifth Artillery, to be brigadier-general.

INDIAN AGENT.

Lucius A. Wright, of San Jacinto, Cal., to be agent for the Indians of the Mission Tule River Agency, in California.

COLLECTOR OF CUSTOMS.

Alexander R. Avery, of Michigan, to be collector of customs for the district of Huron, in the State of Michigan.

POSTMASTERS.

Albert L. Jurden, to be postmaster at Marshall, in the county of Saline and State of Missouri.

Arthur D. Patterson, to be postmaster at Cresco, in the county of Howard and State of Iowa.

P. D. McMahon, to be postmaster at Charter Oak, in the county of Crawford and State of Iowa.

E. E. Buell, to be postmaster at Elma, in the county of Howard and State of Iowa.

Edward U. Fordyce, to be postmaster at Bowling Green, in the county of Warren and State of Kentucky.

Henry D. Bonnet, to be postmaster at Del Rio, in the county of Valverde and State of Texas.

Marcellus L. Hussey, to be postmaster at Guilford, in the county of Piscataquis and State of Maine.

Kate E. Moore, to be postmaster at Geneseo, in the county of Henry and State of Illinois.

HOUSE OF REPRESENTATIVES.

MONDAY, *May 31, 1897.*

The House met at 12 o'clock noon.

The Chaplain, Rev. HENRY N. COUDEN, offered the following prayer:

O Thou who hast compassed all the path of our lives, we thank Thee for that Providence which abides through every change, and through which we are indebted for our homes and all that makes them dear; for our nation and all its sacred institutions. May this day, sacred to the memory of those who gave their lives for the land they loved, serve to deepen our patriotism, strengthen our loyalty, and make firmer our union, that it may abide through all time and be a blessing to untold generations.

Let Thy blessing, O God our Father, come upon the Representatives of this House, to strengthen them and give them wisdom, that they may adjust every question in accordance with Thy will.

Be especially with the member who is ill. Strengthen and comfort him. Grant that his life may be spared, and that he may soon be in his accustomed place.

Hear us in these, our petitions, in the name of Jesus Christ our Lord. Amen.

The Journal of the proceedings of Thursday last was read.

The SPEAKER. Without objection, the Journal will be considered as approved.

Mr. LEWIS of Washington. Mr. Speaker, I rise with reference to the Journal.

Mr. SMITH of Kentucky. I notice that the Clerk has registered me as not voting on the motion to table the appeal taken by the gentleman from Washington [Mr. LEWIS]. On the second call I voted "no" on that proposition, and I desire to have my vote so registered.

Mr. HENRY of Texas. Mr. Speaker, I am recorded as not voting on the same proposition. I voted "no," and desire to have the Journal so corrected.

The SPEAKER. The corrections will be made.

Mr. LEWIS of Washington. Mr. Speaker, respecting the Journal, I desire at this time, previous to its approval, to make my protest against any assumption on the part of this House to approve the Journal, on the ground that there is no constitutional House that can legally approve the Journal, and if there were, it could not legally approve it at this time, in view of the nature, kind, and form of the adjournment which was taken on Thursday last. In view of the day and of the engagements of members, I do not intend to nor shall I elaborate my objection, but merely make it that I may reserve it for such future instances as may arise when it shall be appropriate.

The SPEAKER. The Journal will be considered as approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed bills and joint resolution of the following titles; in which the concurrence of the House was requested:

A bill (S. 1258) to regulate, in the District of Columbia, the disposal of certain refuse, and for other purposes;

A bill (S. 471) relating to the adulteration of foods and drugs in the District of Columbia; and

Joint resolution (S. R. 45) authorizing the Secretary of War to use rations for the relief of destitute persons in the district overflowed by the Rio Grande River at and near El Paso, Tex.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 16) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, and for other purposes.

THE PUBLIC PRINTING.

Mr. CANNON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate joint resolution 44, which makes an appropriation to supply a deficiency for work in the Printing Office. I will state that I shall be glad to have it disposed of to-day, as with the expiration of this day the appropriations for work in that office are exhausted.

Mr. RICHARDSON. I should like to ask the gentleman if this amount is provided for in the general deficiency bill?

Mr. CANNON. In the general deficiency bill, passed by the House about the 20th of March, this exact appropriation is made.

Mr. RICHARDSON. I ask the gentleman from Illinois if he thinks this is a proper mode of legislation? We have already taken one item out of the deficiency bill and passed that, and now we are called upon for unanimous consent to pass another piecemeal item that is in the general deficiency bill.

Mr. CANNON. I would say to the gentleman that this House performed its full duty about the 20th of March in passing a general deficiency appropriation bill that contained items of some $8,000,000 or $9,000,000 for the public service. That went to the Senate——

Mr. TERRY. I would like to ask the gentleman a question.

Mr. CANNON. Wait until I make this statement. That went to the Senate about the 20th of March. That bill has not been acted upon by the Senate. Now, then, in presence of the fact that the appropriation for the Printing Office, with its great block of employees, is exhausted, owing to the special session of Congress, in publishing the RECORD and doing other public printing, the Senate has seen proper to pass this resolution, that takes one item out of the general deficiency bill and passes it and sends it to the House.

Now, so far as I am individually concerned, I will not raise the question of the right of the Senate to originate an appropriation bill, as they send us this single item, but consider it substantially, if you choose, in the nature of an amendment to the deficiency bill, as it takes but one item; and in presence of the fact that the work can not go on unless this appropriation is made——

Mr. RICHARDSON. I should like to ask the gentleman one question.

Mr. SIMPSON of Kansas. Mr. Speaker, I think I can save time. I suggest to the gentleman from Illinois that I shall have to object to the passage of this resolution. I understand there is going to be a motion to take a recess until to-morrow out of respect to the dead, being Memorial Day, and therefore I think that it should not be considered until then.

The SPEAKER. The gentleman objects.

FOREST LANDS.

The SPEAKER laid before the House the following message of the President of the United States; which was read, referred to the Committee on the Public Lands, when appointed, and ordered to be printed:

To the Senate and House of Representatives:

I transmit herewith, for the information of the Congress, the report of the committee appointed by the National Academy of Sciences upon the inauguration of a forest policy for the forested lands of the United States.

WILLIAM MCKINLEY.

EXECUTIVE MANSION, *May 25, 1897.*

RECESS.

Mr. DINGLEY. Mr. Speaker, I move that the House take a recess until 12 o'clock Tuesday.

Mr. STEPHENS of Texas. Will the gentleman permit me——

Mr. DINGLEY. Objection has been made to unanimous consent, and I hardly think it is worth while to bring up that matter.

Mr. LANHAM. Will the gentleman yield to my colleague?

The question was taken on the motion of Mr. DINGLEY.

LEAVE OF ABSENCE.

Pending the announcement, by unanimous consent, leave of absence was granted as follows:

To Mr. STRODE of Nebraska, indefinitely, on account of important business.

To Mr. HINRICHSEN, for two weeks, on account of important business.

To Mr. FITZPATRICK, indefinitely, on account of pressing business.

To Mr. CONNELL, for ten days, on account of important business.

To Mr. BLAND, indefinitely, on account of important business.

To Mr. COONEY, indefinitely, on account of important business.

To Mr. MIERS of Indiana, indefinitely, on account of important business.

To Mr. BURTON, indefinitely, on account of important business.
To Mr. STEWART of Wisconsin, indefinitely, on account of sickness.
To Mr. MARSH, indefinitely, on account of important business.
To Mr. ELLIOTT, indefinitely, on account of important business.

RESIGNATION OF HON. JOHN L. M'LAURIN.

The SPEAKER laid before the House the following letter:

WASHINGTON, D. C., *May 31, 1897.*

DEAR SIR: Having been appointed to the United States Senate, I have notified the governor of South Carolina of my resignation as a member of the House of Representatives, said resignation to take effect June 1, at 12 o'clock m.

I have the honor to be, very respectfully,

JOHN L. McLAURIN,
Representative Sixth Congressional District of South Carolina.

Hon. THOMAS B. REED,
Speaker of the House of Representatives, Washington, D. C.

[Applause.]

The motion to take a recess was then agreed to; and accordingly (at 12 o'clock and 15 minutes p. m.), the House was declared in recess until to-morrow at 12 o'clock m.

SENATE.

TUESDAY, *June 1, 1897.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The Journal of the proceedings of Saturday last was read and approved.

SENATOR FROM SOUTH CAROLINA.

Mr. TILLMAN. I present the credentials of John Lowndes McLaurin, appointed by the governor of South Carolina a Senator from that State to fill, until the next meeting of the legislature, the vacancy caused by the death of Hon. Joseph H. Earle in the term commencing March 4, 1897.

The credentials were read and ordered to be filed.

Mr. TILLMAN. Mr. McLaurin is present and ready to take the oath of office.

The VICE-PRESIDENT. If there be no objection, the Senator appointed will be escorted to the desk of the Vice-President and take the oath of office.

Mr. McLaurin was escorted to the Vice-President's desk by Mr. TILLMAN, and the oath prescribed by law having been administered to him, he took his seat in the Senate.

LAWS OF NEW MEXICO.

The VICE-PRESIDENT laid before the Senate copies of the laws of the Territory of New Mexico, in accordance with section 1844 of the Revised Statutes of the United States; which were referred to the Committee on Territories.

PETITIONS AND MEMORIALS.

Mr. SEWELL. I present a petition, numerously signed by window-glass workers of the city of Bridgeton, N. J., praying that the McKinley duty on common window glass be restored. As the matter is before the Senate for consideration, I desire to read the reasons given by the petitioners for their petition. It is very short:

We, the window-glass workers of America, do hereby earnestly petition your honorable body to restore the McKinley duty on common window glass. Under the McKinley tariff our members had employment with good wages. Immediately after the passage of the Wilson tariff bill we were compelled to accept wage reductions ranging from 22½ to 38 per cent. If the tariff is advanced, our wages go up in proportion. If the McKinley rates are restored, our wages will go up as high as they were under that tariff.

A reduction of duty does not lessen the cost to the consumer; the improved method of manufacturing window glass in this country has done more to lessen the cost to the consumer than anything else. The only people benefited by a reduction of the duty on window glass are the jobbers and importers in this country and the foreign manufacturers and foreign workmen.

We herewith insert a part of our wage agreement that is signed by the manufacturers and workmen:

"If a tariff bill passes which gives an increase in existing tariff schedule on window glass of 15 per cent, then the manufacturers shall pay the single-strength blowers and gatherers an advance of 10 per cent and the double-strength blowers and gatherers an advance of 5 per cent on the amount of money they earn, said advance of wages to commence sixty days after the law goes into effect, the wages of flatteners and cutters to remain unchanged. If any tariff law passes providing for a smaller increase than 15 per cent, the wages of single and double strength blowers and gatherers shall be advanced proportionately to the increase above provided. If any other bill passes during the term of this agreement increasing the tariff on window glass over 15 per cent, then the manufacturers shall pay a corresponding advance."

I move that the petition lie on the table.

The motion was agreed to.

Mr. SEWELL. I also present a petition of the Sterling Silk Company and 8 other prominent silk manufacturers of Paterson, N. J., praying that adequate protection be given to the Jacquard designers in silk. As this matter is still under consideration by the Committee on Finance, I move that the petition be referred to that committee.

The motion was agreed to.

Mr. SEWELL presented petitions of Asa R. Merrell and 16 other citizens of Dunellen, of W. H. Kuhlthan and 32 other citizens of Milltown, of James T. Phillips and 127 other citizens of Elizabeth, Henry W. Stanley and 34 other citizens of Pennsville, C. Allen Eli and 15 other citizens of Millstone Township, James F. Mapes and 48 other citizens of Glassboro, W. H. Letts and 57 other citizens of Waretown, Ada Eiseman and 69 other citizens of Waretown, J. M. Ayres and 130 other citizens of Millburn, William P. Teed and 19 other citizens of Livingston, W. J. Newman and 77 other citizens of Neptune Township, Andrew G. Apgar and 50 other citizens of Elizabeth, George H. Kupfrian and 61 other citizens of Jersey City, and of William A. Jones and 49 other citizens of Barnegat, all in the State of New Jersey, praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

Mr. TURPIE presented a memorial of the Dan Talmage's Sons Company, of New York City, relative to the duty on rice; which was referred to the Committee on Finance.

He also presented the memorial of Charles A. Sykes, of New York City, relative to the duty on artificial teeth; which was referred to the Committee on Finance.

He also presented a memorial of the Chicago (Ill.) Drapers and Tailors' Exchange, relative to the duty on wearing apparel; which was referred to the Committee on Finance.

He also presented a memorial of the Artificial Flower Manufacturers' Association of the United States, relative to the duty to be placed on artificial flowers; which was referred to the Committee on Finance.

Mr. MITCHELL presented a petition of sundry wholesale liquor dealers of Milwaukee, Wis., praying for a reduction of the internal-revenue tax on distilled spirits, and also for a shorter bonded period; which was ordered to lie on the table.

He also presented a memorial of the James E. Patton Company, of Milwaukee, Wis., remonstrating against an increase of the duty on plate glass; which was ordered to lie on the table.

Mr. WHITE presented a petition of sundry citizens of Lompoc, Cal., praying for the imposition of a duty on mustard seed; which was ordered to lie on the table.

He also presented the memorial of Rev. Owen Jones, of Oakland, Cal., remonstrating against the passage of the so-called Dingley tariff bill; which was ordered to lie on the table.

He also presented a memorial of sundry citizens of California, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. VEST presented a memorial of the Liquor Dealers' Benevolent Association of Missouri, remonstrating against the imposition of an additional tax on beer; which was ordered to lie on the table.

Mr. GALLINGER presented the petition of A. D. Dennison and 13 other citizens of New Boston, N. H., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. McMILLAN presented a petition of the Michigan Woman's Christian Temperance Union, praying for the passage of the so-called kinetoscope bill; which was ordered to lie on the table.

He also presented sundry memorials of business men of Michigan, remonstrating against the enactment of a tariff bill levying a duty of $2 per thousand feet on lumber; which were ordered to lie on the table.

Mr. MASON. I present a petition from the executive committee of the National Business League, praying for the speedy passage of the pending tariff bill. I ask that the petition may be read for the information of the Senate.

The petition was read, and referred to the Committee on Finance, as follows:

To the Senate of the United States:

We respectfully represent that, after a careful canvass of business men in different parts of the country, we are satisfied that the business of the country is especially suffering on account of the uncertainty as to the termination and final results of pending tariff legislation; and that every week of delay in the settlement of tariff duties not only intensifies the present situation and inflicts enormous loss on general business interests, but is greatly retarding the date of recovery, as indicated in some measure by current custom-house records.

While we assume that you are proceeding in such manner as you deem will best subserve the public good, we believe you will not consider it improper or discourteous for us to indicate to you what we have ascertained, through the channels of information at the command of our organization, to be the opinion of business men generally, and to express to you their urgent desire that there be immediate and effective action in this matter.

Respectfully submitted.

FERDINAND W. PECK,
ELBRIDGE G. KEITH,
JOHN W. ELA,
MOSES P. HANDY,
BENJAMIN J. ROSENTHAL,
ALEXANDER H. REVELL,
WILLIAM A. GILES,
Executive Committee of National Business League.

Mr. FAULKNER presented the petition of D. E. Stewart and 20 other citizens of Guyandot, W. Va., and the petition of James A. Nixon and 45 other citizens of Boothsville, W. Va., praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

Mr. HALE presented the memorial of Alger V. Currier and sundry other artists of Maine, remonstrating against the imposition of a duty on foreign works of art; which was ordered to lie on the table.

DEFICIENCY APPROPRIATIONS.

Mr. HALE presented a communication from the Secretary of the Treasury, recommending that provision be made in the general deficiency appropriation bill for payment of amounts found due by the accounting officers of the Treasury on account of items not heretofore reported to Congress, aggregating $61,699.72; which was referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES.

Mr. WALTHALL, from the Committee on Revolutionary Claims, to whom was referred the joint resolution (S. R. 36) to carry into effect two resolutions of the Continental Congress directing monuments to be erected to the memory of Gens. Francis Nash and William Lee Davidson, of North Carolina, reported it without amendment, and submitted a report thereon.

REPORT OF LIBRARIAN OF CONGRESS.

Mr. WETMORE submitted the annual report of the Librarian of Congress, exhibiting the progress of the Library during the calendar year 1896; which was ordered to lie on the table.

He also, from the Committee on the Library, reported the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the annual report of the Librarian of Congress be printed, and that 500 copies, with covers, be printed for distribution by the Librarian.

BILLS POSTPONED INDEFINITELY.

Mr. COCKRELL. I ask that the Committee on Pensions shall be discharged from the further consideration of the bill (S. 314 granting a pension to Henry Farmer, because Senate bill 304 was previously introduced and is to the same effect. I also ask that the Committee on Pensions shall be discharged from the further consideration of the bill (S. 316) granting a pension to James M. Ray, because a former bill, Senate 286, for the same purpose is pending.

The VICE-PRESIDENT. The Chair hears no objection, and the committee will be discharged from the further consideration of the bills indicated.

Mr. COCKRELL. I move that these two bills, Senate bill 314 and Senate bill 316, be indefinitely postponed.

The motion was agreed to.

Mr. COCKRELL. I also move that the bill (S. 341) for the relief of Simon Wolfe, of Shelbina, Shelby County, Mo., be indefinitely postponed, as Senate bill 251, for the same purpose, has already passed the Senate and is pending in the House.

The motion was agreed to.

BILLS INTRODUCED.

Mr. FAIRBANKS introduced a bill (S. 2053) to remove the charge of desertion from the record of F. W. Zickendrath, of Greensburg, Ind.; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. PETTIGREW introduced a bill (S. 2054) to reward certain Sioux Indians for the rescue of white captives and their compensatory payment of ponies; which was read twice by its title, and referred to the Committee on Indian Affairs.

He also introduced a bill (S. 2055) to provide for the submission of certain questions to the legal voters of the United States of America and to provide for an election thereon; which was read twice by its title, and referred to the Committee on the Judiciary.

Mr. BERRY introduced a bill (S. 2056) for the relief of Samuel Evans; which was read twice by its title, and referred to the Committee on Claims.

He also introduced a bill (S. 2057) for the relief of Martha A. Lanford; which was read twice by its title, and referred to the Committee on Claims.

Mr. McBRIDE introduced a bill (S. 2058) removing the charge of desertion from the name of Frederick Mueller, who served as a private in Company I, Twentieth New York Volunteer Infantry; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. PERKINS introduced a bill (S. 2059) to authorize a retired list for enlisted men and appointed petty officers of the United States Navy; which was read twice by its title, and referred to the Committee on Naval Affairs.

Mr. SPOONER introduced a bill (S. 2060) granting a pension to Olive W. Lay; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

Mr. MASON introduced a bill (S. 2061) providing for the appointment of an additional circuit judge in the seventh judicial circuit, and of an additional district judge in the northern district of Illinois; which was read twice by its title, and referred to the Committee on the Judiciary.

AMENDMENTS TO DEFICIENCY APPROPRIATION BILL.

Mr. WHITE submitted two amendments intended to be proposed by him to the deficiency appropriation bill; which were referred to the Committee on Appropriations, and ordered to be printed.

Mr. FAULKNER submitted an amendment intended to be proposed by him to the deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. STEWART submitted an amendment intended to be proposed by him to the deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

AMENDMENTS TO THE TARIFF BILL.

Mr. DAVIS submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and to be printed.

Mr. PRITCHARD submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the following joint resolutions:

A joint resolution (S. R. 43) in amendment of the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India; and

A joint resolution (S. R. 44) making an appropriation to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897.

SALE OF POISONS IN THE DISTRICT OF COLUMBIA.

The VICE-PRESIDENT. The morning business appears to be closed. The Calendar under Rule VIII is in order. The Secretary will report the first bill on the Calendar.

The SECRETARY. A bill (S. 470) to regulate the sale of poisons in the District of Columbia.

Mr. ALDRICH. I object to the consideration of that bill, and ask that the Senate proceed to the consideration of House bill No. 379.

The VICE-PRESIDENT. The bill will lie over, under objection. The Senator from Rhode Island asks that the Senate proceed to the consideration of the tariff bill.

THE TARIFF BILL.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. ALDRICH. In accordance with the notice I gave on Saturday, I ask that we now take up paragraphs 90 and 91 for consideration.

The SECRETARY. The Committee on Finance reported to strike out paragraph 90 and insert a substitute.

Mr. ALDRICH. The committee withdraw their amendment to that paragraph.

The VICE-PRESIDENT. The paragraph will be read as it stands in the bill.

The Secretary read the paragraph, as follows:

90. China, porcelain, parian, bisque, earthen, stone, and crockery ware, including clock cases with or without movements, plaques, ornaments, toys, toy tea sets, charms, vases, and statuettes, painted, tinted, stained, enameled, printed, gilded, or otherwise decorated or ornamented in any manner, 60 per cent ad valorem; if plain white and without superadded ornamentation of any kind, 55 per cent ad valorem.

Mr. ALDRICH. I suggest striking out in the paragraph, in the seventh and eighth lines, on page 18, the words "including clock cases with or without movements." These words, if allowed to remain here, will fix a higher rate than is proposed elsewhere in the bill for clock cases.

The VICE-PRESIDENT. The amendment now moved by the Senator from Rhode Island will be stated.

The SECRETARY. In lines 7 and 8, on page 18, paragraph 90, after the word "ware," strike out the words "including clock cases with or without movements."

Mr. JONES of Arkansas. Where is that clause?

Mr. ALDRICH. In paragraph 90, as it came from the House, on page 18. The committee withdraw their amendment, or ask that it be disagreed to.

Mr. JONES of Arkansas. In what line?

Mr. ALDRICH. In lines 7 and 8. The purpose is to allow clocks and clock cases to be dutiable at 40 per cent.

Mr. JONES of Arkansas. There is some mistake about the location of the amendment.

The SECRETARY. In lines 7 and 8, page 18, paragraph 90, after the word "ware," strike out the words "including clock cases, with or without movements."

Mr. JONES of Arkansas. It is all right.

The VICE-PRESIDENT. Is there any objection to this amendment? The Chair hears none, and the amendment is agreed to.

Mr. ALDRICH. It is understood that the amendment suggested by the committee to paragraph 90 will be disagreed to.

The VICE-PRESIDENT. The Senator from Rhode Island asks that the item may stand as the bill came from the House, with the exception of the clause just stricken out.

Mr. JONES of Arkansas. The committee withdraw their amendment?

Mr. ALDRICH. The committee withdraw their amendment.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and the amendment of the committee proposing a substitute for the paragraph is withdrawn.

Mr. ALDRICH. We take the same course with paragraph 91.

Mr. JONES of Arkansas. I wish to offer an amendment or two to paragraph 90 before we leave it.

Mr. ALDRICH. All right.

Mr. JONES of Arkansas. In paragraph 90, page 18, line 12, I move to strike out "sixty" and insert "thirty-five." I suppose I may as well move another amendment to the paragraph at the same time. In line 14, I move to strike out "fifty-five" and insert "thirty." We may as well have the vote taken on both amendments.

The VICE-PRESIDENT. The question is on agreeing to the two amendments of the Senator from Arkansas, which will be stated.

The SECRETARY. In paragraph 90, page 18, line 12, before the words "per centum," strike out "sixty" and insert "thirty-five," and in line 14, before the words "per centum," strike out "fifty-five" and insert "thirty;" so as to make the paragraph read:

90. China, porcelain, parian, bisque, earthen, stone, and crockery ware, plaques, ornaments, toys, toy tea sets, charms, vases and statuettes, painted, tinted, stained, enameled, printed, gilded, or otherwise decorated or ornamented in any manner, 35 per cent ad valorem; if plain white and without superadded ornamentation of any kind, 30 per cent ad valorem.

Mr. JONES of Arkansas. I ask for the yeas and nays on this proposition.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. QUAY (when his name was called). Has the Senator from Alabama [Mr. MORGAN] voted?

The VICE-PRESIDENT. He has not voted.

Mr. QUAY. Then I will withhold my vote. If the Senator from Alabama were present, he would vote "yea" and I should vote "nay."

Mr. WILSON (when his name was called). I have a general pair with the senior Senator from Florida [Mr. PASCO]. If he were present, he would vote "yea" and I should vote "nay."

The roll call was concluded.

Mr. FAULKNER (after having voted in the affirmative). I inadvertently voted. I am paired with the Senator from West Virginia [Mr. ELKINS], and I understand he has not voted. I therefore feel that on this question I should withdraw my vote.

Mr. BURROWS (after having voted in the negative). I inquire if the senior Senator from Louisiana [Mr. CAFFERY] has voted?

The VICE-PRESIDENT. The senior Senator from Louisiana has not voted.

Mr. BURROWS. I withdraw my vote.

Mr. BATE. I wish to announce the absence of my colleague [Mr. HARRIS of Tennessee]. He is paired, however, with the Senator from Vermont [Mr. MORRILL]. I make the announcement for the day.

The result was announced—yeas 23, nays 34; as follows:

YEAS—23.

Bacon,	Harris, Kans.	Mills,	Tillman,
Bate,	Heitfeld,	Mitchell,	Turpie,
Berry,	Jones, Ark.	Murphy,	Vest,
Chilton,	Lindsay,	Pettus,	Walthall,
Clay,	McLaurin,	Rawlins,	White.
Cockrell,	Mallory,	Roach,	

NAYS—34.

Aldrich,	Fairbanks,	McBride,	Proctor,
Allison,	Foraker,	McEnery,	Sewell,
Baker,	Frye,	McMillan,	Shoup,
Cannon,	Gallinger,	Mason,	Spooner,
Carter,	Gear,	Nelson,	Thurston,
Chandler,	Hale,	Perkins,	Warren,
Clark,	Hanna,	Platt, Conn.	Wetmore.
Davis,	Hawley,	Platt, N. Y.	
Deboe,	Lodge,	Pritchard,	

NOT VOTING—33.

Allen,	George,	Kyle,	Quay,
Burrows,	Gorman,	Mantle,	Smith,
Butler,	Gray,	Martin,	Stewart,
Caffery,	Hansbrough,	Morgan,	Teller,
Cullom,	Harris, Tenn.	Morrill,	Turner,
Daniel,	Hoar,	Pasco,	Wellington,
Elkins,	Jones, Nev.	Penrose,	Wilson,
Faulkner,	Kenney,	Pettigrew,	Wolcott.

So the amendments were rejected.

Mr. VEST. Does the Senator from Rhode Island propose any other amendment of this paragraph?

Mr. ALDRICH. No, sir; not to paragraph 90.

Mr. VEST. Before we pass from the paragraph, I wish to call attention to the effect of these changes and to the effect of the other amendments proposed by the majority of the Finance Committee.

On the first classification the comparative statement estimates the duties to be from 27 to 57 per cent instead of 30 per cent, as in the Wilson bill. Under the amendment which has been adopted there is an increase, of course, over the provision as originally proposed by the Finance Committee.

Upon the next classification, where the McKinley Act imposed 60 per cent and the House bill and the Senate committee originally proposed 1 cent a pound and 20 per cent ad valorem, the duties were from 33 per cent to 56 per cent, and under the amendment just adopted, proposed by the Senator from Rhode Island, the duty becomes 60 per cent.

On the next classification the duties are from 29 to 69 per cent; that is, upon printed, gilded, and other ware of that description. Under the McKinley Act the rate was 60 per cent, and under the Wilson Act 35 per cent.

On the next classification, found in line 9, upon all other wares of this kind not specially provided for, there is an increase over the Wilson Act of 15 per cent.

I suppose it is entirely useless to read the statements of merchants in the United States engaged in importing these wares and in selling them by retail. I have a large number of such communications, and they all are to one effect—that the duties under the Dingley bill and under the Senate amendments are absolutely prohibitory upon an article of prime necessity, upon undecorated, untinted, unpainted ware, which goes into the homes of the humblest citizen in the land. It will be absolutely impossible to import any of it from abroad, and it gives the market entirely to the American manufacturers.

The VICE-PRESIDENT. Paragraph 91 will be read.

The Secretary read as follows:

91. All other china, porcelain, parian, bisque, earthen, stone, and crockery ware, and manufactures thereof, or of which the same is the component material of chief value, by whatever name known, not specially provided for in this act, if painted, tinted, stained, enameled, printed, gilded, or otherwise decorated or ornamented in any manner, 60 per cent ad valorem; if not ornamented or decorated, 55 per cent ad valorem.

The VICE-PRESIDENT. The amendment of the Committee on Finance, proposing a substitute for this paragraph, has been withdrawn.

Mr. JONES of Arkansas. On page 19, line 24, in the paragraph just read, I move to strike out "sixty" and insert "thirty-five;" and to strike out "fifty-five," in line 25 of the same paragraph, and insert "thirty;" so as to read:

91. All other china, porcelain, parian, bisque, earthen, stone, and crockery ware, and manufactures thereof, or of which the same is the component material of chief value, by whatever name known, not specially provided for in this act, if painted, tinted, stained, enameled, printed, gilded, or otherwise decorated or ornamented in any manner, 35 per cent ad valorem; if not ornamented or decorated, 30 per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Arkansas.

Mr. JONES of Arkansas. This motion to amend is to maintain the present rates on crockery and china ware just as the amendment moved by me proposed to do the same in paragraph 90. Of course I recognize the fact that no amount of argument will change the will of the majority in their determination to impose increased rates on this article of common necessity—an article that enters into the homes of all the people of the country. At the same time I think it is due to the Senate and due the cause that the facts shall be clearly and distinctly stated, so that we may all understand just what it is we are doing.

I hold in my hand a letter from a large importer in New York. While I will not read the whole of it, I will read enough to present some of the most striking facts in this connection:

I inclose two authorized reports in the Crockery and Glass Journal, one relating to the Warwick China Company and the other to Knowles, Taylor & Knowles Company. The firms mentioned are among the largest in the United States.

I also beg to hand you inclosed price list, marked Exhibit 4, showing you the exact relation of prices between American and English manufacturers. From this you will readily see that American goods are sold from 10 per cent upward below the corresponding imported ware, a fact which you will find corroborated by every wholesaler and retailer in the United States.

In the inclosed brief I referred to the protection given to the American manufacturers by natural conditions, such as inland freight, shipping

charges, ocean freight, marine insurance, and the value of cases, crates, or barrels, for which the importer has to pay full price, but which become useless after entering this country, while the barrels used by American manufacturers can always be used for the full value.

These necessary expenses, as enumerated above, including the present rate of duty of 30 per cent on white china and earthenware and 35 per cent on colored china and earthenware, give the American potters the following protection against imported goods:

	Per cent.
1. On enameled and gilt earthenware	56
2. Enameled and gilt-handled earthenware	56.7
3. Printed earthenware	62.5
4. White granite ware	60
5. Printed cheap dinner sets	75
6. Cups and saucers	67
7. Children's drinking mugs	75
8. Fruit plates	69
9. Toy tea sets	92
10. Bohemian dinner sets	60
11. Cuspidores	96

I repeat, these figures represent the protection the American manufacturers enjoy under the prevailing tariff rates, and in order to demonstrate how I derive these figures I beg to hand inclosed a number of calculations, showing the actual cost of each and every item. And now it is proposed to raise the protection by tariff from 30 and 35 per cent to from 50 to 121 per cent additional.

In the brief referred to by this correspondent he says:

As dealers in foreign and domestic wares we desire to state that the largest volume of imported earthenware and glassware consists of cheap staple goods, consumed by the masses and representing necessities of life, not luxuries. In earthenware the largest percentage consists in cheap English dinner sets of plain and printed earthenware. These goods are sold at prices which put them at the reach of every wage earner. The next in prices are German and Bohemian cups, saucers, and plates, which are sold at prices which exclude any possibility of their being luxuries. They are found in every home in the land; in some places plain, in others with gold bands, and in others with cheap decoration. These two classes constitute, at a low estimate, fully 70 per cent of the total importation of earthenware and china. There is a certain amount of high-priced decorated china imported which could be classified as a luxury, but the volume is very small in comparison with the transactions in staple goods, and it would be a serious tax upon the wage earner if he should be forced to pay an excessive price on his necessities in order to make the few luxuries pay a maximum duty. In glassware the bulk of goods imported (we are not considering plate glass, bottles, or mirrors) consists of cheap water sets, blanks for American glass cutters, etc.

As we have passed from the consideration of the glass schedule, I will not read the remainder of that statement. Here is an authorized statement made by these manufacturing establishments, showing what they are doing under the present tax, and how they are succeeding under the present rates of 30 and 35 per cent. This is from the Warwick China Company, and was published in the Crockery and Glass Journal of January 7, 1897:

The Warwick China Company have a fine trade in hand, and the business so far is away ahead of that of last year. Their lines of dinner and toilet ware are in good request, while the novelties and specialties, all useful as well as ornamental, are in such great demand as to keep them busy and the decorating department going all the while. The Warwick struck a rich lead in some of the novelties they make, and the jardiniéres in flow blue, with gold touches, have been in better demand than they really looked for. With such encouraging trade now, they are going right along preparing new designs and shapes for the fall, and will add to the already large variety some new features that are certain to be great winners.

This is an authorized statement in a trade journal by one of the members of the concern, showing that they are prosperous under the present tariff act, and yet the Senate committee gives them a tax of 60 per cent additional protection, and this, too, when the importations of the ware amount to practically nothing, and when the present tax of 30 per cent is so much of a tax for protection as to prevent almost any competition with foreign wares, none but the higher grades coming in, for which excessive prices are paid.

What can be the purpose of giving this additional 30 per cent on this ware, except to enable the manufacturers to increase their prices 50 per cent, if they choose to do so, to render it impossible that such goods should be imported from abroad, and to carry the prices still higher, if it is their wish and desire?

The Wheeling Pottery Company is another company referred to, and it is said of that company:

The Wheeling Pottery Company have made a reputation that brings to them the greatest trade they ever handled. This year has so far been one of the most encouraging for this pottery in its history. The flow blue patterns in dinner ware are popular everywhere, while the jardiniéres and other specialties have brought to them the most flattering compliments and the best trade they ever had. The shipments from this pottery this season are immense, and they are adding features all the time that have the earmarks of progress upon them, while discarding some of the unprofitable business that has been carried on in the past. And all their goods are "made in America."

The Knowles, Taylor & Knowles Company have had a great month's business in April. Vitreous hotel china has been on the move at a lively rate. Several carloads are now being packed to fit out several large hotels in both the East and West. The goods are sold by jobbing houses, who take the orders direct from the hotel managers. Porcelain sales are good also. Last Saturday was "big pay" in East Liverpool, and the amount of money paid out by the Knowles, Taylor & Knowles Company was an enormous sum. It is reported that it was the heaviest pay roll since 1892, or within the last five years.

These are authorized statements which have been printed. I have a clipping from the journal to which I have referred, showing that there is absolutely no necessity for this wanton increase in a tax on the absolute necessaries of life. While all other classes of business are complaining of depression, and while the people everywhere are holding up their hands to Congress and asking that there shall be some legislation that will relieve the condition of present business depression, we propose to relieve the present distress, we propose to relieve the pressure on the homes of the poor, by increasing the rate on this article of prime necessity, this already prohibitory tax, to double what it is now.

Mr. Charles W. Franzheim, who was, I believe, a member of one of these concerns, made a statement which appears in the Wheeling Intelligencer. It is as follows:

The Wheeling Intelligencer on New Year's Day printed contributions from a number of distinguished people on various subjects, mainly industrial, and Mr. Charles W. Franzheim, president of the Wheeling Pottery Company, was asked to note the progress of Wheeling's potteries during the past year, and did so as follows:

"The year just ended has been a very remarkable one in the history of the Wheeling potteries. While many other industries have languished or been partially inoperative during the past few months, incident to the uncertainty of the political struggle so happily ended, the local manufacturers of pottery have had a very remarkable run.

"Although prices have been low and profits necessarily scant, owing to the reduction of almost 50 per cent in the tariff rates governing pottery, and while foreign manufacturers of pottery who cater to the American market have been partially employed, the potteries of Wheeling have manufactured and shipped more goods during the past twelve months than ever in their history during the same period of time.

"This fortunate condition of affairs did not exist, however, in all the ceramic centers of the United States, but was due locally to the fact that Wheeling is rapidly acquiring a reputation for its pottery products second to none in this or in any foreign country. It is with pardonable pride that we can say to-day that the stability of our wares, the beauty of our designs, and the highly artistic effects of our decorations have given Wheeling wares a prestige during the last few years that has created for her the splendid demand that has kept her potteries busy during the year just past.

"That the reader may form a comprehensive and general idea of the volume of business done in this line in this city during the past year, I have but to say that over 6,000 tons of crude materials have been worked over by 800 employees into not less than 8,000,000 pieces of ware.

"The year just ushered in will doubtless prove an equally busy one, especially as we anticipate some recognition from the next Congress in the shape of a moderate increase in tariff that will justify at least the continuance of present wages, and perhaps leave some margin of profit to those who have contributed to the operation of an industry of which the city of Wheeling can well feel proud."

That moderate increase that this gentleman anticipated while he was doing a prosperous business amounts to 100 per cent increase of tax upon an article of prime necessity. That is the way the Republican party responds to the request of the manufacturers of the country for a moderate increase in their rates of tariff, while they say themselves in their own published reports that they are prosperous and are doing a larger business than ever before under the law as it stands to-day. This is sufficient, it seems to me, Mr. President, to show the purpose of all these increases.

I have in my hand a number of calculations showing the necessary waste, loss, breakage, and expense of transportation in bringing these wares across the ocean, which shows that these people have now under the tariff rate of 30 per cent a real protection of from 60 to 80 per cent by reason of the conditions that surround the business; and yet we propose to increase the direct tax to 60 per cent besides these additional expenses, which will increase the tax to 100 per cent or possibly more.

The statement is as follows:

GERMAN CHINA.

Gold-band teacups and saucers:	
Case containing 40 dozen, value at factory	$16.28
Case and packing material (hay, etc.)	1.43
Duty under present law, 35 per cent on $17.71	6.20
Freight from factory to port and shipping charges	1.49
Sea freight	1.54
Cartage in New York and marine insurance	.29
Total cost of goods laid down in New York	27.23
Cost at foreign factory, $16.28.	
35 per cent duty and expenses, $10.95, or 67 per cent protection.	
60 per cent duty and expenses would be $15.38, or 95 per cent protection.	
Children's drinking mugs:	
Case containing 56 dozen, value at factory	$14.99
Case and packing	1.43
35 per cent duty on $16.42	5.75
Freight from factory to port and shipping charges	2.12
Sea freight	1.74
Cartage in New York	.25
Marine insurance	.04
Total cost, New York warehouse	26.32
Foreign factory value, $14.99.	
35 per cent duty and expenses, $11.35, or 75 per cent protection.	
60 per cent duty and expenses would be $15.43, or 103 per cent protection.	
Fruit plates, 18 centimeters:	
48 dozen in case, value at factory	$18.23
Case and packing	2.62
35 per cent on $20.90	7.32
Freight from factory to port and shipping charges	1.35
Sea freight	1.07
Cartage and marine insurance	.90
Total cost of goods laid down in New York	30.94
Value at factory, $18.23.	
35 per cent duty and expenses, $12.66, or 69 per cent protection.	
60 per cent duty and expenses would be $17.88, or 98 per cent protection.	

Children's toy tea sets:	
Case containing 6 dozen, value at factory	$18.14
Case and packing	2.80
35 per cent duty on $21	7.35
Freight from factory to port and shipping charges	2.42
Sea freight	3.85
Cartage in New York and marine insurance	.30
Total cost of goods laid down in New York	34.92

Foreign factory value, $18.14.
35 per cent duty and expenses, $10.78, or 92 per cent protection.
60 per cent duty and expenses would be $22.08, or 121 per cent protection.

BOHEMIAN GLASS.

Glass vases, opaque, decorated, 9 inches:	
Case contains 27 dozen, value at factory	$9.21
Case and packing	2.44
Duty, 40 per cent on $11.65	4.66
Freight from factory to port and shipping charges	2.59
Sea freight	4.28
Cartage and marine insurance	.28
Total cost of goods laid down at New York	23.46

Cost at foreign factory, $9.21.
40 per cent duty and expenses, $14.25, or 154 per cent protection.
60 per cent duty and expenses would be $16.58, or 180 per cent protection.

Glass water sets consisting of one pitcher and six tumblers, decorated crystal:	
Case contains 7 dozen, value at factory	$15.14
Case and packing	2.23
Duty, 40 per cent on $17.47	6.99
Freight from factory to port and shipping charges	1.54
Sea freight	2.90
Cartage and marine insurance	.30
Total cost of goods laid down at New York	29.20

Cost at foreign factory, $15.24.
40 per cent duty and expenses, $13.96, or 91 per cent protection.
60 per cent duty and expenses would be $17.45, or 114½ per cent protection.

BOHEMIAN CHINA.

86-piece tea set, Carlsbad ware:	
Cask contains 15 sets, value at factory	$28.62
Cask and packing	3.45
35 per cent duty on $32.07	11.22
Freight from factory to port and shipping charges	2.16
Sea freight	2.66
Cartage and marine insurance	.33
Total cost of goods laid down at New York	48.44

Value at factory, $28.62.
35 per cent duty and expenses, $19.82, or 69 per cent protection.
60 per cent duty and expenses would be $27.84, or 97 per cent protection.

I shall ask for the yeas and nays on the amendment.

Mr. SEWELL. Mr. President, I want to correct the impression that some of the Senators may have received from the statement made by the Senator from Arkansas [Mr. JONES].

The paragraphs to be voted upon are not satisfactory to the pottery interests in this country by any means. It has become apparent of late years that undervaluations are made to such an extent in the New York custom-house that, while nominally the duty may be 40, 60, or 70 per cent, it is cut down by undervaluation to 30 and 20 per cent, so as to be practically no protection at all. Under these circumstances, the manufacturers of pottery have endeavored to get the committee to report compound rates of specific and ad valorem, and the committee did so report on the advice of the experts of the Treasury Department, but, by reason of the attack made on this report and the statement that it covered up a very large duty, the committee have withdrawn their proposition and have come right down squarely to a duty of 50 and 60 per cent.

I have here a statement in relation to this business, a portion of which I shall read:

Previous to the enactment of the Wilson bill the industry was in a flourishing condition, distributing annually from $6,000,000 to $8,000,000 in wages, consuming materials mined and produced in almost every State east of the Mississippi, and also Missouri, Texas, and California.

The Wilson-Gorman bill reduced the rate on pottery from 55 per cent on white and 60 per cent on decorated ware, to 30 per cent on white ware and 35 per cent on decorated ware, the result being a greatly depressed condition of the industry, more so than of any other industry which that nefarious bill did not exterminate entirely.

Working but one-third of the time, our employees have become destitute and we are powerless to give them work. Many of the potteries have become insolvent, while during the past two years imports in our line have increased over $3,000,000, while the Government has lost in revenue over $3,000,000.

We believe and know that you are interested in the welfare of this, as well as all American manufacturing industries.

The Dingley bill as passed by the House indicates a willingness to give us the old McKinley rates. We appreciate what has been done, but the McKinley rates will not give us the McKinley conditions. Fifty-five and 60 per cent was satisfactory and adequate in 1890, but the business of importing earthenware and china has greatly changed during these seven years. In 1890 the Germans were making only fancy articles, cups, saucers, bonbon dishes, and the like, but were just commencing the manufacture of dinner and tea ware. They have made great strides in this direction, the German factories being owned and controlled largely by American importing houses, consigned only to themselves, and invoicing at whatever price they see fit to put upon the invoice, regardless of their actual value. So you see any ad valorem rate will not protect.

I shall not delay the Senate in going over the entire paper, but will give practical results. On a full investigation in relation to the ad valorem and the compound rates, it was some time before the parties interested and the Treasury experts could arrive at a compound rate which would be equal to the ad valorem and not above it. They had the privilege of the New York custom-house for several days and weighed a large number of packages. The result of their investigations is to be found in the paper I hold in my hand. For instance, on white earthenware, they weighed fifteen packages, which weighed 13,097 pounds, the value of which was $524.22, and on which the duty was $203.06, showing an ad valorem of 38¾ per cent under that proposed compound tax.

Next they took 25 packages, which weighed 23,606 pounds, the foreign value of which was $1,085.15 and the duty $453.11, showing an ad valorem of 41¾ per cent. Then they took 240 packages, the weight of which was 92,932 pounds, the foreign value of which was $12,569.49 and the duty $6,094.15, or an average ad valorem of 48½ per cent. So that none of the duties, except in the case of the 45 packages, was equivalent to an ad valorem duty of 56 per cent, and none of them came up to the duty that is now before the Senate.

I ask, Mr. President, that this statement may be printed as a part of my remarks.

The VICE-PRESIDENT. It will be so ordered, in the absence of objection.

The paper referred to is as follows:

TRENTON, N. J., *May 19, 1897.*

DEAR SIR: Knowing that with the multiplicity of your duties and responsibilities you have little time to look into the details of the pottery industry, we will state as briefly as possible our condition as manufacturing potters, our needs, and our desires. Previous to the enactment of the Wilson bill, the industry was in a flourishing condition, distributing annually from $6,000,000 to $8,000,000 in wages, consuming materials mined and produced in almost every State east of the Mississippi, and also Missouri, Texas, and California.

The Wilson-Gorman bill reduced the rate on pottery from 55 per cent on white and 60 per cent on decorated ware to 30 per cent on white ware and 35 per cent on decorated ware, the result being a greatly depressed condition of the industry, more so than of any other industry which that nefarious bill did not exterminate entirely.

Working but one-third of the time, our employees have become destitute, and we are powerless to give them work. Many of the potteries have become insolvent, while during the past two years imports in our line have increased over $3,000,000 while the Government has lost in revenue over $3,000,000.

We believe and know that you are interested in the welfare of this as well as all American manufacturing industries.

The Dingley bill as passed by the House indicates a willingness to give us the old McKinley rates. We appreciate what has been done, but the McKinley rates will not give us the McKinley conditions. Fifty-five and 60 per cent was satisfactory and adequate in 1890, but the business of importing earthenware and china has greatly changed during these seven years. In 1890 the Germans were making only fancy articles, cups, saucers, bonbon dishes, and the like, but were just commencing the manufacture of dinner and tea ware. They have made great strides in this direction, the German factories being owned and cohtrolled largely by American importing houses, consigned only to themselves, and invoicing at whatever price they see fit to put upon the invoice, regardless of their actual value, so you see any ad valorem rate will not protect.

The French are practically doing the same thing, having their agents in this country. The manufacturers ignore the law requiring the goods to be invoiced at the foreign market value at which the goods are freely offered for sale in said market, and are invoicing and paying duty at the factory cost price, being the undervaluation equivalent of from 25 to 30 per cent. From 1890 to 1893 the goods from England were invoiced correctly as to quality. They have since been able to undervalue, and are now bringing their goods in at grossly undervalued values as seconds and thirds.

We believe, and we have some of the best Government experts to fully agree with us, that the only way of having a duty honestly collected is by a change in the system, which change has been introduced in the Senate bill as reported by the committee, but the rates have been so reduced as to give us a very low ad valorem equivalent protection.

The following is an application of the rates as proposed by the Senate committee to actual importations of goods imported into this country and procured from custom-house records on a general assortment of earthenware and china, including dinner, tea, and toilet ware in sets and separate packages of single articles, such as plates, cups, saucers, vegetable dishes, etc.:

You will notice that the equivalent ad valorem is in all cases below the minimum named in the bill, with the exception of decorated German china. You will also remember that these figures are based on their undervalued invoices, and show a larger ad valorem equivalent than they would do if honestly invoiced at the foreign-market values:

White earthenware—Rate, three-fourths of a cent per pound and 20 per cent ad valorem:

Packages	15	Duty	$203.06
Weight	13,097	Equivalent ad valorem duty,	
Foreign value	$524.22	per cent	38¾

Printed earthenware—Rate, 1 cent per pound and 20 per cent ad valorem:

Packages	25	Duty	$453.11
Weight	23,606	Equivalent ad valorem duty,	
Foreign value	$1,085.15	per cent	41¾

Decorated earthenware—Rate, 1¼ cents per pound and 25 per cent ad valorem:

Packages	13	Duty	$365.73
Weight	8,908	Equivalent ad valorem duty,	
Foreign value	$839.71	per cent	43¾

White French china—Rate, 1½ cents per pound and 25 per cent ad valorem:

Packages	13	Duty	$204.77
Weight	5,231	Equivalent ad valorem duty,	
Foreign value	$505.25	per cent	40½

Decorated French china—Rate, 2½ cents per pound and 30 per cent ad valorem:

Packages	240	Duty	$6,094.15
Weight	92,932	Equivalent ad valorem duty,	
Foreign value	$12,569.49	per cent	48½

White German china—Rate, 1½ cents per pound and 25 per cent ad valorem:

Packages	16	Duty	$341.85
Weight	9,653	Equivalent ad valorem duty,	
Foreign value	$788.24	per cent	43½

Decorated German china—Rate, 2½ cents per pound and 30 per cent ad valorem:

Packages	45	Duty	$1,107.62
Weight	21,700	Equivalent ad valorem duty, per cent	56
Foreign value	$2,093.75		

We desire a restoration of the rates proposed by Colonel Tichenor (the customs expert for both the House and Senate committees), viz:

"Schedule B, 89. Common yellow, brown, and gray earthenware, plain, embossed, or salt-glazed common stoneware, chemical stoneware and crucibles, all the foregoing not decorated in any manner, 25 per cent ad valorem; Rockingham earthenware, 40 per cent ad valorem.

"90. Earthen, stone, and crockery ware, and manufactures of which these substances or either of them is the component material of chief value, not specially provided for in this act, including plaques, ornaments, toy tea sets and other toys, clock cases, charms, vases, statuettes, and other articles not ornamented or decorated in any manner, 1 cent per pound and 25 per cent ad valorem; if painted in one color only and not gilded, 1½ cents per pound and 25 per cent ad valorem; if tinted, stained, enameled, gilded, printed and gilded, printed and filled, or transferred or decorated by any mechanical process, 2 cents per pound and 30 per cent ad valorem; if hand painted, printed in gold, or otherwise ornamented or decorated in any manner and not herein specially provided for, 60 per cent ad valorem: *Provided*, That none of the articles enumerated in this paragraph shall pay a less rate of duty than 50 per cent ad valorem: *And provided further*, That the dutiable weight of the articles provided for in this paragraph shall be their gross weight in packed condition as imported, including the weight of crates, casks, boxes, or other coverings and packing material.

"91. China, porcelain, parian, and bisque ware, and manufactures of which these substances or either of them is the component material of chief value, not specially provided for in this act, including plaques, toy tea sets and other toys, clock cases, charms, vases, statuettes, and other articles not ornamented or decorated in any manner, 2½ cents per pound and 25 per cent ad valorem; if printed in one color only, and not gilded, 3½ cents per pound and 25 per cent ad valorem; if tinted, stained, enameled, gilded, printed and gilded, printed and filled, or transferred or decorated by any mechanical process, 4 cents per pound and 30 per cent ad valorem; if hand painted, printed in gold, raised gold or otherwise, or decorated in any manner not herein otherwise specially provided for, 60 per cent ad valorem: *Provided*, That none of the articles enumerated in this paragraph shall pay a less rate of duty than 55 per cent ad valorem: *And provided further*, That the dutiable weight of the articles provided for in this paragraph shall be their gross weight in packed condition as imported, including the weight of the crates, casks, boxes, or other coverings and packing material.

"92. Articles and wares composed wholly or in chief value of earthy or mineral substances, or carbon, not specially provided for in this act, if not decorated in any manner, 35 per cent ad valorem; if decorated, 45 per cent ad valorem."

We inclose herewith a condensed table, showing the rates on the various classes of goods as reported in the Senate bill, also a table of rates as recommended by Colonel Tichenor and desired by us as a necessity for the continuance of our business. Also another table showing the comparative duties on the imports above named under the Wilson, Dingley, Senate, and proposed rate. We add in brackets the equivalent and ad valorem percentage.

We most earnestly desire your valuable assistance in this matter, and we feel that the very existence of our industry depends upon a tariff compound in character and adequate in rate.

Condensed table of compound rates on china and earthenware.

As reported by the Senate Finance Committee, which are not sufficient.			As recommended by Colonel Tichenor, which we desire and are necessary for our business.

Article.	Wilson.	Dingley.	Senate.	Proposed rate.
240 packages French decorated china:				
Rate.....per cent..	35	60	2½ cents and 30 per cent (42 per cent).	4 cents and 30 per cent (59 per cent).
Duty	$4,309	$7,542	$6,004	$7,488.
16 packages German white china:				
Rate.....per cent..	30	55	1½ cents and 25 per cent (43 per cent).	2½ cents and 25 per cent (55 per cent).
Duty	$239	$434	$342	$436.
45 packages German decorated china:				
Rate.....per cent..	35	60	2½ cents and 30 per cent (56 per cent).	4 cents and 30 per cent (71 per cent).
Duty	$729	$1,250	$1,108	$1,493.

Mr. SEWELL. I also furnish a list of the number of potteries in the city of Trenton which have failed in the last few years, notwithstanding a fairly protective tariff until the time of the Wilson law. Most of the failures occurred under the present law, amounting in the aggregate to $3,670,000. I ask that this statement may be printed in the RECORD.

The VICE-PRESIDENT. It will be so ordered, in the absence of objection.

The statement referred to is as follows:

FAILURES IN TRENTON FROM 1870 TO 1895.

	Capital stock.
American Crockery Company (under Pliny Fiske, twice)	$300,000
Broome & Burchell	10,000
Brewer & Forman (now East Trenton Pottery Company)	160,000
Clark (Clinton St., afterwards Willet Hicks)	10,000
City Pottery Company (now part of Maddocks)	150,000
Corey, I. W	50,000
Davis, Isaac (afterwards Fell & Throp Company)	150,000
Dickinson Pottery	20,000
Dowd Bros. (now F. A. Duggan)	75,000
East Trenton Porcelain Works (now Israel Lacy)	300,000
Fell & Throp Company	150,000
Martin, Tams & Potts (now idle)	50,000
Mercer Pottery Company (under John F. Thompson's management; revived and made successful by James Moses)	150,000
Millington, Richard (now Eagle Pottery Company, Burroughs & Mountford)	150,000
Moore, Joseph H. (now Lacy's Pottery)	150,000
National Pottery Company (torn down; burned)	100,000
Ott & Brewer Company	150,000
Burroughs & Mountford	150,000
Potts, Henry (Star Pottery)	50,000
Speeler's Sons, Henry (now International Pottery)	150,000
Shreve, W. I. (before John Moses took charge)	75,000
Star Pottery Company (now Crown Pottery)	50,000
Union Pottery Company (now idle)	150,000
Whitehead Pottery (now idle)	30,000
East Trenton Pottery Company (now idle)	150,000
New Jersey Pottery Company	150,000
Clark Pottery Company (closed up)	150,000
Dale & Davis	150,000
Trenton China Company	300,000
Willets Manufacturing Company (settled, 50 per cent on a dollar)	150,000
	3,670,000

Above list of failures in Trenton alone, in the aggregate showing a loss of over three millions of dollars, will indicate that the pottery business since its commencement in 1860 has been subject to the same vicissitudes as any other business, and is not, as many people have been led to believe, always remunerative. It may be well to say just here that while the pottery manufacturers of England, supplying goods to the American market, have grown immensely wealthy, the manufacturers of the United States are all men of small or moderate means.

Mr. CLAY. Mr. President, I rise for the purpose of making an inquiry. Is it true that the Senator from Rhode Island [Mr. ALDRICH] who has charge of the pending bill has withdrawn all the Senate committee amendments to paragraphs 90 and 91, and that they stand just as they were when the bill came from the House of Representatives?

The VICE-PRESIDENT. That is the suggestion of the Senator from Rhode Island.

Mr. CLAY. I so understand.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Arkansas [Mr. JONES], which has been stated, and on which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS]. If he were present, I should vote "yea."

Mr. HARRIS of Kansas (when his name was called). I have a general pair with the junior Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. QUAY. I have a general pair with the Senator from Alabama [Mr. MORGAN], who, I believe, is not present and has not

voted. I therefore withhold my vote. If the Senator from Alabama were present, he would vote "yea" and I should vote "nay."

Mr. WELLINGTON. I have a general pair with the Senator from North Carolina [Mr. BUTLER]. I inquire if he has voted?

The VICE-PRESIDENT. The Senator from North Carolina has not voted.

Mr. WELLINGTON. Then I withhold my vote.

Mr. HANSBROUGH. I have a general pair with the senior Senator from Virginia [Mr. DANIEL], and therefore withhold my vote.

Mr. THURSTON. Has the senior Senator from South Carolina [Mr. TILLMAN] voted?

The VICE-PRESIDENT. He has not voted.

Mr. THURSTON. I have a general pair with that Senator, and therefore withhold my vote. If he were present, I should vote "nay."

The result was announced—yeas 21, nays 32; as follows:

YEAS—21.

Bacon,	Cockrell,	Mitchell,	Vest,
Bate,	Heitfeld,	Murphy,	Walthall,
Berry,	Jones, Ark.	Pettus,	White.
Caffery,	Lindsay,	Rawlins,	
Chilton,	Mallory,	Roach,	
Clay,	Mills,	Turpie,	

NAYS—32.

Aldrich,	Foraker,	Lodge,	Platt, N. Y.
Allison,	Frye,	McBride,	Pritchard,
Burrows,	Gallinger,	McEnery,	Proctor,
Cannon,	Gear,	McMillan,	Sewell,
Carter,	Hale,	Mason,	Shoup,
Chandler,	Hanna,	Nelson,	Spooner,
Deboe,	Hawley,	Perkins,	Stewart,
Fairbanks,	Jones, Nev.	Platt, Conn.	Wetmore.

NOT VOTING—36.

Allen,	George,	McLaurin,	Smith,
Baker,	Gorman,	Mantle,	Teller,
Butler,	Gray,	Martin,	Thurston,
Clark,	Hansbrough,	Morgan,	Tillman,
Cullom,	Harris, Kans.	Morrill,	Turner,
Daniel,	Harris, Tenn.	Pasco,	Warren,
Davis,	Hoar,	Penrose,	Wellington,
Elkins,	Kenney,	Pettigrew,	Wilson,
Faulkner,	Kyle,	Quay,	Wolcott.

So the amendment was rejected.

Mr. ALDRICH. I ask now to go back to paragraph 88, which was passed over.

Mr. BATE. What has become of paragraph 92?

Mr. ALDRICH. We have not yet reached paragraph 92. I think we had better first dispose of the remaining paragraphs in this schedule.

The SECRETARY. The Committee on Finance report an amendment, to strike out paragraph 83, on page 16, beginning at line 4, as follows:

83. Tiles, glazed or unglazed, encaustic, ceramic-mosaic, vitrified, flint, spar, embossed, enameled, ornamental, hand painted, gold decorated, and all other earthenware tiles for floors and walls, valued at not exceeding 40 cents per square foot, 8 cents per square foot; exceeding 40 cents per square foot, 10 cents per square foot and 25 per cent ad valorem.

And in lieu thereof to insert:

83. Tiles, not enameled, embossed, glazed, painted, vitrified, ornamented, or decorated in any manner, 25 per cent ad valorem; if enameled, embossed, glazed, painted, vitrified, ornamented, or decorated in any manner, including flint, spar, and encaustic tiles, 45 per cent ad valorem.

Mr. ALDRICH. I offer the amendment which I send to the desk, in the nature of a substitute for paragraph 83.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to insert in the place of the committee amendment the following:

83. Tiles, plain, unglazed, floor, one color, exceeding 2 square inches in size, 4 cents per square foot; glazed, encaustic, ceramic, mosaic, vitrified, semi-vitrified, flint, spar, embossed, enameled, ornamented, hand painted, gold decorated, and all other earthenware tiles for floors and walls, valued at not exceeding 40 cents per square foot, 8 cents per square foot; exceeding 40 cents per square foot, 10 cents per square foot and 25 per cent ad valorem.

The VICE-PRESIDENT. The question is on the amendment submitted by the Senator from Rhode Island as a substitute for the amendment proposed by the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. ALDRICH. I think paragraph 88 was passed over.

The VICE-PRESIDENT. It was.

Mr. ALDRICH. The committee suggest a change in that paragraph. I think that some of the committee amendments were agreed to in that paragraph.

Mr. SEWELL. I will say to the Senator from Rhode Island that that paragraph was laid over at my request, in order that we might restore bauxite, which was stricken from the paragraph.

Mr. ALDRICH. I think the Senator from New Jersey had better allow this to stand for the present as the committee has recommended it, and we will examine into that question later.

Mr. SEWELL. Very well.

Mr. BACON. I am unable to hear the Senator from Rhode Island.

Mr. ALDRICH. I suggest that the committee amendments to this paragraph be adopted.

Mr. BACON. Paragraph 88?

Mr. ALDRICH. Yes, sir.

Mr. CLAY. I hope the Senator from Rhode Island will allow paragraph 88 to go over. I have a prepared statement at my room that I desire to use in opposing the amendments of the Senate committee, and I had not expected the question to come up this morning. I should be glad if the Senator would allow this paragraph to go over until to-morrow at least.

Mr. ALDRICH. Very well. I ask that we proceed to consider paragraph 92, and that the amendments suggested by the committee be acted upon.

The VICE-PRESIDENT. Paragraph 92 will be read.

The Secretary read paragraph 92, which the Committee on Finance propose to amend, in line 3, page 21, after the word "articles," by inserting "and wares;" in the same line, after the word "composed," by inserting "wholly or in chief value;" in line 4, before the words "or mineral," by striking out "earthen" and inserting "earthy;" and after the word "substances," at the end of line 4, by inserting "or carbon;" so as to make the paragraph read:

92. Articles and wares composed wholly or in chief value of earthy or mineral substances, or carbon, not specially provided for in this act, if not decorated in any manner, 35 per cent ad valorem; if decorated, 45 per cent ad valorem.

Mr. WHITE. I notice in paragraphs 92 and 93 that quite a wide departure has been made from the phraseology of the Wilson law, so called. The paragraphs there were 86 and 87, I believe. There seems to be a new classification, including, among other things, carbon for electric lighting. I believe that was not included in the former law at all. Am I not right in that respect?

Mr. ALDRICH. The Senator is right.

Mr. WHITE. I should like to know if there is any reason for including carbon?

Mr. ALDRICH. We have provided for a classification of the articles manufactured from carbon. The number of carbon articles, for various purposes, is increasing every year, and the committee thought it desirable and proper that there should be some rate established in regard to all articles of carbon.

Mr. WHITE. I notice in the statistical statement on page 32 that carbon for electric lighting is put down as disclosing an importation for 1893 of $35,734, and in 1896 of $18,941, which would indicate a reduction in the importation by some 50 per cent.

The per cent duty, according to the same statement, in the act of 1890 was 20; in the law of 1894, 30; and in the House bill, 50. I do not know what it is in the Senate bill, as the abstract before us does not give any indication. I am talking now of carbon for electric lighting. I see the importation seems to be about 50 per cent in 1896 as contrasted with 1893; and I inquire of the Senator from Rhode Island if he can state the rate of duty? I notice the percentage is not given in the bill of the Senate committee, and in the House bill it is given at 50 per cent.

Mr. ALDRICH. It is 35 per cent. We reduce the rate from 50 per cent to 35 per cent.

Mr. WHITE. That would be somewhat higher—not very much, but something higher—than the rate in the law of 1894, and the importation seems to be steadily on the decrease.

Mr. ALDRICH. The act of 1894, I think, provided a rate of 30 per cent ad valorem.

Mr. WHITE. Yes; that is the rate, as I understand it, and the importations, as I say, have been going down.

On the article of gas retorts, under the law of 1894, there was a duty of 20 per cent ad valorem, and there were but 84 imported. I understand that $3 each would be very little more that 20 per cent ad valorem; I think pretty nearly the same.

Mr. ALDRICH. It is intended to be about equal.

Mr. WHITE. According to my calculation, the difference is very small; but I observe that in 1896 there were no importations at all; which would seem to show that the duty is merely prohibitive as it now stands.

Mr. ALDRICH. Naturally those retorts will be made in this country, for they have to be made usually of a size to fit the particular places for which they are intended, and it is extremely doubtful whether any will be imported.

Mr. WHITE. I presume the manufacture will be in this country, and there will be no importations.

Mr. ALDRICH. The Senator from California is undoubtedly right about that.

Mr. WHITE. In the reclassification on page 34 of the statistical statement I find as to lava tips for burners the importations in 1893 amounted to $18,064 in value and in 1896 there were none. Under the Senate committee's bill the duty is fixed at 8 cents per gross and 15 per cent ad valorem, but in this statement, as in many other instances, the total per cent is not carried out, so that, without making a computation, it is difficult to tell what it is, and, moreover, the unit of value is not given here.

I see that the House bill provided a duty of 10 cents per gross and 15 per cent ad valorem, but there is no percentage carried out; and it is very difficult from the information given here to tell whether the Senate rate is an increase over that in the law of 1894, or even over the law of 1890, which was 35 per cent. Will the Senator explain this difficulty?

Mr. ALDRICH. The purpose of the committee was to make the duty on lava tips for burners equivalent to 30 per cent ad valorem. The House bill was about 40 per cent ad valorem; and the committee propose to reduce the House rates to 8 cents and 15 per cent ad valorem for the purpose of making the rate as nearly as possible equal to the rate of 30 per cent ad valorem, which was imposed by the act of 1894.

Mr. WHITE. The Senator from Rhode Island can not but observe, as we go along with the bill, the frequency of the omission to carry out these new and especially these compound rates, which are impossible of computation from the statement.

Mr. ALDRICH. That is owing to the fact that the Treasury Department has no data whatever in regard to the articles included in these general paragraphs. As to paragraph 92, for instance, articles of earthy substance that were not specially provided for by name have no distinct place in the report of the Bureau of Statistics, and therefore it is quite impossible to furnish the data as to what the value has been or what the equivalent ad valorem would be.

Mr. WHITE. However, the Department did furnish the value of the importations.

Mr. ALDRICH. They did, but they had no information as to the quantity. The value alone would not furnish any data from which the estimates could be made.

Mr. WHITE. I will say to the Senator from Rhode Island, as we are discussing paragraph 93 in connection with paragraph 92, that I observe that the Senate committee have eliminated from paragraph 93 filter tubes, and in the statistical statement, pages 34 and 35, it is stated that the House rate is 50 per cent, but there is no Senate rate. I presume the tubes must be included in some other paragraph.

Mr. ALDRICH. They come in under paragraph 92 unquestionably, at 35 per cent.

Mr. WHITE. Under paragraph 92?

Mr. ALDRICH. Unquestionably.

Mr. WHITE. Then it is the understanding of the Senator that there will be a duty of 35 per cent on filter tubes?

Mr. ALDRICH. Undoubtedly. There is a reduction from 50 to 35 per cent on these two items.

Mr. CAFFERY. I wish to inquire of the Senator from Rhode Island why it is proposed to increase the rate upon carbon for electric lighting. The rate of 1890 was 20 per cent. Do I understand that the equivalent ad valorem, although it is not expressed here very distinctly——

Mr. ALDRICH. To what item does the Senator from Louisiana refer?

Mr. CAFFERY. Carbon for electric lighting. That is the paragraph we are now on.

Mr. ALDRICH. Carbon for electric lighting is rated in the House bill at 50 per cent, and is reduced to 35 per cent by the provision of paragraph 92. There is no question about that.

Mr. CAFFERY. Thirty-five per cent?

Mr. ALDRICH. We have reduced it from the House rate, 50 per cent, to 35 per cent in the Senate proposition.

Mr. WHITE. An increase of about 5 per cent over the Wilson Act, I think.

Mr. CAFFERY. Why is there any necessity for that increase over the rate of 1890?

Mr. ALDRICH. In 1890 there was hardly any carbon manufactured here. It was an infant industry, absolutely.

Mr. JONES of Arkansas. Does the protection get higher as the industry gets older?

Mr. ALDRICH. And since that time the development of articles manufactured from carbon has been very rapid, until now these various articles are manufactured in a great many parts of the country. I suppose the low rate of 20 per cent was put on in 1890 upon the theory that they could not be made in this country. They are now made here, and we suggest putting that uniform rate of duty upon all articles manufactured of carbon.

Mr. CAFFERY. I understood the Senator from Rhode Island to say in his very able speech opening the debate—able from his standpoint—that it was the purpose of the bill not to increase in any particular the rates of 1890. Here is an increase of 15 per cent over the act of 1890.

This infant is found to be a very healthy, robust infant. It hardly needs the soothing sirup of protection, and yet, in spite of that fact, there is a very large increase over the rate of 1890 on a prime article of necessity. Electric lighting is now the main lighting for the large establishments in the United States, and it is getting to be the light for private establishments. The Senator gives no reason for the increase, nor does he give any reason on the ground of protection. In paragraph 93, "carbon for electric lighting," I move to reinstate the rate of 1890—20 per cent ad valorem.

Mr. BATE. Mr. President, paragraph 92 seems to be an omnium gatherum. It relates, I understand, to earthenware, in use by our people every day, of a cheap character. It seems to try to gather in all that is not specified in the preceding paragraph, No. 91. I have listened to the arguments which have been made, and have tried to hear some reason from the Senator from Rhode Island who has the matter in charge which would satisfy my mind that the increase is proper. I have failed, however, to hear from him a sufficient reason, in my judgment.

This is something that is in common use, and certainly it ought to be purchased at as cheap a rate as is possible by the people to whom it is an article of prime necessity. I find by looking at the comparative statement, in hunting for a reason why the rate should be increased, that no income is received from this source, only $177 at 40 per cent, under the law of 1894, and I see no reason for the increase unless it is simply and absolutely to prohibit any such wares from coming into this country, hence affecting the consumer.

I heartily approve of the motion made by the Senator from Louisiana [Mr. CAFFERY] to reduce it to 20 per cent. It is one of those prime necessaries, entering into everyday life, which, it seems to me, ought to come in free, but then, as we are struggling to get the best we can, I heartily approve the motion of the Senator from Louisiana to reduce it to 20 per cent. I am at a loss to know why the articles should be at the proposed rate, unless it is simply to prohibit their importation. It does not give protection, it seems, only in that way; it gives no revenue to the Treasury, only $177, and that, to my mind, is not a sufficient reason for maintaining the rate at 35 per cent. So, as I say, I approve the motion made by the Senator from Louisiana for its reduction to 20 per cent.

Mr. CAFFERY. By the act of 1890 it appears that there was a tariff of 20 per cent on carbon for electric lighting. So there must be a mistake in the comparative statement. So I will modify the motion I made in this way: I move to strike out "35 per cent," as imposed by the pending bill in paragraph 92, "carbon for electric lighting," and insert "20 per cent."

The VICE-PRESIDENT. The Chair desires to state that paragraph 92 is now under consideration.

Mr. BATE. Do I understand that the Senator from Louisiana moves to insert "20 per cent" instead of "35 per cent" in paragraph 92 or paragraph 93?

The VICE-PRESIDENT. Paragraph 92 is now open to amendment.

Mr. BATE. If the Senator from Louisiana has not made that motion as to paragraph 92, I desire to make it.

Mr. ALDRICH. Mr. President, what is the motion?

The VICE-PRESIDENT. Two Senators desire to make motions to amend paragraph 92.

Mr. BATE. No, sir; I yield to the Senator from Louisiana if he intends his motion to apply to paragraph 92. That is what I asked.

Mr. JONES of Arkansas. That was the motion of the Senator from Louisiana, to amend line 6, paragraph 92, by striking out "thirty-five" and inserting "twenty."

Mr. BATE. That is what I want.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In paragraph 92, line 6, it is proposed to strike out "thirty-five" and insert "twenty;" so as to read:

> Articles and wares composed wholly or in chief value of earthy or mineral substances, or carbon, not specially provided for in this act, if not decorated in any manner, 20 per cent ad valorem.

Mr. CAFFERY. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HANSBROUGH (when his name was called). I am paired with the senior Senator from Virginia [Mr. DANIEL].

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea."

Mr. QUAY (when his name was called). I am paired with the Senator from Alabama [Mr. MORGAN].

Mr. THURSTON (when his name was called). I am paired with the senior Senator from South Carolina [Mr. TILLMAN]. If he were present, I should vote "nay."

Mr. WALTHALL (when his name was called). I am paired with the junior Senator from Wisconsin [Mr. SPOONER].

The roll call was concluded.

Mr. WILSON. I am paired with the Senator from Florida [Mr. PASCO]. If he were present, he would vote "yea" and I should vote "nay."

Mr. QUAY. In order to make a quorum I will take the liberty of voting. I vote "nay."

The result was announced—yeas 19, nays 26; as follows:

YEAS—19.

Bacon,	Cockrell,	Mallory,	Roach,
Bate,	Faulkner,	Mills,	Turpie,
Caffery,	Heitfeld,	Murphy,	Vest,
Chilton,	Jones, Ark.	Pettus,	White.
Clay,	Lindsay,	Rawlins,	

NAYS—26.

Aldrich,	Deboe,	Lodge,	Proctor,
Allison,	Frye,	McBride,	Quay,
Baker,	Gallinger,	McMillan,	Shoup,
Burrows,	Hale,	Mason,	Warren,
Carter,	Hanna,	Perkins,	Wetmore.
Chandler,	Hawley,	Platt, Conn.	
Davis,	Jones, Nev.	Pritchard,	

NOT VOTING—44.

Allen,	George,	Mantle,	Smith,
Berry,	Gorman,	Martin,	Spooner,
Butler,	Gray,	Mitchell,	Stewart,
Cannon,	Hansbrough,	Morgan,	Teller,
Clark,	Harris, Kans.	Morrill,	Thurston,
Cullom,	Harris, Tenn.	Nelson,	Tillman,
Daniel,	Hoar,	Pasco,	Turner,
Elkins,	Kenney,	Penrose,	Walthall,
Fairbanks,	Kyle,	Pettigrew,	Wellington,
Foraker,	McEnery,	Platt, N. Y.	Wilson,
Gear,	McLaurin,	Sewell,	Wolcott.

So the amendment was rejected.

Mr. ALDRICH. I ask that paragraph 86 may now be acted upon.

Mr. BURROWS. The Senator from Kansas [Mr. BAKER] desires to investigate paragraph 86, and I ask that it may be passed over. I hope the Senator from Rhode Island will allow that to be done.

Mr. ALDRICH. Very well.

The next reserved amendment of the Committee on Finance was, in paragraph 93, line 10, before the word "cents," to strike out "ten" and insert "eight;" and in line 11, after the word "ad valorem," to strike out:

Carbons for electric lighting and filter tubes, 50 per cent ad valorem; porous carbon pots for electric batteries, without metallic connections, 20 per cent ad valorem.

So as to make the paragraph read:

93. Gas retorts, $3 each; lava tips for burners, 8 cents per gross and 15 per cent ad valorem.

The amendment was agreed to.

The next reserved amendment of the Committee on Finance was, under the head of "Glass and glassware," to strike out paragraph 94, as follows:

94. Plain green or colored, molded or pressed, and flint and lime glass bottles, holding more than 1 quart, and demijohns and carboys, covered or uncovered, and other plain green or colored, molded or pressed bottle glassware, not specially provided for in this act, 1 cent per pound; plain green or colored, molded or pressed, flint or lime glass bottles and vials holding not more than 1 quart and not less than 1½ pints, 1½ cents per pound; holding not more than 1½ pints and not less than one-fourth of 1 pint, 1½ cents per pound; if holding less than one-fourth of a pint, 50 cents per gross: *Provided*, That none of the above articles shall pay a less rate of duty than 40 per cent ad valorem: *And provided further*, That any of the above articles, if filled and not otherwise specially provided for in this act, and the contents are subject to an ad valorem rate of duty, or to a rate of duty regulated in any manner by the value thereof, the value of such bottles, vials, or other vessels shall be added to the value of the contents for the ascertainment of the dutiable value of the latter, but if filled and not otherwise provided for in this act, and the contents are not subject to an ad valorem rate of duty or to a rate of duty regulated in any manner by the value thereof, or if free of duty, such bottles, vials, or other vessels shall pay, in addition to the duty, if any, on their contents, the rates prescribed in this paragraph.

And insert in lieu thereof:

94. Plain green or colored, molded or pressed, and flint, lime, or lead glass bottles, vials, jars, and covered or uncovered demijohns and carboys, any of the foregoing, filled or unfilled, and whether their contents be dutiable or free, except such as contain merchandise subject to an ad valorem rate of duty, or to a rate of duty based in whole or in part upon the value thereof, shall pay duty as follows: If holding more than 1 pint, seven-eighths of 1 cent per pound; if holding not more than 1 pint and not less than one-fourth of a pint, 1½ cents per pound; if holding less than one-fourth of a pint, 45 cents per gross: *Provided*, That none of the above articles shall pay a less rate of duty than 40 per cent ad valorem.

Mr. VEST. In line 6, page 28, paragraph 94, I move to strike out "seven-eighths" and insert "three-quarters."

I wish to make a few observations upon the paragraph. The rates proposed by the majority of the Finance Committee are below the McKinley and Dingley rates, but above the Wilson rates, there being an increase in every one of the provisions above the existing law.

I undertake to say, and the Senator from Rhode Island knows it as well as any man living, that there is no necessity for any duty at all, and especially for an increased duty, upon these flint or lime bottles. We command the markets of this country absolutely and can command the markets of the world. I was opposed to the duty in the Wilson bill of 1894, and made a protest against it; but I was in the condition that the Senator from Rhode Island said he was the other day—I was conciliating certain influences upon this floor—and I had to concede the duty upon lime bottles.

In 1893 there was an association or combination or syndicate of flint glass bottle manufacturers in West Virginia and Ohio, and they controlled virtually the output in the United States. They concluded, for purposes of their own, to close their establishments in 1893, and the result was a newspaper controversy amongst themselves, which I had occasion to read in 1894, I believe. If not, I will read it now. In reply to one of their associates, who said they had closed on account of the prospective change of the McKinley tariff—in other words, the passage of what is called the Wilson bill—Mr. Park, the president of the North Wheeling Bottle Works, and Mr. Yost, of the Bellaire Bottle Works, of Bellaire, Ohio, published a card in which they denied that it was the change in the tariff that caused them to close, stating that it was overproduction. Here is what they said, and I will ask my friend the Senator from Arkansas [Mr. JONES] to read it, as it is fine print, and he is younger than I.

Mr. JONES of Arkansas read as follows:

As to the tariff on flint bottles, we would not find fault with its entire removal. We are in nowise affected by it one way or another. We make bottles for less than they can be freighted to this country from abroad, leaving out the cost of foreign production. If we had free raw material, we could send bottles across the water and take the markets of the world.

Mr. VEST. That is the testimony of the presidents of the two principal establishments, one in West Virginia and the other in Ohio, that they do not need any tariff at all, and it is a notorious fact that we absolutely control this manufacture in the United States and are exporting. There is no pretense of anything else, and yet the majority of the Finance Committee come in with an increase upon every one of the items over the existing law, when there ought not to have been the duty even in the Wilson Act which was put there in 1894. Of course this is simply a protest; it amounts to nothing else, but I shall call for the yeas and nays on agreeing to the amendment to the amendment, in order to accentuate the position of Senators in regard to this article of prime necessity.

Mr. WHITE. Mr. President, in connection with the remarks of the Senator from Missouri, I call attention to the statement in the comparative document, page 34, from which it appears that the law of 1894 placed the duty at three-quarters of a cent a pound, the House bill at 1½ cents per pound, and the present proposition seven-eighths of a cent a pound, a raise over the Wilson Act. In order to see whether there is any ground for this suggestion, we have to refer to the statistics which are given us. Of "bottles and vials, flint and lime, empty, holding more than 1 pint," in 1893 there were imported 2,243,470 pounds, of the value of $36,613.70. In 1896 the importations had fallen to 1,154,511.56 pounds, of the value of $24,642.73.

There can therefore be no excuse whatever for the imposition of this additional rate, because the American manufacturer has the market, as shown by these figures, and, upon the protective theory, that is all he can reasonably ask. If it be true that he can, in addition to taking the market, raise rates irrespective of the ability of foreigners to compete with him, he certainly does not come within the rule heretofore given for the justification of a protective tariff. It is evident that the importations are decreasing, and have gone down in three years some 50 per cent as to this particular item—bottles holding more than 1 pint.

We come to the next bracket, holding "not more than 1 pint and not less than one-quarter pint;" the importations in 1893 were, in value, $23,991, and in 1896 only $2,806.19. There seems, therefore, to be no reason for the increase. There the tariff of 1894 fixed the amount at 1½ cents a pound, and the present bill proposes to put it at 1½ cents a pound, while the House proposition was 1½ cents. Certainly no reason can be given to justify that increase. If we take the next paragraph, "holding less than one-quarter pint," in 1893 the importations amounted to but $203, and in 1896 somewhat more, but a trifle, $858.60, and yet we find that the prohibitory tariff law of 1894 thus prevents the importation of these goods; it is yet proposed to raise it to 45 cents per gross instead of 40 cents per gross, as contained in the law of 1894.

In the next bracket there is a slight increase, "filled, holding more than 1 pint;" in 1893 there were $24,690.57 worth imported; in 1896, $35,175.16, and there is an increase from three-quarters in the act of 1894 to seven-eighths of a cent here. Of course the House rate is reduced, but still the net result is an increase.

Now we come to the next, "holding not more than 1 pint and not less than one-quarter pint;" the total importations in 1893 amounted in value to a little over $13,000, and in 1896 the importations had decreased to $340.82. Now, there can be no reason given for the increase there. The Wilson rate was 1½ cents, and it is 1¾.

Taking the next, "holding less than one-quarter of a pint," the importations in 1893 were $15 worth. This enormous competition was somewhat extended in 1896, when the amount was raised to $89 worth. And yet we have even there an increase of 5 cents per gross in this bill over the Wilson bill. I will not run through this whole matter. It is but a repetition from one end of it to the other. The same proposition is apparent. There are a few cases where the importation in the three years has slightly increased, but taking the whole it amounts to nothing. It seems large when

we look at figures running up to millions, but when we come down to the value and consider the total consumption and look at the exports we find we are in the entire possession of the American manufacture and that the manufacturer referred to by the Senator from Missouri is undoubtedly correct when he says there is no possibility of any competition in this line.

Mr. BACON. In addition to what has been stated by the Senator from Missouri in reference to the glass industry at Bellaire, I desire to state that I was there last summer, and that my information was that the decay in glass manufacturing at Bellaire was not due to any want of prosperity under ordinary conditions, but that it was due to the fact that the development of the supply of natural gas in other neighboring localities had made it more profitable for the manufacturers to manufacture in those localities than in Bellaire. I will state that the character of my information was such that I could not doubt its correctness.

Mr. CAFFERY. Mr. President, in looking over many of these schedules, and in looking over the glass paragraphs, there appears to be a decided increase in the lower grades over the rates of 1890. I submit to the Senator from Rhode Island whether, after the price of an article falls and we have possession of the home market, it is any real reduction to reduce from a cent to seven-eighths of a cent when seven-eighths of a cent is quite as potent to keep out importations and to levy extra prices upon the consumers as the rate of 1 cent itself. This is merely delusive. It is playing false to the American people. It is not even coming up to the implied promise of the Senator from Rhode Island in his opening speech, that it would not do to return to the rates of 1890. When the price of an article has fallen, as has been the case in most instances—not especially in this instance—is it not perfectly delusive to say that we keep the same rates by keeping the specific rate on the lower article which has existed on the higher?

It is a pure question of mathematics. In the other House during the debate on this bill it was said, in answer to the charge that when the same specific rate was kept on the lower prices as were maintained on the higher, the ad valorem on the lower specific was quite equal to the ad valorem upon the higher specific, that it was a juggiery of figures. There is no juggiery about it, but all through this bill, in nearly every paragraph of every schedule that we have passed, this same performance is going on, holding out to the American people the mere promise of maintaining the old rates of the McKinley Act by lowering the specifics. There is absolutely nothing in it. It is delusive all the way through.

Now, when you hold the home market, when protection—giving it all the due credit it may be entitled to—has built up an infant industry and there is an absolute monopoly, and our importations fall off, where is the use, what is the benefit to the consuming millions, to maintain the old rates? Is it not for the simple purpose of enabling the manufacturer of these articles to add to the selling price the cost upon the imported article? If it is not for that purpose, what is the purpose? You build up your industry, you hold your market, and yet you keep prohibitive rates.

The only corrective possible for higher rates than the consumer ought to pay is in the competition afforded upon fair and just and legitimate lines of trade by the importation of the foreign article. All along in this bill, in every paragraph and in every schedule, the principle crops out of absolute prohibition—not protection, but prohibition. Under paragraph 94 here is a decline of seven-eighths of a cent a pound. The importations in 1893 were 2,243,470 pounds, and in 1896, 1,154,000 pounds. Here is a decline in the importations of about 50 per cent, and a delusive, insignificant decline in the rates of the McKinley Act.

I admonish the Senator from Rhode Island that the people of the United States are not going to have the wool drawn over their eyes by such a specious pretext as this, pretending to lower the rates and yet keeping them prohibitive.

The PRESIDING OFFICER (Mr. PERKINS in the chair). The question is on the amendment of the Senator from Missouri [Mr. VEST] to the amendment of the committee, on which the yeas and nays have been demanded.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. TILLMAN (when his name was called). Has the junior Senator from Nebraska [Mr. THURSTON] voted?

The PRESIDING OFFICER. The Chair is informed that the junior Senator from Nebraska has not voted.

Mr. TILLMAN. I have a pair with the junior Senator from Nebraska. He is not present, and I will withhold my vote.

The roll call was concluded.

Mr. HANNA. Has the junior Senator from Utah [Mr. RAWLINS] voted?

The PRESIDING OFFICER. The Chair is informed that the junior Senator from Utah has not voted.

Mr. HANNA. Then I will withhold my vote.

Mr. CLARK. I am paired with the Senator from Kansas [Mr. HARRIS].

Mr. WELLINGTON. Has the junior Senator from North Carolina [Mr. BUTLER] voted?

The PRESIDING OFFICER. The Chair is informed that the junior Senator from North Carolina has not voted.

Mr. WELLINGTON. I am paired with that Senator.

Mr. CANNON. I inquire if the junior Senator from Arkansas [Mr. BERRY] has voted?

The PRESIDING OFFICER. The Chair is informed that the junior Senator from Arkansas has not voted.

Mr. CANNON. I am paired with that Senator for to-day. If he were present, I should vote "nay."

The result was announced—yeas 21, nays 29; as follows:

YEAS—21.

Bacon,	Faulkner,	Mills,	Vest,
Bate,	Gray,	Mitchell,	Walthall,
Caffery,	Heitfeld,	Morgan,	White.
Chilton,	Jones, Ark.	Pettus,	
Clay,	Lindsay,	Roach,	
Cockrell,	Mallory,	Turpie,	

NAYS—29.

Aldrich,	Frye,	McMillan,	Quay,
Allison,	Gallinger,	Mason,	Sewell,
Burrows,	Gear,	Nelson,	Spooner,
Carter,	Hale,	Perkins,	Warren,
Chandler,	Hawley,	Platt, Conn.	Wetmore.
Deboe,	Jones, Nev.	Platt, N. Y.	
Fairbanks,	Lodge,	Pritchard,	
Foraker,	McBride,	Proctor,	

NOT VOTING—39.

Allen,	George,	McLaurin,	Smith,
Baker,	Gorman,	Mantle,	Stewart,
Berry,	Hanna,	Martin,	Teller,
Butler,	Hansbrough,	Morrill,	Thurston,
Cannon,	Harris, Kans.	Murphy,	Tillman,
Clark,	Harris, Tenn.	Pasco,	Turner,
Cullom,	Hoar,	Penrose,	Wellington,
Daniel,	Kenney,	Pettigrew,	Wilson,
Davis,	Kyle,	Rawlins,	Wolcott.
Elkins,	McEnery,	Shoup,	

So the amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs upon agreeing to the amendment proposed by the Committee on Finance.

The amendment was agreed to.

Mr. ALDRICH. I think paragraph 105 is the next in order.

The next amendment of the Committee on Finance was, in paragraph 105, page 28, line 5, after the word "same," to insert "or parts thereof, finished or unfinished;" so as to read:

105. Spectacles, eyeglasses, and goggles, and frames for the same, or parts thereof, finished or unfinished, valued at, etc.

Mr. VEST. I intend, if that amendment is adopted, to move to place a rate of 40 per cent ad valorem upon "parts thereof, finished or unfinished."

The effect of the amendment inserting the words "or parts thereof, finished or unfinished" is to put the same duty upon any portion of these articles that is valued below 40 cents that is put upon the finished product. This is manifestly unjust. In the first place, a dozen of the rims of these glasses may not be worth more than 1 or 2 cents, and you put upon them the same duty that you would put upon the finished product, if under 40 cents. Take the frames of the glasses and they will bear the same duty. This is unjust; but, in addition to that, what I take to be one of the principal objects of our friends upon the other side and of ourselves is the encouragement of American industry, and it discourages American industry. If this provision is put into this schedule, these parts of spectacles, glasses, etc., will not be imported, because the duty will be just the same as on the finished product. Instead of letting the parts of glasses and of spectacles come into the country and then be finished by American workmen you exclude them from the country and cause the work to be done abroad.

I shall not resist the adoption of the amendment, because I propose afterwards to move to put 40 per cent ad valorem upon the parts of these articles, finished or unfinished.

Now, another word, Mr. President, in regard to this duty. The duty is upon the first classification not less than 65 per cent. Sixty-five per cent is the lowest, and it runs up to 180 per cent. One hundred and eighty per cent upon an article of absolute necessity! The least rate upon the next classification——

Mr. ALDRICH. Will it trouble the Senator to state the price of those spectacles?

Mr. VEST. I have not the comparative statement here. The rate is 180 per cent.

Mr. ALDRICH. What is the unit of value?

Mr. JONES of Arkansas. This statement was made by the New York custom-house, and it is that under this Senate rate the price at 20 cents per dozen and 15 per cent ad valorem would be, at the highest rate, 180 per cent, and at the lowest, 65 per cent. On the next bracket the highest rate would be 120 per cent and on the lowest 32 per cent. He did not give the unit of value on which he made the calculation.

Mr. ALDRICH. It must be in the neighborhood of 10 cents a dozen.

Mr. JONES of Arkansas. He made the statement on the value of the goods.

Mr. ALDRICH. If the rate is 180 per cent, it must be in the neighborhood of 10 cents a dozen for spectacles.

Mr. VEST. It does not make the slightest difference in the way of argument whether it is 10 cents or a hundred cents or a thousand cents. The question is upon how much the consumer is made to pay. The cheaper the article, it makes the increased duty much greater. I make the rates upon the second division from 45 per cent, the lowest, up to 120 per cent. Under the McKinley Act the duty was 60 per cent upon both classifications. As a matter of course, this is an enormous increase, and it is especially objectionable, because, as the Senator from Rhode Island says, it is a cheap article that goes into use amongst the poorer classes of people.

Mr. PLATT of Connecticut. Spectacles are imported into this country, according to the custom-house statistics, at the price of 18 cents a dozen—a cent and a half a pair. It is a fraud. It is a fraud on everybody who purchases them. For my part, I wish the ad valorem equivalent on that class of goods was 300 per cent or 500 per cent. I should like to stop it.

Mr. ALDRICH. The price given by the Senator from Missouri shows that these spectacles, in order to pay 180 per cent, must be sold for 10 cents a dozen; that is, ten-twelfths of a cent per pair of spectacles—less than a cent a pair. I think that statement of itself is sufficient to show that it is no great hardship to the people of the United States or to the importers if they are obliged to pay a cent or even a cent and a half on a pair of spectacles.

Mr. JONES of Arkansas. Spectacles that are perhaps no better than the others.

Mr. ALDRICH. They certainly can not be very valuable for use to anyone.

Mr. JONES of Arkansas. There is no guaranty in this that the quality of the American goods is going to be a bit superior to the quality of the goods brought from abroad, which latter excites the indignation of the Senator from Connecticut.

Mr. ALDRICH. I think it is safe to say that no spectacles are made in this country, and there could be none sold in this country, at any such price as that.

Mr. WHITE. I can understand the remark of my friend the Senator from Connecticut that he desires that the spectacles duty should be put up to 500 per cent, so that no one could use the same, because, by such provision, it might be possible that the general reading of this bill, if we pass it, would be prevented. But that we should be inhibited from perusing the daily accounts of our proceedings and others, perhaps less interesting, is somewhat remarkable to me. We ought to have our factories started before we shut out the importations. This provision does not interfere with me personally, but it would interfere with others.

I have a number of communications from dealers, small dealers, it is true, but they represent the trade in that line of retail trade in different parts of the country. They have requested me not to use their communications because they did not desire the two or three large establishments in this country manufacturing some of the goods which they utilize in their business to know that they were protesting against this duty. One of them very wisely remarked that it was the imposition of these high duties upon matters of everyday consumption, small matters, the increase of which perhaps might not seem very great to persons who were dealing in figures running up to the millions, that made the tariff bill in the end unpopular and difficult of enforcement or maintenance. While 180 per cent, if we figure the amount of cents that is thereby meant to be added to the cost of a certain number of spectacles, may not be so great, yet it is that amount of increase at all events, and it is those things which appeal so largely to the average consumer when he finds that while those who buy more expensive goods, articles of luxury, are paying 30, 40, and 50 per cent, and he is paying 180 and 200 per cent, he believes that he is discriminated against, even though the amount of money involved may be a great deal less.

The principle which seems to permeate this bill is the imposition of high duties upon low-priced goods (and upon many the same number of dollars and cents are not involved) and the imposition of light duties upon high-grade articles. We find that not only here, but when we get along a little farther unto the metal schedule we will find that the changes there have been made upon that basis.

It appears to me that this is an imposition upon the consumer, and, however small the amount may be, it is an imposition, in proportion to the amount of his investment, far greater than should be imposed upon an article of absolute necessity.

I have heard that some people buy glasses for ornamental purposes, but that class of individuals is not very numerous and perhaps not worthy of excessive consideration. But those who utilize spectacles generally require them. Unfortunately, weak eyes or imperfect vision is not confined to wealth, but is the heritage of that large class of humanity which come under the general ills which flesh is heir to. I believe this is one of the most unpopular of the many unpopular amendments in the bill, and therefore if I were seeking mere partisan advantage I should take pleasure in voting for it.

Mr. ALDRICH. Mr. President, all spectacles valued at over $1.50 per dozen, that is, 12½ cents apiece (and all spectacles that are useful and serviceable for anybody to buy or to wear are worth more than 12½ cents a pair), pay under this proposed amendment of the committee 50 per cent ad valorem. That is 10 per cent less than the rate imposed by the act of 1890.

Mr. VEST. But more than the Wilson Act.

Mr. ALDRICH. More than the Wilson Act and 10 per cent less than the act of 1890. The spectacles imported into this country at the low prices which the Senator from Missouri and the Senator from California are talking about are practically valueless. They ought not to be used by anybody, and it would be a kindness to the people of this country to have them prohibited absolutely from being imported and used. The rate of duty upon those is on an average in the neighborhood of 60 or 70 per cent ad valorem. It varies from 50 per cent to 100 per cent. I believe that in view of all the circumstances and the very great undervaluation of these articles, the rates imposed are reasonable and proper.

Mr. CAFFERY. Mr. President, I simply desire to say that protection teaches a great many things, and now it is proposed to teach people what sort of business they ought to go into. The Senator from Rhode Island tells the people of the United States that they ought not to pursue certain lines of business, which he indicates to them by placing a high tariff in their favor. Perhaps that might be done, but when the Senator from Rhode Island goes out of the tariff business and wants to tell the people of the United States how they can better see——

Mr. ALDRICH. Would it interrupt the Senator from Louisiana if I should ask him a question?

Mr. CAFFERY. Not at all.

Mr. ALDRICH. The Senator is unfortunate like myself, and occasionally has to wear glasses. I should like to have him tell the Senate, as an object lesson, what is the lowest price he ever paid for a pair of spectacles.

Mr. CAFFERY. I do not exactly remember. I have paid anywhere from $1.50 to two or three dollars a pair.

Mr. ALDRICH. And we are discussing spectacles here that are worth ten-twelfths of 1 cent a pair.

Mr. CAFFERY. Exactly. But the general proposition has been advanced by the Senator from Rhode Island that these cheap spectacles ought not to be admitted anyhow; that the people can not use them, and if they try to use them they can not see through them. So, then, he is a great benefactor to the eyes of the people of this country from his wonderful knowledge about spectacles.

I think spectacles are something like razors. I used to buy razors sometimes for $5 and sometimes for 25 cents apiece, but a 25-cent razor is frequently as good as a five-dollar razor; and it may be that a cheap pair of spectacles to a poor man is quite as good as a high-priced pair of spectacles to a rich man.

I submit to the Senator from Rhode Island that if these cheap spectacles are not good the people are not going to use them. That is a matter for them to find out. They are made at this price. If they are valueless, they would not be made—nobody would buy them. You can not fool a man when he looks through a pair of glasses as to whether they magnify or not. If he can read with them, that answers the end of the glasses. It is the purpose of the glasses to see; and I submit that the Senator from Rhode Island can not see for the people of the United States through his or anybody else's glasses, through the borrowed spectacles of those manufacturers who do not want anybody to look through any glasses other than the spectacles they have made. You may indicate the line of policy you will pursue by an arbitrary rule of taxation, but you certainly can not invade the vision—the eye—and say what sort of spectacles the people shall use.

Mr. WHITE. Mr. President, I have heard a great deal about the doctrine of protection, and it is being amplified every day, but I did not know before that there was a sanitary feature about it. I am glad to learn from my distinguished optical friend from Rhode Island that now we are protecting not only the pockets of our citizens and preserving the home market, but we are likewise attending to their wants with reference to optical matters, and that hereafter, when one sees well through spectacles or through any glasses he may desire to purchase, opera or other, it will be attributed to the beneficent doctrine of protection. The qualifications of the Senator from Rhode Island are certainly numerous, his great familiarity with tariff bills is conceded, but I did not know that he possessed the ability to inform us accurately with reference to this somewhat occult subject now referred to—the organ of vision. It seems to me if it is possible for a spectacle to be made of this bill it will be accomplished by the adoption of the committee's amendment.

Mr. JONES of Arkansas. Mr. President, I shall not detain the Senate by a long discussion of this matter. There were actually imported in 1896, according to the statistical tables presented by the Senator from Rhode Island to the Senate, $296,624.32 worth of spectacles. Those glasses are coming into the United States.

I have the official report, signed by J. B. Dusenberry, written to Hon. Walter H. Bunn, United States appraiser, in which, in making the ad valorem estimate of what under the Senate bill as proposed here will be paid upon the spectacles imported into New York, he shows that the rates on those net over 40 per cent per dozen, which will be 100 per cent on the highest and 65 per cent on the lowest, and, as stated by the Senator from Missouri [Mr. VEST], on the next grade above that the rate will be 120 per cent on the highest grade and 32 per cent on the lowest. This is a matter of fact. As appears from the official report of the custom-house, where these articles are valued and where these arrangements are understood, these are the rates imposed by this bill, and they need no comment.

The PRESIDING OFFICER. The question is on the amendment of the committee. If there be no objection, the amendment will be considered as agreed to.

Mr. VEST. We object, but we can not help ourselves.

Mr. WHITE. I trust that the RECORD will not show there are any common-consent votes here; otherwise we may have as much trouble as we have had with reference to the demonetization of silver. [Laughter.]

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 105, page 28, line 6, before the word "cents," to strike out "seventy-five" and insert "forty;" in line 7, before the word "cents," to strike out "twenty-five" and insert "twenty;" in line 8, before the words "per cent," to strike out "twenty" and insert "fifteen;" in line 9, before the word "cents," to strike out "seventy-five" and insert "forty;" in line 10, after the word "dozen," to strike out "forty-five" and insert "forty;" and in line 13, after the word "dozen," to strike out "and on parts of spectacle, eyeglass, or goggle frames, and mountings or parts thereof for the same;" so as to make the paragraph read:

105. Spectacles, eyeglasses, and goggles, and frames for the same, or parts thereof, finished or unfinished, valued at not over 40 cents per dozen, 20 cents per dozen and 15 per cent ad valorem; valued at over 40 cents per dozen and not over $1.50 per dozen, 40 cents per dozen and 20 per cent ad valorem; valued at over $1.50 per dozen, 50 per cent ad valorem.

The amendment was agreed to.

Mr. WHITE. I move to strike out the paragraph as amended and substitute in lieu thereof the following:

Spectacles, eyeglasses, goggles, opera glasses, and other optical instruments, and frames for the same, 40 per cent ad valorem.

That is the present law. I ask for the yeas and nays on the amendment.

Mr. VEST. I hope the Senator from California will amend his proposed amendment by inserting "or parts thereof, finished or unfinished;" so as to put 40 per cent upon them all.

Mr. WHITE. I will let that amendment be considered as incorporated within the amendment which I have proposed.

The PRESIDING OFFICER. The amendment as modified will be stated.

The SECRETARY. It is proposed to strike out paragraph 105 as amended and in lieu thereof to insert:

105. Spectacles, eyeglasses, goggles, opera glasses, and other optical instruments, and frames for the same, finished or unfinished, or parts thereof, 40 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment of the Senator from California as modified.

Mr. WHITE. I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. PENROSE (when his name was called). Owing to the absence of the Senator from Delaware [Mr. KENNEY], with whom I am paired, I withhold my vote.

Mr. QUAY (when his name was called). Has the Senator from Alabama [Mr. MORGAN] voted?

The PRESIDING OFFICER. The Chair is informed that the Senator from Alabama has not voted.

Mr. QUAY. Then I withhold my vote. If that Senator were present, I should vote "nay."

Mr. VEST (when his name was called). I am paired generally with the Senator from Minnesota [Mr. NELSON]. I do not see him in the Chamber, and therefore I withhold my vote. I should vote "yea" if he were here.

Mr. WILSON (when his name was called). I again announce my pair with the Senator from Florida [Mr. PASCO]. If he were present, he would vote "yea," and I should vote "nay."

The roll call was concluded.

Mr. CLARK (after having voted in the negative). I ask if the junior Senator from Kansas [Mr. HARRIS] has voted?

The PRESIDING OFFICER. The Chair is informed that the junior Senator from Kansas has not voted.

Mr. CLARK. Then I withdraw my vote, as I am paired with that Senator.

Mr. CANNON. I am paired with the junior Senator from Arkansas [Mr. BERRY]. If he were present, I should vote "nay."

Mr. HANNA (after having voted in the negative). I inquire if the junior Senator from Utah [Mr. RAWLINS] has voted?

The PRESIDING OFFICER. The Senator has not voted.

Mr. HANNA. Then I withdraw my vote.

Mr. BATE (after having voted in the affirmative). I ask if the Senator from Kentucky [Mr. DEBOE] has voted?

The PRESIDING OFFICER. The Chair is informed that the Senator from Kentucky has not voted.

Mr. BATE. Then I withdraw my vote. I am paired for the day with that Senator.

The result was announced—yeas 19, nays 29; as follows:

YEAS—19.

Bacon,	Gray,	Mills,	Tillman,
Caffery,	Jones, Ark.	Mitchell,	Turpie,
Chilton,	Lindsay,	Murphy,	Walthall,
Clay,	McLaurin,	Pettus,	White.
Faulkner,	Mallory,	Roach,	

NAYS—29.

Aldrich,	Frye,	Mason,	Spooner,
Allison,	Gallinger,	Perkins,	Stewart,
Burrows,	Hale,	Platt, Conn.	Thurston,
Carter,	Hawley,	Platt, N. Y.	Warren,
Chandler,	Jones, Nev.	Pritchard,	Wetmore.
Davis,	Lodge,	Proctor,	
Fairbanks,	McBride,	Sewell,	
Foraker,	McMillan,	Shoup,	

NOT VOTING—41.

Allen,	Elkins,	Kyle,	Rawlins,
Baker,	Gear,	McEnery,	Smith,
Bate,	George,	Mantle,	Teller,
Berry,	Gorman,	Martin,	Turner,
Butler,	Hanna,	Morgan,	Vest,
Cannon,	Hansbrough,	Morrill,	Wellington,
Clark,	Harris, Kans.	Nelson,	Wilson,
Cockrell,	Harris, Tenn.	Pasco,	Wolcott.
Cullom,	Heitfeld,	Penrose,	
Daniel,	Hoar,	Pettigrew,	
Deboe,	Kenney,	Quay,	

So the amendment was rejected.

Mr. SMITH. Mr. President, I rise to a question of personal privilege.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

Mr. SMITH. Mr. President, during my absence from the Senate the other day I ascertained from the RECORD that in a very remarkable deliverance by the Senator from South Carolina [Mr. TILLMAN] he became sponsor for a newspaper clipping in which my name was mentioned in connection with the sugar schedule in the pending tariff bill.

It is only necessary for me to say that the statement in the newspaper clipping in question is absolutely and unqualifiedly untrue.

I have not during this session of Congress bought or sold, directly or indirectly, a single share of sugar stock, nor at any time prior to this when any legislation affecting the value of sugar or sugar stock was pending.

The reading of the bill was resumed at paragraph 103.

Mr. JONES of Arkansas. I move, in line 20, before the words "per centum," to strike out "forty-five" and insert "thirty-five."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. In paragraph 106, page 28, line 20, before the words "per centum," it is proposed to strike out "forty-five" and insert "thirty-five;" so as to make the paragraph read:

106. Lenses of glass or pebble, ground and polished to a spherical, cylindrical, or prismatic form, and ground and polished plano or coquill glasses, wholly or partly manufactured, with the edges unground, 35 per cent ad valorem; if with their edges ground or beveled, 10 cents per dozen pairs and 45 per cent ad valorem.

Mr. WHITE. I desire to inquire whether this paragraph is not new, and whether this is not a new classification?

Mr. ALLISON. I believe it is.

Mr. WHITE. I find the following information, which has been handed to me by one of the experts:

Magic-lantern slides, if toys, should be subject to no other duty than as toys, as they are not made in this country. The duty on other magic-lantern slides, as manufactures of glass, would seem to be amply sufficient.

I presume from this that it is designed to put a tariff upon slides which might otherwise be classified as toys. I should like to ask the Senator from Iowa if I am correct in that regard?

Mr. ALLISON. What is the question?

Mr. WHITE. The question is as to whether the classification attempted here, so far as slides are concerned, has application to toys which are now admitted under the general designation of toys. It is stated that this class of goods is not manufactured in this country. I am so informed by one of the Government officers. I presume this is possibly intended to encourage some one to go into the manufacturing business.

Mr. ALLISON. Very likely.

Mr. WHITE. I hope he may be discovered and commence work.

Mr. VEST. The Senator from California [Mr. WHITE], when he speaks of this as a new classification, is, of course, not under the impression that these provisions are entirely new.

Mr. ALLISON. It is a new classification.

Mr. VEST. It is simply a new classification.

Mr. WHITE. I referred to it as a new classification. Thus, the class immediately preceding, which is paragraph 106 here, is paragraph 100 in the law now in force. The paragraph of the law now in force speaks of painted, tinted, stained, enameled, etc.; but it is differently classified.

Mr. VEST. The duty on these strips of glass not more than 3 inches wide, ground or polished on one or both sides to a cylindrical or prismatic form, under the McKinley Act was 60 per cent, and under the Wilson Act they were free; and in the pending bill "glass slides for magic lanterns" are placed at 45 per cent ad valorem. They are 25 per cent under existing law, and here the rate is increased 20 per cent.

So, in the last line of this paragraph, under the McKinley Act, in the basket clause, "not specially provided for," the rate was 45 per cent, and under existing law 30 per cent; and here it goes back to the McKinley rates. So that there is an increase upon the existing duties all the way through simply by making a new classification. I will move, in line 2, to strike out "forty-five" and insert "twenty-five."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In paragraph 107, page 29, line 2, before the words "per centum," it is proposed to strike out "forty-five" and insert "twenty-five;" so as to read:

107. Strips of glass, not more than 3 inches wide, ground or polished on one or both sides to a cylindrical or prismatic form, and glass slides for magic lanterns, 25 per cent ad valorem.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Missouri.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 108, page 29, line 4, after the words "lenses and," to strike out "other;" and in line 6, after the word "same," to insert "all the foregoing;" so as to make the paragraph read:

108. Opera and field glasses, telescopes, microscopes, photographic and projecting lenses and optical instruments, and frames or mountings for the same, all the foregoing not specially provided for in this act, 45 per cent ad valorem.

The amendment was agreed to.

Mr. WHITE. I desire to inquire of the Senator from Iowa whether opera glasses that are affected by this act are manufactured at all in this country at the present time? If so, it must be to a very limited extent. I doubt whether they are made here at all.

Mr. ALLISON. They are to a very limited extent, I think, but I hope they will be largely manufactured here.

Mr. WHITE. I do not think there are any. This is another case where some one is invited to commence business, but has not yet started.

Mr. ALLISON. I will say to the Senator from California that this provision only increases the rate 5 per cent over the Wilson law, so called.

Mr. WHITE. It is not a very large increase; but I thought perhaps some one had stated that he probably might in the future attempt to start an opera-glass manufactory in this country, but there is no such proposition now.

Mr. ALLISON. It has been found that the protection afforded by the Wilson law was not quite enough, and so we have increased it 5 per cent.

Mr. GALLINGER. So as to get a little more revenue.

Mr. ALLISON. Yes; to get a little more revenue and afford a little more protection.

The reading of the bill was resumed at paragraph 109, on page 29.

Mr. ALLISON. I ask that that paragraph may be passed over for the present.

The VICE-PRESIDENT. Without objection, that will be the order.

The reading of the bill was resumed at paragraph 110, on page 29. The next amendment of the Committee on Finance was, on page 29, beginning in line 19, to strike out paragraph 111, as follows:

111. Marble or onyx, in block, rough or squared only, and not dressed or made into articles, 65 cents per cubic foot; marble of all kinds and onyx, sawed or dressed, including marble or onyx slabs, paving tiles, or mosaic cubes, containing less than 4 cubic inches each, $1.10 per cubic foot; but in measurement no slab, tile, or cube shall be computed at less than 1 inch in thickness.

And in lieu thereof to insert:

111. Marble or onyx, in block, rough or squared only, 65 cents per cubic foot; marble or onyx, sawed or dressed, over 2 inches in thickness, $1.10 per cubic foot; slabs or paving tiles of marble or onyx, containing not less than 4 superficial inches, if not more than 1 inch in thickness, 12 cents per superficial foot; if more than 1 inch and not more than 1½ inches in thickness, 15 cents per superficial foot; if more than 1½ inches and not more than 2 inches in thickness, 18 cents per superficial foot; if rubbed in whole or in part, 3 cents per superficial foot in addition; mosaic cubes of marble, onyx, or stone, not exceeding 2 cubic inches in size, if loose, 1 cent per pound and 20 per cent ad valorem; if attached to paper or other material, 20 cents per superficial foot and 35 per cent ad valorem.

Mr. WHITE. If there is no objection, I should like that paragraph to go over. There are some discrepancies pointed out to me which I should like an opportunity to examine, if the Senator from Iowa has no objection.

Mr. PERKINS. I will say to my colleague that I think the committee have agreed upon an amendment that will obviate the objection he has.

Mr. WHITE. I should like to hear the amendment. I will withdraw my request to pass over the paragraph for the present.

Mr. ALLISON. I will state that the committee have agreed upon an amendment increasing the duty upon onyx. I suppose that is the object of the Senator from California.

Mr. WHITE. I think it ought to be more than the rate on marble, whatever rate you fix that at.

Mr. ALLISON. It should be more. I think the amendment which the committee intend to propose is not completed, as it should be, so as to cover the whole paragraph. Therefore I concur with the suggestion of the Senator from California that it be passed over until we finish the schedule, and it may be called up later.

The VICE-PRESIDENT. If there be no objection, the suggestion of the Senator from California will be complied with and the paragraph passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 112, page 30, line 23, after the word "chrysolite," to insert "coral;" and in line 24, after the word "crystal," to strike out "including clock cases with or without movements" and insert "and spar;" so as to make the paragraph read:

112. Manufactures of agate, alabaster, chalcedony, chrysolite, coral, cornelian, garnet, jasper, jet, malachite, marble, onyx, or rock crystal, and spar not specially provided for in this act, 50 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. When the existing law was enacted in 1894, I thought the duties were too high, but I was unable to secure any reduction. The consequence was we made an increase in 1894 over the McKinley Act. For instance, upon agate the McKinley Act had a rate of 20 per cent duty, and the Wilson Act made it 30 per cent. On alabaster the McKinley Act had 25 per cent, and we made it 45 per cent. On jet the McKinley Act made it 25 per cent and the Wilson Act 25 per cent, and now it is proposed to make the duty 50 per cent on these articles over the McKinley Act and over the Wilson Act, and higher than the duties have ever been on any of these articles.

I do not know that it is of any use to make any motion, but I will move to put the duties back to the rates of the McKinley Act upon agate, 20 per cent, and upon that I will call for the yeas and nays to see whether, in the opinion of the Senate, the McKinley Act was good legislation or not.

Mr. JONES of Arkansas. In this connection, it perhaps may be as well to read a letter which I received, and which I regard as one of the most remarkable claims under this pernicious system of protection that I ever saw. I call the attention of Senators to it on account of its novelty and originality. I do not think it is like anything else I have ever seen, and I doubt if there have been many such letters written. This seems to have been printed, although my name is written at the top of it. The letter is as follows:

SAN FRANCISCO, CAL., *March 20, 1897.*

Hon. JAMES K. JONES,
United States Senator.

SIR: We beg most respectfully to call your attention to the fact that the increase proposed in the House tariff bill, now under consideration, on "marble or onyx, in the block, rough or squared only, and not dressed or made into articles," of from 50 cents to 65 cents per cubic foot, while affording a substantial protection in the case of marble, is entirely inadequate to promote or protect the products of our American onyx mines.

This, of course, relates more particularly to the paragraph we have just passed; but it may as well come in now.

Marble and onyx, while derived from the same elements, are entirely dissimilar in their formation and character. Marble is an aggregation of small crystals, entirely opaque, while onyx is a crystalline mass throughout, of rare translucency, and possessing the beautiful play of reflection from the interior, which, with its varied colors, constitutes its great beauty.

Marble is generally found in immense natural beds, easily accessible to railroads and other conveyances, and can be taken out in blocks of any convenient size at small expense, while onyx is almost invariably found at great elevations and in inaccessible locations; the formation is generally in small sizes, and it must be handled with great care on account of its brittleness, and transported at heavy expense.

Marble is tractable, easy sawed, worked, and polished; onyx is rebellious in its nature, of much greater density and weight, and takes from four to five times as much labor to shape, work, and polish it, particularly in the case of the higher qualities. Commercially marble is extensively used in large blocks and onyx is used very largely in slabs of an inch thick and under, the onyx having an intrinsic value many times that of the marble.

There are extensive deposits of onyx in Arizona; California contains immense deposits in San Luis Obispo County, San Bernardino County, Solano County, and Siskiyou County; and there are also deposits in Arkansas, Missouri, Montana, and Virginia (see the report of Prof. George P. Merrill, curator of the National Museum), but owing to the large importations of the products of the cheap labor of Mexico, Algiers, and Egypt, all of the above-mentioned mines have been, up to the present time, lying idle, except the one in San Luis Obispo County, Cal., owned by our firm, and that we have operated at a loss for several years past.

We respectfully submit that—

This is the remarkable part of the letter—

in view of the foregoing facts—the heavy expense of mining, shaping, working, and polishing onyx, to which must be added the additional cost of transportation and loss from breakage—the proposed increase of 15 cents per cubic foot will be of no practical utility whatever.

In order to enable the owners of those various mines to open up their works, to put their products on the market, and thereby to give employment to thousands of people, we confidently ask that onyx in the rough block be rated under a different heading from marble, and that the tariff be fixed at from two to three dollars per cubic foot—

Sixty-five cents does not reach it at all; it does not come anywhere in the neighborhood of it—

with proportionate rates on manufactured articles; which will be only in proportion to the extra labor expended upon this article as compared with marble.

With great respect, we remain, your obedient servants,

KESSELER BROS.

They inclose what they call an "important question:"

Is there enough of domestic onyx to supply the demand?

This is the important question.

Louis Falkenau, M. E., State assay office, San Francisco, Cal., upon visiting the quarries in 1890, before much work had been done, wrote as follows: "Should the onyx extend all through the hill, as appears highly probable, and the thickness be only 10 feet (a very modest estimate), there are 32,400,000 cubic feet, or 3,240,000 tons of available onyx."

In 1892, after more extensive development of the quarries, Mr. Falkenau wrote as follows: "The area now developed I estimate as about equal to a square the sides of which measure 3,000 feet each, and the vertical height and the horizontal extent of the layers of onyx greatly exceed the average taken by me as a basis for computation in my first report. I consequently feel perfectly justified in stating that by at least doubling the amounts previously quoted by me I will still remain within the bounds of the most conservative estimate possible to the impartial and conscientious investigator." This would make Mr. Falkenau's estimate of 1892 64,800,000 cubic feet. (Full reports amended.)

In August, 1893, Mr. J. J. Fisher, civil engineer and United States deputy mineral surveyor of Arizona, wrote: "On all of the eleven claims onyx has been developed. I consider a very conservative estimate would be 205,004,250 cubic feet (that is, 20,500,425 tons). I estimate by actual measurement that there are 220,671 cubic feet (22,057 tons) of onyx quarried on the dumps." (Full reports amended.)

Mr. J. F. Blandy, M. E., Territorial geologist of Arizona, writes: "Sufficient is known to enable us to say that there is enough to maintain the supply for generations. Average importations of marble and onyx are 450,000 cubic feet a year."

With regard to the San Louis Obispo onyx mines in California it may be safely stated that the same contain about 16,000,000 cubic feet of onyx, according to present indications. We are not in possession of the statistics of the different other mines in this country.

So, in the opinion of these gentlemen, whenever it can be shown that the Almighty has provided us with 205,000,000 cubic feet of onyx the old rate as it stood at 50 cents per cubic foot is not sufficient, and the addition of 15 cents will not reach the necessity, but the tariff must be raised from two to three dollars a foot because we are provided with these hundreds of millions of cubic feet of it in our hills.

I have never seen a better illustration of what has seemed to me to be the absurd claims of protection than is afforded by this letter, and for that reason I present it to the Senate. When the time comes to raise the tax from 50 cents to two or three dollars per cubic foot, I hope the arguments of this letter will receive some consideration at the hands of the Senate.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Missouri, which will be stated.

The SECRETARY. After the word "agate," in line 22, paragraph 112, it is proposed to insert "20 per cent ad valorem."

Mr. VEST. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HANSBROUGH (when his name was called). I am paired with the senior Senator from Virginia [Mr. DANIEL].

Mr. QUAY (when his name was called). I am paired with the Senator from Alabama [Mr. MORGAN], who, I believe, is not present or voting. If he were present, I should vote "nay."

Mr. WELLINGTON (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. BUTLER]. In his absence, I withhold my vote.

Mr. WETMORE (when his name was called). I have a pair with the senior Senator from Georgia [Mr. BACON].

Mr. WILSON (when his name was called). I have a general pair with the Senator from Florida [Mr. PASCO].

The roll call was concluded.

Mr. TILLMAN. Has the Senator from Nebraska voted?

The VICE-PRESIDENT. He has not voted.

Mr. TILLMAN. Then I withhold my vote, as I have a pair with that Senator.

Mr. BATE (after having voted in the affirmative). I desire to inquire if the junior Senator from Kentucky [Mr. DEBOE] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. BATE. I withdraw my vote, as I am paired with that Senator.

The result was announced—yeas 17, nays 29; as follows:

YEAS—17.

Caffery,	Lindsay,	Murphy,	Vest,
Chilton,	McLaurin,	Pettus,	Walthall.
Cockrell,	Mallory,	Rawlins,	
Faulkner,	Mills,	Roach,	
Jones, Ark.	Mitchell,	Turpie,	

NAYS—29.

Aldrich,	Fairbanks,	Lodge,	Pritchard,
Allison,	Foraker,	McBride,	Proctor,
Baker,	Frye,	McMillan,	Sewell,
Burrows,	Gallinger,	Mason,	Spooner,
Cannon,	Hale,	Nelson,	Stewart.
Carter,	Hanna,	Perkins,	
Chandler,	Hawley,	Platt, Conn.	
Davis,	Jones, Nev.	Platt, N. Y.	

NOT VOTING—43.

Allen,	Gear,	McEnery,	Teller,
Bacon,	George,	Mantle,	Thurston,
Bate,	Gorman,	Martin,	Tillman,
Berry,	Gray,	Morgan,	Turner,
Butler,	Hansbrough,	Morrill,	Warren,
Clark,	Harris, Kans.	Pasco,	Wellington,
Clay,	Harris, Tenn.	Penrose,	Wetmore,
Cullom,	Heitfeld,	Pettigrew,	White,
Daniel,	Hoar,	Quay,	Wilson,
Deboe,	Kenney,	Shoup,	Wolcott.
Elkins,	Kyle,	Smith,	

So the amendment was rejected.

Mr. CANNON subsequently said: On the last roll call I voted inadvertently. I was paired with the Senator from Arkansas [Mr. BERRY]. I ask unanimous consent that my vote on that roll call may be withdrawn.

Mr. PLATT of Connecticut. I think there is a rule which prevents that from being done.

The PRESIDING OFFICER (Mr. FAULKNER in the chair). The Chair is of the opinion that the rule does not prevent a change or a correction. The Secretary will read the rule.

The Secretary read as follows:

RULE XII.

VOTING, ETC.

1. When the yeas and nays are ordered, the names of Senators shall be called alphabetically; and each Senator shall, without debate, declare his assent or dissent to the question, unless excused by the Senate; and no Senator shall be permitted to vote after the decision shall have been announced by the Presiding Officer, but may for sufficient reasons, with unanimous consent, change or withdraw his vote. No motion to suspend this rule shall be in order, nor shall the Presiding Officer entertain any request to suspend it by unanimous consent.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah that his vote be withdrawn and his pair announced as stated? The Chair hears none, and it is so ordered.

Mr. ALDRICH. I ask that we may now return to paragraph 111, and I move to modify the committee amendment as indicated on the paper which I send to the desk.

The SECRETARY. After the word "marble," in line 3, page 30, paragraph 111, it is proposed to strike out the words "or onyx;" after the word "foot," in line 4, it is proposed to insert the words "onyx in block, rough or squared, $1.50 per cubic foot."

Mr. VEST. That is about 300 per cent increase over the existing law, is it not?

Mr. JONES of Arkansas. Just 300 per cent.

Mr. ALDRICH. I do not think it is quite so much.

Mr. JONES of Arkansas. It is just 300 per cent.

Mr. VEST (to Mr. JONES of Arkansas). Is that the article you were reading about?

Mr. JONES of Arkansas. Yes; of which we have 205,000,000 square feet.

Mr. VEST. I suppose this is because none of it is found in the United States and we are dependent upon the importations from abroad, or is it because there is too much in this country? It must be one or the other. According to the information which the Senator from Arkansas read, the supply here is inexhaustible, and yet it is proposed to increase the duty 300 per cent over existing law.

Mr. ALDRICH. I think 300 per cent would be nearer than 300 per cent.

Mr. VEST. It is nearer 300 per cent than 200 per cent.

Mr. ALDRICH. It pays duty now as marble.

Mr. JONES of Arkansas. At 50 cents.

Mr. ALDRICH. At 60 cents.

Mr. JONES of Arkansas. Then it is 250 per cent.

Mr. GALLINGER. Sixty-five cents.

Mr. PLATT of Connecticut. Sixty-five cents.

Mr. CAFFERY. Fifty cents a cubic foot, and it is proposed to increase it to $1.50 per cubic foot.

Mr. JONES of Arkansas. I thought it was 50 cents.

Mr. ALDRICH. Marble comes in at 50 cents a foot. The increase, therefore, is 300 per cent—three times the present rate.

Mr. CAFFERY. Mr. President, it appears to me, after the Senator from Arkansas has read the statement by some gentleman in California, that our brethren on the other side of the Chamber ought to pause before they put a duty of $1.50 a cubic foot on onyx. There has been no statement made as to any necessity for the increase of tariff. There is not a single fact adduced to warrant the increase of duty from 50 cents a cubic foot to $1.50. Onyx is not a pauper. It is a natural formation. It is one of the benefactions of Providence. Surely it can not be held that any protective tax or tariff is necessary to make onyx any better.

Are there any facts produced, even of a superficial character, as to the comparative cost of labor in countries producing this onyx and in the United States? Not one single fact of any character whatever has been adduced in order to sustain before the American people this extraordinary increase. Under the McKinley Act we are told the tariff was 50 cents a cubic foot. According to the programme announced by the Senator from Rhode Island, it is not the purpose of the pending bill to raise the rates of the McKinley Act. He pointed out that that act had failed of its purpose in a great many particulars. He pointed out that protection had ceased to be a revenue-producing article, and he had to turn to the Democratic principle of a tariff for revenue to eke out the deficiency which he says would be brought about by the operation of a too drastic protective tariff. He has gone to internal-revenue taxes again, and duties upon tea and sugar, and now he has gone back to his ancient love with much more ardor, and embraces the goddess of protection with all the fervor of a new love.

Mr. President, it occurs to me that the Senator from Rhode Island sounded a note of alarm as to the maintenance of the protective theory, and I submit to him whether or not the uncalled for and unjustified increase in the tariff will not in the end dig the grave of protection itself. I do not know to what use onyx is applied, but I would suppose that it is an article of universal consumption. It is needed by the poor and rich alike, and I can therefore see no reason, and I ask the Senator from Rhode Island to please explain the reason, why the tariff rate is to be increased from 50 cents per cubic foot to $1.50.

Mr. ALDRICH. It is raised in order to develop the deposit of onyx in Arizona and other parts of the United States in competition with the Mexican product. So far as I understand it, the price here of Mexican onyx of the better quality is about $12 per cubic foot. Of course $1.50 a foot on that would be 12½ per cent, and I think the price varies from $6 to $12 a cubic foot. The Senator from California [Mr. WHITE] is well informed in regard to the matter, and I am very glad to give him an opportunity to explain it.

Mr. VEST. I will ask the Senator from Rhode Island if it is not a fact that the imports have decreased under the present duty?

Mr. ALDRICH. I think not. I think very much larger importations have come in within the last few years. It has gone into more general use everywhere throughout the country, and it does not seem to me that the rate suggested is an extremely high one, in view of the character of the product.

Mr. VEST. The Senator from Rhode Island says he thinks the imports have not decreased. In 1893, by the comparative statement, the imports were $76,603, while in 1896 they were $65,816.81. It shows a decrease.

Mr. WHITE. I desire to call the attention of the Senator from Missouri to the fact that that includes a great many other things besides onyx.

Mr. ALDRICH. What the Senator from Missouri was reading was miscellaneous manufactures of marble.

Mr. VEST. That includes this.

Mr. ALDRICH. It does not include onyx in block. There is no question whatever but that the importations of onyx in block have increased very largely in the last few years.

Mr. JONES of Arkansas. The first paragraph is "Onyx or marble, in block."

Mr. VEST. That is the way it reads.

Mr. ALDRICH. That is not the page from which the Senator from Missouri was reading. It is the page preceding.

Mr. VEST. I was reading from the comparative statement.

Mr. JONES of Arkansas. It was from that very page. On page 48, the comparative statement, I find:

Marble or onyx, in block, rough or squared only.

Then the importations are given at $76,000 in 1893 as against $65,000 in 1896.

Mr. WHITE. I stated some time ago that I thought this classification ought to be changed, and the committee, I understand, have introduced an amendment changing the classification by raising the tariff upon onyx.

My friend the Senator from Louisiana [Mr. CAFFERY] has spoken of onyx as an article of general consumption. It is in the nature of a luxury. It is not in any sense on the same plane as marble, and the Senator from Vermont [Mr. PROCTOR], who is very familiar with the manufacture of marble, I think will coincide with me when I say that the article itself is a very different one; that it is of a much higher grade, more difficult to procure, and more difficult to manufacture.

It is consumed in a far less general mode. Thus in places in which the decoration is quite expensive, where it is desired to have something in the nature of a marble (but where it is not necessary to have something which will bear the wear and tear of marble), and will present a more pleasing surface to the eye, onyx is used. It is used also for small pieces of furniture, for the tops of small tables, but not in large quantities.

It is not an article of general consumption, as is marble, nor is it adapted to many of the uses to which marble is put. It is brittle, and while, as I have said, much more pleasing to the eye, it can not be utilized to stand the strain that marble will. It is essentially a luxury. The figures in the comparative statement alluded to by the Senator from Missouri refer to marble or onyx in block, etc., and it is utterly impossible to segregate them. I do not know what the importations have been. So far as my own experience in the matter is concerned, it is confined to one large deposit, which was worked for a while at very small profit, and has been worked, I think, with very poor success during the last year and by very few men.

If we are to put a tax upon those things which are used for luxurious purposes, and I believe most of us are agreed upon that, there ought to be a discrimination between marble and onyx in favor of the onyx product, just as there ought to be in favor of diamonds as against some other kinds of stone of inferior value. When these articles were put in the same schedule, a mistake was made, and if we are to pursue the policy indicated by this bill at all, or, indeed, any such policy, we ought to make the discrimination to which I have referred. Relatively, as far as the value is concerned, I suppose the duty upon onyx will be below the average percentage in the pending bill, and if we are to have marble on the dutiable list at all, and that seems to have been the policy always pursued, there ought to be a discrimination in favor of onyx. It will not fall upon the poor. It is not imposed upon an article of general consumption, nor is it imposed upon anything that is used as a general rule by the poor classes of the country.

Of course marble has a general use, and it is found all over the United States. The fame of my friend from Vermont [Mr. PROCTOR] has extended from one shore to the other, not only because of his great personal prominence and ability, but likewise because of his familiarity with the subject; and I wish to ask him whether it is not true that onyx is of greater value than marble, and whether he does not think, from his personal knowledge of the matter, although he is not interested in this product, that there ought to be a duty discriminating in favor of onyx?

Mr. PROCTOR. Onyx is more rarely found and is more expensive in production and manufacture. It is found largely in the form of bowlders instead of ledges. I certainly think it is proper that it should have a higher duty than marble. It is a more valuable product and brings a greater price.

Mr. PERKINS. Mr. President, I desire to say only a word. I hoped that we would have the support of our friend the Senator from Arkansas [Mr. JONES] in favor of this duty, and therefore I was surprised that he should read a letter and prospectus from some Munchausen company, who think they have discovered a vast onyx mine and propose to distribute the results among the favored ones. Professor Merrill, curator at the National Museum, states that there is onyx in large quantities in the State of Arkansas. Who needs the tariff more than the State of Arkansas to develop this great hidden wealth and bring it out and put it into circulation among our people? In the State which I have the honor in part to represent we have made a beginning. A few years ago we discovered in one of our counties, San Luis Obispo, a deposit of onyx. It lies in strata; as my friend the Senator from Vermont says, in the form of bowlders. It is very brittle. The deposit is a long way from navigation or from railroad trains, is usually in high altitudes, and is far more difficult to mine, not being in strata, like marble and granite. I read from a document before me:

Marble and onyx, while derived from the same elements, are entirely dissimilar in their formation and character.

That is well known to all of us who have observed it.

Marble is an aggregation of small crystals, entirely opaque, while onyx is a crystallin mass throughout, of rare translucency, and possessing the beautiful play of reflection from the interior, which, with its varied colors, constitutes its great beauty.

Marble is generally found in immense natural beds, easily accessible to railroads and other conveyances, and can be taken out in blocks of any convenient size at small expense, while onyx is almost invariably found at great elevations and in inaccessible locations. The formation is generally in small sizes, and it must be handled with great care on account of its brittleness, and transported at heavy expense.

Marble is tractable, easy sawed, worked, and polished. Onyx is rebellious in its nature, of much greater density and weight, and takes from four to five

times as much labor to shape, work, and polish it, particularly in the case of the higher qualities. Commercially, marble is extensively used in large blocks, and onyx is used very largely in slabs of an inch thick and under, the onyx having an intrinsic value many times that of marble.

I have been impressed with the fact of its beauty in visiting some of the places west of the Rocky Mountains where temperance beverages are distilled. The onyx is sought to be used for counters and for panel work. Millionaires indulge in the luxury. We wish to give employment to our laboring men, to take the onyx from the mines, saw it, and polish it, and thus get some of the wealth that the great trusts of the country have and distribute it among the workingmen.

As my colleague has stated, onyx has not been discovered in very large quantities nor in very large deposits. The late deposit in Arizona of which my friend the Senator from Arkansas read is all in the future, and I think the truth has been painted in Titian colors in the prospectus. It usually is in such publications.

I think the amendment should go one step further and that there should be a duty upon the superficial or square feet of onyx slab that has been sawn and brought into this country. I believe the greatest producer of onyx in its rarest quality and in the gem of sparkling light is Mexico. I remember that some years since, when in the city of Pueblo, visiting the cathedral. There were magnificent altars and pilasters and beautiful Corinthian columns carved out of onyx. They represented many days and months and years of labor, and it is Mexican labor that we have to fear in competition with foreign onyx. We on this side do not want to take time in debate, but are willing to let our friends on the other side, who can talk so much better than the rest of us, debate these questions. So I do not want to take up the time; but if my friend the Senator from Arkansas will consider the question in the future he will say this is one of the measures that his constituents will thank him or the Republican party for having placed upon our statute books.

Mr. JONES of Arkansas. Mr. President, by the comparative statement submitted to the Senate it appears that marble or onyx in block, rough or squared, of all kinds, was imported in 1893 to the extent of 457,600.33 feet, and there were imported in 1896 338,207.02 feet, nearly 100,000 feet less than were imported in 1893. The revenue derived from that was $758,749.60 in 1893, and $627,736 in 1896. So, while there was a considerable decrease in the amount of importations, there was a comparatively small decrease in the revenue derived from it under the reduced rate of taxation from 65 cents to 50 cents a cubic foot.

Now, I understand that we pretend, in undertaking to pass this bill, that we want to raise more revenue. If this tax is raised from 50 cents to $1.50, there is not a man in the Senate who believes there will be one single cent derived from revenue under this article.

Mr. ALDRICH. Here is one man who believes that exactly. Take the better grades of Mexican onyx, and the rate which we suggest here will not keep out one single cubic foot.

Mr. JONES of Arkansas. I am very much more astonished at the attitude of the Senator from Rhode Island than the Senator from California [Mr. WHITE] was to find me not in favor of the tax on this article. At the rate of taxation now, the importations seem to me clearly to show that we reach about the limit to which it can reasonably be expected to go; and yet there is a proposition here to increase this tax 300 per cent, and under a bill in which we say we are undertaking to raise revenue.

Mr. ALDRICH. I suppose that the Senator from Arkansas will agree with me that the importation of onyx has never been of sufficient importance in any previous tariff bill to have it specifically named. The preparation and use of onyx in this country is practically a new industry, and heretofore in no tariff act, unless in the act of 1894, which the Senator had a great deal to do with, was it thought necessary to make a particular and specific designation of the article of onyx.

Now for the first time it has become of sufficient importance to have a rate fixed, and I am inclined to think that the rate suggested by the committee will prove exactly what the Senator from Arkansas thinks it ought to be, a revenue duty. As I said, the expensive onyx which comes from Mexico will come here and will be used in public buildings, hotels, and elsewhere, and, in my judgment, the question of a difference of a dollar and a half a cubic foot in price will not affect the use at all.

Mr. JONES of Arkansas. Of course it is a matter of conjecture as to what effect this rate will have on the market; nobody can tell; it must be a matter of opinion. The unit of value as given in this paragraph is $1.66 for 1893 and $1.70 for 1890. A tax of $1.50 a cubic foot would be something like 100 per cent on this product.

Mr. ALDRICH. That is marble.

Mr. JONES of Arkansas. Marble and onyx.

Mr. WHITE. The onyx is merely microscopic in quantity and of no particular importance.

Mr. JONES of Arkansas. The two are included in it. We have no information upon that point. That is all we know; and we must take the comparative statement as made up by the statistician of the Treasury Department and sent to the Senate.

Mr. HALE. That is the basis.

Mr. JONES of Arkansas. But the importations clearly come under this classification.

Mr. HALE. The basis was the marble. The onyx was not reckoned, although it had been put in with it as a part of the same clause. The $1.60 does not in any way apply to onyx.

Mr. JONES of Arkansas. Will the Senator explain under what head onyx came in?

Mr. HALE. It did not come in at all except at the general rate. No special rate was fixed upon it.

Mr. JONES of Arkansas. It was certainly imported through the custom-house somehow.

Mr. ALDRICH. As marble.

Mr. JONES of Arkansas. Precisely; as the Senator says, it is included in marble. I can not tell how much was marble, but it was included in the paragraph as onyx, because that is the statement which comes from the Treasury.

Mr. ALDRICH. What the Senator from Maine means is that it did not furnish any correct information in regard to the import price of onyx.

Mr. JONES of Arkansas. Of course every Senator understands that it does not mean that there was this amount of onyx imported and at this price. It was marble and onyx, onyx coming in as marble and classified as marble under the old law. We all understand that. What proportion was marble and what proportion was onyx, I do not know, and I do not suppose anybody else does. But I do know if it had an exceedingly low rate the importations of it would thereby, as one would suppose, be very much facilitated, and we would have larger importations of onyx under this classification than we would have under the new, especially if we make a new classification of it. If instead of a tax of 50 cents a cubic foot we make it a dollar and a half, there certainly will be less importations under the new classification.

The junior Senator from California [Mr. WHITE] says this is an article of luxury. I believe in taxing articles of luxury, but not in imposing such a rate of taxation on articles of luxury as will absolutely defeat taxation altogether. I do not believe in putting a tax even on an article of luxury so high that none of it would come into the country and the revenue be absolutely destroyed from it.

In reply to the suggestion of the senior Senator from California [Mr. PERKINS] that he is surprised to find I am not in favor of a tax on onyx because it is found in my State, I have to say that I am one of those who conscientiously believe that there is no right in the Government of the United States to levy taxes upon the people of the United States except for revenue purposes, and that even though the people of Arkansas might be benefited by the levying of a tax which brings no revenue into the Treasury, but simply enables one class of American citizens to sell their products at higher prices to the balance of the country, while they might get a benefit from that sort of tax, I for one, while I breathe the breath of life, would never be caught favoring a tax of that sort.

I look upon that sort of taxation as robbery clear and simple; and no matter if it is done under forms of law, it does not make it any the less reprehensible; it does not make it any the less objectionable. I believe that there is no right to do it, and I believe that protectionists generally will not willingly and readily admit that they are in favor of levying a tax the sole purpose of which is to take money out of the pockets of the masses of the people, the consumers of any article, to increase the prices that are paid to other people.

There is always a pretense or a claim that there is some revenue to be derived from a tax of this kind. Levying taxes simply for the purpose of taking money from one class of people and giving it to another will not be openly advocated. I do not believe in a tax such as is asked by this Munchausen, spoken of by the Senator from California. And, by the way, this Munchausen is one of the Senator's constituents. I believe he is the only worker of an onyx mine there is in California. I was sorry to hear the Senator apply language of that sort to a manufacturer of this article in the great State of California. I supposed that he was a man entitled to some sort of consideration, and I am sorry the Senator considers him of no higher dignity and importance than the typical liar of all the ages, Munchausen.

I believe, Mr. President, that the imposition of a tax such as this California man wants on onyx will absolutely prevent it from being imported into this country. The committee did not go to the extent this correspondent asked them to go. He wanted from two to three dollars a square foot on the 205,000,000 square feet that are to be found, as he assured us, in the different deposits in the United States. He wanted the owners of it to be able to raise the price above what it is now two or three dollars a square foot. The Senate committee stopped halfway in his request, and if they should succeed in increasing the price of onyx and get it all into

market, it will be a pretty lively tax on the American people as a whole. A dollar and a half a square foot on 205,000,000 square feet of onyx, which is found in unlimited quantities in all parts of the country, would amount to a considerable sum at last.

Mr. RAWLINS. Mr. President, the objection to the proposed amendment is, I understand, that it raises the duty as provided in the present law some 300 per cent. The question which we ought to consider is what relation the proposed duty will have to other duties provided in the bill. I think if the Senator from Arkansas will make inquiry as to the price at which onyx is disposed of in the markets and then compare the duty now proposed by the amendment, he will find that it will in no degree exceed the average duties in the bill.

It is probable, in my judgment, that we are manufacturing and producing onyx in the State which I have the honor in part to represent at not to exceed 30 per cent ad valorem. It is an article which it is exceedingly difficult to produce and to put into form for the market. It has to be handled with the utmost care when manufactured. It is utilized for purposes of ornamentation. There is nothing more beautiful, but it is distinctly a luxury. No one except those who have money to expend lavishly will ever indulge in this sort of luxury.

I am therefore in favor of this increase, while generally in accord with the opinion of the Senator from Arkansas on the question of tariff revision. In order that the duties in the bill may be so adjusted that the burden may be as equally distributed as may be, I shall vote for the amendment.

Mr. CAFFERY. Mr. President, both my friend from California [Mr. WHITE] and my friend from Arkansas [Mr. JONES] made the statement that we produce onyx only for the rich. They based their statement upon the fact that it is a rock or stone of a lustrous, beautiful appearance, and from that they gather that it will be used only as ornaments by the wealthy.

The senior Senator from California [Mr. PERKINS] discusses the question from the standpoint of labor cost. So does the Senator from Rhode Island [Mr. ALDRICH]. It appears that there is a great deal of this rock deposit in Mexico, and it is as against the cheap peon labor of Mexico that he demands this high tariff of 300 per cent over the rates prevailing in the McKinley Act.

It appears that there are 205,000,000 cubic feet of this rock in one State—the State of California—but the testimony of that witness is sharply assailed by the senior Senator from California. He calls him Munchausen. Is it possible that a patriotic gentleman engaged in the delightful service of this California prospector can be a Munchausen? He is asking for the glories of protection. Does protection have the effect of making the promoters of that delightful scheme of government tell Munchausen stories? Why did not the Senator from California compare him to Ananias, the original liar? I do not know that Ananias wanted to be protected, but this prospector from California certainly did when he demanded for this infant rock, placed there by the hands of the Almighty in the formation of the universe, a protection of 300 per cent.

Mr. President, I am not one of those who can see into the statement made by the Senator from California on my right and the Senator from Kansas, that because a particular rock is lustrous and beautiful, because it is fitted for purposes of ornamentation, therefore the poor man ought not to use it. The poor have as much right to use and take as much pleasure in using the beautiful gifts of Providence as the rich. And behind all this must stand some syndicate or some promoter who wants to levy upon the consumers in the United States an additional tax—a burden, rather—of a dollar and a half a cubic foot on the 205,000,000 cubic feet, giving them the nice little sum of about $350,000,000 for one of the beneficences of Providence. I do not care how lustrous it is, how beautiful it is, they have not shown that it costs a dime more to get it out of the quarry than marble, with which it has always been allied in the tariff bills. The tariff upon marble of 50 cents a cubic foot is supposed to equalize the labor of pauper Europe with the high-priced labor of America.

I know something about the peons. I have seen the peons; I have been among the peons. I would not have them if you would give me their labor. They are dear labor if they are given to you. This everlasting comparison of inefficient labor with the most efficient labor in the world, in America, is becoming a little nauseating and fails of its purpose. You have not proved your case. When you have proved that the peon laborer of Mexico gets 12½ cents a day and a free laborer in America gets a dollar and a dollar and a half a day engaged in these occupations of manual labor, you have got to prove something else. You must prove that there is the need for protection other than the comparative rates between such labor as the Mexican peon labor and the highly efficient labor of America.

There is no apology or excuse for this tariff. Perhaps local interests may somewhat confuse a man's mind and becloud his judgment; he wants a tariff upon what will protect his immediate constituents; but I submit, sir, that in legislating for the whole United States, our vision can not be circumscribed to the immediate locality, but its sweep must take in the whole United States, embrace every man, woman, and child in it, and then see how the tariff works.

Mr. WHITE. My distinguished friend from Louisiana slightly exaggerates my position—just slightly—when he says that I am in favor of a higher tax upon onyx than upon marble because onyx appears to be beautiful. So far as I am personally concerned, I suppose I agree with the Senator from Louisiana, who would not tax anything beautiful simply for that reason. I should like to inquire of the Senator from Louisiana whether he ever saw a piece of onyx?

Mr. CAFFERY. I do not know that I have.

Mr. WHITE. I thought not.

Mr. JONES of Arkansas. Did you ever see anybody that has not seen it?

Mr. WHITE. The Senator from Arkansas asks me whether I have ever seen any man who has seen onyx, from which I infer that the Senator from Arkansas never saw it.

Mr. JONES of Arkansas. I did not ask you that question.

Mr. WHITE. Then I misunderstood you. What was the Senator's question?

Mr. JONES of Arkansas. I asked you if you had ever seen anybody who had not seen it.

Mr. WHITE. If I had not seen anyone prior to to-day, I have discovered an individual of that kind at this moment in the person of the Senator from Louisiana, who has responded as the Senator from Arkansas has heard.

Mr. CAFFERY. I stated to the Senator from California that I did not know that I had ever seen it.

Mr. WHITE. Precisely.

Mr. CAFFERY. I have seen what they call onyx, but I did not know whether it was onyx or not; and I did not know whether the people who told me that it was onyx knew anything about it.

Mr. WHITE. That is a condition of negation which fully justifies me in assuming that the basis of the Senator's argument is entirely wanting.

Mr. President, the duty proposed by this amendment is a less ad valorem tax than the tax upon sugar, for which myself and the Senator from Louisiana will vote when we get a schedule that suits us—not the present schedule, which I understand will never be voted upon by the Senate.

In the classification contained in this bill onyx is included with marble, and because there have been, generally, importations including both we are proceeding, it seems, to discuss onyx as if all the arguments applicable to the case of marble applied to onyx. I have said that onyx is a luxury, and my friend the Senator from Arkansas says that he is in favor of taxing luxuries, but not of putting a prohibitive tax upon them. I agree with him; we stand upon exactly the same platform; and I affirm the statement of the Senator from Rhode Island to be correct when he says that this will add to and not diminish revenue. Onyx, which has not been seen, it seems, by a few of those who have spoken upon this matter (at least they are not willing to testify to its identification), is an article of luxury, and it is used by so few that even my distinguished friend from Louisiana is unwilling to stake his reputation upon the proposition that he has ever seen the bona fide article.

As to the proposition that there is a great deal of onyx in the ground, because some one says that there are millions of tons of onyx deposited in the womb of nature, my friend from Louisiana declares that we are going to tax the American people. Why, it is said that there is more gold to be found in the Western mountains than has ever been taken from them; and I suppose that is true. But yet we have not been able to obtain possession of that precious metal, and we probably shall not be able to obtain possession of it all until the present Administration and the present Senate have passed into history.

I repeat, that the tax proposed by the committee on this article is between 30 and 40 per cent ad valorem; that it is a low tax, and that the circumstances would justify the imposition of a much higher tax. The article being used as an article of luxury, it will never be generally utilized. It is true, if we could produce it in vast quantities and with cheap labor, it might be found in the homes of those who are poor; but we know that it is almost impossible now to produce it at a profit in this country; that enterprises have failed in endeavoring to do so, or have at least gone on with very slight profit. While we ought not at the expense of public taxation build up individual fortunes, yet when we must raise revenue, and when it is very doubtful whether the bill will raise enough revenue, there is no wrong, no crime, no inconsistency in imposing this small tax upon an article of luxury at least.

Mr. CAFFERY. I must confess to a want of knowledge of the rocks of the earth and the various different varieties of rocks. I have been shown in my life various stones and rocks stated to be of this, that, and the other character; but when we come to anything of the kind, in the absence of information, I can only answer such questions as the Senator from California put to me by

general negations. I could not tell onyx or marble, being perhaps similar to some other rock, if specimens of the different materials were presented to me.

My friend from California appears to be a very considerable geologist and mineralogist, and to be quite familiar with all these different grades of rock, but I must submit again to the Senator that, whilst I have unbounded confidence in his statements generally, I have not perceived from his statements any evidence whatever of two facts: First, that onyx is a luxury, and, second, that the price of it is so high that this raise of 300 per cent will only amount to 30 per cent ad valorem tariff upon it. The comparative statements of the Bureau of Statistics or any other official source that I know of give no sort of information in this regard, and we must have, I submit to my brother and friend, a little better testimony than he has produced of the market price of this article, of which he does not even declare himself to be entirely competent to speak.

My friend has branched off from this hard and rough subject of marble and onyx to the soft and luscious subject of sugar. He said when the sugar schedule came up, if it suited us, we would vote for it. He in his State is making beet sugar, and I in my State and my constituents are making cane sugar. Now, from the province of absolute scholastic and scientific attainment, my friend has branched off into the province of prophecy. Neither the present schedule on sugar nor the proposed one in the Dingley bill will meet with my approval. I shall vote for neither.

Mr. WHITE. The Senator from Louisiana did not understand me as saying that he approved either, I trust.

Mr. CAFFERY. I did not understand the Senator to say so.

The present tariff on sugar suits me. It is an ad valorem tariff upon an article of revenue. You want a tariff upon an article that is not shown to be able to produce one dime of revenue. I only want a tariff on articles that will produce revenue; and I say here distinctly that if, in my opinion, sugar were not an article to produce revenue, I would not vote for a duty on it.

Mr. WHITE. The Senator will permit me to say that if the duty upon onyx were not a strictly revenue duty, I should not vote for that.

Mr. CAFFERY. Mr. President, it would require but infinitesimal space to hold the vast amount of revenue which would come from onyx, when not a single dime has ever been reported as having been derived from it; yet it is a little invidious for Democrats to be drawing a distinction between a revenue article and one that the Senator from California knows to be not a revenue article. The tariff on this article will be absolutely prohibitive. How can this heavy article be transported from Mexico to compete with the beds of it lying in the United States? The transportation feature is a protection, as it is in nearly all articles of great bulk. That is protection sufficient. Do you want, in order to develop the onyx beds in California, that a tariff should be placed upon an article to be cultivated into great growth that is now a mere infant? Is that the purpose? Then it is a protective purpose, and not a Democratic purpose.

I believe that the ability, the capacity, the ingenuity, the skill of Americans can develop from mother earth everything lying anywhere in her soil as cheaply as anybody in the world, and I do not believe they want any protection. You can not put this protective mantle around the blessings of Providence. We have them; we have this onyx lying in the earth in California, and all the purpose of a protective tariff upon it is simply to allow the owners of these beds, or the exploiters of this mineral, to charge more for it to the American people than they could otherwise get.

Mr. JONES of Arkansas. Mr. President, it seems to me that we ought not to get away from the point involved in this discussion. The only theory on which this tariff is proposed to be imposed, I presume, is to equalize the labor cost between this country and other countries. Now, the question is the amount of labor that is necessary to get out a cubic foot of marble as against a cubic foot of onyx. Onyx is a softer material than marble; its location is known in millions and millions of cubic feet. There is no difficulty about its location.

It is the mere question of the labor involved in getting out a cubic foot of this material. With the greater labor necessary in the United States to produce a cubic foot of marble than of onyx, we have had heretofore a tax of 50 cents to protect American labor in getting out a foot of marble, and we propose to raise it now to 65 cents, and to the smaller amount of labor necessary to get out a cubic foot of onyx we propose to give a protection of $1.50.

There can be no justification for this rate on any theory, even of protection. It can not be defended except by frankly admitting that the purpose of the Senate is to give to those who happen to own hills where onyx is located a higher price than they could otherwise get for what the Almighty has put within their reach without charge.

Mr. PERKINS. I will say to my friend from Arkansas that it costs fully three to four times as much, to my knowledge, to mine onyx as it does to mine marble.

Mr. JONES of Arkansas. Why is that? Onyx is softer and easier to work.

Mr. PERKINS. My friend evidently does not understand how onyx is located in the earth as compared with marble. It has never yet been found and worked in any mine in the United States except in the bowlder formation in detached bunches; and the largest piece that has been found in California of which I have any knowledge was some 10 or 15 feet long. It is mined by labor that costs $2.50 per day, while the same class of work is performed in Mexico by labor that costs 50 cents per day.

Mr. JONES of Arkansas. What is the cost of quarrying marble at the same time?

Mr. PERKINS. We have a marble quarry in Inyo County, where the wages are about the same per day; but one miner will mine 5 tons, 40 cubic feet to the ton, of marble while getting 1 ton of onyx.

Mr. JONES of Arkansas. The gentleman whose letter I read a short time ago to the Senate gave the statements of two scientific men who gave the contents of one location at 3,000 feet to the side and 10 feet thick. That was located in the Senator's own State, and located by a man who claimed to be the only miner and producer of this article in that great Golden State of the West.

Mr. PERKINS. I will correct my friend again. That was in Arizona, and was in the imagination of the writer. I think he originally came from Arkansas, and now lives in New York, and is located in Wall street. His prospectus was drawn in New York at all events. It referred simply to the surface formation. It might have been all onyx, or but 20 per cent of it might have been onyx. It has not yet been developed; it is yet in its primitive state, so far as we have any knowledge.

Of course it is very easy to write a prospectus in Titian colors, in order that people may be invited to see the beautiful polished marble in some temperance saloon in the city; but, nevertheless, I speak advisedly when I speak of those mines in California, in San Luis Obispo County, where they have never developed any defined quarry of onyx.

Mr. JONES of Arkansas. The letter I read was postmarked "San Francisco," and if I am not mistaken that is in California.

Mr. PERKINS. Certainly.

Mr. JONES of Arkansas. And the writer of it claimed to be a citizen of California. Whether he was or not, I do not know. He may have been a Munchausen. I hope, if he is, he is the only one in California. I have no doubt the writer was in California, and lived in California, and he pretended in his letter to be mining onyx in California. He said there was onyx in Arizona, New Mexico, Arkansas, and a number of other States, and he was doubtless right in that respect; but that that letter came from a citizen of California who claimed to be working California onyx, I imagine the Senator will not be able to deny after he has looked at the letter. I am sorry it has gone from me to the Reporter, but it will be in the RECORD to-morrow morning as it was written by the individual, and then the Senator can see it.

Mr. PERKINS. I will ask the Senator if it was a typewritten letter?

Mr. JONES of Arkansas. The letter was not written, but was printed, with my name written at the top. I presume the letter was sent to other Senators as well as to me, and I presume every Senator had a copy of it. If the Senator from California knew that this was an Arkansas man masquerading in Wall street under false pretenses, and pretending to be a Californian for the purpose of respectability, the Senator ought to have exposed him before now.

Mr. WHITE. Mr. President, I dislike to prolong this discussion, but looking at it coldly as it appears before us, the case seems to be about this, that those who claim to know something about this, who at least affirm that they do, and who reside in California and have seen onyx and are willing to testify accordingly, make a declaration regarding it, and then witnesses go upon the stand who declare that because they do not know as much as those who do know, therefore there is nothing in the proposition. I am willing to submit the case upon that kind of testimony.

Mr. JONES of Arkansas. It is a most astonishing thing to me that my friend from California should undertake to create the impression that there is anything remarkable about onyx. I doubt if there is a house in the city of Washington or in the State of Maryland that has not a piece of onyx in it. Everybody knows what it is, everybody has seen it, and everybody understands that it is a form of marble. It is an article that is used for making clocks, for making tables, and for making all sorts of ornaments that are used in houses everywhere; and it is astonishing to me that my friend from California should undertake at least to speak as if he supposed that a great many people had no conception of what onyx was. Everybody understands perfectly well what it is, and the effort to increase this tax 300 per cent above what it is now is indefensible and can not be laughed into respectability.

Mr. WHITE. I simply took the admission of parties as evidence. I concede that confession alone does not establish the corpus delicti, and I am willing again to rest the case.

The PRESIDING OFFICER. The question is on the amendment to the amendment reported by the committee.

Mr. JONES of Arkansas. I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CAFFERY (when his name was called). I am paired with the Senator from Michigan [Mr. BURROWS].

Mr. CANNON (when his name was called). I am paired with the junior Senator from Arkansas [Mr. BERRY]. If he were present, he would vote "nay" and I should vote "yea."

The PRESIDING OFFICER (when Mr. FAULKNER'S name was called). The present occupant of the chair is paired with the Senator from West Virginia [Mr. ELKINS]; otherwise he would vote "nay."

Mr. PENROSE (when his name was called). I am paired with the junior Senator from Delaware [Mr. KENNEY]. Were he present, I should vote "yea."

Mr. PLATT of New York (when his name was called). I am paired with the junior Senator from Louisiana [Mr. MCENERY], and therefore withhold my vote.

Mr. WETMORE (when his name was called). I am paired with the Senator from Georgia [Mr. BACON], and therefore withhold my vote.

The roll call was concluded.

Mr. MCMILLAN. I am paired with the Senator from Kentucky [Mr. LINDSAY], who has not voted, and I therefore withhold my vote.

Mr. TILLMAN. I am paired with the Senator from Nebraska [Mr. THURSTON], and therefore withhold my vote.

Mr. BATE (after having voted in the negative). I desire to inquire if the junior Senator from Kentucky [Mr. DEBOE] has voted?

The PRESIDING OFFICER. The Chair is informed that the Senator from Kentucky has not voted.

Mr. BATE. Then I withdraw my vote, as I am paired with that Senator.

The result was announced—yeas 31, nays 17; as follows:

YEAS—31.

Aldrich,	Frye,	McBride,	Sewell,
Allison,	Gallinger,	Nelson,	Shoup,
Carter,	Gear,	Perkins,	Spooner,
Chandler,	Hale,	Platt, Conn.	Stewart,
Clark,	Hanna,	Pritchard,	Warren,
Davis,	Hawley,	Proctor,	Wellington,
Fairbanks,	Jones, Nev.	Quay,	White.
Foraker,	Lodge,	Rawlins,	

NAYS—17.

Chilton,	McLaurin,	Murphy,	Vest,
Clay,	Mallory,	Pettus,	Walthall.
Cockrell,	Mills,	Roach,	
Harris, Kans.	Mitchell,	Smith,	
Jones, Ark.	Morgan,	Turpie,	

NOT VOTING—41.

Allen,	Deboe,	Kyle,	Platt, N. Y.
Bacon,	Elkins,	Lindsay,	Teller,
Baker,	Faulkner,	McEnery,	Thurston,
Bate,	George,	McMillan,	Tillman,
Berry,	Gorman,	Mantle,	Turner,
Burrows,	Gray,	Martin,	Wetmore,
Butler,	Hansbrough,	Mason,	Wilson,
Caffery,	Harris, Tenn.	Morrill,	Wolcott.
Cannon,	Heitfeld,	Pasco,	
Cullom,	Hoar,	Penrose,	
Daniel,	Kenney,	Pettigrew,	

So the amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question recurs on the amendment of the committee as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed at paragraph 113, on page 31.

Mr. VEST. I move to strike out the word "fifteen," before the words "per cent," and put these articles upon the free list. I ask for the yeas and nays upon the amendment.

Burr stones are free under the Wilson Act, and now it is proposed to put a duty of 15 per cent ad valorem on them. If there is any excuse for that sort of legislation, I do not know what it is. Burr stones are articles of absolute necessity.

The PRESIDING OFFICER. The Chair understands the motion of the Senator from Missouri to be to strike out paragraph 113.

Mr. VEST. Yes; for the purpose of putting burr stones on the free list.

The PRESIDING OFFICER. The amendment of the Senator from Missouri [Mr. VEST] will be stated.

The SECRETARY. It is proposed to strike out paragraph 113, on page 31, as follows:

113. Burr stones, manufactured or bound up into millstones, 15 per cent ad valorem.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 114, line 9, before the word "cents," to strike out "ten" and insert "fourteen;" so as to make the paragraph read:

114. Freestone, granite, sandstone, limestone, and other building or monumental stone, except marble and onyx, unmanufactured or undressed, not specially provided for in this act, 14 cents per cubic foot.

Mr. VEST. I move to strike out "fourteen" and insert "seven;" and on that I intend to call for the yeas and nays.

I should like to be heard just a minute upon this paragraph. Here is a rise of 3 cents over the McKinley Act—from 11 to 14 cents. The rate in the Wilson Act was 7 cents, and the comparative statement shows that of manufactures of stone we imported into this country in 1896, $625,213 worth; that we imported of rough stone $21,333, and of dressed stone $320,432.99 worth, making a balance of trade in favor of the United States of some $175,000 or $180,000. Notwithstanding the fact that we supply the domestic market and export this large amount I have mentioned, the exports were $635,215.

Mr. President, the Senator from Rhode Island [Mr. ALDRICH] was kind enough to inform us, I believe on Saturday last, that there were but five or six places in this bill where the committee had increased the rates over those in the McKinley Act. Here is a plain rise of 3 cents. If there is any sort of excuse for it, I do not know it. Of course that is chargeable to my ignorance. Here is a manifest and palpable departure from the McKinley Act, which was the very highest taxation we ever had in this country, and an increase of 3 cents specific.

The PRESIDING OFFICER. The amendment proposed by the Senator from Missouri [Mr. VEST] will be stated.

The SECRETARY. In paragraph 114, on page 31, line 9, before the word "cents," it is proposed to amend the committee amendment by striking out "fourteen" and inserting "seven."

Mr. CAFFERY. Looking at paragraph 114, I see that in 1893 there were 147,416.11 cubic feet of this stone imported, and in 1896 there were 65,182.33 cubic feet imported. This, therefore, was a diminishing import under a diminished tariff, which the McKinley law made 11 cents and the present law makes 7 cents. Now, I hope that a witness whom I will cite in this particular will not be called a Munchausen or of any kindred or relationship whatever to Ananias. This witness is Mr. John J. Allen, of Brooklyn, who states in a long communication to the Committee on Ways and Means of the House of Representatives:

The brownstone or freestone industry is therefore essentially an industry to be fostered. Sandstone has so largely entered into use as a building material that it may properly be regarded as a necessity and not a luxury. It has become a standard article of architectural use as well as of ordinary masonry construction.

Now, we have not here an article of luxury upon which the argument can be based that the rich ought to be taxed irrespective of income or revenue, but we have an article of everyday use, of absolute necessity, one that every man of ordinary means may avail himself of in making his house or any other structure that he desires; and in the face of the fact that we export more of this stone than we import, and that under the lower rates of the Wilson law a less amount was imported than under the higher rates of the McKinley law, we are asked to raise the rate of duty 3 cents, from 11 to 14 cents—3 cents higher than the McKinley rate.

This is certainly not in line with the declaration of the Senator from Rhode Island, who said he wanted a moderate tariff, in order that there might be some permanency insured through this tariff legislation. I submit to the Senate whether this rise can be justified on any ground, either of protection or of revenue.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from Missouri [Mr. VEST] to the amendment proposed by the committee.

Mr. VEST. I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BATE (when his name was called). I am paired with the Senator from Kentucky [Mr. DEBOE].

Mr. CAFFERY (when his name was called). I am paired with the Senator from Michigan [Mr. BURROWS].

Mr. CANNON (when his name was called). I am paired with the junior Senator from Arkansas [Mr. BERRY]. If he were here, he would vote "yea" and I should vote "nay."

Mr. MCMILLAN (when his name was called). I announce my pair with the Senator from Kentucky [Mr. LINDSAY].

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were present, he would vote "nay" and I should vote "yea."

Mr. PLATT of New York (when his name was called). I announce my pair with the junior Senator from Louisiana [Mr. MCENERY].

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON].

The roll call was concluded.

Mr. HOAR. I transfer my pair with the Senator from Washington [Mr. TURNER] to the Senator from Illinois [Mr. MASON], and I will vote. I vote "nay."

Mr. HARRIS of Kansas. I announce my pair with the Senator from Wyoming [Mr. CLARK].

Mr. MCMILLAN. In order to make a quorum I will vote. I vote "nay."

Mr. PLATT of New York. I will vote in order to make a quorum. I vote "nay."

The result was announced—yeas 18, nays 27; as follows:

YEAS—18.

Bacon,	Jones, Ark.	Murphy,	Turpie,
Chilton,	McLaurin,	Pettus,	Vest,
Clay,	Mills,	Rawlins,	Walthall.
Cockrell,	Mitchell,	Roach,	
Faulkner,	Morgan,	Smith,	

NAYS—27.

Aldrich,	Frye,	Jones, Nev.	Pritchard,
Allison,	Gallinger,	Lodge,	Quay,
Burrows,	Gear,	McBride,	Sewell,
Carter,	Hale,	McMillan,	Shoup,
Chandler,	Hanna,	Perkins,	Spooner,
Fairbanks,	Hawley,	Platt, Conn.	Wetmore.
Foraker,	Hoar,	Platt, N. Y.	

NOT VOTING—44.

Allen,	Deboe,	Lindsay,	Proctor,
Baker,	Elkins,	McEnery,	Stewart,
Bate,	George,	Mallory,	Teller,
Berry,	Gorman,	Mantle,	Thurston,
Butler,	Gray,	Martin,	Tillman,
Caffery,	Hansbrough,	Mason,	Turner,
Cannon,	Harris, Kans.	Morrill,	Warren,
Clarke,	Harris, Tenn.	Nelson,	Wellington,
Cullom,	Heitfeld,	Pasco,	White,
Daniel,	Kenney,	Penrose,	Wilson,
Davis,	Kyle,	Pettigrew,	Wolcott.

So the amendment to the amendment was rejected.

The PRESIDING OFFICER (Mr. FAULKNER in the chair). The question recurs on agreeing to the amendment reported by the Committee on Finance.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 115, page 31, line 14, before the words "per centum," to strike out "forty" and insert "fifty;" so as to make the paragraph read:

115. Freestone, granite, sandstone, limestone, and other building or monumental stone, except marble and onyx, not specially provided for in this act, hewn, dressed, or polished, 50 per cent ad valorem.

Mr. VEST. I move to strike out "fifty" and insert "thirty."

Mr. President, it becomes my melancholy duty to call the attention of the Senator from Rhode Island to another rate in excess of that in the McKinley Act. He informed us that there were only five or six. I think we have already gone over some thirty or forty—I have not enumerated them—and here is another duty exceeding that in the McKinley Act. The further we go with this bill, I am sorry to say, the more evident it is that our friends on the other side have lost all respect and veneration for their great ideal tariff act, named after the President of the United States. I ask for the yeas and nays on the question of agreeing to the amendment to the amendment.

Mr. LODGE. Mr. President, I do not desire to take up any time on this schedule or on this particular duty, but I do wish to say that it is far from being a high duty. It strikes me and always has struck me that it is one of the lowest, in view of the comparative labor cost. The labor cost here is just double what it is in Scotland, and it is a very heavy competition for us to meet. I myself think the duty ought to be a great deal higher. The cost of the product is almost entirely labor, and having to pay here just double wages, renders it absolutely necessary, unless we want to drive the granite industry out of this country, to give it adequate protection. I consider this very far from what it ought to be. It is less than what is given to marble.

Mr. GALLINGER. Mr. President, I shall not occupy much time, as I am very anxious to vote on the amendment, but I wish to put in the RECORD some facts concerning the matter under discussion.

First, without reading, I ask permission to insert in the RECORD an extract from a letter received by me from J. G. Batterson, jr., who is very largely interested in the manufacture of granite in my own city as well as in other cities of the country, and whose firm furnished the beautiful granite that was used in the construction of the Congressional Library. I ask permission to have the letter inserted in the RECORD without reading.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and that will be the order.

The letter is as follows:

NEW YORK, *May 28, 1897.*

MY DEAR SENATOR: You will be conferring a great favor and earning the everlasting gratitude of the stone cutters and manufacturers of New England if you succeed in increasing the tariff on finished work to a point where American labor can compete with the foreign product. There are only a few concerns in the United States who make it a business of importing, and the majority of those have little or no financial standing; and any statements made by them as to hardships imposed upon them by increase of tariff are of no importance as compared with the other side of the question.

There are about 15,000 stonecutters in the United States, and 10,000 of these men are employed in New England. The granite centers, such as Quincy, Barre, Concord, and Westerly, have suffered severely during the past few years of hard times; and the small work, such as headstones and small monuments costing from $100 to $500, on which the small manufacturers have been depending for their work, has been, through competition with foreign granites, so cut to pieces that there is nothing left in it for any except those handling foreign work on commission.

Yours, truly,

J. G. BATTERSON, Jr.

Hon. JACOB H. GALLINGER,
United States Senate Chamber, Washington, D. C.

Mr. GALLINGER. I also ask permission to insert in the RECORD a resolution adopted by the Commercial Club of Concord, N. H., touching this question.

The PRESIDING OFFICER. If there be no objection, the resolution will be printed in the RECORD. The Chair hears none.

The resolution is as follows:

CONCORD, N. H., *May 29, 1897.*

DEAR SIR: At a meeting of the Concord Commercial Club, held this date, the following resolution was unanimously adopted:

"*Resolved*, That the Concord Commercial Club heartily indorses the action of the Concord Granite Manufacturers' Association looking to the securing of a sufficient tariff on imported granite to equalize the labor cost of the product between this and foreign countries."

Respectfully, yours,

H. H. CHASE, *Secretary.*

Hon. J. H. GALLINGER,
United States Senator, Washington, D. C.

Mr. GALLINGER. I will read a letter received a short time ago from T. P. Sullivan, of Concord, N. H., who has had very large experience in the matter of manufacturing granite, but who is not now in that business. He writes me as follows:

CONCORD, N. H., *May 10, 1897.*

MY DEAR SENATOR: Your favor of the 6th is at hand; also a copy of the Dingley amended tariff bill. I would say that of course I am interested in the granite end of it, although I am entirely out of the business; but nevertheless I am interested in every item in the bill that keeps United States dollars to be spent in the United States instead of having them spent in any other country. As to the granite part of it, the item on the rough material is probably all right, because I think from the nature of the European quarries we can not get hurt from that source; but there are some in Canada and the Provinces that we should have no special cause for allowing to be opened up at our expenses; but I think 14 cents sufficient.

As to the duty on dressed granite, it should be more than 50 per cent ad valorem. While 50 per cent may look large, the real fact is that 50 per cent of the duty on the actual cost is as much as we ever get on account of no real supervision or intelligent inspection at the port of shipment. To-day the entire granite importation is in the hands of combinations that control the price and control who the buyers are to be on this side, and in many cases it is the same firm in Scotland that ships and invoices to itself in the United States, and you can imagine what sort of an invoice you might expect for ad valorem purposes. The price they sell for here is not controlled by any honest margin of profit on the selling price in Scotland, but is simply placed low enough to just beat the salesman of American granites.

One well-paid, competent granite expert in Scotland could have saved, at least in some years in the past, over $100,000 a year in the establishment of proper costs on manufactured granite when offered for importation into this country, and I presume the same defect will be found in connection with every other article that is imported on an ad valorem duty. The granite cutters in this country get from $2.60 per diem to, say, $3 at an average. The grades run in about that line. The same grades in Scotland would run at from 90 cents to $1.25 per day, and 50 per cent of duty will not protect us by any means.

To-day granite is not a product of any particular section of our country. Wisconsin, Minnesota, Colorado, Missouri, Georgia, the Carolinas are in fact greater granite States than either of our New England States, and in either can be found as fine a granite as can be found anywhere. And with such a vast field to compete from, I don't understand why we should have a single foreign granite monument in our country. If the same conditions existed in any country of Europe as to other products, the United States could not sell a single dollar's worth there. There are granite dealers in every section of our country trying to establish business, and these people should be given all the aid possible.

The Brady Monument in Atlanta shows as fine a class of granite as can be found in the world. Virginia, from Petersburg to Fredericksburg, can show as fine and as varied granites as can be found, and in all those places men are struggling to establish a business, and I can not see why the farmer or the millionaire who enjoys the privilege of making money and selling his goods in the best market of the world should not be compelled to buy his goods in that same market.

In view of the combinations in Scotland and the United States, and in view of the easy way goods can be sent at a reduced value, they can beat our market if the price was placed at 80 per cent ad valorem, and it should not be put at any less. You will find nobody to oppose it, excepting the middlemen, who manipulate invoices and prices in this country, and the paid attorneys or lobbyists from the millionaire Scotch granite dealers.

I remain, yours,

T. P. SULLIVAN.

Hon. JACOB H. GALLINGER,
United States Senator, Washington, D. C.

That, Mr. President, is expert testimony from a man of thorough American instincts, and whose sole interest is for the welfare of American producers and laboring men. His words carry infinitely more weight than that of importers who desire to break down the American market so that they can sell imported monuments.

From the accompanying comparative tables which I desire to submit, it will be seen that the manufacturers of granite work and their workmen, to be fairly protected against the low wages paid abroad, are entitled to a duty of 100 per cent ad valorem placed on finished granite to equalize the cost of labor. If the proposed duty remains, it would be but fair to make a compound duty, adding, say, 15 or 20 cents per cubit foot to the ad valorem duty. Even that would only partially protect the American manufacturer, but it would be a great help, and I shall hope that the committee of conference may revise the rates as I suggest.

I wish to have printed in connection with my remarks the comparative tables to which I have alluded, and which have been furnished by the Granite Manufacturers' Association of Quincy, Mass., showing the relative cost of granite monuments in Scotland and in this country, and the rate of duty required to equalize the cost, from which it will be seen that in almost every instance it would require 100 per cent upon finished granite to equalize the labor cost between this country and Scotland, from which latter country so many of our granite monuments are brought.

The PRESIDING OFFICER. The document will be printed in the RECORD, if there be no objection. The Chair hears none.

The statement referred to is as follows:

Monument No. 1, manufactured at Quincy, Mass., or Concord, N. H., weighing 2,800 pounds and containing 16 cubic feet, costs $165.

Monument the size of the above monument No. 1, manufactured in Scotland—

Cost	$76.96	Cost	$76.96
Add 50 per cent duty	38.48	Add 60 per cent duty	46.17
Add 15 cents per cubic foot (16 feet)	2.40	Add 20 cents per cubic foot (16 feet)	3.20
Freight	6.63	Freight	6.63
	124.47		132.96

The above compound duty, 50 per cent ad valorem and 15 cents per cubic foot, is equal to 55 per cent ad valorem.

$76.96
55 per cent.

23068
38480

$40.78
Freight 6.63

124.37

Monument No. 1 weighs 2,800 pounds. Specific duty required to equalize labor cost, 8 cents per pound.

Duty (8 cents per pound)	$84.00
Cost of monument in Scotland	76.96
Freight	6.63
	167.59

Table showing relative cost of Quincy and Scotch monuments.

[Prices marked "Quincy" are f. o. b. Quincy, and Scotch are delivered at Boston.]

Mr. GALLINGER. A little time ago a resident of my own city, who was born in Sweden and from which country he recently came after a visit of several weeks, stated as an absolute fact, which he determined from inquiry and observation while in his native land, that quarrymen in Sweden, from which some granite is coming to this country, are working fourteen hours a day for 39 cents, and that the stonecutters are working twelve hours a day for 87 cents. He made a comparison of those wages with the wages paid in Concord, N. H., Barre, Vt., Quincy, Mass., and other large granite centers, and it appears that in Concord and the other places they are paying for nine hours' labor $1.80 a day as against 39 cents a day in Sweden for fourteen hours.

Mr. CHANDLER. For quarrymen?

Mr. GALLINGER. Yes, for quarrymen, and we are paying our granite cutters a minimum rate of $2.65 for nine hours' work, while in Sweden they are working twelve hours for 87 cents. That is upon the authority of a native of Sweden, who has recently visited that country and who brings back absolutely correct information.

Mr. President, I do not intend to delay the Senate, although much other valuable information could be furnished on this subject. My own judgment is that the proposed duty of 50 per cent, which the Committee on Finance have suggested, while larger than the House rate, is entirely inadequate; and if I were not extremely anxious to have the bill passed, believing that it will tend to relieve the business distress that has overtaken almost every American industry, I should be inclined to make a contest for a larger rate. For this reason I will forbear offering an amendment, but will repeat the hope that when the bill gets into conference, the granite interests of this country may be better protected than they are even by the Senate amendment, to the end that the men who are engaged in this great industry in the United States may be fully and adequately protected from the cheaper labor of foreign countries. That is all the American granite manufacturers ask, and their demand is both reasonable and just.

Mr. MILLS. Mr. President, I understood my friend the Senator from Massachusetts [Mr. LODGE] to say a while ago that the labor cost in this work is twice as great in the United States as in foreign countries. Therefore, he justified the high rate imposed by the pending bill for the equalization of the difference in labor cost of the foreign and the domestic product. I find by our census returns, as to marble and stone work, in the United States, that the labor cost in 1890 was $41.58 in every $100 worth of product, and as to limestone, $46.61.

Now, if these two sums are double the labor cost in foreign countries, $25 in the $100, or 25 per cent, would cover the difference; but the amount given, at $46.61 and $41.58, would cover the entire labor cost. So 40 per cent in the bill would cover the entire labor cost. It would cover not only the difference, but it would make a present to the manufacturers of marble and stone and limestone—they are all in the schedule. The Government would give to those parties a sum amply sufficient to cover all their labor—not the difference, but the whole of it.

My friend the Senator from New Hampshire [Mr. GALLINGER] said we ought to have 100 per cent, if I understood him correctly. A hundred per cent would cover all cost—the cost of material, the cost of labor, the cost of everything. When we put 100 per cent on articles which we purchase in a foreign country, free on board, which covers a margin of profit to the man who is conducting the business, it covers the entire thing, and not the cost of labor only. The quotation of prices of labor by the day amounts to nothing. We know that machinery makes the great reduction in the cost of labor in this country. The report from which I have read shows that the labor cost here is so far beneath 100 per cent; that 40 per cent in the pending bill would amply cover the whole labor cost, and not merely the difference.

Mr. LODGE. The amount of machinery used in granite cutting is very, very small. It is almost exclusively hand labor.

Mr. MILLS. I understand it is very considerable.

Mr. LODGE. I am not speaking of getting the stone out, but of working it afterwards. I have here the figures of cost. The cost in Scotland, freight added, of monument No. 1—these are samples of monuments—is $76.98; the same monument would cost in Quincy, Mass., $165. That is absolute cost, and it is almost entirely labor cost.

I will not take the time of the Senate to go through a series of these monuments. It is the same throughout. The labor cost here is just about twice as much as it is in Scotland. I referred to the difference between this country and Scotland. Comparing with Sweden, as the Senator from New Hampshire did, it would be rather greater. I think the Senator from Texas will find that the labor is largely hand labor and that the cost is largely labor cost.

Mr. CAFFERY. Looking over the tariff hearings, I find the following:

MONTPELIER, VT., *January 6, 1897.*

Committee on Ways and Means:

The tariff on granite is now 30 per cent, under the McKinley bill it was 40 per cent, and before that time it was 20 per cent; but 30 per cent is sufficiently high for the protection of American labor.

Ninety-nine per cent of the granite imported into this country is red granite. The red granite of the United States is very limited. There is some found at Red Beach, in Maine, but it is of a quality that will not hold its color and is not very desirable, and if the people of the United States want a red granite, they can not obtain a good article in this country. The result is that excessive duty on this granite will take it from the consumer and will not be any advantage to the American workmen.

If you will look at the schedule of granite imported into the United States within the past year, you will find under the 30 per cent tariff a large decrease, and we hope the duty will be left as it now stands and not increased.

We are large handlers of Barre granite, and know that it does not affect the trade in our native stone and would not in any other granite centers in the United States.

R. C. BOWERS GRANITE COMPANY,
R. C. BOWERS, *President.*

There is another communication:

BOSTON, *January 5, 1897.*

Committee on Ways and Means:

I wish to enter my protest against any change in the present rate of duty on imported granite, as I know, from present cost of the same style work in both Scotch and American granite, that the present rate of duty is more than ample to protect the American product. The principal reason for sales being made in the imported granites is that purchasers have a larger variety of colors from which to make their selections, in Scotch and Swedish, which colors the American granite quarries do not produce..

From this you will see that it is not the prices named to purchasers that effect the sales and bring in the imported granite work. You will find, by careful reference, that the importations of gray granites are very slight. This is owing to the fact that our American quarries produce principally gray granites, and we can, as far as price is concerned, sell American granite at a much lower price than the same article in imported granite can be sold for.

I am largely interested in granite quarry property at West Quincy, Mass., as well as handling all other American products, and do not consider that my interests in the American granite industry require any further protection than the present tariff provides.

CHARLES CLEMENTS.

Again:

BOSTON, *January 5, 1897.*

Committee on Ways and Means:

We wish to protest against any proposed advance in tariff on imported granites. The price is now much in excess of our American granites, both red and gray, and a higher duty means a heavy loss to the Government in revenue, and will benefit none. We trust that the present duty, on investigation, may be found, in the opinion of your committee, sufficiently high, and that there will be no change for the present.

E. C. WILLISON.

Again:

BOSTON, *January 5, 1897.*

Committee on Ways and Means:

We are large owners of quarries and manufactories of granite at Barre, Vt., and Hingham, Mass., and from practical experience we are satisfied that an increase in tariff is unnecessary for protection purposes. On the contrary, it unsettles prices and disturbs the monumental business generally. The American manufacturers have facilities far superior to those in Scotland, and with the natural advantages in the formation and lay of our granites we can quarry granite at a much less cost, notwithstanding the difference in labor.

With the present tariff we can successfully compete with the manufacturers of Scotland in manufacture; besides, the only granite that is imported at the present time is red granite, of which we have very few quarries suitable for monumental purposes, and we believe it is for the interest of the monumental business that we should be able to supply a variety of colors, both from an artistic and business standpoint.

We therefore most earnestly protest against any increase in the present tariff.

JONES BROS.

Again:

NEW YORK, *January 6, 1897.*

Committee on Ways and Means:

Your committee will no doubt consider the rate of duty on foreign granite in the near future. The old rate was 20 per cent. This rate was advanced to 40 per cent, and then placed at 30 per cent, the present rate. In considering such matters the intention of your committee is, of course, to do justice to all interests concerned, and my belief that such is the case is my only excuse for trespassing upon your valuable time. An examination of the imports will show that 85 per cent of same is red granite, for which we have no equivalent in the United States. The gray granites quarried in this country are superior to anything possible to secure abroad. Red granites, such as Hill O'Fare, red Peterhead, and the red Swede granites, are not to be found on this side, and when our citizens require such material it is necessary to import it.

A reduction of the rate to the old basis of 20 per cent would advance the interests of everyone concerned, as there is no conflict of interests, as the gray granites quarried here are so much superior to anything it is possible to secure abroad that the market is practically closed to importations of that class.

For red granites, however, it is necessary to go outside, and a rate of duty of over 20 per cent places a burden upon people who wish to purchase material that, on account of the difference in color, beautifies the different cemeteries by value of contrast. If any industry in this country would be advanced or protected by leaving the duty at its present rate of 30 per cent, I should be the last to enter a protest. At least 70 per cent of my business is in home material.

D. W. FRANCIS.

It is so seldom that any protest against high tariff or any demand for low tariff is made before a Republican committee in the consideration of a tariff bill that it is quite refreshing to find such communications as I have read. It may be that Senators on the other side will attempt to discredit what is stated in these communications by deriding the testimony as coming from manufacturers. They are not only manufacturers, but some of them are importers; and they are quarrymen who own the quarries.

They state distinctly that at least 90 per cent of the granite that comes into the United States is red granite; that that character of granite does not at all compete with gray granite, the ordinary monumental granite, as it is termed, and therefore any additional tariff upon the granites is no good whatever to any interests in the United States, nor will it promote the purposes of revenue, because the additional tariff will be prohibitive. I submit these considerations to Senators on the other side, and claim that they ought to be entitled to considerable weight.

The gentlemen who write these communications certainly can not be accused of any leaning toward the horrid idea of free trade, for the last communication wound up with a statement that the writer was in accord with the Republican idea of protection, but, looking at the matter from a business standpoint, he could see no reason whatever why the rate should be raised. He rather thought that it ought to be reduced; that notwithstanding the labor cost in America was higher per diem than in Scotland or Sweden or any other place from which granite is imported, yet the output of the labor, the result of the labor, is such that the American could more than compete with his brother laborer in other countries. This ought to be, I think, in the interest of the whole country, duly considered, and the rate, if not lowered, ought certainly to be maintained at the Wilson rate.

Mr. GALLINGER. All the gentlemen from whom the Senator from Louisiana has read are importers of granite. Most of them are known to those of us who live in New England. I rise simply to say that the contention that Mr. Bowers makes, which the Senator from Louisiana has read, that there is no red granite suitable for monumental purposes in this country, is so clearly refuted by some literature which I hold in my hand that I desire to put it in the RECORD. It shows that we have in Wisconsin, Minnesota, Missouri, and Texas large quantities of the very best colored granite the world produces that can be used for monumental purposes.

Mr. WARREN. I desire to state at this point that very large quantities of the granite in question are found in the State of Wyoming. We use it for monumental and building purposes, and it has proved to be valuable in every way.

Mr. GALLINGER. I meant to add the State of Maine likewise. I ask unanimous consent to have placed in the RECORD, without reading, the clippings that I send to the desk, which absolutely and completely refute the contention that we have not in this country an abundance of colored granite for monumental purposes. That is all I care to say.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Hampshire? If there be no objection, such will be the order of the Senate.

The matter referred to is as follows:

AMERICAN RED GRANITE.

R. C. Bowers, of Montpelier, Vt., having made the statement to the Ways and Means Committee of the House of Representatives that "granite of the United States is very limited," and that "if the people of the United States want a red granite, they can not obtain a good article in this country," the following, from a practical stonecutter who knows whereof he writes, completely refutes such a statement, and proves that the color does not fade, as claimed by R. C. Bowers that the Red Beach did:

BERLIN, WIS., *March 21, 1897.*

At your request I will try and describe a few of the red-granite quarries in the States of Wisconsin, Minnesota, and Missouri that I have personally seen.

The Montello red-granite quarry, of Wisconsin lies about 100 miles from Milwaukee, directly northwest, on a branch line of the Wisconsin Central Railroad. It was first opened for working about fifteen years ago. At the present time of writing it is one of the best red-granite quarries in the United States. It is a hard and plucky stone to work, somewhat of the same nature as the granite in the Troy (N. Y.) post-office, which is, if I am not mistaken, Brattleboro (Vt.) stone and takes a very red polish. Lettering and carving show a great contrast on polished work.

As to the quantity, it is unlimited, and blocks of pure granite 20 feet square may be easily quarried. The greater depth the stone is taken from the quarry the darker and purer the granite becomes. There are some small red granite quarries near Wausaw, Wis., at a place called Granite Heights, though they are not worked to much advantage on account of railroad facilities. The granite is considered of excellent quality. The red granite quarries of Minnesota are mostly at or around St. Cloud, situated 67 miles from Minneapolis and St. Paul, northwest on the Great Northern and Union Pacific railroads. The granite has been used mostly for building purposes for nearly nine years. In the last three years it has come into prominence as an ornamental granite. It is an elegant working stone, safe and durable, although it will not stand as much pressure as Montello or Berlin granite. Its color is somewhat lighter than Montello, but takes a fine polish, and will not fade through exposure or time. There are inexhaustible quantities of it. It seems strange, but there is granite of all grades and color about St. Cloud.

Ortonville, Minn., also has great red granite quarries. The court-house of Minneapolis was built from this stone, though it is not used much for monuments as yet. Amberg granite is of rather grayish tint, and the new quarries are a fine gray granite, and unlimited quantities of it. The red granite of Graniteville, Mo., needs no description from me, as it ranks next to Montello, and for polished columns it is excelled by no red granite in this country. Texas has what might be called mountains of red granite; I know nothing authentic about this State, though, only from reports; but I think Texas has more granite than any State in the Union.

J. R.

—

CALAIS, ME., *March 24, 1897.*

EDITOR OF THE STONE TRADE NEWS:

We notice your article on red granite, and statement of R. C. Bowers, of Montpelier, Vt., in your issue of March 15.

Your article is quite right, and his statement should be taken up by everyone interested in granite and resented by the trade, as it is a gross misstatement of the facts. There is plenty of first-class red granite in the United States, as anyone who knows anything about granite can inform Mr. Bowers; the fact of the United States Government using such large quantities of Jonesboro red granite and with every satisfaction as to quality is evidence of it. As for monumental work, red beach granite has been used for years and with good satisfaction to those who have used it. We have done quite a lot of work ourselves in red beach granite and have never had a question asked as to its quality.

We ourselves have a red granite that we will test with the best Scotch granite for color and quality; in fact, it is used by a number of dealers to take the place of Scotch granite, and parties using it can not tell the difference. It will hold its color and is not so imperfect as Scotch granite, as we can easily show.

As to the advantage to American workmen, we can easily show that if Scotch red granite were prohibited from coming into this country finished, we could supply the demand for it here and could employ 500 to 1,000 men, doing it at American wages, and the consumer would simply have to pay the difference between American wages and Scotch wages, which he should do.

Thanking you for taking up this matter as you did, and trusting other manufacturers will also take it up,

We remain, yours, truly,

NEW BRUNSWICK RED GRANITE CO., OF MAINE,
Per C. W. YOUNG, *President.*

LLANO, TEX.

LLANO COUNTY, TEX., *April 5, 1897.*

I notice with interest in the Stone Trade News an article by a Mr. R. C. Bowers on red granite. If Mr. Bowers thinks there is no red granite in the United States good enough for monumental or any other purpose, he should take a trip to Texas, or even to Llano County, and one day's travel among the quarries here that are in operation, and the mountains of stone which have not been touched, and which are as good as the world can produce, would convince him, I think, that he was mistaken in his estimate. In Burnet County is the Granite Mountain, a good red stone of unlimited quantity, and a good building stone.

In Llano County, Frank Teich's red-granite quarry is as good a red stone as Scotland or any other country can produce. It is a darker red than Peterhead, suitable for monumental or building purposes. It is dark red, even in texture, and free from discoloring seams or blemish of any kind. Also blue and gray granite quarries are found here. From these quarries stone of any size can be got out entirely free from discoloring matter or seams.

In Gillespie County there is a red granite which is noted for its hardness and deep red color when polished, taken from a quarry known as Bear Mountain quarry; it is darker than the Hill-o-Fare, Scotland.

In Llano County is also the enchanted rock, of red granite, covering an area of 640 acres, and rising to a height of 740 feet. If Mr. Bowers could only see this mountain of stone, he would decide there was at least one good bowlder of red granite in the United States, good enough for any purpose. If it was in Scotland it would take quite a while to ship it over as ballast, although I believe their business would increase with this grade of stone.

In Mason County there are large sheets of red, pink, and white granite.

I could mention dozens of other places where there could be large quarries opened of both red and gray stone. When I say quarries I mean just what I say; no mass of bowlders and dry seams. There is stone here of all colors and kinds. Marble has as yet not been worked to any extent, but I believe there is good marble here. Soapstone, serpentine, and grease rock, all of which are fireproof, are found here. Stone of nearly every class and character is found in this State.

Mr. VEST. Reference has been made to the granite deposits in the State of Missouri. There are large deposits there of colored granite, and while I do not know, I suppose it is equal to any granite that is brought in from abroad or produced anywhere else. But I am here to say that there is no necessity for increasing this duty, and the comparative statement shows it. In 1893, under the McKinley Act, there was brought into this country $439,147 worth of granite. In 1896 the imports fell to $320,432.90 worth.

Mr. GALLINGER. It was owing to hard times.

Mr. VEST. The Senator from New Hampshire says it was owing to hard times, but look at the difference in the rate of duty. Why should you now put back this duty when hard times are continuing? Why should you increase it to 50 per cent over and above the McKinley Act, when the depression still rests upon the country of which the Senator speaks?

Mr. President, if we could compromise on this proposed tariff act by putting on tariff duties equivalent to the difference in labor between this country and abroad we would be here a very short time. I undertake to say that I can prove from the reports, not only of the census, from which the Senator from Texas has read, but of the labor commissioners in the New England States, conspicuously in Connecticut, that the duties in the McKinley Act and this proposed act cover the entire cost in a great many instances, and no attention is paid to the difference in labor.

We had a conspicuous example of that in paragraph 111, which was adopted here against our protest. The tax on superficial feet in two classifications was $1.75, and then the bill goes on to provide that when any portion of onyx or granite is smoothed the duty is $3.60 a cubic foot. If it is a place only an inch in size, the infinitesimal smoothing of any portion of it, immediately, in the name of labor, the duty is increased to $3.60 a cubic foot.

Mr. PLATT of Connecticut. To what paragraph is the Senator from Missouri referring?

Mr. VEST. I am talking about paragraph 111, which we have adopted. If the Senator will turn to it, he will see that what I state is absolutely true.

Mr. ALLISON. That is the duty on marble.

Mr. VEST. Marble and onyx. The duty is $1.75 a superficial foot, and if you smooth a place as big as an inch, or less than an inch, or a hundredth part of an inch, immediately the tariff tax of $3.60 to the cubic foot attaches. Labor is a sacred thing. Like liberty, a great many outrages are perpetrated in its name.

Mr. ALDRICH. The Senator is a little off——

Mr. VEST. I beg pardon. What does the Senator say?

Mr. ALDRICH. The Senator has his figures a little high, if he will examine.

Mr. VEST. I think not.

Mr. ALDRICH. On line 14 in that paragraph the rate is 18 cents a superficial foot and the rubbed provision is 3 cents additional, which makes 21 cents a superficial foot instead of $3.60.

Mr. VEST. I have been very careful to go over it with an expert and to make the calculation. I do not think I am mistaken. On the next to the last classification, where any is smoothed, the duty is $3.60 to the cubic foot. The other taxation is upon the superficial foot. But, be that as it may—and I do not think I am mistaken—here is an increase over the McKinley tariff in the name of labor, and by the census reports, which the Senator from Texas read, the increase is out of all proportion to the difference in the labor of foreign countries and in this. I ask for the yeas and nays upon my amendment.

Mr. BATE. Before the vote is taken, I do not rise to add anything to what has been said on the question, but the Senator from New Hampshire [Mr. GALLINGER] proposed to put in the RECORD some article from a newspaper—some literature, as he called it—upon the point we now have under discussion. I think that is a wrong practice, sir. I do not think that any article ought to go into the RECORD unless it is read to the Senate, that we may see what the language is and know what the article is. I call for the reading of the article, or else I shall object to its going into the RECORD without being read.

Mr. GALLINGER. I will say to the Senator that they are all articles published in a trade journal.

Mr. BATE. It does not make any difference whether they were published in a trade journal or a daily paper; but I think whatever goes into the RECORD ought to be heard by the Senate; and as the articles relate to the question now under consideration, I call for their reading.

Mr. GALLINGER. I shall be pleased to read them, and I shall reciprocate at some time when the Senator from Tennessee wants to insert something in the RECORD.

Mr. BATE. You can reciprocate whenever you desire. I know it is a wrong practice to have anything put in the RECORD without being read.

Mr. GALLINGER. I make the point of order that unanimous consent was given to have the matter printed in the RECORD.

The PRESIDING OFFICER. The Chair will state that the Chair distinctly asked the question whether there was objection to the insertion of the articles in the RECORD without reading. Hearing no objection, the Chair ordered that the same be inserted without reading, assuming that unanimous consent was given. So far, therefore, as the insertion of the articles in the RECORD is concerned, the Chair sustains the point of order.

Mr. BATE. I have nothing to say against any particular Senator doing it, but I give notice now that I shall hereafter object. The Chair has decided that my objection is too late, but the next time I shall see that it is made in time.

The PRESIDING OFFICER. The pending question is on the amendment of the Senator frem Missouri [Mr. VEST] to the amendment of the committee, which will be read.

The SECRETARY. In paragraph 115, page 31, line 14, strike out "forty," before the words "per centum," and insert "thirty" in lieu of "fifty," as proposed by the committee; so as to read:

115. Freestone, granite, sandstone, limestone, and other building or monumental stone, except marble and onyx, not specially provided for in this act, hewn, dressed, or polished, 30 per cent ad valorem.

The PRESIDING OFFICER. Upon the amendment to the amendment the Senator from Missouri demands the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BATE (when his name was called). I am paired with the Senator from Kentucky [Mr. DEBOE]. I do not see him present, and I withhold my vote.

Mr. HANSBROUGH (when his name was called). I am paired with the Senator frem Virginia [Mr. DANIEL].

Mr. McMILLAN (when his name was called). I announce my pair with the Senator from Kentucky [Mr. LINDSAY].

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were present, he would vote "nay" and I should vote "yea."

Mr. QUAY (when his name was called). Has the Senator from Alabama [Mr. MORGAN] voted?

The PRESIDING OFFICER. The Senator from Alabama has not voted.

Mr. QUAY. Then I will withhold my vote. If he were present, I should vote "nay."

The roll call having been concluded, the result was announced—yeas 19, nays 28; as follows:

YEAS—19.

Bacon,	Cockrell,	Mitchell,	Turpie,
Berry,	Faulkner,	Murphy,	Vest,
Caffery,	Jones, Ark.	Pettus,	Walthall,
Chilton,	McLaurin,	Rawlins,	White.
Clay,	Mills,	Roach,	

NAYS—28.

Aldrich,	Fairbanks,	Hawley,	Platt, Conn.
Allison,	Foraker,	Hoar,	Pritchard,
Burrows,	Frye,	Jones, Nev.	Sewell,
Cannon,	Gallinger,	Lodge,	Shoup,
Carter,	Gear,	McBride,	Spooner,
Chandler,	Hale,	Nelson,	Warren,
Davis,	Hanna,	Perkins,	Wetmore.

NOT VOTING—42.

Allen,	Gray,	Mantle,	Smith,
Baker,	Hansbrough,	Martin,	Stewart,
Bate,	Harris, Kans.	Mason,	Teller,
Butler,	Harris, Tenn.	Morgan,	Thurston,
Clark,	Heitfeld,	Morrill,	Tillman,
Cullom,	Kenney,	Pasco,	Turner,
Daniel,	Kyle,	Penrose,	Wellington,
Deboe,	Lindsay,	Pettigrew,	Wilson,
Elkins,	McEnery,	Platt, N. Y.	Wolcott.
George,	McMillan,	Proctor,	
Gorman,	Mallory,	Quay,	

So the amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs on the adoption of the amendment of the Committee on Finance to make the rate 50 per cent ad valorem.

The amendment was agreed to.

The Secretary read paragraphs 116 and 117, as follows:

116. Grindstones, finished or unfinished, $1.75 per ton.

Slate:

117. Slates, slate chimney-pieces, mantels, slabs for tables, roofing slates, and all other manufactures of slate, not specially provided for in this act, 20 per cent ad valorem.

Mr. VEST. Mr. President——

Mr. ALDRICH. I should like to go back to paragraph——

Mr. VEST. I want to say a word upon the paragraph just read. I do not intend to make any motion.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. VEST. The majority of the Finance Committee have adopted the Wilson duty of 20 per cent, but it ought to be reduced, I will say to the Senator from Rhode Island. I call his attention to the rate upon roofing slate. The comparative statement shows that we exported in 1896, $266,385 worth and we imported $224 worth.

Mr. ALDRICH. I assume that if the rates were reduced, there would be no large importations. The slate manufacturers have the entire American market.

Mr. VEST. As a matter of course they have.

Mr. ALDRICH. And they are sure to keep it, I imagine, whatever the rates are.

Mr. VEST. It is a caricature upon tariff taxation to put on a duty of 20 per cent when we have the market.

Mr. ALDRICH. But the rate is the very lowest that is imposed by the bill upon any manufactured article. I see no reason for reducing it.

Mr. VEST. It is out of all symmetry, if there is any, with the balance of the schedule.

The PRESIDING OFFICER. What is the request of the Senator from Rhode Island?

Mr. ALDRICH. That we dispose of paragraph 88.

Mr. VEST. I ask the Senator now to consent to an adjournment.

Mr. ALDRICH. I suggest to the Senator from Missouri to allow one or two paragraphs that have been passed over in this schedule to be disposed of. I think there will be no particular discussion upon them.

Mr. HALE. Let me ask the Senator if everything with that exception in this schedule has been acted upon?

Mr. ALDRICH. Everything in Schedule B has been acted upon except the paragraphs that have been passed over.

Mr. HALE. So that we now have reached Schedule C, which is the metal schedule.

Mr. ALDRICH. Yes, sir.

Mr. HALE. All the rest has been disposed of.

Mr. VEST. We passed over, I think, three paragraphs at the instance of the Senator from Iowa.

Mr. ALDRICH. Those have all been disposed of, I think, with one or two exceptions.

Mr. VEST. I think not.

The PRESIDING OFFICER. Paragraphs 86 and 88, the Chair understands, have been passed over.

Mr. VEST. More than those were passed over.

The PRESIDING OFFICER. The Chair is speaking of this particular schedule—Schedule B.

Mr. ALDRICH. Paragraph 88, I think, can be readily acted upon.

Mr. JONES of Arkansas. Let that go over.

Mr. ALDRICH. Paragraph 88?

Mr. JONES of Arkansas. Yes; on page 17.

Mr. VEST. I ask the Senator from Rhode Island to let them go over.

Mr. ALDRICH. Paragraph 116 has not been acted on.

The PRESIDING OFFICER. Paragraph 109 has also been passed over.

Mr. ALDRICH. Paragraph 109 has been passed over. Is there any objection to considering paragraph 109 now?

Mr. VEST. I would rather let that go over until morning. We shall make time if you will just pass them over entirely.

Mr. MILLS. Let us have an executive session.

Mr. COCKRELL. Pending the lull in the business——

Mr. ALDRICH. I understand that the Senator from Missouri desires that both paragraphs 88 and 109 shall be passed over.

Mr. VEST. I beg the Senator to let them go over until tomorrow.

Mr. WHITE. I should like to state to the Senator——

The PRESIDING OFFICER. The Chair has recognized the Senator from Missouri [Mr. COCKRELL].

Mr. COCKRELL. Let them go on and finish up this business.

Mr. WHITE. I have seen the statement made (of course I do not know whether it is by authority) that there is to be a new sugar schedule interjected into the bill later on. I make the suggestion simply that as we are now near the metal schedule, practically at it, as the wood schedule follows, and we will next be on the sugar schedule, unless it is far less complicated than most modern schedules, if there is any new schedule to be introduced here, I hope that we may see it at as early a day as practicable.

Several Senators, I believe, are preparing computations upon the present schedule, and they may have an opportunity to exercise their intellect upon a new one. So if there is anything of that kind, even embryotic, I trust it will fructify into some product that may enable us to grasp it before the schedule is reached, at least a day or two before.

Mr. ALDRICH. I think the Senator from California will have ample notice. At least we shall try to accommodate him.

Mr. WHITE. I trust so.

Mr. COCKRELL. Will the Senator from Rhode Island now yield to me for a moment?

Mr. ALDRICH. Certainly.

S. S. ROBINSON.

Mr. COCKRELL. I ask unanimous consent that the Committee on Military Affairs shall be discharged from the further consideration of the bill (S. 236) to restore S. S. Robinson, late of the Sixteenth United States Infantry, to the Army, and place him on the retired list, and that the bill shall be indefinitely postponed.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Missouri that the Committee on Military Affairs be discharged from the further consideration of the bill? The Chair hears none; and the committee is discharged. The bill will be indefinitely postponed, in the absence of objection.

Mr. COCKRELL. Now I introduce another bill for the same purpose, and ask that it be referred to the Committee on Military Affairs.

The bill (S. 2063) for the relief of S. S. Robinson was read twice by its title, and referred to the Committee on Military Affairs.

ENROLLED BILLS SIGNED.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the Speaker of the House had signed the following enrolled bill and joint resolutions; and they were thereupon signed by the President pro tempore.

A bill (H. R. 16) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, and for other purposes;

A joint resolution (S. R. 43) in amendment of the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India; and

A joint resolution (S. R. 44) making an appropriation to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897.

EXECUTIVE SESSION.

Mr. QUAY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After fifteen minutes spent in executive session the doors were reopened.

PORTRAIT OF SITTING BULL.

Mr. KYLE submitted the following resolution; which was referred to the Committee on the Library:

Resolved, That the Committee on the Library is instructed to purchase from Dr. T. A. Bland, for the room of the Committee on Indian Affairs or for the new Library building, an oil painting, life size, of Sitting Bull, the Indian chief, and that the purchase price shall not exceed $150. The price agreed upon shall be paid from the contingent fund of the Senate.

WICHITA INDIAN LANDS.

Mr. QUAY. I ask that the resolution in relation to the Wichita Indian lands heretofore submitted by me may now be laid before the Senate.

The PRESIDING OFFICER (Mr. FAULKNER in the chair). If there be no objection, the Chair lays before the Senate the resolution referred to by the Senator from Pennsylvania, which will be read.

The Secretary read the resolution submitted by Mr. QUAY May 25, 1897, as follows:

Resolved, That the right to compensation on the part of the Wichita and affiliated bands of Indians for their possessory right in and to the lands ceded to the United States by said Indians, under the agreement made and entered into between said Indians and the United States at Anadarko, in the Indian Territory, on the 4th day of June, A. D. 1891, should be considered and adjusted at the same time and by the same tribunal which shall determine the alleged claim of the Choctaw and Chickasaw nations in and to the said lands, and that the President is hereby requested to suspend the allotments to said Indians now in progress until the compensation to be allowed and paid to said Indians for the lands in excess of allotments shall be finally determined.

By unanimous consent, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on the amendment submitted by the Senator from South Dakota [Mr. PETTIGREW], to strike out of the resolution all after the word "lands," in line 10.

Mr. PETTIGREW. I withdraw the amendment.

The PRESIDING OFFICER. The question recurs on the adoption of the resolution.

Mr. COCKRELL. I wish to ask one question. In what manner is this tribunal to adjudicate the questions presented—by a law or by a resolution of the Senate?

Mr. QUAY. The Senate of the United States, I understand, under a provision of the convention made by these Indians with the Dawes Commission, is made the absolute arbitrator finally of the amount due to these Indians.

Mr. PETTIGREW. In the first place, in 1895 we passed an act of Congress which referred the question of the title to these lands to the Court of Claims, where the case is now pending. I have the briefs of the case here.

Mr. BATE. Where is the case pending?

Mr. PETTIGREW. It is pending in the Court of Claims between the Wichitas and Choctaws and Chickasaws as to who owns this particular section of country. The Chickasaws and Choctaws have lately made an agreement to refer their claim to the Senate of the United States. That agreement has not yet been ratified. I shall insist, so far as I am concerned, on having the Court of Claims dispose of the matter and decide the question now pending in the court. This simply delays action until the court has passed upon it, or until the Senate has passed upon it.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. QUAY. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 22 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, June 2, 1897, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate June 1, 1897.

SECRETARY OF LEGATION AND CONSUL-GENERAL.

William Haywood, of the District of Columbia, to be secretary of the legation and consul-general of the United States at Honolulu, Hawaii, vice Ellis Mills, resigned.

UNITED STATES DISTRICT JUDGE.

John J. De Haven, of California, to be United States district judge for the northern district of California, vice William W. Morrow, resigned.

UNITED STATES MARSHAL.

John K. Thompson, of West Virginia, to be marshal of the United States for the district of West Virginia, vice Charles E. Wells, removed.

SOLICITOR FOR DEPARTMENT OF STATE.

William L. Penfield, of Indiana, to be Solicitor for the Department of State, vice Walter E. Faison, resigned.

ASSISTANT SURGEON IN NAVY.

Washington Berry Grove, a citizen of Virginia, to be an assistant surgeon in the Navy, to fill a vacancy existing in that grade.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 1, 1897.

SECRETARY OF LEGATION AND CONSUL-GENERAL.

William Haywood, of the District of Columbia, to be secretary of the legation and consul-general of the United States at Honolulu, Hawaii.

COLLECTOR OF INTERNAL REVENUE.

James S. Fruit, of Pennsylvania, to be collector of internal revenue for the twenty-third district of Pennsylvania.

UNITED STATES ATTORNEY.

William Vaughan, of Alabama, to be attorney of the United States for the northern district of Alabama.

MARSHAL.

Solomon F. Stahl, of Arkansas, to be marshal of the United States for the western district of Arkansas.

POSTMASTERS.

Joseph A. McIntire, to be postmaster at Sidney, in the county of Fremont and State of Iowa.

W. I. Norton, to be postmaster at Hightstown, in the county of Mercer and State of New Jersey.

William F. Brittain, to be postmaster at Sheridan, in the county of Sheridan and State of Wyoming.

Almon K. Goodwin, to be postmaster at Pawtucket, in the county of Providence and State of Rhode Island.

HOUSE OF REPRESENTATIVES.

[Continuation of the proceedings of the legislative day of Monday, May 31, 1897.]

The recess having expired, the House, at 12 o'clock m., Tuesday, June 1, resumed its session.

ORDER OF BUSINESS.

The SPEAKER. The question before the House is the motion to lay on the table the appeal of the gentleman from Washington [Mr. LEWIS] from the decision of the Chair, on which the yeas and nays were ordered, and a quorum did not appear. The Clerk will again call the roll.

Mr. TERRY. Mr. Speaker——

Mr. LEWIS of Washington. Mr. Speaker——

Mr. TERRY. Mr. Speaker, I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. TERRY. Does that matter necessarily come up before any other question can be presented to the House?

The SPEAKER. The Chair simply decides that this question is now before the House, and the Clerk has been ordered to call the roll. The Clerk will call the roll.

The Clerk began the roll call.

Mr. LEWIS of Washington. Mr. Speaker, I rise to a parliamentary inquiry and also to present a question of privilege in relation to myself.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. LEWIS of Washington. Mr. Speaker, I rise to make a parliamentary inquiry and with it a reference——

The SPEAKER. Will the gentleman make his parliamentary inquiry?

Mr. LEWIS of Washington. Yes, sir. I would ask the Speaker if I can not withdraw temporarily my demand for the yeas and nays, and then, upon the withdrawal, read the exact language in the RECORD of the Fifty-third Congress of the proceedings which I claim occurred in that Congress, so that I may inform the House literally of what transpired on that occasion, and particularly with reference to the question of personal privilege which I have submitted to the Chair.

The SPEAKER. The gentleman can not. The Clerk will call the roll.

The question was taken; and there were—yeas 88, nays 57, answered "present" 35, not voting 172; as follows:

YEAS—88.

Adams,	Dalzell,	Hemenway,	Payne,

Mr. SULZER. Mr. Speaker, I am paired with the gentleman from New York, Mr. BELDEN, and I withdraw my vote.

The SPEAKER. The gentleman's vote will be withdrawn, and the Clerk will announce the pairs.

The following pairs were announced:

Until further notice:

Mr. WILLIAM A. STONE with Mr. MCCLELLAN.

Mr. MCCALL with Mr. HOWARD of Georgia.

Mr. WHITE of Illinois with Mr. CUMMINGS.

Mr. LORIMER with Mr. BERRY.

Mr. MILLER with Mr. CLARDY.

Mr. STEVENS of Minnesota with Mr. JONES of Washington.

Mr. DORR with Mr. MADDOX.

Mr. LYBRAND with Mr. LENTZ.

Mr. HOPKINS with Mr. MCALEER.

Mr. BELKNAP with Mr. MAGUIRE.

Mr. YOUNG of Pennsylvania with Mr. BENTON.

Mr. WRIGHT with Mr. ADAMSON.

Mr. MESICK with Mr. PETERS.

Mr. WILLIAMS of Pennsylvania with Mr. ROBERTSON of Louisiana.

Mr. JOY with Mr. MARSHALL.

Mr. YOST with Mr. LAMB.

Mr. BINGHAM with Mr. DOCKERY.

Mr. HULL with Mr. BAILEY.

Mr. MCCLEARY with Mr. JONES of Virginia.

Mr. STRODE with Mr. ALLEN.

Mr. SIMPKINS with Mr. LESTER.

Mr. MCEWAN with Mr. VEHSLAGE.

Mr. FOSS with Mr. DAVEY.

Mr. DAYTON with Mr. PIERCE of Tennessee.

Mr. LOVERING with Mr. WHITE of Alabama.

Mr. BELDEN with Mr. SULZER.

Mr. STEWART of New Jersey with Mr. TAYLOR of Alabama.

Mr. POWERS with Mr. GAINES.

Mr. REEVES with Mr. BALL.

Mr. MILLS with Mr. SULLIVAN.

Mr. STEWART of Wisconsin with Mr. LITTLE.

Mr. EVANS with Mr. FITZPATRICK.

Mr. BARHAM with Mr. FITZGERALD.

Mr. BURTON with Mr. SUTHERLAND.

Mr. SULLOWAY with Mr. TALBERT.

Mr. SAUERHERING with Mr. STRAIT.

Mr. CHICKERING with Mr. BRADLEY.

Mr. WM. ALDEN SMITH with Mr. BRUCKER.

Mr. MITCHELL with Mr. ELLIOTT.

Mr. BARNEY with Mr. BANKHEAD.

Mr. ACHESON with Mr. WILSON of South Carolina.

Mr. HOOKER with Mr. CATCHINGS.

Mr. PEARCE of Missouri with Mr. VANDIVER.

Mr. TONGUE with Mr. DE ARMOND.

Mr. OVERSTREET with Mr. ZENOR.

Mr. HENRY of Indiana with Mr. MIERS of Indiana.

Mr. DAVIDSON of Wisconsin with Mr. CLARK of Missouri.

Mr. QUIGG with Mr. BLAND.

Mr. WARD with Mr. BARLOW.

Mr. BISHOP with Mr. NORTON.

Mr. WANGER with Mr. MEEKISON.

Mr. MAHON with Mr. BENNER of Pennsylvania.

Mr. LANDIS with Mr. CRANFORD.

Mr. GILLETT of Massachusetts with Mr. MCDOWELL.

Mr. KULP with Mr. STALLINGS.

Mr. ODELL with Mr. BARTLETT.

Mr. HICKS with Mr. OTEY.

Mr. ALEXANDER with Mr. COONEY.

Mr. SMITH of Illinois with Mr. MCCULLOCH.

Mr. JOHNSON of Indiana with Mr. MOON.

Mr. BROSIUS with Mr. ERMENTROUT.

Mr. LACEY with Mr. MCRAE.

Mr. JENKINS with Mr. STOKES.

Mr. PITNEY with Mr. CARMACK.

Mr. BRUMM with Mr. COX.

Mr. KERR with Mr. ROBB.

For this day:

Mr. WILSON of New York with Mr. MCMILLIN.

Mr. COLSON. I desire to withdraw my vote and be marked "present."

Mr. BROSIUS. As I am paired with my colleague, Mr. ERMENTROUT, I desire to be recorded "present."

Mr. BARNEY. I am paired with the gentleman from Alabama, Mr. BANKHEAD. I desire to withdraw my vote and answer "present."

Mr. TONGUE. Mr. Speaker, I will ask whether the gentleman from Missouri, Mr. DE ARMOND, has voted?

The SPEAKER. He has not.

Mr. TONGUE. I am paired with him, and therefore desire to withdraw my vote and answer "present." I voted "aye."

Mr. HENRY of Indiana. I wish to withdraw my vote and be marked "present." I am paired with my colleague, Mr. MIERS.

Mr. TODD. I withdraw my vote and ask that I be marked "present."

Mr. WILLIAM A. STONE. I wish to ask whether the gentleman from New York, Mr. MCCLELLAN, voted on this motion?

The SPEAKER. He is not recorded.

Mr. WILLIAM A. STONE. Then I wish to withdraw my vote, as I am paired with him, and will ask that I be marked "present."

The SPEAKER. On this question the yeas are 88, the nays 57; 35 members have answered "present," and Messrs. PLOWMAN and SLAYDEN have been noted by the Clerk and reported to the Chair as being present. The ayes have it; and the appeal is laid on the table.

RELIEF OF FAMINE IN INDIA.

Mr. HENDERSON. I rise to make a privileged report from the Committee on Rules. I ask that the report be read.

The Clerk read as follows:

The Committee on Rules, having had under consideration House resolution No. 50, ask leave to report the same with the recommendation that it be adopted.

Resolved, That immediately upon the adoption of this order it shall be in order to consider in the House Senate joint resolution No. 49, "in amendment of the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India."

Mr. HENDERSON. Mr. Speaker, I presume that the House is quite familiar with the subject-matter of this resolution.

Mr. RICHARDSON. I rise to ask the gentleman from Iowa whether he intends to debate this resolution before the previous question is ordered?

Mr. HENDERSON. I simply want to state briefly the nature of the resolution, and then I will yield to the gentleman from Tennessee, if he wants some time, after which I will ask the previous question.

Mr. RICHARDSON. The only point I make is this: If the gentleman debates this matter in advance of the previous question, we shall thereby be precluded from the forty minutes' debate after the ordering of the previous question, to which, I think, we are legitimately entitled. Hence, I hope the gentleman will not cut off that debate by discussing this resolution in advance.

Mr. TERRY. I rise to a question of privilege.

Mr. RICHARDSON. I think we ought to have the ordinary amount of debate allowed under the operation of the previous question.

Mr. HENDERSON. If the gentleman from Tennessee wants to occupy some time, I will yield to him after the resolution is before the House for consideration. This resolution does not fix a limit to the debate after the adoption of the proposed rule.

Mr. RICHARDSON. That is true; and if the gentleman will allow us as much time as we would have ordinarily under the order for the previous question, his position will be fair; but if he should cut us off with five or ten minutes and then move the previous question, it would not be fair, in my opinion.

Mr. HENDERSON. There is not much debate needed on the

adoption of this rule, especially as, after the rule is adopted, the main proposition will be before the House for consideration, the rule fixing no limit upon the debate.

Mr. RICHARDSON. The only point is this——

Mr. HENDERSON. I think, if my friend from Tennessee wants any debate, he wants it upon the main question, not upon the mere adoption of this rule.

Mr. RICHARDSON. No; the gentleman is mistaken on that point. We would prefer to debate the method of bringing this matter up rather than discuss the merits of the main proposition. I am perfectly frank with the gentleman.

Mr. HENDERSON. I will yield to the gentleman a reasonable time out of my own time.

Mr. TERRY. I rise to a question of privilege.

The SPEAKER. The question now before the House is one of the highest privilege—a report from the Committee on Rules.

Mr. TERRY. It has not been adopted yet.

The SPEAKER. But it is before the House for adoption or rejection.

Mr. HENDERSON. Now, Mr. Speaker——

Mr. RICHARDSON. I appeal to the gentleman from Iowa not to force us to undertake to procure delay by calling for a division on this question, but to give us legitimate debate on this resolution.

Mr. HENDERSON. If the previous question should be asked and ordered, there would only be forty minutes' debate——

Mr. RICHARDSON. That is all we ask.

Mr. HENDERSON. On the other hand, I shall control, if necessary, under the proceeding I am pursuing, an hour; and I am willing to yield my friend a reasonable time.

Mr. RICHARDSON. Give us twenty minutes—that is all we ask—in opposition to the resolution.

Mr. HENDERSON. The gentleman knows that I have never taken snap judgment upon this or the other side of the House.

Mr. RICHARDSON. Never; but by the adoption of this resolution the House might take snap judgment.

Mr. HENDERSON. I will yield to the gentleman as much time as I myself occupy or as our side may occupy. I want fair play.

Mr. RICHARDSON. The gentleman says he will yield as much time as he occupies himself. He might only occupy one minute and then give us one minute.

Mr. HENDERSON. I have already occupied more than that time by reason of the persistency of the gentleman from Tennessee. How much time does the gentleman want?

Mr. RICHARDSON. We want the twenty minutes to which we would be entitled under the operation of the previous question.

Mr. HENDERSON. I will yield the gentleman twenty minutes, if that will be satisfactory.

Mr. RICHARDSON. That will be satisfactory.

Mr. HENDERSON. Now I will say for the information of the House that on the 7th of April, 1897, the President approved a public resolution providing for sending food to the sufferers in India. The joint resolution which is now proposed to be considered is one amendatory of the resolution passed April 7. That resolution provided that the ship or vessel to be used in the transportation of provisions should be an American ship or vessel. There seems to have been some trouble about getting such a vessel; and therefore the Senate has sent us an amendatory joint resolution providing that the Secretary of the Navy, in his discretion, may employ for the purpose contemplated any ship or vessel. For the consideration of that resolution this bill is now reported.

I now yield twenty minutes to the gentleman from Tennessee [Mr. RICHARDSON], who, in the absence of the gentleman from Tennessee [Mr. MCMILLIN] and the gentleman from Texas [Mr. BAILEY], met with the Committee on Rules this morning.

Mr. RICHARDSON. Mr. Speaker, I only wish a few moments myself in which to debate this matter. I assume that when the question is taken upon the main proposition there will be no objection to it upon this side of the House, and I suppose none upon the opposite side. The objection which we make is to the method of procedure adopted to-day for the consideration of this and other measures. We stand here, Mr. Speaker, with our hands absolutely tied. We have no committees. We have none of the ordinary conveniences and necessities of legislation. No measure can be considered except such as the Committee on Rules may prescribe. Gentlemen on the other side of the House have voluntarily placed themselves in this position. There is nothing like it in parliamentary experience in this or any other country. There never was a time, Mr. Speaker—and I assert it because I have the record here—there never was a time when the House of Representatives of the American Congress was in the dilapidated, demoralized, and disorganized condition for the length of time that this House now finds itself in. I have the record here.

Mr. DALZELL. Will the gentleman allow me a question?

Mr. RICHARDSON. Yes, sir.

Mr. DALZELL. Will the gentleman state how many days elapsed after the organization of the Forty-second Congress before the committees were appointed?

Mr. RICHARDSON. Yes, sir.

Mr. DALZELL. How many?

Mr. RICHARDSON. The Forty-second Congress met on the 4th day of March, 1871, and committees were appointed December 4, 1871.

Mr. DALZELL. Well?

Mr. RICHARDSON. But Congress was in session only about four days before the committees were appointed.

Mr. DALZELL. How many days elapsed before the appointment of committees?

Mr. RICHARDSON. Listen a moment, and I will answer the question.

Congress was in session only three or four days during that time. Therefore only that many days elapsed.

Mr. DALZELL. That is the fact I wanted to bring out.

Mr. RICHARDSON. If there is any comfort to the gentleman in the fact, he can take it. [Laughter.] That—the Forty-second Congress—was a Republican Congress that met under a law which had been passed for the purpose of tying the hands of a former President of the United States. The Republican party was afraid that that President would do something which they would not approve; and therefore, that they might keep watch upon him, they provided by law that immediately upon the adjournment of one Congress another should assemble.

At the time I am speaking of, March 4, 1871, President Johnson had retired. The act had been found convenient, I believe, prior to that time, while he was President; but President Johnson had retired, and the Republicans did not deem it necessary to keep such a watch upon President Grant, his successor, as they had done upon President Johnson. Therefore, while the law required them to meet immediately upon the adjournment of the Forty-first Congress, on the 4th of March, 1871, and while they did in fact meet, they said, "There is no necessity for us to sit here now to watch the President." And therefore they adjourned until the first Monday in December; and when they met, on the first day of that session, Mr. Blaine, the then Speaker, announced the committees.

Now, if there is any comfort in that, I say the gentleman is welcome to it. How was it in the Forty-third Congress? Congress met on the 1st day of December. On the 5th day of December Mr. Blaine appointed the committees. How was it in the Forty-fourth Congress? Congress met on the 6th day of December, 1875, and Mr. Speaker Kerr, on December 20, appointed the committees. The Forty-fifth Congress met on the 15th day of October, 1877, and Mr. Speaker Randall, on October 29, fourteen days later appointed the committees. In the Forty-sixth Congress, which met March 18, 1879, on April 11, twenty-four days later Mr. Randall appointed the committees. The Forty-seventh Congress met December 5, 1881, and on December 21 Mr. Speaker Keifer, sixteen days later, appointed the committees.

In 1883 Congress met December 3, and the committees were appointed December 24 by Mr. Speaker Carlisle. In 1884 Congress met on December 7, and on January 7, thirty-one days later, the same Speaker appointed the committees. The Fiftieth Congress met December 5, and the committees were appointed January 5, thirty-one days later, by Mr. Speaker Carlisle. In the Fifty-first Congress, presided over by the gentleman now occupying the chair, Congress met on December 2, and on the 21st day of that month, nineteen days later, he appointed the committees. The Fifty-second Congress met December 7, and the committees were appointed December 23 by Mr. Speaker Crisp. Again, the Fifty-third Congress met August 7, and the committees were appointed August 21, or fourteen days later. In the Fifty-fourth Congress, presided over by the present Speaker, Congress met December 2, and on December 21, or nineteen days later, the committees were appointed.

Thus we see, Mr. Speaker, that thirty-one days was the longest period that any Speaker has ever taken for the appointment of committees. In the case cited by the gentleman from Pennsylvania [Mr. DALZELL], Speaker Blaine actually appointed the committees in about four or five days, because Congress was not in session over four or five days before they were appointed. The present Congress met on the 15th day of March, 1897. Here it is the 1st day of June. Sixteen days in March, thirty days in April, and thirty-one days in May have elapsed, or seventy-seven days in which this House has been in session, and yet we are in an unorganized condition. We can not consider a measure except by this unusual method of having the Committee on Rules bring us in a relief measure, an enabling resolution, so to speak, by which you gentlemen who have tied your own hands and ours can legislate.

I now yield to the gentleman from Alabama [Mr. CLAYTON], who desires to state that he wishes to offer an amendment. I yield him five minutes.

Mr. CLAYTON. Mr. Speaker, it seems to me that the gentleman from Tennessee [Mr. RICHARDSON], who has kindly yielded

to me a small part of his very limited time, might well have said that we are not proceeding in very much order here in the consideration of this or any other measure.

The gentleman from Iowa [Mr. HENDERSON] has attempted to give the history of this Senate resolution No. 43, which is amendatory of the joint resolution approved April 7, providing for the transportation in American vessels of the grain contributed to the famishing poor in India. The original resolution of April 7 provided that the Secretary of the Navy might employ American ships to transport this grain to India, while the Senate resolution now reported by the House Committee on Rules strikes from the original resolution the word "American;" so that if the report of the committee is adopted, and the Senate joint resolution passes this House without amendment and is approved by the President, the Secretary of the Navy may employ any vessel, belonging to any person, firm, or corporation, and that may float any flag of any country, to carry this grain—this great evidence of the kind feeling and the charity of the American people—to the suffering poor in famine-stricken India.

Being aware how little power the minority in this House has to influence legislation, I nevertheless desire, Mr. Speaker, to offer, at the proper time, an amendment to the Senate joint resolution No. 43, which amendment I will ask the Clerk to read, and I hope the House will consider and adopt it.

The SPEAKER pro tempore (Mr. PAYNE). The amendment can be read for the information of the House.

The Clerk read as follows:

Provided, That if any citizen of the United States, owning a steamship or steamships of foreign build, suitable for carrying the grain to India and being immediately available and having satisfactory speed, shall offer to the Secretary of the Navy said steamship or steamships for such purpose, free of cost to the United States, on condition that such steamship or steamships shall be registered as United States vessels, the Secretary of the Navy is hereby directed to accept such offer, and the Commissioner of Navigation is hereby directed to cause them or either of them to be registered as vessels of the United States.

Provided further, That any steamships so registered may be taken and used by the United States as cruisers or transports upon payment to the owners of the fair actual value of the same at the time of the taking; and if there shall be a disagreement as to the fair actual value at the time of taking between the United States and the owners, then the same shall be determined by two impartial appraisers, one to be appointed by each of said parties, who, in case of disagreement, shall select a third, the award of any two of the three so chosen to be final and conclusive.

Mr. CLAYTON. At the proper time, Mr. Speaker, as I have stated, I shall ask unanimous consent for the consideration of the amendment which has just been read by the Clerk. Under the rules under which we are now proceeding I shall doubtless not have the opportunity to explain my proposed amendment at the time at which I shall be at liberty to offer it. I therefore desire to supplement what the gentleman from Iowa [Mr. HENDERSON] has said in regard to the history of this resolution.

After the approval of the resolution of April 7, the Secretary of the Navy informed the chairman of the Committee on Naval Affairs of the Senate by letter, a copy of which I hold in my hand, that American vessels suitable for transporting this grain could not be obtained, and suggested in that connection that Messrs. T. Hogan & Sons would charter to the Government, for the purpose of transporting food supplies to India, the vessels *Massapegua* and *Menantic* upon terms specified, if these vessels can be "naturalized."

These terms were that they would be willing to take a full cargo of grain in each, provided the Government would "naturalize" these two steamers before they leave this country, and that they would charge for the grain in bulk $6 per ton of 2,240 pounds hence to Bombay, or $7 per ton of 2,240 pounds hence to Calcutta, or should it be requisite to ship the cargo in bags, the price would be $6.60 per ton to Bombay and $7.70 per ton to Calcutta, and they also offered to make these ships a part of the naval auxiliary of the United States.

Now, Mr. Speaker, the proposition contained in the amendment which I shall offer has these several features: It looks to the transportation of the grain to India free of cost to the Government of the United States; it looks to the transportation of this grain under the American flag, and it looks to the use of any vessels that may be chartered under the provision of the amendment which I propose being made a part of our naval auxiliary.

All that this Government is required to do for this privilege of transporting the grain is to see that the vessels carrying it shall be admitted to American registry, or, to use the language adopted by the Secretary of the Navy, to "naturalize" foreign-built ships that may carry this grain. This is the only condition imposed for the free transportation of this grain, that the vessels so carrying it shall be entitled to American registry and entitled to fly the American flag.

The amendment which I shall propose will enable the Secretary of the Navy to accept any offer that may be made to him by citizens of the United States owning steamships suitable for the purpose, of foreign build, to carry this grain, about 8,000 tons, free of cost to the United States, on condition, as I have said, that the ships be granted American registers.

I am reliably informed that if the amendment which I shall propose is enacted into law to-day, within forty-eight hours the whole of the 8,000 tons can be shipped to India on steamships owned by citizens of the United States, free of all cost to the taxpayers of the United States, and carrying the flag of our country unfolded above this beneficence, to that far-off country, where famine and destitution appeal to the charity of the world.

The Secretary of the Navy has recently contracted to pay the owner of the steamship *Everett*, at San Francisco, $15 per ton to carry the wheat to India contributed on the Pacific Coast for this purpose, carrying it under an American registry and the flag of the United States.

Assuming that the freight would be at least as high from New York to India on vessels under our laws as from San Francisco to India, the Secretary would have to pay, at the same rate paid the *Everett*, $15 per ton on 8,000 tons, $120,000. By the adoption of the amendment which I shall propose $120,000 will therefore be saved to the taxpayers of the country.

The amendment is following out the custom established by former Congresses in other cases. Registry was granted to the British steamship *Dessong* that brought the Egyptian obelisk to New York. The *Jeannette*, of British build, was admitted by act of Congress to be registered. The *City of Paris* and the *City of New York* were "naturalized," or permitted to register, under the act of Congress passed in 1892.

They were permitted to register upon condition that the persons or company owning them should build in this country the like number of ships of equal tonnage and capacity, and that the two ships made should be a part of our naval auxiliary. I am asking this House to follow the precedents made in similar cases, where some scientific, charitable, or home interests were to be subserved.

The second proviso of the amendment which I have had read, if adopted, will put into the auxiliary navy of the United States two steamships first class in every respect, available at any time for service. They easily carry 1,000 soldiers and 600 horses each, and, in case of war, would prove valuable transport or troop ships.

The SPEAKER. The time of the gentleman has expired.

Mr. CLAYTON. I ask unanimous consent to proceed five minutes more.

The SPEAKER. The gentleman has already had two and one-half minutes more than his time.

Mr. CLAYTON. Will the Chair, then, permit me to add one more sentence?

Mr. RICHARDSON. I yield one more minute to the gentleman.

Mr. CLAYTON. I repeat, Mr. Speaker, that I am reliably informed that, should the proposed amendment be incorporated into this joint resolution—Senate resolution No. 43—and the resolution should become a law, within forty-eight hours thereafter two steamships, suitable by capacity, speed, and other essentials to transport this grain, ships owned by a citizen (Charles W. Hogan) of the United States, will be registered and loaded with this grain and on the way to India, carrying its cargo to relieve the suffering poor, and carrying it free of cost to the American people and under the flag of our own country.

Mr. RICHARDSON. I now yield five minutes to the gentleman from Kansas.

Mr. SIMPSON of Kansas. Mr. Speaker, this is a strange condition of affairs that this House is brought to—that we can have no legislation except by the pleasure and will of the Committee on Rules. Under the present management and the course of the Speaker, who has seen fit to refuse to obey the rules and appoint the committees, we are reduced to the condition that we must go supplicating to the Committee on Rules before we can get any legislation.

Here we have introduced into this House 3,228 bills. Eleven hundred and sixty-six of those bills have been introduced for the relief of soldiers of the late war mostly, and 696 to correct military records. Here are 2,000 bills for the relief of the old soldiers that fought to defend the Union. The Republican party presume to be the special guardians of the old soldiers, and here we are going on month after month refusing to take action upon these bills. That is not all. One hundred and eleven bills and resolutions have passed the Senate and come to this body for action. Sixteen of those are joint resolutions. Among those bills and resolutions are many very important measures that ought to be acted upon at once, notably the bankruptcy bill. There is a general demand for this legislation throughout the United States. It is estimated that there are 750,000 bankrupts in this country who are seeking relief.

Mr. WILLIAM A. STONE. Will the gentleman permit me to ask him a question?

Mr. SIMPSON of Kansas. Certainly.

Mr. WILLIAM A. STONE. Is there any more demand for a

bankruptcy law now than there was in the Fifty-second, Fifty-third, and Fifty-fourth Congresses?

Mr. SIMPSON of Kansas. Yes; there is a greater demand.

Mr. WILLIAM A. STONE. Why?

Mr. SIMPSON of Kansas. Because the prosperity promised by the Republican party has failed to materialize [laughter and applause on the Democratic side], and these people are now coming to the conclusion that you people are not going to bring them relief through the tariff bill, and so they are seeking relief through the bankruptcy court.

Mr. WILLIAM A. STONE. You want to bring prosperity by a bankruptcy law?

Mr. SIMPSON of Kansas. I have the floor.

The SPEAKER. The gentleman declines to yield to the gentleman from Pennsylvania.

Mr. SIMPSON of Kansas. Now, who is this Committee on Rules—that is the question—that we must go and supplicate from day to day under this new policy?

Mr. WILLIAM A. STONE. The majority of this House.

Mr. SIMPSON of Kansas. My constituency, your constituency, and the constituency of every member here is afforded no opportunity to get a measure through concerning their interest or welfare. Who is the committee?

Mr. WILLIAM A. STONE. The committee is the majority of this House.

Mr. SIMPSON of Kansas. There he sits in the chair. [Laughter on the Democratic side.] He is the committee. In a general way the committee consists of five persons, members of this House. Two of them being Democrats, of course they do not count. [Laughter.] Three of them are Republicans. How do they get on that committee, gentlemen? They are appointed by the Speaker of this House, and the Speaker appointed his own creatures that will march to his music and do his bidding, as they have done in every instance since this session commenced.

So the Committee on Rules resolves itself into a one-man power. He says what bills shall pass and what shall not pass; he is the Congress to-day, and we stand around here awaiting his sweet will in order to get legislation for the country. This is supposed to be the popular branch of the Congress of the United States——

The SPEAKER. The gentleman's time has expired. [Laughter.]

Mr. SIMPSON of Kansas. I would like to have about five minutes more.

Mr. RICHARDSON. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has three minutes.

Mr. RICHARDSON. I yield that to the gentleman from Arkansas [Mr. TERRY].

Mr. TERRY. Mr. Speaker, a great deal of complaint and stir has recently been made in regard to the order of the House providing for but two sessions a week—one on Monday and one on Thursday; and whilst I regard that as a rule of very doubtful constitutionality, yet it is a small matter compared with the non-appointment of the committees of the House, for what is the use of meeting here every day unless we can transact business, and how can we transact business unless the committees are appointed? Therefore, sir, the real grievance is the nonappointment of the committees. It is the right and privilege of this House to be fully organized. It is not only the right and the privilege of the House, but it is the right and the privilege of the American people to have their House of Representatives fully organized.

There are great questions stirring in the minds and the hearts of the American people upon which they can have no expression, because their House of Representatives, though assembled here, is bucked and gagged, with no opportunity to express itself. It is very true, Mr. Speaker, that under your "mild and gentle rule" you submitted to the House the question as to whether it would lie down and be bucked and gagged, and in a cowardly and truculent manner it did lie down. I do not know whether it is still satisfied with its position or not. I am inclined to think that some of the members who submitted to that operation would now like to have the gag taken out of their mouths, and I think they would like to have the question submitted to them again. [Laughter.]

The committees of the House are like the scouts of the Army. They are the eyes of the House, and without its committees the House is in no condition to obtain the necessary information on which to act. One of the great questions stirring in the minds and the hearts of the American people at this time is the question of the recognition of Cuba, and yet on that great question the House of Representatives has no opportunity to express itself.

The SPEAKER. The gentleman's time has expired.

Mr. TERRY. I ask unanimous consent that I may have two minutes more, as that seems to be the constitutional limit.

The SPEAKER. The gentleman from Arkansas asks the consent of the House that his time be extended two minutes. Is there objection?

There was no objection.

Mr. TERRY. I thank the House. Now, Mr. Speaker, with the appointment of the committees we could go on with a good deal of business that is necessary to be transacted, but as it is, the House is paralyzed, and we present to the people and to our constituencies a very humiliating attitude. I submit to both sides of this House that this condition ought not to continue. It is an outrage upon the dignity of the American House of Representatives. It is an outrage upon the rights of American constituencies, and it is a shame and a disgrace that it has been quietly submitted to so long.

Why are you afraid to transact business? Are you gentlemen on the other side afraid to allow discussion upon this floor? Is it a fact that a guilty conscience makes cowards of you all, so that you are not willing to have public matters discussed lest the attention of the country be called to your shortcomings? If not, why do you not organize this House as the House of Representatives has been organized from the very foundation of this Government to the present time and let us proceed to do the business of the country?

The SPEAKER. The time of the gentleman has expired.

Mr. HENDERSON. Mr. Speaker——

Mr. LINNEY. Mr. Speaker, will the gentleman allow me to offer an amendment?

Mr. HENDERSON. Not just now.

Mr. LINNEY. Mr. Speaker, am I not entitled as a matter of right to offer an amendment?

Mr. HENDERSON. I resume the floor, Mr. Speaker.

The SPEAKER. The gentleman from Iowa has the floor.

Mr. LINNEY. Will the gentleman not yield to me to offer an amendment to this rule?

Mr. HENDERSON. When the bill is up for consideration the gentleman can offer his amendment.

Mr. LINNEY. My intention is simply to introduce another bill for consideration in addition to the one contemplated by the rule. [Laughter.]

Mr. HENDERSON. I can not yield now. Mr. Speaker, it has not been my good fortune to be here as much as some other gentlemen have been during this extraordinary session, but I was present with my colleagues in this House during the time the work was done which we were called here by the President to do. I stayed until our part of it was done, and I shall be ready to finish that work when it comes back from the other end of the Capitol.

Gentlemen seem to forget that at 12 o'clock on the 4th day of March last a new Congress was born, and that, under the laws and the Constitution of our country, we were not expected to assemble until the first Monday in next December, unless, under the Constitution, the Chief Executive should call us together for some specific purpose. A great, patriotic President, looking into the Treasury, found that it was nearly empty, and that, under Democratic laws and Democratic administration, our receipts were running nearly fifty millions annually behind our expenditures.

He called Congress together in extraordinary session to meet that condition. If gentlemen will refer to the message assembling us, they will find that we were called here for the sole purpose of providing the necessary revenues to run this Government.

Mr. RICHARDSON. Will the gentleman allow me——

Mr. HENDERSON. No; I will not yield for anything at present. I want to pursue my line of thought. You gentlemen have been infernally industrious when you had nothing to do. [Laughter.] Now I want to have a little opportunity myself.

We met in pursuance of the call of the Chief Executive, and in nine days we passed a tariff bill upon which months of labor had been previously expended, and we sent it to the Senate—a measure which will give abundant revenue to run this Government and leave annually a balance to the credit of "Uncle Sam." That is what we were brought here to do. But for that call no Congress could have been in session under the Constitution; no bills would have been introduced; no committees would have been thought of. The President saw an exigency, and called us to meet it. We assembled and attended to the matter. And that is one of the chief matters, I apprehend, that troubles some statesmen here.

Now, in regard to this rule, my friend from Tennessee admits there will be no opposition to the main proposition; that we shall all be in favor of it; but he does not like the form of getting at it.

> For modes of faith let graceless zealots fight;
> His can't be wrong whose life is in the right.

[Applause.]

If we are in the right—and the gentleman admits it—why this "hell in a teapot," boiling over finally from the realms of Kansas? [Laughter.] Why, sir, this proposition now brought in from the Committee on Rules, were there the usual Democratic side with any ordinary Democratic leadership—not a Democratic side under a leadership that has neither gender nor politics—would be considered by unanimous consent, without an objection from the Democratic side; and it would have passed long ago with the sanction of this House. These are extraordinary things that

have come up here; and with statesmen and patriots seeking to do the business of the country, these little matters coming up would be attended to promptly.

Ah, but the gentleman from Kansas and the gentleman from Arkansas are "bucked and gagged." I do not believe that the gentleman from Kansas claims that. I have seen, I regret to say, some bucking and gagging done years ago. It is an infernally unpleasant thing to contemplate. I have seen since the war occasions for it that I did not see during the war. [Laughter and applause.] Yet I do not believe in the "bucking and gagging" principle. But to a certain extent it is at times needed.

Now, what is the accusation here this morning of the gentleman from Kansas? It is that four of us on the Committee on Rules are creatures of the Speaker. I suppose that is equally true of every committee that has ever been appointed by any Speaker of this House. All the committees of this House are, in a sense, his creatures; he appoints them; that is true. The gentleman from Kansas, I suppose, does not know that at least since I have been a member of the Committee on Rules—and I have reported many a rule in the last Congress—each and every one of them was passed by the sanction of a majority of the House. Then, if you were "bucked and gagged" by the creatures of the Speaker or by the Speaker himself, you did it yourselves. It is very nice for men to stand here in their places and howl abuse at the Speaker and those who may be associated with him; but gentlemen—honorable, brave men—would not take such a course. [Applause on the Republican side.] Only men who are wandering in the realms without the high dignity of thought would pursue such a course.

We are here in pursuance of the laws of our country and, under the rules of this body, doing our duty. If we report rules, they are for you to approve or condemn. Thus far you have approved them. The work for which we were called together has been done so far as we could do it, and if we had been permitted—I will not attempt to state why it has not been completed—we would have finished it and set the wheels of industry going in this country. We are here now, and every Republican will be in his seat when that bill comes from the Senate to perfect a law that will give confidence and activity to the business of the country. We shall all be here when there is work to be done.

You are in a terrible hurry to have committees appointed—a dreadful hurry! Gentlemen, it takes time to make up committees, even if we need them. If you undertake to go to work and ascertain the personal preferences, the adaptability, the capacity of a large body of men like this, you will find that it takes time to ascertain who is best fitted for particular work. And when this work is to be done, you want to give the power that is to make the appointments plenty of time to do it. Take, for instance, my friend from Kansas. Imagine a Speaker trying to pick out the committee where he would be useful to his country! [Laughter.] Every time that he opens his mouth he makes the problem more difficult for the Speaker. [Renewed laughter.]

This House has done the work that we were called here to do; and we are ready and waiting to do whatever may be needed to finish that great work. In the meantime, if there are any special matters coming up needing special attention, we are here to cooperate with the Republicans, the Democrats, and even the Kansas leader for the benefit of our country.

I have read of a good many things going on showing the tireless activity of some people when there was not anything special for them to do. I have had no opportunity until now to say a word. I have taken occasion thus to express myself because these remarks are germane to what has gone before in the debate this morning. I now yield five minutes to the gentleman from Illinois [Mr. CANNON.]

Mr. CANNON. I have listened to the gentleman from Iowa [Mr. HENDERSON], and it seems to me that I do not care or need to say anything.

Mr. HENDERSON. Then I yield ten minutes to the gentleman from Ohio [Mr. GROSVENOR]. [Loud applause.]

Mr. GROSVENOR. Mr. Speaker, the gentleman from Iowa [Mr. HENDERSON] has stated what I wanted to be able to state; and I do not know that I can add anything to the debate. The first important consideration here is, Who is charged with the duty of carrying on the legislation of this Congress? Is it the gentleman from Washington [Mr. LEWIS] in his individual capacity or in his capacity as leader of the opposition to the Republicans? [Laughter.]

I want to be and will be, under all circumstances, absolutely respectful to gentlemen on the other side, but I must say that they are treating us with great unfairness. They spring upon us something new every once in a while in the form of a leader. [Laughter.] Now, while the ambitious and eloquent and very talented gentleman from Texas [Mr. BAILEY], who had in a certain way inherited a leadership that he had never earned very successfully [laughter], was running the machine over there, we knew how to get along with him. A few words of common-sense argument, a few kind words, and an appeal to his good judgment, and he was ready to do anything that was fair and which looked to the going ahead with the business of the House. [Laughter and applause.]

The only trouble was that the disappointed leader from Tennessee occasionally grumbled a little; but we got used to that. [Laughter.] But when the gentleman from Kansas sprang in and succeeded in bringing that splendid minority of this House into accord, and came forward with a phalanx absolutely united and enthusiastic, we on this side began to tremble, and I began to wonder whether God Almighty for some inscrutable purpose had not concluded to wreck the Democratic party on the leadership question. [Applause.] But somehow or other that gentleman dropped out. I never knew whether it was because his time was up; I did not know whether he had gone into the leadership under a limitation of time, or what other reason might have existed. But, like the great Greek leaders of recent date, he started for home suddenly; but it is not said of him that he tried or proposed or undertook to commit suicide on the way.

Then came the gentleman from Washington. [Laughter.] I have not examined his credentials. Whom he represents in this Congress I do not know, and whether he could get a solid vote of the other side to stand by him I do not know, for he has never progressed in leadership far enough to get a vote on any question. [Laughter.]

The serious question is, Is the Republican majority on this side of the House responsible for the legislation of Congress? And I speak with absolute contempt of any man who will abuse the Speaker of this House over the head of the majority. Gentlemen on the other side, here are the men who are responsible for what is going on right here. Do not hurl your anathemas at a man who by the dignity of his office and by the usages of the House must sit silent and take it. Fire your little paper wads at somebody over here who can answer back. That is the brave way to do it. [Applause.]

The gentleman from Arkansas has discovered that somebody on this side of the House is getting restive with being "bucked and gagged." I think the gentleman is looking through the spectacles of his wishes, that his hopes and desires are father to the thought of something that he sees. We have done exactly what we came here to do. We did not come [addressing the Democratic side of the House] by your suggestion. We are not going by your suggestion, and we will not shape our action while here at your suggestion. [Applause on the Republican side.] You want to legislate! Why, if any of these bills you are talking about should come up, four out of five of you would vote against any one of them.

The gentleman from Kansas eloquently pleads for the soldier. We are paying out to-day at the ratio of $150,000,000 per annum to the soldiers of the United States of America; and I have not heard a great many of them making complaint that the amount was not great enough. We have about $400,000,000 of revenue of every description coming into the Treasury, and we are paying out three-eighths of it to support the soldiers of the country. And you on the other side do not like it!

But if there was a bill here to add $10 to it, nine out of ten of you would vote against that bill. [Applause on the Republican side.] So the proposition is a very easy one, and the wild and senseless and imbecile talk that has been going out to the country should be rebuked. Some very distinguished men say, "Why, you have adjourned for more than three days, and there is not any Congress."

Just look at that, now! Just think of that, men of the House of Representatives! Think of that, the commonest man of half sense in the United States of America! We have a Constitution, have we not? That is to say, if a majority of this House gets together—that is, 1 more than one-half of the 356 members—and then a majority of 1 does an illegal act and adjourns for more than three days, great lawyers, whose voices sound so musical to them that they fill the air with them by the month in this section of the country, say that Congress has come to an end. Just think of that! Those are the propositions that three days' study produces constantly, and they go out to the country, that Congress has come to an end; that we have here a body, we have here a Congressional organization under the Constitution, but that it is in the power of one man more than one-half of this body to always and under all circumstances paralyze Congress and put an end to it. How utterly ridiculous and absurd the whole of it is.

Gentlemen, this tariff bill is moving at a ratio equal to the most rapid movement of legislation of this magnitude. It passed this House with a rapidity that surprised the country. It will pass the Senate. [Derisive laughter on the Democratic side.] Yes; and in that connection I may say that to-day the people of the country stand in an overwhelming majority in favor of the House bill. [Applause on the Republican side.] And I can tell you something more that that, gentlemen. When the Senate bill comes back here and the action of the joint conference shall be had, the people of the country will be satisfied with the result. The Republicans will have executed their duty. They will have responded to the call of the President, and you may call on the

rocks and mountains to hide you from the wrath of the people in the future. [Applause on the Republican side.]

The SPEAKER. The question is on ordering the previous question.

The previous question was ordered.

The resolution was agreed to.

RELIEF OF FAMINE SUFFERERS IN INDIA.

Mr. CANNON. Mr. Speaker——

The SPEAKER. The gentleman from Illinois [Mr. CANNON] is recognized in charge of the resolution.

Mr. CANNON. I ask for the reading of the joint resolution.

The joint resolution was read, as follows:

Joint resolution (S. R. 43) in amendment of the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India, be, and the same is hereby, so amended that the Secretary shall be authorized to charter and employ the most suitable steamships or vessels of any nationality, not exceeding two in number, to carry out the object of said resolution.

Mr. CANNON. Mr. Speaker, I think the House is quite fully informed touching the merits of this joint resolution and the necessity therefor, and I would be very glad to have a vote, unless somebody wants to talk for a moment as to the merits of the resolution.

The SPEAKER. The question is on the third reading of the Senate resolution.

Mr. RICHARDSON. Mr. Speaker, before the matter is put, I am requested by the gentleman from Alabama [Mr. CLAYTON] to ask that he be allowed to offer his amendment.

Mr. CANNON. I can not do that.

Mr. RICHARDSON. Or to ask unanimous consent to do so. The gentleman can make his request.

Mr. CANNON. In the first place, the amendment is not germane; and in the second place, I want this food, which has been contributed by the charitable people of the country, to go, without further vexation, to the starving poor of India.

Mr. CLAYTON. May I interrupt the gentleman from Illinois?

Mr. CANNON. Certainly.

Mr. CLAYTON. I do not desire to detain the House with any remarks, but I merely ask the privilege of offering this amendment, which was read as a part of my remarks, and ask for a vote on that proposition.

Mr. CANNON. The amendment is not germane, and I can not yield for that purpose.

Mr. CLAYTON. You object, then, as I understand? I understand the gentleman to object to the amendment that I propose.

Mr. CANNON. Oh, yes. I ask for a vote.

The SPEAKER. The question is on the third reading of the joint resolution.

The joint resolution was ordered to a third reading; and it was accordingly read the third time, and passed.

On motion of Mr. CANNON, a motion to reconsider the last vote was laid on the table.

THE PUBLIC PRINTING.

Mr. HENDERSON. Mr. Speaker, I offer the following privileged report.

Mr. CANNON. Before the gentleman does that, if he will allow me, I should be glad to ask unanimous consent, for the purpose of saving time, as there are several conference reports to make. I ask unanimous consent to consider Senate resolution 44, providing for deficiencies in the Printing Office.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. SIMPSON of Kansas. Mr. Speaker, I object.

Mr. HENDERSON. Then let the resolution be reported, Mr. Speaker.

The SPEAKER. The Clerk will report the following resolution from the Committee on Rules.

The Clerk read as follows:

The Committee on Rules, having had under consideration House resolution No. 49, ask leave to report the same with the recommendation that it be adopted:

Resolved, That immediately upon the adoption of this order it shall be in order to consider in the House Senate joint resolution No. 44, making an appropriation to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897.

Mr. HENDERSON. Mr. Speaker, the purpose of this is to bring up and dispose of the very matter referred to by the gentleman from Illinois—to provide for an appropriation for the Government Printing Office.

Mr. RICHARDSON. I would like to ask the gentleman if I understand he is making a speech to cut off debate?

Mr. HENDERSON. I am saying all I hope to say, I will state to the gentleman from Tennessee.

Mr. RICHARDSON. I understand the gentleman from Texas desires to speak on this subject.

Mr. HENDERSON. That is after the resolution is adopted.

Mr. SAYERS. I would just as soon have the time then as now.

Mr. HENDERSON. That is the time. Those are all the observations I wish to make. I ask for the previous question.

The previous question was ordered; and under the operation thereof the resolution was agreed to.

The SPEAKER. The Clerk will report the bill.

Mr. HENDERSON. The gentleman from Illinois will take charge of the bill.

The SPEAKER. The gentleman from Illinois presents the following bill.

The Clerk read as follows:

Joint resolution (S. R. 44) making an appropriation to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897.

Resolved, etc., That the following sum be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897, namely:

PUBLIC PRINTING AND BINDING.

For the public printing, for the public binding, and for paper for the public printing, including the cost of printing the debates and proceedings of Congress in the CONGRESSIONAL RECORD, and for lithographing, mapping, and engraving for both Houses of Congress, the Supreme Court of the United States, the supreme court of the District of Columbia, the Court of Claims, the Library of Congress, the Executive Office, and the Departments, including salaries or compensation of all necessary clerks and employees, for labor (by the day, piece, or contract), and for rents and all the necessary materials which may be needed in the prosecution of the work, $225 000.

Mr. CANNON. Mr. Speaker, a sentence or two in explanation; and then, unless somebody wants to be heard, I will ask for a vote.

Mr. SAYERS. I will state, Mr. Speaker, that we should like to have twenty minutes on this side.

Mr. CANNON. This exact item, as I explained yesterday, was contained in the general deficiency bill and passed by this House with other items in March. That bill has not been returned to the House, but the 1st of June having arrived, there is no longer money available to carry on the Public Printing Office. The Senate, ascertaining this condition, I presume, instead of sending us back the general deficiency bill, to provide for the necessary public service here and elsewhere, pick out this one item, embody it in a joint resolution, pass it, and send it to us.

Ordinarily, on such action on the part of the Senate, I should favor, as one member, no action upon the part of the House, because the House ordinarily originates appropriation bills; but, as I explained yesterday, this item having passed the House, in substance, it may, if we so desire, be treated as a matter that originated in the House. And besides that, the work ceases in this great office, greatly to the inconvenience of the House, the Senate, and the country, if this appropriation is not made. Therefore I ask that the joint resolution be passed. Now the gentleman from Texas desires some time.

Mr. SAYERS. About twenty-five minutes. Gentlemen on this side want some time.

Mr. CANNON. I yield the gentleman from Texas twenty-five minutes, or such part thereof as he may desire.

Mr. SAYERS. Mr. Speaker, it is my opinion that in the circumstances this resolution ought to pass, but I do not believe that it should without the attention of the House being called to the fact that on the 19th day of March the general deficiency bill passed this House embracing this very item. That bill has been in the Senate, or rather in the custody of a committee of the Senate, ever since the 19th day of March. On the 29th day of March a Senate resolution came to this body, and items that were borne by the general deficiency bill were put upon that resolution. On the 3d day of May another resolution came to this House containing another item that was in the general deficiency bill, and it, too, was passed; and now we are confronted with a third resolution which contains another item which was in the general deficiency bill.

Mr. Speaker, I would like to know from the gentleman from Illinois [Mr. CANNON], who is charged with leadership in the matter of appropriations, if it be his purpose to allow a coordinate branch of Congress to extract from the general deficiency bill, which has already passed the House, items here and there, send them over to the House, and have the House to concur in them? In the meantime the general deficiency bill, which contains appropriations for every branch of the public service and for every department of the Government, is lying upon the table of a Senate committee, and has not been considered by that committee and reported to the Senate. I repeat the question to the gentleman, Is this to be the policy and is it to have his sanction? I wish to say, Mr. Speaker, if the responsibility rested upon me, if I were charged with the conduct of appropriation bills through this House, I should ask the Senate, in justice to the body of which I am a member, with its constitutional rights in the matter of appropriations and revenue, to pass the general deficiency bill rather than to send here separate and independent resolutions covering items that are in that bill.

Mr. CANNON. Will my friend yield to me to answer his question just at this point, and I will yield him such time as I shall occupy?

Mr. SAYERS. Certainly.

Mr. CANNON. It is a very fair question, and a pertinent one, that the gentleman asks, and I answer it in the light of the facts that have existed. He and I both know that this is a government through parties. The Republican party has power in the White House and power in the House of Representatives. In the coordinate branch of Congress, the Senate of the United States, the Republican party has not power.

The Democratic party, if I understand what it is, has not power there. The Populist party, I understand, has not power. The result is that, in the absence of a party majority in the Senate of the United States, that body, as I understand, does not respond to the demands of the country, and when I say this I mean to keep well within the parliamentary rule. Therefore the Senate of the United States, being in that situation, and this appropriation and the other appropriation referred to by the gentleman from Texas being necessary to carry on the Government, whenever an opportunity is offered to enact such appropriations into law, I, as a member of this House, intend to move to concur.

Mr. SAYERS. Mr. Speaker, I did not intend in my remarks to invoke a partisan discussion. My motive in calling the attention of the House to the condition of deficiency appropriations at this time was not to criticise the pending appropriation, because, in my judgment, it is one that ought to be made, nor to find fault with the majority in this House because of their proceeding to the consideration of this appropriation. My purpose was only to call the attention of members to the policy which seems to have been adopted in reference to the deficiency estimates—a policy which has not obtained in any previous Congress during the period of my service upon the Committee on Appropriations. My complaint is that the Senate is permitted to take certain special items from the general deficiency bill and send them here in separate resolutions and at different times for the consideration of the House, neglecting other items in the bill equally as important to the country.

Now, the answer of the gentleman from Illinois is not sufficient. He says that the Senate is not under the control of either one of the three parties. That is true; but notwithstanding that fact, has not the Senate passed the sundry civil appropriation bill? Has it not passed the agricultural appropriation bill? Has it not passed the Indian appropriation bill? Why, then, Mr. Speaker, of the four general appropriation bills is the deficiency bill alone permitted to lie on the table of a Senate committee for so long a time without being considered or reported to that body? Besides, I must remind the gentleman from Illinois that a majority of the Senate Committee on Appropriations is composed of Senators of the same political faith with himself.

I would not advise the House upon this occasion to reject this resolution, but hereafter I would have the House, in justice to itself, refuse to act upon such special resolutions until it shall become evident by actual demonstration that the Senate is unable to consider and pass the general deficiency bill. As I have already said, there are many provisions in that bill of importance and necessity to the country, together with judgments long since rendered, to the payment of which no valid objection can be made. I now yield five minutes to the gentleman from Missouri [Mr. COCHRAN].

Mr. COCHRAN of Missouri. Mr. Speaker, consideration of this resolution was not anticipated by any considerable number of the members of this House, and therefore they have not had time for proper preparation for its discussion. Is it true, sir, that heretofore deficiency bills have frequently been made vehicles by which doubtful appropriations have been hurried through both branches of Congress in the closing hours of the session? Why is it that invariably one or more of the general appropriation bills are held back until the very last days of the session and then brought forward with numerous amendments, carrying millions? No matter how lengthy the session, the programme is the same.

Congress usually assembles early in December, but the appropriation bills drag their weary length along until the very last hours of the session and are then hustled through under whip and spur. Members are told that they must vote for this or that general appropriation bill, regardless of its monstrous contents, or else the wheels of Government will be stopped.

Mr. Speaker, there are indications that this extra session is to be no exception to this general rule. It seems probable that after the passage of that great panacea, the pending tariff bill, the Senate will take up this appropriation bill tack onto it a few millions here and there, and then send it over here in the closing hours of the session loaded down with appropriations which otherwise could not possibly pass this body. It is said that unless we pass this resolution no funds for defrayment of the expense of the Printing Office will be available. As to the entire bill, when finally it reappears in the House, no matter what changes may be made at the other end of the Capitol, the same plea will be made.

I shall vote against this resolution. I believe that the general appropriation bills should be passed only after due consideration by both Houses, and not merely upon consideration by one branch of Congress, the bills being thrust upon the other House in the closing hours of the session, to be passed willy nilly, with no proper opportunity to consider them upon their merits.

If the Senate proposes to amend the general deficiency bill, why not do so now and send it over here while time remains for full investigation and discussion of its amendments? Mr. Speaker, I believe that when next we inspect the bill it will be loaded with amendments largely increasing the appropriations. I believe it is being held in the Senate committee room now for the purpose of thus loading it, and predict that when in the closing hours of this extra session it comes before this body for consideration we shall be told that the day of adjournment has been set, and that we can have only a brief time for debate, and with little or no time for investigation members of this House will be required to vote upon the measure. Furthermore, the passage of the bill will be urged lest we do to all branches of the Government the injury which the gentleman from Illinois says refusal to pass this resolution will do to the Public Printing Office.

I am opposed to this kind of legislation. This House has a right to expect the Senate to send that bill back to us in time to be properly considered here, and then, instead of adjourning from day to day, we ought to take it up and consider it with due deliberation.

Another thing. We have heard from the early days of the Administration of Grover down to this time in the reign of McKinley that the public revenues are vastly less than the public expenditures, and that that is the chief cause of existing hard times. If it be true that the Government's expenses exceed its receipts, I venture to recommend a remedy which deserves at least a trial—a remedy that you have never sought to apply, a remedy that has hardly been broached in this House.

How would it do to try retrenchment of public expenditures? Why not lop off appropriations until the outlay becomes less than receipts? That is what a prudent individual would do under similar circumstances in the management of his own affairs, and it is what this Government ought to do in the management of the affairs of the people.

Just such methods as are being pursued in holding up the general deficiency bill have resulted in vastly increasing public expenditures in former years, and have facilitated at least systematic profligacy, and probably sometimes something worse than profligacy, in public expenditures. The House should not consider the deficiency bill piecemeal, as is proposed in this resolution, but should await its passage by the Senate, leaving responsibility for the results of delay to rest where it belongs.

Mr. SAYERS. I yield two minutes to the gentleman from Washington [Mr. LEWIS].

Mr. LEWIS of Washington. I avail myself of the kindness of the gentleman from Texas to offer an amendment which I request may be read.

Mr. CANNON. I do not yield for an amendment. I suppose the gentleman can have his proposition read in his own time as a matter of debate.

The SPEAKER. The gentleman from Illinois [Mr. CANNON] does not yield for an amendment. Does the gentleman from Washington desire to have the proposition read as a part of his remarks?

Mr. LEWIS of Washington. I should like to have it read for information at this time as a part of my remarks.

The Clerk proceeded to read the following:

That the Secretary of War be, and he is hereby, authorized and directed to expend from existing appropriations "for dredging Salmon Bay and improvement of the waterway connecting the waters of Puget Sound, at Salmon Bay, with Lakes Union and Washington, by enlarging the said waterway into a ship canal, with the necessary locks and appliances in connection therewith," made by the "act making appropriations for the construction, repair, and preservation of certain works on rivers and harbors, and for other purposes," received by the President August 7, 1894, the sum of $10,000 in making a definite survey and location and plans and specifications of said improvement from the head of Salmon Bay to termination on Smith's Cove and connect with former survey from Lake Washington to head of Salmon Bay, and in preparing a cadastral map, showing each piece of property required to be deeded to the United States or from which a release is required, with its metes and bounds.

The SPEAKER (before the reading was concluded). This would not be in order as an amendment to the pending proposition, unless the gentleman from Washington has some new precedent. [Laughter.]

Mr. SAYERS. I do not think the gentleman from Washington is serious in pressing this matter, anyhow.

Mr. LEWIS of Washington. I must differ from my exceedingly amiable friend from Texas. I am very serious about this matter. I brought it up before in Committee of the Whole. The honorable gentleman from Illinois on my right says that this is a matter of heart with me. He is right, because this House is likely to be deprived of the hospitable association of my companionship in the future unless this measure shall be given some serious consideration at some time. [Laughter.] But I insist, in the moment I have left, that this is a germane amendment, and I would ask to have it now considered, as it is important that we have the $10,000

out of the money already appropriated, in order to complete a work most important to this country. I respectfully suggest that the amendment be considered, notwithstanding the objection of the gentleman from Illinois.

Mr. SAYERS. I yield ten minutes to the gentleman from Kansas [Mr. SIMPSON].

Mr. SIMPSON of Kansas. Mr. Speaker, I shall not object to the passage of this very urgent appropriation bill. My purpose in rising is to speak about another matter on which heretofore I have had scarcely the opportunity to speak that I desired. I shall address myself somewhat to some remarks directed partly to me and partly to the House in general by the gentleman from Ohio [Mr. GROSVENOR] and the gentleman from Iowa [Mr. HENDERSON] during the discussion on the adoption of the report of the Committee on Rules.

The gentleman from Iowa called the attention of the House to the fact that this "extraordinary session," as he was pleased to call it, had been convened by the President for a specific purpose; that the President of the United States had called us here to legislate on the tariff alone, and therefore of course it followed that we could not legislate on any other matter. Mr. Speaker, when was the President given power to determine what this popular branch of the legislative body of the United States should legislate upon? When Congress assembles, it is, I take it, its right or privilege—it had that privilege prior to the time when the present occupant of the chair refused to appoint the committees—to legislate upon any matter within its constitutional jurisdiction. And I do not believe that we ought now to be restricted to the passage of a bill the sole purpose of which is to increase taxation upon the people.

We had a Republican "landslide," they say; and you have a Republican majority here in this House, and a Republican President in the White House, because of your lavish promises to the people to bring prosperity back to them. The President, in his inaugural address, outlined the policy, so to speak, of his party. He did not in that address limit this House in legislation to the tariff alone. He said very clearly and plainly that there were other matters which should receive consideration by this body. Therefore, according to the President's suggestions, we ought to proceed at once to consider those matters.

Now, what I objected to, and what I am objecting to to-day, is that this House does not proceed in an orderly manner to appoint the committees and go on with the work of legislation. The gentleman from Iowa said or intimated that one of the most potent reasons why the committees had not been appointed was because the Speaker had not had ample time to familiarize himself with the capacity of the different members of the House. Usually when Congress convenes on the first Monday of December the Speaker proceeds at once to make up his committees; and we usually adjourn from day to day until he has done so. I take it there is no purpose on the part of the Speaker to appoint committees. We have already been in session more than two months; and there is no intimation that the Speaker proposes to appoint any committees. The Speaker, when we first assembled here, gave as one of his reasons for failing to appoint the committees that he had not had time to familiarize himself with the members of the House. He certainly has had time enough now, and he ought to proceed at once to appoint the committees.

The gentleman from Iowa singled me out and said, "For instance, what a dilemma the Speaker would be in if he had to select the committee on which the gentleman from Kansas could be of use to the House!" I think he was entirely right in that remark, if he had in view such legislation as the Republicans would give us, because I would not be of any good on a committee if it was expected that I should cast my vote with the Republicans. I could not do that; I do not agree with the kind of legislation that they give the country or have been giving the country—such legislation as has brought the country to its present condition.

But under the customs which have grown up through the experience of legislative bodies in this and every other country where such bodies exist, it has come to be considered that the only safe method of proceeding in such bodies is to filter legislation through committees, and that for this purpose each party shall have representation on those committees. Therefore, while I might not have the wisdom of the gentleman from Iowa, I might in committee service represent the people of my district who have selected me for this purpose. That is what I am demanding—the right to represent my constituents who sent me here, and who are as good as the constituents of the gentleman from Iowa or those of the gentleman from Illinois or the gentleman from Ohio.

When I heard the voice of the gentleman from Iowa to-day I was somewhat surprised. I had read in the daily papers that there had been a little rebellion in British Columbia, where some of the Indians had got off the reservation, and that the leader of that band, named Almighty Voice, had been killed. When I heard the echoes of the voice of the gentleman from Iowa here to-day I made up my mind that the papers of this morning were at fault in saying that Almighty Voice had been killed. He is on deck. [Laughter.]

The gentleman from Ohio [Mr. GROSVENOR] is very much concerned about the leadership on this side of the House. He need not be. There are no leaders over here. We are all leaders. [Laughter and applause.] We do not need anybody to lead us like a lot of sheep, as the Republicans do. We have an independent membership over here; each man leads himself. We do not need a leader, as you people do. You could not get along without a leader. You do not know enough to express an opinion in the morning until you read the newspaper and find out what your leader has told you to express. That is the trouble with you people. There are intelligent men on this side of the House. They understand the questions before the country. They read and think for themselves. They do not have to jump over the fence behind the leading billy goat.

Mr. BARTHOLDT. When the gentleman employs the term "we"—pluralis majestatis—does he mean that it shall be applied to the Populists, to the Democrats, or to the combined forces on that side?

Mr. SIMPSON of Kansas. I mean it to be applied to every man who opposes the Republican party in this or in any other place, because we consider that party the enemy of mankind. [Laughter and applause on the Democratic side.] I will ask whether the language which the gentleman from Missouri [Mr. BARTHOLDT] addressed me is Hebrew or "United States?"

Mr. BARTHOLDT. I am aware that the gentleman has not had a classical education.

Mr. SIMPSON of Kansas. The gentleman from Missouri has the advantage of me, because he knows enough to call things by two different names. I only know enough to call them by one name; but I generally get there.

Mr. BARTHOLDT. Does the gentleman refer to the term "Popocratic" or "Demopopulist."

Mr. SIMPSON of Kansas. I mean all the opposition.

Now, Mr. Speaker, there has been a very grave attack made on this House by a member of the Senate. Some very serious charges have been made.

The SPEAKER. The gentleman must be in order.

Mr. SIMPSON of Kansas. I am reminded by my friend from Washington [Mr. LEWIS] that the Latin of the gentleman from Missouri is very bad Latin. Of course, I am not familiar with the matter myself.

I was about to remark, however, that there has been a very serious attack made on this House by a member of the Senate. I read in the CONGRESSIONAL RECORD of May 29 a speech by Senator MORGAN. He says:

The Speaker of the House——

The SPEAKER. It is not in order to read that.

Mr. SIMPSON of Kansas. Not in order to read the RECORD?

The SPEAKER. Not in order to read the debate in the Senate.

Mr. SIMPSON of Kansas. Does the Speaker rule that it is not in order to read the RECORD?

The SPEAKER. The Chair rules that it is not in order in one branch of a legislative body to refer to or comment upon a debate in the other branch, because such references necessarily lead to disputes, and would interfere with the harmony which ought always to exist between the two branches. The Chair hopes the gentleman will not pursue that line of discussion.

Mr. SIMPSON of Kansas. Does the Speaker rule it out of order to read anything in the RECORD?

The SPEAKER. The Chair rules it is out of order to read that.

Mr. SIMPSON of Kansas. How does the Speaker know what I was going to read?

The SPEAKER. The Speaker knows by what the gentleman had begun to read.

Mr. SIMPSON of Kansas. I was merely proposing to read what had been said in the Senate and is now a part of the RECORD.

The SPEAKER. Precisely.

Mr. SIMPSON of Kansas. Is it unlawful to read that?

The SPEAKER. The Chair thinks it is, under the rules of parliamentary law.

Mr. SIMPSON of Kansas. Mr. Speaker, that is new parliamentary law to me.

The SPEAKER. That is very possible. [Laughter.]

Mr. SIMPSON of Kansas. I do not see why there should be anything published in the RECORD that can not be read here.

The SPEAKER. It can be read, but not in the House of Representatives.

Mr. SIMPSON of Kansas. Not in the House—can be read anywhere except in the House?

The SPEAKER. That the Chair does not undertake to decide. Some of it, he thinks, could not. [Laughter.]

Mr. SIMPSON of Kansas. Then the Chair decides that this can be read anywhere except in the House?

The SPEAKER. The Chair does not.

Mr. SIMPSON of Kansas. But the Chair decides that it can not be read in the House.

The SPEAKER. The Chair has passed on the question.

Mr. SIMPSON of Kansas. Well, as I suggested, the Chair could hardly know what I was going to read.

The SPEAKER. The gentleman does not know what the Chair can know.

Mr. SIMPSON of Kansas. No; and I think nobody else, if that is his ruling.

The SPEAKER. That may be. The gentleman certainly can not. [Laughter.]

Mr. SIMPSON of Kansas. Well, I very much regret it, Mr. Speaker, because this is information that might have escaped some of the members of this House, and, as suggested by some of my colleagues here, I shall have to commit it to memory and give it to the House in that way.

The SPEAKER. The gentleman's time has expired.

Mr. SIMPSON of Kansas. Which I presume the Speaker is very glad of.

The SPEAKER. The question is on the third reading of the joint resolution.

The joint resolution was ordered to a third reading; and it was accordingly read the third time, and passed.

On motion of Mr. CANNON, a motion to reconsider the last vote was laid on the table.

SENATE BILLS AND RESOLUTIONS REFERRED.

Under clause 2 of Rule XXIV, the following Senate bills and resolutions wer taken from the Speaker's table and referred to their appropriate committees, as indicated below:

A bill (S. 1238) to regulate, in the District of Columbia, the disposal of certain refuse, and for other purposes—to the Committee on the District of Columbia, when appointed.

A bill (S. 1337) to authorize the President to commission First Lieut. Benjamin W. Loring a captain—to the Committee on Military Affairs, when appointed.

A bill (S. 1978) extending the time for the commencement and completion of the railroad bridge across the Illinois River, near Grafton, Ill., by the St. Louis, Perry and Chicago Railroad—to the Committee on Interstate and Foreign Commerce, when appointed.

A bill (S. 471) relating to the adulteration of foods and drugs in the District of Columbia—to the Committee on the District of Columbia, when appointed.

Joint resolution (S. R. 36) declaring that a condition of public war exists in Cuba, and that strict neutrality shall be maintained—to the Committee on Foreign Affairs, when appointed.

Concurrent resolution—

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be requested to furnish the Senate with such information as he may have in his possession with reference to the present condition of the harbor of Cumberland Sound, and to inform the Senate whether any immediate action is necessary to protect the entrance from being closed against the commerce usually entering the port of Fernandina—

To the Committee on Rivers and Harbors, when appointed.

PREVENTING COLLISIONS UPON INLAND WATERS OF THE UNITED STATES.

Mr. DALZELL. Mr. Speaker, I submit a report from the Committee on Rules.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

The Committee on Rules, to whom was referred House resolution No. 43, have had the same under consideration, and ask leave to report the same, with the recommendation that it be adopted.

Resolved, That upon the adoption of this resolution the House proceed to consider Senate bill 1899, to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States, until the same is disposed of.

Mr. DALZELL. Mr. Speaker, the last Congress passed an act which changed the rule of the road so far as ocean travel is concerned. It has been deemed necessary——

Mr. RICHARDSON. I rise again to ask the gentleman if he will allow us reasonable time for debate upon this resolution, or upon the measure, if the resolution is adopted?

Mr. DALZELL. Mr. Speaker, I can not see any necessity for occupying forty minutes in the discussion of a rule such as this, a simple matter like this. The gentleman will have unlimited time to debate the main proposition.

Mr. RICHARDSON. If the gentleman will say we shall have time on the main proposition, that will be satisfactory.

Mr. DALZELL. On the main proposition, yes.

Mr. RICHARDSON. That is what I asked the gentleman.

Mr. DALZELL. I was going on to say that it had been deemed necessary to pass an act of Congress that would make the internal-navigation regulations correspond with those adopted by the last Congress with respect to ocean travel. This resolution is for the purpose of getting that bill before the House.

I now ask for the previous question.

The previous question was ordered.

The resolution was agreed to.

The SPEAKER. The gentleman from New York [Mr. PAYNE] is recognized.

Mr. CANNON. Mr. Speaker, I should be glad, before the gentleman calls up the bill, to ask him how long it will take.

Mr. PAYNE. It ought not to take a great while. The bill itself occupies some sixteen or eighteen pages, and that will have to be read. It ought not to take a great while to dispose of the bill.

Mr. CANNON. I wish the gentleman would allow us to present a conference report. I do not care to raise the question of consideration. I suppose a conference report is always in order. I have a conference report on the sundry civil bill, which I think will take but a very short time. I should like exceedingly to have it adopted to-day.

Mr. PAYNE. Mr. Speaker, I think there is no reason why we can not get through with both the bills this afternoon. This bill has been waiting for some time, and was ready to be acted upon by the House on the 10th of last month, and would have been but for objection that was raised, not against the bill, but because some one wanted to get into the RECORD.

Mr. CANNON. Very well. I will give notice that at some time during the afternoon I will ask the gentleman to yield, if this promises to take any great length of time, in order that I may make a conference report on the sundry civil bill.

The SPEAKER. The Clerk will read.

The bill was read at length.

Mr. PAYNE. Mr. Speaker, there are some amendments to be offered to the bill, and some gentlemen have requested me to make a brief explanation of it.

In 1888 Congress authorized the appointment of delegates to this international marine conference which met in October, 1889, in Washington, and they adopted what were known as rules to prevent collisions at sea. These rules, of course, had to be referred to the different maritime countries that were represented, and they were finally approved by all of those countries. Every maritime country was represented in this conference. There was so much delay about this that the rules do not go into effect finally until the 1st day of July next, although they go into effect so far as they relate to all the high seas.

Congress passed an act in 1895 which allowed the Secretary of the Treasury to designate what should be known as the inland waters of the United States. The Secretary has made designations from time to time; and these inland waters include such great bodies as the Chesapeake Bay, Long Island Sound, and other like bodies of water. The rules for the inland waters are now prescribed by the Supervising Inspector of Steam Boilers and the Commissioner of Navigation. Of course these rules were made to fit the old rules of the high seas, and in certain respects they would conflict with the new rules and would result in confusion with the vessels navigating the inland waters. This bill has for its object, in the first place, to gather together all the rules and regulations that have been prescribed by this board, and put them into a statute, where they would be in convenient form; and, in the second place, to make them conform with the rules on the high seas as adopted by this international conference.

The bill does not cover the rivers or the Great Lakes, or interfere in any manner with the navigation of the Great Lakes or the rivers of the West. It simply relates to the inland waters bordering on the high seas. The bill was prepared in the conference of the members of the international conference, the American members of that conference, and also by the Supervising Inspector-General of Steam Vessels and by the Commissioner of Navigation. It was introduced in the Senate, and after being considered by the Committee on Commerce was reported to the Senate without substantial amendment, and passed that body somewhere about the 10th of May. Since the bill passed the Senate, these gentlemen have met and have been considering some of the rules, in view of some objections that were raised to them by persons engaged in navigation.

For instance, people engaged in navigating the Great Lakes were in doubt as to whether the language was sufficiently explicit in respect to the navigation of the Great Lakes. I have an amendment, which has been drafted, which places this beyond all doubt. There are other amendments which I shall offer as the bill progresses, some simply being verbal amendments, but every one of them approved of by the Secretary of the Treasury, by the Supervising Inspector-General of Steam Vessels, by the Commissioner of Navigation, and by the American members of this international conference. So that it seems to me this bill, which refers merely to technical matters, about which no member of the House can be informed, in reference to the rules of navigation, which comes to us recommended in this manner by these gentlemen of experience, with the amendments which they suggest, ought to be adopted by the House; and unless there is some

question to be asked or some gentleman wishes to indulge in debate——

Mr. MINOR. I desire to ask the gentleman a question.

Mr. PAYNE. The gentleman from Wisconsin desires to ask me a question.

Mr. MINOR. My attention has been attracted to section 3, on page 18 of the printed bill. I desire to read the section, and then get some explanation in reference to the application of that particular section:

SEC. 3. That every pilot, engineer, mate, or master of any steam vessel, and every master or mate of any barge or canal boat, who neglects or refuses to observe the provisions of this act, or the regulations established in pursuance of the preceding section, shall be liable to a penalty of $50, and for all damages sustained by any passenger in his person or baggage by such neglect or refusal.

The question, Mr. Speaker, is whether this does not relieve the vessel from damages that she may inflict, and put the responsibility upon a perhaps very irresponsible person, who may be an officer of the vessel. The gentleman is a good lawyer, and I should like to have him put a construction upon that section.

Mr. PAYNE. Mr. Speaker, my attention——

Mr. TERRY. I should like to ask the gentleman from New York a question.

Mr. PAYNE. Will you allow me to answer the question of the gentleman from Wisconsin?

Mr. TERRY. Certainly.

Mr. PAYNE. Mr. Speaker, that section certainly does not relieve anybody from liability; it simply extends it to the mate of the vessel, and does not relieve the owner of the vessel in any way.

Mr. MINOR. All damages sustained by any passenger be upon the master, mate, or engineer who neglects or refuses to comply with this law.

Mr. PAYNE. That does not say that.

Mr. MINOR. That is exactly what it says.

Mr. PAYNE. Now, if the gentleman from Arkansas will propound his question, I will try to answer it.

Mr. TERRY. I would like to ask the gentleman from New York whether we are not here to consider the tariff question alone, and whether we ought to consider anything else, according to the view of gentlemen on his side?

Mr. PAYNE. Mr. Speaker, the House of Representatives have decided to enter upon the consideration of this particular bill, and I suppose they will decide from time to time to take up such other particular legislation as in their good judgment shall seem desirable.

Mr. TERRY. But my question was whether the gentleman thought the House ought to consider these other matters, having been called here for a particular purpose?

Mr. PAYNE. Well, Mr. Speaker, the gentleman from Arkansas expressed his view on that question when he voted on the adoption of this rule, and I expressed mine. I thought we ought to take up this measure, and the majority of the House appeared to think the same way.

Mr. RICHARDSON. Now, Mr. Speaker, I ask the gentleman from New York to yield to me for a few minutes.

Mr. PAYNE. I yield to the gentleman from Tennessee such time as he desires.

Mr. RICHARDSON. Mr. Speaker, I did not hear the reply of the gentleman from New York to what I thought the very appropriate inquiry of the gentleman from Wisconsin, but it seems to me that we are not in a condition with respect to this bill to get a proper answer to that or to other similar inquiries that might be made in relation to the effect of this measure.

Mr. PAYNE. As I have already stated, I have a number of amendments that I want to offer to this bill, and when that particular section is reached, if any member desires to offer an amendment to it, an opportunity to do so will be given him, so far as I am concerned.

Mr. RICHARDSON. But are those committee amendments or are they individual amendments to be proposed by the gentleman from New York himself? Mr. Speaker, this case illustrates the position which some of us on this side have assumed, that the House is not at this time in a proper position to legislate on these general matters. Here is an important bill, covering twenty pages, which affects the life and the property of every man who goes upon the vessels to which the bill applies, or who ships his freight upon them, and yet we are asked to vote upon it without proper information.

It has become the custom on the other side of the House to impute ignorance to members on this side whenever they ask questions which gentlemen on that side can not answer, but I do not intend to imitate that example. I do not impute ignorance to gentlemen on the other side of the House, but I do venture the assertion that not one of them in every five understands clearly the provisions of this bill. Do you understand it, gentlemen?

Mr. Speaker, every member who has had experience here will bear me out when I say that in this great Government of ours, with the numerous and important and sometimes stupendous questions that are presented to this House and to the Senate, it is not possible for any one man to understand all the provisions of all the bills that come before us.

It is not possible for all the members to do so, and it is not possible for any one man. The consequence is that we are compelled to legislate on many questions very largely upon faith. But on what do we ground our faith ordinarily? In the regular course of proceeding here, when any particular measure comes up for consideration, the faith of members generally is grounded upon the fact that a committee composed of twelve or fifteen gentlemen, members of both parties or of all the political parties represented here, have examined the measure and have made a report upon it.

Now, it might seem idle and silly, and we might be accused of wasting time and of filibustering, if we should oppose the passage of this bill, unless we were able to give some fair reason for taking that course, yet the fact is we are called upon to act in this matter upon faith, without having any adequate foundation for the faith we are called upon to exercise.

Upon what are we expected to ground our faith in this case? Not upon the report of a committee composed of twelve or fifteen members of this House who, in the quiet of their committee room, have examined and investigated the question and made a recommendation in the form of a written report, as they are required to do under the rules. We have no such report in this case. We really do not know what we are doing when we legislate as we are doing here.

A moment ago I challenged gentlemen on the other side to say whether they understood all the provisions of this bill. That challenge met with no response. Yet we are going ahead to vote upon this bill. As I have already said, we are often compelled to legislate upon faith, and generally we are willing to do so under the safeguards I have described.

When a measure comes before this body accompanied by the unanimous report or by the majority report of a properly constituted committee, we have some ground upon which to act; we have some justification for saying that, while we may not all individually understand the provisions of the measure, yet we are willing that it shall pass upon the report of the committee. In this case we have no such foundation for our faith.

The gentleman from New York [Mr. PAYNE] tells us that the Senate has passed this bill. Is that a sufficient basis for this House to act upon? Let us reverse the proposition for a moment. This House, after it had been about fifteen days in session, passed a bill——

Mr. CANNON. Mr. Speaker, may I ask the gentleman from Tennessee how much time he intends to occupy?

Mr. RICHARDSON. Only five or ten minutes. I shall get through in time for the other bill which the gentleman wishes to call up. But, Mr. Speaker, before I sit down I must emphasize the fact to which I was about to call attention. After this Congress had been in session about fifteen days, it passed a bill, a measure which had not been made up hurriedly, or without consideration, a bill which had been pondered upon for months, not exactly by a committee of this House, but by members of this body who afterwards became members of the committee.

Those gentlemen had considered that measure for three or four long months, and then it was considered here, and was passed by this House, so that it may be said to have represented the wisdom of the majority of this House. Now, let us see how the rule of the gentleman from New York applies in that case. That bill was sent to the other branch of Congress, and what was the result? Did they accept it and say: "We must pass this bill because the House has passed it?" Not at all.

I do not know, Mr. Speaker, that I am accurate about it; but my understanding is that, instead of accepting that bill because the House had passed it, the Senate changed it in over twelve hundred particulars. The gentleman from New York tells us that because the Senate has passed the bill now under consideration in this form, we ought to pass it; but the rule does not seem to work both ways.

For my own part, I plead ignorance as to this measure. I confess that I have not proper information upon which to vote in favor of this bill. I can not vote for it, because I have not the evidence upon which to base the faith that I would ordinarily give to the report of a committee of this House, composed of members taken from both sides of the Chamber.

So we are left here, Mr. Speaker, to take this bill upon the mere statement of the gentleman from New York without ourselves having had any opportunity to examine it. I have risen to emphasize the fact that we ought not to consider this bill in this manner. We ought not to consider any important bill in this manner. We ought either to do as suggested by the gentleman from Ohio [Mr. GROSVENOR]—and his side of the House applauded the suggestion—we ought to do nothing but pass the tariff bill, or we ought to provide for committees and consider in regular form these measures that are presented to us. The gentleman from Ohio did not undertake to reply to the arguments which we had

attempted to advance; he contented himself with saying, "We are responsible for legislation."

Mr. Speaker, I showed, when I occupied the floor a few moments ago, that we have spent over seventy-seven days of this session of Congress without the committees having been appointed. I showed that this is unparalleled in the history of the Congress of the United States. There has been no reply made to my remarks on that subject. Gentlemen on the other side concede that they are true. Now we are called upon to pass this bill. We were called upon to pass one a few moments ago—a bill embracing items snatched from the deficiency bill now pending in the Senate.

A few days ago we had a similar request made by the gentleman from Illinois in respect to another measure. We are told that the justification for the course we are pursuing consists in the fact that the President called us to pass one single bill—the tariff bill. The gentleman from Ohio said, "The President has told us what to do and we have done it—our part of it, at least; and there is nothing more for us to do." The gentleman from Iowa [Mr. HENDERSON] made substantially the same statement. I desired permission to interrupt him to call his attention to the fact that we had not done what the President of the United States told us to do, but he declined to yield.

I have here, Mr. Speaker, a message from the President of the United States sent to Congress on the 17th day of April—nearly two months ago—a message just as formal, just as solemn, just as serious as the message which he sent to us when he convened us in extra session and suggested or advised the passage of a revenue measure. In this message sent to Congress on the 17th of April, being dated April 14, the President urges this Congress to immediate legislation upon an important proposition.

The gentleman from Ohio and the gentleman from Iowa said, "We have done all the President told us to do." Well, sir; this message—I will not take time to read it—closes with this language:

> It is proper that I should emphasize the need of early action; for if the present session pass without suitable provision being made, the postponement of the matter for nearly a year longer could not but operate greatly to the disadvantage of the United States, etc.

Notwithstanding the measure which, in the President's opinion, is of sufficient importance to justify that language, you pay no attention to the message; but you stand here and tell us and tell the country that you have done all the President advised you to do.

I have here another message from the President of the United States, dated April 26, 1897, in which he urges important legislation with respect to the boundary between this country and a sister Republic, Mexico. He says:

> I urge that provision be made for the immediate disposition properly of this question.

Yet you pay no attention to that; you say you have done all that you were required to do and therefore you decline to appoint the committees. You are inconsistent, however, because you are here asking for the passage of the pending bill. If we can consider and pass this bill, why not consider and pass others of equal, nay, of more, importance? The President has not told you to pass this bill. Why not consider the measures he has asked you to consider? You endeavor to hide yourself behind what you say the "President called us together to do;" yet you do what he did not ask you to do, and leave undone what he has asked to have done.

I will not occupy further time. I wanted to say some other things, but I see that my friend from Illinois [Mr. CANNON] is restless, and properly so, as he wants to get another measure considered. But, Mr. Speaker, there is but one intelligent way for the Congress of the United States to legislate. Notwithstanding the assumption made by gentlemen in debate here—notwithstanding the statements which have been made and applauded—I do not think that there is an intelligent man on either side of this Chamber who believes that Congress can or ought to legislate without having the matters presented first considered by appropriate committees of the House.

Mr. PAYNE. I offer the amendment which I send to the desk.

ORDER OF BUSINESS.

Mr. CANNON. I rise to a question of the highest privilege. It is perfectly evident that the bill of the gentleman from New York will take some time——

Mr. PAYNE. I ask the gentleman to withhold his matter for a little while.

Mr. CANNON. This bill can be completed when we get rid of the conference report which I now desire to present and the consideration of which will occupy but a short time.

Mr. PAYNE. It will take only a few minutes to dispose of my amendment.

Mr. CANNON. I must insist on making this conference report.

Mr. PAYNE. I do not see how the gentleman can get his conference report in now in my time.

Mr. CANNON. I am not occupying the gentleman's time. I have risen to a question of the highest privilege—the presentation of a conference report.

Mr. PAYNE. We have already before us a question of the highest privilege. We are operating under a special rule of the House providing for the immediate consideration of this bill. There is no exception in the special rule in favor of conference reports.

Mr. CANNON. Well, I will submit the matter to the decision of the Chair.

The SPEAKER pro tempore (Mr. GROSVENOR). The Chair has an opinion upon this question, but hesitates to rule upon it, preferring to wait until the Speaker is present.

The SPEAKER resumed the chair.

Mr. CANNON. I rise to a question of the highest privilege—to present a conference report.

Mr. PAYNE. I make the point that the House already has before it a privileged matter; it is operating under a rule for the consideration of the present bill; and no exception was made in that rule even in favor of a conference report.

Mr. CANNON. I submit, in reply to the gentleman from New York, that under the rule adopted this bill is in precisely the same position as it would be if it were taken up under the general rules of the House and were being considered. I waited until the amendable stage of this bill had been reached, and then, from conversation with gentlemen about me, I became thoroughly satisfied that the day is to be consumed in the consideration of the bill. Therefore, as I want to dispose of this conference report, I did not feel justified in waiting longer.

Mr. PAYNE. I disagree with the gentleman from Illinois. If he had held his matter back for a few minutes, the bill would have been passed.

Mr. CANNON. It will take but a few minutes to dispose of the conference report.

Mr. PAYNE. It will not take long to dispose of this bill.

Mr. CANNON. Very well, let the Chair rule.

The SPEAKER. What does the gentleman from Illinois say to the clause in the special rule, "until the same is disposed of?"

Mr. CANNON. Let the special rule be read.

The SPEAKER. The Clerk will read the rule under which the House is now acting.

The Clerk read as follows:

> *Resolved*, That upon the adoption of this resolution the House proceed to consider Senate bill 1886, "A bill to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States," until the same is disposed of.

Mr. CANNON. The effect of that special order was simply to make it in order to take up this bill. And at the time of the adoption of that order, or immediately after its adoption, it was perfectly competent for anyone having charge of a conference report to present that as a question of higher privilege. This is a question of the highest privilege, and if it could have interrupted the consideration of the pending matter before, it certainly can interrupt it now. The special order must be considered in connection with the general rules of the House. I hold in my hand the Manual, and call the attention of the Chair to the following language on page 357:

> Under the practice reports of conference committees may be received at any time (except when the rules are suspended), even during the pendency of a motion to adjourn, and may interrupt a member who is on the floor speaking.

It is also the settled practice that a roll call may be interrupted for the purpose of making a conference report.

The SPEAKER. The Chair thinks that a conference report has given to it a very high position of privilege, not merely by the rules of the House, but upon the principles of parliamentary law. Bills upon which the two Houses, through conference committees, have reached an agreement, are, of course, much further advanced than any bill which is simply being considered by either House. In the opinion of the Chair, the rule of the House but registers the general principle of parliamentary law upon this subject; and while very high privilege is accorded to a report of the Committee on Rules, and to what may take place under a rule reported by that committee and adopted by the House, yet such a rule must be construed with reference to the standing rules of the House and the general principles of parliamentary law, unless the express language of the special rule requires another construction.

It has been held in the House that when, upon a report of the Committee on Rules, a bill is being considered by the House, it does not give way to even a question of privilege; but it has always seemed to the Chair that that was not a wise view; that, on the contrary, there might arise questions of privilege, properly so called, concerning the condition of the House and its capacity for action, which would be superior to the consideration even of a question ordered to be considered by the House itself. Notwithstanding the strong language used in the present order, the Chair thinks it must be construed with reference to the general system of doing business between two legislative bodies. Hence, in the opinion of the Chair, a conference report being now presented, it is his duty to receive it.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. CANNON. I call for the reading of the report.

Mr. PAYNE. I wish the gentleman would withhold the report a little while, for this reason——

Mr. CANNON. It will take but a little while to dispose of it.

Mr. PAYNE. It is not necessary to pass the gentleman's bill before the 1st of July. The present bill has been waiting here for some time, and there are a great many interests in jeopardy because of its nonpassage. I wish the gentleman would give way.

Mr. CANNON. I can not give way.

Mr. PAYNE. The gentleman can call up his report at any time.

Mr. CANNON. There are important items in this bill which it is absolutely necessary should be passed promptly—among others, the provision for jurors in the United States courts.

The SPEAKER. The Clerk will read the report.

The Clerk proceeded to read the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 16) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 7, 21, 22, 25, 26, and 27.

That the House recede from its disagreement to the amendments of the Senate numbered 4, 5, 8, 9, 19, 35, 36, and 37, and agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following:

"For the survey of the public lands that have been or may hereafter be designated as forest reserves by Executive proclamation, under section 24 of the act of Congress approved March 3, 1891, entitled 'An act to repeal timber-culture laws, and for other purposes,' and including public lands adjacent thereto, which may be designated for survey by the Secretary of the Interior, $150,000, to be immediately available: *Provided*, That to remove any doubt which may exist pertaining to the authority of the President thereunto, the President of the United States is hereby authorized and empowered to revoke, modify, or suspend any and all such Executive orders and proclamations, or any part thereof, from time to time as he shall deem best for the public interests: *Provided*, That the Executive orders and proclamations dated February 22, 1897, setting apart and reserving certain lands in the States of Wyoming, Utah, Montana, Washington, Idaho, and South Dakota as forest reservations, be, and they are hereby, suspended, and the lands embraced therein restored to the public domain the same as though said orders and proclamations had not been issued: *Provided further*, That lands embraced in such reservations not otherwise disposed of before March 1, 1898, shall again become subject to the operations of said orders and proclamations as now existing or hereafter modified by the President.

The surveys herein provided for shall be made, under the supervision of the Director of the Geological Survey, by such person or persons as may be employed by or under him for that purpose, and shall be executed under instructions issued by the Secretary of the Interior; and if subdivision surveys shall be found to be necessary, they shall be executed under the rectangular system, as now provided by law. The plats and field notes prepared shall be approved and certified to by the Director of the Geological Survey, and two copies of the field notes shall be returned, one for the files in the United States surveyor-general's office of the State in which the reserve is situated, the other in the General Land Office; and twenty photolithographic copies of the plats shall be returned, one copy for the files in the United States surveyor-general's office of the State in which the reserve is situated; the original plat and the other copies shall be filed in the General Land Office, and shall have the facsimile signature of the Director of the Survey attached.

Such surveys, field notes, and plats thus returned shall have the same legal force and effect as heretofore given the surveys, field notes, and plats returned through the surveyors-general; and such surveys, which include subdivision surveys under the rectangular system, shall be approved by the Commissioner of the General Land Office as in other cases, and properly certified copies thereof shall be filed in the respective land offices of the districts in which such lands are situated, as in other cases. All laws inconsistent with the provisions hereof are hereby declared inoperative as respects such survey: *Provided, however*, That a copy of every topographic map and other maps showing the distribution of the forests, together with such field notes as may be taken relating thereto, shall be certified thereto by the Director of the Survey and filed in the General Land Office.

All public lands heretofore designated and reserved by the President of the United States under the provisions of the act approved March 3, 1891, the orders for which shall be and remain in full force and effect, unsuspended and unrevoked, and all public lands that may hereafter be set aside and reserved as public forest reserves under said act, shall be as far as practicable controlled and administered in accordance with the following provisions:

No public forest reservation shall be established, except to improve and protect the forest within the reservation, or for the purpose of securing favorable conditions of water flows, and to furnish a continuous supply of timber for the use and necessities of citizens of the United States; but it is not the purpose or intent of these provisions or of the act providing for such reservations to authorize the inclusion therein of lands more valuable for the mineral therein or for agricultural purposes than for forest purposes.

The Secretary of the Interior shall make provisions for the protection against destruction by fire and depredations upon the public forests and forest reservations which may have been set aside or which may be hereafter set aside under the said act of March 3, 1891, and which may be continued; and he may make such rules and regulations and establish such service as will insure the objects of such reservations, namely, to regulate their occupancy and use and to preserve the forests thereon from destruction; and any violation of the provisions of this act or such rules and regulations shall be punished as is provided for in the act of June 4, 1888, amending section 5388 of the Revised Statutes of the United States.

For the purpose of preserving the living and growing timber and promoting the younger growth on forest reservations, the Secretary of the Interior, under such rules and regulations as he shall prescribe, may cause to be designated and appraised so much of the dead, matured, or large growth of trees found upon such forest reservations as may be compatible with the utilization of the forests thereon, and may sell the same for not less than the appraised value in such quantities to each purchaser as he shall prescribe, to be used in the State or Territory in which such timber reservation may be situated, respectively, but not for export therefrom. Before such sale shall take place, notice thereof shall be given by the Commissioner of the General Land Office for not less than sixty days, by publication in a newspaper of general circulation, published in the county in which the timber is situated, if any is therein published, and if not, then in a newspaper of general circulation published nearest to the reservation, and also in a newspaper of general circulation published at the capital of the State or Territory where such reservation exists; payments for such timber to be made to the receiver of the local land office of the district wherein said timber may be sold, under such rules and regulations as the Secretary of the Interior may prescribe; and the moneys arising therefrom shall be accounted for by the receiver of such land office to the Commissioner of the General Land Office in a separate account, and shall be covered into the Treasury. Such timber, before being sold, shall be marked and designated, and shall be cut and removed under the supervision of some person appointed for that purpose by the Secretary of the Interior, not interested in the purchase or removal of such timber nor in the employment of the purchaser thereof. Such supervisor shall make report in writing to the Commissioner of the General Land Office and to the receiver in the land office in which such reservation shall be located of his doings in the premises.

The Secretary of the Interior may permit, under regulations to be prescribed by him, the use of timber and stone found upon such reservations, free of charge, by bona fide settlers, miners, residents, and prospectors for minerals, for firewood, fencing, buildings, mining, prospecting, and other domestic purposes, as may be needed by such persons for such purposes, such timber to be used within the State or Territory, respectively, where such reservations may be located.

Nothing herein shall be construed as prohibiting the egress or ingress of actual settlers residing within the boundaries of such reservations, or from crossing the same to and from their property or homes; and such wagon roads and other improvements may be constructed thereon as may be necessary to reach their homes and to utilize their property under such rules and regulations as may be prescribed by the Secretary of the Interior. Nor shall anything herein prohibit any person from entering upon such forest reservations for all proper and lawful purposes, including that of prospecting, locating, and developing the mineral resources thereof: *Provided*, That such persons comply with the rules and regulations covering such forest reservations.

That in cases in which a tract covered by an unperfected bona fide claim or by a patent is included within the limits of a public forest reservation the settler or owner thereof may, if he desires to do so, relinquish the tract to the Government, and may select in lieu thereof a tract of vacant land open to settlement not exceeding in area the tract covered by his claim or patent; and no charge shall be made in such cases for making the entry of record or issuing the patent to cover the tract selected: *Provided further*, That in cases of unperfected claims the requirements of the laws respecting settlement, residence, improvements, etc., are complied with on the new claims, credit being allowed for the time spent on the relinquished claims.

The settlers residing within the exterior boundaries of such forest reservations, or in the vicinity thereof, may maintain schools and churches within such reservation, and for that purpose may occupy any part of the said forest reservation, not exceeding 2 acres for each schoolhouse and 1 acre for a church.

The jurisdiction, both civil and criminal, over persons within such reservations shall not be affected or changed by reason of the existence of such reservations, except so far as the punishment of offenses against the United States therein is concerned, the intent and meaning of this provision being that the State wherein any such reservation is situated shall not, by reason of the establishment thereof, lose its jurisdiction, nor the inhabitants thereof their rights and privileges as citizens, or be absolved from their duties as citizens of the State.

All waters on such reservations may be used for domestic, mining, milling, or irrigation purposes, under the laws of the State wherein such forest reservations are situated, or under the laws of the United States and the rules and regulations established thereunder.

"Upon the recommendation of the Secretary of the Interior, with the approval of the President, after sixty days' notice thereof, published in two papers of general circulation in the State or Territory wherein any forest reservation is situated, and near the said reservation, any public lands embraced within the limits of any forest reservation which, after due examination by personal inspection of a competent person appointed for that purpose by the Secretary of the Interior, shall be found better adapted for mining or for agricultural purposes than for forest usage may be restored to the public domain. And any mineral lands in any forest reservation which have been or which may be shown to be such, and subject to entry under the existing mining laws of the United States and the rules and regulations applying thereto, shall continue to be subject to such location and entry, notwithstanding any provisions herein contained."

And the Senate agree to the same.

Amendment numbered 24: That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows: In lieu of the matter inserted by said House amendment insert the following: "$2,933,333; which sum, in the discretion of the Secretary of War, may be immediately available for expenditure under contract or otherwise. And of the sum hereby appropriated $000,000 shall be deducted from the sum of $2,533,333 authorized to be appropriated and expended for the fiscal year ending June 30, 1899, by the 'Act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes,' which became a law on June 3, 1896;" and the House agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "Improvement of Pearl Harbor: For expense of necessary survey of entrance to and of Pearl Harbor, Hawaiian Islands, and to enable the Secretary of the Navy to ascertain and report to Congress the amount of land necessary to be acquired in said harbor and the probable cost thereof for a coaling and repair station, $10,000."

And the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$25,000;" and the Senate agree to the same.

The committee of conference recommend to their respective Houses that Senate amendment numbered 10 be transferred from line 6, page 54 of the bill, and inserted after the word "available," at the end of Senate amendment numbered 12.

W. B. ALLISON,
A. P. GORMAN,
Managers on the part of the Senate.

J. G. CANNON,
WM. A. STONE,
JOSEPH D. SAYERS,
Managers on the part of the House.

Mr. CANNON (before the reading was concluded). Mr. Speaker, I ask unanimous consent to dispense with the further reading of this report. The residue can be printed in the RECORD.

Mr. RICHARDSON. Is there a statement of the House conferees?

Mr. CANNON. There is.

The SPEAKER. If there be no objection, the statement of the House conferees will be read in lieu of the conference report.

Mr. SAYERS. It is understood that the remainder of the report will appear in the RECORD?

The SPEAKER. The remainder of the report will be printed in the RECORD, if there be no objection, and the statement of the House conferees will be read in lieu of the report.

There was no objection.

The following statement was read:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 16) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, submit the following written statement in explanation of the effect of the action agreed upon and recommended by the conference committee on each of the amendments, namely:

On amendments numbered 4 and 5: Appropriates $5,000, as proposed by the Senate, instead of $4,000, as proposed by the House, for the purchase of ten cophones, at $500 each, for the use of the Revenue-Cutter Service.

On amendments numbered 7 and 8: Appropriates $200,000, as proposed by the House, instead of $275,000, as proposed by the Senate, for the Omaha Exposition, and makes the same immediately avnilable.

On amendment numbered 9: Authorizes the employment of an assayer, at $2,000, and a clerk, at $1,200, in the assay office at Deadwood, S. Dak., as proposed by the Senate.

On amendment numbered 16: In lieu of the legislation proposed by the Senate relative to the forest reserves, inserts the provision which is set out at length in the accompanying conference report.

On amendment numbered 19: Inserts the appropriation of $5,000, proposed by the Senate, to continue inquiry into the production of domestic sugar.

On amendment numbered 21: Strikes out the provision proposed by the Senate authorizing the use of the appropriation for the harbor of refuge at Point Judith, R. I., for the preparation of plans and estimates therefor.

On amendment numbered 22: Strikes out the provision proposed by the Senate requiring the Secretary of War to appoint a superintendent of the commerce and traffic through the locks upon the dams of the United States upon the Monongahela River.

On amendments numbered 24, 25, and 26: Appropriates $2,933,333, instead of $2,333,333 proposed by the Senate, and $2,833,333 proposed by the House, for improving the Lower Mississippi River; makes said sum immediately available for expenditure under contract or otherwise; requires that $900,000 thereof shall be deducted from the amount authorized to be expended during the fiscal year 1899, and strikes out the provision proposed by the Senate authorizing the Secretary of War to contract for the expenditure in advance of appropriations by Congress of the remainder of the sum authorized by the last river and harbor act for work on the Lower Mississippi River.

On amendment numbered 27: Strikes out the authority proposed by the Senate to use $10,000 of the appropriation for dredging Salmon Bay, in Washington, in making a cadastral survey and location, and for plans and specifications of said improvement from the head of Salmon Bay to the termination in Smiths Cove.

On amendment numbered 28: In lieu of the appropriation of $50,000 proposed by the Senate for the improvement of the entrance to Pearl Harbor, appropriates $10,000 for expense of necessary survey of entrance to and of Pearl Harbor, and to enable the Secretary of the Navy to ascertain and report to Congress the amount of land necessary to be acquired in said harbor, and the probable cost thereof, for a coaling and repair station.

On amendment numbered 29: Appropriates $25,000, instead of $40,000, as proposed by the Senate, for maintaining and keeping open the channel in Mobile Bay.

On amendments numbered 35, 36, and 37: Provides for the appointment of the Nicaragua Canal Commission, as proposed by the Senate, namely, that the Commission shall consist of one engineer from the Corps of Engineers of the United States Army, one officer of the Navy, who may be taken from the active or from the retired list, and one engineer from civil life; the appointments to be made by and with the advice and consent of the Senate.

The bill as finally agreed upon appropriates $53,622,651.58.

J. G. CANNON,
WM. A. STONE,
JOSEPH D. SAYERS,
Managers on the part of the House.

Mr. CANNON. Mr. Speaker, one word, and then I will move the adoption of the report, unless the gentleman from Texas [Mr. SAYERS] desires to be heard.

I think the House understands, without further explanation, what this report recommends touching the forestry matter. The provision on this subject was submitted to the gentleman from Arkansas [Mr. MCRAE] and the gentleman from Iowa [Mr. LACEY], and was satisfactory to them. It is substantially what the House indicated as its view of this question in the two days' discussion upon the matter. The Senate on this question yielded its view.

Does the gentleman from Texas [Mr. SAYERS] desire to occupy some time?

Mr. SAYERS. Only a couple of minutes.

Mr. CANNON. I yield to the gentleman.

Mr. SAYERS. Mr. Speaker, I have agreed to the report as read at the Clerk's desk, but with the understanding that I should make a statement to the House in reference to two items. I do not concur with the committee as to the item making appropriation for the survey of Pearl Harbor. It is unnecessary for me at this time to again state the reasons why I disagree to that item. I do not believe that the appropriation ought to be made.

There is another item in the bill which provides that the survey of the forest reservations shall be made under the supervision of the Director of the Geological Survey. My judgment is that it is unwise to devolve this duty upon that service. Those of us who were here in the Fifty-second Congress will remember—I believe it was in the Fifty-second Congress—that the annual appropriation for the support of that Survey was very largely reduced, the policy of Congress at the time being to strictly confine its operations to geological purposes.

Within the last two years, however, that rule has been relaxed, and we are adopting the very same policy that existed for several years prior to the Fifty-second Congress, and which was abandoned in that Congress. My opinion is that the operations of the Geological Survey ought to be confined strictly to the performance of those duties with which it was originally charged, and that its sphere ought not to be enlarged in the direction indicated in the report. The Geological Survey is now engaged in surveying and mapping the Indian Territory.

Under the provisions of the clause in the bill under consideration it will be required to survey these immense forest reservations, and very soon I fear that the work of the Geological Survey, instead of being confined to the functions for which it was originally constituted, will continue to be further enlarged until it shall have entirely absorbed the jurisdiction and functions of the General Land Office in the matter of surveying the public lands; so that, instead of the Geological Survey becoming more efficient in the performance of the duties originally assigned to it, it will engage in other matters, losing sight of the very important purpose for which it was originally organized. The Fifty-second Congress cut short its appropriations by about $150,000 and undertook to restrain the Survey within the sphere of its legitimate functions. This, in my judgment, was a wise policy and ought not to be departed from.

Mr. TERRY. I should like to ask the gentleman from Texas [Mr. SAYERS] a question.

Mr. SAYERS. Yes.

Mr. TERRY. The gentleman states, as I understand, that he objects to that appropriation in regard to Pearl Harbor.

Mr. SAYERS. Yes.

Mr. TERRY. I will ask the gentleman if it is not a fact that there is no way of having a separate vote on this thing, but that we have got to vote the report up or down as a whole?

Mr. SAYERS. There is no way that I know of—none at all.

Mr. TERRY. Then we shall either have to vote for Pearl Harbor or reject the conference report.

Mr. SAYERS. Certainly. I have thought it proper, Mr. Chairman, as usual, when members sign a conference report and do not approve of some of the items involved, to make this statement.

With the exception of these two items in the bill, I see no reason why the House should not approve of what has been done by the conference committee.

Mr. CANNON. Mr. Speaker, I yield ten minutes to the gentleman from California [Mr. LOUD].

Mr. LOUD. Mr. Speaker, I think that will be sufficient. I shall not take up any more time than is absolutely necessary.

The SPEAKER. The gentleman from California.

Mr. LOUD. Mr. Speaker, I was not present during the consideration of this matter in the House. I admit that it is nobody's fault but my own.

I desire to call the attention of this House, however, even at this late hour, to this matter of forest reservations. The chairman of the Committee on Appropriations in the last House well knows the position taken by myself in the last Congress in relation to these forest reservations, when it was sought to invade the forest reservations in my own State.

In the closing hours of the last Congress I did not feel disposed to cause serious disturbance here when a matter was under consideration relating to forest reservations in the States of Idaho, the Dakotas, and some other Northwestern States; but when you have invaded the State of California in the manner in which it is invaded in this bill I feel that one of the most serious matters concerning my State is before it now that can possibly come before this Congress, and I feel called upon, in the interests of my State, and I believe in the interests of the whole country, to resist with all the power I have the adoption of this conference report.

In the first place, let me call the attention of this House to the danger of legislation on an appropriation bill which has no place therein. The late President set aside a large amount of land for forest reserves in various States of this country. If that is against the wish and will of this House, then let this House legislate upon that question alone. But in endeavoring to legislate on that question they have sought to amend the act of 1890, and have ingrafted in this report measures which will destroy the forest reserves which have been set aside in my own State, and destroy the fairest portion of the State.

The Senate, with all due respect to that body, must, in accordance with a long-established principle, recede upon this item, because it is legislation, and the House should here to-day defeat this conference report; send your conferees back and demand of the Senate that the rights of the House be maintained, and that if

they desire legislation on matters of this importance, they shall introduce measures and have them considered in the usual manner. Oh, I know it has been said many times, in the closing hours of the session, that you must accept propositions of legislation from the Senate or this or that bill must fail.

If this bill must fail, Mr. Speaker, then let the responsibility lie where it properly belongs. So far as I am concerned, and the people of my State, I believe the sober judgment of the people of this country would prefer that no sundry civil bill should ever become a law than that such iniquitous provisions should be contained in it as are contained in this.

Mr. CANNON. May I ask my friend a question?

Mr. LOUD. In a moment I will yield.

Let me say that our friends in the Dakotas and in Idaho who want this late order of President Cleveland set aside are not satisfied with this bill. Neither are the men who are in favor of retaining the forest reserves. There are not twenty men on the floor of this House who favor the provision contained herein.

Then why should we bow and surrender our sovereign right and power?

Now, if the gentleman desires to ask me a question.

Mr. CANNON. If I understand the gentleman, he objects to the provision touching the forest reservation in this bill, because it gives the President power to annul or modify the reservations having once been made.

Mr. LOUD. The gentleman is mistaken about that. The gentleman does not seem to comprehend my statement. I evidently have not made myself clear.

Mr. CANNON. Well, now, does the gentleman object to that provision which suspends the order of February——

Mr. LOUD. No; I do not care anything about that.

Mr. CANNON (continuing). Until the 1st of March next?

Mr. LOUD. I do not care about that. It does not touch my State.

Mr. CANNON. What does the gentleman object to?

Mr. LOUD. I will call the attention of the House to the very provision, and I know of no way of getting this provision out of this measure except to defeat the conference report. I said in this House that I would not, and I believed it was in the power or almost in the power of anybody to defeat the sundry civil bill, but I would not avail myself of that power then, because I was assured that the bill would not be passed in such a shape as to affect the interests of my State; but now the measure is in such shape that it does seriously affect my State.

Mr. CANNON. If I made the gentleman any promise in the last session of Congress, I kept it.

Mr. LOUD. Yes, sir; there is no doubt about that.

Mr. RICHARDSON. I understand the gentleman to say that the gentleman from Illinois promised the bill would not become a law——

Mr. LOUD. Oh, no.

Mr. RICHARDSON. I may have misunderstood him.

Mr. LOUD. The gentleman misunderstood him. I say I was assured that the bill would not become law if it affected my own State, and it did not affect my State. If the House will listen to me one moment, I will call attention to the particular part of this measure I object to.

Let me say again, there are not twenty men in this House who favor this proposition as put in here. It is simply a compromise measure. And if we need legislation in this direction, let it be put in a bill by itself. I again call the attention of the House to the danger of legislating on an appropriation bill. I can say to our friends from the Dakotas and Idaho that if these forest reservations continue for a year more, no great harm can be done. If this matter is not legislated upon for one, two, or three years, the land will still remain there; and if you have power or right you will ultimately attain it. But, not content with setting aside the President's order, you have invaded an act passed by Congress seven years ago, and have sought to amend an act setting aside forest reservations.

Now, here is the particular provision to which I desire to call attention:

For the purpose of preserving the living and growing timber.

What a title to this iniquitous measure, Mr. Speaker!

"For the purpose of preserving the living and growing timber," when you propose by this act to invade and destroy; and that is the title that should be given.

For the purpose of preserving the living and growing timber and promoting the younger growth of forest reservations, the Secretary of the Interior, under such rules and regulations as he shall prescribe, may cause to be designated and appraised so much of the dead, matured, or large growth of trees found upon such forest reservations as may be compatible, etc.

Why, the very minute that you open a forest reservation on the Sierra Nevada Mountains, in my State, which were set aside, Mr. Speaker and gentlemen of this House, to retain the snows upon those mountains, you have destroyed the very object in setting aside that reservation.

Mr. SAYERS. Will the gentleman allow me a question?

Mr. LOUD. Yes, sir.

Mr. SAYERS. I ask for information, because I am not familiar with the land laws of the United States. Can not the Secretary of the Interior, under the present laws, permit parties to go upon these reservations or upon the public lands of the United States and take this character of timber about which the gentleman speaks? Has he not done so?

Mr. LOUD. I understand not. If they have that power, I can not understand why they should endeavor to put it in here.

Mr. SAYERS. I am not able from any knowledge I have to controvert the statement of the gentleman, but I have the impression, derived from information given me by gentlemen of the House, that the Secretary of the Interior has that power. I may be mistaken, however, and have interrupted the gentleman only for the purpose of being accurately informed.

Mr. LOUD. I have not read every line of the law on this subject, but let me say to the gentleman that repeated effort has been made in this House to pass the very measure that is contained in this bill.

Mr. KING. Does not the gentleman think it is a wise provision to permit the withdrawal from these forestry reservations of decaying and dead timber, which encumbers the growth of the smaller timber which under better conditions would have an opportunity to mature?

Mr. LOUD. The trouble is, Mr. Speaker, that some gentlemen misunderstand the object of setting aside a forest reserve. There is a class of technical gentlemen in this country who favor timber culture, and they confound timber culture with forest reservation. What the object of the forest reservations in the gentleman's own State may be I do not know or care. Let such legislation be passed for his State as he thinks proper to advocate. I do, however, know what the reserves were set aside for in the State of California and what their object is.

[Here the hammer fell.]

Mr. LOUD. I ask for a little more time. My time has been occupied somewhat by interruptions, and this is a matter of very great importance to my State.

Mr. CANNON. I am anxious to get a vote, but I will yield the gentleman five minutes more, if that is sufficient.

Mr. LOUD. If I am not interrupted, I can get through in five minutes. If I am interrupted, I shall have to ask for more time.

The SPEAKER. The gentleman from California is recognized for five minutes.

Mr. LOUD. In answer to the inquiry of the gentleman from Utah, I want to say further that the only object of the forest reserves in the State of California is to retain the snows upon the mountains, so that the snows and rains of the spring shall not bring down all at once the full flood upon our valleys, where irrigation is carried on to a great extent and where it is a necessity, as it is for the production of the crops of the great San Joaquin Valley.

That is the main object of the forest reserves in the State of California, and not to encourage the growth of straight trees and clean forests; and the more fully you keep the forest in its natural condition, with a large amount of undergrowth and decayed timber, the more effectually do you attain the object of keeping the snows upon the mountains. I know that to gentlemen who confound timber culture with forest reservation the provision in this bill appears perfectly harmless; but I believe, and it is the general consensus of men who have investigated this question, that the moment you open the forest reservations to the cutting of timber you begin to destroy the forest reservations themselves.

In the State of California a territory more than 400 miles in length and varying from 30 to 60 miles in width is wholly dependent for its successful cultivation upon the retention of the snows on the Sierra Nevada Mountains.

If you pass this bill, you will substantially destroy the productiveness of more than one-half of my State. Now, why should any person in the world seek to amend the laws which were passed many years ago merely for the purpose of suspending an order of the President made during the late winter? Mr. Speaker, there are many other provisions in this bill that should not be passed.

Mr. LEWIS of Washington. May I ask the gentleman a question?

Mr. LOUD. In a moment. There is a provision permitting the cutting of timber for mining purposes, which, if carried into effect, will destroy, as I have said, the forest reservations on the western side of the Sierra Nevada Mountains, as it has destroyed and denuded the forests on the eastern side.

Mr. LEWIS of Washington. Do I understand that the gentleman from California is in favor of the order made by the late President of the United States, and against the proposed modification of it?

Mr. LOUD. I do not know anything about that, neither do I care. You are not satisfied with this bill. You come from a country where there is more timber than you know what to do

with. What I do object to is that, under the guise of setting aside an order of the late President of the United States, you should invade the State of California and destroy the forest reserves in that State. I regret it very much, but I shall be compelled to ask the House to reject the conference report and to use every means in my power to defeat it.

Mr. CANNON. Mr. Speaker, in reply to the gentleman from California, I want to say that the provisions in this conference report are in substance the provisions which were matured and approved by this House after almost two days' consideration, under the lead of the gentleman from Iowa [Mr. LACEY] and the gentleman from Arkansas [Mr. MCRAE], both of them formerly members of the Committee on Public Lands, and, so far as I am competent to judge, perhaps better informed touching the public lands of the United States than any other two Representatives in the House. I say frankly now, as I said then, that I do not claim to be well informed upon that subject.

I made my protest then, as I had made it on other occasions, against legislation upon appropriation bills. But let us see what the condition here is. Under law, 20,000,000 acres of land were put in a forest reservation last February, and they are now in reservation. The better opinion is that the President of the United States has no power to take any one acre out of that reservation. It is alleged by the people in Dakota, in Washington, in Montana, and elsewhere throughout that portion of the country that the President's order works great hardship.

Now, what does this proposition in the conference report do? It enables the President of the United States at any time to revoke, in whole or in part, the order making this reservation. It makes that much change in existing law. What else does it do? It takes absolutely every acre of these 20,000,000 acres out of reservation, and keeps them out until the 1st day of next March. That is all.

Mr. KING. Was it not possible to have secured in conference a provision by which these 20,000,000 acres should still be withdrawn from the operation of that order until a survey could be made?

Mr. CANNON. It was not possible with the conferees that the House sent, because the House conferees refused to go beyond what they regarded as practically the instruction of the House, given after two days' consideration of the subject here.

After we had agreed upon these provisions, the conferees on the part of the House, in excessive caution, consulted the gentleman from Arkansas and the gentleman from Iowa for the purpose of ascertaining whether the committee had framed the provision substantially as they understood the indication of the sense of the House on this subject.

Now, this provision takes every acre out of reservation that is now in reservation under the Presidential order, and keeps it out until the 1st day of next March, as though that order had never been issued. What next? It appropriates $150,000 for a survey, topographical and otherwise, to be made under the direction of the Interior Department by the Geological Bureau, which is already organized for service of this kind. After examination and survey, when the 1st day of next March comes, this provision enables the President to take all or any portion of this land out of reservation that ought to be taken out.

Mr. LOUD. But subject to these new amendments to the old forest-reservation law.

Mr. CANNON. I will speak of that matter in a moment. One thing at a time.

In other words, this provision gives the money for the purpose of making the examination and survey. It gives the President power to annul after the 1st of March next the whole of this reservation, or to change it in any shape or form, upon information which may then have been obtained. In the meantime every acre is taken out of reservation. Now, suppose this conference report should be voted down—not adopted. Then every acre of those 20,000,000 acres is kept in reservation absolutely. So much for that.

There were gentlemen in another body who claimed that this land should be taken out of reservation for all time. The conferees on the part of the House, considering the merits of the question, did not believe that this ought to be done. It will be seen that the conference agreement conforms almost literally to what the House indicated as its view after two days' debate.

Now, a word in reply to the gentleman from California. He objects, I understand, to this provision:

> For the purpose of preserving the living and growing timber and promoting the younger growth on forest reservations, the Secretary of the Interior, under such rules and regulations as he shall prescribe, may cause to be designated and appraised so much of the dead, matured, or large growth of trees found upon such forest reservations as may be compatible with the utilization of the forests thereon, and may sell the same for not less than the appraised value in such quantities to each purchaser as he shall prescribe, to be used in the State or Territory in which such timber reservation may be situated, respectively, but not for export therefrom,
>
> It is further provided how the timber shall be sold, how it shall be marked, etc.

Mr. LOUD. Will the gentleman allow me one suggestion? My great objection was to putting upon an appropriation bill amendatory legislation setting aside forest reservations that had been made seven years ago.

Mr. CANNON. The provision here is that "the Secretary of the Interior, under such rules and regulations as he shall prescribe, may"—not shall—sell this timber; that is, the dead timber. Provision is made how it shall be marked, how advertised, how policed while being taken off, etc. I do not know whether these provisions are wise or not, but I apprehend they are, if honestly administered; and if not honestly administered, of course there is a remedy. It is sufficient for me that upon that branch of this proposed legislation we have the approving opinion of the gentleman from Iowa and the gentleman from Arkansas, and also the indication of the sentiment of this House after two days' debate. Under such circumstances, I believe I am justified in regarding this as apt and proper legislation.

Mr. LOUD. My friend from Illinois refers to the gentleman from Iowa and the gentleman from Arkansas, I suppose, as practical experts on forest reservations, because there are so many reservations in their States!

Mr. CANNON. Oh, well, I refer to the practical action of this House, to its two days' consideration of this question, and the indications of sentiment which it gave, and which have been written in this report, and which, if the report be adopted, will be written in the law.

Mr. HARTMAN. What will be the effect if the Geological Survey fails to make the necessary examination between now and the 1st day of March, so as to furnish sufficient information to determine whether these lands ought to remain in reservation or not?

Mr. CANNON. On the 1st day of next March every acre of these 20,000,000 acres will go back into reservation, except so far as the President may determine to keep any portion out of reservation.

Mr. HARTMAN. Then, if the Geological Survey should not find time to make the examination of those 20,000,000 acres in the short time which will elapse between now and the 1st day of March, those reservations will remain as carved out by President Cleveland, unless the present President should issue some order to the contrary.

Mr. CANNON. Unless the President determines to the contrary; and this act gives the President that exact power.

Mr. HARTMAN. But the President will not make any suspension until there is an examination and survey, will he?

Mr. CANNON. I do not know.

Mr. HARTMAN. If he should, will he make such suspension upon knowledge, or upon guesswork?

Mr. CANNON. I will ask the gentleman this question: If this or some other legislation should not be enacted, will not every acre remain in reservation?

Mr. HARTMAN. That is perfectly true.

Mr. CANNON. And will it not remain in reservation from now until the 1st of March?

Mr. HARTMAN. That is perfectly true. But let me ask the gentleman whether it would not be satisfactory to him and the other conferees to permit this report to be defeated and to accept in lieu of the provision in the report a declaration that no legislation of any kind shall be placed upon the bill with reference to these forest reservations, except a provision for the vacation of the order establishing them? Then let us take up the subject in regular order before a proper committee.

Mr. CANNON. The gentleman asks whether it would not meet my approval to repeal in toto the order of President Cleveland and adopt no other legislation—in other words, whether it is not better to have legislation to suit the gentleman's peculiar notions, and at the same time set aside the views of 359 members of the House.

Mr. HARTMAN. Oh, no; not at all.

Mr. CANNON. This whole matter was discussed in this House. I beg to call attention again to the fact that we had two days for the consideration of this question, and this conference report embodies the consensus of opinion as manifested by the members of the House at that time.

Mr. LOUD. What was the vote in the House on that question? Does the gentleman remember?

Mr. CANNON. I do not recollect.

Mr. HARTMAN. My object in the suggestion was to meet the views of gentlemen who are opposed to placing legislation relating to this subject upon an appropriation bill.

Mr. CANNON. But the gentleman proposes to place the broadest possible legislation on the bill.

Mr. HARTMAN. Oh, no.

Mr. CANNON. That is to say, he proposes to repeal the order of President Cleveland putting 20,000,000 acres in reservation and to stop there and call that "no legislation."

Mr. HARTMAN. Because we all agree that that order ought never to have been issued.

Mr. CANNON. Oh, no; there are a great many people who believe that it was right to issue it and that it ought not to be touched.

Practically there can be, in my judgment, no possible agreement between the House and the Senate that will meet the full approval perhaps of any Senator or any Representative. In matters of this kind it takes a majority to legislate. There is necessarily "give and take." This thing has been worked out laboriously and at great length by the House on the one hand and by the Senate on the other. The only practical solution of it is given in this conference report. The Senate adopted the report after full discussion; and I think the time has now come for us to close up, adopt the report, and pass the bill.

Mr. TODD. I should like to inquire why this report does not embrace some provision that the timber be sold to the highest bidder? Will not the provision in the report operate in the interest of some of the great lumber trusts by enabling them to come in and purchase the timber at merely the appraised price?

Mr. CANNON. I think there is in the report such a provision as the gentleman intimates should be adopted.

Mr. TODD. I think not. It is provided that the timber shall be sold at not less than the appraised value; but the appraised value may be only 50 per cent of the real valuation; and if there are persons willing to pay the real value of the timber, why should not the Government get the benefit of such an arrangement, instead of allowing some lumber combine to get the timber at half its value?

Mr. CANNON. I think this provision, when you come to examine it, will be found correct:

> For the purpose of preserving the living and growing timber and promoting the younger growth on forest reservations, the Secretary of the Interior, under such rules and regulations as he shall prescribe, may cause to be designated and appraised so much of the dead, matured, or large growth of trees found upon such forest reservations as may be compatible with the utilization of the forests thereon, and may sell the same for not less than the appraised value in such quantities to each purchaser as he shall prescribe, to be used in the State or Territory in which such timber reservation may be situated, respectively, but not for export therefrom.

Then provision is made for the giving of notice, etc. Plenary power is given to the Secretary of the Interior to make regulations for the sale of the timber at not less than the appraised value, the object being to utilize the dead timber.

Mr. TODD. But under the provision to which the gentleman refers all the valuable timber may be disposed of.

Mr. CANNON. It is the dead timber that is to be sold, and when sold it is only to be used in the State or Territory in which the reservation is situated.

Mr. TODD. I would withdraw my objection if the language of the provision were so modified that all the valuable timber might not be disposed of in this way.

Mr. CANNON. The gentleman, as I understand, objects because provision is not made for selling the timber to the highest bidder.

Mr. TODD. My suggestion is that if the timber is to be sold, the Government should get the real value of it.

Mr. SMITH of Arizona. Allow me to say that without such a provision as that embraced in the report people in remote wooded districts, desiring to obtain timber, might be prevented from doing so by the sawmill men who would come in and bid perhaps twice as much as individual consumers would be able to bid.

Mr. CANNON. Well, possibly something of that kind; and again I can conceive a position where one man ought not to be permitted to buy all the timber. He might be an improper character. He might not, all things considered, be the best bidder.

Mr. TODD. But you already have a saving clause providing against that. All I want is that the Government shall be entitled to receive all it can legitimately receive when that timber is sold.

Mr. CANNON. Oh, well, in my judgment, this so provides; but the gentleman's criticism comes now for the first time. I never even noticed the want of the provision which he refers to. In the two days' discussion we had of this matter, when the House was under the lead of the gentleman from Iowa [Mr. LACEY] and the gentleman from Arkansas [Mr. MCRAE], our friend did not even make his objection.

Now, Mr. Speaker, I think I am justified in asking the previous question on the adoption of this conference report.

The previous question was ordered.

The question being taken on agreeing to the conference report, on a division (demanded by Mr. LOUD) there were—ayes 89, noes 6.

Accordingly, the conference report was agreed to.

On motion of Mr. CANNON, a motion to reconsider the last vote was laid on the table.

ENROLLED JOINT RESOLUTIONS AND BILL SIGNED.

The SPEAKER announced his signature to enrolled joint resolutions and bill of the following titles:

A joint resolution (S. R. 43) in amendment of the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India;

Joint resolution (S. R. 44) making an appropriation to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897; and

A bill (H. R. 16) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, and for other purposes.

PREVENTING COLLISIONS ON THE INLAND WATERS OF THE UNITED STATES.

The SPEAKER. The House will resume consideration of Senate bill 1886.

Mr. PAYNE. Mr. Speaker, I offer the amendment which I send to the Clerk's desk.

The SPEAKER. The gentleman from New York [Mr. PAYNE] offers an amendment.

The amendment was read, as follows:

> On page 2, line 5, strike out all after "or" and insert "the after range light mentioned in article 2 (f)."

Mr. PAYNE. I ask for a vote, Mr. Speaker. This is one of the amendments suggested by the board of experts.

Mr. FLEMING. Mr. Speaker, it was perfectly competent, of course, for the majority of the House to lay down their policy, as they did early in the session, that they did not desire committees appointed. But, as a corollary of that proposition, we are informed that the House did not intend to enact general legislation. I think, Mr. Speaker, that as long as the House kept those two propositions together the position of the majority was defensible. But now it seems that the House is asked by the gentleman from New York [Mr. PAYNE] to engage in general legislation, and to pass a bill of the most complicated character, without this House having the benefit of having these questions examined by a properly appointed committee.

Mr. Speaker, as far as I am concerned, I have no complaint to make of the policy laid down by the majority, that they do not desire to have committees appointed, if they will couple with that the further statement that they do not intend to enact general legislation. That was the justification, and the only justification, made for that course by the party in power before the country at large. It is the ground on which you have been in some measure held in justification by the people and by the press of the country. The question was, Why appoint committees when you did not intend to enact general legislation?

As I say, that position was defensible. But now what do we find? Here, for the first time, we are asked to enact a bill of the most complicated character. There is not a subject upon which we shall be called to legislate at any time which is perhaps more involved than are the provisions of this bill. Now, by what authority can any member be expected to vote for such a bill? I know of but one. We are told we can assume that the other branch of the legislative department, the Senate, has properly investigated this question, and that they have sent us a perfected bill. In fact, I have been told that this bill has been most carefully considered by the Navy Department.

But, Mr. Speaker, that will not do. That position can not be defended on the floor of the House. Why? The gentleman from New York [Mr. PAYNE] has informed us that he has numerous amendments that he intends to place upon this bill. I should like to ask the gentleman from New York [Mr. PAYNE] at this stage how many amendments he has prepared to go upon the bill?

Mr. PAYNE. I will say to the gentleman that I have not counted the number, but I should think that there were fully a dozen, and perhaps more. I want to say to the gentleman that every one of these amendments has been suggested by this board of experts, consisting of the American representatives at this international conference, and also the Supervising Inspector-General of Steam Vessels and the Commissioner of Navigation. They have carefully considered this bill, and they propose these amendments. I want to say to the gentleman, further, that this bill reenacts in large part the existing rules and regulations that now apply to the navigation of these inland waters, and that the only changes made are in order to make them comply with what Congress and the international conference and treaties have made the rules of the high seas.

It is not such an intricate matter to these gentlemen, but it will be an intricate matter to the gentleman from Georgia and myself or any other members of the House not familiar with questions relating to navigation; and if you were on the committee and considered them, we would still have to rely upon the testimony and judgment of these expert and experienced men who do know about these matters.

Mr. FLEMING. To be sure, Mr. Speaker, the committee, in the first place, would have an opportunity to investigate this question in the light of the experience of these experts. Now the bill

comes here, and we are asked to pass upon it on our faith in the Senate. Did it not go through a committee in the Senate? Now, if the gentleman had told us the bill was already in a perfected condition and asked us to vote for it, he might have expected us to do so. But, Mr. Speaker, after the bill has gone through the Senate, and the gentleman has stated he shall offer a dozen amendments, can such a bill be perfect? If the gentleman has discovered and has been put in possession of a dozen amendments from whatever source, how many other imperfections may there not be found in this bill if properly considered by a committee of this House?

Now, Mr. Speaker, I submit that if the House does not intend to appoint committees—and I am not making any complaint about that—if it does not intend to appoint committees, let it continue to justify its course by not engaging in general legislation. But when they ask this House to engage in general legislation, as they do in asking us to pass this bill, then, as a member of this House, I will insist that this complicated, involved question shall first be considered by a competent committee; and I simply put the gentleman on notice now that if this bill or one of its importance is proposed to be passed, so far as I am concerned, he will have to have a quorum to do it, because I will raise the question of no quorum.

If this bill came before the House from a properly constituted committee I would be willing to accept the work of that committee. In some kind of way we would be obliged to do it. A man can not examine all these subjects himself and can not investigate them. But if we are to vote on faith, I want to have a committee on whose action I can properly rely; and I submit, if the gentleman himself, as an individual member of this House, can discover twelve or fifteen needed amendments to this bill, the probability is that a committee might have discovered a dozen more.

Mr. PAYNE. Will the gentleman from Georgia allow me to ask him one question, and that is, if he understands that rules and regulations for navigation on the high seas, to prevent the collision of ships, and a code of rules of the road, have been established between all maritime nations of the earth, to take effect on the 1st day of next month, and that some of those rules interfere in some degree with our own rules for the navigation of the inland waters bordering on the high seas, and that to leave them in their present condition and make no changes as proposed by this bill would endanger human life; and that in order to carry out his theory, whatever it may be, or to emphasize the matter before the country that the House has no committees—and it seems that the country must understand by this time that the House has no committees; that it is the policy of the majority of the House not to appoint committees—and it seems that the country understands that fact—that in order, uselessly, it seems to me, to emphasize that, he proposes to stand here in the way of the passage of this bill and take the risk of some collision at sea, take the risk of loss of human life; and if this is done——

Mr. LEWIS of Washington. I make the point of order that the gentleman from Georgia has the floor——

Mr. PAYNE. If the leader from Washington will possess his soul in patience——

Mr. LEWIS of Washington. I make the point of order that the gentleman from Georgia has the floor, and can not be taken from the floor by the gentleman from New York in this way.

The SPEAKER. The gentleman from Washington rises to a point of order.

Mr. LEWIS of Washington. I am not at all embarrassed by the compliment of the emphatic form in which the Chair referred to my having the floor, but I——

The SPEAKER. That was by inadvertence.

Mr. LEWIS of Washington. The Chair need not explain that. I would not make any inference from that upon the Chair. I make this point of order: That the gentleman from Georgia has the floor, and that the gentleman from New York, upon the authority of the privilege of asking him a question, can not take his time and address him while the gentleman from Georgia has the floor.

The SPEAKER. The Chair will protect the gentleman from Georgia if he calls upon the Chair for protection. The Chair supposed that the gentleman from Georgia was consenting willingly. If he is in any way coerced, the Chair will protect him. [Laughter.]

Mr. PAYNE. I will ask my friend from Georgia if he needs the assistance of the leader from Washington to protect him in this matter? If he does, I hope he will call upon him.

Now, I simply asked a question, and I supposed I had the leave of the gentleman. I was appealing to him, by way of a question, to reconsider his idea of trying to obstruct this legislation and force the House to meet on another occasion, when there should be a quorum here, in order to pass this bill, the bill itself being in the interest of the preservation of human life, and therefore the sooner it is passed the better.

Mr. FLEMING. Mr. Speaker, it would be very hard to examine the gentleman's statement and find exactly where the question is. But I am always entertained in listening to the gentleman from New York, and I felt perfectly safe in allowing him to speak as long as he desired, because I know I have an hour, if I choose to take that much time. I do not want to consume that time. My purpose in taking the position I do take was in no way whatever to advertise to the country any further the fact that this House is without any regular committees, nor was it my desire to advertise to the country the policy of the majority party, that they did not intend to engage in general legislation.

My purpose was bona fide to prevent the passage of a bill which has not been properly considered by a committee of the House. Now, I will show my good faith in that respect by stating that I am perfectly willing to join with the gentleman from New York in requesting the Chair to appoint a special committee to investigate this particular bill. If gentlemen on the other side do not desire to have all the committees appointed, I do not ask that.

All I ask is a special committee to investigate this question. Here is a measure dealing with a very important and very involved subject, and my information is that there are provisions in this bill which ought not to be there. Why not have the subject properly investigated? Why not request the Chair, or why will not the gentleman from New York himself move, to refer this bill to a special committee to be appointed by the Chair? If he will make a motion to refer it to either a regular or a special committee, I will vote with him.

Mr. PAYNE. If the gentleman from Georgia knows of any provision in this bill that ought not to be there, why does he keep that information to himself? Why does he not give it to the House?

Mr. FLEMING. Mr. Speaker, when the gentleman from New York himself has discovered twelve imperfections in this bill, I think it is time that he should allow some other members of the House to investigate it and try to ascertain whether the number of imperfections may not be much greater. He has discovered twelve, but I fear that he has not discovered all of the imperfections, and for that reason I desire that the bill shall be referred to a committee for investigation.

If he prefers a special committee instead of a regular committee, I make no point on that. I simply say that as a member of this House I will not vote for a bill of this character unless I have the report of some committee to guide me, and I will do what I can to prevent the passage of the bill unless the course I have suggested or some similar course is pursued.

Mr. PAYNE. Mr. Speaker, I call for a vote on the pending amendment.

Mr. RICHARDSON. I desire, before the vote is taken on that amendment, to ask the gentleman from New York a question for information in reference to the matter included on page 15 under the heading "Note." I have never seen anything like this before in any bill that has passed the House. I refer to the matter which is in fine print in contradistinction to the text of the bill. I want to ask the gentleman what it means. It does not seem to be any part of article 21 or of article 22, but it is here in the bill in print between those two articles. It does not seem to be a part of any article in the bill, but it was read by the Clerk as a part of the text. It is certainly something unusual to insert a "note" of this character in the body of a bill, and I want to know from the gentleman from New York whether this is to be taken as a part of the law if this bill shall become law?

The question being taken on the pending amendment, it was agreed to.

Mr. PAYNE. Mr. Speaker, in line 23, page 27, I move to strike out the word "to," simply to improve the language.

The amendment was adopted.

Mr. RICHARDSON. Mr. Speaker, I move to strike out the matter to which I have already called attention, which is headed "Note," and which occurs between lines 7 and 8 on page 15 of the bill.

Mr. PAYNE. Will the gentleman from Tennessee wait until I offer another amendment?

Mr. RICHARDSON. Mr. Speaker, by what authority does the gentleman from New York claim priority over other members of the House in offering amendments to this bill?

The SPEAKER. The Chair supposed that there had been some arrangement made by which the gentleman from New York was to be permitted to offer certain amendments.

Mr. RICHARDSON. None whatever.

The SPEAKER. Then the gentleman from Tennessee will present his amendment.

Mr. RICHARDSON. Mr. Speaker, I move to strike out the matter on page 15, between lines 7 and 8 of the bill, under the heading "Note."

Mr. PAYNE. Mr. Speaker, I supposed I had the floor for an amendment.

The SPEAKER. The Chair has recognized the gentleman from Tennessee.

Mr. RICHARDSON. I respectfully asked an explanation of the

gentleman from New York, and I got no answer. That is why I now move to strike out this language, and I now ask that the Clerk report this "note."

The SPEAKER. The Clerk will report the words proposed to be stricken out.

The Clerk read as follows:

On page 15, between lines 7 and 8, strike out the following:
"NOTE.—When, in consequence of thick weather or other causes, such vessel finds herself so close that collision can not be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision. (See articles 27 and 29.)"

Mr. PAYNE. Mr. Speaker, I wish to explain to the gentleman from Tennessee and to the House that this act is a codification of the rules relating to the navigation of our inland waters. One object in putting them together in the law is to get them in convenient form where they can be printed and posted in every vessel, and this note appears here in the body of the act for the purpose of giving notice at that particular point by reference to articles 27 and 29. It is simply for the convenience of posting the law, and of course, in that respect, it is a part of the statute.

Mr. RICHARDSON. But the question I propounded to the gentleman from New York was whether he had ever seen a "note" like this in the body of any law that has passed this House.

Mr. PAYNE. I do not think I have ever seen anything exactly like it; still I have seen something quite similar in the general laws relating to navigation, requiring the posting in each vessel of the bill of fare that is prescribed by law for sailors. That is inserted in the body of the law in a way almost exactly similar to this, and the object is that it may be posted in the cabin or the forecastle of the vessel.

Mr. GROSVENOR. Mr. Speaker, I think the amendment of the gentleman from Tennessee is a proper one. I have never seen anything like this "note" in the body of a measure presented to Congress. The matter is very simple, however. Article 21 provides an absolute and imperative rule when unaccompanied by two other articles. Those other articles are Nos. 27 and 29, and they specify the cases in which there may be a variance from the accurate and strict rule. Now, in posting this law for the benefit of seamen, it will be only necessary for the Treasury Department to print this note at the foot, as has been the custom in other cases, as a part of the law.

Mr. RICHARDSON. I am very glad to hear the statement of the gentleman from Ohio [Mr. GROSVENOR]. I think he is exactly correct. I am glad we agree on this question. I have never seen any effort on the part of the friends of any bill to insert an explanatory provision of this kind. That is why I have moved to strike it out.

The question being taken, the amendment of Mr. RICHARDSON was agreed to.

Mr. PAYNE. Now, Mr. Speaker, I offer the amendment which I have already sent up to the desk.

The Clerk read as follows:

After line 24, page 7, add:
"(d) Rafts, or other water craft not herein provided for, navigating by hand power, horsepower, or by the current of the river, shall carry one or more good white lights, which shall be placed in such manner as shall be prescribed by the Board of Supervising Inspectors of Steam Vessels."

Mr. RICHARDSON. I should like to know whence this amendment comes and why it is suggested. The amendment appears to be a most important one. It is almost impossible for us to legislate intelligently upon a measure of this kind in this haphazard way. I submit that the gentleman from New York ought not to press the consideration of this bill any further this evening. In view of the lateness of the hour and the fewness of the members in attendance, I suggest that the gentleman allow the bill to go over until some other day.

Mr. PAYNE. Will the gentleman consent to take a recess until to-morrow at 12 o'clock?

Mr. RICHARDSON. What is the use of that?

Mr. PAYNE. For the purpose of going on with this bill.

Mr. RICHARDSON. Will there not be plenty of time to consider it when we meet on the next regular day? It is hardly likely there will be any more members in attendance to-morrow than to-day; and I assure the gentleman from New York, from declarations of gentlemen all around me, that he can not pass this bill this evening unless he can obtain a quorum.

Mr. PAYNE. I suggest, then, that we take a recess until to-morrow, and then go on with the bill. We had a quorum here this morning.

Mr. RICHARDSON. Under the standing rule we would adjourn until next Thursday. Why not take up this bill at the next regular session of the House?

Mr. PAYNE. I ask for a vote on my amendment.

The SPEAKER (having put the question) declared that the ayes seemed to have it.

Mr. FLEMING and others called for a division.

Mr. PAYNE. I move that the House do now adjourn.

Mr. SAYERS. I ask the gentleman from New York to withdraw that motion until my colleague can call up a bill which will not take three minutes.

Mr. PAYNE. I am afraid it is an important bill, and will require a quorum. I can not withdraw my motion.

Mr. SAYERS. All right; then you will have to bring a quorum here to pass this bill.

Mr. PAYNE. If we can not go on with this bill without a quorum, we can not go on with any other. I do not withdraw my motion.

The question being taken, the motion of Mr. PAYNE, that the House adjourn, was agreed to; and accordingly (at 4 o'clock and 30 minutes p. m.), the House, pursuant to its standing order, adjourned until Thursday next at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of the Navy, transmitting copy of a letter from the Chief of Bureau of Yards and Docks, with report of the board of civil engineers appointed to examine the cause of the leak in the dry dock in the Brooklyn Navy-Yard, and recommending appropriation for the same—to the Committee on Naval Affairs, and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. MAXWELL: A bill (H. R. 3382) to prohibit the granting of a patent where the thing sought to be patented is a mere rearrangement or variance in constructive devices and details of inventions already known; second, to require the party claiming an infringement to recover judgment against the party charged with such infringement before he can maintain an action against a bona fide purchaser of the article alleged to be an infringement, and to restrict damages to the actual injury; third, to reduce the time to sixty days in which to file an application for a patent—to the Committee on Patents.

By Mr. BELL (by request): A bill (H. R. 3383) to restore medical freedom to the people of the District of Columbia—to the Committee on the District of Columbia.

By Mr. LEWIS of Washington: A bill (H. R. 3393) for the relief of settlers—to the Committee on the Public Lands.

Also, a bill (H. R. 3394) for an assay office at Seattle, in the State of Washington—to the Committee on Coinage, Weights, and Measures.

By Mr. SMITH of Kentucky: A joint resolution (H. Res. 60) proposing an amendment to the Constitution of the United States—to the Committee on the Judiciary.

By Mr. BOUTELLE: A joint resolution (H. Res. 61) to provide for the immediate repair of Dry Dock No. 3, at the New York Navy-Yard—to the Committee on Naval Affairs.

By Mr. HENDERSON: A resolution (House Res. No. 49) relative to the consideration of Senate joint resolution No. 44, making an appropriation to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897—to the Committee on Rules.

Also, a resolution (House Res. No. 50) relative to the consideration of Senate joint resolution No. 43, in amendment of the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India—to the Committee on Rules.

By Mr. BOUTELLE: A resolution (House Res. No. 51) to provide for the consideration of a resolution for repairs to Dry Dock No. 3 at the navy-yard, New York—to the Committee on Rules.

By Mr. LEWIS of Washington: A resolution (House Res. No. 52) moving the appointment of a Committee on Foreign Affairs, to consider the foreign policy toward Cuba—to the Committee on Rules.

Also, a resolution (House Res. No. 53) requesting full correspondence concerning the situation in Cuba or any reports of the same now in possession or control of the Secretary of State or Executive, to be at once submitted to the House of Representatives—to the Committee on Foreign Affairs.

By Mr. KING: A resolution (House Res. No. 54) directing the Speaker to appoint the Committee on Foreign Affairs—to the Committee on Rules.

By Mr. COOKE: A concurrent resolution (House Con. Res. No. 5) relating to affairs in Cuba—to the Committee on Foreign Affairs.

By Mr. JENKINS: A memorial of the legislature of the State of Wisconsin, for an amendment to the Constitution of the United States relating to trusts—to the Committee on the Judiciary.

By Mr. STEWART of Wisconsin: A memorial of the legislature of the State of Wisconsin, in favor of an amendment to the Constitution relating to trusts—to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. RIXEY (by request): A bill (H. R. 3378) for the relief of James Willard, of Loudoun County, Va.—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3379) for the relief of the Culpeper Baptist Church, at Culpeper, Va.—to the Committee on War Claims.

Also (by request), a bill (H. R. 3380) for the relief of James T. Smith—to the Committee on Claims.

By Mr. SIMS: A bill (H. R. 3381) for the relief of M. Robison, administrator of T. E. Robison, deceased, late of Henderson County, Tenn.—to the Committee on War Claims.

By Mr. BINGHAM: A bill (H. R. 3384) granting a pension to Mrs. Rebecca S. Holman—to the Committee on Invalid Pensions.

By Mr. BROWNLOW: A bill (H. R. 3385) to provide for the readjustment and payment of dues to army officers in certain cases—to the Committee on Military Affairs.

By Mr. BRUNDIDGE: A bill (H. R. 3386) for the relief of James Erwin, of McBee Landing, Marion County, Ark.—to the Committee on War Claims.

By Mr. HENRY of Mississippi: A bill (H. R. 3387) for the relief of the heirs of Mrs. Nancy Mitchell, of Lincoln County, Miss.—to the Committee on War Claims.

By Mr. KITCHIN: A bill (H. R. 3388) for the relief of Thomas H. Street, of Person County, N. C.—to the Committee on War Claims.

By Mr. LOW: A bill (H. R. 3389) to reappoint Warren C. Beach a captain in the Army, and to place him on the retired list in addition to the number now authorized—to the Committee on Military Affairs.

By Mr. McCLEARY: A bill (H. R. 3390) granting a pension to Charlotte M. Bryson, widow of Andrew Bryson, late rear-admiral in the United States Navy—to the Committee on Pensions.

By Mr. UNDERWOOD: A bill (H. R. 3391) for the relief of W. H. Barnard and Robert Thomas—to the Committee on Claims.

Also, a bill (H. R. 3392) for the relief of Mrs. Minnie Andrews—to the Committee on War Claims.

By Mr. LEWIS of Washington: A bill (H. R. 3395) to place the name of William Gross on the pension roll—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3396) granting a pension to Lieut. Col. Ogden Street—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3397) for the relief of Twyman O. Abbott—to the Committee on Claims.

Also, a bill (H. R. 3398) for the relief of M. S. Hellman—to the Committee on Claims.

Also, a bill (H. R. 3399) for the relief of A. D. Glover—to the Committee on Claims.

Also, a bill (H. R. 3400) for the relief of Thomas M. Fisher—to the Committee on Military Affairs.

Also, a bill (H. R. 3401) for the relief of John Morrow, alias James Henry—to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ADAMS: Petition of the Philadelphia Board of Trade, for an appropriation for the proposed international exhibition in France in response to the recommendations of the President—to the Committee on Appropriations.

Also, resolutions of the Original M. S. Quay Club, of Philadelphia, Pa., protesting against the civil-service law and asking for its suspension or repeal—to the Committee on Reform in the Civil Service.

Also, petition of John W. Schmidt and other citizens of Philadelphia, Pa., for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

Also, resolutions of the Thirteenth Ward Republican executive committee, of Philadelphia, Pa., protesting against the civil-service law, and asking for its repeal—to the Committee on Reform in the Civil Service.

Also, resolutions of the Civil Service Reform Association of Philadelphia, Pa., in support of the civil-service law—to the Committee on Reform in the Civil Service.

Also, petition of the Philadelphia Credit Men's Association, favoring the passage of the Torrey bankruptcy bill—to the Committee on the Judiciary.

By Mr. BINGHAM: Resolutions of the Philadelphia Drug Exchange, urging the enactment of the Torrey bankruptcy bill—to the Committee on the Judiciary.

Also, resolutions of the Trades League of Philadelphia, Pa., protesting against the repeal of the civil-service act—to the Committee on Reform in the Civil Service.

By Mr. BUTLER: Petitions of William Wardell and other citizens of Phœnixville, Pa., and H. K. Dunlop and others, of Oxford, Pa., for the passage of an immigration bill—to the Committee on Immigration and Naturalization.

By Mr. DALZELL: Resolutions of the Chamber of Commerce of Pittsburg, Pa., in favor of a bill for national freight classification—to the Committee on Interstate and Foreign Commerce.

Also, resolutions of the Philadelphia (Pa.) Drug Exchange, indorsing the Torrey bankruptcy bill—to the Committee on the Judiciary.

By Mr. DINGLEY: Petition of Mrs. E. S. Mills and 173 others, of Vinalhaven, Me., praying for the further restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. FARIS: Petition of F. C. Starns and 85 other citizens of Parke County, Ind., recommending the repeal of the civil-service law—to the Committee on Reform in the Civil Service.

By Mr. FLETCHER: Petition of the Board of Trade of Minneapolis, Minn., favoring the passage of a bankruptcy bill—to the Committee on the Judiciary.

By Mr. HENRY of Indiana: Resolutions adopted at a meeting of wholesale liquor dealers in Indianapolis, Ind., regarding a tax on spirits and the regulation of the bonded period—to the Committee on Ways and Means.

By Mr. HILL: Petition of Annie S. Blythe and other citizens of Bridgeport, Conn., concerning immigration—to the Committee on Immigration and Naturalization.

By Mr. JOHNSON of Indiana: Petition of 130 citizens of Richmond, Ind., and 52 citizens of Connersville, Ind., for the passage of a law at the present session of Congress for a commission to revise the banking and currency system—to the Committee on Banking and Currency.

By Mr. JONES of Washington: Memorial of the Chamber of Commerce of Seattle, Wash., favoring the annexation to the United States of the Islands of Hawaii—to the Committee on Foreign Affairs.

By Mr. LOUD: Memorial of the San Francisco Chamber of Commerce, praying for the early enactment of the tariff bill—to the Committee on Ways and Means.

By Mr. McCLEARY: Memorial of the Merchant Tailors' Exchange of Boston, Mass., protesting against the omission of the one-hundred-dollar limit of value to free importations of personal clothing—to the Committee on Ways and Means.

Also, protest of the Excelsior Brewing Company, of St. Paul, Minn.; also of Gluek's Brewing Company, of Minneapolis, Minn., against the proposed increase of tax on beer—to the Committee on Ways and Means.

By Mr. MITCHELL (by request): Petition of the Young People's Society of Christian Endeavor of the Thirteenth Street Presbyterian Church of New York City, N. Y., favoring the passage of a bill to forbid the interstate transmission of any picture or description of any encounter of pugilists—to the Committee on Interstate and Foreign Commerce.

Also (by request), petition of the Young People's Society of Christian Endeavor of the Thirteenth Street Presbyterian Church of New York City, urging the passage of a bill to protect the first day of the week in the District of Columbia—to the Committee on the District of Columbia.

Also (by request), petition of the Young People's Society of Christian Endeavor of the Thirteenth Street Presbyterian Church of New York City, asking for the passage of a bill to forbid the sale of intoxicants in Government buildings—to the Committee on Public Buildings and Grounds.

By Mr. MOODY: Petition of Mrs. Minnie C. Harris and 18 others, of Marblehead, Mass., praying for the further restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. PITNEY: Petition of 48 citizens of Rockaway, N. J., in favor of a more rigid immigration law—to the Committee on Immigration and Naturalization.

By Mr. ROYSE: Petitions of F. M. Mulhollan, John T. Kelley, and other citizens of South Bend, Ind., for the restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. SULLOWAY: Petition of Johen E. Milton and 90 other citizens of Portsmouth, N. H., asking for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

Also, petition of Florence F. Atwood and 14 other citizens of New Boston, N. H., asking for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. WRIGHT: Petition of George T. Porter and 27 other citizens of Westfield, Mass., favoring a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

SENATE.

WEDNESDAY, *June 2, 1897.*

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Vice-President being absent, the President pro tempore took the chair.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. TURPIE, and by unanimous consent, the further reading was dispensed with.

The PRESIDENT pro tempore. The Journal, without objection, will stand approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 16) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, and for other purposes.

PETITIONS AND MEMORIALS.

The PRESIDENT pro tempore presented a petition of the Baltimore (Md.) Annual Conference of the Methodist Episcopal Church, praying for the enactment of legislation prohibiting the sale of intoxicating liquors in all Government buildings; which was referred to the Committee on Public Buildings and Grounds.

He also presented a petition of the Baltimore (Md.) Annual Conference of the Methodist Episcopal Church, praying for the enactment of legislation to restore to the District of Columbia its Sabbath law; which was referred to the Committee on the District of Columbia.

He also presented a petition of the Baltimore (Md.) Annual Conference of the Methodist Episcopal Church, praying for the enactment of legislation to raise the age of consent to 18 years in the District of Columbia and the Territories; which was referred to the Committee on the District of Columbia.

He also presented a petition of the Baltimore (Md.) Annual Conference of the Methodist Episcopal Church, praying for the enactment of legislation prohibiting the transmission of pictures and descriptions of prize fights through the mails or by interstate commerce; which was ordered to lie on the table.

He also presented a petition of the Baltimore (Md.) Annual Conference of the Methodist Episcopal Church, praying for the enactment of legislation prohibiting interstate gambling by telegraph, telephone, or otherwise; which was referred to the Committee on Interstate Commerce.

Mr. TURPIE presented a petition of sundry wholesale liquor dealers of Indianapolis, Ind., praying that the tax on distilled spirits be reduced from $1.10 per proof gallon to 90 cents per proof gallon, provided that the present eight-year bonded period be reduced to three years; which was ordered to lie on the table.

He also presented sundry papers to accompany the bill (S. 147) for the relief of William H. Wilson; which were referred to the Committee on Military Affairs.

Mr. HOAR presented a petition of sundry citizens of Massachusetts, praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

He also presented the petition of Joseph E. Selfe, president, and three other officers of the Merchant Tailors' Exchange of Boston, Mass., praying for the passage without amendment of paragraph 666 of the pending tariff bill, relating to the free entry of wearing apparel, personal effects, etc.; which was ordered to lie on the table.

Mr. LODGE presented a petition of 152 business firms of the United States, and a petition of 11 business firms of the United States, praying for a continuance of the reciprocity treaty with Hawaii; which were referred to the Committee on Foreign Relations.

He also presented a memorial of 13 business firms of Boston, Mass., remonstrating against an increase of the duty on tanned skin for morocco; which was ordered to lie on the table.

He also presented a petition of the U. S. Grant Council, No. 352, Junior Order United American Mechanics, of Pottstown, Pa., praying for the passage of the so-called Lodge bill restricting immigration; which was ordered to lie on the table.

Mr. QUAY presented the memorial of P. J. Huth, secretary of the Point Bottle Works, of Rochester, Pa., relative to the duty on glass bottles; which was ordered to lie on the table and to be printed in the RECORD, as follows:

ROCHESTER, PA., *June 1, 1897.*

To Hon. M. S. QUAY:

GREEN, FLINT, AND LIME GLASS BOTTLES.

The act of 1894 reduced the duty on bottles 25 per cent. About 85 per cent of our cost is labor, which is at least 200 per cent higher than is paid in Germany, our chief competitor. We have been unable to secure a reduction in wages to meet said reduction in duty. The business since the passage of said act has been in a deplorable condition.

The duty on soda ash, which is a raw material to us, it is proposed to advance largely over the McKinley rates, which means a double cut to the bottle makers. Owing to the classification, bottles holding more than 1 pint and not more than 1½ pints come in at a less rate of duty than pints (as the extra weight in said sizes does not compensate for the lower rate per pound), and on these sizes the importations are very heavy and are increasing, notwithstanding the prices of American manufacture are lower than have been known for twenty-five years.

The importation of mineral waters and ginger ales (amounting to about 2,500,000 pint bottles in 1896) in unlettered bottles, which are being collected and resold, is a very serious menace to our business.

In view of the above facts, I beg to request, first, that the House rates be restored and the additional clause therein be retained by the Senate committee; second, that all filled bottles shall have the name of its contents (and the country from which it came) blown in the glass.

Respectfully,

P. J. HUTH,
Secretary Point Bottle Works, Rochester, Pa.

REPORT OF A COMMITTEE.

Mr. STEWART, from the Committee on Claims, to whom was referred the bill (S. 707) for the relief of Ames & Detrick, of San Francisco, in the State of California, reported it without amendment, and submitted a report thereon.

AMENDMENT TO THE TARIFF BILL.

Mr. BURROWS (by request) submitted an amendment intended to be proposed to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was ordered to lie on the table and to be printed.

PUBLIC BUILDING AT NASHUA, N. H.

Mr. GALLINGER. If the morning business is closed, I ask unanimous consent for the consideration of the bill (S. 479) to provide for the purchase of a site and the erection of a public building thereon at Nashua, in the State of New Hampshire.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to acquire, by purchase, condemnation, or otherwise, a site and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and accommodation of the United States post-office and other Government offices, in the city of Nashua, N. H., the cost of site and building, including vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed $100,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Several Senators addressed the Chair.

Mr. QUAY. I desire, unless there is objection, to ask the Senate to proceed to the consideration of the bill (S. 1271) for a public building at the city of Wilkesbarre, Pa., and appropriating money therefor.

The PRESIDENT pro tempore. Will the Senator from Pennsylvania allow morning business to be transacted?

Mr. QUAY. I have no objection.

SALE OF ALCOHOLIC LIQUORS IN SOUTH CAROLINA.

Mr. TILLMAN. I beg to have immediate consideration of the resolution I send to the desk.

The PRESIDENT pro tempore. The resolution will be read for information.

The Secretary read the resolution, as follows:

Whereas the Supreme Court of the United States declared, in the case of Leisy *vs.* Hardin, 135 U. S., from Iowa, that no State had the right to prohibit the sale of liquor within its own borders in original packages upon the ground that it was an interference with interstate commerce; and

Whereas, in order to give relief to the people of Iowa, Congress passed what is known as the Wilson law, in these words:

"An act to limit the effect of the regulations of commerce between the several States and with foreign countries in certain cases.

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That all fermented, distilled, or other intoxicating liquors or liquids transported into any State or Territory or remaining therein for use, consumption, sale, or storage therein, shall upon arrival in such State or Territory be subject to the operation and effect of the laws of such State or Territory enacted in the exercise of its police powers, to the same extent and in the same manner as though such liquids or liquors had been produced in such State or Territory, and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise.

"Approved August 8, 1890."

And whereas under the authority therein granted the State of South Carolina, in December, 1892, passed the dispensary law, under which provision is made for the sale of liquor by State officers under strict restrictions and rules; and

Whereas under this system experience has shown that the cause of temperance has been advanced and the good order and quiet of the State has been promoted; there being now less than 100 dispensaries in place of upward of 800 barrooms in 1892; and

Whereas a circuit judge of the United States court by judicial legislation, in a recent decision, has repealed the act of Congress above recited as far as South Carolina is concerned, thus requiring that State to reopen the barrooms or allow the free and unlimited sale of liquor in original packages: Therefore,

Be it resolved, That the Judiciary Committee of the Senate be instructed to consider what legislation is necessary, if any, to restore to South Carolina the right granted by the act of Congress of August 8, 1890, to control the sale of alcoholic liquors within its own borders in its own way, in common with other States of this Union.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution? The Chair hears none. Will the Senate agree to the resolution?

Mr. TILLMAN. Mr. President, I will give a brief explanation of the condition in our State which has caused me to introduce this resolution.

Within a week the circuit judge there has declared that the dispensary law is unconstitutional, because it conflicts with the interstate-commerce law. The dispensary law provides that liquor shall not be sold in the State by other than a State officer, who is under bond and limited as to the hours of sale. He can not sell it in the nighttime, and he can not sell it except in unbroken packages—sealed packages—and those packages are not to be broken on the premises.

Now, the circuit judge comes along and declares that, as the State recognizes the sale of liquor as legitimate, it is not an exercise of the police power to restrict it in the way we have done, and that therefore a citizen of any other State has a right to ship into the State in original packages and to sell it within the limitations that the State law imposes on its State officers.

The State has at this time something like $300,000 invested in liquor distributed at the different dispensaries. The legislature will not meet until January. There is no power in the State government to suspend the operation of the vast machinery for the handling of this product, and yet under the conditions imposed by this decision any outsider can come in and open a liquor shop alongside of the State dispensary or anywhere else and sell at any price he pleases, therefore resulting in great injury to the morals of the State and to the welfare of the community, as well as loss in the expenses which will attach by running the dispensaries under such circumstances.

There is an erroneous impression abroad that the State entered upon this business for the profit in it. That is not true, and it is a mere secondary feature of the law, which is itself as remote in purpose from thus handling of the liquor as anywhere in any State in this Union. To those who claim that it is an illegitimate business, that no decent person will go into it, and that the State ought not to go into it, I merely point to the fact that the United States Government has always derived a revenue from liquor. Nearly every State in the Union to-day licenses its sale, and is in league with the licensees, and creates a monopoly from which private persons who obtain the business are allowed to sell for profit, to be shared by it.

The opinion of this circuit judge that the State has not the right to limit the sale in this way, but must license some private individual to do it, is, we think, contrary to the act of Congress which I have recited in the resolution.

Therefore, for the relief of South Carolina and to put her back on a plane with the other States, so that her citizens in the exercise of their local government may control this pernicious traffic in their own way, I ask that the Senate of the United States and Congress shall take action.

Mr. FAULKNER. Will the Senator from South Carolina permit me to make a suggestion?

Mr. TILLMAN. Certainly.

Mr. FAULKNER. Personally, I concur in the views of the Senator, and I am very anxious to assist him in getting the relief he seeks. I think the local self-government of the people there requires that they should control this whole subject. I very earnestly supported the Wilson bill for the same reason. But I hope the Senator from South Carolina will not embarrass the resolution he has offered by the preamble which is attached to it. I do not feel justified in voting without consideration for the declaration in the preamble that this decision of the judge of the Federal court is judicial legislation. I think the facts are sufficiently known as a matter of public history for the resolution to stand on its own merits without committing any of us, without an examination into the question, to the declaration contained in the preamble. I sincerely hope the Senator from South Carolina will be willing to submit the resolution on its merits without the preamble.

Mr. TILLMAN. I am perfectly willing to strike out the words "judicial legislation."

Mr. BACON. I ask that the resolution be again read.

The Secretary again read the resolution.

The PRESIDENT pro tempore. Does the Chair understand the Senator from South Carolina to withdraw the preamble of the resolution?

Mr. TILLMAN. I will substitute in place of the words "judicial legislation" the words "judicial interpretation," and let it stand on its merits.

Mr. BACON. I suggest to the Senator from South Carolina that there ought to be an amendment to that part of the resolution which limits the investigation of the Judiciary Committee to the particular case of South Carolina. There ought to be a general law, and the investigation ought to be one which can give relief not only to South Carolina, but to any other State similarly situated. I have no doubt that the report of the Committee on the Judiciary will go to that extent, but I simply suggest, in the interest of the general character of all legislation which ought to be had at this time, that the legislation ought to be so framed as not to appear to be specifically limited to one State.

Mr. TILLMAN. I will reply to that by saying that when the original-package decision of the United States Supreme Court was rendered, the appeal to this body and to Congress for relief came from the then Senator from Iowa, Mr. Wilson; that it was recited in the report that that was the specific case which they desired to remedy; that the act of August 8, 1890, known as the Wilson Act, was passed in pursuance thereof, and that everybody except the judges who interpreted the law has considered that act as covering the principle that local self-government shall obtain absolutely in managing liquor within the borders of a State.

Mr. BACON. The Senator does not understand me as antagonizing his resolution, I hope.

Mr. TILLMAN. I drew the resolution hurriedly. I understand that it will go to the Judiciary Committee, whether the Senate passes it or not, and it is a matter of small moment to me whether you shall by your votes indorse the preamble and the general proposition or whether you shall simply let the resolution go in that way. I do not want to excite any antagonism to the resolution, and I am perfectly willing to accept the amendment you propose if you will phrase it so as to cover the entire subject as to how Congress shall act and what it is willing to do in limiting the interstate feature of the Constitution in regard to the traffic in liquor.

Mr. HOAR. I move to amend the resolution by inserting the following substitute:

Resolved, That the Committee on the Judiciary be directed to consider and report, by bill or otherwise, what legislation, if any, is necessary to give full effect to the purpose of the statute—

Recited in the resolution of the Senator from South Carolina. That will cover the entire subject.

Mr. TILLMAN. I accept that amendment.

The PRESIDENT pro tempore. The Senator from South Carolina accepts the amendment offered by the Senator from Massachusetts. The Secretary will report the resolution as amended.

Mr. CHANDLER. I understand that the Senator from South Carolina consents to the omission of the preamble.

Mr. TILLMAN. I accept the substitute submitted by the Senator from Massachusetts for the entire thing.

Mr. CHANDLER. Leaving out the preamble?

Mr. TILLMAN. Leaving out the preamble. I accept the amended resolution.

The PRESIDENT pro tempore. The resolution as amended will be read.

The Secretary read the amended resolution, as follows:

Resolved, That the Committee on the Judiciary be directed to consider and report, by bill or otherwise, what legislation, if any, is necessary to give full effect to the purpose of the act approved August 8, 1890, entitled "An act to limit the effect of the regulations of commerce between the several States and with foreign countries in certain cases."

The PRESIDENT pro tempore. Without objection, the resolution is agreed to. It is agreed to.

Mr. TILLMAN. I submit a copy of the South Carolina dispensary law, which I ask to have printed in the RECORD, so that Congress and all other persons interested may know just how much of a police regulation it is.

The PRESIDENT pro tempore. The Senator from South Carolina asks that there be printed in the RECORD the law to which he refers. Is there objection? The Chair hears none, and it is so ordered.

The law referred to is as follows:

DISPENSARY LAW—AN ACT TO PROVIDE FOR THE ELECTION OF A STATE BOARD OF CONTROL, AND TO FURTHER REGULATE THE SALE, USE, CONSUMPTION, TRANSPORTATION, AND DISPOSITION OF INTOXICATING AND ALCOHOLIC LIQUORS OR LIQUIDS IN THE STATE, AND PRESCRIBE FURTHER PENALTIES FOR VIOLATION OF THE DISPENSARY LAWS, AND TO POLICE THE SAME.

SECTION 1. *Be it enacted by the general assembly of the State of South Carolina*, That the manufacture, sale, barter, or exchange, receipt or acceptance for unlawful use, delivery, use, or sale of storing, and keeping in possession within this State of any alcoholic or spirituous, malt, vinous, fermented, brewed (whether lager brewed liquors, or rice beer), or other liquors, any compound or mixture or compounds, thereof by whatever name called or known, which contains prohibited. alcohol and is used as a beverage, except as is hereafter provided, is hereby prohibited, under a penalty of not less than Penalty. three nor more than twelve months at hard labor in the State penitentiary, or pay a fine of not less than $100 nor more than $500, or both and imprisonment, in the discretion of the court, for each offense. All alcoholic liquors in this All liquors State, whether manufactured within this State or elsewhere, not analyzed not having been tested by the chemist of the South Carolina and pure de- College and found to be pure and free from poisonous, hurtful, cleared against and deleterious matters, are hereby declared to be of a detri- good health and mental character, and their use and consumption are against morals. the morals, good health, and safety of the State, and all such

The keeping,

liquors may be seized whenever found, without a warrant, and disposed of as hereinafter provided. Any person resident in this State intending to import for personal use and consumption any spirituous, malt, vinous, fermented, brewed, or other liquor containing alcohol from any other State or foreign country, shall first certify to the chemist of the South Carolina College the quantity and kind of liquor proposed to be imported, together with the name and place of business of the person, firm, or corporation from whom it is desired to purchase, accompanying such certificate with a statement that the proposed consignor has been requested to forward a sample of such liquor to the said chemist at Columbia, South Carolina. Upon receipt of said sample the said chemist shall immediately proceed to test the same, and if found to be pure and free from any poisonous, hurtful, or deleterious matters, he shall issue a certificate to that effect, stating therein the names of the proposed consignor and consignee, and the quantity and kind of liquor proposed to be imported thereunder, which certificate shall be dated and forwarded by said chemist, post paid, to the proposed consignor at his place of business. The said consignor shall cause such certificate to be attached to the package containing the liquor when it is shipped in this State, and no package bearing such certificate shall be liable to seizure and confiscation; but any package of spirituous, malt, vinous, fermented, brewed, or other liquor or liquid containing alcohol imported into this State without such certificate, or any package containing liquor other than described in the certificate thereto attached, or any package shipped by or to any person or persons not named in such certificate, shall be seized and confiscated as provided in this act. Any certificate obtained from the chemist as herein provided shall be used within sixty days after the date of its issue, and shall be invalid thereafter. It shall be unlawful to use said certificate for more than one importation, and any person attempting to counterfeit said certificate, or to make any improper use thereof, or who shall make any false statement in obtaining or attempting to obtain the same, shall be guilty of a misdemeanor, and, upon conviction, shall be punished by imprisonment for not less than thirty days nor more than twelve months, or to pay a fine of not less than one hundred nor more than one thousand dollars. Any person or persons convicted of selling or otherwise unlawfully disposing of any liquor imported under the provision of this section shall suffer double the punishment provided for a sale in violation of other provisions of this act. All expenses incurred in enforcing the provisions of this section, including compensation for such assistant chemists as may be necessary to make prompt analysis, and the express charges on samples shall be paid by the State board of control hereinafter provided for as an expense of the State dispensary established by this act. If the chemist of the South Carolina College shall willfully fail or refuse to make or have made an analysis of any sample sent to him in accordance with this section, he shall, upon conviction thereof before a court of competent jurisdiction, be fined one hundred dollars for each offense.

Analysis of liquors.

Certificates of analysis to be attached.

Certificate to be used in sixty days.

Penalty for false certificate, etc.

Expense of analysis to be paid by State.

Penalty for chemist failing to make analysis.

SEC. 2. A board, consisting of five members, to be known as the State board of control, shall be elected by the general assembly at this session to carry out the provisions of this act. The terms of office of the board so elected shall be for one, two, three, four, and five years, respectively, and those elected shall determine by lot which shall take the respective terms. At the expiration of the term of office of each member his successor shall be elected for a term of five years. They shall receive for their services the same per diem and mileage as members of the general assembly. The State board of control shall devise and inaugurate such a system of bookkeeping and accounting as they may deem advisable, and shall elect a clerk or bookkeeper, who shall hold his office during the pleasure of the board, and shall receive as compensation for his services a salary of $1,500 per annum. The State board of control, under such rules and regulations as may be adopted by said board, shall purchase all liquors for lawful sale in this State, and shall have the same tested and declared to be pure, as hereinbefore and hereinafter provided.

State board of control.

How elected.

Bookkeeper.

Salary.

Make rules and regulations.

SEC. 3. That the State board of control shall, at the expiration of the term of the present commissioner, and at the expiration of every two years thereafter, appoint a commissioner, which appointment shall be submitted to the senate at its next session for its approval; said commissioner shall be believed by the State board of control to be an abstainer from intoxicants, and shall, under such rules and regulations as may be made by the State board of control, furnish all intoxicating liquors for lawful sale in this State to such persons as may be designated as dispensers thereof, to be sold as hereafter prescribed in this act. Said commissioner shall reside and have his place of business in the city of Columbia, in this State, and hold his office two years from his appointment, and until another be appointed in his stead. He shall be subject to removal for cause by the State board of control. He shall qualify and be commissioned the same as other State officers, and shall receive an annual salary of $1,900, payable from the dispensary fund upon the warrant of the State board of control. He shall be allowed a bookkeeper, who shall be paid in the same manner a salary of $1,200, and such other assistants as in the opinion of the board of control may be deemed necessary. He shall not furnish to the county dispensers any intoxicating or fermented liquors, except such as have been tested by the chemist of the South Carolina College and declared to be pure and free from poisonous, hurtful, and deleterious matter: *Provided*, That said board of control shall have authority to appoint such assistants as they may find necessary to assist the chemist of the South Carolina College in making the analyses required by this act; and the said board of control may fix such reasonable compensation, if any, as they may deem proper for the services rendered by such chemist or such assistants. Each county dispenser shall remit to the State treasurer all moneys accruing to the State from the sale of liquors under such rules as may be prescribed by the State board of control, and the State treasurer shall keep a separate account with said fund, from which the State board of control shall draw from time to time upon warrants, or in such manner as they may provide, the amount necessary to pay the expenses incurred in conducting the business. All rules and regulations governing the said commissioner or county dispensers in the performance of any of the duties of his office, where the same are not provided for by law, shall be prescribed by the State board of control. The State commissioner shall, before entering upon the duties of his office, execute a bond to the State treasurer, with sufficient sureties, to be approved in the same manner as the bonds of other State officers, in the penal sum of $10,000, for the faithful performance of the duties of his office. In all purchases or sales of intoxicating liquors made as contemplated in this act, the State board of control shall cause a certificate to be attached to each and every package containing said liquors when the same is shipped to the State commissioner from the place of purchase, or by State commissioner to the county dispensaries, certified by their official signatures and seal, which certificate shall state that liquors contained in said packages have been purchased by the State board of control for sale and use within the State of South Carolina, under the laws of said State, and shall also cause to be attached to all such liquors the certificate of the chemist of the South Carolina College that samples of the same have been tested as required by this act; and without such certificates any package containing liquors which shall be shipped from place to place within the State, or delivered to the consignee by any railroad, express company, or other common carriers, or be found in the possession of any common carrier, shall be regarded as contraband, and may be seized without warrant for confiscation, and such common carrier shall be liable to a penalty of $500 for each offense, to be recovered against said common carrier in any court of competent jurisdiction by summons and complaint, proceedings to be instituted by the solicitor of any circuit with whom evidence may be lodged by any officer or citizen having knowledge or information of the violation; and any person attaching or using such certificate without the authority of the State board of control, or any counterfeit certificate, for the purpose of securing the transportation of any intoxicating liquors within this State in violation of law, shall, upon conviction thereof, be punished by a fine of not less than $500 and imprisonment in the penitentiary for not less than one year for each offense.

Bond of commissioner.

Packages to have on them certificates.

Liquors without certificates to be seized.

SEC. 4. The State commissioner shall, before shipping any liquors to dispensers, except lager beer, cause the same to be put into packages of not less than one-half pint nor more than five gallons, and securely seal the same; and it shall be unlawful for the dispenser to break any of such packages or open the same for any reason whatsoever. He shall sell the package only, and no person shall open the same on the premises: *Provided*, This section shall not apply to malt liquors shipped in cases or kegs, or bottles thereof shipped in barrels; and such malt liquors may be sold by the county dispenser in such quantities, of not less than 1 pint, as he may see proper: *Provided*, The same shall not be drunk on the premises. Dispensers shall open their places of business and sell only in the daytime, under such rules as may be made by the State board of control, or by the county board of control, with approval of the State board of control.

How liquors must be shipped and sold.

SEC. 5. It shall be the duty of the State board of control to appoint a county board of control, composed of three persons, believed by the said board not to be addicted to the use of intoxicating liquors. The persons so appointed shall hold their office for the term of two years, and until their successors are appointed, and shall be subject to removal for cause by the State board of control. Said county board of control shall make such rules as will be conducive to the best management of the sale of intoxicating liquors in their respective counties: *Provided*, All such rules shall be submitted to the State board and approved by them before adoption. The members of the county board of control shall qualify and be commissioned as are other county officers without fees therefor.

County board of control.

SEC. 6. Applications for positions of county dispenser shall be by petition, signed and sworn to by the applicant, and filed with the county board of control at least twenty days before the meeting at which the application is to be considered, which petition shall state the applicant's name, place of residence, in what business engaged, and in what business he has been engaged two years previous to filing petition; that he is a qualified elector of this State and a resident of the county; that he has never been adjudged guilty of violating the law in relation to intoxicating liquors, and is not a keeper of a restaurant or place of public amusement, and that he is not addicted to the use of intoxicating liquors as a beverage. The appointment shall be made only on condition that the applicant shall execute to the county treasurer a bond in the penal sum of $5,000, with good and sufficient sureties, conditioned that he will well and truly obey the laws of the State of South Carolina, now or hereafter in force, in relation to the sale of intoxicating liquors; that he will pay all fines, penalties, damages, and costs that may be assessed or recorded against him for violations of such laws during the term for which said appointment is made, and will not sell intoxicating liquors at a price other than that fixed by the State board of control. Said bond shall be for the use of the State and county or any person or persons who may be damaged or injured by reason of any violation on the part of the obligor of the law relating to intoxicating liquors purchased or sold during the term for which said appointment is made. The said bond shall be deposited with the county treasurer, and suit thereon shall be brought at any time by the solicitor or any person for whose benefit the same is given; and in case the conditions thereof, or any of them, shall be violated, the principal and sureties thereon shall also be jointly and severally liable for all civil damages, costs, and judgments that may be obtained against the principal in any civil action brought by wife, child, parent, guardian, employer, or other person under the provision of the law. All other moneys collected for breaches of such bond shall be distributed as other funds arising from the dispensary. Said bond shall be approved as other official bonds for the county.

County dispensers; how appointed.

Bond.

Suit may be brought on bond, by whom.

SEC. 7. There may be one or more county dispensers appointed for each county, the place of business of each of whom shall be designated by the county board, but the State board of control must give consent before more than one dispenser can be appointed in any county; and when the county board designates a locality for a dispensary, twenty days' public notice of which shall be given, it shall be competent for a majority of the voters of the township in which such dispensary is to be located to prevent its location in such township by signing a petition or petitions, addressed to the county board, requesting that no dispensary be established in that township. The county board may in its discretion locate a dispensary elsewhere than in an incorporated town in the counties of Beaufort and Horry, and no others, except such as are authorized by special act of the general assembly: *Provided, however*, That any county, town, or city wherein the sale of alcoholic liquors was prohibited by law prior to July 1, 1893, may secure the establishment of a dispensary within its borders in the following manner: Upon petition signed by one-fourth of the qualified voters of such county, town, or city, wishing a dispensary therein, being filed with the county supervisor or town or city council, respectively, they shall order an election, submitting the question of dispensary or no dispensary to the qualified voters of such county, town, or city, which election shall be conducted as other special elections; and if a majority of the ballots cast be found and declared to be for a dispensary, then a dispensary may be established in said county, town, or city: *Provided*, That dispensaries may be established in the counties of Williamsburg, Pickens, and Marion, and at Seneca and other towns now incorporated in Oconee County, without such election or compliance with the other requirements of this act: *Provided*, That nothing in this act contained shall be so construed as to prohibit persons resident in counties which shall elect to have no dispensary from procuring liquors from dispensaries in other counties, or county dispensers from shipping same to their places of residence under proper labels or certificates: *Provided further*, That nothing in this act shall be construed to repeal an act entitled "An act to allow the opening of dispensaries in Pickens and Oconee counties," approved December 18, 1894.

County dispensaries; how located.

How cities and towns may secure dispensaries.

SEC. 8. If the application for the position of dispenser be granted, the appointment shall not be made until the applicant shall make and subscribe an oath, before some officer authorized by law to administer oaths, which shall be indorsed upon the bond, to the effect and tenor following: "I, ——, do solemnly swear (or affirm) that I will well and truly perform all and singular the conditions of the within bond, and keep and perform the trusts confided in me to purchase, keep, and sell intoxicating liquors. I will not sell, give, or furnish to any person any intoxicating liquors otherwise than is provided by law, and especially I will not sell or furnish intoxicating liquors to any minor, intoxicated person, or persons who are in the habit of becoming intoxicated; and I will make true, full, and accurate returns to the county board of control, on the first Monday of each month, of all certificates and requests made to or received by me, as required by the law, during the preceding month; and such returns show every sale and delivery of such liquors made by me, or for me, during the month embraced therein, and the true signature to every request received and granted; and such returns shall show all the liquors sold or delivered to any and every person as returned." Upon taking said oath and the oath required by the constitution, and filing bond as hereinbefore provided, the county board of control shall authorize him to keep and sell intoxicating liquors as in this act provided; and every appointment so made shall specify the building, giving the street and number or location, in which intoxicating liquors may be sold by virtue of the same, and the length of time in which the same shall be in force, which in no case shall exceed twelve months. Appointments made under this act shall be deemed trusts reposed in the recipients thereof, not as a matter of right, but of confidence, and may be revoked upon sufficient showing, by order of the county board of control; and upon the removal of any county dispenser, or upon the demand of the county board of control, he shall immediately turn over to the county board of control all liquors and other property in his possession belonging to the State or county. Said county board of control shall be charged with the duty of prosecuting the county dispenser or any of the employees who may violate any of the provisions of this act. On the death, resignation, or removal of a county dispenser, or expiration of his term of office, the county board shall appoint his successor.

Oath of dispensers.

Bond of dispensers.

County board to prosecute dispensers.

SEC. 9. The county board of control shall use as their office the office of the county supervisor of their county, and shall elect one of their number as chairman and a clerk of the said county board of control. The county board shall preserve as a part of the records and files of their office all petitions, bonds, and other papers pertaining to the appointment of dispensers and keep suitable books in which bonds shall be recorded. The books shall be furnished by the county like other public records. The county board of control shall designate or provide a suitable place in which to sell the liquors. The members of the county board of control shall meet once a month, or oftener, on the call of the chairman, and each member of the board shall receive a per diem of two dollars, and five cents mileage each way; but they shall not receive compensation for more than thirty days in any one year, except in the county of Charleston, where they shall not receive compensation for more than sixty days in any one year, and in Barnwell County not more than fifty days in any one year. They shall, upon the approval of the State board of control, employ such assistants for the county dispenser as may be necessary. The dispenser and his assistants shall receive such compensation as the State board of control may determine. All profits, after paying all expenses of the county dispensary, shall be paid, one-half to the county treasurer and one-half to municipal corporation in which it may be located, such settlements to be made quarterly: *Provided*, That if the authorities of any town or city, in the judgment of the State board of control, do not enforce this law, the State board may withhold the part going to the said town or city, and use it to pay State constables or else turn it into the county treasury. All moneys received by the county dispenser belonging to the State shall be forwarded on Monday of each week to the State treasurer, and at the same time the county dispenser shall forward to the State board of control a duplicate statement of the remittance so made to the State treasurer. On the same day of each week the county dispenser shall deposit with the county treasurer the portion of all the moneys received by him belonging to the county and to the municipal authorities in which the dispensary is located. The county treasurer shall give his receipt therefor and hold the same until the quarterly settlements heretofore provided for is had. The quarterly settlements herein provided for shall be made on the fourth Monday in the months of March, June, September, and December in each year. Such settlements shall be made in the presence of the county auditor, who shall make a memorandum of the items thereof and forward the same to the State board of control. The mayor or intendant of the city or town in which the dispensary is located may also extend such settlement: *Provided*, That in counties where dispensaries are established in other than incorporated cities or towns, the county shall get all profits that would otherwise go to such cities and towns: *Provided*, That in the county of Barnwell the clerk of the board of county commissioners shall be the clerk of the board of control.

Office of county board and clerk.

Records.

Meeting of county boards.

Compensation of dispensers.

Location of dispensaries in towns and cities.

Quarterly settlements.

SEC. 10. Before selling or delivering any intoxicating liquors to any person, a request must be presented to the county dispenser, printed or written in ink, dated of the true date, stating that he or she is of age, and the residence of the signer, for whom or whose use it is required, the quantity and kind required, and his or her true name; and the request shall be signed by the applicant in his own true name and signature, attested by the county dispenser or his clerk, who receives and files the requests. But the requests shall be refused, if the county dispenser filling it personally knows the person applying is a minor, that he is intoxicated, or that he is in the habit of using intoxicating liquors to an excess; or if the applicant is not so personally known to said county dispenser, before filling said order or delivering said liquor, he shall require the statement of a reliable and trustworthy person of good character and habits, known personally to him, that the applicant is not a minor and is not in the habit of using intoxicating liquors to excess.

Requests for liquor; how made and to whom refused.

SEC. 11. Request for purchase of liquor shall be made upon blanks furnished by the county auditor, in packages of one hundred each, to the county dispensers from time to time as the same shall be needed, and shall be numbered consecutively by the auditor. The blanks aforesaid shall be furnished to the county auditor by the State board of control, in uniform books like bank checks, and the date of delivery shall be indorsed by the county auditor on each book, and receipt taken therefor and preserved in his office. The dispenser shall preserve the application in the original form consecutively by the auditor. When return therefor is made, the county auditor shall indorse thereon the date of return, and file and preserve the same, to be used in the quarterly settlements between such dispenser and the county treasurer. All unused or mutilated blanks shall be returned or accounted for before other blanks are issued to such county dispenser.

Form of requests.

SEC. 12. On or before the 10th day of each month, each dispenser shall make full returns to the county auditors of all requests filled by him and his clerks during preceding month, upon blanks to be furnished by the State board of control for that purpose, and accompany the same with an oath, duly taken and subscribed before the county auditor or a notary public, which shall be in the following form, to wit: "I, ——, being duly sworn, state on oath that the requests for liquors herewith returned are all that were received and filled at my place of business under my permit, during the month of ——, 189—; that I have carefully preserved the same, and that they were filled up, signed, and attested at the date shown thereon, as provided by law; that said request was filled by delivering the quantity and kind of liquors required, and that no liquors have been sold or dispensed under my permit during said month, except as shown by the request herewith returned; and that I have faithfully observed and complied with the provisions of my bond and oath taken by me, thereon indorsed, and with all the laws relating to my duties in the premises."

Returns by dispensers.

SEC. 13. Upon failure of any dispenser to make returns to the auditor as herein required, it shall be the duty of said auditor to report such failure to the State board of control, and the said State board of control shall immediately order the county board to summon said delinquent dispenser to appear before them and show cause why his appointment should not be revoked. And if cause shall not be shown to the satisfaction of the county board of control, they shall immediately annul said appointment and give public notice thereof; and the circuit solicitor shall proceed to enforce the penalties prescribed in this act for such violation against said county dispensers at the next succeeding term of court in the county in which such appointment is held. And any dispenser who shall sell or dispose of any intoxicating liquors after his appointment shall have been revoked shall, upon conviction thereof, be fined not less than five hundred ($500) dollars and be imprisoned for six months. If any dispenser or his clerk shall procure any intoxicating liquors from any other person except the State commissioner, or if he or they, or any person or persons in his or their employ, or by his or their direction, shall sell, or offer for sale, any liquors other than such as have been furnished by the State commissioner, or shall adulterate, or cause to be adulterated, any intoxicating spirituous or malt liquors which he or they may keep for sale under this act, by mixing with some coloring matter, or any drug or ingredient whatever, or shall mix the same with other liquors of different kind or quality, or with water, or shall sell, or expose for sale, such liquors so adulterated, knowing it to be such, or shall change the label upon any box, bottle, or package, he or they shall be guilty of a misdemeanor, and be fined in a sum of not less than $200, or imprisonment for not less than six months. If any

Enforcement of returns in case of failure.

Dispensers to sell no liquors except that furnished by State commissioner.

Penalty.

county dispenser shall misappropriate, misuse, or otherwise wrongfully dispose of any moneys or other property belonging to the State, county, or municipality, he shall, upon conviction, be punished as in case of breach of trust with fraudulent intent. Breach of trust to misappropriate money.

SEC. 14. That any county dispenser, who, in violation of his oath of office, sells or furnishes intoxicating liquors to any minor, intoxicated person, or person who is in the habit of becoming intoxicated, or fails to make full and accurate returns as required by law, showing the true signature to every request for liquor by him received and granted, or sells liquor to any person without first requiring the written requests therefor to be filled out and signed, as provided by law or the regulations of the State board of control, that on such information given by any person with sufficient evidence, it shall be the duty of the solicitor to bring suit in the name of the county for $200 damages on the bond of the said county dispenser against the principal and sureties of said bond for each of such violations, for which said principal and sureties shall be liable jointly and severally, together with all costs and judgments pertaining to the suit. And on judgment given against him, the said county dispenser shall be immediately deprived of his office as dispenser, and his principal and sureties aforesaid shall remain further liable, jointly and severally, to the extent of their bond, to all civil damages, costs, and judgments which may be obtained against the principal in any civil action brought by wife, child, parent, guardian, employee, or other person, under the provisions of the law: *Provided*, That if the said county dispenser can show to the satisfaction of a jury by way of defense that the said intoxicating liquor was obtained from him by the infant, intoxicated person, or persons in the habit of becoming intoxicated, by fraudulent and deceitful representations, the person making such fraudulent and deceitful representations shall be guilty of a misdemeanor, and be fined in a sum of not less than $200, or imprisonment for not less than six months. Dispensers law liable to damages. Duty of solicitor to bring action. Penalty for making fraudulent representations to obtain liquor.

SEC. 15. No person, firm, association, or corporation shall manufacture for sale, or keep for sale, exchange, barter, or dispense any liquors containing alcohol for any purpose whatsoever, otherwise than is provided in this act. Any person, firm, association, or corporation desiring or intending to manufacture or distill any liquors containing alcohol within this State shall first obtain from the State board of control a permit or license so to do. In the case of distillers, such permit or license shall not be granted or renewed except on petition signed in person by a majority of the resident freeholders in the city, town, or township in which it is proposed to locate distillery. And it shall be unlawful for any such person, firm, association, or corporation to manufacture or distill any liquors containing alcohol within this State without having such permit or license. Any violation of the terms of the permit or license shall authorize and warrant the seizure of the product on hand at any distillery or place where liquors containing alcohol are manufactured: *Provided*, The United States has no lien or claim upon the same. And in the application for a permit or license to manufacture liquors containing alcohol, the applicant shall give the State full power, upon any violation of this act, to seize and take possession of any product on hand at the distillery or place where such applicant shall manufacture such liquors, and shall authorize the State to pay the United States Government the tax upon the same if unpaid, and to dispose thereof as provided herein for contraband goods. Every package, barrel, or bottle of such liquor shipped beyond the limits of this State shall have thereon the certificate of the State board of control allowing same, otherwise it shall be liable to confiscation, and the railroad carrying it shall be punished as in section 3: *And provided*, That any person shall have the right to make wine for his or her own use from grapes or other fruits. The inspector appointed by the State board of control, as herein provided, shall have the right to enter and examine, at any and all times not forbidden by the United States laws, any distillery, brewery, or place where liquors containing alcohol is manufactured within this State. Any manufacturer, distiller, or brewer who may refuse to allow the inspector or constable to enter and examine his place of business and its appurtenances at such times as the inspector or constable may deem proper shall forfeit his permit or license. Dispensers alone may sell. Permit to distillers. Liquor shipped out of State to have certificate attached. Right to make wine for use. Inspector.

SEC. 16. Every dispenser shall keep a strict account of all liquors received by him from the State commissioner, in a book kept for that purpose, which shall be subject at all times to the inspection of the circuit solicitor, any peace officer or grand juror of the county, or of any other citizen, and such book shall show the amount and kind of liquors procured, the date of receipt and amount sold, and the amount on hand of each kind for each month. Such book shall be produced by the party keeping the same, to be used as evidence on trial of any prosecution against him, on notice duly served that the same will be required as evidence. Account book of dispenser.

SEC. 17. The payment of the United States special tax as a liquor seller, or notice of any kind in any place of resort, or in any store or shop, indicating that alcoholic liquors are there sold, kept, or given away, shall be held to be prima facie evidence that the person or persons paying said tax and the parties displaying such notices are acting in violation of this act; and unless said person or parties are selling under appointment as prescribed by this act, they shall be punished by a fine of not less than $100 nor more than $500, or by imprisonment for a term of not less than three months nor more than twelve months. Conviction in the United States courts of illicit sales of liquors shall be taken as prima facie evidence of violation of the provisions of this act, and any distiller or manufacturer of liquors containing alcohol so convicted in the United States courts shall, by reason of conviction, forfeit the permit or license granted him by the State board of control, in addition to the other penalties herein provided. United States special tax prima facie evidence of illegal sales.

SEC. 18. Licensed druggists conducting drug stores and manufacturers of proprietary medicines are hereby authorized to purchase of dispensers of the counties of their residence intoxicating liquors (not including malt) for the purpose of compounding medicines, tinctures, and extracts that can not be used as a beverage. The dispenser shall not charge such licensed druggist more than ten per cent net profits for liquors so sold. Such purchaser shall keep a record of the uses to which the same are devoted, giving the kind and quantity so used, and quarterly they shall make and file with the county auditor and with the county board of control sworn reports, giving a full and true statement of the quantity and kinds of such liquors purchased and used, the uses to which the same have been devoted, and giving the name of the dispenser from whom the same was purchased, and the dates and quantities so purchased, together with an invoice of each kind still in stock and kept for such compoundings. If said licensed druggist shall sell, barter, give away, or exchange, or in any manner dispose of said liquors for any purpose other than authorized by this section, he shall, upon conviction, forfeit his license, and be liable to all penalties, prosecutions, and proceedings at law and in equity provided against persons selling without authority, and upon such conviction the clerk of the court shall, within ten days after such judgment or order, transmit to the board of pharmaceutical examiners the certified record thereof, upon receipt of which the said board shall strike the name of the said druggist from the list of pharmacists and revoke his certificate: *Provided*, That nothing herein contained shall be construed to authorize the manufacture or sale of any preparation or compound under any name, form, or device which may be used as a beverage which is intoxicating in its character: *And provided further*, That the State commissioner shall be authorized to sell to manufacturing chemists and wholesale druggists alcohol by the barrel at not exceeding ten per cent above the net cost. Ten per cent net profit charged. Penalty for selling, etc., by druggist. Sell alcohol by barrel.

SEC. 19. If any person shall make any false or fictitious signature, or sign any name other than his or her own to any paper required to be signed by this act, without being authorized to do so, or make any false statement in any paper, request, or application signed to procure liquor under this act, the person so offending shall be guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not more than $25 or be imprisoned not more than thirty days. False signatures, statements, etc. Penalty.

SEC. 20. If any dispenser or his clerk shall make false oath touching any matter required to be sworn to under the provisions of this act, the person so offending shall, upon conviction, be punished as provided by law for perjury. If any county dispenser shall procure any intoxicating liquors from any other person than the State commissioner, or make any false return to the county auditor, or use any request for liquors for more than one sale, in any such case he shall be deemed guilty of a misdemeanor, and upon conviction be punished by a fine of $500 or six months' imprisonment. False oaths and illegal acts of dispensers.

SEC. 21. Every person who shall, directly or indirectly, keep or maintain by himself, or by associating or combining with others, or who shall in any manner aid, assist, or abet in keeping or maintaining any clubroom or other place in which any intoxicating liquors are received or kept for use, barter, or sale as a beverage, or for distribution or division among the members of any club or association by any means whatever, and every person who shall receive, barter, sell, assist, or abet another in receiving, bartering, or selling any alcoholic liquors so received or kept, shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be punished by a fine of not less than $100 nor more than $500, or by imprisonment for a term not less than three months nor more than twelve months: *Provided*, That the State board of control shall have the power, upon a proper showing, and under such rules as they may adopt, to exempt hotels where tourists or health seekers resort from being considered nuisances or as violating this act by reason of any manager of such hotels to dispensing liquors bought from the dispensary, by the bottle, either night or day; but before any such exemption shall be granted the State board of control shall require the manager of such hotel to give a good and sufficient bond in the penal sum of $3,000, conditioned for the observance of all the rules, regulations, and restrictions prescribed and imposed by the said board, and with all the requirements of this act, and it shall be lawful for any constable or officer thus employed under this act to enter such hotel and search it for contraband liquors at any time, day or night, without a warrant. Liquor at clubs prohibited. Provisions as to hotels. May search hotels.

SEC. 22. All places where alcoholic liquors are manufactured, sold, bartered, or given away in violation of this act, or where persons are permitted to resort for the purpose of drinking alcoholic liquors as a beverage, or where alcoholic liquors are kept for sale, barter, or delivery in violation of this act, are hereby declared to be common nuisances, and any person may go before any magistrate in the county and swear out an arrest warrant on personal knowledge or on information and belief, charging said nuisance, giving the names of witnesses against the keeper or manager of such place and his aids and assistants, if any, and such magistrate shall direct such arrest warrant either to the sheriff of the county or to any special constable, commanding said defendant to be arrested and brought before him to be dealt with according to law, and shall issue a search warrant in which the premises in question shall be particularly described, commanding such sheriff or constable to thoroughly search the premises in question and to seize all alcoholic liquors found thereon and dispose of them as provided in section 31, and to seize all vessels, bar fixtures, screens, bottles, glasses, and appurtenances apparently used, or suitable for use, in retailing liquors, to make a complete inventory thereof, and deposit the same with the sheriff. That under the arrest warrant the defendant shall be arrested and brought before such magistrate, and the case shall be disposed of as in case of other crimes beyond his jurisdiction, except that when he commits or binds over the parties for trial to the next term of court of general sessions for the county, he shall make out every paper in the case in duplicate and file one with the clerk of the court for the county, and immediately transmit the other to the solicitor of the circuit, whereupon said solicitor shall at once apply to any circuit judge at chambers within that circuit, or to the nearest circuit judge, if there be none in that circuit, for an order restraining the defendants, their servants or agents, from Liquor returned, sorts declared to be nuisances. Restraining order.

keeping, receiving, bartering, selling, or giving away any alcoholic liquors until the further order of the court. Such circuit judge is hereby authorized, empowered, and required to grant the said restraining order without requiring a bond or undertaking, upon the hearing or receipt by him of said papers from the court of the said magistrate by the hands of the solicitor; and any violation of said restraining order before the trial of the case shall be deemed a contempt of court, and punished as such by said judge or court, or any other circuit judge, as for the violation of an order of an injunction. Upon conviction of said defendants of maintaining said nuisance at the trial, they, or any of them, shall be deemed guilty of a misdemeanor, punishable by imprisonment in the county jail for a term of not less than three months, or a fine of not less than $200, or both, in the discretion of the court, and the restraining order shall be made perpetual. The articles covered by the inventory, which were retained by the sheriff, shall be forfeited to the State and sold, and the net proceeds sent to the State treasurer, and the sheriff shall forthwith proceed to dispose of the alcoholic liquors covered by said inventory, as provided for in this act, as when other liquors are seized.

Violation of order a contempt.

Penalty.

Liquors seized as hereinbefore provided, and the vessels containing them, shall not be taken from the custody of the officers in possession of the same by any writ of replevin or other process while the proceedings herein provided are pending.

No suit shall lie for damages alleged to arise by seizure and detention of liquors under this act. Any person violating the terms of any restraining order granted in such proceedings shall be punished for contempt by a fine of not less than $200 nor more than $1,000, and by imprisonment not less than ninety days nor more than one year.

In contempt proceedings arising out of the violation of any injunction granted under the provisions of this act the court, or, in vacation, any judge thereof, shall have power to try summarily and punish the party or parties guilty, as required by law. The affidavits upon which the attachment for contempt issues shall make a prima facie case for the State. At the hearing upon the charge of contempt evidence may be oral or in the form of affidavits, or both.

The defendant shall not necessarily be discharged upon his denial of the fact stated in the moving papers.

The clerk of court shall, upon the application of either party, issue subpœnas for witnesses, and, except as above set forth, the practice in such contempt proceedings shall conform as nearly as may to the practice in the court of common pleas.

That when any solicitor neglects or refuses to perform any duty, or to take any steps required of him by any of the provisions of the preceding section, or by any of the provisions of this act, the attorney-general, on his own motion or by request of the governor, shall in person or by his assistant, proceed to the locality and perform such neglected duty, and take such steps as are necessary in the place of such solicitor, and at his discretion to cause a prosecution to be instituted, not only in the matter so neglected, but also a prosecution against the solicitor for malfeasance or misfeasance in office, or for official misconduct, or for other charges justified by facts, and to pursue the prosecution to the extent of a conviction and dismissal from office of any such solicitor.

Duty of attorney-general when solicitor neglects his duty.

And in such event the attorney-general shall be, and is hereby, authorized and empowered to appoint one or more additional assistants, who shall each have while actually employed the same compensation, to be paid from the litigation fund of the attorney-general. Any duty herein imposed upon a solicitor may be performed with equal force and effect by the attorney-general, or other person authorized by him to perform such duty.

SEC. 23. The manager of every registered distillery of liquor in this State shall report quarterly to the State board of control, showing the number of gallons of each kind of liquor on hand, manufactured, or disposed of during the quarter; and if the said report fail to correspond with the return of said distiller to the United States revenue collector of this State, or it is shown that said manager has disposed of liquor contrary to this act, said distillery shall be deemed to be a common nuisance, and the said manager and his aiders and assistants and the premises shall be proceeded against as in this act provided as to places where liquors are sold contrary to this act.

Distillers to report quarterly to State board.

SEC. 24. In all places where liquors are unlawfully kept or stored, the same not being kept in an open house or exposed to view, and a search being necessary, upon affidavit to that effect, or on information and belief that contraband liquor is in such a place, a search warrant may be issued by a justice, judge, or magistrate, or mayor or intendant of a city or town, to whom application is made, empowering a constable, or any person who may be deputized, to enter the said place by daytime or in the nighttime, and to search and examine the said premises for the purpose of seizing the said contraband liquors therein concealed, kept, or stored, which said liquor when so seized shall be disposed of as hereinafter provided.

Search warrant; by whom issued; disposition of liquor seized.

SEC. 25. That any of the liquors set forth in section 1 of this act which are contraband may be seized and taken without warrant by any constable, sheriff, or policeman, while in transit or after arrival, whether in possession of a common carrier, depot agent, express agent, private person, firm, corporation, or association, and reported to the State commissioner at once, who shall dispose of the same as hereinafter provided: *Provided*, That liquors purchased outside the State, owned and conveyed as personal baggage, shall be exempt from seizure when the quantity does not exceed one gallon.

When seizures may be made without warrant.

SEC. 26. That the possession of said illicit liquors is hereby prohibited and declared unlawful, and any obligation, note of indebtedness, contracted in their sale or transportation is declared to be absolutely null and void, nor shall any action or suit for the recovery of the same be entertained in any court in this State.

Possession of illicit liquors prohibited.

SEC. 27. That the proceedings against liquor so illegally kept, stored, sold, delivered, elsewhere than at his or her residence, transported or being transported, shall be considered a proceeding in rem, unless otherwise herein provided.

Proceedings in rem.

SEC. 28. That the carriage, transportation, possession, removal, sale, delivery, or acceptance of any of the said liquors or liquids in any package, cask, jug, box, or other package, under any other than the proper name or brand known to the trade as designating the kind and quality of the contents of the casks, packages, or boxes containing the same, or the causing of such carriage, transportation, possession, removal, sale, delivery, or acceptance, shall work the forfeiture of said liquors or liquids, and casks or packages, and the person or persons so offending, knowingly, be subject to pay a fine of not less than $100, nor more than $500, or imprisonment for the term of not less than six months, nor more than one year, and the wrongful name, address, mark, stamp, or style on such liquor when seized shall be considered evidence prima facie of guilt. The books and way bills of the common carrier may be examined to trace said liquors to the shipper, who shall be liable, upon conviction, in a like penalty.

Transportation or possession of falsely branded packages.

SEC. 29. That all constables, deputy constables, sheriffs, magistrates, or municipal policemen shall have the right, power, and authority, and it shall be their duty, whenever they are informed or suspect that any such suspicious package in possession of a common carrier contains alcoholic liquors or liquids, to detain the same for examination for the term of twenty-four hours, without any warrant or process whatever. Any constable, deputy constable, sheriff, or magistrate who shall neglect or refuse to perform the duties required by this act shall be subject to suspension by the governor. Any sheriff or magistrate seizing any alcoholic liquors or liquids, as required by this section, shall be paid one-half the value of said liquors or liquids so soon as the same shall have been received at the State dispensary, approved, and disposed of according to law.

Powers of constables to detain suspicious packages.

SEC. 30. That any interference by any person with, obstruction or resistance of, or abusive language to, any officer or person in the discharge of the duties herein enjoined, or the use of abusive language by any such officer or person to any other person or persons, shall be deemed a misdemeanor, and the person or persons so offending shall, upon conviction, be punished by a fine of not less that $100 nor more than $500, or imprisoned for a term of not less than three months nor more than twelve months.

Interference with officers forbidden.

SEC. 31. In all cases of seizure of any goods, wares, merchandise, or any other property, hereafter or heretofore made as being subject to forfeiture under any provisions of this act or any former act, which, in the opinion of the officer or person making the seizure, are of the appraised value of fifty dollars or more, the said officer or person shall proceed as follows: First. He shall cause a list containing a particular description of the goods, wares, or merchandise seized to be prepared in duplicate, and an appraisement thereof to be made by three sworn appraisers to be selected by him, who shall be respectable and disinterested citizens of the State of South Carolina, residing within the county wherein the seizure was made. Said list and appraisement shall be properly attested by the said officer or person and the said appraisers, for which service each of the said appraisers shall be allowed the sum of one dollar per day, not exceeding five days, to be paid by the State board of control. Second. If the said goods are believed by the officer making the seizure to be of less value than fifty dollars, no appraisement shall be made. The said officer or person shall proceed to publish a notice for three weeks, in writing, at three places in the county where the seizure was made, describing the articles and stating the time and place and cause of their seizure, and requiring any person claiming them to appear and make such claim within thirty days from the date of the first publication of such notice. Third. Any person claiming the liquors or other property so seized as contraband within the time specified in the notice may file with the State board of control a claim stating his interest in the articles seized, and may execute a bond to the State board of control, in the penal sum of $500, with sureties, to be approved by the said State board of control, conditioned that in the case of condemnation of the articles so seized the obligors shall pay all the costs and expenses of the proceedings to obtain such condemnation; and upon the delivery of such bonds to the State board of control, he shall transmit the same with the duplicate list or description of the goods seized to the solicitor of the circuit in which such seizure was made, and the said solicitor shall prosecute the case to secure the forfeiture of said contraband liquors or liquids in the court having jurisdiction. Fourth. If no claim is interposed and no bond given within the time above specified, such liquors shall be forfeited without further proceedings, and the State commissioner shall have the said liquors tested by the State chemist, and, if pure, shall furnish the same through the State dispensary. If not pure, the same shall be destroyed by the chemist of the South Carolina College, who shall make a report to the State board of control of the amount and kinds of liquors so destroyed: *Provided*, That in seizures in quantities less in value than fifty dollars of such illicit liquors or liquids, the same may be advertised with other quantities at Columbia by the State board of control, and disposed of as hereinbefore provided: *Provided further*, That the claimants of such liquors may give bond in $100 as when the value is fifty dollars or over, and shall bear the burden of showing before a magistrate that they have complied with the law, and that the liquor is not liable to seizure.

Proceedings when goods or personal property is seized.

Bond to be given by claimant.

Liquors forfeited.

When value $50 or under.

SEC. 32. That all fermented, distilled, or other liquors or liquids containing alcohol, transported into this State, or remaining herein for use, sale, consumption, storage, or other disposition, shall, upon introduction and arrival in this State, be subject to the operation and effect of this law to the same extent and in the same manner as though such liquors or liquids had been produced in this State.

Liquors on arrival in the State to be subject to its laws.

SEC. 33. That no person, except as provided in this act, shall bring into this State, or transport from place to place within this State, by wagon, cart, or other vehicle, or by any other means or mode of carriage, any liquor or liquids containing alcohol, under a penalty of $100, or imprisonment for thirty days, for each offense, upon conviction thereof, as for a misdemeanor. Any servant, agent, or employee of any

Penalty for transporting liquors in vehicles, except as herein provided.

persons, corporations, or associations doing business in this State as a common carrier, or any person whatever (except an officer seizing or examining the same), who shall remove any intoxicating liquors from any railroad car, vessel, or other vehicle of transportation, at any place other than the usual and established stations, wharves, depots, or places of business of such common carriers within some incorporated city or town where there is a dispensary, or who shall aid in or consent to such removal, or attempt to remove, shall, upon conviction, be sentenced to pay a fine of not less than $100 nor more than $500, or imprisonment for a term of not less than three months nor more than twelve months: *Provided*, That said penalty shall not apply to any liquor in transit when changed from car to car to facilitate transportation across the State: *Provided*, That this section does not apply to liquors purchased from a dispensary, and bearing the proper label or certificate. All liquors in this State, except dispensary liquors and those passing through this State, consigned to points beyond this State, shall be deemed contraband, and may be seized in transit without warrant. And any steamboat, sailing vessel, railroad, express company, or other common carrier transporting or bringing into this State, for sale or use therein, except by the dispensary, shall suffer a penalty of $500 and costs for each offense, to be recovered by the solicitor of the circuit or the attorney-general by an action brought therefor in any court of competent jurisdiction. The State constable, sheriff, municipal police, or any lawful constable may enter any railroad car, or express car, or depot, or steamboat, or other vessel, without warrant, and make search for such contraband liquors, and may examine the waybills and freight books of said common carriers, and anyone interfering with or resisting such officer shall be punished by a fine of not less than $100 nor more than $500, or imprisonment for a term of not less than three months nor more than twelve months.

Liquors in transit.

Officer may enter and search cars.

SEC. 34. That any person detected openly or in the act of violating any of the provisions of this act shall be liable to arrest without warrant: *Provided*, A warrant shall be procured within a reasonable time thereafter.

Arrest of open violators.

SEC. 35. That in case of conviction of violations of any of the sections of this act where punishment is not especially provided for, the person or persons or corporations so convicted shall be punished in the discretion of the court trying the same. All alcoholic liquors, other than domestic wines, which do not have on the packages in which they are contained the label and certificates going to show that they have been tested by the chemist and purchased from a State officer authorized to sell them are hereby declared contraband, and on seizure will be forfeited to the State, as provided in section 31: *Provided*, That this section shall not apply to liquor held by the owners of registered stills in bonded warehouses. Persons having liquor which they wish to keep for their own use may throw the protection of the law around the same by furnishing an inventory of the quantity and kinds to the State commissioner and applying for certificates to affix thereto.

Punishment for violation of forbidden acts.

Protection may be had for liquor stored.

Any person affixing, or causing to be affixed, to any package containing alcoholic liquor, any imitation stamp or other printed or engraved label or device than those furnished by the State board of control, shall, for each offense, be liable to a penalty of ten days' imprisonment or $25 fine.

Imitation stamps prohibited.

SEC. 36. Every person who dispossesses or rescues from a constable or other officer, or attempts so to do, any alcoholic liquor taken or detained by such officer charged with the enforcement of this law, shall, upon conviction, be imprisoned not less than three months nor more than twelve months, or pay a fine of not less than $100 nor more than $500.

Rescue from officer.

SEC. 37. Any person handling contraband liquor in the nighttime, or delivering the same, shall be guilty of a misdemeanor, and on conviction shall be punished by imprisonment for not less than three months nor more than twelve months, or by a fine of not less than $100 nor more than $500.

Handling contraband liquor at night.

SEC. 38. Any wagon, cart, boat, or any other conveyance, together with horses, mules, or other animal or animals, and harness accompanying the same, transporting liquors at night, other than regular passenger or freight steamers and railway cars, shall be liable to seizure and confiscation, and to that end the officer shall cause the same to be duly advertised and sold, and the proceeds sent to the State treasurer.

Transportation by vehicle at night the same.

SEC. 39. Every dispenser, when he sells a package containing liquor, shall put a cross mark in ink on the label or certificate thereon, extending from the top to the bottom and from side to side. When any liquor is seized because it has not the necessary certificates and labels required by this act, the burden of proof shall be upon the claimant of said spirits to show that no fraud has been committed and that the whisky is not contraband.

Labels to be canceled by dispenser.

SEC. 40. That any railroad, steamboat, express company, or other common carrier shall incur a penalty of treble the invoice price of any alcoholic liquors lost or stolen in transit to or from the dispensary, whether shipped as released or not, such penalty to be recovered by action in any court of competent jurisdiction.

Common carrier liable to treble value of goods lost.

SEC. 41. It shall be the duty of sheriffs, deputy sheriffs, and constables, having notice of the violation of any of the provisions of this act, to notify the circuit solicitor of the fact of such violation, and to furnish him the name of any witness within their knowledge by whom such violation can be proven. If any such officer or solicitor shall wilfully fail to comply with the provisions of this section, he shall, upon conviction, be fined in a sum not less than $100 nor more than $500, and such conviction shall work a forfeiture of the office held by such person; and the court before whom such conviction is had shall, in addition to the imposition of the fine aforesaid, order and adjudge the forfeiture of his said office.

Officers to notify solicitors.

SEC. 42. That in any indictment for the sale of intoxicating liquors it shall be competent to charge a series of sales on the same or on divers days up to the finding of the true bill to one person, or to different persons, naming one and stating the others to be unknown, in the same court, as was formerly the practice in indictments for retailing liquor without license in this State, and the prosecuting officer shall not be required to elect which particular sale he will rely on, but may offer proof of all, and proof of any one or of all the sales will sustain a verdict: *Provided*, Upon a trial and conviction or acquittal, no other bill of indictment will lie for any sale occurring prior to bill found on the case tried, and the punishment shall be in such case as for one sale: *Provided further*, That this section shall not be so construed as to prevent the prosecuting officer from giving out several bills of indictment for several sales in the first instance, if he thinks best to do so.

Competent to charge divers or different days.

SEC. 43. That whenever in this act it is provided that process shall issue upon an affidavit based on information and belief, the affidavit shall contain a statement setting forth the sources of information, the facts, and grounds of belief upon which the affiant bases his belief: *Provided*, That it shall not be necessary to set forth the sources of information, the facts and grounds of belief, in the affidavit upon which a warrant of arrest shall issue, but it shall only be necessary in cases of search warrants.

Affidavits may be on information and belief.

SEC. 44. That Chapter I, Title VII, of the Code of Civil Procedure of this State, entitled "Of provisional remedies in civil actions," shall not apply to any officer or person having duties to perform under this act, and in no case shall an action lie against any such officer or person for damages to person or property as provided in said chapter.

Actions against officers acting under this law.

SEC. 45. The governor shall have authority to appoint one or more State constables at a salary of not more than $2 per day and such expenses as the governor may deem proper when on duty, and two chief constables at not more than $3 each per day and such expenses as the governor may deem proper, and also one or more detectives at reasonable compensation, to see that this act is enforced, the same to be paid from the dispensary fund in the same manner as the salary of the State commissioner.

Governor may appoint State constables; pay of.

SEC. 46. That this act shall be a public act, and shall go into effect immediately upon its approval by the governor, and that all acts or parts of acts inconsistent with this act be, and are hereby, repealed.

A public act.

SEC. 47. The State board of control elected under this act shall not take charge until April 1, 1896.

State board of control goes into office.

Approved March 5, 1897.

Mr. DAVIS and others addressed the Chair.

The PRESIDENT pro tempore. The Chair feels obliged to recognise the Senator from Pennsylvania.

Mr. QUAY. I intended to ask unanimous consent to proceed to the consideration of a public-building bill, but as I understand the Senator from Iowa [Mr. ALLISON] desires to proceed with the tariff bill, I will not make the request.

STENOGRAPHER FOR COMMITTEE ON FOREIGN RELATIONS.

Mr. DAVIS submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Foreign Relations be authorized to employ a stenographer, who shall be paid at the rate of $100 a month.

DUTIES ON WOOL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

Mr. MANTLE. If the Senator from Iowa will yield to me just a moment to make an announcement, I desire to state that I should like to address the Senate some morning this week, say on Friday morning, at the conclusion of the routine business, upon the woolen schedule of the proposed tariff law. I do not understand that it is essential or necessary that I should wait in this matter until that schedule of the bill is reached. I desire to submit some statistics in reference to the whole question, and perhaps it would be better that I should submit my remarks in advance, before that schedule is reached for consideration.

THE TARIFF BILL.

The PRESIDENT pro tempore. The Senator from Iowa moves that the Senate proceed to the consideration of the bill known as the tariff bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. STEWART. Before we proceed further with the bill, I should like to give notice of an amendment which I shall propose. I ask that it be read at the desk, because I want to get it before the Senate for consideration. It is quite an important matter.

The PRESIDENT pro tempore. The Senator from Nevada asks unanimous consent that the amendment which he proposes at some stage of the proceedings to offer to the bill may be read. Is there objection? The Chair hears none. The Secretary will read the amendment.

The Secretary read as follows:

First. It shall be the duty of the Secretary of the Treasury to maintain an available reserve in the Treasury of as nearly as practicable one hundred and twenty-five millions, all forms of available money in the Treasury receivable for any public dues to be considered as belonging to such reserve.

Second. Whenever there shall be in the Treasury a surplus of five millions over the amount of one hundred and twenty-five millions fixed as the normal Treasury balance, it shall be the duty of the Secretary of the Treasury to purchase and retire bonds of the United States to the amount which can be purchased with the surplus in the Treasury above one hundred and twenty-five millions, such purchases to be made under regulations similar to those heretofore adopted and employed for the purchase of United States bonds from surplus revenue.

Third. Whenever there shall be a deficiency in the reserve of one hundred and twenty-five millions, the Secretary of the Treasury shall have authority, in his discretion, to issue and cover into the Treasury a sufficient amount of United States notes to make good the deficiency, which notes shall be in the same form and have the same legal-tender qualities in all respects as the United States notes now outstanding, and whenever there shall be a surplus in the Treasury over the one hundred and twenty-five millions reserve, such surplus shall be applied to the redemption, retirement, and cancellation of an amount of United States notes equal to the amount theretofore issued under the provisions of this act, but such redemption of United States notes shall not in any way interfere with the purchase of outstanding United States bonds when there is a surplus of five millions in the Treasury above the one hundred and twenty-five millions of reserve, as hereinbefore required.

Mr. STEWART. Mr. President, personally I would prefer the amendment of which I gave notice some days ago; but inasmuch as that amendment involves some questions in connection with the currency, and perhaps might involve collaterally the silver question, I have thought best to strip it of everything but the main question, which is a regulation of the reserve in the Treasury.

The amendment provides that there shall be kept, as nearly as practicable, $125,000,000 reserve, which shall consist of all kinds of money, in the Treasury receivable for any public dues. It will not be questioned but that that is an ample reserve, probably very much too large; but inasmuch as there might be some question in regard to the reserve already in existence, it may be well to fix that amount.

The amount now in the Treasury is about $230,000,000. That is too much idle money in the Treasury. It is injurious in many ways to pile up a surplus of this kind. It leads to extravagance in appropriations, and it takes the money from circulation and deprives the Government of the interest on that money. So no one can contend for a large idle reserve. This provides against that. It also puts it in the power of the Secretary of the Treasury, if there should be a deficiency in the reserve, or when the reserve should fall below $125,000,000, in his discretion, to issue Treasury notes to make up the deficiency, or so much of it as he shall deem necessary.

But the Secretary is required, whenever there is a surplus in the Treasury, to retire an amount of Treasury notes equal to the notes theretofore issued under this act, so that there shall be no permanent increase of our paper circulation. It is only to be temporary to bridge over an emergency, and it is left to his discretion whether to issue any notes or not. But when the surplus over $125,000,000 amounts to $5,000,000, it is his duty in all cases to invest the same in United States bonds and retire them and save interest.

I introduce the amendment and call attention to it at this time because the country has been largely excited over the question which was raised by an interview with Mr. DINGLEY, the chairman of the Committee on Ways and Means in the other House. It was attributed to him that he stated the object of the bill was to accumulate revenue and keep it in the Treasury and thereby retire the greenbacks. I understand that he claims he did not make any such statement. He has qualified it, at all events, and it has been qualified by a great many. Such a scheme has been opposed almost universally.

Still there is an anxiety with regard to it, and as there is a possibility that a large revenue will come into the Treasury under this bill, Senators in voting for the bill or in voting upon amendments and in considering the bill will feel embarrassed lest there might a large surplus come into the Treasury and be retained there, as $100,000,000 or more is unnecessarily retained there now. That would be a calamity; and to avoid it and make action on this bill perfectly free, I shall ask for the adoption of an amendment of this kind, which will secure a reserve as large as any man's conscience ought to allow him to ask, and at the same time will place it in the power of the Secretary, if there should be a temporary deficiency, to supply that deficiency by a temporary issue of Treasury notes. A temporary loan of that kind, to be retired as soon as the revenues of the Government come in to retire it, has been the practice of the Government since its foundation, it being his duty to retire a like amount as soon as there is a surplus revenue. In that way we never will be caught without funds. It will be always in the power of the Secretary of the Treasury to provide funds until Congress shall levy more taxes.

It seems to me that we should have a definite understanding about this matter before the tariff bill is passed and before the important amendments which involve large revenues are acted upon, so that Senators will not be embarrassed with regard to voting upon questions, fearing that there may be a large reserve which would lie in the Treasury, where a large amount is now lying, to the detriment of the community.

I hope the amendment will be considered on its merits. If any Senator can suggest that it interferes with any theory that he has on the money question, I should like to hear the suggestion. I have tried to avoid all interference with the gold and the silver question and come right down to the question of reserve, whether we should retire our present circulation by allowing it to lie idle in the Treasury. It is to meet that issue that I have offered the amendment.

The PRESIDENT pro tempore. The reading of the bill will be proceeded with.

The Secretary resumed the reading of the bill at "Schedule C.—Metals and manufactures of," on page 31.

The next amendment of the Committee on Finance was, in paragraph 118, page 31, line 24, after the word "ore," to strike out "and" and insert "also;" so as to make the paragraph read:

SCHEDULE C.—METALS AND MANUFACTURES OF.

118. Iron ore, including manganiferous iron ore, also the dross or residuum from burnt pyrites, 40 cents per ton: *Provided*, That in levying and collecting the duty on iron ore no deduction shall be made from the weight of the ore on account of moisture which may be chemically or physically combined therewith.

Mr. QUAY. I will be glad if the committee will allow that paragraph to go over.

The PRESIDENT pro tempore. Is there objection to the paragraph being passed over for the present? The Chair hears no objection, and the paragraph will be passed over.

The Secretary read the next paragraph, as follows:

119. Iron in pigs, iron kentledge, spiegeleisen, ferro-manganese, ferro-silicon, wrought and cast scrap iron, and scrap steel, $4 per ton; but nothing shall be deemed scrap iron or scrap steel except waste or refuse iron or steel fit only to be remanufactured.

The next amendment of the Committee on Finance was, in paragraph 120, page 32, line 10, after the word "iron," to insert "square iron;" and in line 13, after the word "diameter," to strike out "and square iron not specially provided for in this act;" so as to make the paragraph read:

120. Bar iron, square iron, rolled or hammered, comprising flats, not less than 1 inch wide nor less than three-eighths of 1 inch thick, round iron not less than seven-sixteenths of 1 inch in diameter, six-tenths of 1 cent per pound.

Mr. JONES of Arkansas. The rates proposed by the House bill and concurred in by the Senate committee are the same as the rates in the Wilson bill. There is no proposed amendment that I see except formal amendments that go along through these items. At the same time it seems to me proper that the Senate should not lose sight of the facts connected with this matter.

It appears to me that there can be no occasion for making a pretense of putting a protective tariff on these paragraphs which is absolutely inoperative, which accomplishes nothing. The trade is in the hands of the American people. We to-day are the largest producers of pig iron in the world. We are exporting pig iron, steel billets, and iron rails in open competition with the balance of the world.

The statement was made, I remember, some years ago that pig iron could be produced at Birmingham, Ala., at somewhere between five and six dollars a ton; that they were selling iron at $8.50 a ton; and that iron of the same character was sold on the other side at a considerably larger sum.

I have collected together some statistics and facts bearing on this matter that I propose to present to the Senate without taking the time to make an argument. It is important that these facts should be known to illustrate the absurdity of proposing to keep up taxes which amount absolutely to nothing.

I hold in my hand a statement as to the number of tons of crude manufactures of iron and steel that have been exported from the United States within the last few months. It is a very striking statement. There was of pig iron exported from the United States last July 3,023 tons; in August, 2,001 tons; in September, 6,804 tons; in October, 8,063 tons; in November, 8,755 tons; in December, 17,335 tons; in January of this year, 10,191 tons; in February of this year, 15,971 tons; in March of this year, 21,280 tons, making a total from last July until the end of March of 94,423 tons of pig iron exported from the United States, at an average price of $14.37 a ton.

There were imported into the United States in the same time 19,039 tons, while we exported 94,423 tons. As I have said, the average price of the pig iron exported was $14.37 a ton, and the average price of that which we imported was $22.84 a ton, showing that it was only a small quantity of high-priced and high-class iron that was imported into this country for special purposes because it could not be bought here.

What, then, is the use, Mr. President, of us being guilty of this piece of mummery of putting a tax on pig iron to prevent the competition of outside pig-iron producers?

Of bar iron we exported in last July 200¼ tons; in August, 126¼ tons; in September, 199¼ tons. I will not read the statement by the month, but the total export from July of last year until the end of March was 2,078 tons, at an average cost of $39.56 per ton, and we imported 11,775 tons, at a cost of $43.75 a ton, showing again what I called the attention of the Senate to in the first instance, that it was a higher rate of goods and a more expensive

character of goods that were imported; and yet the characteristic running all through this tariff bill, from one end of it to the other, is to have the highest possible rates of taxation on the lowest and cheapest class of goods and the lowest rates on the highest class of goods.

Of band, scroll, and hoop ingots, bars, etc., of steel—without reading the monthly shipments all through—there were 26,995 tons exported, worth on an average $27.90 per ton, while we imported 12,621 tons, at an average cost of $38.38 per ton, against $27.10 per ton for what we exported. Of nails we shipped abroad during the nine months I have named 11,126 tons and imported none—not a single dollar's worth.

Of iron plates we shipped 1,347 tons, and of steel plates 2,010 tons, and imported 3,721 tons of both.

Of wire we exported 34,852 tons, at an average cost of $44.25, and we imported 2,329 tons, at an average cost of $131.50.

Of steel rails we exported in July last 4,962 tons; in August, 11,750 tons; in September, 17,034 tons; in October, 4,692 tons; in November, 6,045 tons; in December, 10,925 tons; in January, 1897, 7,761 tons; in February, 7,214 tons; in March, 9,477 tons, making a total for the nine months of 79,860 tons of steel rails, at an average cost of $23.28, while we imported 7,758 tons, at an average cost of $26.77. I will insert the entire table in my remarks.

The table referred to is as follows:

Number of tons of the following crude manufactures of iron and steel exported by the United States in each of the nine months ending with March 31, 1897.

[Tons of 2,240 pounds.]

Name of article.	1896.						1897.			Total for the nine months.	Value per ton or per pound.	Imports for the nine months.	Value per ton or per pound.
	July.	August.	September.	October.	November.	December.	January.	February.	March.				
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.		Tons.

Steel rails	4,962	11,750	17,034	4,692	6,045	10,925	7,761	7,214	9,477	79,860	23.28	7,758	26.77

Mr. JONES of Arkansas. Mr. President, these exportations occurred in this country while the steel-rail trust was maintaining during the whole of that year the price of $28 a ton to domestic buyers of steel rails. It is perfectly well known to the Senate what the effect of breaking up the steel-rail trust was. In December and January last the price, which had been held by the trust uniformly from the beginning of the year to the end of it, was $28 a ton without fluctuation in any month of the year. The price suddenly went down to practically $14 a ton, and steel rails were sold for $17 a ton in a number of markets, and I understand were offered to consumers at a point which would make the sale actually about $14 a ton as a result of the dissolution of the pool, as a result of the breaking up of the steel-rail trust, which has been maintained under the laws which have been in existence on the statute books.

I have here in my hand a copy of the Bulletin, a high authority in iron matters, dated January 1, 1897. This is Mr. Swank's paper, a man whose authority will not be questioned by any iron man. Here are the average monthly prices of iron and steel in the United States in 1896 given on a number of different articles. Steel rails at the mills are quoted in January, February, March, and every month down to December at $28 a ton. The statement from the Bulletin is as follows:

AVERAGE MONTHLY PRICES OF IRON AND STEEL IN THE UNITED STATES IN 1896.

In the following table we give the average monthly prices of leading articles of iron and steel in Pennsylvania markets in 1896 per gross ton of 2,240 pounds, except for bar iron, which is quoted by the pound. The monthly averages are obtained from weekly quotations:

Months.	Old iron T rails, at Philadelphia.	No. 1 foundry pig iron, at Philadelphia.	Gray forge pig iron, at Philadelphia.	Gray forge pig iron, lake ore, at Pittsburg.	Bessemer pig iron, at Pittsburg.	Steel rails, at mills, in Pennsylvania.	Steel billets, at mills, at Pittsburg.	Best refined bar iron from store, at Philadelphia.	Best refined bar iron, at Pittsburg.
								Cents.	Cents.
January	$14.25	$13.56	$11.55	$10.90	$11.81	$28.00	$16.60	1.45	1.25
February	14.75	13.50	11.50	11.00	12.95	28.00	17.69	1.40	1.25
March	15.00	13.45	11.30	10.92	12.25	28.00	17.19	1.35	1.21
April	14.87	13.25	11.19	10.85	13.32	28.00	19.80	1.40	1.20
May	14.43	12.85	11.00	10.79	12.83	28.00	19.55	1.40	1.20
June	14.00	12.75	11.00	10.62	12.47	28.00	19.42	1.40	1.21
July	14.00	12.75	10.90	10.37	12.12	28.00	19.50	1.40	1.20
August	14.00	12.75	10.75	9.63	10.91	28.00	19.22	1.40	1.20
September	13.50	12.50	10.75	9.50	11.31	28.00	19.41	1.40	1.20
October	12.75	12.50	10.81	9.87	11.71	28.00	19.73	1.40	1.20
November	13.94	12.81	11.12	10.34	12.46	28.00	19.80	1.40	1.22
December	14.50	12.75	11.25	9.94	11.54	28.00	18.00	1.40	1.25

At the close of the year Bessemer pig iron at Pittsburg was quoted at $11.15 to $11.25, and Bessemer steel billets at Pittsburg were sold at $16. During December the price of steel rails for 1897 was reduced from $28 to $25 at Pennsylvania mills. Prices of other articles named in the table also fell during December. We begin the new year 1897 with iron and steel prices in all lines almost as low as they have been at any time during the present depression, which we date from May, 1893.

I have a clipping from a newspaper giving the report of R. G. Dun & Co. of the date of February 12, dealing with the question of the price of steel rails. It is as follows:

NEW YORK, *February 12.*

R. G. Dun & Co.'s weekly review of trade to-morrow will say:

"No other event of the week approaches in importance the disruption of the steel-rail pool. In two days after it, a greater tonnage of rails was probably purchased than the entire production last year, reported as 800,000 tons, and instead of $23 in December and $25 in January, $17 is now the price at which works East and West are seeking orders, the Carnegie Company even selling at $17, Chicago delivery. These sales will employ many thousand hands, with an important decrease in the cost of track laying or renewals to railroads.

"Even more important is the result that reconstruction of the billet pool will be impossible as long as the contest over rails continues, and the manufacturer of structural forms, bars, rods, wire, nails, tin plates, and many other products has a chance to secure cheap material. In the near future also is the struggle between the two great companies producing Mesaba iron ore, one allied with the Illinois Steel and the other with the Carnegie Company, which is expected to bring about lower prices for ore and to push many mines to their utmost capacity. But in the war of rival interests, wages are already reduced by some large concerns."

Thus, Mr. President, we see a statement made by R. G. Dun & Co. that the result of the dissolution of this steel-rail combination was to bring the price of steel rails down at once about 50 per cent. If they are seeking orders for steel rails at $17 a ton, I ask where is there any justification for any law now to be put on the statute books under which the people of the United States shall be compelled to pay them $28 a ton because they have made a combination?

There are a number of other facts bearing upon this matter that I wish to present to the Senate, and it may as well be done now as at any other time. I read from the Bulletin of February 20, Mr. Swank's journal, which is an authority amongst iron men everywhere:

DISSOLUTION OF THE RAIL MAKERS' ASSOCIATION.

The Rail Makers' Association, which was organized at Long Branch, N. J., on August 13, 1885, and which, with slight interruptions, has been in active existence ever since, was dissolved early last week, owing to internal dissensions. The original purpose of the association was to equitably distribute among the mills represented all orders for steel rails, so as to avoid ruinous competition. This object was afterwards extended to include the regulation of prices. The dissolution of the association was preceded by a heavy cut in the prices of steel rails, and was at once followed by other cuts, some sales having been made as low as $17 at Pittsburg and Chicago. The price at eastern Pennsylvania mills has been firmly held at about $20. At the present writing the market has steadied considerably. A conservative estimate places the sales of rails during the last two weeks at not more than 600,000 tons. We give below the comments of several of our cotemporaries on the break in the association and the causes which have led to it.

The Iron Age, in its issue for February 11, says:

"The steel-rail pool is broken. It has been the greatest combination in the iron trade and has enjoyed the longest life. It had a checkered career in its earlier days. The ties which bound the works together were very loose, and from time to time new competitors arose. The pool was reorganized in the fall of 1893, after a very sharp fight, in which prices dropped close to $19 at Eastern mill.

"In November, 1894, a meeting of the rail manufacturers was held at Chicago, during which an agreement was reached after negotiations had been broken off again and again. As usual, the allotment was figured on the monthly shipments, an excess over allotment involving a tonnage payment, distributed among the mills which had not shipped their quota. The penalty was increased from $2 to $2.50 per ton, and the agreement covered all rails 45 pounds or over, T or girder rails, except for export. An extra of $1 was to be charged for all rails over 35 feet and less than 45 feet in length, and $2 per

ton on all rails over 45 feet in length. All girder rails were quoted at $2 per ton extra.

"This agreement was subsequently modified, however, through the negotiations which grew out of the completion of the new mill at Lorain. In April an agreement was entered into with the Johnson Company by which the association divided with that company equally the whole tonnage of T and girder rails for electric railroads. In turn the company undertook not to make any T rails for steam roads for the year 1895.

"Early in September, 1895, negotiations were initiated for the year 1896. Other meetings took place in October and November, and it was finally agreed to continue the association on the lines laid out for 1895."

There are a number of other comments taken from leading iron journals, which I will not take the time of the Senate to read. There is, however, one paragragh that I desire to read, taken from the Philadelphia Ledger, which says:

During all of the years of the pool the Illinois and Carnegie companies worked together and were on the closest of terms. The Illinois Company was not known as a member of the pool, but was represented in the association by the Carnegie Company. So far as rails are concerned, the two companies worked together as one, dividing the apportionment as best suited their convenience—

Mark this—

making an arbitrary cost price and dividing the profits.

This comes from the friends of these people, showing that they were making arbitrary prices and dividing profits, and yet by a rate of taxation put into tariff bills and kept up these people have been enabled to continue this system of practical robbery of the people of this country, because the foreign rails were simply barred out from American commerce.

As a part of this whole case, I may as well present, while we are on the subject, some facts bearing on the foreign trade. I have the American Manufacturer of February 12, 1897, in my hand, in which I find this report:

THE BREAK IN STEEL RAILS.

The monotony of the iron and steel trade was broken rather suddenly this week by the excitement which followed a remarkable drop in the price of steel rails. To the general public it seemed that within a few hours steel rails dropped from $25 to $17 per ton, and in some cases lower figures are reported. This is the lowest price ever reached in the American steel-rail market, and a glance over the course of prices is particularly interesting at this time.

In 1867 steel rails were first made in commercial quantities in the United States. That year they were quoted at $166 per ton. It was not until 1874 that the growing home production brought the price below $100 per ton, as that year the average figure was $94.25. In three years this figure was cut over one-half, as we find that in 1877 the rate was $45.50; but this was owing to the business depression, for in 1881 the price of steel rails advanced to $67.50. From that time, however, the decline was almost constant until 1895, when the figures were cut down to $22. In June of that year an advance to $23 was made, and before the close of the year the price had been put up to $28. This rate stood until November last, when a reduction to $25 was made, the latter price holding until a few days ago.

To follow the immense growth of the industry which has made such a reduction in cost would be quite interesting, but at this time we can speak only of the causes which led to the last big cut. It has been an open secret for some time past that there was considerable trouble in the Steel Rail Association. Of all the trade agreements made in the American market, this one has been most successful in regulating prices. At the close of last year, however, the friction had become so great that an immediate breaking up of the pool was feared, but for a time it was staved off. A few days since some of the Eastern concerns led off with a cut, which was promptly met by the West, and in a day something like $8 per ton was knocked off the price of rails. Of course such a movement could not fail to give rise to various rumors of a coming conflict between the great steel-rail producers of the country. However this may be in the future, it is plain that the first cause of the drop was the great difference between the actual price of billets and the price of rails as fixed by the pool. Since the Bessemer billet agreement collapsed, billets have been sold very low. With billets quoted below $16, it could not be reasonably expected that steel rails would hold long at $25. The sum of $9 per ton was too much between the billet and the rail, a fact which rail purchasers well understood. Hence they held back orders, confident that lower rates were inevitable. Our report of the British iron market this week shows that the highest quotation for steel rails is £4 15s., and billets are quoted at 80s. This is a difference of only 15s.—about $3.60—per ton between prices of rails and billets. In this country this difference has been as high as $9 per ton.

As to the probable effects of the break, it is more than probable that one result will be an increased movement in the market. For some time past the situation in the steel-rail trade has tended to increase the general depression. Now there will be some big buying done, and a marked activity in one branch of the trade must have a beneficial effect upon others. The sales of steel rails last year aggregated only 800,000 tons, whereas it would have taken about 2,000,000 tons to fill normal requirements. The roads badly need rails for repairs, and considering the small amount they purchased last year, with the requirements for 1897, it is evident that there will be quite a time in the rail market. It should not be thought, however, that the price will remain at anything like $15 per ton, which figure has been reported this week. Rails in the British market to-day are selling at about $22 per ton, and it is evident that the very low prices reported on this side during the past week were merely the result of a flurry. The future will be more clearly shown when the market shall have settled down and all danger of a cutthroat policy removed.

I now wish to present to the Senate some statements as to the condition of the market in England for these articles. This is the same iron paper, the American Manufacturer, under date of February 12, 1897. I read under the head of "Our English letter." There are some facts in this letter, Mr. President, that seem to me will be of unusual interest to American Senators:

OUR ENGLISH LETTER.

[From our own correspondent.]

MID-ENGLAND, *January 27, 1897.*

AMERICAN STEEL FOR THE BRITISH MARKETS.

Not until this week, for some reason or other, has the full extent of the American steel invasion of Europe, Great Britain included, seemed to flash out upon English steel masters, and the realization of some of the facts connected with it has since my last caused something like a sensation in British steel circles. The scare was first met only by the appearance of a cable in one of the London papers, from its New York correspondent, announcing that 1,800 tons of steel billets were on their way from Philadelphia to this country for delivery in Birmingham, and this was followed by another cable from Philadelphia in another journal that "negotiations were in progress with European buyers for 20,000 tons of billets at secret prices," but that "it was believed that the material could be delivered in England at £3 15s. and leave a fair margin of profit to the sellers." Now, this week we have yet a more definite statement that the steamship *Harrison* has sailed from Philadelphia for Manchester with a cargo of 2,000 tons of billets, "which are said to not about $17.50 f. o. b. steamer."

SENSATION IN ENGLISH STEEL CIRCLES.

With reiterated intelligence like this before them it has been no longer possible for English steel circles to ignore what some of your journals have rightfully termed the American steel invasion of Europe. Nevertheless the actual presence of the steel in this country has come as a great surprise to many who were not acquainted with what was going on and who had not been closely watching the efforts of your steel makers to secure orders from out of the British market. There was, of course, nothing new for them to learn on the importation of American pig iron, which, as regards hematite or foundry qualities, it is now freely admitted can be produced at prices with which English and Scotch smelters can not pretend to compete. It was certainly a new thing, however, for them to have dinned into their ears that steel billets from a country which was once our greatest customer for iron and steel was selling for delivery in the English midlands. To the unbelieving the news indeed is received as almost incredible. But

INQUIRIES BY YOUR ENGLISH CORRESPONDENT

into all the details of the business fully confirm the reports which have been published. I find that Staffordshire sheet-iron makers are already importing Messrs. Carnegie's steel tin bars for rolling down into sheets, and only to-day I have visited a works where this is going on.

Importing steel sheets to be used for tin plate from the United States into England of a better quality than is there made—

The bars are coming over here in 30-foot lengths and of 9 inches or 9½ inches wide by one-fourth or five-sixteenths inch thick, and so far seem to be giving every satisfaction. It would, however, be an advantage if your steel masters could roll them of about half the present length, since a 15-foot bar is much more suitable for our mills and is very much easier handling for all purposes, transit and cartage included. The sheets are intended for galvanizing purposes, and the firm who is using the bars is Messrs. John Lysaght, Limited, who not only owns the largest sheet-iron works in Staffordshire, but at Bristol carries on a galvanizing business which is the largest in the world. If, therefore, a firm of such standing as this can find it worth its while to use American bars, certainly others in the same line may.

AMERICAN BILLETS FOR BRITISH WIRE MILLS.

But it is not only the sheet makers of Staffordshire who are giving the American material a trial, but in South Wales and Lancashire likewise the metal is likely to get in. More than this: The Lancashire and Shropshire wire drawers are using your billets and have been for several months past, and the figure at which they are getting their billets delivered into Liverpool is, I am informed, £3 17s. 6d. per ton. Tin bars, such as the sheet makers are employing, are coming into Manchester at much the same price, and after paying railway freight of 7s. 6d. per ton, they are being delivered at railway stations in Staffordshire and at Birmingham at £4 5s. per ton, which is 7s. 6d. to 10s. per ton less than British billets are quoted on the open market. In the matter of actual sales, however, the difference between our and your price would not, I have no doubt, be quite so much as this, since our billet makers would not require the full figures here mentioned. Perhaps 5s. to 7s. 6d. per ton would more nearly represent the difference between the two.

WILL THE AMERICAN COMPETITION BE PERMANENT?

Under this head a great variety of opinions is entertained, while it is, of course, the one subject upon which steel masters here are concerned. There are those who argue that the competition will not long survive the present condition of trade in the States, and that an improvement in your own market would soon render it unprofitable for your makers to send steel over here; but against this it is borne in mind that under the new conditions of manufacture attached to iron and steel production in the Southern States, Bessemer pig can be produced at 31s. 3d. per ton and steel billets at 55s. or about £2 per ton under the minimum selling price in this country. If these estimates are well founded, it is obvious that no very exceptionally marked conditions are needed to enable American iron and steel producers to wage a serious competition with English makers even in this country, and that the American steel invasion, therefore, may have a longer life in store for it than casual observers might suppose.

UNDER PRESENT CONDITIONS, AT ALL EVENTS,

it is abundantly manifest that in certain lines your steel makers can compete with us successfully if they choose, and it is agreed on all sides that one great reason for the prices at which you can afford to supply us is not so much the temporary depression of labor and materials as the richness and abundance of the ores available and the superiority of your manufacturing appliances. It is not forgotten that the Carnegie Company is producing at its new Duquesne furnaces as much as 610 tons each of standard bessemer pig daily, at a cost of only 1,600 pounds of coke to the ton, instead of 2,000 to 2,200 pounds, as in this country. Thus in this item alone there is a saving of from 400 to 600 pounds of coke per ton. The boast of the Carnegie Company, too, that it is bent on conquering the markets of the whole world is also seriously recalled at this time.

BRITISH STEEL MASTERS' COUNTERVAILING TACTICS.

Whatever the chief reason assisting toward the present importations, it is plain to everybody that it would be a fatal mistake for English steel masters to acquiesce in the existing state of things without making a determined attempt to regain control of the market. Indeed, the billet makers are already doing this by staying to some extent the upward course of prices which was going on in the billet and tin-bar market. Some of the makers, both in South Wales, the North of England, Scotland, and elsewhere, have, I am assured, taken the alarm and are refraining from further advancing prices. Tin bars are now being offered to some consumers at the same prices as at the beginning of October, a state of things which would certainly not have prevailed were you not threatening the market, since prior to the attack by your producers billet and tin-bar prices here were going up very rapidly. Consumers welcome the American material as a check against the tall talk in which our billet and tin-bar people, being full of orders, were of late indulging, and against the big advances which these firms stated they should compel this year.

ENGLISH PROCESSES AND PLANT AT FAULT.

Another phase which the competition is developing is to enforce upon British steel makers' attention the great necessity for increased economies

in the matter of processes and plant. It is admitted that even in times like these of low prices in America and high prices on this side, and with the assistance of abnormally low freights, it ought not to be possible for steel and iron producers in the United States to send their manufactures many thousands of miles to this country at prices which defy English competition. The belief is being strongly forced upon our producers that there are cheaper methods of making iron and steel than those which are generally adopted in this country.

This letter shows, by giving illustrations, by giving the details as to sales, that American steel and iron is being shipped from the United States, paying freight across the ocean, paying the inland transportation in Great Britain, paying cartage, and all other expenses, and being laid down at the English mills at a price lower by from 3 to 7 shillings per ton than the English ironmasters quote the same article to their own people. Why, then, is there any necessity for our imposing a protective tariff to protect ourselves against the importation of English iron, of steel billets, of rail bars, of nail iron, or any kind of iron or wire? It seems to me, Mr. President, to be an absurdity.

Mr. BACON. Will the Senator from Arkansas permit me to inquire what is the relative price at which that material is held in England and in this country?

Mr. JONES of Arkansas. None of the letters I have here give the relative prices. They sell steel billets in Staffordshire, laying them down in Staffordshire at the doors of the mills, at from 3 to 7 shillings less than the English ironmasters sell them. They pay the ocean freight, they pay the insurance, they pay the internal freight, the cartage, and all the expenses of laying them down at the mills at from 3 to 7 shillings per ton less than the price the English ironmasters quote to their own consumers.

Mr. BACON. I understand that; but is the Senator prepared to say whether that is more or less than the same article is sold for here?

Mr. JONES of Arkansas. I know nothing about the domestic prices. While the steel-rail trust was in existence, I have no doubt they sold their rails at a higher price to the domestic consumer, because the agreement contained in the note which I read to the Senate a short time ago shows that lower prices were charged for rails exported than for those sold to domestic consumers. There was no limit to the price they might charge the domestic consumer.

Mr. BACON. I have no doubt of that myself, but I thought possibly the Senator might be able to give us accurate information.

Mr. JONES of Arkansas. I do not know all the facts. I was just simply mentioning that fact as a confirmation of what I was saying to the Senator from Georgia as to the rates at which these articles were selling. When they are protected by a trust, when they can make an organization so as to control the American market, they will, as they have done in every instance as to all the articles found in this schedule, sell their product cheaper abroad than they will sell it to our own people.

But the very minute you decide to dissolve their trust and break up their combination, that minute the American people get the benefit of the competition, the prices of all these articles are reduced, and they are obliged to sell to American consumers at the same prices at which they sell to foreign consumers. The wire-nail trust, as the Senator will remember, a few years ago exported an enormous quantity of wire nails, which they were selling abroad at about one-half the price charged in the United States. We could not buy nails in this country at a reasonable rate, because the wire-nail trust were able to compel our people to give them higher prices for their goods than they were worth, while when they went abroad, where they were compelled to go into the open markets of the world, they sold at about half the price the same articles were sold for to the American consumers. They sold them at practically half of what they were sold for here.

It is by this arbitrary fixing of prices that these combinations are enabled to compel our people to pay more than the goods are worth. That is the worst iniquity connected with the bill. It is the feature which makes it the most outrageous. It is one, it seems to me, which should arouse the American people from ocean to ocean and make them stamp under their feet any proposition to put it in the power of a combination to compel the American consumers not only to pay more than the goods are worth, but in many instances twice as much as the American manufacturers are willing to sell their goods for abroad.

Mr. President, I shall not detain the Senate longer. I will state that in the matter of woolen goods and cotton and iron the United States has made great strides in the last ten or twenty years. A man who has not examined the statistics is surprised to learn that we are the largest producer of pig iron on the globe. We produced more pig iron in 1895 than was produced in Great Britain, at one time considered the mistress of the world in iron production. The same thing, as I shall show before we get through the debate, is true of wool, raw cotton, and the manufacture of numerous articles. Instead of being an infant in the struggle for industrial supremacy, we are to-day a giant. Young as is the nation in years, we are supreme in more fields of industry than any other nation on the globe, and yet we are told that it is necessary for us, to enable us to hold our own in competition with other people, to put these unreasonable taxes on the articles I have mentioned.

Many of us were unwilling to have put in the Wilson bill numbers of the taxes that are found in the pending bill. I believed then that they were too high. I did not believe there was any reason for them then, and there is infinitely less reason now than at that time.

Mr. CAFFERY. Mr. President, the Senator from Rhode Island [Mr. ALDRICH] in his opening speech dwelt with some force upon the reduction of rates on iron fabrics, and instanced the decline on steel rails from $7.84 a ton under the House bill to $6.72, the Senate proposition, and asked us all to stop at that point and admire the great results of protection. Notwithstanding the Senator from Arkansas [Mr. JONES] has shown with great power and analysis the immense growth of the manufacturing industry in the United States in all iron products, notwithstanding the fact that he has shown that the fabrics of iron are to-day shipped abroad and sold in the markets of England itself at a less rate than the English can manufacture the same articles, the protectionist will still exclaim, "This is all on account of the beneficent workings of a protective tariff."

I submit that the question now is wholly aside the theoretic or academic discussion of protection. Give protection the credit of having brought the iron industry up to the point of perfection it has now attained. Does it follow that in order to keep this industry going, when it invades the markets of the world and more than competes with the most accomplished nation on the earth in these products, we must still continue to have these prohibitive rates? Is it not entirely illusory and deceptive for the Senator from Rhode Island, or Senators on the other side of the Chamber, to claim any merit from the reduction of the tariff upon an article as to which the course of trade shows the tariff to be entirely and utterly useless?

Mr. President, in connection with the iron statistics which my friend the Senator from Arkansas has introduced, I propose to read a clipping from the New York Journal of Commerce, which I cut out last night, in regard to our export trade generally. The Senator from Arkansas has dwelt upon the export of iron fabrics of the United States. Those exports, it is true, comprise a large portion of the exports of our domestic manufacture, but we have others, such as the export of wooden articles manufactured in the United States, the export of cotton goods manufactured in the United States, and a number of other exports, which swell up to an enormous sum total. This is the article which I cut from the New York Journal of Commerce and Commercial Bulletin:

WASHINGTON, *May 29, 1897.*

Another remarkable record of increase in manufacturing exports is afforded by the figures for April, which have just been completed by Chief Ford of the Bureau of Statistics of the Treasury. The exports which fall under this classification, according to the long-established practice of the Department, amounted to $24,614,318, or 31.56 per cent of the total exports of the month. The figures for the ten months of the fiscal year ending with April were increased to $224,023,016, which is 25.35 per cent of the total exports for this period. The total for the month has been surpassed only once in the recent commercial history of the United States. This was during the month of March preceding, when a great movement of imports naturally invited a counter movement of exports. The manufacturing exports of April, 1895, were only $16,304,411, so that the figures of this year show an increase of nearly 50 per cent. The proportion of manufacturing to total exports at that time was 25.49 per cent. The figures for 1896 were $21,384,730, which was 30.81 per cent of the total exports. The figures for the ten months ending with April show results in some respects even more striking. The manufacturing exports during that period in 1895 were $148,710,195, or 21.97 per cent of total exports, and in 1896 were $184,572,665, or 25.16 per cent of total exports. The remarkable record of the past three years shows an almost constant ascent month by month in the volume of manufacturing exports. The figures for the three calendar years have been as follows:

Month.	1895.	1896.	1897.
January	$14,101,738	$18,732,547	$20,622,850
February	12,221,897	17,265,164	20,298,097
March	15,576,780	19,125,795	25,874,469
April	16,304,451	21,384,730	24,014,318
May	18,144,676	22,016,909	----------
June	16,840,152	21,898,972	----------
July	17,306,192	21,553,500	----------
August	19,050,500	21,147,206	----------
September	16,352,356	21,634,784	----------
October	18,778,817	23,479,279	----------
November	17,330,143	21,639,358	----------
December	19,251,271	23,773,281	----------
Total	201,153,993	253,688,527	----------

The rapidity of the growth of exports of American manufactures has been striking since 1893. The movement which began after the crisis of that year was supposed in many quarters to be temporary, and to be due to the low prices and surfeited markets caused by reduced demand. The movement did not cease, however, with the fiscal year 1894, nor with 1895. The year 1896 showed a still ascending record which will be greatly surpassed when the figures are completed for the two remaining months of the fiscal year 1897. The total exports of manufactures for ten months of the present fiscal year have already exceeded the record of any complete fiscal year heretofore

except 1896, and the additional months of that year gave a total only $4,500,000 larger than has already been attained for 1897. The repetition during the remaining two months of the manufacturing exports of March and April will carry the total for the year to about $272,000,000. This will be a gain of $44,000,000 over the record of 1896, which itself showed a gain of $45,000,000 over the record of 1895. The following table shows the proportion of manufacturing exports to total exports for representative years since 1859, with an estimate for the year which will close on June 30 next:

Year.	Exports of manufactures.		Total exports.
	Value.	Per cent of total.	
1860	$40,345,802	12.76	$316,242,423
1870	68,277,764	15	455,208,341
1880	102,856,015	12.48	823,946,353
1885	147,187,527	20.25	726,682,946
1890	151,102,376	17.87	845,293,828
1891	168,927,315	19.37	872,270,283
1892	158,510,997	15.61	1,015,732,011
1893	158,023,118	19.02	831,030,785
1894	183,728,806	21.14	869,204,937
1895	183,595,743	23.14	793,392,590
1896	228,480,893	26.47	862,519,229
1897	272,000,000	25.01	1,079,000,000

It will be an interesting question whether the tariff legislation now pending results in diminishing American markets abroad when it takes effect. There are three ways in which this may occur—by intentional official retaliation by foreign governments, by the enhancement of the cost of our raw materials by new duties, and by the enhancement of other domestic prices which might affect the cost of manufacturing. Japan, the Argentine Republic, the German Empire, the Kingdom of Italy, and other powers have already filed courteous remonstrances against the extreme rates proposed on some of their products. Japan and the Argentine Republic have pointed out that the restriction of imports of their mattings, silks, and wool would operate to increase freight charges, cripple the merchant marine between the two countries, and diminish the tendencies to mutual exchange. Norway and the Netherlands have hinted that the same thing might occur in regard to their fish and tobacco if the House rates were retained. Notwithstanding these remonstrances, there would be perhaps a certain momentum in the trade movement once established which would prevent the immediate shrinkage in our export trade; but the discovery that we had raised the price of our boots and shoes and ceased our purchases of silks and wool would probably gradually arrest the upward movement of the export figures and finally turn them in a downward direction.

C. A. C.

Mr. President, I contend from these figures that the United States has progressed, developed, as it were, from the agricultural to the manufacturing status. It is impossible that we can look at this large export trade constantly increasing and yet place a tariff upon all raw materials or other materials necessary for the product of these goods, manufactured in America and exported abroad; but such is the case. Not only that, we are attempting, by import duties upon articles which we manufacture with much greater superiority than any other nation, to hold the home market, so that pools and combines and all unlawful combinations of that character can be resorted to and will be resorted to in order to make the American consumer pay more for the same article than the foreign consumer does when we export it.

There can be no sort of apology for any tariff whatever upon iron or iron ore. It was in order for the Republican party, when we struck the great metal schedule, to come out from the wilderness of protection in which they have been journeying for many years into the happy land of a freer trade, especially when they would hurt no American industry by it, especially when the tariff would do no good to the home manufacturer. Can anyone, after listening to the figures quoted by the Senator from Arkansas, say there is any tariff necessary upon steel billets or steel rails or pig iron or cut nails, or any of the innumerable fabrics of iron that we export abroad? A very large, in fact, the largest, portion of our exports to-day consists of iron fabrics made in America, and a large portion of it is shipped to England, a great competitor nation.

Mr. President, any reduction upon iron is a sham and a fraud. It is a kind of by-play by which the Republican managers attempt to amuse the audience, the populace. It does no good whatever. It may do and has done a great deal of harm. The history of these pools has been recited by the Senator from Arkansas. The pools kept the price of steel rails $6 or $7 higher than the rails could be sold for abroad, and were subsequently sold for. There is no necessity for the tariff, and the pretended reduction of the tariff upon iron and iron fabrics is a delusion. It is a by-play; it is a masquerade in order to deceive; but it can deceive no one when he looks at the export trade of the United States on these articles.

We have now passed many hours in the discussion of a few paragraphs in the tariff schedule on chemicals, drugs, and dyestuffs, earth and earthenware, and glassware. As yet we have not touched the fundamental principle which ought to be considered pending this discussion. My honorable friend from Rhode Island has expressed the hope that there may be no academic discussion on the folly of protection, or, as he names it, the principle of protection. I do not propose at this moment to discuss the academic features of the question.

My purpose is to promote domestic industry, to develop manufactures, and to protect American labor by resisting all taxes by which their progress will be obstructed and retarded. Among these taxes—and at this point I will have to go back to some schedules which we have passed—there are none more obnoxious than the long, complex schedule of taxes on chemicals, which lie at the very foundation of or enter as component materials into nearly every branch of work that can be or is conducted in this country. On what ground are we called upon to put a tax, really intended to be prohibitive, although not ostensibly so, on acids, on ammonia, on alkalis, on borax, and the like?

If I am rightly informed, there is no schedule in this whole bad bill or in the bad acts that have preceded it since the tariff of 1861 which costs so much for the collection of an insignificant sum, which is so complex and difficult of administration, under which the Government is so likely to be defrauded, or which presses with more subtle and malignant influence on the cost of nearly every great branch of industry in this country, eating away the small margin of profit on which modern industry now depends, than this special schedule on chemicals, drugs, and dyestuffs. No other nation so stupid, so ignorant of economic science, or governed by such disregard of the industry of the vast majority of its people has committed the folly which we are asked to commit in enacting this bill of taxes on these necessary materials which enter into the processes of all industry.

Mr. President, with all the knowledge of detail of my friend the Senator from Rhode Island [Mr. ALDRICH] and my other friend the Senator from Iowa [Mr. ALLISON], I doubt if they know much more than the name of half the articles on which they propose to levy a tax. I am sure that they do not know what the motive of those who have asked this tax is. They do not know how great or how small is the industry whose product they propose to raise in price by taxation. They do not know the wages that are earned. They do not know the uses to which many of these articles are put, except in a general way. They do not know what the burden will be, what the influence in wiping out the profits of those who consume these articles must be.

In fact, they can not answer the questions definitely and clearly and conclusively which we now propose to put to them in the further conduct of this measure. I am rash in making this statement. I know the complete mastery which my friend from Rhode Island has given to the details of this measure in the effort which he has made to steer in the middle, between the right and the wrong course, between those who would plunder the public for private gain and those who resist such measures in order to prevent the destruction of their own industry. He is a master of that detail as he is not a master of the correct principles of taxation.

I put to him and to you the fundamental question, Ought not all the taxes that the people pay be received by the Government? Have you any moral right—is it not even doubtful if you have a legal right—to pervert the power of taxation to raising prices except under the absolute necessity for getting a customs revenue? Have you a moral, if you have a legal, right to put the hand of the Government upon the property of the citizen and with the other to bestow it to sustain or build up private enterprise or to augment private incomes? That is not an academic question. That is not a question of protection. It is a question of the fundamental principles of good government put in defense of the rights of the citizens of this country. On that we take our stand, and we propose to resist every section, every paragraph, every schedule of this bill until debate has been exhausted and until every citizen of this country who has failed to get a hearing before the Committee on Ways and Means and the Finance Committee of this body shall have had a hearing, shall have had the opportunity to state his case, and shall have put in his protest against that which, according to the decision of Judge Miller in the case of People *vs.* Topeka, "is none the less robbery because it is done under the forms of law and is called taxation."

In the discussion of the bill I do not propose to follow the order of the paragraphs or schedules altogether. Wherever I can get the information, I propose to use it wherever it will fit. I propose to find out, for instance:

What number of establishments are there in this country making borate of lime?

From what is it made?

How many people are employed in these establishments?

What wages do they earn?

In what branches of industry is borate of lime made use of as a component material?

What proportion does the cost of borate of lime bear to the cost of the goods into which it enters?

What influence will the raised price of this article have upon the margin of profits in the arts in which it is used?

How many establishments are there using it?

What goods do they make?

How many people are employed in the arts in which borate of lime is used as a component material?

What are the wages in these arts?

What measures have you taken in granting a compensating tax on these goods to offset the tax on the material?

Do you expect to raise the price of the goods into which it enters?

Are any of them exported now?

What will be the influence of this raised price on the exports?

I take that special case because it has been made the matter of discussion; but you will bear in mind that as we get further on, when these questions are applied to wool, to alkalis, and to a vast number of other crude or partly manufactured materials on which, without regard to the fundamental principle of taxation, you propose to put taxes that the Government will not receive, but which will pass by perversion of the power of taxation into private pockets, you may have grave difficulties in meeting the questions which you will be forced to meet and which you will be forced to answer.

Mr. President, we have looked over the evidence which has been presented in support of this measure. We have taken note of the demands which have been made upon the Committee on Ways and Means and their submission to these demands. We note that with rare exception everyone who appeared before the Committee on Ways and Means, especially in support of this particular schedule, was trying to get the Congress of the United States to lay the hand of the Government on the property of the masses of the people, in order to pay it over to these applicants for bounties and privileges and subsidies to augment their private incomes or to sustain them in their effort to build up private enterprises.

Now, I propose to bring every man in this Senate to the question, Do you or do you not sustain the fundamental principle of just taxation, namely, that all taxes that the people pay the Government shall receive? I do not propose to let you escape on a subterfuge. If you answer yes, with a reservation, then I will put the question in another form: Do you justify putting taxes on articles of common and necessary use in the conduct of domestic industry which shall so raise the price to the consumers as to increase the cost of their products without yielding revenue to the Government, thus imposing upon them a heavy tax which the Government does not receive? The Senator from Rhode Island has made a fatal admission, that the Dingley bill—of which his present bill is but a modification—would fail to yield revenue on this very ground.

There is a final point in connection with this subject of taxation upon chemicals and the like which is of prime interest to my own section. A tax on acids and on alkalis is a tax on Southern agriculture. I am not as well informed as I might be. I desire time and to summon witnesses to bring evidence before the Senate on the destructive nature of taxes on the elements of the fertilizers, which are required more than anywhere else in the production of our cotton and our sugar. We demand that you shall not tax agriculture at its source, by granting bounties to the makers of alkalis, of acids, of potash, and of salt. All these are vital elements, and we demand that the cost of all our products shall not be increased to build up private enterprises and augment private incomes at our cost.

What we ask in our Southland is free access to the great markets of the world for our cotton, our iron, our coal, our timber, and yet more for our cotton fabrics. You of the North may demand, if you please, the perversion of the power of taxation to hold up your senile manufactures, which have been stimulated until they totter. We ask nothing for our infant manufactures of cotton and iron except that you shall not obstruct the import of the means of payment for which we wish to exchange them. We demand the right to import free of taxation all the materials and machinery on which we work, or on which we may work, in exchange for our finished fabrics; and if we need gold to build up our own banking system and render us less dependent on outside capital, we demand the right to be able to make all our fabrics and all our products without having their cost increased by tariff taxation, to the end that we may obtain the highest price in gold to sustain our own local industry.

Mr. President, I have sketched out quite a work for myself, and whether I shall be able to perform it or not depends upon a number of conditions purely personal to myself. But I enter my protest here at the threshold of the important metal schedule against any elevation of taxes upon the ordinary necessaries of life or ordinary materials that enter into the finished product of American manufactures, in order that the growth of those manufactures should not be retarded, in order that the weight of taxation should not be increased upon the backs of our people.

The PRESIDING OFFICER (Mr. BURROWS in the chair). The Secretary will read the pending amendment.

The SECRETARY. In paragraph 120, page 32, line 10, after the word "iron," insert "square iron;" and in line 13, after "diameter," strike out "and square iron not specially provided for in this act;" so as to make the paragraph read:

120. Bar iron, square iron, rolled or hammered, comprising flats, not less than 1 inch wide nor less than three-eighths of 1 inch thick, round iron not less than seven-sixteenths of 1 inch in diameter, six-tenths of 1 cent per pound.

The amendment was agreed to.

Mr. ALLISON. In line 11, after the word "flats," I move to strike out the comma.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 121, page 32, line 17, after the word "rolled," to insert "or hammered;" in line 18, before the word "of," to strike out "eight-tenths" and insert "seven-tenths;" and in line 21, before the word "of," to strike out "five-tenths" and insert "four-tenths;" so as to make the paragraph read:

121. Round iron, in coils or rods, less than seven-sixteenths of 1 inch in diameter, and bars or shapes of rolled or hammered iron, not specially provided for in this act, seven-tenths of 1 cent per pound: *Provided*, That all iron in slabs, blooms, loops, or other forms less finished than iron in bars, and more advanced than pig iron, except castings, shall be subject to a duty of four-tenths of 1 cent per pound: *Provided further*, That all iron bars, blooms, billets, or sizes or shapes of any kind, in the manufacture of which charcoal is used as fuel, shall be subject to a duty of $12 per ton.

The amendment was agreed to.

Mr. ALLISON. In line 25, after the words "duty of" and before the word "twelve," I move to insert the words "not less than;" so as to read:

Shall be subject to a duty of not less than $12 per ton.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 122, page 33, line 5, after the word "use," to strike out "six-tenths" and insert "five-tenths;" so as to make the paragraph read:

122. Beams, girders, joists, angles, channels, car-truck channels, T T, columns and posts or parts or sections of columns and posts, deck and bulb beams, and building forms, together with all other structural shapes of iron or steel, whether plain or punched, or fitted for use, five-tenths of 1 cent per pound.

The amendment was agreed to.

The next amendment was, in paragraph 123, page 33, line 7, after the word "steel," to strike out "for whatever purpose used;" in line 8, after the word "except," to insert "crucible plate steel and;" in line 15, after the word "pound," to strike out "thirty" and insert "twenty-five;" and in line 16, after the word "all," to strike out "plate" and insert "sheets or plates of;" so as to make the paragraph read:

123. Boiler or other plate iron or steel, except crucible plate steel and saw plates hereinafter provided for, not thinner than No. 10 wire gauge, sheared or unsheared, and skelp iron or steel sheared or rolled in grooves, valued at 1 cent per pound or less, five-tenths of 1 cent per pound; valued above 1 cent and not above 2 cents per pound, six-tenths of 1 cent per pound; valued above 2 cents and not above 4 cents per pound, 1 cent per pound; valued at over 4 cents per pound, 25 per cent ad valorem: *Provided*, That all sheets or plates of iron or steel thinner than No. 10 wire gauge shall pay duty as iron or steel sheets.

The amendment was agreed to.

The next amendment was, in paragraph 124, page 33, line 19, after the word "thereof," to strike out "mill irons and mill cranks of wrought iron, wrought iron for ships" and insert "1.2 cents per pound;" in line 21, before the word "forgings," to strike out "and;" in line 22, after the word "steel," to strike out "for vessels, steam engines, and locomotives, or parts thereof, and other forgings of iron or steel, or of combined iron and steel;" and on page 34, line 2, after the word "act," to strike out "1½ cents per pound: *Provided*, That no forgings of iron or steel, or forgings of iron and steel combined, shall pay a less rate of duty than 35 per cent ad valorem" and insert "35 per cent ad valorem;" so as to make the paragraph read:

124. Iron or steel anchors or parts thereof, 1.2 cents per pound; forgings of iron or steel, or of combined iron and steel, of whatever shape or whatever degree or stage of manufacture, not specially provided for in this act, 35 per cent ad valorem; antifriction, ball forgings of iron or steel, or of combined iron and steel, 45 per cent ad valorem.

The amendment was agreed to.

Mr. ALLISON. In line 6 both the comma and the hyphen after the word "antifriction" should go out.

The SECRETARY. After the word "antifriction," in line 6, strike out the comma.

The PRESIDENT pro tempore. That amendment will be agreed to, and the hyphen, too, will be stricken out.

Mr. ALLISON. That is right.

Mr. QUAY. Both the comma and the hyphen will go out.

Mr. PLATT of Connecticut. It is not a hyphen. It is a printer's mark to show that the comma is to be stricken out.

Mr. WHITE. I inquire of the Senator from Iowa whether the rate here is not changed somewhat from the Wilson rate? I believe it was 1½ cents a pound before the word "*Provided*" in the Wilson Act, and it is now all 35 per cent ad valorem. Is that a raise, or is it practically the same?

Mr. ALLISON. It is practically the same, I believe, as the Wilson rate.

Mr. WHITE. The Wilson rate provided for—

Forgings of iron or steel, or forged iron or steel combined, of whatever shape or in whatever stage of manufacture, not specially provided for in this act, 1½ cents per pound.

And then:

Provided, That no forgings of iron or steel, or forgings of iron and steel combined, by whatever process made, shall pay a less rate of duty than 35 per cent ad valorem.

Thirty-five per cent seems to have been maintained and applied to all preceding.

Mr. ALLISON. The effect of the paragraph as amended is to throw the higher-priced or more valuable steel forgings into the ad valorem clause, because at 1½ cents a pound a good many of these forgings would pay a very small duty.

The next amendment of the Committee on Finance was, in paragraph 125, page 34, line 8, after the word "Hoop" to strike out "or;" in the same line, after the word "scroll," to strike out ", or other;" in line 11, after the word "gauge," to strike out "six-tenths" and to insert "five-tenths;" in line 13, after the word "gauge," to strike out "seven-tenths" and insert "six-tenths;" and in line 15, after the word "gauge," to strike out "nine-tenths" and insert "eight-tenths;" so as to read:

125. Hoop, band, or scroll iron or steel, valued at 3 cents per pound or less, 8 inches or less in width, and less than three-eighths of 1 inch thick and not thinner than No. 10 wire gauge, five-tenths of 1 cent per pound; thinner than No. 10 wire gauge and not thinner than No. 20 wire gauge, six-tenths of 1 cent per pound; thinner than No. 20 wire gauge, eight-tenths of 1 cent per pound.

The amendment was agreed to.

The next amendment was, in paragraph 125, page 34, line 18, after the word "ties," to strike out "coated or not coated with paint or any other preparation, with or without buckles or fastenings, for baling cotton or any other commodity;" so as to make the proviso read:

Provided, That hoop or band iron, or hoop or band steel, cut to length, or wholly or partly manufactured into hoops or ties, barrel hoops of iron or steel, and hoop or band iron or hoop or band steel flared, splayed or punched, with or without buckles or fastenings, shall pay one-tenth of 1 cent per pound more duty than that imposed on the hoop or band iron or steel from which they are made.

The amendment was agreed to.

Mr. VEST. The proviso applies to what are commonly denominated cotton ties, an article of prime necessity, of course, in the South, the cotton-raising section of the country. I call the attention of the Senate to the fact that under the McKinley Act the duty upon cotton ties was two-tenths of a cent a pound. The Wilson Act made them free. But this proposed act makes the duty seven-tenths of a cent per pound, or an increase of one-half of a cent over the McKinley Act. I move to strike out the proviso for the purpose of putting cotton ties upon the free list, where they are under existing law.

Mr. President, I have but one argument to make. It is very well known that cotton production is in a very depressed condition and that the price of cotton is not such as to give any profit to those who are raising it, with a prospect of a decline in the near future greater than that in the very recent past.

Now, it does seem to me that our friends upon the other side should be willing to make cotton ties free if they desire to divest this bill of all sectional features. One of the main arguments made against the Wilson bill was that it was a sectional measure, because, amongst other things, it had put cotton ties upon the free list. If they desire now to be magnanimous in the present condition of the country, to show any sort of solicitude for the welfare of the Southern people, who are peculiarly distressed, they will put this article upon the free list, or rather allow it to remain on the free list, where it is now.

I move to strike out the proviso for the purpose of retaining cotton ties upon the free list, and upon that I shall ask for the yeas and nays.

The PRESIDENT pro tempore. The Senator from Missouri desires to strike out the entire proviso?

Mr. VEST. Yes, sir. It applies to cotton ties.

The PRESIDENT pro tempore. The Senator from Missouri moves to strike out the entire paragraph from the word "*Provided*," in line 16, to the word "made," at the end of line 24. The question is on agreeing to that amendment.

Mr. ALLISON. I suggest to the Senator from Missouri that, as is very well known, this is a great reduction upon the duty provided for in the McKinley law. The rate in the proviso is one-tenth of a cent a pound instead of two-tenths of a cent, as provided in the McKinley law.

Mr. VEST. No; it is a duty of seven-tenths, a duty of six-tenths upon the iron in the tie and then of one-tenth upon the tie, making seven-tenths altogether.

Mr. ALLISON. Very well. The McKinley rate was 1 cent a pound and two-tenths additional, so that this is about half the McKinley rate.

Mr. VEST. It is seven-tenths under this proposed act. The comparative statement shows that.

Mr. ALLISON. Well, it is seven-tenths.

Mr. VEST. It is seven-tenths of a cent.

Mr. ALLISON. Cotton ties are thinner than No. 10 wire gauge, are they not?

Mr. VEST. Yes. It is one-tenth of a cent per pound more duty than that imposed on hoop or band iron or steel, from which they are made, and that makes seven-tenths, because that is six-tenths.

Mr. ALLISON. The law of 1890 was 1.1 cents per pound, and two-tenths in addition on the same grade.

Mr. VEST. We put it on the free list in 1894.

Mr. MILLS. Mr. President, this is a very heavy burden upon the cotton growers of the country, a class of citizens who suffer more by tariff duties than any other class of people in the United States. We have made binding twine free for the farmers out in the Northwest. We give them free sacks in which to transport their wheat to foreign markets. We have helped them. We put cotton on the free list and import about $6,000,000 worth to come in competition with the cotton growers of the South; and yet we put a duty of 53 per cent on cotton ties. How much does it amount to? It takes about 11 pounds of cotton ties to each bale. On a crop of 9,000,000 bales raised in the United States it amounts to about 10 cents a bale, or a tax of $900,000 on the cotton crop of the United States.

Mr. President, this duty can not be justified upon any principle of taxation hitherto avowed by our friends on the other side. The labor cost of producing iron and steel in the United States, as shown by the census, is less than $20 on $100 worth. If you allow a tax of $20 on this article, if we were going to tax it at all, it would pay for the entire labor cost of making the product. But instead of that the committee have put on a rate of 53 per cent—$53 of tax on every $100 worth of cotton ties used for baling the cotton crop of the United States. As I said before, it amounts to about 10 cents a bale, and on a crop of 9,000,000 bales it amounts to a tax of $900,000.

Why make this distinction between the Southern planters and the Northwestern planters? Why do you give the latter free binding twine? Why do you give them free sacks in which to transport their grain to foreign markets? And why do you impose this heavy burden upon the people who grow cotton, two-thirds of whose crop must go to foreign markets for sale? That is not the case with any other product in the United States. There is no other product that engages the labor of so many people and that is so perfectly dependent upon foreign consumption as the cotton crop of the United States.

As my friend from Missouri has said, the cotton crop is dreadfully depressed at the present time; prices have been forced down from some cause or other, and if there is any community in the United States whose condition appeals to the people who are making these laws, both in the Senate and House, for kind consideration, it is the cotton growers of the United States.

Why do you put cotton on the free list? Why not tax that, too? I am not in favor of taxing cotton, but I want to see our friends act reasonably in this matter and put both cotton ties and cotton bagging on the free list. It ought to be done.

Mr. BACON. I understand the suggestion of the Senator from Missouri to be to strike out the proviso, and that his present amendment is simply intended as a preliminary to a subsequent motion to put cotton ties on the free list.

Mr. VEST. Yes.

Mr. BACON. Of course simply striking out the proviso would not accomplish that purpose.

Mr. VEST. But I gave notice that if the amendment prevails I will make a motion to put cotton ties on the free list.

Mr. BACON. The Senator gave that notice so that, in voting to strike out the proviso, it is understood that that is his intention.

I desire simply to supplement what has already been said by other Senators, by calling the attention of the Senate to the fact that cotton ties and cotton bagging, which come in under another head, relate to an industry which it is impossible in any manner to aid by any tariff duties, to wit, the production of raw cotton. While it may be conceded, if you please, as a rule, that tariff should be levied generally upon all imports, there should be an exception in the case of those articles which are necessarily used in the production of such other articles as can not be in any wise affected by a tariff duty.

It does seem to me, Mr. President, that it is due to the country that the Senators on the other side should answer the inquiry made by the Senator from Texas [Mr. MILLS]. Why is it that not only in the past, but in this particular bill, Senators who are charged with the framing of it and the party here responsible for its passage will say to the country that so far as the wheat growers are concerned they will put upon the free list the articles which it is necessary for them to use in bringing their crops to market, and that they must put this onerous duty upon articles which it is necessary for the cotton producers to use in bringing

their crops to market? I should like to know the reason. I suppose Senators have some reason for it. I should like to know for my personal information, and I think the country should have the information as to why this distinction is made. If there is a reason for it, let us know what it is, in order that it may control our action, if it is a good reason. If there is no reason for it, and if it is pure favoritism, then the country should be equally informed of the fact.

The PRESIDENT pro tempore. On his proposed amendment, the Senator from Missouri [Mr. VEST] demands the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. FAULKNER (when his name was called). I am paired with the Senator from West Virginia [Mr. ELKINS]. If he were present, I should vote "yea."

The PRESIDENT pro tempore (when Mr. FRYE's name was called). The Senator from Maine [Mr. FRYE] is paired with the senior Senator from Maryland [Mr. GORMAN].

Mr. HANNA (when his name was called). I am paired with the Senator from Utah [Mr. RAWLINS].

Mr. FAULKNER (when Mr. LINDSAY'S name was called). The Senator from Kentucky [Mr. LINDSAY] is absent attending to official duties at Annapolis under an order of the Senate, and he is paired with the Senator from Michigan [Mr. MCMILLAN]. At my request, the Senator from Michigan has transferred his pair to the Senator from Rhode Island [Mr. ALDRICH], so that the Senator from Michigan can vote.

Mr. VEST (when his name was called). I have a general pair with the Senator from Minnesota [Mr. NELSON]. I should vote "yea" if he were present.

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER]. I take this opportunity to state that I am paired with that Senator for the remainder of this week.

The roll call was concluded.

Mr. BURROWS. Has the senior Senator from Louisiana [Mr. CAFFERY] voted?

The PRESIDENT pro tempore. The Chair is informed that he has not voted.

Mr. BURROWS. I am paired with that Senator.

Mr. WALTHALL. I desire to announce that the Senator from Delaware [Mr. GRAY] is paired with the Senator from Illinois [Mr. CULLOM].

Mr. BATE. I wish to state that my colleague [Mr. HARRIS of Tennessee] is absent, and is paired with the Senator from Vermont [Mr. MORRILL]. Both Senators are absent on account of sickness, and they are paired.

Mr. MALLORY. I am paired with the Senator from Vermont [Mr. PROCTOR].

Mr. VEST. If there is any difficulty about a quorum——

The PRESIDENT pro tempore. The Chair is informed that there is a quorum voting.

Mr. VEST. All right.

The result was announced—yeas 21, nays 28; as follows:

YEAS—21.

Bacon,	Harris, Kans.	Mills,	Turpie,
Bate,	Heitfeld,	Mitchell,	Walthall,
Berry,	Jones, Ark.	Pettus,	White.
Chilton,	Kyle,	Roach,	
Clay,	McEnery,	Smith,	
Cockrell,	McLaurin,	Tillman,	

NAYS—28.

Allison,	Fairbanks,	Jones, Nev.	Pritchard,
Baker,	Foraker,	Lodge,	Sewell,
Cannon,	Gallinger,	McBride,	Shoup,
Carter,	Gear,	McMillan,	Spooner,
Chandler,	Hale,	Perkins,	Stewart,
Clark,	Hawley,	Platt, Conn.	Thurston,
Davis,	Hoar,	Platt, N. Y.	Wetmore.

NOT VOTING—40.

Aldrich,	Frye,	Mantle,	Proctor,
Allen,	George,	Martin,	Quay,
Burrows,	Gorman,	Mason,	Rawlins,
Butler,	Gray,	Morgan,	Teller,
Caffery,	Hanna,	Morrill,	Turner,
Cullom,	Hansbrough,	Murphy,	Vest,
Daniel,	Harris, Tenn.	Nelson,	Warren,
Davis,	Kenney,	Pasco,	Wellington,
Elkins,	Lindsay,	Penrose,	Wilson,
Faulkner,	Mallory,	Pettigrew,	Wolcott.

So Mr. VEST's amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 126, page 35, line 2, after the words "flat rails," to strike out "seven-twentieths" and insert "three-tenths;" and in line 3, after the word "steel," to strike out "one-half" and insert "four-tenths;" so as to make the paragraph read:

126. Railway bars, made of iron or steel, and railway bars made in part of steel, T rails, and punched iron or steel flat rails, three-tenths of 1 cent per pound; railway fish plates or splice bars, made of iron or steel, four-tenths of 1 cent per pound.

The amendment was agreed to.

The next amendment was, in paragraph 127, page 35, line 5, after the word "black," to strike out "including all iron or steel commercially known as common or black taggers iron or steel" and insert "of whatever dimensions;" so as to read:

127. Sheets of iron or steel, common or black, of whatever dimensions, and skelp iron or steel, valued at 3 cents per pound or less, thinner than No. 10 and not thinner than No. 20 wire gauge, seven-tenths of 1 cent per pound; thinner than No. 20 wire gauge and not thinner than No. 25 wire gauge, eight-tenths of 1 cent per pound; thinner than No. 25 wire gauge and not thinner than No. 32 wire gauge, 1.1 cents per pound; thinner than No. 32 wire gauge, 1.2 cents per pound; corrugated or crimped, 1.1 cents per pound.

The amendment was agreed to.

Mr. JONES of Arkansas. I was not able to follow the comparative statement through the reading of that paragraph, and I inquire of the Senator from Iowa whether the rates there fixed are the same as those in the Wilson law?

Mr. ALLISON. The same.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 127, line 17, after the word "all," to insert "sheets of;" in the same line, after the word "black," to strike out "sheet;" and in line 18, before the word "steel," to strike out "sheet;" so as to make the proviso to the paragraph read:

Provided, That all sheets of common or black iron or steel not thinner than No. 10 wire gauge shall pay duty as plate iron or plate steel.

The amendment was agreed to.

The next amendment was, in paragraph 128, page 35, line 23, after the word "zinc," to strike out "or;" in line 24, after the words "spelter, or," to strike out "other metals" and insert "lead;" in line 25, after the word "pay," to strike out "one-fourth" and insert "two-tenths;" and after the word "than," at the end of line 25, on page 35, to strike out "the rates imposed by the preceding paragraph upon the corresponding gauges or forms of common or black sheet or taggers iron or steel" and insert "if the same was not so galvanized or coated;" so as to make the paragraph read:

128. All iron or steel sheets or plates, and all hoop, band, or scroll iron or steel, excepting what are known commercially as tin plates, terne plates, and taggers tin, and hereinafter provided for, when galvanized or coated with zinc, spelter, or lead, or any alloy of those metals, shall pay two-tenths of 1 cent per pound more duty than if the same was not so galvanized or coated.

The amendment was agreed to.

Mr. JONES of Arkansas. I should be glad to have the Senator from Iowa explain paragraph 128, and whether it differs at all from the existing law. I think in some of the articles there is a reduction, but I am not sure that there is in all.

Mr. ALLISON. It is a reduction from one-fourth to two-tenths.

Mr. WHITE. The Wilson law provided for a fourth of a cent.

Mr. ALLISON. Yes, and this provides for two-tenths. It is a small reduction.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 129, at the beginning of the paragraph, in line 5, to strike out "sheet" and insert "sheets of;" in the same line, before the word "steel," to strike out "sheet;" in line 6, after the word "designated," to strike out "two" and insert "one and seven-eighths;" in line 7, after the word "that," to strike out "plate or sheet or taggers" and insert "plates or sheets of;" in line 10, after the word "which," to strike out "has" and insert "have;" in line 12, before the word "cold-rolled," to strike out "is" and insert "are;" in line 13, after the word "pay," to strike out "one-fourth" and insert "two-tenths;" and in line 14, after the word "sheet," to strike out "or taggers;" so as to make the paragraph read:

129. Sheets of iron or steel, polished, planished, or glanced, by whatever name designated, 1¼ cents per pound: *Provided*, That plates or sheets of iron or steel, by whatever name designated, other than the polished, planished, or glanced herein provided for, which have been pickled or cleaned by acid, or by any other material or process, or which are cold-rolled, smoothed only, not polished, shall pay two-tenths of 1 cent per pound more duty than the corresponding gauges of common or black sheet iron or steel.

The amendment was agreed to.

Mr. WHITE. In line 6, after the word "designated," I move to strike out "one and seven-eighths" and insert in lieu thereof "one and three-fourths;" the latter being the Wilson-law rate.

The PRESIDENT pro tempore. The Senator from California offers an amendment, which will be stated.

The SECRETARY. After the word "designated," in line 6 of paragraph 129, it is proposed to strike out "one and seven-eighths" and insert "one and three-fourths;" so as to read:

Sheets of iron or steel, polished, planished, or glanced, by whatever name designated, 1¼ cents per pound.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from California [Mr. WHITE], which has been stated.

The amendment was rejected.

Mr. WHITE. In line 13 of the same paragraph, I move to strike out "two-tenths" and insert in lieu thereof "one-eighth;" the latter being the prevailing rate in the Wilson law.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from California.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 130, page 36, line 20, after the words "one and," to strike out "one-half" and insert "four-tenths;" so as to read:

130. Sheets or plates of iron or steel, or taggers iron or steel, coated with tin or lead, or with a mixture of which these metals, or either of them, is a component part, by the dipping or any other process, and commercially known as tin plates, terne plates, and taggers tin, 1.4 cents per pound.

Mr. VEST. I move, in line 20, to strike out "one and four-tenths" and insert the existing duty of "one and two-tenths."

Mr. President, this paragraph is a conspicuous example of the absolute fallacy of the statement and contention that these high duties are necessary to foster and encourage domestic manufactures. We have honestly asserted, and shall continue to assert until facts and arguments are produced to change that opinion, that these duties are not necessary, but that their only effect is to put largess into the pockets of certain favored classes at the expense of the large body of consumers in the country. In 1894—and it requires but a very short memory to recollect the transaction—those of us who were then engaged in making what is called the Wilson law proposed to reduce the duty on this article to 1.2 cents a pound from 2.4 cents.

We were met with the statement that that would absolutely destroy the American manufacturer and that the Welshmen would again take the market in the United States and put upon the people of this country what prices they pleased. It was a fair, open, undisguised issue between the two systems. We said, "No matter how this industry has commenced to thrive, we will permit you to assert and take the credit of saying that you have given it birth and fostered it so far by a tariff duty, but your tariff duty is no longer necessary," just as we say, when Jefferson and Madison and Polk said in the times when they lived the duties were necessary to foster and encourage the infant industries of the United States, their declarations furnish no argument for these enormous duties of the present era. A very epigrammatic and eloquent orator of the Republican party has said there is a vast difference between the infant, mewling and crying in the cradle, and the young giant, 7 feet high, ready to kick your head off unless you give him what he wants. [Laughter.]

Here we have now, after a reduction of one-half cent, an enormous increase in this industry. Look at the imports as shown by the comparative statement. The imports under the McKinley Act of 1893 were $16,691,765; in 1896, under the Wilson Act, with the duties decreased, the imports were $8,587,902, or about one-half of the amount that was imported in 1893 under a duty of 2.4 cents per pound.

And, Mr. President, to "make assurance double sure and take a bond of fate" upon this question, here is the official report of Mr. Ayers, the special agent of the Treasury Department, made in 1896. He is not to be suspected of leaning to free trade. This gentleman honestly has always been anxious to make all the reports he could in favor of high duties upon tin plate, and I had occasion in 1890 and 1894 to criticise his reports because I thought he leaned over against the decrease of the duties upon tin plate at that time.

Here is his report, all of which ought to be put into the RECORD; but of course I do not propose to do that. What does he show? He shows that we have doubled, and more than doubled, the product in the United States and taken the market entirely away from Wales. I can produce documentary evidence here from Wales to show that the manufacturers of tin plate in Wales have been bankrupted by the American competition. The miners are leaving there and hunting employment in this country. Yet, in the face of that, here is an increase upon tin plate.

I had occasion the other day to converse with a manufacturer of tin plate from Pittsburg, a very intelligent gentleman, whose name I can give, a relative of a Senator upon this floor, who invested two-thirds of all he had in the world in a tin-plate factory. He is a Republican in politics, and I asked him, "How about this duty upon tin plate?" He said, "We do not want a cent; we are doing as well as we possibly could; we have got the market away from Wales, and we can hold it for all time to come. Let us alone."

But, Mr. President, this habit of protection is like the drink habit—the more you take of it the more you want, and if you stop there is delirium tremens economically. There is no pause in this system. When men commence it as public men, they never can stop it. There is no reformation in regard to that vice. No, as my friend from California [Mr. WHITE] says, not even the gold cure, the Dwight Institute, can cure it.

Here is this report, showing absolutely and beyond any sort of question that there is no necessity for an increase of duty. Why, then, is the duty put on here? Yesterday when I called the attention of the Senator from Rhode Island [Mr. ALDRICH] to the fact that the committee were putting up duties on an article of which we had an absolute monopoly, and of which but $224 worth came into the country and one hundred and fifty-odd thousand dollars' worth went out, he admitted what I said was right and true, but he asked, "What harm does it do?" We have got the market, and it is a mere spectacular operation to put up duties. We have got the market, and we shall continue to hold it under any rate of duty. Ah, Mr. President, but that is the vice of it.

When you put up duties, even when we have the whole market, you give an excuse to the domestic manufacturer to put the price of his goods just below the cost of the foreign article with the duty added. That is the reason these duties are put on here. It is not to hold the American market, for we have that; but the domestic manufacturers come here and plead with our friends upon the other side whose political associates they are, "Give us this increase, because then we can put on an additional price and get more for our goods from the domestic consumer."

I plead, of course, to deaf ears so far as this Chamber is concerned, and I have not the gift of special prophecy; but I tell my friends on the other side, continue this thing and you will repeat history as it occurred after the act of 1890. There is an instinct of fair play and right in the American people which will not tolerate this sort of illogical, indefensible, and outrageous taxation. If any Senator can tell me why, with the existing conditions, this duty upon tin plate should be increased, I shall be more astonished than I have ever been even in my political career.

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from Missouri.

The SECRETARY. In paragraph 130, line 20, it is proposed to strike out "four-tenths" and insert "two-tenths;" so as to read:

130. Sheets or plates of iron or steel, or taggers iron or steel, coated with tin or lead, or with a mixture of which these metals, or either of them, is a component part, by the dipping or any other process, and commercially known as tin plates, terne plates, and taggers tin, 1.2 cents per pound.

Mr. VEST. On that amendment I ask for the yeas and nays.

Mr. WHITE. Mr. President, the Senator from Missouri has well stated that, whatever may have been the reason for the success of the tin-plate industry in the United States, now, finding the industry not only upon its legs, so to speak, but in possession of the American market, there is no excuse for an advance in the tariff rate. The committee has very wisely permitted the drawback provision to remain in the bill. Were the bill passed in the form transmitted here by the House of Representatives, it would work untold injury, especially to the large industries of the State which I in part represent in the matter of canning. I have a great deal of literature demonstrative of that proposition, which, however, I deem it unnecessary to incorporate in the RECORD, as I am satisfied the Committee on Finance of the Senate in conference will insist upon that amendment. Otherwise I should feel like indulging in some remarks in regard to it now.

The statement of the Senator from Missouri is absolutely accurate with relation to the condition of the American market on the tin-plate question, and I do not understand that there is any substantial conflict in this regard.

I have in my hand a very short article, taken from the Economist, a newspaper instituted for the purpose of advancing the cause of protection and published by a company of which the present honorable Secretary of the Interior is the president, and hence I feel that I may quote from it as I would from any orthodox protection source:

THE TIN-PLATE VICTORY WON.

It looks as if the tin-plate industry of South Wales is all but beaten out of the American market, says Herapath's Railway Journal. It is stated that American tin plates now virtually monopolize the market throughout the United States, except on the Pacific Coast, and are selling on the Atlantic Seaboard at from 25 to 40 cents below the price at which Welsh plate of corresponding grades can be laid down. Importations are now confined, with hardly an exception, to lots designed for use by the exporting oil and canned-goods interest, which still enjoy a rebate of 99 per cent of the duty on all such foreign material reshipped abroad. It is true that a comparatively small proportion of imported plates is still entered for actual consumption on the Pacific Coast, owing to the relatively heavy cost of transportation thither of domestic goods and cheap freight rates from Europe. But even there the American product has entered during the past year, and it is merely a matter of time when the Pacific Coast market will also be absorbed. This is bad news for Swansea; but are there no other markets?

Here, Mr. President, is a statement, as I say, of a journal conducted by an association of very estimable gentlemen, presided over by the present Secretary of the Interior, and there can be no doubt, I assume, that the statement that the American tin-plate industry is practically in full possession of the American market can not be successfully controverted. Indeed, the figures furnished by the Statistical Abstract not only show as regards the values of the imported article, but the amount given is a demonstration of the argument of the Senator from Missouri, that while there were 385,000,000 pounds, in round numbers, imported in 1896, there were five hundred and odd million pounds imported in 1895, and so on. An investigation of the tables will show that the industry has progressed to such an extent that, with the exception of the Pacific Coast, it is now in full possession, and there, as stated by the Economist, the difficulty is as to the matter of freight rates.

I have, as I said, many communications addressed to me by citizens of the Pacific Coast with reference to the drawback clause, which I will not read, with the single exception of the letter which is now in my hands, and which refers generally to the subject. It is dated April 13, 1897, and forwarded by the Pacific Sheet Metal Works of San Francisco and addressed to me personally. The writer says:

Referring to the matter of drawback of duties on tin plate, we beg to submit the following facts, which have a direct bearing upon that question.

During the packing season of 1896, there were packed in the Pacific Ocean and tributary streams 110,000,000 cans of salmon. Of this quantity about 25,000,000 cans were packed in British Columbia, leaving 85,000,000 cans which were packed by citizens of the United States, the larger proportion of which found its market in England, from the very fact that the drawback on tin plate in the cans on each case of four dozen cans amounted to 14 cents. When you reflect that a trade frequently turns on the difference of 2½ cents per case, you will readily perceive that the 14 cents is a great inducement to foreigners to purchase.

We think it can not be successfully contradicted that the great increase in the volume of this business is owing to this very question of drawback of duties, which contributes, with other conditions, to make the price so low that salmon in England is no longer a luxury for the rich, but is an article of food for the laboring classes. In fact, it is the cheapest meat which can be procured in that country. This duty would certainly close the door of that market to a very large proportion of this business and drive the major portion of it to the canneries of British Columbia.

Of canned fruits, there are about six or seven million cans exported annually from this State, and the same conditions are applicable to the fruits that pertain to the salmon. The production of fruits in California is steadily on the increase, and the crop this year promises to be the largest one ever produced in this State. What shall become of this fruit is the very serious question which confronts the horticulturist at this time. Shall we close the door to the export of this fruit, or shall we rather adopt some measure that will stimulate and encourage this industry in which so many people of this State are engaged?

May we be excused for calling your attention at this time to some facts concerning the tin-plate industry. Take for example the price of a box of tin plate, 14 by 20, 100 pounds weight, in England, which is generally 10 shillings per box, or $2.40 of our money. The duty on tin plate under the Wilson bill is $1.20, or 50 per cent of the above selling price. The Dingley bill not only proposes to increase this duty 30 cents per box, but to take off the drawback of duty on plates that are manufactured into cans and exported from the country. Perhaps it may not be a very dignified illustration, but we are certainly reminded of the man who had the earth, but still wanted the rubber fence around it.

As said before, the Wilson bill provides for 50 per cent protection, at the same time the Americans are to-day selling billets, used in making their tin plates, to the English tin-plate maker, and the American plate maker can export his tin used in covering the black plates from Australia and Tasmania as cheaply as the English tin-plate maker.

We will say, in conclusion, that while we are not interested in the packing of salmon, the great growth of that business is largely due to the able and conscientious management. By the large aggregation of capital, the cost of production has been reduced to a minimum, and that low cost, coupled with the drawback of duty above referred to, enabled the producers to sell at the low price before alluded to.

Trusting that you will agree with us in our ideas and that you may be enabled to have the clause in the Dingley bill referred to amended to conform to these ideas, we are,

Very sincerely, yours,

PACIFIC SHEET METAL WORKS,
IRVIN AYRES, *Treasurer.*

Mr. President, as I have said, the injury which might have been done if the House bill became a law will probably be averted because of the prompt action of the Senate committee in insisting upon the existence of a drawback provision.

But that very fact is illustrative of the proposition that with the prevailing duty upon tin plate in force and no drawback allowed, it would be impossible for these large canning establishments to maintain themselves at all. When I say that the profit upon a can of fruit is considered large and remunerative if it amounts to a cent and a half or two cents, it shows how close the manufacturers and packers must figure in order to conduct their business at all. I make these remarks as much for the purpose of fortifying the committee in the view they have taken in regard to the drawback as to show the absolute absurdity of increasing the tariff.

A great deal is said nowadays by everybody in regard to trusts. We are all nominally at least opposed to trusts, but if it be a fact—and there seems to be no doubt of it, speaking from the record—that the tin-plate industry of the United States is thoroughly protected so far as protection is concerned by the prevailing tariff, what argument can be adduced to appeal either to a Republican or a Democrat, a protectionist or a free trader, or anybody else, to justify the imposition of additional duties unless it be, as already stated, to permit the domestic manufacturer to sell in discrimination against his own countrymen.

I have another statement, a very short one, which I will read, showing the magnitude of this business. The communication is from a packing establishment in Sacramento, Cal.:

Replying to your recent inquiry regarding the amount of tin plate imported and the amount of the drawback, we beg to state that the customs records show for the two fiscal years ending June 30, 1896, there was imported 71,491,744 pounds of tin plate, valued at £1,804,493. Drawback paid during the same period amounted to $373,933, which represents goods packed in tin cans valued at $6,333,760.

Trusting this is the information you require, we beg to remain,

Yours, very truly,

SACRAMENTO PACKING AND DRYING CO.,
Per B.

With the tariff on tin plate, and without any drawback, that industry will be absolutely stifled upon the figures given. All of the gentlemen whom I have read from are Republican authorities in the State of California. They have been such for many years. In fact, nearly every letter I have upon this subject here is from parties who claim they are in favor of protection.

I have here a statement taken from the consular reports, volume 53, No. 197, being a communication from Mr. Anthony Howells, consul of the United States at Cardiff. I merely introduce it for the purpose of showing the diminished exportation of tin plate from that point, and I will put it in the RECORD without reading it. It contains figures that are very instructive, but it will be unnecessary to detain the Senate by their perusal now, and, as I have already remarked, I refrain from reading the numerous letters I have here in support of the committee's action in reference to the drawback. I hope it will not be necessary to use them at all. If it does become necessary, I will use them later.

The decrease in exports to the United States continues.

Exports of tin plate from Great Britain to the United States, 1892 to 1896 (in tons of 2,240 pounds).

ANTHONY HOWELLS, *Consul.*

CARDIFF, *October 12, 1896.*

If we add to this the exportation for the months of September, October, November, and December, 1896, we have a total for 1896 of less than 100,000 tons.

Mr. GRAY. Mr. President, I desire to say only a word. Among all the minor iniquities of the tariff bill framed upon the theory of the pending bill, I think none is more flagrant than the matter of the duty upon tin. If it were merely a revenue tariff that was sought, and if the object of the legislation was really what it professed to be, there might be a different line of argument used and a different way of approaching the subject.

This was a revenue duty of considerable magnitude at one time, but I do not understand that there is any other purpose in creating this than to protect, not the Treasury of the United States, but individual manufacturers of tin plate; and if that be true, then it is another instance, it seems to me, of a most wanton levying of tribute by this industry upon all the other industries of the country, no less worthy than itself.

Mr. President, there is something peculiar about the tin industry in its relation to other industries. Among those things which have most helped the farmer in my region, and I think in a good many others, has been the packing of vegetables and fruits, and that packing has depended for its prosperity largely upon the price of tin. There is nothing which has so much supplemented the income of the farmer in the region of which I speak—the income derived from low-priced cereals—as what he has been enabled to make from packing fruits and some of the smaller vegetables—tomatoes, beans, pease, and so on—and a very important industry it has become. Those packers are not, as a general thing, in the region of which I speak, large concerns. They are dotted all over the different communities, and almost every agricultural neighborhood has its packing establishment, where the farmers haul in, from a circuit of 5 or 6 miles, their cart loads of tomatoes, and their hundreds of baskets of peaches and vegetables, and so on, and are enabled to get fairly remunerative prices for them.

Now, then, forsooth this industry—it ought to have the name of the chevalier industry of France rather than the plain, homely Saxon name of industry—this industry, so called, not content with the opportunity that has come to it through the low prices of black plates and other conditions which have enabled it, in the face of a reduced tariff, to increase enormously the production of American tin, now demands to levy this tribute upon the great consuming masses of our country and upon these modest little establishments dotted all over our agricultural region, in order that it may make a profit greater than that which confessedly it is making under present conditions, and more natural and normal conditions.

If this line of legislation is to be followed out, and if we are to respond to these appeals constantly, as seems to be the disposition

of some to do, then the creation of a new industry, instead of being hailed with joyous acclaim, ought to be a cause for mourning; it ought to be cause for sorrow all over the country, for it only means another taskmaster, another despot to levy tribute upon the great masses of the American people.

Why is it, sir, that these people disclaimed in the bill as it came from the House even the poor pittance of a drawback, to enable the packing industry to export its goods and engage in profitable foreign commerce? It is true that the bill as amended by the Senate committee restores the drawback, but even that, it seems to me, is a poor donation to the industries of which I speak. It leaves out of sight altogether the American consumer. It is willing, for the sake of foreign commerce, to give to the foreign consumer of canned peaches and canned vegetables and canned salmon, and all the various food products that have become so important in that mode and that fashion, cheaper than they can come to the American consumer. There is no drawback to the mechanic in our American cities upon his can of tomatoes or his can of peaches. The industry, it is true, does get it, but the consumers are lost sight of, and here is this odious discrimination in favor of the foreign consumer and against the American consumer.

Mr. President, I protest against any duty that shall unduly burden these agricultural industries and that shall unduly burden the great American home market—I mean the home market on the other side of the counter, not the home market that is constantly spoken of on the other side, but the far more numerous home market, the people who buy the product from the protected manufacturers. That is the home market most important, in my notion, for us to protect.

Mr. JONES of Arkansas. Mr. President, I understand that there is an association among the tin-plate manufacturers, embracing about 90 per cent of the production of tin plate in the United States. The association, I believe, have what they style a gentleman's agreement as to prices. The association, if the newspaper stories can be relied on, recently has had a number of meetings, prices have been raised by the association, and those raises in prices have been submitted to by the public. There has been an effort amongst the employees of the members of the association to have their wages increased, and this has been positively refused.

I should like to know upon what ground there can be any pretense for raising the amount of protection that is given to tin plate now. If the purpose is to pay the difference in wages, ought not the increase that is given, or some part of it, go to labor? But this association of great manufacturers of tin plate, if I am correctly informed, has absolutely refused to yield the width of a hair to the demands of the laborers for increased compensation for their work. They are asking us here to raise the taxes under which they have prospered enormously. Take the official report of the Government, the paper to which my friend the Senator from Missouri alluded a few moments ago, addressed to the Secretary of the Treasury, from which I quote:

> I have the honor to report that during the fiscal year ended June 30, 1896, the production in the United States of commercial tin and terne plates was 307,228,621 pounds, against 193,801,073 pounds produced during the previous fiscal year, showing thereby an increased production of more than 58 per cent.

Here is an increase amounting to this enormous per cent growing up under the present tariff of 1¼ cents per pound, showing that the business is profitable; that it is increasing its product. The manufacturers must be making money. While they are refusing to make any concession whatever to labor, they are asking that we shall enable them to still higher and higher increase the price of tin plate to the American consumers. They are raising it now under the tariff as it stands to-day of 1¼ cents. Of course everybody knows that if an additional tariff is given, the increase will continue.

What can be the purpose, what can any sane and reasonable man believe to be the purpose, of this effort to increase the rate of taxation, except to enable the Tin Plate Manufacturers' Association of the United States to increase the prices at which they sell the tin plate? It does not go to labor. It goes to somebody else. They are already increasing production at the rate of 58 per cent per annum. They are producing more than 300,000,000 pounds of tin plate, which is being consumed here now, and yet we find they are endeavoring to carry out the narrow policy of not allowing the canners of fish and of fruit to continue their business. They are not in favor of allowing the laborers one whit more for their labor than they get now, but they are asking us to increase the rate at which they shall be allowed to sell to the public.

Mr. President, there are some very interesting and important features in connection with the Government report to which I should like to refer, but I dislike to detain the Senate. The American Metal Market, a trade paper, has the following account of a meeting held by the Tin Plate Association in April, 1897:

> "At a meeting held in Chicago on April 6 and 7 a new Tin Plate Manufacturers' Association has been completed, embracing all the American tin-plate mills, it is claimed, and an agreement has been made not to sell for delivery beyond July 1, 1897, and to hold prices at $3.25 basis for IC 14x20-100 pounds coke tins, delivered at points from the Hudson to the Mississippi River."
>
> And we make the following extract from the same paper, giving an account of a meeting held at Columbus on Friday, April 23, 1897:
>
> "An agreement was made to continue the basis price of coke tins as made at the former meeting in Chicago, and a further agreement was made not to sell ordinary grade charcoal ternes, 20 by 28 (full weight), at under $6.70, delivered at the usual points. A committee was appointed to investigate and report at the next meeting on the matter of wage scale to be arranged July 1, and it is believed a strong effort will be made by the workmen to obtain an advance over last year's rates."

Again quoting from the American Metal Market:

> As to the proceedings of a meeting held May 21 in Chicago, we take the following: "It is understood that at the last meeting of the mills some 90 per cent or more have agreed to continue their 'gentleman's agreement' not to book new orders under the former combination price of $3.35 basis for 14 by 20-100 pound coke tins. It is claimed that through the frequent mill association meetings good progress has been made on the line of guarding, by concerted action in the future, against influences that have had a tendency in the past to demoralize prices."
>
> A meeting of the tin-plate manufacturers took place at the Lincoln Hotel, Pittsburg, on May 26, at which all the local tin-plate manufacturers were represented, as well as a large number from out of the city. It was practically decided not to accede to the demands of the workers for an increase. The demands of the Amalgamated Association of Iron and Steel Workers are for an advance of 15 per cent at this time. The refusal of the manufacturers to accede to the demands of the workers means a protracted strike, unless the tin-plate wage committee of the Amalgamated Association is given discretionary powers.

Here the Senate is given the notice that the tin-plate association will not increase the wages paid to labor, but they are increasing the prices of tin plate now, and they have been doing it steadily, and the only effect of increasing the rate of tariff upon tin plate will be to enable the association to increase the prices at which tin plate is being sold to the American public. We certainly mean to make this possible by our action. We can not have any other purpose, and we can have no other intention. There can be no other meaning to it, and we may as well have it distinctly understood that the purpose of this measure is to deliver the American people, so far as the purchase of tin is concerned, bound hand and foot, to the Tin Plate Manufacturers' Association.

The Dingley bill makes the rate of duty on tin plates 1¼ cents per pound, and the Senate bill changes this rate to 1.4 cents. The present rate is 1¼ cents per pound, which, stated in ad valorem terms, is over 50 per cent.

The existing rate would seem to be more than ample, since American tin plates are being sold at from 10 to 15 per cent less than the foreign article plus duty and freight. As an example, the price of a box of imported coke tin plates, 14 by 20 inches, weighing 100 pounds, and containing 112 sheets, duty and freight paid, is about $3.60 laid down in New York or Baltimore, whereas a box of tin plates of the same quality and weight of American manufacture is sold, delivered at the same points, at about $3.20, a difference in price in favor of the American article of over 10 per cent, and at other points of delivery nearer the American works the difference is still greater.

The American manufacturer can buy the bars from which he manufactures his product nearly $3 per ton cheaper than the foreigner, and as a matter of fact American tin-plate bars are exported to Great Britain to be used in making tin plates in Wales.

I read to the Senate this morning a statement from one of the iron papers in England that great quantities of bars, out of which tin plates are made, were being shipped from this country and laid down at lower prices at the iron mills in England than they could buy them there. We are shipping the materials out of which tin plate is made abroad, and they are making tin plate out of it. The truth is that the great increase in production is due to the fact that steel billets are being produced cheaper than ever before, and the tin-plate manufacturers are getting the raw material out of which tin plate is manufactured cheaper, and are thus enabled to send to England the bars to be used there for the manufacture of the same article.

The American manufacturer has the home market to himself, with the exception of tin plates, which are imported to be manufactured into articles for export, and on which the Government allows a rebate of 99 per cent of the duty. There is no longer any competition from imported tin plates, and it is well known among dealers that the foreign article is not a factor in the market. Why, then, should the duty be increased? Can there be a latent trust hidden in this schedule? If a trust or combination to raise prices were formed, the price of imported tin plates would be a limit beyond which the price of the domestic article could not be raised; hence the higher the tariff the higher it would be possible to raise prices in America. It is suggestive that there is an association of tin-plate manufacturers which has held several meetings for the purpose of fixing the prices at which their product shall be sold.

If tin plates were on the free list the people of the United States would save several million dollars annually which they now pay for the privilege of having their tin plates made in America, and the Senate of the United States should not be asked to help make it possible to export still more for the benefit of the manufacturers.

I have several clippings from different commercial papers showing the facts I have already set out here. Here is one:

The tin-plate manufacturers are getting ready early to grapple with the wage question. A big meeting of the manufacturers took place at the Lincoln Hotel yesterday, at which all the local tin-plate manufacturers were represented as well as a large number from out of the city.

Mr. D. G. Reid, of Richmond, Ind., acted as chairman, and Mr. Leeds, of Anderson, Ind., as secretary of the meeting. It was practically decided at yesterday's meeting not to accede to the demands of the workers for an increase, and another meeting will be held to-day to decide on methods to meet all contingencies.

Mr. Reid was seen last evening, and had the following to say on the subject: "We had notice about three weeks ago from the Amalgamated Association that a resolution would probably be adopted at the Detroit convention demanding from 12 to 15 per cent of an advance in wages. I see that such a resolution has passed the convention, as predicted. The manufacturers have met to take action on what shall be done. We talked the matter over carefully to day, and it was the unanimous opinion of all present that we can not see our way clear to pay more wages at this time."

M. M. Garland voiced the sentiment of the workers before leaving for Detroit, when he said: "There is no excuse for the present low price of tin plate. The workers are a unit to place even a higher tariff on tin plate, and we are doing all we can to defeat the drawback clause."

But, Mr. President, it is unnecessary for me to detain the Senate longer by these statements of facts. There are a few other points in connection with the official report of Mr. Ayer to the Treasury Department which I should like to have the Senate consider for a moment. Continuing from the point from which I read a while ago, he says:

The production in the United States of commercial tin and terne plates was 307,228,621 pounds, against 198,801,073 pounds produced during the previous fiscal year, showing thereby an increased production of more than 58 per cent.

Of the production for the year, 303,042,098 pounds, or more than 98½ per cent, were made from sheets rolled in the United States, against about 63 per cent made from such sheets during the fiscal year ended June 30, 1895.

The production for the year, distributed according to weight and kind of plates, was as follows:

	Lighter than 65 pounds per 100 square feet.	65 pounds per 100 square feet and heavier.	Total.
	Pounds.	*Pounds.*	*Pounds.*
Tin plates	182,045,509	30,543,672	212,589,181
Terne plates	82,874,323	11,765,117	94,639,440
Total	264,919,832	42,308,789	307,228,621

I will print in my remarks a few observations by Mr. Ayer, which I think will be of value to the American public, who I hope may have the opportunity of reading them in the RECORD:

AMERICAN SHEET IRON AND STEEL.

The quantity of American sheet iron and steel made by stamping and other manufacturing firms into articles and wares which were afterwards tinned, stated by quarters, was:

Quarter ended—	Pounds.
September 30, 1895	2,038,001
December 31, 1895	2,893,289
March 31, 1896	3,075,832
June 30, 1896	2,579,008
Total, fiscal year ended June 30, 1896	10,586,110

This shows a use of American sheet iron and steel in this class of manufactures 4,200,770 pounds in excess of that for the year immediately preceding, and 3,841,822 pounds in excess of the average for the four previous years.

BLACK-PLATE PRODUCTION.

The production of black plates in the United States during the fiscal year, stated by quarters, was as shown below:

	Lighter than 65 pounds per 100 square feet.	65 pounds per 100 square feet and heavier.	Total.
Quarter ended—	*Pounds.*	*Pounds.*	*Pounds.*
September 30, 1895	56,205,973	14,498,643	70,704,616
December 31, 1895	58,925,169	20,982,012	79,907,181
March 31, 1896	61,771,768	16,400,466	78,172,234
June 30, 1896	81,865,954	23,284,813	105,290,767
Total	258,768,864	75,245,934	334,014,798

	Pounds.
Total production for the fiscal year ended June 30, 1896	334,014,798
Same, fiscal year ended June 30, 1895	185,571,479
The difference is	148,443,319

Showing an increased production of about 80 per cent.

The proportion of such plates lighter than 65 pounds per 100 square feet is 77 per cent, as compared with 80 per cent during the preceding year.

Thirty-six rolling mills were producing black plates during the fiscal year ended June 30, 1896, against twenty-nine that were producing during the fiscal year ended June 30, 1895.

I recognize the fact that it is utterly useless to present to members of the Senate facts showing the utter indefensibility of this feature of the tariff bill. The edict has gone forth. The caucus has ordered that it shall be adopted. It will be adopted without regard to the monstrous increase in the tariff on tin.

Mr. ALLISON. What increase did the Senator say it is?

Mr. JONES of Arkansas. I did not say what the rate of percentage is. I said the monstrous increase. It is absolutely indefensible, and is made solely and purely in the interest of the tin-plate manufacturers' association. The laborer has no interest in it. I have read from the proceedings of the manufacturers' association to show that they do not intend to raise the price of wages. They do not intend to give to the laborers any part of the profit. When you gentlemen put this in the bill, you do it with full knowledge that it is simply to swell the profits of the tin-plate manufacturers.

Mr. HOAR. Will the Senator from Texas object to my putting in the RECORD, without reading, some prophecies which he made when the first tin-plate duty was adopted?

Mr. JONES of Arkansas. I am sorry that in the long time I have served in the Senate the Senator from Massachusetts has not learned from what State I come. I suppose, however, as he addressed himself to me personally, that he meant the Senator from Arkansas. I have no objection to his putting in the RECORD anything I have said about this question, but I have refrained from putting into the RECORD again a number of prophecies indulged in by the Senator from Massachusetts four years ago, because I did not want to embarrass the progress of the business at present.

There is a good deal of very valuable reading in the RECORD. I have run over some of it recently, some predictions and some statements, perhaps made by a number of other Senators, that would not tally very well with the positions that are being occupied now. I can remember when again and again the Senator from Massachusetts voted for free sugar, on the declaration that it was the policy of the Republican party to make a free breakfast table; that that great necessary of life was not to be taxed. The Senator so voted a number of times, and perhaps himself offered amendments to that effect.

Mr. HOAR. I thought the Senator was talking about tin.

Mr. JONES of Arkansas. There have been changes on this as well as other things. I confess I am surprised at the development of the tin-plate business. I believed, when in 1894 we put the tax on tin plate at 1.2 cents instead of 2.2 cents, it was all the protection the tin-plate business needed; that it was all it ought to have; and time has proved that that was true.

The increased production came, as I said this morning, from the improved and cheapened methods of manufacturing steel billets and the dissolution of the steel-billet pool, in my opinion, which has furnished raw material cheaper than before, and so cheaply that the billets out of which the plates are made are now being shipped to England and sold at the very doors of the English iron mills cheaper than they can produce them there. This has brought the cheapened raw material to tin plate, and has made it possible, under present law, to have the production of tin plate increase from year to year—in one year 58 per cent.

Mr. HOAR. I beg pardon for winding up the clock.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Missouri [Mr. VEST] to the committee amendment, on which the Senator from Missouri demands the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HANNA (when his name was called). I am paired with the Senator from Utah [Mr. RAWLINS].

Mr. KENNEY (when his name was called). I am paired with the junior Senator from Pennsylvania [Mr. PENROSE], and therefore withhold my vote. Were he present, I should vote "yea."

Mr. MCLAURIN (when his name was called). I am paired with the Senator from Utah [Mr. CANNON]. If he were present, I should vote "yea."

Mr. MCMILLAN (when his name was called). I have a general pair with the Senator from Kentucky [Mr. LINDSAY]. I will transfer that pair to the Senator from Rhode Island [Mr. ALDRICH], and vote. I vote "nay."

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. WILSON (when his name was called). I have a general pair with the Senator from Florida [Mr. PASCO]. If he were present, he would vote "yea" and I should vote "nay."

The roll call was concluded.

Mr. HANNA. I will transfer my pair to the Senator from Nevada [Mr. JONES], and vote "nay."

Mr. GRAY (after having voted in the affirmative). I have a general pair with the senior Senator from Illinois [Mr. CULLOM]. As I observe that he is not in his seat, I withdraw my vote.

Mr. TILLMAN. I have a pair with the Senator from Nebraska [Mr. THURSTON]. I withhold my vote. If he were present, I should vote "yea."

Mr. HANSBROUGH. I have a pair with the Senator from Virginia [Mr. DANIEL]. If he were present, I should vote "nay."

The result was announced—yeas 21, nays 32; as follows:

YEAS—21.

Bacon,	Cockrell,	Murphy,	Vest,
Bate,	Faulkner,	Pettigrew,	Walthall,
Berry,	Jones, Ark.	Pettus,	White.
Caffery,	Mills,	Roach,	
Chilton,	Mitchell,	Smith,	
Clay,	Morgan.	Turpie,	

NAYS—32.

Allison,	Foraker,	Lodge,	Platt, N. Y.
Burrows,	Frye,	McBride,	Pritchard,
Carter,	Gallinger,	McEnery,	Quay,
Chandler,	Gear,	McMillan,	Sewell,
Clark,	Hale,	Mason,	Shoup,
Deboe,	Hanna,	Nelson,	Spooner,
Elkins,	Hawley,	Perkins,	Stewart,
Fairbanks,	Hoar,	Platt, Conn.	Wetmore.

NOT VOTING—36.

Aldrich,	Gorman,	Lindsay,	Rawlins,
Allen,	Gray,	McLaurin,	Teller,
Baker,	Hansbrough,	Mallory,	Thurston,
Butler,	Harris, Kans.	Mantle,	Tillman,
Cannon,	Harris, Tenn.	Martin,	Turner,
Cullom,	Heitfeld,	Morrill,	Warren,
Daniel,	Jones, Nev.	Pasco,	Wellington,
Davis,	Kenney,	Penrose,	Wilson,
George,	Kyle.	Proctor,	Wolcott.

So Mr. VEST's amendment to the amendment of the committee was rejected.

The PRESIDENT pro tempore. The question recurs on agreeing to the amendment of the committee striking out "one-half" and inserting "four-tenths," making the rate on tin plates, etc., four-tenths cent per pound.

The amendment was agreed to.

The PRESIDENT pro tempore. The Secretary will read the next amendment.

The next amendment of the Committee on Finance was, in paragraph 130, page 36, line 21, after the word "pound," to strike out the proviso in the following words:

Provided, That the benefit of the drawback provision in section 24 of this act shall not apply to articles manufactured in this country from imported tin plates, terne plates, or taggers tin, or to articles manufactured abroad from tin plates, terne plates, or taggers tin.

The amendment was agreed to.

The next amendment was, in paragraph 131, page 37, line 5, after the word "bars," to insert "mill shafting, wrist or crank pins, connecting rods and piston rods;" and in line 14, after the word "less," to strike out "seven-twentieths" and insert "three-tenths;" so as to read:

131. Steel ingots, cogged ingots, blooms, and slabs, by whatever process made; die blocks or blanks; billets and bars and tapered or beveled bars; mill shafting; wrist or crank pins; connecting rods and piston rods; pressed, sheared, or stamped shapes; saw plates, wholly or partially manufactured; hammer molds or swaged steel; gun-barrel molds not in bars; alloys used as substitutes for steel in the manufacture of tools; all descriptions and shapes of dry sand, loam, or iron-molded steel castings; sheets and plates and steel in all forms and shapes not specially provided for in this act, all of the above valued at 1 cent per pound or less, three-tenths of 1 cent per pound, etc.

Mr. ALLISON. I ask that that portion of the amendment in lines 5 and 6, after the words "mill shafting," be disagreed to, so that wrist or crank pins, connecting rods and piston rods, being a part of the forgings, will come in the 35 per cent clause.

The SECRETARY. It is proposed to amend the committee amendment by striking out after the words "mill shafting" the words "wrist or crank pins; connecting rods and piston rods."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the Committee on Finance was, in paragraph 131, page 37, line 16, after the word "pound," to strike out "five-tenths" and insert "four-tenths;" in line 18, after the word "pound," to strike out "seven-tenths" and insert "six-tenths;" in line 20, after the word "pound," to strike out "eight-tenths" and insert "seven-tenths;" in line 22, after the word "pound," to strike out "1.1 cents" and insert "nine-tenths of 1 cent;" in line 25, after the word "and," to strike out "four-tenths" and insert "two-tenths;" in line 1, page 38, after the word "and" where it occurs the second time, to strike out "six-tenths" and insert "three-tenths;" in line 3, after the word "two," to strike out "and five-tenths;" in line 5, after the word "pound," to strike out "three" and insert "two and four-tenths;" in line 7, after the word "pound," to strike out "three and five-tenths" and insert "two and eight-tenths;" and in line 8, after the word "pound," to strike out "six" and insert "four and seven-tenths;" so as to make the paragraph read:

131. Steel ingots, cogged ingots, blooms, and slabs, by whatever process made; die blocks or blanks; billets and bars and tapered or beveled bars; mill shafting; pressed, sheared, or stamped shapes; saw plates, wholly or partially manufactured; hammer molds or swaged steel; gun-barrel molds not in bars; alloys used as substitutes for steel in the manufacture of tools; all descriptions and shapes of dry sand, loam, or iron-molded steel castings; sheets and plates and steel in all forms and shapes not specially provided for in this act, all of the above valued at 1 cent per pound or less, three-tenths of 1 cent per pound; valued above 1 cent and not above 1.4 cents per pound, four-tenths of 1 cent per pound; valued above 1.4 cents and not above 1.8 cents per pound, six-tenths of 1 cent per pound; valued above 1.8 cents and not above 2.2 cents per pound, seven-tenths of 1 cent per pound; valued above 2.2 cents and not above 3 cents per pound, nine-tenths of 1 cent per pound; valued above 3 cents per pound and not above 4 cents per pound, 1.2 cents per pound; valued above 4 cents and not above 7 cents per pound, 1.3 cents per pound; valued above 7 cents and not above 10 cents per pound, 2 cents per pound; valued above 10 cents and not above 13 cents per pound, 2.4 cents per pound; valued above 13 cents and not above 16 cents per pound, 2.8 cents per pound; valued above 16 cents per pound, 4.7 cents per pound.

The amendment was agreed to.

The next amendment was, under the head of "Wire," paragraph 132, page 38, line 19, after the word "wire," to strike out the following additional proviso:

Provided further, That all iron or steel wire rods which have been tempered or treated in any manner or partly manufactured shall be classed and dutiable as wire.

So as to make the paragraph read:

132. Wire rods: Rivet, screw, fence, and other iron or steel wire rods, whether round, oval, flat, or square, or in any other shape, and nail rods, in coils or otherwise, valued at 4 cents or less per pound, four-tenths of 1 cent per pound; valued over 4 cents per pound, three-fourths of 1 cent per pound: *Provided*, That all round iron or steel rods smaller than No. 6 wire gauge shall be classed and dutiable as wire.

The amendment was agreed to.

The next amendment was, on page 38, beginning in line 23, to strike out paragraph 133, in the following words:

133. Round iron or steel wire, all sizes not smaller than No. 13 wire gauge, 1¼ cents per pound; smaller than No. 13 wire gauge and not smaller than No. 16 wire gauge, 1½ cents per pound; smaller than No. 16 wire gauge, 2 cents per pound; all other iron or steel wire, and wire or strip steel, including such as is commonly known as crinoline wire, corset wire, needle wire, piano wire, clock and watch wires, and all steel wires, whether polished or unpolished, tempered or untempered, in coils or straight and cut to lengths, drawn cold through dies or rolls, and hat wire, flat steel wire or sheet steel in strips, uncovered or covered with cotton, silk, or other material, or metal, and all the foregoing manufactures of whatever shape or form, valued above 4 cents per pound, 45 per cent ad valorem: *Provided*, That articles manufactured from iron or steel wire shall pay the maximum rate of duty which would be imposed upon any wire used in the manufacture of such articles and in addition thereto 1¼ cents per pound; drill rods, including such as are called "Stubbs steel," and all cold-drawn steel rods, of whatever size or shape, valued above 4 cents per pound, whether polished or unpolished, in coils or straight, 45 per cent ad valorem: *And provided further*, That wire cloth and wire netting made in meshes of any form from iron, steel, brass, copper, or any other metal shall pay a duty equal in amount to that imposed on the wire used in the manufacture thereof and 2 cents per pound in addition thereto: *And provided further*, That there shall be paid on iron or steel wire coated with zinc or tin, or any other metal (except fence wire), one-half of 1 cent per pound in addition to the rate imposed on the wire of which it is made.

And in lieu thereof to insert:

133. Round iron or steel wire, not smaller than No. 13 wire gauge, 1¼ cents per pound; smaller than No. 13 and not smaller than No. 16 wire gauge, 1½ cents per pound; smaller than No. 16 wire gauge, 2 cents per pound.

The amendment was agreed to.

Mr. ALLISON. On page 40, after line 16, after the word "pound," at the end of paragraph 133, I move to insert the following proviso, of which notice was given May 25, 1897, from the committee:

Provided, That all the foregoing valued at more than 5 cents per pound shall pay 40 per cent ad valorem.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 40, after the amendment just agreed to, to insert the following additional paragraph:

133½. Iron or steel or other wire not specially provided for in this act, including such as is commonly known as hat wire, or bonnet wire, crinoline wire, corset wire, needle wire, piano wire, clock wire, and watch wire, whether flat or otherwise, and corset clasps, corset steels and dress steels, and sheet steel in strips, twenty-five one-thousandths of an inch thick or thinner, any of the foregoing, whether uncovered or covered with cotton, silk, metal, or other material, valued at more than 4 cents per pound, 40 per cent ad valorem; wire cloth and wire netting, made in meshes of any form from iron, steel, brass, copper, or other metal, 45 per cent ad valorem: *Provided*, That there shall be paid on iron or steel wire coated with zinc, tin, or any other metal two-tenths of 1 cent per pound in addition to the rate imposed on the wire from which it is made.

Mr. WHITE. I desire to inquire of the Senator from Iowa if paragraphs 133 and 133½ in the bill are designed to supplant paragraph 124 of the Wilson Act? Is not that the fact? They seem to be a reconstruction.

Mr. ALLISON. Yes, sir; paragraph 124 of the Wilson Act.

Mr. WHITE. The rates are different. I ask the Senator from Iowa if there is not an increase?

Mr. ALLISON. There is a slight increase, I believe, in those rates.

Mr. WHITE. Although paragraph 133 has been read through, I ask leave, by unanimous consent, to move to substitute for paragraphs 133 and 133½ paragraph 124 of the Wilson Act, so called.

The PRESIDENT pro tempore. The Chair will consider the question an open one. The Senator from California offers an amendment as a substitute for paragraphs 133 and 133½.

Mr. WHITE. The section of the Wilson Act, or the present law, is lower, as I understand it, than the rates prescribed in the amendment proposed by the Senate committee.

The PRESIDENT pro tempore. The amendment of the Senator from California will be read.

The Secretary read as follows:

124. Wire: Round iron or steel wire, all sizes not smaller than 13 wire gauge, 1½ cents per pound; smaller than 13 wire gauge, and not smaller than 16 wire gauge, 1¾ cents per pound; smaller than 16 wire gauge, 2 cents per pound; all other iron or steel wire and wire or strip steel, commonly known as crinoline wire, corset wire, drill rods, needle wire, piano wire, clock and watch wires, and all steel wires, whether polished or unpolished, in coils or straightened, and cut to lengths, drawn cold through dies, and hat wire, flat steel wire, or sheet steel in strips, uncovered or covered with cotton, silk, or other material, or metal, and all the foregoing manufactures of iron or steel, of whatever shape or form, valued above 4 cents per pound, shall pay a duty of 40 per cent ad valorem: *Provided*, That articles manufactured from iron or steel wire shall pay the maximum rate of duty which would be imposed upon any wire used in the manufacture of such articles and in addition thereto 1 cent per pound.

Mr. ALLISON. Ours is lower than the paragraph in the present law.

Mr. VEST. I wish to call the attention of the Senator from Iowa to one great difference. Under the Wilson Act, the existing law, the duty is an ad valorem one of 40 per cent upon wire, whether coated or covered or not. There is the same duty upon wire. In the proposed amendment there is a distinction made, which is an increase upon the coated or covered wire. That is the great difference between the two provisions.

Mr. ALLISON. There is a difference in phraseology. There is no real difference in the rate. But I shall propose an amendment to paragraph 133¼.

Mr. MILLS. I desire to add to this discussion by stating that the census report shows that the manufacturers of this wire pay $19.01 in wages for every $100 worth of wire they produce, and that is nearly double the rate of wages generally claimed to have been paid abroad. Ten cents on $100 worth would cover the difference. Nineteen dollars and one cent on every $100 worth of this product will pay for all the labor expended by the manufacturers, and I suppose that that would come somewhere near being a revenue duty on this article. I do not think that we ought to give them more than enough to pay for the whole cost of the wages in the production of these goods.

Mr. CHILTON. Mr. President, I should like to have the attention of the Senator from Iowa. I notice that in his amendment he so changes the House bill as to strike out the exception in favor of fence wire. The existing law makes an exception in favor of fence wire. In other words, fence wire under the Wilson Act was not to be embarrassed with the additional charge which is made upon coated wire generally. So in the House of Representatives, when the pending bill was passed, it was provided that fence wire should not be subjected to the additional charge. It seems to me that was a wise exception in favor of the people. Fence wire is an article of universal consumption in the country. The policy of separating it from other coated wire was adopted in the Wilson Act; it was continued in the Dingley bill in the House of Representatives, and it seems to me that it ought not to be departed from now in the Senate amendments. I should like to know what is the reason for striking out the exception.

Mr. ALLISON. We have provided for fence wire elsewhere.

Mr. CHILTON. What rate do you give it elsewhere? What is the rate on it?

Mr. ALLISON. On fence wire?

Mr. CHILTON. Yes.

Mr. ALLISON. I believe fence wire is free—that is, if it is coated. There is no additional duty for coated.

Mr. WHITE. If it is not free, I give notice now that when we reach the free list I shall offer an amendment to put it upon the free list. But the sum total of the amendments proposed by the committee increase the rate of duty, I think.

Mr. ALLISON. We impose no additional duty upon fence wire if coated.

Mr. WHITE. The effect of these amendments, while in some respects the duty is comparatively lowered, is to raise the aggregate matter affected by the two paragraphs, and for that reason I have moved a substitute for paragraphs 133 and 133¼, the two paragraphs read.

Mr. CHILTON. I understood the Senator from Iowa to say a moment ago that they had provided that fence wire should not bear the additional duty. Now, that exception in favor of fence wire is just what you have distinctly stricken out of the House bill. Unless you have put such a clause into this bill at some other place, this amendment will leave fence wire subject to duty, like all other wire.

Mr. ALLISON. It is somewhere else, I am quite sure. If it is not, it is a mistake. It was so intended.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed as a substitute for paragraphs 133 and 133¼ by the Senator from California [Mr. WHITE].

The amendment was rejected.

Mr. ALLISON. Now, I move the amendment to paragraph 133¼ which is to be found on the second page of the amendments of May 25, amendment No. 6.

The PRESIDENT pro tempore. The amendment to the amendment will be read.

The SECRETARY. On page 41, after the words "ad valorem," in line 3, strike out the following words:

Wire cloth and wire netting, made in meshes of any form from iron, steel, brass, copper, or other metal, 45 per cent ad valorem.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The next amendment proposed by the Senator from Iowa to paragraph 133¼ will be stated.

The SECRETARY. In line 6, after the word "*Provided*," strike out the words "That there shall be paid" and insert in lieu thereof the words:

That articles manufactured from iron, steel, brass, or copper wire shall pay the rate of duty which would be imposed upon the wire used in the manufacture of such articles, and in addition thereto 1 cent per pound; and.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. QUAY. I desire to call the attention of the Senator from Iowa to paragraph 132. Do I understand that the Committee on Finance insisted upon the amendment striking out the last proviso, or was the proviso reinstated?

Mr. ALLISON. The intention, I will say to the Senator from Pennsylvania, was to strike out of the amendment originally proposed by the Senate committee the words "wire cloth," etc., beginning in line 3, on page 41.

Mr. QUAY. No; I am speaking of paragraph 132, page 38. I inquire whether the committee intend to insist upon striking out the second proviso, which I received the impression was to be reinstated. I may be wrong.

Mr. ALLISON. I think that was to go out. That was my understanding.

Mr. QUAY. It was not mine. However, I will talk to the Senator from Iowa again about it.

The PRESIDENT pro tempore. The reading of the bill will proceed.

The Secretary read as follows:

GENERAL PROVISIONS.

134. No allowance or reduction of duties for partial loss or damage in consequence of rust or of discoloration shall be made upon any description of iron or steel, or upon any article wholly or partly manufactured of iron or steel, or upon any manufacture of iron or steel.

135. All metal produced from iron or its ores, which is cast and malleable, of whatever description or form, without regard to the percentage of carbon contained therein, whether produced by cementation, or converted, cast, or made from iron or its ores, by the crucible, Bessemer, Clapp-Griffith, pneumatic, Thomas-Gilchrist, basic, Siemens-Martin, or open-hearth process, or by the equivalent of either, or by a combination of two or more of the processes, or their equivalents, or by any fusion or other process which produces from iron or its ores a metal either granular or fibrous in structure, which is cast and malleable, excepting what is known as malleable-iron castings, shall be classed and denominated as steel.

Mr. WHITE. I ask the Senator from Iowa if paragraph 135 is not a new section, not to be found in the Wilson Act?

Mr. ALLISON. It is in the McKinley law of 1890.

Mr. WHITE. It was not changed by the Wilson Act at all.

Mr. ALLISON. I think it was not changed by the Wilson Act, nor is it changed by this bill. It is the same as the existing law.

The PRESIDENT pro tempore. The Secretary will proceed with the reading of the bill.

The Secretary read as follows:

136. No article not specially provided for in this act, which is wholly or partly manufactured from tin plate, terne plate, or the sheet, plate, hoop, band, or scroll iron or steel herein provided for, or of which such tin plate, terne plate, sheet, plate, hoop, band, or scroll iron or steel shall be the material of chief value, shall pay a lower rate of duty than that imposed on the tin plate, terne plate, or sheet, plate, hoop, band, or scroll iron or steel from which it is made, or of which it shall be the component thereof of chief value.

The next amendment of the Committee on Finance was to strike out paragraph 137, as follows:

137. On all iron or steel bars or rods of whatever shape or section which are cold rolled, cold drawn, cold hammered, or polished in any way in addition to the ordinary process of hot rolling or hammering, there shall be paid one-fourth of 1 cent per pound in addition to the rates provided in this act on bars or rods of whatever section or shape which are hot rolled; and on all strips, plates, or sheets of iron or steel of whatever shape, other than the polished, planished, or glanced sheet iron or sheet steel hereinbefore provided for, which are cold rolled, cold hammered, blued, brightened, tempered, or polished by any process to such perfected surface finish or polish better than the grade of cold rolled, smoothed only, hereinbefore provided for, there shall be paid 1 cent per pound in addition to the rates provided in this act upon plates, strips, or sheets of iron or steel of common or black finish; and on steel circular saw plates there shall be paid three-fourths of 1 cent per pound in addition to the rate provided in this act for steel saw plates.

Mr. ALLISON. Mr. President, on reexamination of paragraph 137, the Senate committee recommend that it be retained in the bill.

The PRESIDENT pro tempore. The amendment, then, will be disagreed to, if there be no objection. The Chair hears no objection, and it is disagreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 139, page 43, line 13, after the word "manufacture," to strike out "1¼ cents" and insert "valued at not more than 6 cents per pound, 1 cent;" so as to make the paragraph read:

139. Axles, or parts thereof, axle bars, axle blanks, or forgings for axles, whether of iron or steel, without reference to the stage or state of manufac-

ture, valued at not more than 6 cents per pound, 1 cent per pound: *Provided*, That when iron or steel axles are imported fitted in wheels, or parts of wheels, of iron or steel, they shall be dutiable at the same rate as the wheels in which they are fitted.

The amendment was agreed to.

Mr. VEST. I wanted to inquire of the Senator in charge of the bill why that grade is changed there, and the words "valued at not more than 6 cents per pound, 1 cent" inserted? That language is not in the McKinley Act nor in the existing law. There may be some good reason for it; and if so, I should like to know what it is.

Mr. ALLISON. I suppose the reason for it is that if valued at more than 6 cents per pound, the axles will go into the basket clause and pay a duty of 45 or 35 per cent ad valorem, whichever it may be. It is intended that very high-grade axles shall pay a higher rate of duty than that proposed here. There are fine axles sold at 20, 30, 50, and 60 cents per pound.

The reading of the bill was resumed at paragraph 140, on page 43, line 18, as follows:

140. Blacksmiths' hammers and sledges, track tools, wedges, and crowbars, whether of iron or steel, 1¼ cents per pound.

Mr. VEST. I intended to make a remark on paragraph 138 as to the increased duty upon anvils. The duty under the existing law is 1¼ cents a pound, under the McKinley Act 2¼ cents, and in this bill 2 cents a pound. It is not a matter of any very general importance, but it is one of very great importance to the blacksmiths of the country, who, as a rule, are not a wealthy class.

I make this statement, which the Senator from Iowa, I think, will concede to be true, that there are anvils made abroad—I can not just now recall the name, though I have documents in regard to the subject—which are absolutely necessary to the blacksmiths of this country, which can not be produced in the United States, and never have been. They have a rebounding quality which we have never been able to give to the anvils made in the United States. You can go to the poorest neighborhood in the Western States and you will find one of these imported anvils. They are resonant and rebounding, they endure for an indefinite period, and they have never been produced in this country. This is a notorious fact, and I can not understand why there should be an increase upon an article of that kind in this great bill, which is to produce millions of dollars of revenue.

If the Senate will permit me, by unanimous consent, I will go back and move to restore the duty to what it is under the existing law.

Mr. ALLISON. At 1¼ cents?

Mr. VEST. Yes.

The PRESIDENT pro tempore. Is there objection?

Mr. ALLISON. I do not object to going back.

The PRESIDENT pro tempore. The Chair hears no objection, and paragraph 138 will be again read.

The Secretary read as follows:

138. Anvils of iron or steel, or of iron and steel combined, by whatever process made, or in whatever stage of manufacture, 2 cents per pound.

Mr. ALLISON. I am told that many of these anvils are very expensive. It may be that 1¼ cents a pound will be sufficient duty, but I do not think so.

Mr. VEST. The Senator from Iowa knows that the statement I made in regard to these anvils is true. I have had occasion to examine it under two tariff bills. I can not recall the name, but the junior Senator from Iowa [Mr. GEAR] gives me the first name. It is Peter somebody. He makes these anvils as they have never been made by anybody else. He has some secret process, and we have never been able to reproduce them in the United States. I know they are used by every poor blacksmith in the West. I have had them repeatedly tell me in Missouri that if it took all they had, they would buy one of these anvils, because they could not do their work with an American anvil. This is one of those peculiar cases not confined to any foreign country, because we produce articles that can not be produced abroad.

Mr. ALLISON. I make no contest about that statement.

The PRESIDENT pro tempore. The amendment submitted by the Senator from Missouri will be stated.

The SECRETARY. In paragraph 138, page 43, line 10, before the word "cents," it is proposed to strike out "two" and insert "one and three-fourths;" so as to read:

138. Anvils of iron or steel, or of iron and steel combined, by whatever process made, or in whatever stage of manufacture, 1¾ cents per pound.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Missouri. [Putting the question.] The "ayes" appear to have it.

Mr. ALLISON. If the Chair decides that the "ayes" have it, I shall not call for the yeas and nays.

Mr. VEST. Oh, no, let it go; it is right.

The PRESIDENT pro tempore. The "ayes" have it; and the amendment is agreed to.

The reading of the bill was resumed at paragraph 142, as follows:

142. Card-clothing manufactured from tempered steel wire, 45 cents per square foot; all other, 30 cents per square foot.

Mr. PLATT of Connecticut. I should like to have that paragraph passed for a few minutes, and perhaps for the day.

The PRESIDENT pro tempore. Without objection, paragraph 142 will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 145, page 44, line 10, after the word "act," to strike out "1¼ cents" and insert "nine-tenths of 1 cent;" so as to make the paragraph read:

145. Castings of malleable iron not specially provided for in this act, nine-tenths of 1 cent per pound.

The amendment was agreed to.

The reading of the bill was resumed; and paragraphs 146 and 147 were read, as follows:

146. Cast hollow ware, coated, glazed, or tinned, 2 cents per pound.

147. Chain or chains of all kinds, made of iron or steel, not less than three-fourths of 1 inch in diameter, 1½ cents per pound; less than three-fourths of 1 inch and not less than three-eighths of 1 inch in diameter, 1¾ cents per pound; less than three-eighths of 1 inch in diameter and not less than five-sixteenths of 1 inch in diameter, 2 cents per pound; less than five-sixteenths of 1 inch in diameter, 3½ cents per pound; but no chain or chains of any description shall pay a lower rate of duty than 45 per cent ad valorem.

Mr. WHITE. Mr. President, in respect to paragraph 147, I have a communication here to which I desire to attract the attention of the Senate. It is from the firm of Hermann Boker & Co., importers, of New York. It is as follows:

NEW YORK, *March 24, 1897.*

DEAR SIR: The proposed new tariff calls for a duty of 3¼ cents per pound on chains of all kinds, made of iron or steel, not less than five-sixteenths of an inch in diameter, provided that the duty shall not be less than 45 per cent ad valorem.

Practically all the chain which is imported is made of iron or steel less than five-sixteenths of an inch in diameter.

Under the tariff bill of 1890 the duty on such chains was 2¼ cents per pound, provided that the duty should not be less than 45 per cent ad valorem.

The duty on such chains which is paid under the present Wilson bill is 30 per cent ad valorem.

The importations of chain have for the last few years steadily decreased, chain made in this country gradually taking the place of the imported chain.

We beg to hand you, inclosed, a table showing the duties which would have to be paid under the proposed new tariff, compared with the duties paid under the tariff of 1890. These duties would be equal to about 90 per cent ad valorem on some sizes and equal to about 70 per cent on the most salable sizes. These duties would be prohibitive, prevent all further importation of chain, and appear excessively high.

We would propose a duty of 30 or 35 per cent ad valorem on chain. This would give the American manufacturers sufficient protection and still allow some chain to be imported and continue to give revenue to the Government.

Respectfully, yours,

HERMANN BOKER & CO.

Hon. STEPHEN M. WHITE, of California,
Committee on Finance, United States Senate, Washington, D. C.

Accompanying this letter is a short table, which I will ask to have inserted in the RECORD.

The PRESIDENT pro tempore. It will be so ordered, in the absence of objection.

The table referred to is as follows:

Duty on chains.

	Coil chains (per 100 feet).		Halters, 4½ feet (per dozen).		Halters, 6 feet (per dozen).	
	Cost in Europe.	Duty.	Cost in Europe.	Duty.	Cost in Europe.	Duty.
No. 6-0	$2.30	$2.15				
No. 5-0	2.00	1.69				
No. 4-0	1.70	1.47	$1.20	$1.01	$1.55	$1.27
No. 3-0	1.50	1.30	1.03	.82	1.30	1.01
No. 2-0	1.35	1.07	.93	.68	1.16	.77
No. 0	1.25	.84	.84	.51	1.05	.64
No. 1	1.15	.67	.77	.42	.98	.57
No. 2	1.05	.52		*45		
No. 3		*45		*45		
No. 4		*45		*45		
No. 5		*45		*45		

*Per cent.

Mr. WHITE. I observe the Senate amendment reduces the rates to which this correspondent refers, but they still seem, in view of the importations, to be very high.

Mr. VEST. A very objectionable feature of this paragraph is what might be called the basket-clause provision—that all these articles shall bear not less than 45 per cent ad valorem. I have several communications here, amongst others that of Hermann Boker & Co., of New York, and those gentlemen coincide with Joseph F. McCoy Company, a very reputable house, which I happen to know, who are very conversant with all this matter of chains, for they import largely and also deal in the domestic article. They declare that the clause putting 45 per cent upon chains is in itself prohibitive.

I am informed by an expert, who has examined this clause and makes report to me, that it amounts to 4 cents a pound upon chains of every description, and is a large increase over the existing law. I ask the Secretary to read the letter from this house of Joseph F. McCoy Company, whose character is enough to warrant its being read.

The PRESIDENT pro tempore. Without objection, the letter will be read.

The Secretary read as follows:

NEW YORK, *May 15, 1897.*

Hon. SENATOR VEST.

DEAR SIR: We beg to call your attention to paragraph 147 of the Senate tariff bill.

The clause providing that no chain shall pay less than 45 per cent duty is of itself an advance of 50 per cent ad valorem on the present rates under the Wilson bill, and in our opinion is entirely unnecessary from a revenue standpoint.

American makers are fast driving the foreign chain out of the market, even at the present rate of duty at 30 per cent ad valorem, and if revenue is wanted, duty should be left at 30 per cent or reduced below that figure.

It is only a few kinds of chain that are now imported, most of the principal importations of chain being coil and halter chain from Germany.

The importation of this kind of chain is lessening every year, and how the Government is to get any revenue from it in the future by increasing the present rate of duty, and lessening the opportunity for importing in the future, we can not tell.

To make the duty 45 per cent will no doubt lessen revenue, and to make the duty on the principal sizes sold so extreme, as shown in our statement, will certainly stop importation and advance prices of American chain to all just as soon as business improves.

Prohibiting goods from coming here, and making every consumer among 70,000,000 people pay a "stand up and deliver" tax, may properly be named something else than protection.

If revenue is honestly sought for in the Dingley bill or Senate bill, we are with the powers that be.

The prices inclosed we can verify whenever necessary, and hope your efforts will be given to a tariff bill for revenue proposed including justice to all.

Mr. VEST. Mr. President, as I had occasion to remark, the duties can not be less than 45 per cent ad valorem, and without inflicting this table upon the Senate, which I have had an expert examine, and which he declares to be correct, it is enough to say in conclusion that the McCoy Company make these duties 102 per cent, 87 per cent, 87½ per cent, 75 per cent, and 51 per cent, always provided that the duty can not be less than 45 per cent.

There is no sort of excuse for these increases. We command the market of the United States, and we are able to do it upon all these articles of iron and steel. We export, and there is no country in the world that competes with us successfully or can undersell us. You go to Europe to-morrow, and you will find all over the Continent American steel and iron manufactures underselling the foreigners. There are only one or two articles in which they can undersell us.

For instance, take the very low-priced German knives, which we can not produce in this country for less than 25 cents, and they are made there for 5 and 6 cents. With that exception, even when you come to metals, clocks and watches, you will find American clocks and American watches for sale in Germany and in France. We are the most ingenious people in the world; we have the largest natural resources; we have the best workmen in the world, and why should we continue to put up these enormous duties? It can not be to hold the American market, for we have got it, admittedly got it. The only possible reason there can be for it, the only possible excuse for it, is to enable the American manufacturer to put up the price of his goods to the American consumer.

I had occasion to produce in 1890, and can produce to-morrow, the Export Journal, published in the city of New York, showing that our manufactures of agricultural implements of every description, such as spades, shovels, hoes, reapers, mowers, plows, rakes, hatchets, axes, are advertised to be sold at a discount to the foreigner on the price charged the American consumer. Two weeks ago I was conversing with an American manufacturer, and when I asked why this was, and told him I had tables which showed that there was a discount of 45 or 50 per cent on these goods free on board ship if sold to foreigners, and that they were so sold in European and South American markets, his answer was coolly, "That is the surplus after supplying the American market, and we have not any use for it; it is like the remnant of an old stock of goods, we put them up and sacrifice them." But it shows that these duties are not necessary except for the purpose of putting up the price to the American consumer.

Mr. Blaine, a very distinguished statesman, as we all know, who claimed to be the father of reciprocity, agreed upon a differential duty of from 25 to 30 per cent with Brazil and the South American Republics, including Argentina; that is to say, if they would let our goods come in at a certain price, we would make a discount upon theirs, and Mr. Blaine's report shows—and I have had occasion to read it to the Senate, and that is claimed by our Republican friends—that with a discount, or with a difference of 25 per cent, we would be able to compete with the British and the French and the Germans in the South American market. If we can pay transportation and with only 25 per cent difference in duties take the market away from the foreigners in South America, why can we not get along in the United States with less than 105, 90, and 75 per cent of taxation? I never heard any successful answer to that question, and I never expect to.

The PRESIDENT pro tempore. The amendment reported by he committee will be stated.

The next amendment of the Committee on Finance was, on page 44, paragraph 147, line 15, before the words "per pound," to strike out "and one-fourth cents" and insert "cent;" in line 18, before the word "cents," to strike out "one-half" and insert "one-fourth;" in line 19, after the word "diameter," to strike out "and not less than five-sixteenths of 1 inch in diameter;" in line 20, before the word "cents," to insert "and one-half;" and in line 21, after the word "pound," to strike out "less than five-sixteenths of 1 inch in diameter, 3½ cents per pound;" so as to make the paragraph read:

147. Chain or chains of all kinds, made of iron or steel, not less than three-fourths of 1 inch in diameter, 1 cent per pound; less than three-fourths of 1 inch and not less than three-eighths of 1 inch in diameter, 1½ cents per pound; less than three-eighths of 1 inch in diameter, 2½ cents per pound; but no chain or chains of any description shall pay a lower rate of duty than 45 per cent ad valorem.

The amendment was agreed to.

Mr. WHITE. I move to substitute for section 147 the following language, being section 137 of the present law:

Chains of all kinds, made of iron or steel, 30 per cent ad valorem.

The PRESIDENT pro tempore. The amendment proposed by the Senator from California will be stated.

The SECRETARY. It is proposed to strike out all of section 147 as amended and insert:

Chains of all kinds, made of iron or steel, 30 per cent ad valorem.

Mr. WHITE. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. McLAURIN (when his name was called). I am paired with the Senator from Utah [Mr. CANNON], and therefore withhold my vote.

Mr. McMILLAN (when his name was called). Under the transfer of my pair with the Senator from Kentucky [Mr. LINDSAY] to the Senator from Rhode Island [Mr. ALDRICH], I am at liberty to vote, and I vote "nay."

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. Otherwise I should vote "yea."

Mr. TILLMAN (when his name was called). I have a general pair with the Senator from Nebraska [Mr. THURSTON]. He not being present, I withhold my vote.

Mr. WILSON (when his name was called). I again announce my pair with the Senator from Florida [Mr. PASCO]. If he were present, he would vote "yea" and I should vote "nay."

The roll call was concluded.

Mr. GRAY (after having voted in the affirmative). I have a general pair with the Senator from Illinois [Mr. CULLOM]. As he is not in his seat, I withdraw my vote.

Mr. VEST (after having voted in the affirmative). I ask unanimous consent to declare my pair with the Senator from Rhode Island [Mr. ALDRICH], and I ask to withdraw my vote.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). That will be the order, in the absence of objection.

The result was announced—yeas 17, nays 32; as follows:

YEAS—17.

Bacon,	Cockrell,	Mills,	Walthall,
Bate,	Harris, Kans.	Mitchell,	White.
Berry,	Heitfeld,	Morgan,	
Chilton,	Jones, Ark.	Pettus,	
Clay,	Kenney,	Turpie,	

NAYS—32.

Allison,	Frye,	McBride,	Platt, N. Y.
Burrows,	Gallinger,	McEnery,	Pritchard,
Carter,	Gear,	McMillan,	Quay,
Clark,	Hale,	Mason,	Sewell,
Davis,	Hanna,	Nelson,	Shoup,
Deboe,	Hawley,	Penrose,	Spooner,
Fairbanks,	Hoar,	Perkins,	Stewart,
Foraker,	Lodge,	Platt, Conn.	Wetmore.

NOT VOTING—40.

Aldrich,	Faulkner,	Mallory,	Smith,
Allen,	George,	Mantle,	Teller,
Baker,	Gorman,	Martin,	Thurston,
Butler,	Gray,	Morrill,	Tillman,
Caffery,	Hansbrough,	Murphy,	Turner,
Cannon,	Harris, Tenn.	Pasco,	Vest,
Chandler,	Jones, Nev.	Pettigrew,	Warren,
Cullom,	Kyle,	Proctor,	Wellington,
Daniel,	Lindsay,	Rawlins,	Wilson,
Elkins,	McLaurin,	Roach,	Wolcott.

So the amendment was rejected.

The reading of the bill was resumed at paragraph 148. The next amendment of the Committee on Finance was, in paragraph 148, page 45, line 4, after the word "pounds," to insert "all other iron or steel tubes, finished or unfinished, not specially provided for in

this act, 30 per cent ad valorem;" so as to make the paragraph read:

148. Lap welded, butt welded, seamed, or jointed iron or steel boiler tubes, pipes, flues, or stays, not thinner than No. 16 wire gauge, 2 cents per pound; welded cylindrical furnaces, made from plate metal, 2½ cents per pound; all other iron or steel tubes, finished or unfinished, not specially provided for in this act, 30 per cent ad valorem.

Mr. CHILTON. In this schedule there has been a general tendency to follow the Wilson rates, but here is an instance in which the Senate committee have raised the Wilson duty from 25 to 30 per cent, and it seems to me the increase is entirely unjustifiable. The proviso which has been added to this paragraph reaches what are known as hollow billets, such tubes, I may say to my friend the Senator from Georgia [Mr. BACON], as are used for bicycle purposes. Those billets are produced in Sweden, and none of them are made by the iron men in this country.

The only beneficiary of this particular increase of tariff, according to my information, would be the American patentee of a machine used to hollow out solid billets. All the billets made in the United States are solid billets, and he has invented a machine for hollowing out those billets. The duty fixed in this paragraph does not even rise to the dignity of helping American industries. It would help but a single individual or firm, and that is the individual or firm which will enjoy a complete monopoly by reason of a patented invention.

There was a revenue last year of $300,000, I believe, from the importation of these hollow billets, and it should not be cut off by making the duty too high. I wish to ask the Senator from Iowa if he can state any good reason for increasing the tariff on these hollow billets? We should vote down the committee amendment, and then put hollow billets in the former clause of the paragraph at same rate as boiler tubes.

Mr. ALLISON. I do not think it is a very great increase. It is 30 per cent ad valorem. It is largely confined to hollow tubes and hollow billets used for the manufacture of bicycles. There is no doubt about that. I do not think it is an excessive duty at all, judging from the price we pay for bicycles these days, and I think it is a very good revenue duty.

Mr. JONES of Arkansas. In that connection, I will read a clipping which I took from a paper a few days ago, dated Pittsburg, May 20:

For the past month or so representatives of the four largest bicycle-tube manufactories in the Midland England have been negotiating with tube plants in this country, looking to the formation of an international bicycle-tube trust. To-night it is announced that their mission to this country has been successful, and the first international trust of the kind has been formed.

The trust has bought outright the tube plants at Ellwood and Greenville, Pa. The price paid for the two plants and the privilege of using the Stiefel seamless-tube process was close to $3,000,000.

The only other tube plants in this country are at Shelbyville and Toledo, and Brooklyn, N. Y. It is not probable that these plants will be taken into the trust.

Possibly that may throw some light on the subject.

Mr. ALLISON. Not very much.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the Committee on Finance.

Mr. CHILTON. On that I ask for the yeas and nays. The proviso is proposed to be added by the Senate.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLARK (when his name was called). I am paired with the junior Senator from Kansas [Mr. HARRIS]. He is not present, and I therefore withhold my vote.

Mr. HANSBROUGH (when his name was called). I am paired with the Senator from Virginia [Mr. DANIEL].

Mr. LODGE (when his name was called). I have a general pair with the junior Senator from Georgia [Mr. CLAY]. I do not see him present, and therefore withhold my vote. If he were present, I should vote "yea."

Mr. McLAURIN (when his name was called). I am paired with the Senator from Utah [Mr. CANNON].

Mr. TILLMAN (when his name was called). I have a pair with the Senator from Nebraska [Mr. THURSTON], and therefore withhold my vote.

Mr. WHITE (when his name was called). For the purpose of this vote I am paired with the Senator from Rhode Island [Mr. ALDRICH], who is detained from the Chamber. Were he present, I should vote "nay" and he would vote "yea."

Mr. WILSON (when his name was called). I have a general pair with the Senator from Florida [Mr. PASCO]. If he were present, he would vote "nay" and I should vote "yea."

The roll call was concluded.

Mr. WHITE. I will transfer the pair which, as I stated a moment ago, I have with the Senator from Rhode Island [Mr. ALDRICH] to the Senator from Florida [Mr. PASCO].

The result was announced—yeas 31, nays 16; as follows:

YEAS—31.

Allison,	Frye,	McEnery,	Quay,
Burrows,	Gallinger,	McMillan,	Sewell,
Carter,	Gear,	Mason,	Shoup,
Chandler,	Hale,	Nelson,	Spooner,
Davis,	Hanna,	Perkins,	Stewart,
Deboe,	Hawley,	Platt, Conn.	Wetmore,
Fairbanks,	Hoar,	Platt, N. Y.	Wilson.
Foraker,	McBride,	Pritchard,	

NAYS—16.

Bacon,	Chilton,	Mitchell,	Turpie,
Bate,	Cockrell,	Morgan,	Vest.
Berry,	Jones, Ark.	Pettigrew,	Walthall,
Caffery,	Mills,	Pettus,	White.

NOT VOTING—42.

Aldrich,	George,	Lodge,	Roach,
Allen,	Gorman,	McLaurin,	Smith,
Baker,	Gray,	Mallory,	Teller,
Butler,	Hansbrough,	Mantle,	Thurston,
Cannon,	Harris, Kans.	Martin,	Tillman,
Clark,	Harris, Tenn.	Morrill,	Turner,
Clay,	Heitfeld,	Murphy,	Warren,
Cullom,	Jones, Nev.	Pasco,	Wellington,
Daniel,	Kenney,	Penrose,	Wolcott.
Elkins,	Kyle,	Proctor,	
Faulkner,	Lindsay,	Rawlins,	

So the amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, under the head of "Cutlery," on page 45, to strike out all after line 7 down to and including line 15, on page 46, as follows:

149. Penknives, pocketknives, or clasp knives, and erasers or manicure knives of all kinds, or parts thereof, wholly or partially manufactured, including such as have corkscrews, file blades, or manicure blades, each of which shall be held to be a blade, if valued at not more than 40 cents per dozen, 10 cents per dozen and 15 per cent ad valorem: all others, having but one blade, 50 cents per dozen and 20 per cent ad valorem; if having but two blades, $1 per dozen and 20 per cent ad valorem; if having but three blades, $1.50 per dozen and 20 per cent ad valorem; if having four blades or more, $2 per dozen and 20 per cent ad valorem; and on all the articles in this paragraph with handles or handle coverings of pearl or tortoise shell, having but two blades, 50 cents per dozen, and having three blades or more, 75 cents per dozen, in addition to the foregoing rates. Razors or razor blades, finished or unfinished, valued at not more than $3 per dozen, $1 per dozen; valued at more than $3 per dozen, $1.75 cents per dozen, and in addition thereto, on all razors and razor blades, 15 per cent ad valorem. Scissors and shears, finished or unfinished, valued at not more than $1.75 per dozen, 50 cents per dozen and 15 per cent ad valorem; valued at more than $1.75 per dozen, 75 cents per dozen and 20 per cent ad valorem.

And insert in lieu thereof:

149. Penknives or pocketknives, clasp knives, pruning knives, and budding knives of all kinds, or parts thereof, and erasers or manicure knives, or parts thereof, wholly or partly manufactured, valued at not more than 40 cents per dozen, 40 per cent ad valorem; valued at more than 40 cents per dozen and not exceeding 50 cents per dozen, 1 cent per piece and 40 per cent ad valorem; valued at more than 50 cents per dozen and not exceeding $1.50 per dozen, 5 cents per piece and 40 per cent ad valorem; valued at more than $1.50 per dozen and not exceeding $3 per dozen, 10 cents per piece and 40 per cent ad valorem; valued at more than $3 per dozen, 20 cents per piece and 40 per cent ad valorem. Razors and razor blades, finished or unfinished, valued at not more than $1.50 per dozen, 50 cents per dozen and 15 per cent ad valorem; valued at more than $1.50 and not more than $3 per dozen, $1.75 per dozen and 20 per cent ad valorem. Scissors and shears, and blades for the same, finished or unfinished, valued at more than 50 cents per dozen, 15 cents per dozen and 15 per cent ad valorem; valued at more than 50 cents and not more than $1.75 per dozen, 50 cents per dozen and 15 per cent ad valorem; valued at more than $1.75 per dozen, 75 cents per dozen and 25 per cent ad valorem.

Mr. ALLISON. I wish to offer an amendment. After line 8, on page 47, I move to insert what I send to the desk.

The SECRETARY. After the words "ad valorem," in line 8, page 47, it is proposed to insert the following proviso:

Provided, That blades, handles, or other parts of either or any of the foregoing articles, imported in any other manner than assembled in finished knives or erasers, shall be subject to no less rate of duty than herein provided for penknives, pocketknives, clasp knives, pruning-knives, manicure knives, and erasers valued at more than 50 and not more than $1.50 per dozen.

The PRESIDING OFFICER. The amendment of the committee will be modified according to the suggestion of the Senator from Iowa.

Mr. ALLISON. In line 9, I move to strike out, beginning with the word "Razors" and ending with the words "ad valorem," in line 16, and insert what I send to the desk, which is merely a change of phraseology, and provides for a bracket which was omitted.

The SECRETARY. After the amendment just adopted, strike out all of the bill down to and including the words "ad valorem," in line 16, and insert:

Razors and razor blades, finished or unfinished, valued at less than $1.50 per dozen, 50 cents per dozen and 15 per cent ad valorem; valued at $1.50 per dozen and less than $3 per dozen, $1 per dozen and 15 per cent ad valorem; valued at $3 per dozen or more, $1.75 per dozen and 20 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment as amended.

Mr. VEST. I offer a substitute for the entire paragraph.

The PRESIDING OFFICER. The Senator from Missouri offers a substitute for the paragraph, which will be stated.

The SECRETARY. It is proposed to strike out paragraph 149 and insert:

149. Penknives, pocketknives, or clasp knives, and erasers or manicure knives of all kinds, or parts thereof, wholly or partially manufactured, including such as have corkscrews, file blades, or manicure blades, each of which shall be held to be a blade, if valued at not more than 40 cents per dozen, 10 cents per dozen and 15 per cent ad valorem; all others having but one blade, 40 cents per dozen and 30 per cent ad valorem; if having but two blades, 60 cents per dozen and 20 per cent ad valorem; if having but three blades, 80 cents per dozen and 20 per cent ad valorem; if having four blades or more, $1 per dozen and 20 per cent ad valorem: *Provided*, That no article of the above named shall pay a higher rate of duty than 70 per cent ad valorem.

Razors or razor blades, finished or unfinished, valued at not more than $4 per dozen, $1 per dozen; valued at more than $4 per dozen, $1.75 per dozen, and in addition thereto, on all razors and razor blades, 15 per cent ad valorem.

Scissors and shears, finished or unfinished, 45 per cent ad valorem.

Mr. VEST. On account of the change of classification it is impossible, from the comparative statement, to tell what have been the increases in the duty upon cutlery and razors and erasers. I have before me a statement of the house of Alfred Field & Co., as reputable as there is in the world, the largest cutlery house in the United States, not so large an establishment, if hardware be included, as the Simmons Hardware Company, of St. Louis, which, possibly, is the largest establishment in the world, but they deal not only in cutlery, but in hardware besides. The house of Alfred Field deals in cutlery and guns and pistols.

Before going to the articles in detail, here is a calculation based upon the actual import prices at the custom-house in New York which you will not find in the comparative statement. It is impossible to run it out under the classification as made. The statement which I have shows the duty under the Wilson Act, under the Dingley bill, and under the Senate amendment.

Comparative statement of duties on cutlery.

Articles.	Wilson average.	Dingley average.	Senate amendment average.	Dingley increase over Wilson.	Senate amendment increase over Wilson.
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*	*Per cent.*
Pocket cutlery	50	137	90	160	87½
Razors	45	57	60	26	33⅓
Scissors and shears	45	72	72	60	60
Table knives, pearl handles	45	65	65	45	45
Table knives, ivory handles	35	80	80	130	130
Table knives, rubber and celluloid handles	35	55	55	60	60
Table knives, bone handles	35	150	150	330	330
Table knives, stag handles	35	160	160	360	360
Carving knives and forks, stag handles	35	65	65	90	90

They also give the same information as to breech-loading guns, and although we have not yet reached that item I will give the figures. Under the Wilson Act, the existing law, it is 30 per cent, 70 per cent under the Dingley bill, 55 per cent under the Senate amendment, being an increase of 133 per cent by the Dingley bill and of 83 per cent by the Senate amendment.

I have here a table prepared by the same house, and I personally vouch for the integrity and correctness of the house. Mr. Saxton, the principal superintendent of the house, I know well. I have known him since 1890, when he was here representing the interest of the importers of his house, Alfred Field & Co. He stands at the head of his business. He never has been impeached as to integrity and fairness. This shows, without going into detail, that upon the lower-priced goods the increase of duty is the heaviest. That extends entirely through the whole schedule.

It is almost incredible that there should be an increase of 330 to 340 per cent over existing duties on an article of common necessity, both pocketknives and table cutlery.

Mr. President, the condition of the trade is not such as to warrant any such increase. I happen to have before me an advertisement, in the Iron Age of March 11, 1897, of the Goodell Cutlery Company, of Antrim, N. H., in which they declare: "Our cutlery business has increased 2,300 per cent in twenty years."

CUTLERY. Table knives and forks, carvers and butchers, shoe, bread, cheese, putty, kitchen knives, etc., in great variety.

Our cutlery business has increased *twenty-three hundred per cent* in twenty years. Incomparable merit, equitable prices, fair dealing did it.

The best jobbing trade handle our lines.

GOODELL COMPANY, *Antrim, N. H.*

Two thousand three hundred per cent in twenty years!

Mr. HAWLEY. Will the Senator from Missouri tell me how many the company made the first year?

Mr. VEST. I have not an idea, but there is the statement. I have put it in the RECORD and the Senator from Connecticut can examine it. It makes no difference, it seems to me, when the increase took place.

Mr. HAWLEY. If the Senator will pardon me, suppose the company made only one the first year.

Mr. VEST. Then they made up in the balance of the years, and so much higher the compliment to the existing system of tariff taxation. If they commenced at 1 per cent and then went up to 2,300 per cent in twenty years, I take it they could not have had much more legislation in their favor, if it came from legislation. Two thousand three hundred per cent in twenty years! It shows that this is no infant industry; that it has not perished under the duties of the Wilson Act; that there is no necessity for these enormous increases on pocket cutlery of 330 and 340 per cent.

Mr. HOAR. Will the Senator from Missouri pardon me? I have known a great many industries to start in my own city of Worcester, which has a great variety, and nearly every one of them, I think, has increased 2,300 per cent the first year.

Mr. CHANDLER. If the Senator from Missouri will allow me, suppose that twenty years ago they did $1,000 worth of business, and now they do $23,000 worth of business. That would have been an increase of 2,300 per cent, would it not?

Mr. VEST. It certainly shows that they have not died.

Mr. CHANDLER. They have existed. There is nothing remarkable in this statement. The Senator is confounding the gross amount of business done with the tariff rate. It is simple enough, if the Senator would be inclined to look at it fairly. This was a petty business twenty years ago, a few hundred dollars, perhaps $1,000 or $2,000, worth of business. Now it is twenty-three times as large, and the business has been built up as against the cheap cutlery of England by tariff duty, but it is now languishing. There are differences of opinion as to what makes the hard times, and we might have a long debate on all the causes that contribute to hard times, but that the cutlery manufacture in this country needs a very large protection against the methods and the cheap labor of Europe there is no doubt, and nobody knows it any better than the Senator from Missouri.

Mr. VEST. I stand here to say, and can prove it, that the American manufacturer of cutlery, upon all except the very lowest-priced German knives, has taken the trade away from the foreigner.

Mr. PLATT of Connecticut. Will the Senator from Missouri allow me one word?

Mr. VEST. Certainly.

Mr. PLATT of Connecticut. I do not propose to discuss the subject very much. The number of dozens of knives imported in the year ending June 30, 1896, was 1,266,882. The number of dozens of knives made in the United States, estimated as nearly as possible, was 250,000 dozen, being about one-fifth of the quantity imported.

Mr. VEST. I have no disposition to deal unfairly with this subject. I state that upon knives up to 15 or 20 cents, which are manufactured in Germany, the American manufacturer has never pretended to compete, but when you go above 25 cents for a knife, when you go to $22 and $23 a dozen, we have taken the domestic market away from the foreigner. The cutlery business in the United States is in a flourishing condition compared with other trades and other productions. Of course there is general depression; that goes without saying; but the cutlery industry has not suffered out of proportion or anything like in the same proportion with other industries in the United States.

Now, we have the contention always that without this enormous protection these industries linger and languish and die. I do not care when the 2,300 per cent increase took place. Suppose it commenced with a business of $1,000 and increased 2,300 per cent upon that capital. The fact remains that it has not lingered and has not languished and has not died.

Now let us go to the other contention, that the tariff is imposed for the purpose of equalizing the difference in labor cost in this country and abroad. I have in my hand the official report of the commissioner of labor of Connecticut for the year 1893, upon the different interests in that State. The gentleman who made it is a Republican and a protectionist, and he can not be suspected of any sympathy with me on the tariff question.

Mr. PLATT of Connecticut. For what year?

Mr. VEST. For 1893. It is the last one I have been able to obtain. On cutlery the proportion of labor out of 100 is 51.57, an unusual proportion of labor. Is it necessary to put on a protective duty of 100 or 125 per cent in order to cover a difference of labor of 51.57? In the census reports the amount of labor in cutlery is 44 per cent out of 100. There can be no pretense that the duties

in the pending bill are for the purpose of equalizing the difference in labor.

Mr. PLATT of Connecticut. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Connecticut?

Mr. VEST. Certainly.

Mr. PLATT of Connecticut. That report of the labor commissioner embraces all cutlery, I think—table cutlery and pocket cutlery.

Mr. VEST. I am talking about all of it.

Mr. PLATT of Connecticut. I suppose that, on an average, it may be a correct estimate of the rate, but on pocket cutlery there is no question but that the labor cost is from 85 to 90 per cent.

Mr. VEST. This commissioner puts it at 40 to 45 per cent. Here is the official report, and I am bound to state that I believe it is correct, because it comes from a witness who has not the slightest sympathy with my opinions on this question.

Mr. President, in addition to that, I have here a very fair statement from the importers of cutlery in the United States. I will ask the Senator from California [Mr. WHITE] to read it. His voice is better than mine. I will ask the Senator first to read the names of the signers, all the large cutlery merchants in the United States. I call the attention of the Senate to it, and I state now that it is the fairest statement I have ever read upon cutlery.

Mr. WHITE. The document referred to by the Senator is signed by Alfred Field & Co., Hermann Boker & Co., Vom Cleff & Co.; Geo. Wostenholm & Son, Limited, per Edward Beckett; Wiebusch & Hilger, Limited, per W. M. Taussig, treasurer; Graef & Schmidt, Fabyan Knife Company; Joseph F. McCoy Company, Joseph F. McCoy, president; Geo. Borgfeldt & Co., F. A. Koch & Co., and John G. Witte & Bro.

The statement is as follows:

CUTLERY.

NEW YORK CITY, *May 22, 1897.*

The Finance Committee of the Senate, Washington, D. C.

GENTLEMEN: We, the undersigned, desire to make a most earnest and emphatic protest in opposition to the complex system of duties, based on value, as incorporated in the Senate amendment to the Dingley bill on cutlery.

It is claimed that the mixed duties prevent undervaluation. It is the very method that makes undervaluation easily possible. We claim to be honest merchants, and challenge the strictest investigation of our records, both inside and outside the appraisers' department, and in some cases our records cover a period of sixty years.

Prior to the McKinley tariff the rates on cutlery were purely ad valorem, and under that system cases of undervaluation were substantially unknown, because, in order to make any satisfactory gain, the undervaluation must naturally be so great that the risk involved deterred dishonest people from the attempt.

It has been shown to the Committee on Ways and Means that under the complex system of the McKinley tariff on pocketknives, by an undervaluation of 5 per cent only, a saving of 21 per cent in the cost of the goods could be made, and by the same system under the Wilson tariff, by an undervaluation of 5½ per cent only, a saving of 16 per cent in the cost of the goods could be obtained, and that these results could not be accomplished under a purely ad valorem system, representing the equivalent rates of duty, without undervaluations of about 40 per cent and 31½ per cent, respectively, which would be easily detected, and incur tremendous penalty.

It has been demonstrated over and over again that the system of mixed duties on cutlery, based on value, has the effect of putting the trade into the hands of unscrupulous men, and of driving honest men out of business, and this has been the condition ever since the inauguration of the system. To substantiate the statement, we appeal to the appraisers' department, and to the Board of General Appraisers. Therefore, by adopting such a system, the Government has, under the McKinley and Wilson bills, been put into the unenviable position of backing up dishonesty, and the Senate substitute to the Dingley bill proposes to continue the iniquitous plan.

The Dingley rates, dividing the different classes by number of blades, instead of by values, while absolutely prohibitory on the great bulk of pocket cutlery of all sorts, had this merit: They were not in favor of dishonesty. If they drove out of business the honest men, they would also drive out the dishonest men. We therefore submit that the only just and equitable method of levying duties on such goods as cutlery, where values vary many hundreds per cent on same descriptions, is by purely ad valorem rates.

We understand the American manufacturers of pocketknives, before the Ways and Means Committee, contended for an average of 70 per cent ad valorem, but submitted a misleading schedule, which was adopted by that committee, and which, based on the importations for the fiscal year 1890, figures out an average of 137 per cent ad valorem. The average ad valorem rate on pocketknives under the McKinley tariff was 91½ per cent, which resulted in a decrease of importations for the fiscal year 1894 of 70 per cent from the imports of 1890, showing that these goods can not stand any such excessive rates as were imposed by that tariff.

The average rate under the Wilson tariff is 53 per cent, and, while giving ample protection to American manufacturers, has produced considerable revenue, and would have produced more, except for the ease it affords dishonest people to swindle the Government. There is no reason for supposing that, if the rates proposed in the Senate amendment, which average 99 per cent, should be put in operation, any different result would follow than under the McKinley rates, and it is quite safe to predict that any such rates as proposed in the Senate amendment must prove an ultimate failure from a revenue standpoint. When it is understood that 85 per cent of all pocket cutlery imported costs abroad less than $1.50 per dozen, passing into the hands of consumers of small means, it will be seen that to levy the enormous rates proposed will prohibit the importation of these goods and deprive the people who can least afford it of the opportunity of supplying their wants, as the American manufacturers do not produce anything which can take their place.

While holding strongly to the opinion that an equitable ad valorem duty would best serve the purpose of the Government and honest merchants, nevertheless, if specific rates are insisted on, there is only one method of levying such rates and avoiding the condition of undervaluation that has existed and grown ever since the inauguration of the complex duties, based on value, and that way is to follow the scheme of the Dingley bill in taxing the number of blades. We therefore submit the following calculation, based on the imports of pocketknives for the fiscal year of 1896. This calculation averages 78½ per cent ad valorem, is quite safe against undervaluation, and is the utmost the goods will bear without utter destruction of revenue:

	Number of dozens.	Average price per dozen.	Amount.	Ad valorem.	Per dozen.	Duty.
Value not over 40 cents per dozen.	296,000	$0.26	$76,900	*Per cent.* 29	$0.10	$44,993
Value over 40 cts. per dozen:						
1-blade	48,000	.60	28,800	20	.40	24,960
2-blade	392,000	1.03	403,760	20	.60	315,953
3-blade	277,000	1.27	351,790	20	.80	291,958
4-blade	254,000	1.73	439,420	20	1.00	341,884
Total	1,267,000		1,900,730			*1,019,746

*Equal 78½ per cent.

This schedule averages a specific rate of 60 cents per dozen. The McKinley schedule averages a specific rate of 43½ cents per dozen.

Table cutlery, carvers, etc.—The most careful estimates indicate that only about 5 per cent to 7½ per cent of the consumption is imported, and these mainly on account of the reputation of the makers back of them. On all such goods the market price is well known, and no chance for undervaluation exists. These goods should, without question, be subject to an ad valorem rate only; and when we say that the American manufacturers have obtained from 90 per cent to 95 per cent of the consumption under heretofore existing rates of 35 per cent to 45 per cent, we think it must be patent to anyone that this rate is sufficient for protection, and should be made lower if increased revenue is desired. As the proposed bill now stands, stag-handle table knives and forks run up to 355 per cent; rubber, bone, and celluloid handles, up to 157½ per cent; pearl and ivory handles, up to 145 per cent; carving knives and forks, up to 175 per cent, which rates are, of course, absurd from any point of view.

Scissors and shears.—These have never paid a higher rate of duty than 45 per cent, and this rate only during the past seven years. Prior to 1890 the rate was 35 per cent, and under this rate the American manufacturers have completely captured the market on shears, and large quantities are exported, some domestic manufacturers having their own agents and places of business abroad for the sale of these goods.

Ladies' scissors are imported to some extent.

There is no way of putting specific duties on these goods except by value, and we think we have made the objection to this system clear enough. The complex rates in the proposed tariff bill average about 70 per cent, and would be largely prohibitive on account of advancing the prices to such an extent that people could not buy them. There is no warrant upon any ground for change from the present rate of 45 per cent.

Razors.—There is no way of putting specific duties on these, except they are based on value, which carries the objection we contend against. The highest rate ever put on razors, except under the McKinley Act, was 50 per cent ad valorem, and there is not just cause for any change from the present rate of 45 per cent, but as a revenue measure we recommend the adoption of 50 per cent ad valorem.

We close with a strong appeal to the Senate not to permit the adoption of any plan of duties that involves specific rates based on value, as being distinctly vicious, and encouraging immoral practices, and as being seriously detrimental to honest merchants.

We also urge that sections 149 and 151 of the tariff be amended so as to read as follows, and, the rates herein mentioned being amply protective to American manufacturers and as high as the producing of revenue will allow, we protest against any schedules adopting higher rates than the following on cutlery:

"SEC. 149. Penknives or pocketknives, clasp knives, pruning knives, and budding knives, of all kinds, or parts thereof, and erasers and manicure knives, or parts thereof, wholly or partly manufactured, valued at not more than 40 cents per dozen, 10 cents per dozen and 20 per cent ad valorem.

"Valued at more than 40 cents per dozen, one-blade, 40 cents per dozen and 20 per cent ad valorem.

"Valued at more than 40 cents per dozen, two-blade, 60 cents per dozen and 20 per cent ad valorem.

"Valued at more than 40 cents per dozen, three-blade, 80 cents per dozen and 20 per cent ad valorem.

"Valued at more than 40 cents per dozen, four-blade, $1 per dozen and 20 per cent ad valorem.

"Razors and razor blades, finished or unfinished, of all kinds, 50 per cent ad valorem.

"Scissors and shears, and blades for the same, finished or unfinished, 45 per cent ad valorem.

"SEC. 151. Table, butchers', carving, cooks', hunting, kitchen, bread, butter, vegetable, fruit, cheese, plumbers', painters', palette artists', and shoe knives, forks, and steels, finished or unfinished, 35 per cent ad valorem."

Mr. VEST. The comparative statement shows that the largest importation of cutlery into the United States is between 50 cents and a dollar and a half a dozen. According to the import prices at the port of New York and by the comparative statement, as to a portion of them, upon knives costing 56 cents a dozen abroad the Senate amendment imposes an ad valorem duty of 145½ per cent. When the knives are worth 68 cents a dozen, an increase of over 10 cents, nearly 12 cents, the duty is reduced to 128½ and when increased in price to 80, the duty is decreased to 115, and so on down, showing that what I stated is absolutely true—that the higher the price of the article the lower the duty, and the lower the price the higher the duty, which my friend from Rhode Island tells us is the inevitable result when you resort to ad valorems.

Before I pass from this question I call attention to a statement made by the great house of Simmons Hardware Company, of St. Louis, the largest possibly in the world. They state, and I have the communication here, that the cutlery interest is flourishing in this country; and in regard to shears they make the specific statement that they have lately furnished over 300 dozen shears in Sheffield, England, at a considerable profit to themselves. In

other words, we are exporting from this country to England and selling right at the seat of the cutlery interest—in Sheffield.

It is very true that there are two classes of cutlery in which we do not compete with foreigners, and never will. One is the very low-priced cutlery made in Germany. We can not make that class of cutlery in the United States. We make no knives under 25 cents. They retail at 25 cents. Of course we make them at wholesale for less, but they are retailed at 25 cents.

Mr. PLATT of Connecticut. Knives are made in Connecticut which retail at 10 cents.

Mr. VEST. I have seen an American knife at 10 cents, but it could hardly be called a knife.

Mr. GEAR. Yes; a boy's knife.

Mr. PLATT of Connecticut. We have in the State where I reside a factory that makes a knife, and edges on it, "Miller Bros. Cutlery Company 10-cent knife."

Mr. VEST. Yes; I have seen them.

Mr. PLATT of Connecticut. They are sold everywhere, and it is a good knife.

Mr. VEST. I beg the Senator's pardon, they are not sold everywhere. They are rare. I have seen the knife. It does not begin to compare with the foreign knife at the same price.

Mr. PLATT of Connecticut. It is much better.

Mr. VEST. There is one other class of knives in which we can not compete with foreigners, and that is the very high-priced pocketknives you buy of Rodgers and Wostenholm & Co. They are sold upon their stamp and they are sold to people of means. A man who pays $2.50 or $3 or $4 for a pocketknife, and they go as high as $10, as a matter of course is a rich man comparatively in the United States. No poor man pays such prices.

But I do not wish to detain the Senate, and I will show, as an object lesson, knives furnished by the house of Alfred Field & Co., without any request upon my part, to show how we have advanced in cutlery in the United States. Here is a knife [exhibiting] the selling price of which in Sheffield is $3.62 a dozen, and the selling price in the United States for the same knife is $2.80. There are the two knives [exhibiting], and I defy any Senator to tell them apart. The American knife, if anything, is superior to the British knife, and Mr. Saxton makes the statement—and he is willing to make affidavit to it and bring the knives to show it—that the American knife to-day of the same quality is cheaper than the British knife.

Here is another knife [exhibiting]. I have nine samples here of pocketknives. There are two knives exactly the same, to all appearance. The selling price of one of them, of the same knife, in Sheffield, is $4.55 a dozen, and in the United States it is $4.25.

Mr. PLATT of Connecticut. What becomes of the argument that the duty is added to the price of the domestic article?

Mr. VEST. I am talking about the selling price in England.

Mr. GEAR. What becomes of the argument when the Senator said we could not compete with that kind of a knife?

Mr. VEST. I am simply speaking about the cost of making such a knife. I understand that our friends on the other side—some of them—contend that the duty is not added to the price.

Mr. MASON. You have just demonstrated that fact yourself.

Mr. VEST. Not at all. I am not talking about the sale of the English knife in the United States. If Senators had paid any attention at all to my remarks they would have heard me state that the selling price in Sheffield is $4.55 a dozen and the selling price of the same knife in the United States is $4.25 a dozen.

Mr. PLATT of Connecticut. Of the Sheffield knife?

Mr. VEST. Of the American knife, made like the Sheffield knife, and which you could not distinguish from it; and if the Senator can do so, I will give up the argument. I am not talking about the British knife brought here and sold in our markets—as a matter of course, if it was brought here and 100 per cent duty put upon it, the importer would charge the 100 per cent in addition—but I am talking about your contention that you want to put on a duty in order to equalize the cost of the production.

Mr. MASON. Will the Senator yield for a question?

Mr. VEST. Certainly.

Mr. MASON. Is there anything in the climate or soil in Sheffield that enables them to make a knife any cheaper than we do?

Mr. VEST. No; and they do not make it cheaper. I am just contending that they make it dearer.

Mr. MASON. Could we not make the same knife here at the same price if we could get the labor just as cheap as they can?

Mr. VEST. Yes, Mr. President, and we do it now, and make it cheaper; and I am here to show that from all these samples.

Mr. MASON. We make it cheaper and better, and pay more for our labor.

Mr. VEST. Yes, we pay more, because the labor is better and the materials are cheaper. We have here better workmen. We have taken the cutlery business away from the Englishmen, and yet you continue to put on a duty.

Here are other samples [exhibiting]. Without wearying the Senate, I will state that these knives are put up in couples, the American knife and the English knife, to show that in every instance the cost of the English knife is higher in Sheffield than the cost of the American knife in this country.

Now, let us go to table cutlery, and there the example is much more conspicuous. Here is a knife [exhibiting], and a handsome one, a table knife, the selling price of which in England, in Sheffield, is $2.07 per dozen, and the cost in the United States of the very same knife is $2 a dozen.

Mr. ALLISON. Are those wholesale prices?

Mr. VEST. Yes; they are wholesale prices, as a matter of course. I have these from a wholesale house.

Mr. ALLISON. I do not see how they could come in here if we had no duty at all, under those circumstances.

Mr. VEST. Very few of them do come in. There is no necessity for a duty. Here is a knife, an American knife, selling in the United States for $2 a dozen, and here is an English knife of the very same material, to all intents the same knife, which is selling in England for $2.07 a dozen, costing 7 cents more.

Mr. HAWLEY. If the Senator will permit me, I understand his argument is that the tariff does not hurt anybody at all in this country.

Mr. VEST. Yes, it does hurt somebody in this country, and I will tell the Senator from Connecticut in a very few words how it hurts them. It is not a question, as I have contended all through this debate, as to the difference in labor or the difference in cost. We can produce more cheaply than the foreigner. But when you put on these tariff duties, the domestic manufacturer, without reference to the cost of labor or the cost of material, immediately goes up to or just under the foreign price.

Mr. PLATT of Connecticut. But the Senator says we sell the American knife here, in spite of the tariff, cheaper than the selling price of the English knife in England.

Mr. VEST. Of course we retail them.

Mr. PLATT of Connecticut. And a better knife.

Mr. VEST. We retail them here; there is no doubt about it; they are sold by the wholesaler and then they are retailed by the retail merchants throughout the country. I am talking about the cost of the material and the cost of the labor; and there is no excuse for putting on these enormous duties.

Now we come to another article, the carvers, on which the duty has been enormously increased. There is a carver [exhibiting], the foreign cost of which is 65 cents a pair, and the duty is 29½ cents. Here is another carver [exhibiting], stag-handled, as it is termed by the cutlery people, the foreign cost of which is 41 cents, and the duty upon it is 30 cents. It is a foreign article. The foreign cost is 41 cents, and the duty upon it is 30 cents.

Mr. President, I contend that there is no necessity for the imposition of these high duties upon cutlery. There is no necessity for the increase unless it is proposed absolutely to exclude these articles from this market and have no competition by which the consumers in the United States may buy them as cheaply as possible.

The PRESIDENT pro tempore. The Senator from Missouri offers an amendment as a substitute for paragraph 149. The amendment has been read to the Senate.

Mr. WHITE. The firm alluded to by the Senator from Missouri, the Simmons Hardware Company, in St. Louis, communicated some time ago with me regarding this schedule, and I asked them to give a detailed statement as to the cost of various pocket knives and other cutlery, and also the foreign cost, the tariff prior to 1890, the McKinley Act, the Wilson Act, the Dingley bill, and the bill of the Senate committee. I have such a list of prices here, an estimate of percentages, which I will insert in the RECORD. They also accompanied their statement with a short letter, which I will read:

ST. LOUIS, *May 24, 1897.*

DEAR SIR: In fulfillment of our promise to send you a computation of the rates on cutlery under the Senate bill, we herewith inclose you a sheet which gives you the prevailing tariff under the various bills in operation, beginning with 1864, and that proposed by the House and Senate bills.

The Senate bill, as you have stated, has reduced the rates on cutlery quite materially, but not nearly as much as should be the case. The Wilson bill, as you will notice, is not far from an average of 50 per cent ad valorem, and inasmuch as, with the exception of the four years that the McKinley bill was in operation, the manufacturers of cutlery have grown and prospered under practically a 50 per cent tariff, there can be no good grounds for a demand for more than this.

On certain articles that are bought and sold by the pound, and even on lines of goods that are not complicated in their nature, the specific duty is by far the best, but on a line so complex in its nature as cutlery the ad valorem is the wisest from all points of view, revenue purposes included.

Under the tariff which existed from 1864 to 1890 undervaluation of cutlery was unknown, and it was only when compound duties were put in operation under the McKinley bill that a difficulty in this direction was encountered. A compound system that exacts both specific and ad valorem duties on a complicated line like cutlery is a vicious and pernicious plan. It is an absolute invitation to fraud, and consequently a handicap to all honest importers.

The Senate bill on pocketknives, with the exception of those under 50 cents per dozen, if passed, would be substantially a reenactment of the McKinley bill.

The great irregularity in duty on pocketknives not differing particularly in value is the best commentary on the inconsistency of a plan of this nature. For instance, on knives costing, respectively, 44 cents and 56 cents per dozen, on which there is a difference in cost of only 12 cents a dozen, there is a difference in percentage of duty of 77½ per cent.

The dividing lines for a change of specific duties on pocketknives are 50 cents, $1.50, and $3. A jump from one class into the other makes a difference of 48 cents, 60 cents, and $1.20, which amounts are in themselves large profits on the goods, and which at a glance will show to anyone, even those not familiar with the importation business, the opportunities that are offered to the unscrupulous in the way of undervaluation.

We have noticed in some of the trade papers that computations have been made on the cutlery schedule under the Senate bill to ascertain the amount of revenue which it would produce. These computations are worthless and misleading, for the reason that in order to get information in this particular it is necessary to know the exact limit of importation possibility—where prohibition begins. In other words, the proper equation must be found. This can not be done excepting by the importer himself.

There are many kinds of pocketknives which have been imported very largely that under the proposed bill would not be brought in at all, consequently the revenue that has been heretofore received from them would be absolutely cut off.

In our last communication we said nothing in reference to carvers and table knives, it being purely an oversight on our part. Now all we said in reference to the manifest injustice of arranging a schedule of duties whereby cheaper goods pay a very high rate of duty and the higher priced goods a low rate of duty applies with equal force to carvers and table knives. The Senate bill in regard to these goods has not been changed from the House bill, and you will notice a carver costing 15 cents a pair pays 175 per cent duty, whereas one costing 96 cents pays only 45 per cent. This is nothing more nor less than class legislation, and will certainly be resented, inasmuch as it militates against the interests of the poor man, who should be protected in matters of this kind to a greater extent than the man of better circumstances.

Yours, truly,

SIMMONS HARDWARE COMPANY,
J. W. MORTON, *First Vice-President.*

Hon. STEPHEN M. WHITE, *Washington, D. C.*

In connection with this letter, Mr. President, I will insert as a part of my remarks the tables given with reference to pocket cutlery.

The bill as it is now framed treats of table knives and carvers in another paragraph, and I shall there insert, when we reach it, a table covering that subject.

It is evident from an inspection of this calculation, or rather this explanation of the bill, that, as the correspondent says, the rates in the present Senate bill are substantially those of the McKinley Act. The remarks made in connection with reference to carving knives are very suggestive.

I repeat, it is shown that where a pair of carvers cost but 15 cents the duty paid is 175 per cent, whereas on a pair costing 96 cents, there is only paid a duty of 45 per cent. I am informed that under the Wilson law, and the record will show it, the importation of this line of carvers amounts to scarcely anything. I can not see why an additional duty should be added.

I will submit the tables, and ask to have them printed in the RECORD.

The PRESIDENT pro tempore. They will be printed in the RECORD, without objection.

The tables referred to are as follows:

POCKETKNIVES, UP TO 40 CENTS PER DOZEN, FOREIGN COST.

Mr. WHITE. That is all I care to observe about this particular paragraph.

Mr. JONES of Arkansas. It is now ten minutes past 5 o'clock, and I hope the Senator from Iowa will let us adjourn.

Mr. ALLISON. Does the Senator wish to speak on this paragraph?

Mr. JONES of Arkansas. Yes; I want to make some remarks, not long, but I do not want to go on this evening.

Mr. ALLISON. Then I suggest that we pass this paragraph for the time being, and see if we can not get through one or two of the other paragraphs.

Mr. WHITE. I think the Senator from Iowa has noticed that we will come in contact with the sword section next, and I do not propose to discuss that, as I am a man of peace; but still he may find himself on the same subject in paragraph 151, which will have to be gone over again.

Mr. ALLISON. That has been already argued.

Mr. WHITE. There are one or two tables in reference to that subject which I desire to insert in the RECORD when we reach it.

Mr. VEST. I intend to offer a substitute for the paragraph in relation to butcher knives.

Mr. WHITE. We have gotten along as rapidly as possible, and have put most of these communications in the RECORD without any extended reading.

The PRESIDENT pro tempore. Is the Senate ready for the question?

Mr. ALLISON. Of course, if the Senator from Arkansas desires to speak on this amendment, and does not wish to go on to-night——

Mr. JONES of Arkansas. I understood that we were to adjourn about 5 o'clock, and I have something to say on the amendments to these paragraphs.

Mr. ALLISON. I shall not object if we can have some understanding about meeting at 11 o'clock. That will give us another hour, and we ought at least to spend five or six hours a day upon this bill.

Mr. JONES of Arkansas. So far as I am concerned, I am not willing to agree to meet at 11 o'clock and shall not agree to it. We have in good faith on this side done the best we could on this bill.

Mr. ALLISON. I have no doubt of that.

Mr. JONES of Arkansas. We have not delayed it for a moment. We have devoted our time to the discussion of the matter fully and fairly, and after the length of time we are in session every day I think we are sufficiently fatigued to be allowed to adjourn. We have not objected to the bill being taken up in the morning hour immediately after the routine business, as we might have done, but we have gone forward as rapidly as we could conveniently do so, and we think we ought to have a right to show what we believe to be the improprieties, the inequalities, and the injustices of this bill. We have attempted to do that in good faith, and I do not think the Senator ought to ask us to meet at an earlier hour. We are certainly getting along more rapidly with this bill now than with any tariff bill that has ever been passed by the Senate.

Mr. ALLISON. There was certainly no harm in the suggestion.

Mr. JONES of Arkansas. Certainly not; and there is no harm in my objecting to the suggestion, I hope.

Mr. WHITE. I hope the Senator from Iowa will also recollect the discouraging circumstances under which we are operating; when we have appealed to the other side of the Chamber with such forceful arguments, which would have been deemed convincing elsewhere, and have met with a uniform adverse vote, except in the sole instance of the protection of anvils, we think it time to adjourn, that we may be able to recuperate for the morrow, so that we may get some equally favorable responses from the other side during the next twenty-four hours.

Mr. ALLISON. The anvil scheme was a great achievement.

Mr. WHITE. I am afraid the Senator from Iowa will move to reinstate the anvil feature when the bill reaches the Senate.

Mr. ALLISON. No; I will give the Senator notice that we shall have no trouble about that.

Mr. CHANDLER. Mr. President, I really wish the Senator from California would make a distinction when he speaks by adopting colors. For instance, when he speaks in favor of increasing a duty that he will put up a red flag, and when he speaks in favor of lowering a duty that he will put up a white flag. I understand perfectly the Senator from Arkansas [Mr. JONES] and the Senator from Missouri [Mr. VEST] are for reducing duties all the time; but the Senator from California confuses me. I never know, when I am listening to him and trying to get the meaning of what he says, whether he is for raising a duty to protect an industry or reducing a duty and destroying an industry. So that if he will adopt colors, as ships do sometimes, and adopt one color one day and another color another day, his speeches will certainly be altogether more edifying than they are. [Laughter.]

Mr. WHITE. I regret that my remarks have not been able, owing to his idiosyncrasies, to penetrate the mind of the Senator from New Hampshire. I will suggest, however, with reference to the color of the flags—and I appeal to his own side to know whether I am right or not—whether the red flag is not usually displayed when the Senator from New Hampshire takes the floor. [Laughter.]

Mr. GEAR. A duty is a red flag at all times to the Senator from California.

Mr. PETTUS. I move that the Senate proceed to the consideration of executive business.

The PRESIDENT pro tempore. The Senator from Alabama moves that the Senate proceed to the consideration of executive business.

Mr. ALLISON. I shall not resist the motion of the Senator from Alabama, but I hope that Senators upon the other side will be able before a great while, in such pleasant weather as we have now, to bring themselves to the point of meeting a little earlier in the morning than 12 o'clock.

Mr. PETTUS. Mr. President, I think it is not usual to debate a motion for an executive session.

Mr. ALLISON. I am not debating, if the Senator will allow me; I am merely asking unanimous consent to make a suggestion.

The PRESIDENT pro tempore. The Chair understands the Senator from Iowa is proceeding by unanimous consent.

Mr. ALLISON. I do not wish to unduly fatigue the Senators upon the other side who are opposing the bill.

The PRESIDENT pro tempore. The question is on the motion of the Senator from Alabama [Mr. PETTUS], that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After thirty minutes spent in executive session the doors were reopened, and (at 5 o'clock and 45 minutes p. m.) the Senate adjourned until to-morrow, Thursday, June 3, 1897, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate June 2, 1897.

TERRITORIAL GOVERNOR.

Miguel A. Otero, of New Mexico, to be governor of New Mexico, vice William T. Thornton, resigned.

TERRITORIAL SECRETARIES.

George H. Wallace, of New Mexico, to be secretary of New Mexico, vice Lorion Miller, removed.

William M. Jenkins, of Oklahoma, to be secretary of the Territory of Oklahoma, vice Thomas J. Lowe, resigned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 2, 1897.

ASSISTANT ATTORNEY-GENERAL.

John G. Thompson, of Illinois, to be Assistant Attorney-General.

DEPUTY AUDITOR FOR NAVY DEPARTMENT.

John M. Ewing, of Wisconsin, to be Deputy Auditor for the Navy Department.

POSTMASTERS.

David M. Donaldson, to be postmaster at South Hadley Falls, in the county of Hampshire and State of Massachusetts.

L. I. Sturgis, to be postmaster at Oelwein, in the county of Fayette and State of Iowa.

Ada M. Bennett, to be postmaster at Miles City, in the county of Custer and State of Montana.

Lewis F. Babcock, to be postmaster at Billings, in the county of Yellowstone and State of Montana.

William G. Earp, to be postmaster at Swampscott, in the county of Essex and State of Massachusetts.

George E. Drumm, to be postmaster at Chatham, in the county of Columbia and State of New York.

Andrew J. Pollock, to be postmaster at Pensacola, in the county of Escambia and State of Florida.

Aaron Frost, to be postmaster at Wardner, in the county of Shoshone and State of Idaho.

SENATE.

THURSDAY, *June 3, 1897.*

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The VICE-PRESIDENT resumed the chair.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. MILLS, and by unanimous consent, the further reading was dispensed with.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes; and it was thereupon signed by the Vice-President.

PUBLIC BUILDING AT SAN ANGELO, TEX.

Mr. MILLS. I ask unanimous consent to call up for consideration at this time a bill reported by the Committee on Public Buildings and Grounds unanimously, the bill (S. 925) to provide for the erection of a public building at San Angelo, Tex.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to acquire, by purchase, condemnation, or otherwise, a site, and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and accommodation of the United States post-office, court-house, and other Government offices in the city of San Angelo and State of Texas, the cost of site and building, including vaults, heating and ventilating apparatus, elevators, and approaches, not to exceed $100,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

Mr. JONES of Arkansas. Routine business ought to be disposed of.

The VICE-PRESIDENT. In a moment the Chair will submit the motion of the Senator from Iowa.

Mr. ALLISON. Very well.

DEFICIENCY APPROPRIATION.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, requesting that the sum of $1,500 be included in the deficiency appropriation bill for the year ending June 30, 1897, and for prior years, to meet such exigencies in the Marine-Hospital and Quarantine Service as may arise during the balance of the current fiscal year; which was referred to the Committee on Appropriations, and ordered to be printed.

FINDINGS OF COURT OF CLAIMS.

The VICE-PRESIDENT laid before the Senate a communication from the Court of Claims, transmitting the findings of the court in the case of David S. Parker and Forman Matthews *vs.* The United States; which was referred to the Committee on Claims, and ordered to be printed.

Mr. VEST. I call for the regular order.

Mr. HOAR. Will the Senator from Missouri allow me to introduce a bill?

Mr. VEST. Certainly. I want to have the regular routine business transacted.

PETITIONS AND MEMORIALS.

Mr. NELSON presented the petition of Mrs. Viola Decker and sundry other citizens of St. Paul, Minn., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. PLATT of New York presented sundry memorials of citizens of Brooklyn, N. Y., remonstrating against an increase of the duty on beer; which was referred to the Committee on Finance.

Mr. PENROSE presented a petition of the Boies Penrose Republican Club, of Philadelphia, Pa., praying for the repeal of the present civil-service law; which was referred to the Committee on Civil Service and Retrenchment.

He also presented a petition of 18 citizens of Philadelphia, Pa., praying for the speedy passage of the pending tariff bill; which was ordered to lie on the table.

He also presented a petition of the Board of Trade of Philadelphia, Pa., praying that the various interests of the United States be properly represented at the French International Exposition in 1900; which was referred to the Select Committee on International Expositions.

He also presented petitions of 31 citizens of New Stanton, of 24 citizens of Oxford, of 92 citizens of Reading, 13 citizens of Duquesne, 34 citizens of Millersville, and of 60 citizens of Williamsport, all in the State of Pennsylvania, praying for the enactment of legislation restricting immigration; which were ordered to lie on the table.

REPORT OF A COMMITTEE.

Mr. PETTIGREW, from the Committee on Public Lands, to whom was referred the bill (S. 364) granting settlers the right to make second homestead entries, reported it with amendments, and submitted a report thereon.

ARMOR FOR THE NAVY.

Mr. LODGE, from the Committee on Printing, reported the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That there be printed for the use of the Senate Committee on Naval Affairs, 500 copies of the hearing before said committee on May 19, 1897, relative to armor for the Navy.

UNITED STATES BOUNDARY COMMISSION.

Mr. LODGE, from the Committee on Printing, reported the following concurrent resolution; which was considered by unanimous consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring), That there be printed as a document the report of the United States Boundary Commission, pursuant to the convention between the United States and Mexico touching the re-marking of the boundary line between those two countries west of the Rio Grande, and in addition thereto 300 copies of said report for the use of the Department of State.

ANNALS OF THE ASTROPHYSICAL OBSERVATORY.

Mr. LODGE, from the Committee on Printing, to whom was referred the following concurrent resolution submitted by himself on the 18th ultimo, reported it without amendment; and it was considered by unanimous consent, and agreed to:

Resolved by the Senate (the House of Representatives concurring), That there be printed and bound 3,000 copies of a special report describing the methods and results of the investigations conducted at the astrophysical observatory of the Smithsonian Institution, entitled Annals of the Astrophysical Observatory, of which number 500 copies shall be for the use of the Senate, 1,000 copies for the use of the House of Representatives, and 1,500 for distribution by the Smithsonian Institution.

BILLS INTRODUCED.

Mr. JONES of Arkansas introduced a bill (S. 2063) to authorize the White and Black River Valley Railway Company to build a bridge across the Black River in Arkansas; which was read twice by its title, and referred to the Committee on Commerce.

Mr. HOAR introduced a bill (S. 2064) to remove the charge of desertion from the record of Patrick Norton, of Northboro, Mass.; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

Mr. TURPIE introduced a bill (S. 2065) granting a pension to Henry F. Barnes; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

Mr. MCENERY introduced a bill (S. 2066) for the relief of Mrs. Matilda M. Fairex, administratrix of Daniel Fairex, deceased; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Claims.

Mr. HARRIS of Kansas introduced a bill (S. 2067) granting a pension to Alexander Miller, of Eudora, Kans.; which was read twice by its title, and referred to the Committee on Pensions.

Mr. PENROSE introduced a bill (S. 2068) granting a pension to John W. Smoot; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 2069) granting a pension to Rebecca Paulding Meade, widow of Rear-Admiral Richard W. Meade, late of the United States Navy; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 2070) granting a pension to Mrs.

Rebecca S. Holman; which was read twice by its title, and referred to the Committee on Pensions.

Mr. PETTIGREW introduced a bill (S. 2071) to reimburse excessive demands from preemption and homestead settlers on annulled railroad subsidy grants; which was read twice by its title, and referred to the Committee on Public Lands.

Mr. WHITE introduced a bill (S. 2072) for the relief of Catharine McCarty; which was read twice by its title, and referred to the Committee on Pensions.

THE TARIFF BILL.

Mr. HALE. What has become of the motion made by the Senator from Iowa?

The VICE-PRESIDENT. Morning business has intervened.

Mr. HALE. I ask that the motion of the Senator from Iowa be disposed of.

The VICE-PRESIDENT. The Senate has heard the motion made by the Senator from Iowa that the Senate proceed to the consideration of House bill 379. Is there any objection? The Chair hears none.

Mr. VEST. What was the motion?

Mr. HALE. To proceed to the consideration of the tariff bill.

Mr. VEST. I beg the Senator's pardon; we have some morning business that ought to be attended to. I have a resolution here that I want to offer.

Mr. ALLISON. I will yield to morning business, of course.

AMERICAN SOLDIERS KILLED AT BUENA VISTA.

Mr. VEST. I offer a resolution and ask for its immediate consideration, and in connection with it I will ask for the reading of a letter.

The Secretary read as follows:

Whereas in a communication from the consul-general of the United States at the City of Mexico it has been stated that on account of long neglect and the washing of the soil by rains the skeletons of American soldiers killed at the battle of Buena Vista, on February 27, 1847, and buried near Saltillo, Mexico, are now exhumed and exposed to the weather:

Resolved, That the Secretary of State is hereby directed to cause immediate inquiry to be made as to the facts and communicate the same to the Senate, with such recommendation as he may deem proper.

The Senate, by unanimous consent, proceeded to consider the resolution.

Mr. VEST. Now let the letter from General Crittenden be read.

The Secretary read as follows:

CONSULATE-GENERAL OF THE UNITED STATES,
No. 5 CALLE DE SAN DIEGO, CITY OF MEXICO
(THOMAS T. CRITTENDEN, CONSUL-GENERAL),
Mexico, May 29, 1897.

Hon. G. G. VEST,
Washington, D. C.

DEAR SIR: At the hazard of intruding on your time and patience, I inclose the following notice to you, which I cut from one of our daily papers of yesterday. I think it is a matter of such grave importance that the authorities at Washington should be informed of the unfortunate condition of the remains of our own Federal soldiers who fell in battle in Mexico in defense of their country and flag in 1847. I hope you will give this matter some consideration, as the condition of the bones of those soldiers, if wholly true, is somewhat mortifying to the American citizens here.

Very truly, yours,

THO. T. CRITTENDEN.

This battlefield is about 500 miles from here.

Mr. VEST. Let the newspaper slip be read.

The Secretary read as follows:

THE UNITED STATES SHOULD LOOK TO IT.

On February 22, 1847, the anniversary of Washington's birthday, the battle of Buena Vista was fought near the city of Saltillo, and a number of the United States soldiers are buried in a quasi reservation. For a number of years an adobe wall protected the last resting place of these soldiers, but this has now fallen down. A wagon road traverses a number of the graves, and, sad to relate, the washing of rains has unearthed portions of skeletons, which are bleaching in the sun. It does seem as if the Federal Government of the United States could make some arrangement with the Mexican authorities and protect the last resting place of the dead.

The VICE-PRESIDENT. The question is on agreeing to the resolution submitted by the Senator from Missouri.

The resolution was agreed to.

SANITARIUM AT CASTLE PINCKNEY, SOUTH CAROLINA.

Mr. TILLMAN submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of War inform the Senate as to the cost of constructing suitable buildings at Castle Pinckney, near Charleston, S. C., to be used as a sanitarium for disabled officers and enlisted men of the Regular and Volunteer Army of the United States.

PROPOSED SENATORIAL INVESTIGATION.

Mr. TILLMAN. Mr. President, I rise to a question of personal privilege, and ask the Secretary to read the clipping which I send to the desk.

The Secretary read as follows:

[From the Haverhill Gazette, June 1, 1897.]

Senator TILLMAN, of South Carolina, has made a pretty direct insinuation that members of that honorable body were corruptly influenced by the great sugar trust while framing the sugar clause of the tariff bill. What the South Carolina man says upon this question carries with it great weight. It will not be entirely safe to ignore his challenge, and we see no way out of a disagreeable situation than by making the investigation asked for. But in the meantime how does Mr. TILLMAN propose to meet the accusation of ex-Senator Butler with regard to his (TILLMAN'S) connection with the alleged whisky rebate steal? Are we to have two investigations to while away the hours between now and the time the tariff begins to get in its work? It looks so.

Mr. TILLMAN. Mr. President, I am well aware that Senators are familiar with the charges that have been recently put in the papers by my predecessor here, Gen. M. C. Butler. I am also aware that possibly some Senators have in their desks clippings from our State papers in regard to insinuations affecting my administration as governor.

In connection with these matters, sir, I desire to have read a part of an open letter to the people of our State which was published last week. The Secretary will please read the paragraph marked. It is an open letter from me to the citizens of South Carolina.

The Secretary read as follows:

When these stale slanders about rebates under my administration were put in circulation by the newspapers and then taken up by General Butler, in the canvass three years ago, I met them promptly and vigorously at Union and elsewhere, and last winter I joined with Governor Evans in asking that the legislature should appoint a committee to look into the dispensary's management and set the charges of corruption at rest forever. The books of the dispensary and everything connected with its financial affairs have been investigated and reported on time and again by a legislative committee, one of whose members was an "anti," incapable of seduction or of being induced to cloak wrong.

The committee has never yet made a report reflecting on the integrity or honesty of its management. Now the cry is "Investigate!" and while Gantt and no one else has or can give any satisfactory reason why my administration of the dispensary should be investigated, I desire to ask the governor to select a committee of citizens to enter upon an investigation immediately, and I am willing to answer any inquiries made, and I doubt not that every other man connected with the dispensary in any official way would be willing to do likewise. The expense can not be great, and could be paid out of the contingent fund, and the matter is of sufficient importance, I think, to warrant the outlay.

Mr. TILLMAN. Mr. President, I am well aware of the fact that it is a common dodge among lawyers when a man has a bad case to abuse the attorney for the other side. Now, I am not the attorney for the other side in this case. I am a Senator of the United States who has more regard, it appears, for the dignity and the honor of this body than some other members in it. The attempt to distract attention from the sugar-trust scandal to my personal record as governor in the hope possibly that I would be deterred from pressing this matter to the bitter end will fail, if that is the object in promulgating just at this moment these old scandals.

No man reaches the Senate of the United States without a bitter struggle, and when that man comes from the plow, as I did, and walks into the governor's office over the prostrate political forms of every old leader in the State, opposed by every corporation in the State, opposed by every bank but two, and by three-fourths of the newspapers, he necessarily makes enemies, for "He who surpasses or subdues mankind must look down on the hate of those below." My administration of the office of governor was one long warfare with these enemies, and they have been utterly unscrupulous in using the license which the press now seems to think it has a right to use in insinuating and charging any and every thing. All the crimes in the decalogue have been laid at my door.

But after four years' service as governor I went before the people of my State as a candidate for United States Senator and canvassed the State, county by county, with General Butler. These questions of rebate in regard to the dispensary management were then in the newspapers, and Senator Butler, as he was at that time, took them up and undertook to flyblow my character.

I thank God, sir, that before I went into politics at all, the forty-four years of my life had been given to building up a reputation for honesty, and decency, and morality, and truth which so far sustained me in the office that there was no proof whatever, no direct testimony, no basis of accusation itself, or insinuation, except a possibility that I had stolen because I could have stolen; so that when the canvass was over, after these questions had been passed upon, the people of South Carolina then gave me in the legislature a majority of 131 out of 160, and sent me here.

Now the same old stale eggs are brought forward and thrown at me, so as to give forth an effluvia and try to blacken me; but instead of shirking investigation, I court it at home, and I court t here. If there is any man in this body who desires to have a committee appointed to look into my past record, I beg him to move the resolution, and I will support it with all the influence I have here, and beg that the Senate shall take the question up and set it at rest forever. I have no fears as to what will be proven, because nothing can be proven affecting my integrity and honesty.

But the situation is this: They demand that I shall prove a negative, which every lawyer and every decent man knows is impossible. There is not a man here who can prove that he is honest. It lies on the man who accuses him of dishonesty, however, to prove that he is so before a decent man will regard him as dishonest.

Now, sir, so much for that. I court investigation at home. I have asked for it. I court it here, if the Senate chooses or desires to go into it. In addition to that, I say that any other man whose

name rests under an imputation here—and the Senate as a whole owes it to itself and its dignity to have these slanders and scandals and accusations more or less direct sifted to the bottom, and have it determined once for all whether we have rascals in our midst or not.

Sir, in making this explanation and courting investigation I have no personal motives whatever. I have no imputation to cast on any individual Senator. I am not a "sponsor" for the charges which have been made against the Senator from New Jersey [Mr. SMITH], as he seems to think, but I simply brought them along with the rest as evidence enough to warrant the Senate to clear itself of these accusations.

I move that the committee to whom was referred the resolution I introduced last week be discharged from its further consideration, and that the Senate now pass upon it and put itself on record, as to whether it will have the sugar scandals investigated and probed to the bottom, or whether it will stand accused before the eyes of the country of being corrupt.

Mr. GALLINGER. Mr. President——

Mr. TILLMAN. I want to make a word of explanation before the Senator begins, and it is to this effect: I approached the chairman of the committee [Mr. JONES of Nevada] day before yesterday, learning he was going to leave the city, and asked him, "What have you done, or what do you propose to do, in regard to the resolution sent to your committee?" He said, "I have seen the other two members of the committee and notified them that I am ready to consider the matter and report it back. I am going away to-morrow and I do not know when I will return." Therefore it rests with the other two members of the committee if the resolution has not been reported. With that explanation I am ready to hear the Senator from New Hampshire.

Mr. GALLINGER. Mr. President, I came into the Senate Chamber a moment ago, and hence am not fully aware of what the Senator from South Carolina has said in regard to this matter. I take it the Senator has——

Mr. TILLMAN. I have said nothing, I will explain to the Senator, except just what he heard. I was alluding to an entirely different subject altogether.

Mr. GALLINGER. I presume the Senator has been discussing the accusation made——

Mr. TILLMAN. Against me, individually.

Mr. GALLINGER. Made against the Senator in a recent issue of the Washington Post, and possibly other newspapers, apparently upon the authority of a distinguished gentleman who for a long time had a seat in this body from the State now represented by the Senator.

Mr. President, I am not going to discuss that matter this morning. The Senator has met the accusation with a denial, and we are bound to accept the denial the Senator has made. We are all aware of the fact that——

Mr. TILLMAN. I beg your pardon. The Senator will permit me. You are not bound to accept anything of the kind. I ask that it be probed to the bottom, and let me prove the other man a liar.

Mr. GALLINGER. We may or may not do that. That is for the Senate to determine for itself. I was about to observe that in this age every man in public life has felt the sting of accusations that are made with such recklessness by certain newspapers and by our political enemies. I take it if any one of us, when accused, should rise here in his seat and demand an investigation, demand that the time of the Senate and the money that is in the Treasury belonging to the people should be employed for the purpose of vindicating his character and his integrity, we would never pass a tariff bill or any other bill through the Congress of the United States.

Mr. President, that is a matter, it seems to me, for the Senator from South Carolina to settle for himself. It is a newspaper attack with which the Senate, I take it, has nothing whatever to do. Certainly, as one member of this body, I shall decline, unless I am forced into it, to vote to enter upon an investigation into the character, the integrity, the reputation, or the honesty of the distinguished gentleman who so ably represents the State of South Carolina in this Chamber.

Regarding the other matter, a single word. A few days ago, possibly a week ago, acting upon charges made in certain newspapers, a resolution was introduced by the Senator from South Carolina and referred to the Committee to Audit and Control the Contingent Expenses of the Senate, of which I chance to be a member. If the chairman of that committee was present to-day, I should probably not say a single word in response to the motion the Senator from South Carolina has made. But as the chairman is not present, I feel it incumbent upon me, as a member of the committee, to take exception to the motion that has been made to discharge the committee from the further consideration of the resolution.

I believe that from my induction into the Senate to the present time I have been a member of that committee, and, so far as I now can recall, no matter has been sent to that committee that has not had careful and conscientious consideration. I think I can speak for every member of the committee this morning when I say that the resolution which the Senator from South Carolina sent to the committee is not to be an exception, but that the committee, in its own good time, after having examined into the matter with the care that it is their duty to give to it, will make a report to this body.

Mr. VEST. Will the Senator permit me, before he passes from this branch of the subject?

Mr. GALLINGER. Certainly.

Mr. VEST. I think the Senate is not without precedent in regard to the demand of a Senator that there should be a committee appointed to investigate charges made against him in the public press. The older members of this body will remember that some years ago a gentleman not now a member here, ex-Senator Kellogg, rose in his place in the Senate and read a very bitter attack upon his personal character and demanded as a Senator from Louisiana that a committee should be appointed to investigate those charges, and claimed that he had a right to that investigation Senator Thurman, of Ohio, who was then a leader of the Democratic side of the Chamber, as I very well remember, and as the record will show, made a reply to the Senator from Louisiana which seemed to me absolutely unanswerable and closed the case.

He said that a Senator of the United States had a right to enter the courts like any other citizen, that his right was no more and no less than that of any other citizen of the country, and if the Senator from Louisiana wished to vindicate himself and clear his character he could enter the courts of the country by the ordinary process of law and exercise the rights of an American citizen. But he said for the Senate of the United States to drop its business and enter into the investigation of every charge made against any Senator would be the absolute suspension of the public business. There was not a single dissenting voice from that declaration of Senator Thurman, and this is the first time since that any Senator has intimated that we ought to stop the consideration of public measures in order to attend to his private character.

Mr. GALLINGER. I am obliged to the Senator from Missouri——

Mr. TILLMAN. Will you allow me a moment?

Mr. GALLINGER. In a moment. I am obliged to the Senator from Missouri for enforcing what I so haltingly expressed as being the judgment, I take it, of the more conservative members of this body against such investigations upon vague and indefinite charges, oftentimes instigated by malice and personal ill will. It seems to me that that is the only safe ground upon which the Senate can plant itself regarding matters such as seem to be disturbing the mind of the Senator from South Carolina this morning. Now I will yield to the Senator from South Carolina.

Mr. TILLMAN. You are very much mistaken if you think anything is disturbing my mind very much, least of all the investigation which I propose. I merely made allusion to this by reason of the fact that the newspapers are endeavoring to get a fire in my rear to distract attention from the fire which I am pressing in front, and I expressed a willingness that I should be investigated personally if anyone here sees proper to make that line of attack. I have asked my people at home, who are more directly interested in this matter than anyone else, to investigate it. Thus far they have refused. If public opinion points that way, and they desire to probe this matter, they will do it.

I merely desire to express my willingness to have the Senate do so as showing that I do not want one rule of conduct adopted in regard to the Senate as a whole and as to those Senators, all of us more or less directly, implicated in the accusations which emanate from the newspapers. The Senate as a whole to-day lies under suspicion; and I do not want the minds of the country diverted and the people diverted from the fact that I am pressing this investigation by the fact that I myself lie under accusation.

If anybody wants to investigate me here or in South Carolina, I am willing, and I do not see why any other man here is not willing to have the Senate as a whole investigated, and know whether the sugar trust has paid agents in here or whether it has bought the Finance Committees of this body to have a schedule put in the bill, whether it was put in in 1894, whether we are the tools and paid agents of this trust, or whether we are free Senators here, performing our duty upon an honorable basis.

Mr. GALLINGER. I may not have correctly understood the observations of the Senator from South Carolina as I entered the Chamber, but I received the impression from what I heard that the Senator asserted that after certain accusations had been made against him in his own State the people took the matter in hand and vindicated him from those accusations by triumphantly sending him to this body. It seems to me that that is the tribunal, after all, to try Senators—their constituents, their people, their legislatures—and if the people of South Carolina and the legislature of South Carolina have vindicated the Senator from the accusations made against him, as he asserts they have, I know of

no reason in sense or propriety or justice to the public interests why we should supplement that by an investigation on the part of this body.

Recurring, Mr. President, to the question at issue, the facts are that certain newspapers made accusations specifically, as I recall it, first against the Committee on Finance of this body and next against the distinguished Senator from New Jersey [Mr. SMITH]. Those of us who know that committee, and those of us who have been associated as intimately as I have been in committee work with the Senator from New Jersey, did not require an investigation or a denial, believing as we do that the accusations must necessarily have been malicious and false—those that were made upon the committee as well as those that were made against the individual Senator. But since those accusations have been made the Senator from Rhode Island [Mr. ALDRICH] has risen in his place and in behalf of the committee for which he spoke has entered an absolute and unqualified denial of every accusation that has been made against that committee.

It is the word of NELSON W. ALDRICH, a Senator of the United States, against James Creelman, a correspondent of the New York Journal. Which of those men, under the circumstances, are we to believe? When Mr. ALDRICH says in behalf of himself and in behalf of the committee for which he speaks that every accusation against that committee is a false accusation, without one tittle of truth in it, are we to hesitate a moment to accept the word of Senator ALDRICH as against the statement of a newspaper correspondent that that committee had done something that was not honorable as between the people of the United States and themselves?

Further, Mr. President——

Mr. TILLMAN. Will the Senator allow me?

Mr. GALLINGER. Certainly.

Mr. TILLMAN. Can Senator ALDRICH and the Finance Committee afford to deny Mr. Creelman the opportunity to prove the charges before a committee when his paper yesterday announced his willingness to appear before a committee and either prove himself a liar or prove the accusation?

Mr. GALLINGER. Suppose the Senate granted Mr. Creelman that opportunity, and on the next day the correspondent of some other newspaper made a similar accusation against the committee, does the Senator from South Carolina say that we should halt in the public business and go into another investigation——

Mr. TILLMAN. Is that——

Mr. GALLINGER. Allow me to finish. Does the Senator say that we should go into another investigation and waste our valuable time here to give that man an opportunity to try to prove his accusation? And after that was over, if some other newspaper correspondent made another accusation similar in nature, does he say that we should again halt the public business and go into an investigation after the Senator accused or the committee accused has entered an emphatic and unqualified denial of the truth of the statement? Is that the kind of work the Senator from South Carolina would have us engage in in this moment of extreme peril and anxiety on the part of the American people for legislation of more importance than an investigation of that nature?

Mr. TILLMAN. Now, will you permit me?

Mr. GALLINGER. Certainly.

Mr. TILLMAN. The way to stop this license of the press, this free use of ink to slander this body and its individual members, is when you have proven one of those men liars to bring him there before the bar and commit him to prison for contempt, and if he refuses to answer questions which will probe this matter, bring him there and propound them, and then say, "If you do not answer, we will commit you to jail." Until you do that you stand accused and almost convicted in the eyes of the American people as cloaking up rascality.

Mr. GALLINGER. Fortunately or unfortunately we are living at the close of the nineteenth century and not in the days of the Spanish Inquisition. The newspaper press is not to be muzzled in that way, and the correspondents of newspapers, whether they are summoned before the bar of the Senate or before the Senator from South Carolina, will go on and exercise their own sweet will (if it is not one man, it will be another) in making criticisms upon public men and upon the National Legislature. The Senator from South Carolina will not secure what he so diligently is desiring by undertaking to discipline the gentlemen of the press who, with so much of earnestness, zeal, and enterprise, are carrying on the work of their profession.

I was about to say a moment ago, Mr. President, supplementary to what the Senator from Rhode Island stated a few days ago with so much force and with so much effect, that the Senator from New Jersey [Mr. SMITH], a man who is well known, not only in his own State, but all over this land, as a man of business integrity and honor, whose reputation has never been attacked successfully, also rose in his place in the Senate and made a denial in explicit and unqualified terms that he was guilty in the slightest degree of the charge that has been made upon him by certain newspaper correspondents in this country.

Mr. President, again it is the word of a Senator of the United States against the word of a correspondent of some newspaper in some city of the American Union.

Mr. HOAR. And the correspondent does not speak of his personal knowledge.

Mr. GALLINGER. No; the charge made against the Senator from New Jersey and the charge made against the Committee on Finance was a vague and indefinite charge, without specification, and without anything upon which to found a conclusion in opposition to the explicit and unqualified denial of those Senators whom we all honor and respect.

Mr. President, if that is a basis for an investigation, certainly if it is a sufficient basis to railroad this resolution out of the hands of a standing committee of this body and into the Senate and through the Senate, if the Senator from South Carolina can get votes enough to accomplish that result, I do not understand the privileges and the powers that belong to the committees of this body. We have had that resolution in our care about one week. We have given it all the consideration that we could give it in addition to our other duties, and I speak not only in my own behalf, but in behalf of the other members of the committee when I say that as soon as we have had time to give it the full consideration that we think it ought to have, we will satisfy the Senator from South Carolina by reporting the resolution back to the Senate with such recommendations as we may think the subject-matter demands at our hands.

Mr. TILLMAN. Mr. President——

Mr. GALLINGER. I yield to the Senator from South Carolina.

Mr. TILLMAN. I desire to call the attention of the Senator from New Hampshire to the fact that his side of the Chamber are railroading and pressing with all their might to railroad through this body the tariff bill, after which we will adjourn. When they will accomplish that, Congress will disperse, and if we are to have any investigation which will affect in the slightest degree the infamy sought to be perpetrated upon the American people in the sugar schedule, as reported from the Finance Committee, then it is time we began that investigation at once. That is why I am railroading or endeavoring to railroad it. It is because the time is so short in which to do anything that we can not accomplish any good unless we move at once.

Mr. GALLINGER. Mr. President, once before in my service in this body we had an investigation of the kind proposed. There were somewhat more specific charges made then than have been made recently in the press. I was summoned from my seat to a committee room on the gallery floor, as I recall it, and had ten or twelve or fifteen questions propounded to me, which I was expected under oath to answer, and which I did. I felt then, inasmuch as no accusation had been made against me as an individual or a Senator, when no man in the newspaper press or otherwise had ventured to say that I had been guilty of anything during my service here, and especially in connection with the sugar schedule, which in any wise affected my honor or my integrity, that it was an outrage to drag me from my seat in this body to a committee room to answer whether or not I was a criminal.

Mr. TILLMAN. Mr. President——

The VICE-PRESIDENT. The Senator from New Hampshire has the floor. Does he yield to the Senator from South Carolina?

Mr. GALLINGER. Certainly.

Mr. TILLMAN. The Senator remembers that the reason why the committee felt called upon to call on each individual Senator and have him swear that he had not speculated was because the witness who refused to answer questions had directly exonerated one member, thereby leaving the rest of the Senate under charges, and that that man has since gone to jail, which in itself in the minds of the country convicts this body, or some of those who were members of it at that time, of being guilty of the thing which was charged against them, and that they lied when they swore they did not speculate.

Mr. GALLINGER. Mr. President, I am just a plain layman, and I look at things from what I regard as a common-sense point of view. I am not able to make the nice distinctions that lead to the conclusion that because one man in a community is exonerated from wrong every other man in the community lies under the imputation of dishonesty. I can not make that distinction in my mind, constituted as it is to-day.

I say, Mr. President, I was summoned from my seat to a committee room and interrogated as to whether or not I had been guilty of a dishonest and dishonorable act. I had no hesitancy in answering. I never owned a share of stock except in one corporation that took my good money and is now in the hands of a receiver. I never purchased a share of speculative stock in my life. I have rarely ever had money enough to purchase a share of such stock.

Mr. President, I do not really think that there is enough in this matter to warrant us in going through that fiasco again.

Mr. TILLMAN. Will the Senator allow me there?

Mr. GALLINGER. Certainly.

Mr. TILLMAN. We have just reached a point under the decision of the court where there will be no fiasco whatever, because

we can call Mr. Chapman up and make him produce the books and show whether any of those men speculated or not; and until you do that the Senate lies convicted in the minds of the public of having speculated and lied out of it.

Mr. GALLINGER. Mr. President, again I am unable to settle in my own mind whether we can do that or not. Mr. Chapman has been put in jeopardy once. I am not quite sure that he can be put in jeopardy again for the same offense. But, however that may be, this matter is to-day in the hands of a committee. Two members of that committee, at least, are men who do not need defense either from myself or from the Senate as a body. They are honest men. They have taken up this matter with a conscientious determination to reach a conclusion that will be just to all parties interested, and it does seem to me that it is an impertinence on the part of the Senator from South Carolina—and I use the word not in an offensive way—it is an impertinence for the Senator from South Carolina to come in here and undertake to discharge that committee from the further consideration of a resolution that they have had in their hands only a few days, at a time when the Senate is engaged in the consideration of a great public question that gives every Senator very little time for the consideration of other matters.

Mr. President, I do not know what the report of that committee may be, but in the interests of fair play, in the interests of just treatment to the committees of this body, I protest with all the vigor I am capable of using against any action of the Senate that will degrade that committee by summarily wresting from it a subject-matter that they now have under consideration, and which they have a right to hold in their possession a sufficient length of time to enable them to reach a conclusion satisfactory to themselves. Of course, if the Senate chooses to do this, I will not complain, but I do not believe the Senate will do anything of the kind.

Mr. President, I do not care to occupy any more of the valuable time of the Senate. I have no disposition to cut off debate, but I conclude by giving notice that after a reasonable discussion I shall move to lay the motion of the Senator from South Carolina on the table.

Several SENATORS. Make the motion now.

Mr. GALLINGER. I will make the motion now, but will yield to any Senator who desires to be heard before the motion is put.

Mr. TILLMAN. Mr. President, I just want to answer briefly the accusation of "impertinence" against me in endeavoring to take this matter from the committee. I would never have made this motion but for the fact that I had consulted with the chairman of the committee before he left here, and he assured me that he had tried to get the other two members to consult with him and determine the course they would pursue, and that he was ready at any time to report the resolution back to the Senate.

Mr. GALLINGER. If the Senator will permit me, on that very day the committee had a formal meeting and considered this matter, but did not reach a conclusion.

Mr. TILLMAN. They could not because the other two members overruled the chairman.

Mr. GALLINGER. I beg the Senator's pardon, that is not the fact.

Mr. TILLMAN. I only infer that it must have been the fact from what the chairman told me.

Mr. JONES of Arkansas. It is impossible that the chairman could have made any such statement, because it was not true.

Mr. TILLMAN. It is not impossible, because he did make the statement to me, and will not deny it when he returns here.

Mr. JONES of Arkansas. I undertake to say that the chairman of the committee when he returns will not make any such statement in this Chamber.

Mr. TILLMAN. What the chairman said was that he had notified you and the Senator from New Hampshire that he was ready to take the matter up, and he tried to get you in the committee room or some other room, where the matter could be considered. The chairman will not deny that.

Mr. JONES of Arkansas. He will deny it. He had secured a room for consultation, and a consultation took place, and I went to the consultation. We considered the subject and talked about it. But when the Senator from South Carolina says that the chairman of the committee said that the subject was not considered, I am sure that he made no such statement, because it is not true.

Mr. TILLMAN. I merely inferred that from what the chairman told me before he went away.

Now, in reference to this indignity which it is said is being practiced upon this committee, it is not a question about which the committee need feel so much concern. Every Senator here has been considering this matter individually, and has made up his mind as to what he wants. I see a statement in the newspapers that the Republicans had a caucus on this matter at some dinner somewhere. I suppose that is a lie, too.

I see also a statement in the newspapers that the Democrats have declared that they do not want the old scandal reopened; that they are willing to take up a new resolution to investigate the present scandal; but I am perfectly impartial so far as party is concerned.

I seek to go into the old matters, since Mr. Chapman has been tried and it has been decided that these two other men should be turned loose, and that the Senate can ask these questions and force answers. I do not want to investigate the new scandals and leave the old ones out. If there was rascality in 1894, I want to know it; and if there has been rascality since then, we ought to know it. The American people have some rights which the Senate is bound to respect, and it will rest with you gentlemen, by your votes, if you lay this measure on the table, which will be the death of it, to convict yourselves in the eyes of the people as being desirous to cloak a fraud by being unwilling to open it up. I have nothing more to say.

Mr. JONES of Arkansas. I hope the Senator from New Hampshire will withdraw his motion and allow me a moment.

Mr. GALLINGER. Certainly, with pleasure.

Mr. JONES of Arkansas. The Committee to Audit and Control the Contingent Expenses of the Senate will report this resolution back unless the Senate chooses to discharge the committee from the further consideration of the resolution. But, as one member of that committee, Mr. President, I can not shut my eyes to some facts that impress themselves very strongly on me. I regard the Senate of the United States as a respectable body. I believe the members of the Senate of the United States are gentlemen—as a rule. [Manifestations of applause in the galleries.]

But when we undertake to assume to ourselves all the virtue and all the honesty there is in this country, and to determine that we are going to undertake to pass on the qualifications of our members—gentlemen who have been elected here time after time to seats in this body, and have come here to represent the people of their States—we are assuming a good deal. If this Government is not a mistake, if it is not a failure, the people of our country ought to be capable of selecting their Senators. If the people of the States and if the legislatures are honest, they want honest men to represent them. If they are men of intelligence, they want men of intelligence to represent them; and I respectfully submit that when the Senate of the United States undertakes to pass upon the question as to whether sovereign States have sent men of respectability here, we ought only to proceed upon the gravest occasion and when the circumstances are such as to impel action.

Mr. President, if a charge is made in a magistrate's court against a fellow for stealing a chicken, there must be the solemnity of an affidavit behind the prosecution, or else the man will not be proceeded against. There must be some solemnity about the proceedings; and I submit to the Senate that the fact that a man is a member of this body, bearing the credentials of a sovereign State and the indorsement of the people of his State, who have perhaps sent him here time after time, should at least weigh for something.

Under these circumstances, I believe it is a duty that this committee owes to itself and owes to the Senate that when a proposition of such a grave character as this is submitted for consideration the committee shall take time to consider the question fairly and fully and dispassionately.

I have no temper in this matter. I believe that the Senate ought to look fairly and fearlessly into any accusation that comes here with a sufficient degree of force to induce it to believe that it rests on any substantial foundation, but I do not believe that the Senate ought to be started off lightly on every proposition, made by some man who, perhaps, with the greatest honesty in the world, has been imposed upon.

We hear rumors all around on the street by which persons are made to believe that things exist even when they do not exist, and charges are made by newspaper correspondents, who, without any disposition to misrepresent the truth, can be imposed on as well as other men. They hear these stories worked up from different quarters until they believe that there is something in them, and the desire that unfortunately controls newspaper men to a great extent, to be first to get the news and to produce a sensation, sometimes precipitates men, who do not mean to do injustice or wrong, to give currency to statements which really ought not to find their way to the public.

Under these circumstances, it seems to me that the Senate ought to proceed calmly and deliberately. If the Senate chooses to discharge the committee, I have nothing to say. I am perfectly willing for it to do so if it wants to, but if it wishes to leave the matter in the hands of the committee, the committee will act in a reasonable time.

The Senator from South Carolina said that the Senator from Nevada told him that he was going away in the afternoon and that he did not know when he was coming back. The Senator from Nevada told the Senator from New Hampshire and me that he would be back to-morrow. I do not know when he will be here, but I believe he will be here to-morrow.

I think this matter will be taken up in the committee and disposed of at the proper time. I am perfectly willing that the Senate shall take its own course. I am not prepared to say that I am in favor of anything being done further than I have already indicated to the Senate. I shall not act hastily, and no effort, no motion to discharge the committee is going to produce any haste on my part. I will go ahead, if the Senate trusts the committee with the investigation of the subject, and examine it to the best of my ability.

I do not understand the full force of the Senator's ground of complaint in speaking of the great desire to get this resolution back to the Senate by charging that there was some effort to fire in his rear, and that there must be some effort to relieve him from that. Mr. President, the Senator seemed to me to be unfortunate in that reference. The first charge of this sort that has been mentioned here this morning was the one published in a newspaper by ex-Senator Butler about the Senator from South Carolina. Six hours later the Senator from South Carolina brings into the Senate his resolution, and it does not seem to me that he can make out a case against the other side of firing in his rear under the circumstances.

Mr. WHITE. Mr. President, the Senator from South Carolina [Mr. TILLMAN] stated that a vote to lay his motion on the table would end the entire investigation. This matter has been referred to the committee but a few days, and the Senator from Arkansas [Mr. JONES] who sits near me has, as everyone in the Senate knows, been diligently at work endeavoring to reform this very pernicious tariff bill, I regret to say without very much success, but, however, he has been doing something in that direction; at all events, he has been very busy. He has been occupying his seat in the Chamber and at work here all the time.

The Senator from Nevada [Mr. JONES] is necessarily absent. I had a conversation with him just before he made his present trip. He is in the city of Philadelphia, and will be back very soon.

I have perfect and entire confidence that the committee will take the matter up and report it back, and if the Senate do not like the report they will act as they wish to act. But as the matter now stands I do not feel justified in convicting that committee of disregarding its duty, and the majority of the committee being present in the Chamber, informing us that the matter is under consideration and will be reported back as soon as practicable, I shall vote to lay the motion on the table; and when the resolution comes before the Senate, I shall act as under the circumstances seems to me proper.

Mr. HOAR. I demand the regular order on the motion to lay on the table.

Mr. TILLMAN. I hope the Senator will withhold that one moment. I just want to say a word, and then I will quit.

Mr. HOAR. Very well; I will withdraw the demand; but it seems to me we are wasting a good deal of time.

Mr. TILLMAN. The Senators who are members of the committee, and who are present, having assured us that the resolution will be reported back, and that it will not be buried, and as I have no intention—not the slightest—of casting any imputation on the committee of dereliction of duty, if the Senator from New Hampshire will permit me after he has made the motion to lay on the table, I will withdraw the motion to have the committee discharged, and we will await the deliberations of the committee, and then act upon the question when it comes up without the influence that would now cause a great many Senators who are in favor of the resolution to vote to lay the motion on the table.

Mr. JONES of Arkansas. What I have said has not been said with any idea or hope of such a course being taken. I should prefer to have the Senate express itself upon this subject, since the question has been raised.

Mr. BERRY. The Senator has the right to withdraw the motion, under the rule, at any time before the yeas and nays have been called.

The VICE-PRESIDENT. The Senator from South Carolina [Mr. TILLMAN] moves that the Committee to Audit and Control the Contingent Expenses of the Senate be discharged from the further consideration of the resolution which he offered on May 26. The Senator from New Hampshire [Mr. GALLINGER] moves to lay that motion on the table. Is the Senate ready for the question?

Mr. BERRY. The Senator from South Carolina asked to withdraw the motion, Mr. President.

The VICE-PRESIDENT. The Chair did not so understand him. The Chair understood the Senator to say that he was willing to withdraw it.

Mr. TILLMAN. I asked to withdraw it and let the committee act, but I am willing to let it go one way or the other.

The VICE-PRESIDENT. The Chair understood the Senator from South Carolina to say that he was willing to withdraw the motion if the Senator from New Hampshire would permit him to do so.

Mr. TILLMAN. Well, the Senator from New Hampshire not having spoken, I thought he assented to the request.

The VICE-PRESIDENT. The Senator from South Carolina has the undoubted right to withdraw his motion if he so desires. What is his desire in the matter?

Mr. TILLMAN. Of course I withdraw it under the circumstances, because I have no intention of reflecting on the honesty or the integrity of the committee.

Mr. GALLINGER. I did not know that the Senator from South Carolina appealed to me at all. I am perfectly willing that he shall withdraw his motion.

The VICE-PRESIDENT. The motion is withdrawn, the Chair understands. Is that correct?

Mr. TILLMAN. Yes, sir; I asked that.

THE TARIFF BILL.

Mr. ALLISON. I call for the regular order.

The VICE-PRESIDENT. The regular order is called for, the title of which will be stated.

The SECRETARY. A bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. BUTLER. I hope, now that the Senator from Iowa has submitted his request to have the tariff bill laid before the Senate, that we may be permitted to present morning business.

The VICE-PRESIDENT. Does the Senator from Iowa withdraw his request?

Mr. ALLISON. I do not.

Mr. BUTLER. It would have been very easy for any Senator to object to the request of the Senator from Iowa, and I rose to do so; but at least one Senator near me assured me that it was the purpose of the Senator from Iowa to have the bill laid before the Senate, and that then we could present morning business. I could see no objection to that course, and so I interposed no objection. Certainly the Senator from Iowa does not desire to compel Senators who have morning business to object when he makes such a request hereafter.

Mr. ALLISON. I certainly yield for morning business. I did not understand the Senator from North Carolina to interpose any objection to my request, but if he or any other Senator has morning business to present, I am perfectly willing to yield to it.

Mr. JONES of Arkansas. You stated that.

Mr. ALLISON. I stated that. I yield to the Senator from North Carolina. He need not be disturbed about the matter.

Mr. BUTLER. I understood the Senator from Iowa to say that he would yield to morning business, and I rose for the purpose of presenting morning business.

The VICE-PRESIDENT. If there be no objection, the Chair will receive morning business.

Mr. BUTLER. I present a memorial of several firms engaged in the lumber business in my State, protesting against the reduction of duties and the placing on the free list of certain articles in the tariff bill. Inasmuch as the memorial is short and signed by a number of large firms, I ask that it be read at the desk.

The VICE-PRESIDENT. The memorial will be read, if there be no objection.

The Secretary proceeded to read the memorial, but before concluding was interrupted by

Mr. ALLISON. I hope the Senator from North Carolina will not ask to have that communication read. It relates, I suppose, to one or two schedules of the tariff bill. I have no objection to its being printed in the RECORD. The lumber schedule will be under consideration, I hope, some time to-day.

Mr. BUTLER. Very well; that will answer.

The VICE-PRESIDENT. The memorial will be printed in the RECORD, if there be no objection. The Chair hears none, and it is so ordered.

The memorial was ordered to lie on the table and be printed in the RECORD, as follows:

WILMINGTON, N. C., *May 24, 1897.*

To the honorable the Senate of the United States:

Your petitioners have been engaged for many years in the lumber business to a very large extent, shipping cargoes of pitch pine lumber to the countries of Haiti, San Domingo, and Mexico. These countries have been shipping back to a large extent logwood and other dyewoods to the United States, principally to the ports of Boston, New York, and Philadelphia, to the extent of about 100,000 tons annually; these dyewoods make remittances, as against American produce, and to stop or greatly curtail the sale of logwood will naturally much reduce the extent of shipments of American goods.

We therefore earnestly protest against the reduction of duties on analin colors or blacks, at present paying a duty of 35 per cent; we earnestly protest against the placing of naphthazarin black, or any other coal-tar black, on the free list, as such action would greatly diminish the use of logwood and other dyewoods in the United States.

We desire to call to your notice that analin colors, including blacks, are manufactured solely in Germany, and they being patented in this country, no manufacturer can produce them in the United States.

We therefore regard any reduction of duties from the present law on analin dyes or blacks as favoring the commerce of Germany to the detriment of American commerce, and as tending to greatly reduce and restrict our business in pitch pine lumber with the countries shipping logwood.

CAPE FEAR LUMBER COMPANY.
HILTON LUMBER COMPANY.
BRIDGERS & McKEITHAN LUMBER COMPANY.
CHADBOURNE LUMBER COMPANY.
EDWARD KIDDER'S SON.
S. & W. H. NORTHROP.

POSTAL TELEGRAPHS AND POSTAL SAVINGS BANKS.

Mr. BUTLER submitted the following resolution; which was considered by unanimous consent, and agreed to:

Whereas on April 22 the Senate passed a resolution directing the Secretary of State to send to the Senate any information received by the Department about the nature and practical workings of postal savings banks in foreign countries; and

Whereas the Secretary of State replied on May 12, stating that replies received from diplomatic representatives of the United States in answer to a circular sent them by Secretary of State Blaine under date of May 20, 1881, were referred to the Post-Office Department without being printed, which answer is contained in Senate Document 33; and

Whereas on May 17 the Senate passed a resolution directing the Postmaster-General to send to the Senate the said information relating to postal telegraphs and postal savings banks; and

Whereas the Postmaster-General, under date of May 27, replies that the Post-Office Department has never received such information from the State Department, which answer is contained in Senate Document 127: Therefore, *Resolved*, That the Secretary of State be, and he is hereby, directed to secure and send to the Senate the reports received by the State Department from the consular representatives of this Government in obedience to the circular sent them by Secretary of State Blaine on May 20, 1881.

INCOME TAXES.

Mr. BUTLER. I introduce a joint resolution, which I ask may be read at length.

There being no objection, the joint resolution (S. R. 47) to amend the Constitution of the United States, giving Congress the power to lay and collect income taxes was read the first time by its title, and the second time at length, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of both Houses concurring therein). That the following article be proposed to the legislatures of the several States as an amendment to the Constitution of the United States, which, when ratified by three-fourths of said legislatures, shall be valid as a part of the Constitution, namely:

ARTICLE XVI.

The Congress shall have power to lay and collect taxes on all incomes, regardless of the source from which the income is derived or acquired; but all income taxes shall be uniform throughout the United States.

Mr. BUTLER. I ask that the joint resolution be printed and lie on the table; and I give notice that to-morrow morning, during the morning hour, I shall submit some remarks upon the question, and I shall ask the Senate at an early day to consider it.

The VICE-PRESIDENT. The joint resolution will lie on the table.

THE TARIFF BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States, the pending question being on the amendment of Mr. VEST to strike out paragraph 149 and insert:

149. Penknives, pocketknives, or clasp knives, and erasers or manicure knives of all kinds, or parts thereof, wholly or partially manufactured, including such as have corkscrews, file blades, or manicure blades, each of which shall be held to be a blade, if valued at not more than 40 cents per dozen, 10 cents per dozen and 15 per cent ad valorem; all others having but one blade, 40 cents per dozen and 20 per cent ad valorem; if having but two blades, 60 cents per dozen and 20 per cent ad valorem; if having but three blades, 80 cents per dozen and 20 per cent ad valorem; if having four blades or more, $1 per dozen and 20 per cent ad valorem: *Provided*, That no article of the above named shall pay a higher rate of duty than 70 per cent ad valorem.

Razors or razor blades, finished or unfinished, valued at not more than $4 per dozen, $1 per dozen; valued at more than $4 per dozen, $1.75 per dozen, and in addition thereto, on all razors and razor blades, 15 per cent ad valorem.

Scissors and shears, finished or unfinished, 45 per cent ad valorem.

Mr. JONES of Arkansas. Mr. President, the pending amendment proposes to continue the rate on pocket cutlery in the present law. The proposition submitted by the bill as it came from the House was one of the largest increases over the present law that was proposed in this bill. The Senate amendment modifies the rates as they came from the House quite materially, and the paragraph as proposed by the Senate committee is nothing like so objectionable as the proposition as it came from the House; yet the present proposition seems to me to be extreme and unreasonably high and absolutely without justification. It seems to me that the Senate ought not to lose sight of the facts bearing upon this question.

On yesterday the Senator from California [Mr. WHITE] had a table printed in the RECORD which I hope Senators have read, showing the enormous increases in the rates on cutlery, I believe exceeding 400 per cent on certain classes of cutlery in the schedule as it came from the House of Representatives, and 250 or 270 per cent in the proposed schedule. The truth is, that these high duties or that any duties over 60 or 70 per cent are practically prohibitory. If such provisions as these are embedded in the law, the result must necessarily be that there will be no importations of the low grades of cutlery which come now from abroad, and none of the high-class cutlery comes here now, or practically none. The carvers, the table cutlery, and others are altogether in the hands of the American manufacturers. It seems to me the American people are entitled to the right of competition between the producers abroad and here on something like fair terms.

I hold in my hands a comparative statement showing the effect on the revenue to be derived from the bill as it came from the House on pocketknives in comparison with the Wilson law, based on imports for the year 1896. According to the statistics of the Treasury Department, the total importation of pocketknives valued at not more than 50 cents a dozen was $148,788.12. The duty on these under the Wilson law would amount to $61,897.75. The duty on this importation under the Dingley bill as it came from the House would be $75,881.80. The duty on this grade of goods under the Dingley bill would average 51½ per cent, and the next higher grade of importations, valued at from 50 cents to $1.50, as was stated yesterday by the Senator from Missouri, is by far the largest importation. I believe, however, that the Senator did not give the figures to the Senate, and I will do so.

There were imported of goods valued at between 50 cents and $1.50 per dozen, $648,888.22.

Mr. PLATT of Connecticut. When? In what year?

Mr. JONES of Arkansas. That is the importation of this class of knives for the last fiscal year.

Mr. PLATT of Connecticut. There is a mistake about that.

Mr. JONES of Arkansas. This statement was made up by a man who is thoroughly skilled in these matters. He says he took it from the statistics. I do not think there is any doubt about it.

Mr. PLATT of Connecticut. It is right here in the statistics—363,000 dozens, valued at $393,000. In 1896 there were 444,000 dozens, valued at $375,000.

Mr. WHITE. To what does the Senator from Connecticut refer?

Mr. PLATT of Connecticut. I am referring to the comparative statement.

Mr. WHITE. What paragraph?

Mr. JONES of Arkansas. Paragraph 149, the bracket between 50 cents and $1.50 a dozen. The Senator from Connecticut, I think, is somewhat in error. The subdivision to which he alludes seems to give the importation for 1890.

Mr. PLATT of Connecticut. Oh, no; it gives the importations under the laws of 1890 and 1894, respectively, for the fiscal year ending June 30, 1893, and the fiscal year ending June 30, 1896.

Mr. JONES of Arkansas. The Senator, I believe, read the importations at 363,156.65 dozens.

Mr. PLATT of Connecticut. Yes.

Mr. JONES of Arkansas. That was the importation for 1890, as shown by the comparative statement which the Senator has before his eyes.

Mr. PLATT of Connecticut. The Senator is certainly mistaken. If he will look in the column in front of that, under the head "Year ending June 30," he will find that the importations are for 1893 and 1896.

Mr. JONES of Arkansas. I still think the Senator from Connecticut is mistaken. Let me read:

Valued at more than 50 cents per dozen and not exceeding $1.50, 1890.

Then the figures are run out. Yes; the Senator from Connecticut is correct.

Mr. PLATT of Connecticut. Yes; that is the law of 1890, and the figures are run out for the year 1893. That is the importation for 1893.

Mr. JONES of Arkansas. Yes, the Senator is correct about it.

Valued at more than 50 cents a dozen and not exceeding $1 per dozen.

Then it gives the importation for 1896. There does not seem to be any subdivision in the comparative statement, giving the importations between 50 cents a dozen and $1.50 a dozen. "Valued at 50 cents a dozen and not exceeding $1 per dozen," 444,000 dozens, valued at $375,000. And then, "valued at $1 per dozen and not exceeding $1.50." The two should be added together, and the two, I presume, will make the figures I have.

Mr. PLATT of Connecticut. What are the figures which the Senator has?

Mr. JONES of Arkansas. Six hundred and forty-eight thousand eight hundred and eighty-eight dollars and twenty-two cents. It is very easy to determine. It can be done in a moment.

Mr. PLATT of Connecticut. I think the Senator is practically right about it.

Mr. JONES of Arkansas. After making the calculation I find it is exactly right, Mr. President.

Mr. PLATT of Connecticut. The classification is divided here.

Mr. JONES of Arkansas. Yes. I think the Senator's error came from the fact that he did not notice that there was a subdivision in the classification.

So the figures as stated by me showing the importations for last year of knives between 50 cents a dozen and $1.50 a dozen, $648,888.22, are correct, and upon that the duty under the Wilson Act would be $354,588.69.

The importations of pocket knives valued at from $1.50 to $3 a dozen amounted to $254,277.33, and the importations of knives valued at $3 per dozen and over were $248,000.

Mr. President, this shows that by a large margin, as was stated by the Senator from Missouri yesterday, the importations of

pocket cutlery come in the class between 50 cents a dozen and $1.50 a dozen. I will include the table in my remarks. I see by a note at the foot of the table that, according to the calculations made by the gentleman who prepared this statement, the Wilson tariff would make these importations produce $691,032.61, while he estimates the tariff to be derived from the Dingley bill on the same schedules to be much less.

Comparative statement showing the effect on revenue of Dingley tariff on pocketknives in comparison with the effect of Wilson tariff, based on imports for fiscal year ending June, 1896, according to Mr. W. C. Ford's statistics.

	Total.	Duty.	
		Wilson.	Dingley.
Importation of pocketknives valued at not more than 50 cents a dozen	$148,788.12		
Duty, Wilson tariff		$61,897.75	
Duty, Dingley tariff (average duty 51½ per cent)			$75,881.88
Importation of pocketknives valued at from 50 cents to $1.50 per dozen	648,888.22		
Duty, Wilson tariff		354,586.09	
Duty, Dingley tariff (deducting 75 per cent for goods which are excluded by excessive duty, leaving only $162,222 which could be imported, average duty on which would be about 82 per cent)			133,022.04
Importation of pocketknives valued at from $1.50 to $3 per dozen	254,277.33		
Duty, Wilson tariff		150,141.61	
Duty, Dingley tariff (deducting 35 per cent for goods which are excluded by excessive duty, leaving $165,280 which could be imported, average duty on which would be about 85 per cent)			140,488.00
Importation of pocketknives valued at over $3 per dozen	248,809.09		
Duty, Wilson tariff		124,404.56	
Duty, Dingley tariff (average duty 59 per cent)			146,796.72
	1,300,762.76	691,032.61	496,188.64

Wilson tariff as a revenue producer	$691,032.61
Dingley tariff as a revenue producer	496,188.64

In 1892 there were imported into this country of pocketknives not over 50 cents a dozen, 324,890 dozens; from 50 cents to $1.50, 235,000 dozens, and between $1.50 and $3, 72,173 dozens, and over $3, 28,977 dozens.

The values between 50 cents and $1.50 were 84 per cent of the total importations; the values from $1.50 to $3 were 11 per cent of the importations, and the values over $3 per dozen were 4½ per cent of the importations.

This was in 1892, and it shows how strongly the statement of the Senator from Missouri is corroborated by the figures.

Mr. GEAR. I think the Senator is mistaken about the number of knives at the rate of $3 a dozen and upward.

Mr. JONES of Arkansas. In 1892? There is nothing in the comparative statement about 1892. The importations for the year 1893 appear there, I suppose.

Mr. GEAR. It is 29,000 dozens, showing a large increase.

Mr. JONES of Arkansas. Twenty-nine thousand in 1893? In 1893 there were imported of knives not over 50 cents per dozen, 437,555 dozens; between 50 cents and $1.50, 363,000 dozens; between $1.50 and $3, 81,263 dozens, and over $3, 29,283 dozens. But still in 1893 88 per cent of the total importations were of the knives between 50 cents and $1.50 per dozen. That is the point we were endeavoring to establish. Of knives between $1.50 and $3 per dozen the importations were 9 per cent; of those over $3 per dozen there were but 3 per cent, showing that the present market is absolutely in the hands of the American manufacturers. They do not compete with the Germans in the low class of knives. They do not undertake to do so, and there can be no justification for imposing such high taxes upon these knives except to render it impossible for the American people to buy the low-class knives and compel them to buy the higher-priced class of knives made by the American manufacturers. There can be no other purpose.

In 1894 there were imported of knives costing not over 50 cents a dozen, 205,000 dozens; from 50 cents to $1.50 per dozen, 180,714 dozens; from $1.50 to $3 per dozen, 39,546 dozens; over $3 per dozen, 13,000 dozens, making again 88 per cent of all the importations between 50 cents and $1.50, 9 per cent between $1.50 and $3, and 3 per cent over $3.

In 1895 we have the same story—not over 50 cents, 533,000 dozens; between 50 cents and $1.50 568,000 dozens; between $1.50 and $3, 118,916 dozens and over $3, 49,000 dozens, making 88 per cent of the importations between 50 cents and $1.50, 8½ per cent between $1.50 and $3, and 3½ per cent on knives costing over $3 per dozen.

In 1896 the figures were practically unchanged. Of knives costing not over 50 cents there were imported 449,000 dozens; from 50 cents to $1.50, 647,000 dozens; between $1.50 and $3, 115,000 dozens; over $3, 54,000 dozens, or 86½ per cent of the importations between 50 cents and $1.50, 9 per cent between $1.50 and $3, and 4½ per cent over $3.

Comparative statement of importations of pocketknives and erasers.

Year.	Class.	Number of dozens.	Per cent of importations.
1892	Not over 50 cents	324,890	
	50 cents to $1.50	235,000	84½
	$1.50 to $3	72,173	11
	Over $3	28,977	4½
		661,940

	Over $3	54,687	4½
		1,266,883	

I submit these figures to show the absolute correctness of the statement of the Senator from Missouri yesterday, when he stated generally that by long odds the largest part of the importations came within these two prices, 50 cents and $1.50 per dozen.

Yesterday some allusion was made to a letter written by the vice-president of the Simmons Hardware Company, of St. Louis, Mo. It is a strong letter, well written, by a man who is absolute master of his business. I understand it is the largest hardware company in the world. They are men who are thoroughly familiar with their business.

The man who writes the letter is an old, trained, and skilled hardware man. He writes the letter in a temperate, reasoning style. It is addressed to Mr. MORRILL, chairman of the committee. I have a copy of it, and I propose to read it to the Senate, for I think it is worthy of consideration by all Senators. It is dated April 29, 1897, and says:

Being the largest importers and dealers in the United States in guns and cutlery, we feel that we are at liberty to encroach upon your time to a limited extent, and ask your consideration to the facts that we are able to present to you in relation to the proposed duties on these goods. We have purposely postponed doing this until a time when we could feel positively sure in regard to the feelings that these duties, if enacted, would create, as we do not want to deal in conjectures, but solely in facts.

We have 181 salesmen on the road, traveling for us in every State and Territory excepting those in the extreme East. As guns and cutlery are more largely sold in the fall than at any other time, it is a custom with us to take orders for them for fall shipment, and we have not this year made an exception. In consequence, however, of the pending tariff legislation, it has been necessary for us to protect ourselves and sell for fall shipment only under certain conditions.

"Self-preservation is the first law of nature," and all business houses are protectionists when there is any element of doubt in regard to what prices may prevail in future. Our salesmen of necessity have to be informed in regard to the changes that the Dingley bill as it has passed the House would create, if enacted, on the goods they sell. They have been, ever since the bill passed the House, taking orders for fall shipment under the following condition:

"It is understood and agreed that prices are subject to any advance that may be created by the enactment of a new tariff bill prior to the time of shipment; that is to say, that the exact difference between the duties on these goods under the present tariff and of any one that may be enacted in the meantime is to be added to prices."

And yet we have gentlemen on the other side telling us again and again that the tariff is not added to the cost and is not paid by the consumer, that it is an ingenious method adopted by the American people to compel foreigners to pay our taxes and that our citizens do not pay it at all. Here is a letter written by one of these gentlemen to the chairman of the committee, giving full information of the exact terms of the contract they make in proposing to sell their goods.

Our salesmen are of all sorts of political leanings and opinions, yet tariff is a matter of business that affects them, their customers, and their customers' customers.

We are now in position to state that the proposed duties on these goods are unwise and will be resented. On general principles it can be safely stated that any cause is weak where parties resort to misrepresentations and misstatements to achieve their ends. This has been done by both parties representing the gun and cutlery manufacturers.

Mr. Hunter, representing the gun manufacturers, stated before the House Ways and Means Committee that his information was obtained in person by their treasurer and general manager, who visited Europe for this particular purpose. He said that the better grades of guns came from England and France.

France sends us nothing whatever in the gun line, and a large proportion of the higher grades comes from Germany and Belgium. He further stated that the importers had undervalued guns by importing them in parts instead of in whole, his idea being to insinuate that the importers had resorted to dishonorable methods.

The manufacturers themselves were instrumental in having the McKinley tariff arranged so that parts of guns, which they themselves imported, could be brought in at a low rate of duty. The intent of the law was that complete guns should not be separated and brought in under that classification, but the language of the law permitted this, and the decision finally rendered was that the jobbers were entitled to bring them in according to the language and not the intent of the law. The position that the importers took in this matter was purely a business one, with no intent whatever to deceive.

In our own case we were very particular to tell the officials of the custom-house in our own city just what we intended to do, and that they could appraise the guns, as they undoubtedly would, at the full valuation as complete guns, and we on our part would pay same under protest and have the case tested by the courts. It was also stated before the committee, that under the operations of the Wilson law the importations of firearms had increased enormously, and that if the American manufacturer was to hold the American market the McKinley rates must be restored.

In this connection, about the importation of firearms having increased enormously, I will state that Government statistics show that we exported $770,862 worth of firearms and imported $617,235 worth.

Mr. GRAY. Under the Wilson Act?

Mr. JONES of Arkansas. Yes; last year.

There has been no increase in imports of guns under the Wilson bill to speak of. Under the McKinley bill guns were imported in parts and classified as "manufactures of wood or of iron," and consequently they do not figure in the statistics of gun imports for the period in which the McKinley bill was in operation.

The total value of imports of firearms in 1895—that is, under the full application of the Wilson Act—was only, according to statistics, $458,000. This, with the exception of the records for 1893 and 1894, which, for reasons set forth above, are misleading, is far below the statistics for the last ten years, which are as follows:

1886	$860,000	1891	$1,070,000
1887	958,000	1892	647,000
1888	1,070,000	1893	321,000
1889	1,159,000	1894	122,000
1890	1,338,000	1895	458,000

The cheaper grades of guns are not made in this country, and in Belgium and other countries are manufactured by the sweating system, which we sincerely trust will never prevail here. The proposed duty is the greatest on the cheaper grades, which are used by the poor man, which will be the means of forcing the farmer boy, who uses them mostly, either to go without a gun entirely or else buy something which he can illy afford, in the shape of a very much higher priced American gun.

The enormous increase on the cheap grades can best be appreciated by an examination of the following table:

Breech-loading guns.

Foreign cost.	War tariff.	McKinley tariff.	Wilson tariff.	Dingley tariff.
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*
$3.60	35	77	30	63
4.30	35	70	30	58
4.70	35	67	30	56
5.20	35	65	30	54
5.60	35	62	30	53
6.10	35	100	30	100
7.50	35	88	30	88
8.00	35	85	30	85
10.00	35	75	30	75
12.50	35	85	30	85

The proposed tariff under the Dingley bill on guns and cutlery is very greatly in excess not only of the McKinley tariff but even of the war tariff, which is a sufficient refutation of the statement of the manufacturers that they can not prosper save under the proposed new schedule. There can be no better evidence of the manifest insincerity of the manufacturers of pocket cutlery in particular than the prospectus issued June 21, 1892, by the Messrs. Taintor & Holt, of New York City, in behalf of the United States Cutlery Company, organized under the laws of the State of New Jersey, from which we beg leave to quote, as follows:

I have the prospectus in full, and I was thinking that I would present it to the Senate, perhaps. However, I will read this extract from it:

"This corporation has been formed to purchase, unite, and take over as going concerns, four of the oldest, largest, and best-known business properties in the United States, viz, those of the Miller Bros. Cutlery Company, Meriden, Conn.; the New York Knife Company, Walden, N. Y.; the Walden Knife Company, Walden, N. Y., and that of Dwight Divine, Ellenville, N. Y. The consideration for the purpose is the sum of $1,000,000 in preferred and common stock of the company."

And from the vendors' statement we quote as follows:

"These four concerns manufacture about 65 per cent of all the pocket cutlery made in the United States. They all have excellent water power, and are capable of large extensions with very moderate outlay. This business, with a record of over twenty years, has steadily grown into a profitable undertaking. The manufactured goods now equal the best foreign makes, and it is impossible now to turn the channel of trade back to foreign manufacturers."

This was in 1892, not very long after the passage of the McKinley law, and it is a right striking fact (I think I will demonstrate it before I take my seat, if I do not forget it) that these four companies gave the total value of their property, in an examination before a committee of the Senate or of the House, at $400,000 in the aggregate, each one stating the value of his own plant and his own property. It was put down at $400,000, and the company was capitalized in the new trust, under the McKinley Act, at $1,600,000.

Mr. PLATT of Connecticut. Does the Senator say that is the prospectus put out by the four companies or either of them?

Mr. JONES of Arkansas. This letter says it was a prospectus put out by Messrs. Taintor & Holt. I have the full prospectus and will present it to the Senate, so that the Senator can see exactly where it purports to come from.

Mr. PLATT of Connecticut. It is unauthorized.

Mr. JONES of Arkansas. It was put out by Messrs. Taintor & Holt, of New York City, in behalf of the United States Cutlery Company, and they state in the prospectus that the purpose was to absorb the four companies.

Mr. PLATT of Connecticut. Now will the Senator let me say one word about that?

Mr. JONES of Arkansas. With the greatest pleasure.

Mr. PLATT of Connecticut. When it was found out by the companies which they proposed to sell, it was repudiated by them publicly and never was carried into operation.

Mr. JONES of Arkansas. I was not aware of that fact. My impression was that it had been organized and had become the operating company. I will interrupt the reading of the letter right here, and read the whole of this, since the question has been raised by the Senator from Connecticut. I know, of course, that what the Senator from Connecticut states is true. I do not want to be understood as challenging the correctness of anything he says, so far as his information goes. I will simply submit to the Senate these facts as they come to me from what I consider reputable sources in New York, from dealers in these articles. This statement is made in full, and I was assured that it is a fact:

During the tariff hearings, 1889-90, the American manufacturers of pocket cutlery submitted a statement of their several investments, which can be found in Miscellaneous Document No. 176, page 72. In that statement will be found the following:

	Capital.
Miller Bros. Cutlery Company, Meriden, Conn	$200,000
New York Knife Company, Walden, N. Y	100,000
Ulster Knife Company, Ellenville, N. Y	50,000
Walden Knife Company, Walden, N. Y	50,000
Total	400,000

Within a few months after the passage of the McKinley tariff, the pocket-knife manufacturers, by frequent advances, came to a total increase in prices of over 30 per cent. On June 21, 1892, the above-named companies issued a prospectus, offering their plants for sale for $1,600,000, of which the following is a copy:

PROSPECTUS.

NEW YORK, *June 21, 1892.*

MESSRS. TAINTOR & HOLT, NEW YORK,

Have been authorized to offer for subscription $800,000 of 8 per cent cumulative preferred stock and $250,000 of common stock, as mentioned below:

THE UNITED STATES CUTLERY COMPANY.

Organized under the laws of the State of New Jersey.

Capital stock, $1,600,000, divided into

8,000 shares 8 per cent cumulative preferred stock of $100 each	$800,000
8,000 shares common stock of $100 each	800,000
	1,600,000

All shares are full-paid stock and nonassessable. Stockholders will have no personal liability whatever.

The company begins business without any debt or liability.

The charter of the company and its by-laws provide that no bond or mortgage can be created without the consent of 90 per cent of the preferred stockholders, also that this provision can not be altered.

Registrar of stock: Central Trust Company of New York.

Transfer agents: Taintor & Holt.

Counsel: Starr & Ruggles.

Auditors: Yalden, Brooks & Donnelly.

Officers: W. F. Rockwell, president; Thomas W. Bradley, vice-president.

Directors: W. F. Rockwell, of Miller Bros. Cutlery Company, Meriden, Conn.—

He seems to have been a member of the company—

Thomas W. Bradley, of New York Knife Company, Walden, N. Y.; E. Whitehead, of Walden Knife Company, Walden, N. Y.; Dwight Divine, Ellenville, N. Y.; James E. Campbell, Hamilton, Ohio; George H. Holt, of Taintor & Holt, New York City; Albert L. Pancoast, Jersey City, N. J.; Charles H. Sheldon, jr., of Sheldon & Binney, Providence, R. I.; A. Chamberlain, president Home National Bank, Meriden, Conn.

Application will be made to list the securities of this company on the New York Stock Exchange.

The preferred stock will be entitled to cumulative preferential dividends of 8 per cent per annum, payable out of the profits of the company, and will also rank against the assets of the company in preference to the common stock.

The common stock will be entitled to the surplus earnings, when declared in dividends, after payment of the dividend of 8 per cent on the preferred stock—

And so on, giving the terms of the division, etc.:

The vendors retain a majority of the common stock.

Then they state the terms as to subscriptions:

The subscription list will be opened at 10 o'clock a. m. on Monday, June 27, 1892, and will close on Wednesday, June 29, 1892, at 3 o'clock p. m., at the office of Messrs. Taintor & Holt, 11 Wall street, New York.

Then the following statement is submitted by the same individual:

THE UNITED STATES CUTLERY COMPANY.

This corporation has been formed to purchase, unite, and take over as going concerns four of the oldest, largest, and best-known business properties in

the United States, viz: those of the Miller Bros. Cutlery Company, of Meriden, Conn.; the New York Knife Company, of Walden, N. Y.; the Walden Knife Company, of Walden, N. Y., and that of Dwight Divine, of Ellenville, N. Y. The consideration of the purchase is the sum of $1,000,000 in preferred and common stock of the company.

The company begins business on or about July 1, 1892.

Vendors' statement.

These four concerns manufacture about 65 per cent of all the pocket cutlery made in the United States. They all have excellent water power, and are capable of large extensions with a very moderate outlay.

This business, with a record of over twenty years, has steadily grown into a profitable undertaking. The manufactured goods now equal the best foreign makes, and it is impossible now to turn the channel of trade back to the foreign manufacturers.

The members whose names are given are connected with this concern. Whether or not they succeeded in floating their scheme of selling out at four times the value of their plants, it seems to me they must be held to their own statement as to the profitableness of their business and what they were likely to do in the future.

The company acquires, free of incumbrance, all the property of the four concerns used in connection with their business, including real estate, buildings, and machinery, together with the good will, patents, trade-marks, designs, etc.

The real estate, buildings, machinery, fixtures, patterns, etc., used in manufacturing have been valued, under oath, by Hon. George B. Childs, treasurer Ellenville Savings Bank, Ellenville, N. Y.; Uriah E. Terwilliger, trustee Ellenville Savings Bank, Ellenville, N. Y.; John R. Hays, postmaster, Walden, N. Y.; Walter C. Stevens, cashier Walden National Bank, Walden, N. Y.; Judge Levi E. Coe, president Meriden Savings Bank, Meriden, Conn.; John L. Billard, Meriden, Conn.; John S. Taylor, merchant, Walden, N. Y., and Hiram B. Wooster, trustee Walden Savings Bank, Walden, N. Y., at	$692,000
Stores and manufactured goods on hand at cost price, with cash in the treasury	440,000
	1,132,000

Nothing is included in the foregoing total for any of the patent rights, trade-marks, or good will, valued at $500,000.

The books of all these concerns have been examined by Messrs. Yalden, Brooks & Donnelly, chartered accountants, and according to their report the business of these companies has steadily increased year by year, and the net profits of these companies for a period of over three years are largely in excess of the sum necessary to have paid 8 per cent dividends upon $800,000 preferred stock, and the amount available for dividends in 1891 was $131,500, and from returns already to hand since then, taking into consideration the new works now in operation, which produced no goods up to January, 1892, the profits for 1892 may be fairly estimated to be not less than sufficient to pay 8 per cent on the preferred stock and 15 per cent on the common stock.

The "Marks bill," which was quite as important to the manufacturers as the increase of the tariff, prevents the importation of knives with the names of American houses stamped upon them. Before the passage of this law, foreign houses placed on the market bad qualities of knives stamped as American, which gave the impression that American-made knives were of poor quality, whereas it has been conclusively demonstrated that the home product is superior to the best imported goods. Even if the tariff be reduced, it will have opened up channels of trade that have been exclusively occupied by foreign manufacturers, and which can never again be taken away. This has been proved beyond question by the fact of the largest jobbing houses in the country having already contracted largely for supplies from the American manufacturers for lines of goods never ordered by them before, and which have been pronounced satisfactory in every way.

The prices upon cutlery have never yet reached those which could have been asked by the increased rate of tariff.

The present owners keep a majority interest in the common stock of the new company which will be formed to take over the properties.

If it is desired, the present managers have agreed to manage the different works of this company at moderate salaries, the maximum of which is fixed, and they bind themselves not to go into the manufacture of pocket cutlery in the United States, either directly or indirectly, for the period of seven years, whether they be employed by this company or not.

The manufacturing capacity of these companies is about 30 per cent larger than in 1891, and their product is sold months ahead at the full present market price.

The value of the solid assets is nearly one and one-half times the amount of the preferred stock, which is not only preferred as to income, but also as to these assets.

Attention is specially called to the fact that the business of manufacturing cutlery is still in its infancy in this country. Starting from small beginnings, it has grown surely to its present proportions, and the opportunity opened to it has been only partially availed of. It is not a business which has reached in the past its full period of prosperity, but, on the contrary, it has just begun its history of success and profit.

It is manifest that the shareholders in this company will be benefited by these unusually favorable conditions.

This prospectus seems to show at least that there was an effort made on the part of the people who had this enormous protection under the McKinley Act not only to organize a combination, they themselves holding 65 per cent of the total production of the pocketknives in this country, but at the same time to unload that property at 400 per cent above its value. This must have been simply the advance the McKinley Act gave them over what their property was worth before that bill was passed, and now we are increasing it here.

But I will continue to read this letter from St. Louis:

The real estate, buildings, machinery, fixtures, patterns, manufactured goods on hand, and cash in the treasury are stated, under oath, to be $1,132,000, and they value their patent rights, trade-marks, and good will at an additional $500,000.

Messrs. Yalden, Brooks & Donnelly, chartered accountants, than whom there are no better in the United States, examined their books—

This letter is about the matter concerning which I have just read—

and the prospectus states that their profits for a period of over three years past were largely in excess of the sum necessary to have paid 8 per cent dividends upon $800,000 preferred stock, and that the profits for 1892 may be fairly estimated to be not less than sufficient to pay 8 per cent on preferred stock of $800,000 and 15 per cent on the common stock, also $800,000. The tangible assets of these four concerns were $1,132,000, which, according to their statement, makes the profit on the actual investment 16 per cent per annum. The prospectus further states that even if the tariff be reduced it will have opened up channels of trade that have been exclusively occupied by foreign makers, and which can never be taken away again; yet these same four manufacturers testified before the McKinley Ways and Means Committee (Tariff Hearings, Document 176, page 72), that their investment only amounted to $400,000.

The American manufacturers of pocket cutlery to-day control nearly the entire American market on the higher priced goods, which invariably bear a very much larger per cent of profit than the cheaper grades. The sole effect of the proposed schedule will be to bar out about 80 per cent of the pocketknives heretofore imported, thus rendering the new tariff in this direction an utter failure as regards being a revenue producer, and compelling the poor man to pay enormously for the knives he is able to pay for. This will be made clear to you when you consider that the importation of pocket cutlery from the year 1892 to the year 1897 shows that 87 per cent of the total amount in dozens consisted of knives costing $1.50 and less. The following table speaks for itself, and shows clearly the discrimination against the poor man's goods:

TWO-BLADE POCKETKNIVES.

Foreign cost per dozen.	McKinley tariff.	Wilson tariff.	Dingley.	
			Other than pearl or shell handles.	Pearl and shell handles.
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*
$0.44	78	52	250	300

1.40	86	54	163	216
1.50	83	53	153	203

The present tariff on scissors and shears is 45 per cent, yet it is proposed to increase this in some instances on the cheaper grades to as much as 325 per cent. Ninety-seven per cent of the shears used here are manufactured in this country, and, furthermore, a considerable quantity is exported to England. We ourselves last month took an order for over 300 dozens in Sheffield, England, at a very satisfactory profit to us.

Exporting the goods in these quantities from this country absolutely to Sheffield itself, to the headquarters of the manufacture of cutlery in Great Britain, and selling them there at a profit to our exporters, and yet insisting on increasing the tariff over 45 per cent, which the Wilson Act now gives.

The grades of scissors which are imported are not made in this country at all, nor, in our opinion, are they likely to be.

The present duty on razors is an average of 45 per cent. Very few of these goods, in fact, a very insignificant quantity only, are made in this country, not entirely on account of the price, but on account of inability to get the peculiar kind of skilled labor necessary to their manufacture.

If industries with a protection of 45 per cent have not gained a foothold in our country, as has been the case with certain classes of scissors and razors, it clearly proves that they are not indigenous to the soil and have no right to exist here, and all legislation intending to increase enormously the duty on them is a direct tax on the poorer people.

The manufacturers of pocket cutlery are on record in regard to their business through the prospectus of the United States Cutlery Company. If the cutlery schedule, as it now stands in the Dingley bill, becomes effective, this prospectus will be made use of as showing the most inconsistent feature ever passed in tariff legislation, and will tend to inflame the minds of the masses, who are already sensitive in the extreme regarding what they consider class legislation. Can it be defended on any grounds whatever? Not on account of necessity for protection; their own prospectus denies it. Not on account of obtaining more revenue; the duties are prohibitive. Their prospectus and the enormous per cent of duties, as shown on the table which we inclose, are irreconcilable, excepting as a measure to permit pools.

Mr. President, it does seem that the intention of these things must be that way. We are assured again and again by protectionists that the purpose of tariff laws is to promote the production of goods in this country, and that competition amongst our

own manufacturers will bring prices down; and yet we have instance after instance, until we have instances by the hundred, in this country of combinations of producers to regulate prices by trusts, pools, or gentlemanly agreements, as they are sometimes called—a gentlemanly agreement to rob the masses of the people for the purpose of swelling the profits on their investments in this class of business.

Where combinations are possible under the laws of this country, I tell you, Mr. President, competition is absolutely impossible. We can have no competition unless we can prevent the combinations of these people; and when you put these high rates on the articles, you are offering a premium to these people to combine and increase the price enormously. I could mention instances by the dozen where this has been done. We instanced a few of them a day or two ago—nail trusts, trusts in steel rails, and so on.

The people of this country in the last five or six months have had some very strong object lessons before them in the way of protected duties that are not at all necessary to manufacturers, excepting for the purpose of enabling them to make combines among themselves. The steel-rail pool which has just gone to pieces is also going to have quite an educational effect in this direction, inasmuch as manufacturers have demonstrated their ability to sell rails delivered in England at less than English makers can produce them; yet during a long period of years they have forced the home consumer to pay $7 to $8 per ton more than would have been the case without an unnecessary duty.

The manufacturers of steel rails, some of whom are also makers of billets and rods, in 1896 sold fair quantities for export, in one case a large lot of rods being sold at $7 or $8 per ton less than the prevailing price in America.

The Wire Nail Association in a brief period of eighteen months more than doubled the capital of some of its members, and actually sold wire nails for export at just half the price prevailing for home use. This was only possible because of an alleged protective duty, and this notwithstanding the fact that the export of wire nails has been for a number of years past a steadily increasing business.

We wish to enter our strong and earnest protest against the passage of the measure, as far as it relates to guns, pocket cutlery, scissors, and razors, in the sincere belief that it will be bad legislation and bad politics, and in using the expression "bad politics" we do not mean to apply it to any particular party, and only use it in the sense that it will create intense feeling among an enormous class of people at a time when all measures supposed to be passed for the benefit of the country should be invulnerable against an honest attack.

It is the unnecessary advance on little articles of everyday consumption, such as scissors bought by women, pocket cutlery, and cheap guns bought by boys and farmers, that causes irritation and creates discontent. In order that you may see our point in this connection, it will be but necessary to say that if the wishes of the cutlery and gun manufacturers are carried out, our salesmen, in explanation of the advanced prices at which these goods will be invoiced to customers this fall, will be compelled to show that the average increase of duties on pocketknives has been 216 per cent, and in extreme cases, on cheaper grades, 540 per cent. This naturally provokes them, and leads them to talking in turn to the parties to whom they sell their goods; in other words, the jobber is aggravated, the salesman is aggravated, and in turn the retailer and the consumer to whom the retailer sells.

It is these little things where statements are so greatly multiplied that have great effect. It becomes an every-day topic of conversation among many people, and in this way it becomes the means of having many people condemn the measure.

In conclusion, the schedule on these items is wrong in principle, because the parties who can least afford to invest their money are legislated against. The enormous increase of duties on these goods will be resented and the measure as a whole will be condemned in consequence.

Yours, truly,

SIMMONS HARDWARE COMPANY,
J. W. MORTON,
First Vice-President.

This was signed by Mr. J. W. Morton, the vice-president of this company, as he states, the largest dealers in hardware in the United States.

Mr. President, we all know, of course, that it is utterly useless to show up these enormities; that it is utterly impossible to make any impression on the Senate. The fact that these taxes are to be levied upon the masses of the people, that the poor are to be compelled to contribute in small taxes and in small amounts upon every article that they purchase for domestic consumption, to swell the pockets of those who are already rich, fall upon deaf ears when presented to the other side of the Chamber.

There is but one satisfaction connected with it, that there is an appeal which lies from this body to one beyond, and one which will not refuse to listen—one that will not close its ears when this injustice and these gross inequalities are pointed out to them.

There are numbers of these things, but I hesitate to take up the time of the Senate in presenting them. I shall from time to time present such as seem the most glaring and most imperatively demanding attention.

The PRESIDING OFFICER (Mr. CARTER in the chair). The question is on the amendment of the Senator from Missouri to the amendment of the Committee on Finance.

Mr. VEST. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. TURPIE. Mr. President, I have kept personal account of the recurrence during the reading of the bill of what I shall call supernumerary rates of tariff, rates imposed not for purposes of revenue, not for purposes of protection, but exactions imposed simply for the sake of exactions and the effects that are to follow them. Take, for example, the present instance. It is admitted that, with the exception of a very low-priced grade of articles, cutlery is manufactured in the United States; that the only importation is of the low grade. The object of these increased rates is to prevent importation; the object of these increased rates is to destroy revenue——

Mr. PLATT of Connecticut. Mr. President——

The PRESIDING OFFICER. Does the Senator from Indiana yield to the Senator from Connecticut?

Mr. TURPIE. At the close of my sentence. The object of these increased rates can not in any manner affect wages, because the question of wages is simply between the employees and the employers here. So this is evidently a case of the imposition of superfluous and supernumerary increased rates of tariff simply for the sake of the increase. I yield with great delight to the honorable Senator from Connecticut.

Mr. PLATT of Connecticut. I wish merely to say that it is not admitted we have the market on the higher grades of cutlery or that we have no market on the lower grades. There has been no such admission presented to the committee, I understand.

Mr. TURPIE. I did not use the word "admission." I am not asking the honorable Senator to admit anything. I refer, however, to the papers before us. They will show that we have the markets on the higher grades. There are some importations of the higher grades. Why? Because when a man prefers British or French cutlery, he will have it, no matter what it costs. But that brings very little revenue. All the revenue we get is on the lower grades, the importation of which is now proposed to be stopped entirely. There will be no importation of the cheaper class of goods if the rate is increased as proposed in this bill. The very object of this increase is to prevent importation and to dry up the revenue heretofore derived from that source. So this is a supernumerary rate of tariff taxation, entirely superfluous, imposed for the sake of the tariff and its effect.

Now, Mr. President, this is not a single instance, it is the twelfth instance which I have counted of the imposition of these supernumerary rates. One of the principal features in this bill, its controlling descriptive feature, is the imposition of these supernumerary rates imposed merely as tariff for the sake of tariff. They can have but one object. They bring no revenue to the Government. Their purpose is to prevent that. They make no effect upon the wages, because the question of wages becomes domestic entirely. They do not relate to protection. Why, then, do the beneficiaries of the bill insist upon those rates being a part of its contents? Merely to make space, to make room, to make an open field, to prepare a park, a reserve for the operations of monopolies in the United States and to enable incorporated monopolies without question to fix their own prices on their own wares. That is the purpose of these supernumerary rates.

The imposition of supernumerary and superfluous rates is always accompanied with the direst vice relating to prohibitory and protective legislation. It is always accompanied with the unpardonable sin which adheres to and infests this sort of lawmaking. It is always a part of its feature that the highest superfluous and supernumerary rates, imposed simply for the sake of imposition, are imposed and placed on the lowest and the cheapest rates of goods. Why? The highest rates imposed on high-priced goods allowing their importation would bring a very small revenue. The taxpayers are very few in number. But when you impose the highest rate upon the lowest-priced goods you make every man, woman, and child in the country a taxpayer; the number of taxpayers would make many millions, and the sum so laid and collected becomes large. The poor people of the country—the millions not rich—are thus subjected to the principal burdens under this fiscal system. Those least able to pay taxes have imposed upon them the chief burden of taxation, and those more able and most able to pay the taxes are released by this policy from the payment of their proportionate burdens toward the public expenditures of the country.

This unspeakable vice of the protective and prohibitory system would be sad enough in itself, but it is a sadder thing yet to reflect that this system is authorized by law. It is not the result of accident or contingency, but we are asked by an act of Congress and under the authority of law to legalize this unjust and oppressive distribution of the burdens of public taxation and the pool formed now among the manufacturers of cutlery in the United States, or waiting to be formed upon the passage of this tariff bill. This pool is a violation of law. It is a breach of the old law against forestallments, a crime against justice, against public policy; and this very gentlemanly agreement is proposed under this act of Congress to be extended to the lawmakers, so that the lawmakers shall, in conjunction with the lawbreakers, perpetrate this crime against the rights of the majority of the taxpayers of this country.

There would be some excuse, sir, for the imposition even of a rate as high as this and as unjust in its character, wholly bearing upon the class of people least able to pay it, if the revenue to be derived were to go to the Government. But it is not. Not a dollar of this supernumerary rate of tariff goes into the public Treasury.

Every penny of it will go into the treasury of the trust. It is simply an act for the increase of the value of shares, stocks, and dividends to incorporated trusts engaged in the business of the manufacture of cutlery in the United States.

These three paragraphs remind me of that universal decree of Augustus Cæsar by which all the world was taxed. All the territorial limits are already taxed, but it is proposed now to tax knives (that includes the world of boys, a very large constituency), and to tax razors (that includes the world of men), and to tax scissors, which includes the world of that sex to which legislators have so often deferred, but which are not spared in this proscription. It is a universal tax inversely imposed, the highest rates upon the cheapest articles, so as to make the greatest number of taxpayers and to inflict the greatest possible degree of injustice upon those who are compelled by law to make this contribution to the public fisc.

I intended to ask the honorable Senator from Iowa [Mr. ALLISON], who I am sorry to see is not in his seat at this time, to consider whether he had not some error in the committee to which the bill should have been referred. I believe, sir, upon consideration, especially of the descriptive feature to which I have alluded pervading the whole measure, the bill ought to have been referred to the Committee on Pensions. It is in fact and in law an act granting pensions to the incorporated owners of machinery engaged in the manufacture of cutlery in this country. They are pensions, sir, and they are pensions not subject to the provisions and limitations of the general law. They are pensions, sir, perpetual in their nature, because they are granted to corporations, and only to corporations. There is no limitation in amount and there is no limitation in terms. They are perpetual pensions without limit to the monopolies now established and hereafter to be established in this line of business in our country. Not even death will make any vacancy in this pension roll.

I know it may be suggested that these are service pensions and it may be claimed that they are quite meritorious. They are service pensions, sir. They are pensions for services performed in the great campaign of prosperity which culminated last November. They are pensions for services performed in the grand army of confidence which dispersed at the same time—forces which have dispersed almost as suddenly as they were summoned, forces which have disappeared to-day in the sands and in the wastes of great expectations, of broken promises, of pledges unkept and dishonored to the people, sought now to be condoned by granting immeasurable subsidies, bounties, pensions, and subventions to duly incorporated trusts of the United States.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Missouri to the amendment of the committee, on which the yeas and nays have been demanded.

The Secretary proceeded to call the roll.

Mr. BATE (when the name of Mr. HARRIS of Tennessee was called). I desire to state that my colleague [Mr. HARRIS of Tennessee] is absent sick, as is well known, and that he is paired with the Senator from Vermont [Mr. MORRILL], who is also absent sick. I desire to make the announcement now and let it apply to all votes taken to-day.

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea" and he would vote "nay."

Mr. VEST (when his name was called). I am paired with the Senator from Minnesota [Mr. NELSON].

Mr. WALTHALL (when his name was called). I am paired with the Senator from Wisconsin [Mr. SPOONER].

Mr. WILSON (when his name was called). I am paired with the Senator from Florida [Mr. PASCO].

The roll call was concluded.

Mr. McMILLAN. I have a general pair with the Senator from Kentucky [Mr. LINDSAY]. I transfer that pair to the Senator from Rhode Island [Mr. ALDRICH] and vote. I vote "nay."

Mr. KENNEY. I announce my pair with the junior Senator from Pennsylvania [Mr. PENROSE] and withhold my vote. If he were present, I should vote "yea."

The result was announced—yeas 23, nays 31; as follows:

YEAS—23.

Bacon,	Clay,	Mills,	Rawlins,
Bate,	Cockrell,	Mitchell,	Roach,
Berry,	Gray,	Morgan,	Tillman,
Caffery,	Harris, Kans.	Murphy,	Turpie,
Cannon,	Jones, Ark.	Pettigrew,	White.
Chilton,	McLaurin,	Pettus,	

NAYS—31.

Allison,	Fairbanks,	Hoar,	Platt, N. Y.
Baker,	Foraker,	Lodge,	Pritchard,
Burrows,	Frye,	McBride,	Quay,
Carter,	Gallinger,	McEnery,	Sewell,
Chandler,	Gear,	McMillan,	Shoup,
Clark,	Hale,	Mason,	Thurston,
Cullom,	Hanna,	Perkins,	Wetmore.
Deboe,	Hawley,	Platt, Conn.	

NOT VOTING—35.

Aldrich,	Hansbrough,	Martin,	Teller,
Allen,	Harris, Tenn.	Morrill,	Turner,
Butler,	Heitfeld,	Nelson,	Vest,
Daniel,	Jones, Nev.	Pasco,	Walthall,
Davis,	Kenney,	Penrose,	Warren,
Elkins,	Kyle,	Proctor,	Wellington,
Faulkner,	Lindsay,	Smith,	Wilson,
George,	Mallory,	Spooner,	Wolcott.
Gorman,	Mantle,	Stewart,	

So Mr. VEST's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as amended.

Mr. JONES of Arkansas. I move to amend the committee amendment by inserting, after the words "ad valorem," in line 16, the following:

Provided, That none of the foregoing rates in this paragraph shall exceed 60 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Arkansas to the amendment of the committee.

Mr. JONES of Arkansas. I ask for the yeas and nays on that amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. MALLORY (when his name was called). On this question I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. VEST (when his name was called). I am paired with the Senator from Minnesota [Mr. NELSON]. If he were present, I should vote "yea."

The roll call was concluded.

Mr. WILSON. I again announce my pair with the Senator from Florida [Mr. PASCO]. If he were present, he would vote "yea" and I should vote "nay."

Mr. WALTHALL. I announce my pair with the Senator from Wisconsin [Mr. SPOONER]. I also announced the pair of the Senator from Delaware [Mr. GRAY] with the Senator from Illinois [Mr. CULLOM].

Mr. TILLMAN. Has the Senator from Nebraska [Mr. THURSTON] voted, Mr. President?

The PRESIDING OFFICER. He has not voted.

Mr. TILLMAN. Then I withhold my vote, as I have a pair with that Senator.

Mr. WILSON. I transfer my pair with the Senator from Florida [Mr. PASCO] to the Senator from Nevada [Mr. JONES], and vote "nay."

Mr. CULLOM (after having voted in the negative). I have just been reminded that the Senator from Delaware [Mr. GRAY], with whom I am paired, is absent, and that I ought to withdraw my vote. I do so. I supposed he was in his seat when I voted.

Mr. CHANDLER (after having voted in the negative). Has the senior Senator from New York [Mr. MURPHY] voted?

The PRESIDING OFFICER. He has not voted.

Mr. CHANDLER. Then I withdraw my vote.

The result was announced—yeas 17, nays 29; as follows:

YEAS—17.

Bacon,	Clay,	Mitchell,	Turpie,
Bate,	Cockrell,	Morgan,	White.
Berry,	Harris, Kans.	Pettigrew,	
Caffery,	Jones, Ark.	Pettus,	
Chilton,	Mills,	Rawlins,	

NAYS—29.

Allison,	Foraker,	Lodge,	Quay,
Baker,	Frye,	McBride,	Sewell,
Burrows,	Gallinger,	McEnery,	Shoup,
Carter,	Gear,	McMillan,	Wetmore,
Clark,	Hale,	Perkins,	Wilson.
Davis,	Hanna,	Platt, Conn.	
Deboe,	Hawley,	Platt, N. Y.	
Fairbanks,	Hoar,	Pritchard,	

NOT VOTING—43.

Aldrich,	Gray,	Martin,	Stewart,
Allen,	Hansbrough,	Mason,	Teller,
Butler,	Harris, Tenn.	Morrill,	Thurston,
Cannon,	Heitfeld,	Murphy,	Tillman,
Chandler,	Jones, Nev.	Nelson,	Turner,
Cullom,	Kenney,	Pasco,	Vest,
Daniel,	Kyle,	Penrose,	Walthall,
Elkins,	Lindsay,	Proctor,	Warren,
Faulkner,	McLaurin,	Roach,	Wellington,
George,	Mallory,	Smith,	Wolcott.
Gorman,	Mantle,	Spooner,	

So the amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs on the amendment of the committee as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed, and paragraphs 150 and 151 were read, as follows:

150. Swords, sword blades, and side arms, 35 per cent ad valorem.

151. Table, butchers', carving, cooks', hunting, kitchen, bread, butter, vege-

table, fruit, cheese, plumbers', painters', palette, artists', and shoe knives, forks and steels, finished or unfinished, with handles of mother-of-pearl, shell, of ivory, 16 cents each; with handles of deer horn, 12 cents each; with handles of hard rubber, solid bone, celluloid, or any pyroxyline material, 5 cents each; with handles of any other material than those above mentioned, 1½ cents each, and in addition, on all the above articles, 15 per cent ad valorem: *Provided*, That none of the above-named articles shall pay a less rate of duty than 45 per cent ad valorem.

Mr. VEST. I offer a substitute for paragraph 151.

The PRESIDING OFFICER. The amendment proposed by the Senator from Missouri will be stated.

The SECRETARY. It is proposed to strike out paragraph 151 and in lieu thereof to insert:

151. Table, butchers', carving, cooks', hunting, kitchen, bread, butter, vegetable, fruit, cheese, plumbers', painters', palette, artists', and shoe knives, forks and steels, finished or unfinished, 40 per cent ad valorem.

Mr. WHITE. Mr. President, in the course of my remarks yesterday I filed certain tables with reference to pocket cutlery, compiled by the St. Louis house to which I then referred—the Simmons Hardware Company. I have now here a table of knives and forks, ivory and pearl handles, also rubber, bone, and celluloid handles, stag handles, and carving knives and forks, stag handles, with the foreign cost and the tariff from 1864 to 1890, the McKinley rate, the Wilson rate, the Dingley rate, and the Senate committee's rate. Some of these rates are excessively high throughout. For instance, take table knives and forks, stag handles, costing 42 cents.

Mr. PLATT of Connecticut. There are no such things.

Mr. WHITE. Well, this firm, which is said to be the largest hardware establishment in the United States, informs me to the contrary. I presume that they must know what they are talking about.

Mr. PLATT of Connecticut. Stag-handled table knives?

Mr. WHITE. Yes, sir.

Mr. PLATT of Connecticut. There is no such thing. There are such carving-knife handles.

Mr. WHITE. Horn handles, I believe, are called stag handles. I am so informed by this establishment; and while I have great confidence in the views of the Senator from Connecticut, yet I shall be compelled to submit this evidence.

Mr. PLATT of Connecticut. Worse than all that, the term "stag handles" is not in the bill at all.

Mr. WHITE. That may be one of the occult features of this bill which render it more reprehensible than if it spoke openly. That is a feature of the celebrated sugar schedule, that we are to come to after a while, that everyone is calculating upon, and each produces a different result. That is an occult feature which is not commendatory of the bill. I have no doubt that the gentleman who devised this schedule managed to get everything taxed under some name. If stag handles have been left out, it is an omission of a nature seldom made by the gentlemen who concoct these wonderful schedules, confusing, confounding, and pernicious.

Mr. PLATT of Connecticut. The term is "deer horn."

Mr. WHITE. As to whether deer horn would be the proper designation of stag handles I do not propose to inquire. The trade definition seems to be stag handles, but it is immaterial to me. They may be called deer horn. I will compromise on that, if I can help the bill through.

Mr. PLATT of Connecticut. Deer horns and stag horns are not used for table knives. The Senator never saw one, I venture to say.

Mr. WHITE. I have seen some very peculiar handles and some very peculiar knives, and though the Senator from Connecticut may not have seen a table knife with a stag handle, the Senator from Missouri, I have no doubt, who lives in a State where large cutlery establishments are located, will be able to convince the Senator that west of the Mississippi River, and possibly in the neighborhood east of it, knives with stag handles have been seen.

Mr. PLATT of Connecticut. Carving knives.

Mr. WHITE. The capability of the Senator from Connecticut is no doubt great, but I doubt whether he has been able to investigate all the knife handles of the country. However, we shall not quarrel as to whether they are called stag handles or horn handles. I refer again to the table which I intend to print as a part of my remarks, from which it will be seen that on table knives and forks, stag handles, costing 42 cents per dozen, the duty under the tariff from 1864 to 1890 was 35 per cent ad valorem; by the McKinley law the duty was 55 per cent; under the Wilson law, 35 per cent, while under the Dingley bill it is 355 per cent, and the same rate is preserved in the Senate committee's bill.

Mr. Sharretts, of the Board of General Appraisers, informs me that the rates of duty under this paragraph on table and other knives are equivalent to from 45 to 255 per cent. Without further comment, I will offer this table and have it printed in the RECORD in connection with what I have said.

The table referred to is as follows:

Table knives and forks.

IVORY AND PEARL HANDLES.

Foreign cost per dozen.	Tariff, 1864 to 1890.	McKinley.	Wilson.	Dingley.	Senate.
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*	*Per cent.*
$1.48	35	53½	35	145	145
1.72	35	50	35	132	132
1.96	35	48	35	113	113

.72	35	70½	35	50	50
.84	35	72	35	45	45
.96	35	65	35	45	45

Mr. PLATT of Connecticut. There has been a good deal said about this schedule, and I desire to say one word in reply. This schedule was prepared by the president of the Board of Appraisers in New York at the request of the Ways and Means Committee of the House of Representatives, and he was consulted by the subcommittee of the Committee on Finance of the Senate. The schedule was prepared by him, and I desire to read a word of his memorandum annexed to it. I think it answers all this talk.

151. The rates on table cutlery in this paragraph are thought to be a great improvement on those in the act of 1890 and the present act. It is thought they can not be successfully evaded (except, of course, where the conditional ad valorem rate under the proviso becomes applicable). On some of the lower-priced articles this rate would approximate those of the act of 1890. On the majority, however, they will be considerably less, and the average on such articles will not, it is believed, exceed about 55 per cent, whereas on most of those of higher value the ad valorem rate of 45 per cent will accrue. It should not be forgotten that these calculations also are based upon invoice prices of imported goods which have been more or less undervalued, particularly on those of the lower grade.

Mr. WHITE. That there may be no misapprehension as to where this schedule comes from, I wish it distinctly understood that it does not emanate from the Board of Appraisers of New York, but is the view simply of one member of that board. Another member of that board, whose name I have given, and who is a distinguished expert on these matters, makes this comment upon that paragraph:

151. The rates of duty on table and other knives covered by this paragraph are equivalent to an ad valorem duty ranging from 45 to 255 per cent. I think a duty of 45 per cent would be amply sufficient on all these goods.

So there seems to be as much disagreement amongst the General Appraisers as amongst Senators.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Missouri [Mr. VEST] to paragraph 151.

Mr. VEST. On that I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. MALLORY (when his name was called). I again announce my pair with the Senator from Vermont [Mr. PROCTOR].

Mr. VEST (when his name was called). I am paired with the Senator from Minnesota [Mr. NELSON].

The roll call was concluded.

Mr. CHANDLER. I am paired on political questions with the senior Senator from New York [Mr. MURPHY]. I transfer that pair to the Senator from Nevada [Mr. JONES], and vote "nay."

Mr. KENNEY (after having voted in the affirmative). Has the junior Senator from Pennsylvania [Mr. PENROSE] voted?

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The Senator from Pennsylvania has not voted.

Mr. KENNEY. Then I withdraw my vote.

The result was announced—yeas 23, nays 34; as follows:

YEAS—23.

Bacon,	Clay,	McLaurin,	Rawlins,
Bate,	Cockrell,	Mills,	Tillman,
Berry,	Faulkner,	Mitchell,	Turpie,
Caffery,	Gray,	Morgan,	Walthall,
Cannon,	Harris, Kans.	Pettigrew,	White.
Chilton,	Jones, Ark.	Pettus,	

NAYS—34.

Allison,	Fairbanks,	Lodge,	Quay,
Baker,	Foraker,	McBride,	Sewell,
Burrows,	Frye,	McEnery,	Shoup,
Carter,	Gallinger,	McMillan,	Spooner,
Chandler,	Gear,	Mason,	Stewart,
Clark,	Hale,	Perkins,	Thurston,
Davis,	Hanna,	Platt, Conn.	Wetmore.
Deboe,	Hawley,	Platt, N. Y.	
Elkins,	Hoar,	Pritchard,	

NOT VOTING—33.

Aldrich,	Harris, Tenn.	Martin,	Smith,
Allen,	Heitfeld,	Morrill,	Teller,
Butler,	Jones, Nev.	Murphy,	Turner,
Cullom,	Kenney,	Nelson,	Vest,
Daniel,	Kyle,	Pasco,	Warren,
George,	Lindsay,	Penrose,	Wellington,
Gorman,	Mallory,	Proctor,	Wilson,
Hansbrough,	Mantle,	Roach,	Wolcott.

So Mr. VEST's amendment was rejected.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 152, line 18, before the word "inches," to strike out "four" and insert "two and one-half;" in line 19, before the word "inches," to strike out "four" and insert "two and one-half;" in line 20, before the word "inches," to strike out "nine" and insert "four and one-half;" in the same line, before the word "cents," to strike out "sixty" and insert "fifty;" in line 21, before the word "inches," to strike out "nine" and insert "over four and one-half;" in line 22, before the word "inches," to strike out "fourteen" and insert "seven;" in the same line, before the word "cents," to strike out "one dollar and fifteen" and insert "seventy-five;" in line 23, before the word "inches," to strike out "fourteen" and insert "seven;" and in line 24, after the word "dollars," to strike out "and 60 cents;" so as to make the paragraph read:

152. Files, file blanks, rasps, and floats, of all cuts and kinds, 2½ inches in length and under, 30 cents per dozen; over 2½ inches in length and under 4½ inches, 50 cents per dozen; over 4½ inches in length and under 7 inches, 75 cents per dozen; 7 inches in length and over, $1 per dozen.

The amendment was agreed to.

Mr. PETTIGREW. I wish to offer an amendment to a paragraph we passed over the day before yesterday, at the end of line 25, on page 31.

Mr. ALLISON. Does the Senator desire to offer his amendment now?

Mr. PETTIGREW. I wish to offer the amendment now, and have it acted upon.

Mr. ALLISON. We are not acting on that schedule now, and I hope the Senator will not press his amendment at this time.

Mr. PETTIGREW. I am anxious for a vote on the amendment, as I am going away the last of this week, and shall be gone two or three days.

Mr. ALLISON. We will try to take up the matter before the Senator leaves. If not, it may remain open until his return.

Mr. PETTIGREW. Very well.

Mr. PRITCHARD. I hope the matter will be left open for the present.

Mr. PETTIGREW. Very well. I shall not offer the amendment now.

Mr. JONES of Arkansas. Will the Senator from South Dakota state the amendment he proposes to offer? I should like to have the amendment stated, so that we may know what it is.

Mr. PETTIGREW. At the end of line 25, on page 31, at the bottom of the page, I move to insert the following words:

Sulphur ore, or pyrites, or sulphuret of iron in its natural state, $2.25 per ton.

It is on the free list now.

Mr. ALLISON. The committee proposes an amendment to paragraph 154, and I ask that it may be considered out of its regular order.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 50, line 5, paragraph 154, it is proposed to strike out all after the word "thereof" and insert in lieu thereof the words "75 cents each and 25 per cent ad valorem;" so as to read:

Revolving pistols or parts thereof, 75 cents each and 25 per cent ad valorem.

Mr. VEST. How much is the proposed increase of duty?

Mr. ALLISON. Over the paragraph as it stands?

Mr. VEST. Yes; as it stands.

Mr. ALLISON. It is not so large a duty as that provided for in the paragraph.

Mr. VEST. The paragraph is 60 cents each and 15 per cent. I understand that to be an increase.

Mr. ALLISON. Upon the lower qualities.

Mr. VEST. Yes.

Mr. ALLISON. Upon the lower-priced article—pistols valued at more than $2.50—the paragraph now under consideration provides for $1.50 and 25 per cent ad valorem. The committee recommend one rate for pistols. It is a slight increase upon some of them, but a great reduction upon others.

Mr. VEST. But it is an increase upon the lower-priced article.

Mr. ALLISON. A slight increase, very.

Mr. VEST. That is the most objectionable feature of the bill to me, that whenever we strike a lower-priced article, there is an increase of duty.

Mr. ALLISON. It is not a high duty.

Mr. VEST. And as a matter of course it falls upon people the least able to pay it.

I wish to call attention, without the hope of converting anybody on the other side of the Chamber——

Mr. HOAR. May I ask the Senator whether he is speaking in favor of the poor man's revolver? He says the particular matter which is up is revolvers.

Mr. VEST. I am speaking in the interest of every honest man, poor or rich, who wants to use a revolver for legitimate purposes. A revolver, as is said sometimes about that instrument in Texas, is not needed so often, but when it is needed it is needed very badly. I have no doubt every Senator, certainly those of us who have lived in the West, has seen the time when a revolver was the most indispensable article in the world, not because he wanted to violate the law, but he wanted to defend himself with it.

But I wish to call attention, without expecting to make any converts, as I said, to the changes that are made in the bill in regard to the low-priced breech-loading guns. In the matter of sporting guns, not muskets, there has been as much revolution as there has been in any other article in recent years. All of us can, and we are not very old men, remember when such a thing as a breech-loading gun was unknown. We had the old muzzle-loader with percussion caps. I remember very well when the first breech-loading gun appeared in my State. It was a great curiosity. People came to see it. Now everybody uses a breech-loading gun, and it is the rarest thing possible to find any man, even the poorest, white or black, who has not a breechloader. We do not in this country make the cheap breechloaders. They are made in Germany and in France.

Mr. HOAR and Mr. GALLINGER. In Belgium.

Mr. VEST. And in Belgium. A large number are made in Belgium. The unit of value is $4.55. That is the foreign cost of some of these guns. My friend the Senator from Arkansas [Mr. JONES] says it is the average. We do not make these guns in the United States, and here is a change in existing law, putting up the limit as to cost from $6 to $10, and then increasing the duty enormously over the rate that now prevails.

Mr. ALLISON. Is the Senator speaking of the bill as it comes from the other House or the amendment proposed by the Senate committee?

Mr. VEST. I am speaking of the existing law and the amendment proposed by the majority of the Finance Committee.

Mr. ALLISON. And the Senator says it enormously increases the present rate? The Committee on Finance recommends that on the cheaper guns the rate shall be an ad valorem duty of 50 per cent.

Mr. VEST. Exactly, and that is an increase of 20 per cent over the existing law. In other words, where the gun is worth $6 you put $3 additional tax upon it, making it cost $9 besides the cost of transportation and profit.

To an increase of duty upon high-priced sporting guns that are made by distinguished and celebrated makers abroad and in this country, and which cost from $150 to $500, and even $1,000 apiece, there could not be so much objection, because a man able to buy a gun of that sort, and who thinks he needs it, would consider it the most trivial matter in the world if he had to pay $25 or $50 more in the shape of tariff tax. But when you go to the cheap breech-loading, double-barrel gun, bought only by the poor class of people, and which the poor people alone can buy, it is an outrage to put a tax of 50 per cent upon it when we do not pretend to produce the article in this country.

There can not be the slightest pretext that it is done for protection, because we make none of those guns. It must be done alone for revenue, and as everyone knows who has noticed the imports into this country, as you put up the tariff rates upon articles of this sort you decrease revenue. So there can be no excuse for this sort of taxation in the bill before us. I move to strike out "50 per cent" and insert "30 per cent," which is the rate under the existing law.

The committee have raised the limit from $6 to $10, and under the amendment a large number of guns costing abroad $7, $8, and $9 would be included in this provision. I move to strike out "fifty" and insert "thirty," so as to make the rate on double-barreled, sporting, breech-loading shotguns, combination shotguns, and rifles mentioned in this clause, 30 per cent ad valorem.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In line 8, paragraph 154, page 49, it is proposed to strike out the word "fifty" and insert "thirty," so as to read "30 per cent ad valorem."

The VICE-PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from Missouri.

Mr. VEST. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR].

Mr. VEST (when his name was called). I am paired with the Senator from Minnesota [Mr. NELSON].

The roll call was concluded.

Mr. QUAY (after having voted in the negative). I understand the Senator from Alabama [Mr. MORGAN] has not voted. If that is the case, I desire to withdraw my vote, as I am paired with him.

Mr. HANSBROUGH. I desire to announce my pair with the senior Senator from Virginia [Mr. DANIEL].

Mr. THURSTON (after having voted in the negative). I learn that the senior Senator from South Carolina [Mr. TILLMAN], with whom I have a general pair, has not voted. I therefore withdraw my vote.

Mr. QUAY. I desire to transfer my pair to the Senator from Nevada [Mr. JONES], and will allow my vote to stand. The Senator from Nevada will stand paired with the Senator from Alabama [Mr. MORGAN].

Mr. WILSON. I am paired with the Senator from Florida [Mr. PASCO].

Mr. JONES of Arkansas (after having voted in the affirmative). I notice that the Senator from Maine [Mr. HALE] is not recorded as having voted. I have a pair with that Senator, and therefore withdraw my vote.

The result was announced—yeas 24, nays 32; as follows:

YEAS—24.

Bacon,	Cockrell,	McLaurin,	Rawlins,
Bate,	Faulkner,	Mills,	Roach,
Berry,	Gorman,	Mitchell,	Smith,
Caffery,	Gray,	Murphy,	Turpie,
Chilton,	Harris, Kans.	Pettigrew,	Walthall,
Clay,	Kenney,	Pettus,	White.

NAYS—32.

Allison,	Davis,	Hawley,	Platt, N. Y.
Baker,	Deboe,	Hoar,	Pritchard,
Burrows,	Elkins,	Lodge,	Quay,
Cannon,	Fairbanks,	McBride,	Sewell,
Carter,	Foraker,	McMillan,	Shoup,
Chandler,	Frye,	Penrose,	Spooner,
Clark,	Gear,	Perkins,	Stewart,
Cullom,	Hanna,	Platt, Conn.	Wetmore.

NOT VOTING—33.

Aldrich,	Heitfeld,	Mason,	Turner,
Allen,	Jones, Ark.	Morgan,	Vest,
Butler,	Jones, Nev.	Morrill,	Warren,
Daniel,	Kyle,	Nelson,	Wellington,
Gallinger,	Lindsay,	Pasco,	Wilson,
George,	McEnery,	Proctor,	Wolcott.
Hale,	Mallory,	Teller,	
Hansbrough,	Mantle,	Thurston,	
Harris, Tenn.	Martin,	Tillman,	

So the amendment was rejected.

Mr. WHITE. I desire to present several communications with reference to the gun matter. One is addressed to the senior Senator from New Jersey [Mr. SMITH], and is dated March 25. It is from Schoverling, Daly & Gales, 302 Broadway, New York, and is as follows:

DEAR SIR: Permit me to call your attention to the proposed tariff (House bill No. 379) as far as it refers to breech-loading sporting shotguns, section 155.

That is the paragraph immediately after the present one, but it may as well be considered in connection with this.

I am much surprised that the committee should have adopted such radical rates. The average duty on double breech-loading shotguns (the only kinds that are now imported to any extent) is 75 per cent; the lowest rate, 53 per cent; the highest, 102 per cent. I can not comprehend why the Ways and Means Committee has always been so severe and unreasonable in the matter of guns. In 1890 this matter was discussed to a considerable extent and the rate changed, after the bill reached the House, to 40 per cent; but the conference committee finally advanced the duty to the original House rates. In this particular line the views of the manufacturers seem to have been all-powerful.

As a matter of fact, during my own business career the number of manufacturers of firearms has grown from three to over thirty, and the output increased more than ten times; and notwithstanding the hard times and panics of the last several years, not one of the principal factories has failed, and only two or three of the embryo concerns, who would naturally have succumbed even in prosperous times, have gone out of business. On the other hand, under a varying duty of 35 to 40 per cent from 1870 to 1890, the thirty-odd factories mentioned have grown up to large proportions, while the percentage of imported guns has continually decreased, so that the extinction of the importing business in this line, under any conditions, is only a question of time, just as in edged tools and repeating rifles.

I have dealt in and sold both domestic and foreign guns ever since domestic guns have been made, and every word I write is the result of personal experience.

The manufacturers who have appeared before the Ways and Means Committee have brought up no question of equity. They simply desire the exclusion of all imported guns, thinking thereby to insure their own prosperity, whether their factories are managed or mismanaged, not recognizing the fact that they have no direct competition from the foreign guns which are sound and strong, but of common construction, and intended for a different class of trade. The American guns go to our merchants and sportsmen; the foreign guns to the farmer's boy and laboring man, who must shoot a gun of this price or else go without.

As to the question of revenue, I do not believe the committee fully recognize how strong the tendency is to use American rather than foreign goods. My observation leads me to believe that during the next ten years the tendency to decreased imports will be very marked, even under reasonable rates of duty.

If the tariff on guns, as proposed, goes into effect, it will decrease the importation two-thirds within two years. Why add the specific duty and then increase the ad valorem rates also? On cheap guns $1 and 20 per cent would be enough.

I urgently request you to look into this matter at once and to vigorously oppose section 155 on breech-loading sporting shotguns as unreasonable, excessive, and nonrevenue producing.

Respectfully,

JOSEPH GALES.

Also 231 South Broad street, Elizabeth, N. J.

I also have a letter written before the bill was reported to the Senate. It comes from California, from an extensive and well-known house, a most respectable house, that of Baker & Hamilton, one of the oldest of the kind on the Coast—I think perhaps the oldest. It is as follows:

SAN FRANCISCO, *April 3, 1897.*

DEAR SIR: Our attention is called to the proposed tariff on firearms. While we are in favor of protecting the American manufacturers, we do not deem it wise to impose prohibitory duties. Therefore take the liberty of calling your attention to the inclosed copy of the proposed tariff bill as it applies to breech-loading shotguns, etc:

Valued at more than $6 and not more than $12—proposed duty, $4.

Valued at more than $12—proposed duty, $6.

This specific duty, added to the proposed ad valorem duty, would make a total equivalent to an ad valorem ranging from 75 to 100 per cent, which we consider excessive.

We do not know of any American manufacturers of low-priced double-barrel shotguns that need this protection. If the duty is imposed it would make a fair quality, medium-grade shotgun cost so much that it would be beyond the reach of the middle and lower classes of our citizens, on whom the entire burden would fall.

The American manufacturers, as a rule, devote their attention to the making of high-grade guns, which are purchased by sportsmen well able to pay the price asked for fine guns.

We can not see why a man of moderate means wishing to buy a medium-grade shotgun should be obliged to pay 75 to 100 per cent duty, while his more fortunate fellow-sportsman should be able to buy a gun valued at $50 or more and only pay 47 per cent duty.

We submit these facts for your kind consideration, and remain,

Yours, respectfully,

BAKER & HAMILTON,
WAKEFIELD BAKER, *President.*

Hon. STEPHEN M. WHITE, *Washington, D. C.*

The next is a tabulated statement showing the interpretation placed by this firm upon that feature of the bill:

FIREARMS.

Double-barreled, sporting, breech-loading shotguns, combination shotguns and rifles, valued at not more than $6, $1 each; valued at more than $6 and not more than $12, $4 each; valued at more than $12, $6 each; double barrels for sporting, breech-loading shotguns and rifles, further advanced in manufacture than rough bored only, $3 each; stocks for double-barreled, sporting, breech-loading shotguns and rifles, wholly or partially manufactured, $3 each; and in addition thereto, on all such guns, rifles, stocks, and barrels, 35 per cent ad valorem; on all other parts of such guns or rifles, and fittings for such stocks or barrels, finished or unfinished, 50 per cent ad valorem: *Provided*, That all double-barreled, sporting, breech-loading shotguns and rifles imported without a lock or locks or other fittings shall be subject to a duty of $6 each and 35 per cent ad valorem; single-barreled breech-loading shotguns, or parts thereof, except as otherwise specially provided for in this act, $1 each and 35 per cent ad valorem. Revolving pistols, or parts thereof, valued at not more than $2.50, 60 cents each and 15 per cent ad valorem; valued at more than $2.50, $1.50 each and 25 per cent ad valorem.

Foreign value.	Ad valorem duty.	Specific duty.	Total duty.	Equivalent ad valorem duty.
				Per cent.
$3.25	$1.14	$1.00	$2.14	65
4.00	1.40	1.00	2.40	60
5.00	1.75	1.00	2.75	55
5.90	2.07	1.00	3.07	52
6.10	2.13	4.00	6.13	100
7.00	2.45	4.00	6.45	92
8.00	2.80	4.00	6.80	85
10.00	3.50	4.00	7.50	75
12.50	4.37	6.00	10.37	83
15.00	5.25	6.00	11.25	75
50.00	17.50	6.00	23.50	47

I have no further comments to make upon this article.

Mr. ALLISON. These letters relate to the bill as it came from the House, and not as proposed to be amended by the Senate committee.

Mr. WHITE. Yes, sir; but I think they are pertinent to be considered here. The bill is not in a perfected state, and any information which may be conveyed to the Committee on Finance or the committee on conference in enforcing the reduction should properly be given here.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Iowa, which will be stated.

The SECRETARY. After the word "thereof," in line 5, page 50, it is proposed to strike out the remainder of the paragraph and insert in lieu thereof the words "75 cents each and 25 per cent ad valorem;" so as to read:

Revolving pistols or parts thereof, 75 cents each and 25 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 154, page 49, line 6, before the word "dollars," to strike out "six" and insert "ten;" after the word "dollars," in the same line, to strike out "$1 each; valued at more than $6 and not more than $12, $4;" and in line 8, after the word "each," to insert, "50 per cent ad valorem;" so as to read:

154. Double-barreled, sporting, breech-loading shotguns, combination shotguns and rifles, valued at not more than $10 each, 50 per cent ad valorem.

The VICE-PRESIDENT. Without objection, the amendment will be agreed to.

Mr. VEST. There is objection.

Mr. WHITE. Do not let it be recorded that the amendment is agreed to without objection.

The VICE-PRESIDENT. The Chair understood, at the request of the Senator from Missouri the other day, that all these amendments are to be considered as objected to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 154, page 49, in line 10, before the word "dollars," to strike out "twelve" and insert "ten;" so as to read:

Valued at more than $10, $6 each.

The amendment was agreed to.

The next amendment was, in paragraph 154, line 16, after the word "guns," to strike out the comma and insert "and;" and after the word "rifles," in the same line, to insert "valued at more than $10 each, and on such;" so as to read:

And in addition thereto on all such guns and rifles, valued at more than $10 each, and on such stocks and barrels, 35 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was continued to the end of paragraph 156.

Mr. VEST. Paragraph 156 is as follows:

Cut nails and cut spikes of iron or steel, six-tenths of 1 cent per pound.

This is an increase upon existing law; a small increase, it is true, from 22½ per cent to 25 per cent, and I challenge the Senator from Iowa now, in the kindest manner possible, to show me that there is the slightest excuse for the increase. The comparative statement shows that we absolutely control this market as to these nails, and we do the same thing, I may say parenthetically, as to all these iron and steel manufactures. The world can not successfully compete with us. The comparative statement shows that in 1896 we exported from this country, after supplying the home market, $425,630 worth of these cut nails, and we imported $143 worth.

Now, what a parody it is upon tariff taxation, for protection or for revenue, to say that there ought to be an increase upon this article of prime necessity. There is no pretense of any competition with us. The miserable, beggarly amount of $143 in a whole year is all we have brought in, when we exported the enormous amount, relatively, of $425,630.

If there is any excuse for this sort of thing I should like to hear it. As I said the other day, if our friends have just got into this habit and can not break themselves of it, and are bound to increase the duty on everything, whether it is right or whether there is reason in favor of it, they ought to say so.

Mr. ALLISON. I will simply state to the Senator that we found a duty of 22½ per cent on these articles.

Mr. VEST. And the Senate committee propose to make it 25 per cent.

Mr. ALLISON. The duty of 22½ was placed there by the Senator from Missouri and his associate the Senator from Arkansas two or three years ago, and we supposed there must have been some good reason for it at that time. We have made it specific, and now it turns out to be an addition of 2½ per cent to the rate proposed by the Senator in what is known as the Wilson Act. If there is any great injury about it, it stands simply upon the same basis as the law of 1894.

Mr. VEST. No; it is an increase upon existing law, the law of 1894.

Mr. ALLISON. It is a very small increase.

Mr. VEST. I am prepared to say that the law of 1894 was too high.

Mr. ALLISON. I might ask the Senator to explain the law of 1894.

Mr. VEST. But, as I had occasion to say the other day, and as the Senator from Rhode Island frankly stated in his opening speech here, there were reasons connected with the management of the bill on the floor which induced me to accede to 22½ per cent after a long, hard struggle, because the attempt was made to make it 30 per cent. We were able to cut it down to 22½.

Mr. WHITE. I would ask the Senator from Missouri whether the threat of a two-wheeled barrow full of eloquence had not a good deal to do with it at the time?

Mr. ALLISON. I will say that cut nails are very much in the same situation as are knives and the articles shown here by the Senator from Missouri yesterday. They are sold here about as cheaply as they are anywhere, and as the Senator truthfully said, there are large exportations of these articles.

Mr. VEST. Yes; only $143 worth coming in. Yet it is proposed to put up the duty to exclude foreign competition.

As Mr. Blaine once said here, in similar circumstances on a different subject, I suppose the Senator from Iowa is like the boy who, when some ruffians were killing his father, said he saw the old man was bound to be murdered, and he concluded, in the interest of humanity, that he would just hit him a lick himself, so as to put him out of his misery. So this duty is to be increased from 22½ to 25 per cent, in order to settle the question finally in favor of protection.

Mr. ALLISON. That is right.

Mr. VEST. I move to reduce it to 20 per cent, where it ought to have been in 1894.

Mr. JONES of Arkansas. There is another fact in connection with this matter that ought not to be lost sight of. The unit of value in 1893 was $4.20 a hundred on these nails. Now it is $2.40. Twenty-two and one-half per cent is less than six-tenths of a cent per pound. The specific tax of course increases the duty considerably, and I think it is very much more than 25 per cent. I have not been able to make the calculation.

Mr. WHITE. I will say that Mr. Sharretts figures it at 30 per cent.

Mr. JONES of Arkansas. I think it is considerably more than 25 per cent. I believe it is more than 30 per cent.

Mr. ALLISON. These experts vary very much in their figures. I take it it is not very important whether it is 25 or 30 per cent.

Mr. JONES of Arkansas. Suppose we make it 20 per cent.

Mr. ALLISON. That is the proposition of the Senator from Missouri.

Mr. JONES of Arkansas. That is the proposition; but as the Senator from Iowa did not think there was much difference between 25 and 30 per cent, I thought he would not think there was much difference between 20 and 25 per cent——

Mr. ALLISON. Very little.

Mr. JONES of Arkansas. And I thought he would vote with us on that proposition.

I wish to call attention to a paragraph in the Iron Age of the 20th of last month, ten or twelve days ago, about the matter of cut nails:

Cut nails.—The agreement between the owners of the Eastern mills in regard to prices of nails delivered at the different points in their territory is referred to as working quite satisfactorily, with but few complaints of irregularities.

There are very few complaints of people selling below the price fixed by the gentlemen's agreement among the cut-nail manufacturers under the present rates of taxation.

The demand is, however, only moderate, and the manufacturers are not anticipating a large volume of business in the near future. In the East the prices for nails, delivered, continue as before: New York, $1.40; Boston and New England, $1.42; Philadelphia, $1.38; Baltimore, $1.35. These prices also hold for nails delivered at other points in the territory which carry the same freight rates. For delivery where a higher freight rate rules a proportionate advance is made. In the West the market is represented in a general way by the quotation of $1.20 to $1.25 base for carload lots f. o. b. mill. Less than carload lots command 5 cents more.

Chicago (by telegraph): The movement is small, carload lots selling at $1.40, Chicago, and small lots from stock at $1.45.

St. Louis (by telegraph): The rumors regarding a proposed combination of the nail manufacturers has had a benefiting effect on cut nails. Mills are advancing their prices and are slow to quote on large quantities, except for immediate delivery. We quote $1.40 rates for carload lots from mill; less than carload lots command $1.45 rates.

Pittsburg: The demand for cut nails continues small, the season evidently being pretty well ended. We quote at $1.30 to $1.25 in carload lots at mill.

I especially call the attention of Senators to the fact that "the rumors regarding a proposed combination of the nail manufacturers has had a benefiting effect on cut nails," and the advice to parties is to hold on and not sell cut nails, as the price will probably go up. The increased tax following on the rumors regarding the combination of the nail manufacturers would seem

to indicate that the increased rate is simply to result in an increased price for American consumers and an increased benefit to American nail manufacturers.

Mr. ALLISON. The price spoken of, I will say to the Senator, is from $1.25 to $1.45 per hundred pounds, the unit of value here being .024. I do not think there will be any great harm resulting from it.

Mr. WHITE. It seems to be conceded that there is no necessity for any duty so far as the manufacture of this article is concerned. I believe there is no conflict in that regard; and the duty is placed for the purpose of aiding in the maintenance of the trust combination dominating this industry. It can not have any other object.

I have in my hand a telegram published in the Washington Post of June 2 with relation to the effect upon the laborers working in a very large iron and steel establishment of Pittsburg. I should like to have it read as an indication of the beneficial effects to follow this bill. Now that it is apparent that the pending measure will receive the votes of the majority of the Senate, it is natural that the good effects of the bill should begin to manifest themselves, and that no one need be disappointed. I will ask that the article be read; it is encouraging.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

[From the Washington Post, June 2, 1897.]

IRON WORKERS ON A STRIKE—SIGNIFICANT REDUCTION OF EMPLOYEES AT PITTSBURG—ABOUT 2,000 MEN ARE AFFECTED, AND OF THESE ABOUT 900 HAVE REFUSED TO WORK—AMALGAMATED SCALE WILL BE REJECTED.

PITTSBURG, PA., *June 1.*

A 10 per cent cut in wages affecting all men not under the amalgamated scale was ordered at Jones & Laughlin's American Iron Works to-day. As a result the open-hearth workers and some other employees, in all about 900, refused to work last night. The firm employs nearly 3,000 men.

The stories of the number of men who quit work are conflicting. At the South Side office a superintendent thought about 250 men had quit work, but these had not crippled the plant. The workmen claim that between 400 and 500 have refused to work for the reduction. The superintendent said he would rather have the old employees resume, but if they do not new men will be employed to take their places. About 2,000 men are affected by the cut.

The laborers have been paid $1.25 per day, and these have been cut to $1.12½. The present reduction is significant, inasmuch as the amalgamated steel scale comes up for consideration this month. The present scale expires July 1. If Jones & Laughlin refuse to sign the amalgamated scale, there is no telling where the trouble will end.

W. L. King, of the firm, was asked to-day if the reduction did not indicate that the new amalgamated scale will be rejected when it comes up for consideration and that the firm will demand a reduction of the present wages.

He said: "That is the assumption."

Mr. King added: "We have been hoping since last fall that we would not be compelled to make a reduction, but prices have had a downward tendency, and we put it off as long as we could, hoping business might improve.

"We must either operate our plant at these prices or close down. Thousands of mechanics and laborers apply every week for work, and it will be no trouble to get men. Our orders have largely been from hand to mouth, and and it has been difficult to get orders to keep the men at work."

The Commercial Gazette to-morrow will say: "The furnace men throughout the Shenango and Mahoning valleys contemplate a general strike about July 1 for increased wages. The men have no organization as yet, but are insisting on having organizers from the Knights of Labor sent among them.

"The plan for the strike, which will include 10,000 men, is to wait until the weather gets at summer heat, when it will be impossible for new men to do this class of work, and it is believed the furnace operators will capitulate.

"The present wages of furnace men vary from $1.50 to $2 per day."

Mr. JONES of Arkansas. I wish to call the attention of the Senator from Iowa to the fact that since he called attention to the valuation of these nails as given in the Iron Age, which I just now read, from 100 to 145 cents a hundred pounds, six-tenths of a cent per pound on those valuations instead of amounting to 25 per cent amounts to from 41 per cent to 60 per cent on the value of the article, and that the amendment proposed by the Senator from Missouri will carry a tax of from 20 to 29 per cent. An exclusive tax, I believe, of 20 per cent would be the equivalent.

The complaint the Senator from Missouri made was that the committee was undertaking to raise this tax from 22 per cent to 25 per cent, whereas the values show that six-tenths of a cent a pound is increasing the tax on cut nails from 22½ per cent under the present law to from 41 to 60 per cent; that where the nails are sold at a dollar a keg the tax would be 60 per cent, and where they are sold at $1.45 a keg the tax of six-tenths of a cent a pound would be 41 per cent.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri [Mr. VEST], which the Secretary will state.

The SECRETARY. On page 50, line 14, it is proposed to strike out "six-tenths of 1 cent per pound" and insert in lieu thereof "20 per cent ad valorem;" so as to make the paragraph read:

156. Cut nails and cut spikes of iron or steel, 20 per cent ad valorem.

Mr. VEST. I ask for the yeas and nays on agreeing to the amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. THURSTON (when his name was called). I have a general pair with the senior Senator from South Carolina [Mr. TILLMAN]. If he were present, I should vote "nay."

Mr. VEST (when his name was called). I am paired with the Senator from Minnesota [Mr. NELSON].

Mr. WILSON (when his name was called). I transfer my pair with the Senator from Florida [Mr. PASCO] to the Senator from Nevada [Mr. JONES]. I vote "nay."

The roll call was concluded.

Mr. QUAY. I have a general pair with the Senator from Alabama [Mr. MORGAN]. I transfer that pair to the Senator from Nevada [Mr. JONES], so that the Senator from Nevada and the Senator from Alabama will stand paired until the return of the Senator from Nevada to the Senate. I will let that pair stand without making any further announcement.

Mr. PLATT of Connecticut. I suggest to the Senator from Pennsylvania that on this vote a transfer was made by the Senator from Washington [Mr. WILSON] of his pair to the Senator from Nevada [Mr. JONES]. The transfer suggested can possibly be arranged for the next vote.

Mr. QUAY. I stand paired, then, with the Senator from Alabama [Mr. MORGAN], and accordingly will not vote.

Mr. MARTIN. I desire to know if the senior Senator from Montana [Mr. MANTLE] has voted?

The VICE-PRESIDENT. The Senator from Montana has not voted.

Mr. MARTIN. I withhold my vote in his absence. Were he present, I should vote "yea."

The result was announced—yeas 26, nays 36; as follows:

YEAS—26.

Bacon,	Faulkner,	McLaurin,	Roach,
Bate,	Gorman,	Mills,	Smith,
Berry,	Gray,	Mitchell,	Turpie,
Caffery,	Harris, Kans.	Murphy,	Walthall,
Chilton,	Heitfeld,	Pettigrew,	White.
Clay,	Jones, Ark.	Pettus,	
Cockrell,	Kenney,	Rawlins,	

NAYS—36.

Allison,	Deboe,	Hawley,	Platt, Conn.
Baker,	Elkins,	Hoar,	Platt, N. Y.
Burrows,	Fairbanks,	Lodge,	Pritchard,
Cannon,	Foraker,	McBride,	Sewell,
Carter,	Frye,	McEnery,	Shoup,
Chandler,	Gallinger,	McMillan,	Spooner,
Clark,	Gear,	Mason,	Stewart,
Cullom,	Hale,	Penrose,	Wetmore,
Davis,	Hanna,	Perkins,	Wilson.

NOT VOTING—27.

Aldrich,	Jones, Nev.	Morrill,	Tillman,
Allen,	Kyle,	Nelson,	Turner,
Butler,	Lindsay,	Pasco,	Vest,
Daniel,	Mallory,	Proctor,	Warren,
George,	Mantle,	Quay,	Wellington,
Hansbrough,	Martin,	Teller,	Wolcott.
Harris, Tenn.	Morgan,	Thurston,	

So the amendment was rejected.

The VICE-PRESIDENT. The reading of the bill will be proceeded with.

The Secretary read paragraph 157, as follows:

157. Horseshoe nails, hob nails, and all other wrought iron or steel nails not specially provided for in this act, 2½ cents per pound.

Mr. TURPIE. I move to strike out "2½ cents per pound" and insert "25 per cent ad valorem."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In line 18, page 50, paragraph 157, it is proposed to strike out "2½ cents per pound," and to insert "25 per cent ad valorem;" so as to read:

157. Horseshoe nails, hob nails, and all other wrought-iron or steel nails not specially provided for in this act, 25 per cent ad valorem.

Mr. TURPIE. I ask for the yeas and nays on agreeing to the amendment.

The yeas and nays were ordered.

Mr. CAFFERY. Mr. President, I desire to state in reference to this paragraph that the apparent lowering of rate from 4 cents a pound in the act of 1890 to 2½ cents a pound is purely fictitious; that it amounts to nothing and is no good whatever. It is only to afford an opportunity to our friends upon the other side during the campaign to hold up to the ordinary man the fact that they have reduced the rate on horseshoe nails, hob nails, and all other wrought-iron or steel nails from 4 cents a pound in the act of 1890 to 2½ cents a pound in 1897.

It appears that in 1893 there were 8,180 pounds of these nails imported, worth $897, and in 1896, 61,814 pounds, worth $3,981, and the unit of value in 1893 was 11 cents, and in 1896 6.4 cents a pound. In looking at the table of exports we find that iron-wrought horseshoe and all other nails were exported last year to

the extent of $291,363, and the imports of these at he highest rate was only $3,981. So here is the fact demonstrated by this excessive export over the imports that we not only hold the home market, but we are exporting these identical nails all over the world. What, therefore, is the use of any kind of duty upon this particular article of horseshoe nails as descr ed in paragraph 157? So no capital whatever can be made from any claim of lowering duties for the benefit of the American people in this paragraph or any other paragraph of the iron schedule.

Let us look, for instance, at the paragraph below—paragraph 158. In 1893 there were 238 pounds of nails mentioned in that paragraph imported. The value was $15.40. The unit of value is 65 mills. Can anybody say that a lowering of the rate from 2 cents a pound in 1890 to half a cent a pound in 1897 is of any benefit to anybody when $15.40 worth of these nails were imported into the United States? Is not this purely fictitious and illusory? Why not go the whole hog and put these items upon the free list? Where is the point that protection is ever going to stop? The infant is a very strong, stalwart man; he walks all over the United States, and controls the whole market of the United States.

If there is any question of dumping the surplus of the foreigners in the same line of nails on this country, it is manifest that we can outdump them 40 to 1 when it comes to the dumping process. We are exporting a very large quantity of this material in excess of what we import. The idea of holding the home market to prevent the dumping process, which it is alleged the foreigner will resort to to get rid of his surplus, is of all imaginary and illusive arguments used the most imaginary and the most illusive. People never raise anything below the cost of production more than once. The foreigner is no more idiotic than the American in that regard. No one is ever going to raise an article below the cost of production for the benefit of anybody else, either a home man or a foreign man. That does not occur, it can not occur, it never has occurred, and it never will occur.

But here is an opportunity to do the right thing in the matter of nails in behalf of the American people—not only in behalf of the poor, but in behalf of the well-to-do, in behalf of the rich, in behalf of the whole population—for if there is any one article that goes more into universal consumption than nails, I do not know of it.

I simply call attention to the fact of the excess of the exportation over the importation of these nails to show that our friends upon the other side can lay no claim to any kind of virtue, to any kind of desire to aid the poor man in America, by reason of lowering the rate on the article of nails below the rate of 1890.

Mr. TURPIE. Mr. President, I am very much obliged to the honorable Senator from Louisiana for the careful detail in which he has gone into this question. He has reenforced every reasonable objection which can be made to the rates mentioned in the pending bill. My own objections are based upon the opposition to any increase in the price of horseshoes. That is the operative principal item in this section. When horses themselves have become so cheap, it is proposed to increase immeasurably almost the tax upon shoes, and to make this increase upon horseshoe nails we shall reach the point when the nails and the shoes will be worth more than the horse. That is the point to which I wish to attract the attention of the Senate and of the country.

Mr. GEAR. The Senator overlooks the fact that the importations under the Wilson Act in 1896 amounted to nearly $4,000.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Indiana [Mr. TURPIE], on which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. QUAY (when his name was called). I have a general pair with the Senator from Alabama [Mr. MORGAN], who is temporarily absent from the Senate Chamber. If that Senator were present, he would vote "yea" and I should vote "nay."

Mr. THURSTON (when his name was called). I have a general pair with the senior Senator from South Carolina [Mr. TILLMAN]. If he were present, I should vote "nay."

Mr. VEST (when his name was called). I am paired with the Senator from Minnesota [Mr. NELSON].

The roll call was concluded.

Mr. QUAY. I desire to state that until the return of the Senator from Nevada [Mr. JONES], he will stand paired with the Senator from Alabama [Mr. MORGAN], I having transferred my pair to the Senator from Nevada.

Mr. KENNEY (after having voted in the affirmative). I inquire if the junior Senator from Pennsylvania [Mr. PENROSE] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. KENNEY. Then I will withdraw my vote, as I am paired with that Senator.

Mr. CLARK (after having voted in the negative). I inquire if the junior Senator from Kansas [Mr. HARRIS] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. CLARK. Then I withdraw my vote and announce my pair with that Senator.

The result was announced—yeas 22, nays 31; as follows:

YEAS—22.

Bacon,	Cockrell,	Mitchell,	Smith,
Bate,	Faulkner,	Murphy,	Turpie,
Berry,	Gray,	Pettigrew,	Walthall,
Caffery,	Jones, Ark.	Pettus,	White.
Chilton,	McLaurin,	Rawlins,	
Clay,	Mills,	Roach,	

NAYS—31.

Allison,	Fairbanks,	Hoar,	Pritchard,
Burrows,	Forakar,	Lodge,	Quay,
Cannon,	Frye,	McBride,	Sewell,
Carter,	Gallinger,	McEnery,	Shoup,
Chandler,	Gear,	McMillan,	Spooner,
Cullom,	Hale,	Mason,	Stewart,
Davis,	Hanna,	Perkins,	Wetmore.
Elkins,	Hawley,	Platt, Conn.	

NOT VOTING—36.

Aldrich,	Hansbrough,	Mantle,	Teller,
Allen,	Harris, Kans.	Martin,	Thurston,
Baker,	Harris, Tenn.	Morgan,	Tillman,
Butler,	Heitfeld,	Morrill,	Turner,
Clark,	Jones, Nev.	Nelson,	Vest,
Daniel,	Kenney,	Pasco,	Warren,
Deboe,	Kyle,	Penrose,	Wellington,
George,	Lindsay,	Platt, N. Y.	Wilson,
Gorman,	Mallory,	Proctor,	Wolcott.

So Mr. TURPIE's amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 158, page 50, line 19, after the word "steel," to strike out "2 inches long and longer," and insert "not less than 1 inch in length and;" in line 21, after the word "number," to strike out "twelve" and insert "sixteen;" in line 23, after the word "pound," to strike out "from 1 inch to 2 inches in length, and lighter than No. 12 and not lighter than No. 16 wire gauge, seven-tenths of 1 cent per pound; shorter" and insert "less;" and on page 51, line 1, after the word "inch," to insert "in length;" so as to make the paragraph read:

158. Wire nails made of wrought iron or steel, not less than 1 inch in length and not lighter than No. 16 wire gauge, one-half of 1 cent per pound; less than 1 inch in length and lighter than No. 16 wire gauge, 1 cent per pound.

The amendment was agreed to.

Mr. VEST. I move to strike out all after the word "steel," in line 19 of paragraph 158, and insert in lieu thereof "25 per cent ad valorem."

The VICE-PRESIDENT. The amendment of the Senator from Missouri will be stated.

The SECRETARY. After the word "steel," in paragraph 158, line 19, page 50, it is proposed to strike out the remainder of the paragraph and to insert "25 per cent ad valorem;" so as to read:

158. Wire nails made of wrought iron or steel, 25 per cent ad valorem."

Mr. VEST. I call attention to the fact that here is another instance in which we command the American market and make large exportations, and still there is an increase of duty in the pending bill. In 1896 we exported of wire nails $321,055 worth, and we imported $25,063 worth.

Mr. WHITE. If the Senator from Missouri will allow me, I wish to add to his statement that the weight of the nails exported was eight millions and odd pounds.

Mr. VEST. We exported in 1896 $300,000 worth more of this product than we imported. That shows absolutely that we control the American market.

I call for the yeas and nays on the proposition to make this duty 25 per cent ad valorem.

The yeas and nays were ordered.

Mr. JONES of Arkansas. Mr. President, from the Iron Age of the same date I read from a few minutes ago I have made the following clipping on the article of wire nails, to which I desire to call the attention of the Senate, and, in addition to what the Senator from Missouri [Mr. VEST] has just now stated, I wish to remind the Senate that it has come out in this debate more than once that wire nails were sold abroad while the wire-nail pool was in existence at about one-half of what they were sold for to American consumers. I now read this paragraph from the Iron Age:

Wire nails.—There is little new to report in the wire-nail market. The reports current in regard to the formation of a rod pool seem to have some influence on the trade, as a good many inquiries for prices for future shipments are being received by the manufacturers. The leading mills are still well supplied with orders sufficient to cover them for the next two or three weeks, but there is more evidence of a desire to obtain new business. Prices are without change on the basis of $1.35 for carload lots at mill. The low freight rates which are ruling tend to make the delivered price at many points slightly lower than it has been. The disturbance in the Northwest, owing to the offering of nails to the small trade at relatively close prices, still continues, and is the source of a good deal of embarrassment to the jobbing trade in that section. It has also something of an effect on prices in other portions of the country.

Chicago (by telegraph): The wire-nail trade is beginning to show the effects of the reports which have been current for some time regarding the control of the manufacture of wire rods—

This comes, as I have said, from the Iron Age, which is the organ of the iron business, and is a paper which would certainly not be inclined to make reports adversely to that interest—

These results have become much more pronounced within the past two or three days, and the belief is now being confirmed that the control of the product of all the mills has been secured. Large inquiries have been received by wire-nail manufacturers for May and June deliveries, but most of the factories are either out of the market or report themselves not in condition to quote. Sales made during the past week have ranged from $1.40 to $1.45, Chicago, for factory lots, but few, if any, manufacturers will now sell at such prices. Jobbers have a good demand for small lots from stock and continue to quote $1.50.

St. Louis (by telegraph): There are persistent rumors to the effect that another combination of the nail manufacturers is about to be formed. It is stated that Commissioner Parks, who was the guiding spirit in the last nail combination, is at the head of the present agreement, and it is also reported that the wire-rod men will act in harmony with the nail manufacturers. It is not the purpose to advance the price of nails to an exorbitant figure, but rather to make a price which will show manufacturers a profit, which it is claimed they can not make at prices ruling to-day. It is difficult to get any definite information regarding the formation of the combination, but circumstances point strongly in that direction, and the developments of the next few days will be awaited with interest. The demand for wire nails keeps up remarkably well, and manufacturers are unwilling to quote for delivery beyond the present month. Prices are well maintained at $1.50 base for carload lots f. o. b. cars St. Louis. Jobbers quote $1.55 to $1.60 for lots from store.

Pittsburg: The nail trade seem to have become pretty thoroughly advised regarding the probable formation of a rod pool, and have been placing very liberal orders for nails during the past week. In fact, the demand has expanded considerably, and there is yet some difficulty in securing prompt shipments of nails. Should the rod pool go through, which now seems probable, it is very likely higher prices on nails will result. It is not proposed to form a nail association, but the market can be controlled by the larger mills if the rod pool is successfully formed. While prices on nails have not shown an actual advance as yet, they are very firm, and we continue to quote in carload lots at $1.35 at mill.

So, Mr. President, according to the report of this authority in iron production, there is being formed at this moment a combination to control the price of wire nails and at the same time control the price of rods. The wire-nail manufacturers have an organization under the present law; and I submit that any tax which enables these conspirators to make a combination of this sort is pernicious and ought not to be allowed to exist. Whenever they undertake to take advantage of the tariff to increase their profits, the American people ought to have the power to import nails from abroad and procure them at something like reasonable rates.

Mr. CAFFERY. Mr. President, in the Monthly Summary of Finance and Commerce of the United States there are some very interesting facts connected with our export trade in the various matters of iron. As the Senator from Arkansas [Mr. JONES] well stated, the lower rates under the Wilson law were not sufficient to prevent these unlawful combinations of the wire-rod manufacturers, the wire-nail manufacturers, and the steel-rail manufacturers in the United States from putting up the price to the American consumer and shipping abroad their product at a much less price.

It is very interesting, Mr. President, to look at the monthly summary of our trade and see the bearing, or rather to see the tendency of our American products in iron and steel, and particularly to note the countries to which this exported product goes. In 1895 the gross exports of iron and steel, and manufactures of, for the nine months of that year were $11,662,154; for the nine months ending October, 1896, the exports had crawled up to $18,022,638, and this in the face of what is called hard times. In the face of depressed industries the American exporter of these articles increased his exports at a rate in excess of 50 per cent in one year. That points conclusively to the fact that we need no sort of tariff upon these iron fabrics.

It is further instructive to note the countries to which these iron fabrics were exported, and to see where our trade relations really are among the nations of the world. The exports to the United Kingdom in 1895 were $1,962,814; to the same country in 1896 the exports had gone up to $3,732,177; to Germany $532,971 in 1895, and to $1,264,482 in 1896. I shall not read the whole of this statement, but will ask that it be incorporated in the RECORD. It is part of the table on page 577 of the monthly statement of the Bureau of Statistics, including the exports of iron and steel, and manufactures of, for October, 1895, October, 1896, ten months ending October, 1895, and ten months ending October, 1896.

The table referred to is as follows:

Articles and countries.	October—				Ten months ending October—			
	1895.		1896.		1895.		1896.

Mr. CAFFERY. I desire further to include in this statement the total imports from the United Kingdom of the articles mentioned in this statement for 1896 into the United States and the total exports to the United Kingdom from the United States for the same year, as appears in the Statistical Abstract, page 85.

The paper referred to is as follows:

United Kingdom.	1887.	1888.	1889.	1890.	1891.
Imports from:					
Free	$36,732,749	$30,695,422	$28,205,060	$30,646,069	$36,418,430

Total	409,315,362	421,134,551	431,099,207	387,125,458	405,741,339

Mr. CAFFERY. Mr. President, it occurs to me that the lesson to be derived from these figures is so plain that none can fail to see its import. It will not do for the other side of this Chamber to claim that this industry now needs protection. The question is wholly beside the original proposition of stimulating an infant industry. The proposition has to be squarely met. When an industry obtains the proportions of the iron industry of the United States; when that industry is capable of supplying the markets of the world almost from the excess of the American product, competing with all the other nations of the world, and when that industry has invaded the market of our great competitor and almost captured it, I want to know whether any kind of a plea can be set up in justification of these high tariffs?

The only purpose that I can see in placing these high tariffs on these articles that we are exporting hence is not to create monopolies—for I do not believe the Senators on the other side would willingly do that—but it is certainly to enable the home producer to charge more to the American consumer than to his coconsumer throughout the world. If protection can be justified in this case under any kind of reason, it must be to give the home manufacturer prices in excess of the foreign manufacturer, and that reason fails when we show that the home manufacturer is more than competing with the foreign manufacturer and shipping these articles abroad. But the effect, if not the purpose, of this tax is to create monopolies, to build up trusts, as monopolies and trusts are already built up, already existing, and already fleecing the American people by reason of these high tariffs.

I repeat, that the reference of the Senator from Rhode Island [Mr. ALDRICH] to the great benefits conferred upon the American people by reducing the rates upon iron and steel is a mere mockery, a travesty; it is almost an insult to the intelligence of the American people to say that they are offered a boon which is conferred willingly to the other peoples of the earth. All the boon we want is the same prices of these articles in America that these trusts and monopolies charge when they ship the articles abroad. That is the boon that we crave for the American people; it is the boon of fair trade; it is the boon of honest contract, of honest dealing.

I submit, Mr. President, in this particular line, in this particular industry, it would be a becoming thing, it would be a gracious thing, for our friends on the other side of the Chamber to get off these high stilts of protection and walk upon the solid ground of honest trade and honest dealing.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Missouri [Mr. VEST], on which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. MORGAN (when his name was called). I am paired with the Senator from Nevada [Mr. JONES].

Mr. THURSTON (when his name was called). I have a general pair with the senior Senator from South Carolina [Mr. TILLMAN]. If he were present, I should vote "nay."

Mr. VEST. I am paired with the Senator from Minnesota [Mr. NELSON].

The roll call was concluded.

Mr. KENNEY (after having voted in the affirmative). I inquire if the junior Senator from Pennsylvania [Mr. PENROSE] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. KENNEY. Then I withdraw my vote, as I am paired with that Senator.

The result was announced—yeas 20, nays 29; as follows:

YEAS—20.

Bacon,	Clay,	Mills,	Rawlins,
Bate,	Cockrell,	Mitchell,	Smith,
Berry,	Gray,	Murphy,	Turpie,
Caffery,	Jones, Ark.	Pettigrew,	Walthall,
Chilton,	McLaurin,	Pettus,	White.

NAYS—29.

Allison,	Foraker,	Lodge,	Quay,
Burrows,	Frye,	McBride,	Sewell,
Carter,	Gallinger,	McEnery,	Shoup,
Chandler,	Gear,	McMillan,	Spooner,
Cullom,	Hale,	Mason,	Wetmore.
Davis,	Hanna,	Perkins,	
Deboe,	Hawley,	Platt, Conn.	
Fairbanks,	Hoar,	Pritchard.	

NOT VOTING—40.

Aldrich,	Gorman,	Mantle,	Stewart,
Allen,	Hansbrough,	Martin,	Teller,
Baker,	Harris, Kans.	Morgan,	Thurston,
Butler,	Harris, Tenn.	Morrill,	Tillman,
Cannon,	Heitfeld,	Nelson,	Turner,
Clark,	Jones, Nev.	Pasco,	Vest,
Daniel,	Kenney,	Penrose,	Warren,
Elkins,	Kyle,	Platt, N. Y.	Wellington,
Faulkner,	Lindsay,	Proctor,	Wilson,
George,	Mallory,	Roach,	Wolcott.

So Mr. VEST'S amendment was rejected.

The reading of the bill was resumed at paragraph 159, as follows:

159. Spikes, nuts, and washers, and horse, mule, or ox shoes, of wrought iron or steel, 1 cent per pound.

Mr. JONES of Arkansas. I should like to ask for information of the Senator from Iowa, as there is nothing in the comparative statement to show the value of these articles, how the rate of duty here proposed of 1 cent per pound compares with the present rate of 25 per cent ad valorem?

Mr. ALLISON. It is about the same; not quite so high, I think.

Mr. JONES of Arkansas. It occurred to me that it was somewhat higher, but I was not sure. Some of my colleagues think it is not.

The reading of the bill was resumed, and paragraph 160 was read, as follows:

160. Cut tacks, brads, or sprigs, not exceeding 16 ounces to the thousand, 1½ cents per thousand; exceeding 16 ounces to the thousand, 1½ cents per pound.

Mr. JONES of Arkansas. I move to strike out all after the word "sprigs" and insert "25 per cent ad valorem."

The SECRETARY. After the word "sprigs," in line 5, page 51, paragraph 160, it is proposed to strike out the remainder of the paragraph and insert the words "25 per cent ad valorem;" so as to make the paragraph read:

160. Cut tacks, brads, or sprigs, 25 per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Arkansas.

The amendment was rejected.

The reading of the bill was resumed, as follows:

161. Needles for knitting or sewing machines, including latch needles, $1 per thousand and 30 per cent ad valorem; crochet needles and tape needles, knitting and all other needles, not specially provided for in this act, and bodkins of metal, 25 per cent ad valorem.

Mr. VEST. This is an increase of $1 a thousand over existing law upon needles, which it is hardly necessary to observe are an article of prime necessity, used by seamstresses and the poorer class of people everywhere. I move to strike out the words "one dollar per thousand and," and to strike out "30 per cent ad valorem" and insert "25 per cent ad valorem."

Mr. ALLISON. The committee propose to reduce the rate from 30 to 25 per cent.

The VICE-PRESIDENT. The amendment proposed by the Senator from Missouri will be stated.

The SECRETARY. After the word "needles," in line 10, strike out the words "one dollar per thousand and;" so as to read:

Needles for knitting or sewing machines, including latch needles, 30 per cent ad valorem.

The amendment was rejected.

The VICE-PRESIDENT. The committee amendment will now be stated.

The SECRETARY. In line 10, page 51, paragraph 161, after the word "and," it is proposed to strike out "thirty" and insert "twenty-five;" so as to read "25 per cent ad valorem."

The amendment was agreed to.

The reading of the bill was continued to the end of paragraph 164.

Mr. ALLISON. I ask that paragraph 164 may be passed over for the moment.

The VICE-PRESIDENT. Without objection, paragraph 164 will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 165, page 52, after the word "length," to strike out "3 cents per pound; over 1 inch and not more than 2 inches in length, 5 cents per pound; over one-half inch and not more than 1 inch in length, 7 cents per pound; one-half inch and less in length, 10 cents per pound; screws, commonly called wood screws, made of brass, more than 2 inches in length, 5" and insert "four;" in line 11, before the word "cents," to strike out "seven" and insert "six;" in line 13, before the word "cents," to strike out "ten" and insert "eight and one-half;" and in line 12, before the word "cents," to strike out "fourteen" and insert "twelve;" so as to make the paragraph read:

165. Screws, commonly called wood screws, made of iron or steel, more than 2 inches in length, 4 cents per pound; over 1 inch and not more than 2 inches in length, 6 cents per pound; over one-half inch and not more than 1 inch in length, 8½ cents per pound; one-half inch and less in length, 12 cents per pound.

The amendment was agreed to.

Mr. VEST. I wish to call attention to the fact that we absolutely command the American market as to this article. We exported in 1896 $320,659 worth of screws and imported $136 worth, showing that we absolutely, I repeat, command the American market, and export the enormous amount of $320,659 worth.

Under the amendment the duty is raised over the Wilson Act from 10 to 12 cents on the smallest sizes, and the increased revenue on account of that raise will amount to the enormous aggregate of 35 cents. Just think of the Congress of the United States making a raise in order to get 35 cents more revenue! Under the Wilson Act we got $1.10. On the next size the raise is 1½ cents, which will give an increased revenue of 42 cents. There is no danger to the Treasury when we get that much revenue. Forty-two cents! On the next size there is a raise of 1 cent, and the increased revenue is $2.21. On the next size there is a raise of 1 cent, giving an increased revenue of $1.21.

What is the truth in regard to this matter? And I wish to call the attention of the Senator from Iowa to it, and I should like to hear his answer. I have in my hand the annual report of the American Screw Company, of Providence, R. I., made in February, 1897. It is an elaborate review of their year's work and of the condition of this interest, and I will ask the Secretary to read what I have marked, showing the necessity for the increase of duty, which I have already demonstrated will bring no revenue at all.

The Secretary read as follows:

We are passing through a period of depression unequaled for duration and intensity by any within our experience, and for many reasons, now fairly appreciated, which are peculiar to our industry. We have gotten beyond the necessity for a high tariff; pools have proven to be of no permanent advantage to us; we have to adapt ourselves to new methods of manufacture and new conditions requiring adjustment which only time can accomplish, but are hopeful that with reviving confidence in general business and a larger demand for our product—the greater because of enforced economies of late—by this time next year we may inform you of a more prosperous business and a larger employment of our plant than for many years past and at moderately remunerative rates. Meanwhile prices may drop somewhat lower, because we are not now meeting the lowest prices of competitors, who from necessity or otherwise are selling at rates much below cost. So long as we can hold our present business we need not change. The effect of abnormally low prices will, however, lead to speculative purchases and delay the higher and remunerative rates so generally desired.

Mr. GRAY. Mr. President, in view of the authentic report of this company, which I presume is an important corporation, making wood screws——

Mr. VEST. It is the largest in the country.

Mr. GRAY. The Senator from Missouri says it is the largest in the country. In view of its statement that it does not need protection, it has got past the point where protection or pools can be a benefit to it, and that its business is in a situation that is fairly prosperous, and in view, further, of the fact that there is no revenue now produced or expected from this source, I desire to ask what the meaning of this raise is, for I should really like to know. There may be a reason.

Mr. ALLISON. If the Senator will look at the ad valorem as shown by our tables, he will see that the highest ad valorem on these articles is 40.33 per cent and the lowest is a little over 14. It ranges from 14 to 30 and 40. The duty provided for in the Senate amendment is a shade higher than that provided for in the present law, but lower than was prescribed in the act of 1890. I happen to have the report here to which the Senator from Missouri refers. It indicates, I suppose, that the company do not ask for the high rates of duty which formerly were imposed upon these articles. They say they have got beyond the necessity for high tariff. So we think. Therefore we have only slightly increased the rates of 1894.

Mr. GRAY. They say they have got beyond the necessity for protection at all.

Mr. ALLISON. No; I have the report here:

We have gotten beyond the necessity for a high tariff.

Those people are the largest manufacturers of wood screws in our country. I notice, in looking at the report, that they have some advantages, perhaps, that other manufacturers in the United States do not have; that is, they have a large amount of capital invested in a wood-screw plant in Canada, and also large capital invested in a wood-screw establishment in Great Britain. So they seem to have taken pretty good care of themselves in various ways as respects their investments, whatever may happen to the wood-screw duty. I think this rate is in accordance with their view; that is, it is not a high tariff.

Mr. GRAY. If I understand the Senator from Iowa correctly, there is no other moving cause for the increase of tariff on this important and widely consumed article than the fact that he believes that this company, and others, I suppose, would rather prefer to have that much raise.

Mr. ALLISON. The Senator misunderstood me. I mean to say that this is a fairly low rate as compared with the other iron and steel duties. Of course the situation during the last one or two years has been in a sense abnormal as respects prices not only in our country, but elsewhere. I gather from the reading at the desk that this company have had sharp competition, because other manufacturers are selling at a loss, which they are not doing.

Mr. GRAY. That is the very home competition which it is said the tariff is designed to create.

Mr. ALLISON. Selling at a loss?

Mr. GRAY. If I have understood the advocates of protection aright, their proposition has been that if you will adequately protect domestic manufactures you will create within the tariff wall a domestic competition which will reduce the price to the consumer.

Mr. ALLISON. Certainly.

Mr. GRAY. That being the very object which was sought to be produced by the tariff, or one of the great objects, why is it, when confessedly it has been produced, and presumably to the benefit of the great mass of the consumers, we seek thus, without provocation or reasonable motive, as it seems to me, with all respect to the Senator from Iowa, to raise the duty even in this slight degree, as he calls it? I do not think it is a slight degree.

There has been no outcry of a suffering or perishing or languishing industry. There is the widest sort of an association or combine among the wood-screw makers, I am informed, through this country and across the water to control the business, and why we should accede to any demand they may make, merely because they make it, without some good reason back of it, I am utterly at a loss to conceive. Surely the great mass of consumers in this country who use these articles which enter into the daily use of every community and neighborhood throughout the land are entitled to some consideration in the making up of this schedule of the tariff.

Mr. FORAKER. I wish to state, for the benefit of the Senator from Delaware, that we have some establishments of this character in our State, and I know what the experience has been during the last three years, since the Wilson Act went into effect. Every one of those establishments has been run during this whole period at a loss. They have been running at a loss rather than stop business and rather than lose the American market. They put their prices down, thinking they could hold on to the market against their adversaries from abroad until there would be legislation under which they could resume operation at the usual profit.

It is true that it is the theory of protectionists that a protective tariff will result in home competition which in the end will reduce the price of the product, but no one desires, I apprehend, that the price of the product shall be reduced below the point at which the business can be conducted with profit to those who invest their capital in it, for the minute it is so reduced the business would of course stop ordinarily.

So this rate is necessary, absolutely so, in the judgment of those in my own State whom I represent here, in order that they may conduct their business at a reasonable profit in the future as against the conduct of their business at a loss in the years gone by since the Wilson Act went into effect.

So far as the American Screw Company is concerned, as has been suggested by the Senator from Iowa, its experience is not a fair illustration of what is required by a company differently situated. That company has its establishment not only in the United States, but it also has a branch in Canada and another in England, and in the same report which was sent to the desk by the Senator from Missouri the American Screw Company speaks of those different enterprises and says it may become necessary for it to transfer its manufacturing from the United States to England.

Mr. GRAY. Mr. President——

Mr. WHITE. Will the Senator from Delaware permit me to ask the Senator from Ohio a question?

Mr. GRAY. Certainly.

Mr. WHITE. I should like to ask the Senator from Ohio how it is that under the present duty, which appears to be prohibitive, the factories find it difficult to proceed, and whether, when the duty is prohibitive, it is necessary to have it prohibitive in the second degree?

Mr. FORAKER. I answered the inquiry made by the Senator from California when I said (at least that is the answer I would make, and I was making the statement for that purpose) that the reason why there has been no importation since the Wilson law went into effect is that the American establishments have been making and selling their goods at a loss. Every one in the State of Ohio is losing money right straight along. They do that in order to hold the American market until there can be legislation under which they can continue with the ordinary profits. They would have closed down long ago, and would have discharged their employees and withdrawn their capital from the business had it not been for the hope that the day would soon come when they would have a protective tariff under which they could continue their business with safety and with profit.

Mr. GRAY. Mr. President, this is only another illustration of the fact which seems to have been made abundantly obvious in the last six years since tariff bills have been so widely discussed, that there never comes a time when the struggling infant industry has had enough of the nourishment and support and paternal care of the Government to enable it to do business profitably. The struggling infants grow into lusty adults, but they never arrive at the point when they are willing to give up their infantile food. They are just as fond of the bottle as they were at the start.

I do not find fault with my friend the Senator from Ohio for listening with friendly ear to the worthy gentlemen who tell him this tale of woe. I know a great many such. It is human nature that they should pour into his sympathetic ear such a tale as that. I have had many such poured into my own ears. I live in a community where there are many men—worthy American citizens, as good as any, patriotic, industrious, enterprising men—who are engaged in many of these industries mentioned in the schedule, who feel just the same way. He and I would feel the same way if we were there. That is human nature. We are here in a different attitude, however. We are here, some of us at least, as the Senator from Maine said the other day, to represent the American people, and we are bound to scrutinize these statements and not to take them without a grain of salt nor to take them as absolutely true without examination.

It does not appear to me that this is a reasonable request of theirs, in face of the fact that they now absolutely control the American market and are suffering from that very competition—suffering as all engaged in industries having competitors have to suffer—which the protective tariff, according to its friends, was designed to create. I do not think we ought, just at their demand and without a reasonable cause assigned, thus to erect the tariff wall a little higher. I do not know that it would make much difference. One might say there are no importations now and there will be none hereafter, and nobody is hurt, but we can not tell.

Mr. FORAKER. Will the Senator from Delaware allow me?

Mr. GRAY. In one moment. We can not tell what motive is behind it, what interested motive, nor what the exact result is going to be of making this absolutely prohibitive and forbidding tariff in their favor. The imports for 1896, as the Senator from Missouri read, amounted to $136 worth of wood screws, and for the same year there were exported of wood screws from this country $320,659 worth.

I beg pardon of the Senator from Ohio. He was about to interrupt me.

Mr. FORAKER. It is not a matter of sympathy. This is in line with all we have been doing here. I refer to those of us who believe in the protective-tariff policy. We want to retain this industry and give it a chance to be continued, and we have come to a place where the industry must be sacrificed or it must be saved to the American people. It is an important industry to us in Ohio. No doubt it is in other States where it finds a location and representation. They employ a great many people in our State; there is a large amount of capital invested, and they have come to the place, as I said a while ago, where, unless they can have adequate protection, they must discharge their labor, withdraw their capital, and invest it in some other direction.

We believe it is a good thing for the American people and for all who use wood screws manufactured by these enterprises that the industry should be maintained in our own country, and that this product should be furnished by American labor to the American users of it.

Mr. GRAY. We are not discussing the question of free trade and protection.

Mr. FORAKER. I thought the Senator from Delaware was discussing it.

Mr. GRAY. No, not so far as this particular industry is concerned, nor as to this particular time. We are discussing the question why these screw companies should ask for the higher building of the tariff wall—in other words, for more protection—when the statistics show that they have accomplished all that the highest protection ever seeks to accomplish—absolute exclusion of foreign competition.

The Senator from Ohio says, if I understand him, that the competition which now exists among the domestic manufacturers of screws is so great that it has compelled a decrease in the price and therefore a decrease in the profits. How are you going to remedy that by a tariff?

Mr. FORAKER. I did not say that.

Mr. GRAY. How can you prevent that domestic competition by building the exterior wall higher?

Mr. FORAKER. What I said was that by reason of the reduction of tariff by the Wilson Act it became necessary for these establishments, in order to hold on to their market and continue their business, to sell their product at a loss, and those in our State have been selling their product at a loss throughout all the period in which they have been operating since that law went into effect, and they are continuing at a loss. They do so in order to hold on to the market and keep out the foreign producer until there will be protection under which they can continue their business at reasonable profit.

Mr. GRAY. How, then, would the Senator explain the fact that the great American Screw Company, said to be the largest in the United States, in the report made by the president to their own stockholders, I believe——

Mr. FORAKER. Yes.

Mr. GRAY. When they are discussing their own affairs, within the privacy and the intimacy and the confidence of their own directors' parlor, undertake to say that the period is gone when they need high protection, and never allude to this distressing state of things which the Senator has portrayed as existing among other screw companies, and only speak of the fact that they are able to hold on for the present, and look confidently to next year for increased business and increased profits?

Mr. FORAKER. The Senator asked me a question, and I hope he will allow me to answer it.

Mr. GRAY. Certainly.

Mr. FORAKER. I explain it—and I have made the explanation—by the fact set forth in their report, that they are not only an American concern, but they are an American corporation with a branch manufacturing establishment located in Canada and another one located in England, and they say in that very report, as I remember it, for I saw it once before, that it may be necessary for them to transfer their machinery from the United States to England to a greater extent than they have already transferred it, and transfer the manufacture of their product there. Therefore I say that what the American Screw Company say is not to be taken as a criterion of what should be applied to a company that is solely an American concern. They have their branches in other countries, and are differently situated.

Mr. GRAY. Reasoning from the same facts that the Senator from Ohio has spoken of (I understand he was only drawing conclusions, and I am at liberty to draw conclusions myself, although I will not dispute any assertion of his made of his own knowledge), I should say that a different state of things obtains. It would seem to me that the American Screw Company, which is so extensive in its operations and so strong in its foundations, has been able so far to reduce the price that the other screw companies in Ohio have been compelled to come down to a rate that has not been remunerative to them, or at least not so remunerative as they think they have a right to expect. I can not draw any other conclusion from the facts, so far as we have them here.

Is it possible that, that being the case, having brought about this desirable condition, this haven to which all protection voyages tend, we are then to be called upon for some inscrutable reason to build higher the tariff wall that surrounds us, and, in face of the fact that there was $320,659 worth of these screws exported and none imported, to do their bidding and erect this prohibitive tariff for their benefit, presumably?

Mr. VEST. I move to reduce those three duties there 1 cent each, so as to bring them back to the existing law. The first is 4 cents, in line 10. I move to make it 3 cents. The next is 6 cents, in line 11. I move to make that 5 cents. The next is in line 12, 8½ cents. I move to make that 7 cents; and in line 14 I move to make the duty 10 cents instead of 12 cents; so as to make the paragraph read:

165. Screws, commonly called wood screws, made of iron or steel, more than 2 inches in length, 3 cents per pound; over 1 inch and not more than 2 inches in length, 5 cents per pound; over one-half inch and not more than 1 inch in length, 7 cents per pound; one-half inch and less in length, 10 cents per pound.

I will submit one motion as applied to all of them; and I call for the yeas and nays.

The PRESIDING OFFICER (Mr. HALE in the chair). By unanimous consent, the amendments will be considered as one amendment; and on agreeing to the amendment the Senator from Missouri demands the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were present, he would vote "nay" and I should vote "yea."

The roll call was concluded.

Mr. VEST. I announce my pair with the Senator from Minnesota [Mr. NELSON]. I would vote "yea," if he were present.

Mr. THURSTON. I have a general pair with the senior Senator from South Carolina [Mr. TILLMAN]. If he were present, I should vote "nay."

Mr. GRAY (after having voted in the affirmative). I ask if the senior Senator from Massachusetts [Mr. HOAR] is recorded as voting?

The PRESIDING OFFICER. He has not voted.

Mr. GRAY. I promised temporarily to pair with that Senator. I therefore withdraw my vote.

The result was announced—yeas 21, nays 29, as follows:

YEAS—21.

Bacon,	Harris, Kans.	Mitchell,	Turpie,
Bate,	Heitfeld,	Murphy,	Walthall,
Berry,	Jones, Ark.	Pettigrew,	White.
Caffery,	Kenney,	Pettus,	
Chilton,	McLaurin,	Rawlins,	
Cockrell,	Mills,	Smith,	

NAYS—29.

Allison,	Deboe,	Hawley,	Quay,
Burrows,	Fairbanks,	Lodge,	Sewell,
Cannon,	Foraker,	McBride,	Shoup,
Carter,	Frye,	McMillan,	Spooner,
Chandler,	Gallinger,	Penrose,	Wetmore.
Clark,	Gear,	Perkins,	
Cullom,	Hale,	Platt, Conn.	
Davis,	Hanna,	Pritchard,	

NOT VOTING—39.

Aldrich,	Gray,	Martin,	Teller,
Allen,	Hansbrough,	Mason,	Thurston,
Baker,	Harris, Tenn.	Morgan,	Tillman,
Butler,	Hoar,	Morrill,	Turner,
Clay,	Jones, Nev.	Nelson,	Vest,
Daniels,	Kyle,	Pasco,	Warren,
Elkins,	Lindsay.	Platt, N. Y.	Wellington,
Faulkner,	McEnery,	Proctor,	Wilson,
George,	Mallory,	Roach,	Wolcott.
Gorman,	Mantle,	Stewart,	

So the amendment was rejected.

The PRESIDING OFFICER. The Secretary will proceed with the reading of the bill.

The next amendment of the Committee on Finance was, in paragraph 166, page 52, line 16, after the word "metal," to strike out "45 cents per 100 ribs and stretchers, and 15 per cent ad valorem; umbrella or parasol frames, including skeleton frames, if with not more than eight ribs and stretchers in each frame, 65 cents per dozen frames and 20 per cent ad valorem; if with more than eight ribs and stretchers in each frame, one-half of 1 cent additional per frame for each rib and stretcher in excess of eight; if with handles or sticks, such handles or sticks shall be dutiable as if imported separately," and to insert "50 per cent ad valorem;" so as to make the paragraph read:

166. Umbrella and parasol ribs and stretchers, composed in chief value of iron, steel, 50 per cent ad valorem.

The amendment was agreed to.

The next amendment of the Committee on Finance was to strike out paragraph 167, in the following words:

167. Vessels: Foreign-built yachts or other foreign-built vessels undocumented, brought to the United States after this act shall take effect, for use or for sale as pleasure vessels, whether so brought as freight or on board another vessel or by sailing thereto, 35 per cent ad valorem: *Provided*, That on a yacht or vessel so navigated such duty shall be levied, collected, and paid only upon the first arrival thereof: *And provided further*, That a like duty shall be levied, collected, and paid upon the cost of all equipments purchased abroad for such vessels, on all repairs and alterations to such yachts or vessels thereafter made in any foreign country, vessels wrecked in the waters of the United States and repaired, also vessels condemned as prize of war and those adjudged to be forfeited for a breach of the laws of the United States, hereafter admitted to the privileges of vessels of the United States under the conditions of the laws relating to the registering and enrollment of vessels, 35 per cent ad valorem: *Provided*, That such duty shall be estimated on the appraised value of the wrecked vessels as the same may be brought into a port of the United States and on the appraised value of said condemned and forfeited vessels at the time and place of their sale as forfeited.

The amendment was agreed to.

The next amendment was, in paragraph 168, page 53, line 23, after the word "Wheels," to insert "for railway purposes;" in line 2, page 54, after the word "manufactured," to strike out "1¼ cents per pound;" and in line 5, after the word "wheels," to insert "for railway purposes;" so as to make the paragraph read:

168. Wheels for railway purposes, or parts thereof, made of iron or steel, and steel-tired wheels for railway purposes, whether wholly or partly finished, and iron or steel locomotive, car, or other railway tires or parts thereof, wholly or partly manufactured, and ingots, cogged ingots, blooms, or blanks for the same, without regard to the degree of manufacture, 1¼ cents per pound: *Provided*, That when wheels for railway purposes, or parts thereof, of iron or steel, are imported with iron or steel axles fitted in them, the wheels and axles together shall be dutiable at the same rate as is provided for the wheels when imported separately.

The amendment was agreed to.

Mr. ALLISON. I move to insert "one and one-half" in lieu of "one and one-fourth," in lines 4 and 5.

Mr. VEST. As I understand, the Senator moves an increase of one-fourth.

Mr. ALLISON. One-fourth of a cent per pound.

Mr. VEST. In line 5?

Mr. ALLISON. In line 5.

The PRESIDING OFFICER. The amendment of the Senator from Iowa will be stated.

The SECRETARY. In lines 4 and 5 strike out "1¼ cents" and insert "1½ cents;" so as to read:

168. Wheels for railway purposes, or parts thereof, made of iron or steel, and steel-tired wheels for railway purposes, whether wholly or partly finished, and iron or steel locomotive, car, or other railway tires or parts thereof, wholly or partly manufactured, and ingots, cogged ingots, blooms, or blanks for the same, without regard to the degree of manufacture, 1½ cents per pound.

Mr. VEST. That is an increase.

The PRESIDING OFFICER. If there be no objection——

Mr. GRAY. There is objection, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Iowa, on page 54, lines 4 and 5, to strike out "one and one-fourth" and insert "one and one-half." Is the Senate ready for the question?

The amendment was agreed to.

The next amendment of the Committee on Finance was, under the heading of "Miscellaneous metals and manufactures of," paragraph 169, page 54, line 11, after the word "aluminum," to strike out "in crude form" and insert "and;" in line 12, after the word "value," to insert "in crude form;" in the same line, before the word "cents," to strike out "ten" and insert "five;" in the same line, before the word "plates," to insert "in;" in line 14, after the word "rods," to strike out "of aluminum, of any kind, in which aluminum is the component material of chief value, fifteen;" and in line 15, before the word "cents," to insert "ten;" so as to make the paragraph read:

MISCELLANEOUS METALS AND MANUFACTURES OF.

169. Aluminum and alloys of any kind in which aluminum is the component material of chief value, in crude form, 5 cents per pound; in plates, sheets, bars, and rods, 10 cents per pound.

Mr. ALLISON. By request, I ask that paragraph 169 may be passed over for the present.

The PRESIDING OFFICER. Paragraph 169 will be passed over, and paragraph 170 will be read.

The SECRETARY. It is proposed by the committee to strike out paragraph 170, in the following words:

170. Manufactured articles or wares of aluminum of any kind, in which aluminum is the component material of chief value, and whether partially or wholly manufactured, 45 per cent ad valorem.

The PRESIDING OFFICER. If there be no objection, the amendment will be agreed to.

Mr. QUAY. Paragraph 170 goes over with the other paragraph, does it not?

Mr. ALLISON. Not necessarily. If the Senator from Pennsylvania desires, it can go over.

Mr. QUAY. I should like to have it go over. While I have the floor, I will also ask, for my colleague [Mr. PENROSE], that paragraph 174 be passed over in the same way.

Mr. JONES of Arkansas. Does paragraph 170 go over?

The PRESIDING OFFICER. Paragraphs 169 and 170 go over. Paragraph 171 will be read.

The Secretary read paragraph 171, as follows:

171. Antimony, as regulus or metal, three-fourths of 1 cent per pound.

The next amendment of the Committee on Finance was, in paragraph 172, page 54, line 24, after the word "unmanufactured," to strike out "1 cent per pound and fifteen" and to insert "twenty-five;" so as to make the paragraph read:

172. Argentine, albata, or German silver, unmanufactured, 25 per cent ad valorem.

Mr. JONES of Arkansas. I move to amend the committee amendment by inserting "fifteen" instead of "twenty-five."

The PRESIDING OFFICER. The question is on the amendment of the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDING OFFICER. The question recurs on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was to strike out paragraph 173, in the following words:

173. Brass, in bars or pigs, old brass, clippings from brass or Dutch metal and old sheathing, or yellow metal, fit only for remanufacture, 1½ cents per pound.

The amendment was agreed to.

The next amendment was in paragraph 174, page 55, line 5, after the word "leaf," to strike out "four" and insert "five;" so as to make the paragraph read:

174. Bronze powder, 12 cents per pound; bronze or Dutch metal or aluminum, in leaf, 5 cents per package of 100 leaves.

The PRESIDING OFFICER. This paragraph goes over at the request of the Senator from Pennsylvania [Mr. PENROSE]. The reading of the bill will proceed.

Mr. ALLISON. Paragraph 173 has been stricken out, I understand, and paragraph 174 was passed over at the request of the Senator from Pennsylvania.

The PRESIDING OFFICER. Paragraph 173 has been stricken out, and paragraph 174 has been passed over.

Mr. JONES of Arkansas. The purpose of striking out paragraph 173 is to put brass in the basket clause?

Mr. ALLISON. It will either go into the basket clause or on the free list. I do not remember just at the moment.

Mr. JONES of Arkansas. It bears a tax of 10 per cent now, and if you send it to the basket clause it will bear 45 per cent.

Mr. ALLISON. It is in the free list at page 168. It was to go to the free list. The Senator will not object to that, I suppose.

Mr. JONES of Arkansas. No, sir; I do not object. My impression is that it carries a tax of 10 per cent now.

Mr. ALLISON. Does the Senator want it restored to a rate of 10 per cent?

Mr. JONES of Arkansas. The comparative statement submitted by the majority of the committee shows that the tax on this article is 10 per cent. I am not sure that the comparative statement is correct.

Mr. PLATT of Connecticut. It is on the free list now.

Mr. JONES of Arkansas. In what paragraph of the free list?

Mr. PLATT of Connecticut. At the top of page 168, paragraph 486f.

Mr. JONES of Arkansas. In this bill?

Mr. PLATT of Connecticut. In this bill.

Mr. ALLISON. I guess the Senator will find it there.

Mr. JONES of Arkansas. This bill proposes to put it on the free list. It has not been on the free list heretofore?

Mr. ALLISON. No.

Mr. JONES of Arkansas. I am perfectly willing to have it there.

The PRESIDING OFFICER. The reading of the bill will proceed.

The Secretary read paragraph 175, as follows:

175. Copper in rolled plates, called braziers' copper, sheets, rods, pipes, and copper bottoms, 2½ cents per pound; sheathing or yellow metal of which copper is the component material of chief value, and not composed wholly or in part of iron ungalvanized, 2 cents per pound.

Mr. VEST. I ask the Senator from Iowa why he makes the last specific 2 cents a pound? The first specific is 2½ cents a pound, and the next is 2 cents a pound. Under the existing law the duty is 20 per cent on each of these articles.

Mr. ALLISON. The only reason I could give for it is that the sheathing or yellow metal is partly composed of copper, while that in the first part of the paragraph is wholly composed of copper.

Mr. PLATT of Connecticut. The equivalent ad valorems are 19.23 per cent on the first bracket and 21.5 on the second.

Mr. VEST. There is not much difference, I know, in the duty, except that the rate is made specific.

Mr. JONES of Arkansas. There is another reason why I understand the articles in this paragraph ought to bear an ad valorem instead of a specific tax. It is the great variation in the values of the different articles under the paragraph. It makes a very high tax on some, while it makes a low tax on others. It seems to me if there is any paragraph in the bill where an ad valorem tax would be more proper than specific duties this particular paragraph is the one; and I move to insert "20 per cent ad valorem," instead of "2 cents a pound" and "2½ cents per pound," in both cases.

The PRESIDING OFFICER. The Senator from Arkansas moves to amend the paragraph. The question is on agreeing to the amendment.

The amendment was rejected.

The next amendment of the Committee on Finance was, under the head of "Gold and silver," paragraph 176, page 55, line 13, after the word "leaf," to strike out "two dollars" and insert "one dollar and seventy-five cents;" so as to make the paragraph read:

Gold and silver:

176. Gold leaf, $1.75 per package of 500 leaves.

The amendment was agreed to.

The next paragraph was read, as follows:

177. Silver leaf, 75 cents per package of 500 leaves.

The next amendment of the Committee on Finance was to strike out paragraph 178, in the following words:

178. Tinsel wire, lame or lahn, made wholly or in chief value of gold, silver, or other metal, 6 cents per pound and 10 per cent ad valorem; bullions and metal threads, trimmings or other articles, not specially provided for in this act, made from tinsel wire, lame or lahn, or of which the same is the component material of chief value, 6 cents per pound and 45 per cent ad valorem.

And to insert in lieu thereof:

178. Tinsel wire, lame or lahn, made wholly or in chief value of gold, silver, or other metal, 5 cents per pound; bullions and metal threads, made wholly or in chief value of tinsel wire, lame or lahn, 5 cents per pound and 35 per cent ad valorem; laces, embroideries, braids, galloons, trimmings, or other articles, made wholly or in chief value of tinsel wire, lame or lahn, bullions, or metal threads, 60 per cent ad valorem.

The amendment was agreed to.

The next amendment of the committee was, in paragraph 179, page 56, line 12, after the word "cent," to insert "and one-half;" in line 21, after the word "establishments," to insert "whether designated as bonded warehouses or otherwise;" in line 5, page 57, after the word "and," to strike out "upon his report of the lead contents of the ore" and insert "report the results to the proper customs officers, and," and in line 8, after the word "thereon," to insert "except in case of ores that shall be removed to a bonded warehouse to be refined for exportation as provided in this act;" so as to make the paragraph read:

Lead:

179. Lead-bearing ore of all kinds, one cent and one-half per pound on the lead contained therein: *Provided*, That on all importations of lead-bearing ores the duties shall be estimated at the port of entry, and a bond given in double the amount of such estimated duties for the transportation of the ores by common carriers bonded for the transportation of appraised or unappraised merchandise to properly equipped sampling or smelting establishments, whether designated as bonded warehouses or otherwise. On the arrival of the ores at such establishments they shall be sampled according to commercial methods under the supervision of Government officers, who shall be stationed at such establishments, and who shall submit the samples thus obtained to a Government assayer, designated by the Secretary of the Treasury, who shall make a proper assay of the sample and report the result to the proper customs officers, and the import entries shall be liquidated thereon, except in case of ores that shall be removed to a bonded warehouse to be refined for exportation as provided in this act. And the Secretary of the Treasury is authorized to make all necessary regulations to enforce the provisions of this paragraph.

The next amendment of the Committee on Finance was, in paragraph 180, page 57, line 15, after the word "bars," to strike out "and" and insert "lead in any form not specially provided for in this act;" and in line 18, after the word "manufactured," to insert "all the foregoing;" so as to make the paragraph read:

180. Lead dross, lead bullion or base bullion, lead in pigs and bars, lead in any form not specially provided for in this act, old refuse lead run into blocks and bars, and old scrap lead fit only to be remanufactured; all the foregoing, 2 cents per pound; lead in sheets, pipe, shot, glaziers' lead, and lead wire, 2½ cents per pound.

Mr. ALLISON. At the request of several Senators, I ask that lead be passed over.

Mr. MILLS. Both paragraphs 179 and 180.

Mr. THURSTON. Including paragraphs 179 and 180?

Mr. ALLISON. Yes, sir.

Mr. MILLS. That is right.

The PRESIDING OFFICER. By agreement, paragraphs 179 and 180 will be passed over.

Mr. VEST. Now I suggest to the Senator from Iowa that we adjourn.

Mr. CULLOM and others. Oh, no.

Mr. VEST. It is 5 o'clock, and it has been a very sultry afternoon.

Mr. MILLS. I second that motion.

Mr. PRITCHARD. I ask that paragraphs 181 and 182 be passed over temporarily.

The paragraphs referred to are as follows:

181. Metallic mineral substances in a crude state, including monazite sand, and metals unwrought, not specially provided for in this act, 20 per cent ad valorem.

The Committee on Finance proposed to amend paragraph 182, after the word "Mica," in line 1, page 58, by striking out "2 cents per pound on dimensions of 1 square inch or less, and 2 cents per

pound additional for each additional square inch: *Provided*, That the maximum rate of duty shall in no case exceed 50 cents per pound" and inserting "40 per cent ad valorem;" so as to make the paragraph read:

182. Mica, 40 per cent ad valorem.

The PRESIDING OFFICER. The Senator from North Carolina asks that paragraphs 181 and 182 be passed over for the present. If there be no objection, that will be done.

Mr. ALLISON. I ask to insert, after paragraph 178, "Tinsel wire, lame or lahn," a new paragraph recommended by the committee and found in our printed suggestions.

The PRESIDING OFFICER. It will come in at what point?

Mr. ALLISON. After line 10, on page 56, as a new paragraph, and before "Lead." It will be paragraph 178½.

The PRESIDING OFFICER. The amendment will be read.

The SECRETARY. On page 56, between lines 10 and 11, add a new paragraph, as follows:

178½. Hooks and eyes, metallic, whether loose, carded, or otherwise, including weight of cards, cartons, and immediate wrappings and labels, 5½ cents per pound and 15 per cent ad valorem.

The PRESIDING OFFICER. The amendment will be agreed to, if there be no objection.

Mr. VEST. I ask the Senator from Iowa if that is not now under the basket clause?

Mr. ALLISON. It is now under the basket clause.

Mr. VEST. This is an increase of duty, then?

Mr. PLATT of Connecticut. No; it is not an increase of duty. The equivalent ad valorem upon the specific duty will average less than the present 45 per cent of the basket clause, but there has been such undervaluation that the few American manufacturers who are left would prefer to take a specific duty, even though it would average less than the duty under the basket clause.

Mr. VEST. Let the proposed paragraph be passed over and we will ascertain about it.

The PRESIDING OFFICER. Paragraph 178½, proposed as an amendment by the Senator from Iowa, will be passed over until to-morrow.

Mr. ALLISON. I have no objection to its going over until to-morrow.

Mr. VEST. I just want to look at it.

The next amendment of the Committee on Finance was, in paragraph 183, page 58, line 6, after the word "nickel," to insert "(except nickel matte);" in line 7, after the word "is," to strike out "a" and insert "the;" and in the same line, after the word "material," to strike out "and nickel steel" and insert "of chief value;" so as to make the paragraph read:

183. Nickel (except nickel matte), nickel oxide, alloy of any kind in which nickel is the component material of chief value, 6 cents per pound.

Mr. McBRIDE. I ask that paragraph 183 be passed over.

The PRESIDING OFFICER. The Senator from Oregon asks that paragraph 183 be passed over for the present.

Mr. ALLISON. All right; there is no objection to that course.

The PRESIDING OFFICER. That will be done.

Mr. WHITE. We are almost at the wood schedule. Considering the condition of the schedule which we have been examining to-day, I presume it will be impossible to deal with it any further to-night. I desire to say that if there is any intention (I do not, of course, know whether there is or not) to pass over the sugar schedule temporarily, we ought to be apprised of it at once, because there is only one schedule before the sugar schedule is reached, and we necessarily prepare for the schedules a day or two ahead of time, and bring our documents, and so on. If there is any intention to skip the sugar schedule, certainly we ought to be apprised of that fact now, as we are so near it.

Mr. ALLISON. If any Senator desires to have it passed over temporarily, it can be done.

Mr. WHITE. I do not, and I do not know of any Senator on this side of the Chamber who desires to have it passed over.

Mr. ALLISON. I do not know whether any Senator on this side desires it. If any Senator desires, it will be passed over.

Mr. JONES of Arkansas. There is no intention of that sort on the part of the committee?

Mr. ALLISON. There is no intention of that sort on the part of the committee at present. Of course the Senator is very well aware that the Senator from Rhode Island [Mr. ALDRICH], who is on the committee, has not been well for a day or two, and it might be necessary, possibly, to pass it over for a day on that account.

Mr. JONES of Arkansas. All we want is simply to have notice when it is likely to come up. We had understood that the committee would probably pass over the sugar schedule, and we would like to know whether it is true; that is all.

Mr. ALLISON. The committee had not considered the question yet of passing over it.

Mr. JONES of Arkansas. There is nothing of that sort in contemplation?

Mr. ALLISON. Not at present.

Mr. JONES of Arkansas. I understand.

Mr. ALLISON. As the Senator would seem to indicate, that is an important matter; and I have already stated that if the Senator from Rhode Island is here, I take it for granted the sugar schedule will be disposed of when it is reached. If he should be unwell, I would myself suppose that it would be passed over temporarily.

Mr. JONES of Arkansas. Does the Senator think the Senator from Rhode Island will be here by that time?

Mr. ALLISON. I think he will be here by Monday morning certainly, and if we reach the sugar schedule before that time I might want to pass it over.

Mr. JONES of Arkansas. I should like to ask that paragraph 189, relating to watches and watch movements, shall be passed over. We have not quite reached it, but I will not be ready to take it up when it is reached, and I would rather have it passed over now.

The PRESIDING OFFICER. If there be no objection, paragraph 189 will be passed over for the present. That will be done.

Mr. PETTIGREW. I wish to state that if the sugar schedule is not to be disposed of this week I should like to have it go over until next Wednesday, as I shall be absent on Monday and Tuesday, and I desire to be here when the sugar schedule is considered.

Mr. VEST. I am certain the Senator from South Dakota knows I would not be discourteous to him, but I want to make one general remark about the sugar schedule. I think all of us will agree, upon a little reflection, that we ought to dispose of it. It is an irritating, nasty subject, although a sweet one. It is full of scandal and abuse and suspicion, and for one I want it settled and put out of the hands of the Senate as soon as possible. I have myself had enough of it.

Mr. PETTIGREW. Then I should like to have it taken up to-morrow morning. Why not agree to take it up to-morrow morning and dispose of it?

Mr. VEST. The only trouble about that is that here is one of our brethren sick, and, as a matter of course, if he is not in a physical condition to be here, no one would insist on taking it up.

Mr. PETTIGREW. Can we not agree to take it up next Wednesday morning?

Mr. VEST. It ought to be got rid of.

Mr. ALLISON. I think there will be no difficulty about arranging it, I will say, to the satisfaction of the Senators interested in this matter.

I suggest that for to-morrow we meet at 11 o'clock. There are two or three Senators who desire to speak somewhat in an extended way upon one or two of the schedules, and I think that for to-morrow we could very well meet at 11 o'clock and thereby make some progress to-morrow on the bill. I hope there will be no objection to that suggestion. I will only ask it for to-morrow.

The PRESIDING OFFICER. The Senator from Iowa asks unanimous consent that when the Senate adjourn to-day it adjourn to meet at 11 o'clock to-morrow morning.

Mr. JONES of Arkansas. For one day only, I understand.

Mr. ALLISON. For one day only. I ask unanimous consent that that may be done, and I hope there will be no objection to it.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. WHITE. I understand that there are to be some speeches delivered to-morrow.

Mr. ALLISON. I understand that two Senators have given notice that they desire to speak upon the tariff question at some length, especially on the wool feature of it. The Senator from Montana [Mr. MANTLE] has given notice that he desires to speak at some length to-morrow on the wool schedule.

EXECUTIVE SESSION.

Mr. CHANDLER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After four minutes spent in executive session the doors were reopened, and (at 5 o'clock and 10 minutes p. m.) the Senate adjourned until to-morrow, Friday, June 4, 1897, at 11 o'clock a. m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 3, 1897.

APPOINTMENT IN THE NAVY.

Washington Berry Grove, a citizen of Virginia, to be an assistant surgeon in the Navy.

POSTMASTERS.

Fred W. Kiefer, to be postmaster at Antigo, in the county of Langlade and State of Wisconsin.

William H. Conger, to be postmaster at Plymouth, in the county of Marshall and State of Indiana.

E. R. Allen, to be postmaster at Columbus, in the county of Warren and State of Pennsylvania.

Fred B. Kinsley, to be postmaster at Barron, in the county of Barron and State of Wisconsin.

Winslow Gray, to be postmaster at Campello, in the county of Plymouth and State of Massachusetts.

William D. Ellsworth, to be postmaster at Eveleth, in the county of St. Louis and State of Minnesota.

HOUSE OF REPRESENTATIVES.

THURSDAY, *June 3, 1897.*

The House met at 12 o'clock m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The Journal of the proceedings of the last legislative day was read and approved.

CUBA.

Mr. TERRY. I rise to a question of privilege.

The SPEAKER. The gentleman will state it.

Mr. TERRY. Mr. Speaker, on last Thursday I endeavored to present to this House a matter very gravely affecting its rights and privileges; and I trust that now, with the kind indulgence of the Chair and the patience of members of the House, I may be permitted to do so.

Mr. Speaker, I am a Southern man and a Democrat. I love justice and I hate iniquity, which is another name for inequity.

The SPEAKER. The gentleman will please state his question of privilege.

Mr. TERRY. Mr. Speaker, in a just, proper, and orderly manner I will proceed to state the question of privilege.

It has been repeatedly ruled, Mr. Speaker, that in the presentation of a question of privilege there is even greater latitude allowed than in ordinary debate. That has been repeatedly ruled, and I have the authorities here to support the position. I trust that in my own manner——

The SPEAKER. The Chair desires to remind the gentleman that he should state his question of privilege.

Mr. TERRY. It is a matter, Mr. Speaker, affecting the rights and privileges of this House in the matter of committees.

The SPEAKER. As to the appointment of committees?

Mr. TERRY. I have just stated, Mr. Speaker——

The SPEAKER. Is it as to the appointment of committees?

Mr. TERRY. I did not understand the Chair.

The SPEAKER. Will the gentleman state what his question of privilege is?

Mr. TERRY. It affects the appointment of committees—one particular committee, Mr. Speaker.

The SPEAKER. The House has already passed upon that question.

Mr. TERRY. I understand that, Mr. Speaker, but that fact does not preclude the question being raised again, because I will call attention——

Mr. PAYNE. I make the point that the gentleman presents no resolution or motion for the action of the House which involves any question of privilege.

Mr. TERRY. I will present my resolution. I have it here. Now, if I may be permitted, I will make just one other statement——

The SPEAKER. Will the gentleman kindly present his question of privilege?

Mr. TERRY. I will, Mr. Speaker. I wanted to make just one statement——

The SPEAKER. The gentleman knows he ought not to make remarks until he has presented his question of privilege. The business of the House is being stopped by his action.

Mr. TERRY. Mr. Speaker, as to that matter, I will state we have plenty of time. [Laughter.]

The SPEAKER. That may depend upon the relation between the time and what is going on.

Mr. TERRY. I understand that, too; and there is nothing going on now. [Laughter.]

Mr. PAYNE. I raise the point that the gentleman presents no question of privilege.

The SPEAKER. The gentleman from Arkansas declines to present his question of privilege.

Mr. TERRY. I will do so, Mr. Speaker, and as the resolution is written in my own peculiar handwriting, I will, with the permission of the Chair and of the House, read it myself:

Whereas the people of the United States are taking a deep interest in the Cuban question, and the Senate has passed and sent to the House a resolution recognizing the belligerency of Cuba; and

Whereas for the due and orderly consideration of the same, and in accordance with immemorial usage and the rules and practices of the House, it is necessary that there should be a Committee on Foreign Affairs to which said resolution may be promptly referred for proper consideration and report: Therefore,

Resolved, That it is the sense of the House that the Committee on Foreign Affairs, authorized by Rule X, should be appointed as soon hereafter as practicable, so that said Senate resolution——

Mr. PAYNE. That is no question of privilege.

Mr. TERRY (continuing the reading)—

or any other matter in the proper jurisdiction of said committee by reference thereto under Rule XI may be duly considered and acted upon as contemplated by the Constitution of the United States and the rules of this House.

Mr. PAYNE. I renew the point of order that the resolution as read by the gentleman presents no question of privilege.

Mr. TERRY. Now, Mr. Speaker, upon that matter—and I trust my friend from New York will permit me to proceed; I will do so in an orderly manner—I have great respect for the rules of this House and its presiding officer and for the gentlemen on both sides of the Chamber with whom I am associated.

I stated in the beginning, Mr. Speaker—and that was the statement I wanted to complete before I was taken off my feet—I stated in the beginning——

The SPEAKER. The point is made that this resolution does not raise a question of privilege, and the Chair decides that it does not.

Mr. TERRY. Mr. Speaker, upon that question——

Mr. PAYNE and others. Regular order!

Mr. TERRY. I wish to be heard briefly. It has been ruled——

The SPEAKER. The Chair has passed upon the question.

Mr. TERRY. I have the authorities here, Mr. Speaker——

The SPEAKER. The Chair has passed upon the question. Does the gentleman appeal?

Mr. TERRY. Mr. Speaker, I desire——

The SPEAKER. Does the gentleman appeal from the decision of the Chair?

Mr. TERRY. I desire to state that I have the authorities here to the effect that when a question of this kind is presented——

Mr. PAYNE. I insist upon the regular order.

Mr. TERRY. It is the right of the House and not the privilege of the Speaker to determine whether or not the matter is privileged.

The SPEAKER. The gentleman from New York [Mr. PAYNE] is recognized.

Mr. PAYNE. I call for the regular order.

Mr. TERRY. Mr. Speaker, I have the authorities here affirming that it is the right of this House, and not of the Speaker, to determine this question of order.

The SPEAKER. The gentleman from New York is recognized.

Mr. PAYNE. Mr. Speaker, I call for the regular order, which is the amendment that was pending on Tuesday last, and the consideration of which was interrupted by the motion to adjourn.

Mr. TERRY. I most respectfully appeal from the decision of the Chair, if he rules that this resolution is out of order.

Mr. HENDERSON. The appeal comes too late.

Mr. PAYNE. The gentleman makes the appeal too late.

Mr. TERRY. I have the authorities here showing that this matter——

The SPEAKER. The gentleman from Arkansas will resume his seat. He is not in order.

Mr. TERRY. I trust, Mr. Speaker——

The SPEAKER. The gentleman will resume his seat.

Mr. TERRY. That this discussion may be permitted to proceed in order.

Mr. PAYNE. I make the point of order that the appeal comes too late.

The SPEAKER. The Chair asked the gentleman from Arkansas if he appealed, and he did not do so.

Mr. TERRY. I did that for this reason: I stated that I had the authorities here to show that a question of this kind was a matter for the House to decide, not for the Speaker.

The SPEAKER. It would have been for the House to decide if the gentleman had made an appeal, but he did not.

Mr. TERRY. I do make an appeal, Mr. Speaker, and I hope it will be heard by the House.

The SPEAKER. Does the gentleman state that he intended to make an appeal?

Mr. TERRY. I did, sir, after——

The SPEAKER. Then the Chair will entertain the appeal.

Mr. PAYNE. Mr. Speaker, I move to lay the appeal on the table.

The SPEAKER. The gentleman from New York [Mr. PAYNE]

moves to lay the appeal on the table. As many as are in favor will say "aye."

Mr. TERRY. Mr. Speaker, may I be heard before the House on the appeal from the ruling of the Chair?

The SPEAKER (continuing). As many as are opposed, "no." The ayes appear to have it, the ayes have it.

Mr. TERRY. I ask for a division, and I ask to be heard on my appeal.

The SPEAKER. The gentleman asks for a division. As many as are in favor of laying the appeal on the table will rise in their places and be counted.

The House divided; and there were—ayes 99, noes 60.

Mr. TERRY. I ask for the yeas and nays, Mr. Speaker.

The yeas and nays were ordered.

The question was taken; and there were—yeas 90, nays 66, answered "present" 27, not voting 109; as follows:

YEAS—90.

Mr. DAYTON. Mr. Speaker, I am paired generally with the gentleman from Tennessee, Mr. PIERCE. I believed he was not on the floor. Since then he has appeared and voted. I desire to change my vote from "present" to "yea."

The SPEAKER. The change will be made.

Mr. DINSMORE. Mr. Speaker, I have a general pair with the gentleman from Minnesota, Mr. HEATWOLE. The gentleman has been present lately. I am informed that he is not present to-day. I voted "yea," and desire to withdraw my vote.

Mr. BROSIUS. Mr. Speaker, I should like to withdraw my vote and answer "present." I am paired.

The SPEAKER. The gentleman's vote will be withdrawn, and he will be marked "present."

Mr. SMITH of Illinois. Mr. Speaker, I desire to inquire whether the gentleman from Arkansas, Mr. MCCULLOCH, has voted or not?

The SPEAKER. The gentleman has not voted.

Mr. SMITH of Illinois. I desire, then, to withdraw my vote, as I have a general pair with him, and answer "present."

The SPEAKER. The gentleman's vote will be withdrawn, and he will be marked "present."

Mr. BODINE. Mr. Speaker, I answered on the first call, but I understand that my name was again called. I wish to know whether I am recorded as voting. I voted "nay."

The SPEAKER. The gentleman is not recorded as voting. Does the gentleman state that he voted.

Mr. BODINE. I did, on the first call.

The SPEAKER. How does the gentleman vote?

Mr. BODINE. I vote "nay."

Mr. SULLIVAN. Mr. Speaker, I am paired with the gentleman from Illinois, Mr. MILLS. I answer "present," but not voting, for the reason that I am paired with the gentleman.

Mr. MCMILLIN. Mr. Speaker, my colleague, Mr. CARMACK, is detained from the House by reason of sickness in his family. I ask indefinite leave of absence for him in addition to this explanation.

The SPEAKER. Without objection, the request will be considered as granted.

There was no objection.

Mr. BRUCKER. Mr. Speaker, I am paired generally with the gentleman from Michigan, Mr. WM. ALDEN SMITH. I understand he is not present, and I desire to withdraw my vote and be marked "present."

The SPEAKER. The gentleman's vote will be withdrawn, and he will be marked "present."

Mr. YOST. Mr. Speaker, I was present in the House, but did not hear my name called. I desire to answer "present." I am paired with the gentleman from Virginia, Mr. LAMB.

The SPEAKER. The gentleman will be marked "present."

Mr. DANFORD. Mr. Speaker, is my name recorded?

The SPEAKER. The gentleman is not recorded as voting.

Mr. DANFORD. I answered upon the first call. It has been suggested that my name was called upon the second call.

The SPEAKER. Call the gentleman's name.

The name of Mr. DANFORD was called, and he voted "yea."

Mr. DAVISON of Kentucky. Mr. Speaker, I desire to be recorded as "present."

The SPEAKER. The gentleman from Kentucky will be recorded as "present."

The following pairs were announced:

Until further notice:

Mr. SMITH of Illinois with Mr. MCCULLOCH.

Mr. HENRY of Indiana wth Mr. MIERS of Indiana.

Mr. QUIGG with Mr. BLAND.

Mr. WARD with Mr. BARLOW.

Mr. MAHON with Mr. BENNER of Pennsylvania.

Mr. LANDIS with Mr. CRAWFORD.

Mr. GILLETT of Massachusetts with Mr. MCDOWELL.

Mr. KULP with Mr. STALLINGS.

Mr. ODELL with Mr. BARTLETT.

Mr. HICKS with Mr. OTEY.

Mr. HEMENWAY with Mr. ROBERTSON of Louisiana.

Mr. MERCER with Mr. DE ARMOND.

Mr. PERKINS with Mr. COOPER of Texas.

Mr. YOST with Mr. LAMB.

Mr. WHITE of Illinois with Mr. HANDY.

Mr. DINGLEY with Mr. SWANSON.

Mr. HEATWOLE with Mr. DINSMORE.

Mr. McINTIRE with Mr. LESTER.
Mr. McCALL with Mr. JONES of Virginia.
Mr. DAVIDSON of Wisconsin with Mr. HOWARD of Georgia.
Mr. WRIGHT with Mr. ADAMSON.
Mr. YOUNG of Pennsylvania with Mr. BENTON.
Mr. BELKNAP with Mr. MAGUIRE.
Mr. HOPKINS with Mr. McALEER.
Mr. LYBRAND with Mr. LENTZ.
Mr. STEVENS of Minnesota with Mr. JONES of Washington.
Mr. MILLER with Mr. CLARDY.
Mr. LORIMER with Mr. BERRY.
Mr. BRUMM with Mr. COX.
Mr. KERR with Mr. ROBB.
Mr. PITNEY with Mr. CARMACK.
Mr. JENKINS with Mr. STOKES.
Mr. LACEY with Mr. McRAE.
Mr. BROSIUS with Mr. ERMENTROUT.
Mr. JOHNSON of Indiana with Mr. MOON.
Mr. EVANS with Mr. FITZPATRICK.
Mr. JOY with Mr. MARSHALL.
Mr. BINGHAM with Mr. DOCKERY.
Mr. HULL with Mr. BAILEY.
Mr. STRODE of Nebraska with Mr. ALLEN.
Mr. McEWAN with Mr. VEHSLAGE.
Mr. LOVERING with Mr. WHEELER of Alabama.
Mr. BELDEN with Mr. SULZER.
Mr. STEWART of New Jersey with Mr. TAYLOR of Alabama.
Mr. REEVES with Mr. BALL.
Mr. MILLS with Mr. SULLIVAN.
Mr. STEWART of Wisconsin with Mr. LITTLE.
Mr. BARHAM with Mr. FITZGERALD.
Mr. WILSON of New York with Mr. SUTHERLAND.
Mr. SAUERHERING with Mr. STRAIT.
Mr. CHICKERING with Mr. BRADLEY.
Mr. WM. ALDEN SMITH with Mr. BRUCKER.
Mr. MITCHELL with Mr. ELLIOTT.
Mr. BARNEY with Mr. BANKHEAD.
Mr. ACHESON with Mr. WILSON of South Carolina.
Mr. HOOKER with Mr. CATCHINGS.
Mr. PEARCE of Missouri with Mr. VANDIVER.
Mr. OVERSTREET with Mr. ZENOR.
Mr. FOSS with Mr. DAVEY.
For this day:
Mr. MARSH with Mr. COONEY.
On this vote:
Mr. WALKER of Massachusetts with Mr. TATE.
On this question:
Mr. WILBER with Mr. TALBERT.

Mr. DAVEY. Mr. Speaker, I desire to withdraw my vote, as I find I am paired.

The SPEAKER. The gentleman's vote will be withdrawn and he will be marked "present."

Mr. GILLETT of Massachusetts. I heard my name read among the pairs. I was not paired with my knowledge or with my consent, but withdraw my vote.

The SPEAKER. The gentleman will be marked as "present."

Mr. SULLOWAY. Mr. Speaker, I understand my name was read. If I am paired, I withdraw my vote.

The SPEAKER. The gentleman's vote will be withdrawn.

On this question the yeas are 90, the nays 66, present 27—a quorum; the yeas have it, and the appeal is laid on the table.

NAVIGATION OF INLAND WATERS.

Mr. PAYNE. Mr. Speaker, I call for the regular order, which is the further consideration of the bill in relation to the navigation of our inland waters. Just before the adjournment the House was dividing on an amendment, on which a division had been called for.

Mr. STEPHENS of Texas. I want to ask the gentleman from New York a question. Is not this a bill which does not go into effect until next July?

Mr. PAYNE. This bill does not go into effect until four months after its passage.

Mr. STEPHENS of Texas. Then will not the gentleman kindly consent to let me call up at this time Senate bill No. 45, making a donation for the relief of sufferers from the flood at El Paso and in that neighborhood?

Mr. PAYNE. I will say to the gentleman and to the House that when the bill now pending is disposed of, I shall be very glad to aid him in getting unanimous consent for consideration of the bill which he mentions, but until that time I must object.

The SPEAKER. The question is on the pending amendment, which the Clerk will report.

The amendment was read, as follows:

After line 24, page 7, add:
"(d) Rafts, or other water craft not herein provided for, navigating by hand power, horsepower, or by the current of the river, shall carry one or more good white lights, which shall be placed in such manner as shall be prescribed by the Board of Supervising Inspectors of Steam Vessels."

The amendment was agreed to.

Mr. PAYNE. Mr. Speaker, I offer the amendment which I send to the desk.

The amendment was read, as follows:

At the end of line 22, page 14, insert:
"Rule IX. The whistle signals provided in the rules under this article for steam vessels meeting, passing, or overtaking are never to be used except when steamers are in sight of each other and the course and position of each can be determined in the daytime by a sight of the vessel itself, or by night by seeing its signal lights. In fog, mist, and falling snow, or heavy rain storms, when vessels can not so see each other, fog signals only must be used."

Mr. PAYNE. Mr. Speaker, I think time will be saved if I occupy the attention of the House for a few minutes now in repeating the explanation which I have already made, but which some gentlemen do not seem to have understood. In the first place, this bill comes here on the recommendation of the American commissioners to the International Maritime Conference. The amendments also come on the recommendation of those gentlemen and on the recommendation of the Commissioner of Navigation and of the Inspector-General of Steam Vessels. The amendments are not mine; they are not suggested by me; they are suggested by this board.

The amendments are designed mainly to embody in the law rules which are now, and have been for many years, in operation, because prescribed by the board in the Treasury Department which has authority under the law to prescribe rules in relation to the navigation of our inland waters. Every one of these amendments is recommended by all these authorities. This question is a technical one, a question upon which the authority of experts is the end of the law; and if this bill and the amendments were sent to a committee, no matter how intelligently constituted that committee of this House might be, it would still have to rely upon the very gentlemen who recommend this bill and these amendments.

Having said this much, I do not intend to occupy any more time in debate, but if any gentleman on the other side, or any gentleman opposed to this bill, wishes to indulge in debate in regard to it, and will indicate how much time he desires, I will yield to him.

Mr. TERRY. Mr. Speaker——

Mr. PAYNE. Does the gentleman from Arkansas desire time to discuss this bill?

Mr. TERRY. I am addressing myself to the Speaker.

Mr. PAYNE. Then, Mr. Speaker, if the gentleman declines to answer my question, I demand the previous question on the pending amendment.

The SPEAKER. The gentleman from New York asks for the previous question.

Mr. FLEMING. Mr. Speaker, I should like to have a few minutes, perhaps not more than ten.

Mr. PAYNE. Mr. Speaker, I withdraw the demand for the previous question, and yield ten minutes to the gentleman from Georgia.

Mr. FLEMING. Mr. Speaker, I would like to have the attention of the House for a few moments on this question. It is not my purpose to place any obstacle in the way of the proper consideration or the proper passage of this bill. I am perfectly willing to vote for it when it is brought before the House in perfected form and in such a manner that we can have some kind of authority upon which to rely for the correctness of our votes. But as it is the bill is brought before the House without having been examined by any committee of this body. It is true that, as the gentleman from New York told us the other day, this bill has passed the Senate.

It is true that he informs us now that it is recommended by a board of experts. But since the bill passed the Senate not less than one dozen, and perhaps two dozen, imperfections have been discovered in it, and the gentleman desires to have those imperfections corrected. The bill and amendments are before the House on the single statement of the gentleman from New York, and upon that alone we are asked to legislate. I submit, sir, that the whole principle of such a legislative proceeding is radically wrong.

The experts of whom the gentleman speaks as recommending this bill are not responsible to this House, and when the gentleman asks the members of this body to cast their votes in favor of a measure presented as this is we are certainly entitled to have the recommendation of some committee or of some body responsible to this House. There is no legislative body in the world that undertakes to act upon an involved and complicated question of this kind until it has been examined and reported upon by a committee.

The gentleman from Arkansas [Mr. TERRY] very properly stated on the last day the House was in session that the committees are the scouts of the House, and he might have added that they are also the generals of the House, because they furnish the brains

and the plan or outline upon which the House acts. So much on the general proposition that a body of this kind ought not to act upon a complicated question like this without proper and regular investigation.

Now, the next proposition to which I desire to call attention is this: The majority party in the House of Representatives early in this session decided that they would not have the committees appointed and the organization of the House completed in the usual way. Against that decision I have now no complaint whatever to make, nor do I rise to criticise it in any way whatever. I do, however, wish to remind gentlemen that the making of that decision was exceptional; that it was something that had never been done before in this country; and I wish further to remind them that the country demands some satisfactory explanation for such an unprecedented course of conduct in our legislative proceedings here.

The explanation given by the majority of the House was that we did not appoint committees for the reason that we did not intend to legislate. It has been stated that the House was brought together for the purpose of passing the tariff bill; and such was the burden of the President's message, and the Committee on Ways and Means was appointed for the purpose of preparing and reporting the tariff bill. You did not ask us to pass a tariff bill without its first having been passed upon by the action of the committee of this body. It was perfectly proper for the majority of the House to defend themselves against the criticisms of this side of the House and to justify themselves before the country as long as they kept those two propositions together—"We will appoint no committees because we do not intend to engage in general legislation."

It is true that one or two measures of a charitable nature have been allowed to pass the House without the examination of a committee, but in a large degree those measures did not need committee examination. Now, for the first time, we have a question of the most involved and complicated character before us for consideration. Now, for the first time, we are refused committee examination into a question of general legislation. In attempting to pass this bill under these circumstances the majority party in the House is attempting to do something in the way of overriding rules and precedents which they have not done up to this hour.

The gentleman from New York [Mr. PAYNE] told us at the last sitting of the House that this bill ought to be passed for various reasons, one being, as he said, that there was very little, if any, new matter to be added to the existing law; that this was in a large measure a revision and modification of existing law. It seems to me, sir, that when we consider the experience of the American House of Representatives in revising and codifying laws we ought at least to be on our guard. I have read—and I presume there are members of this House who personally remember—that in 1873 a bill was reported to revise and codify the coinage laws of the United States, and under cover of such a bill a fatal stab was made at one of the money metals of the Constitution.

The chairman of the committee at that time got up on the floor of this House and told the members that the bill contained no new legislation; that it was simply a revision and codification of existing law. Yet when the people awakened to the truth they found that an act had been committed which was either a piece of blundering legislation or the climax of cunning knavery and trickery.

The gentleman from New York, therefore, can gain nothing, it seems to me, in the good opinion of this House or of the country when he tells us that this bill simply revises and codifies existing laws. Such a bill should be scanned with an eagle's eye—every line of it, every section of it, every word of it. It is true, as the gentleman says, the bill has passed the Senate and has the approval of the naval board.

Mr. BARTLETT. The gentleman will allow me to say that the statement of the gentleman from New York can not be exactly correct upon the point now referred to, because in a report from this International Marine Conference it is stated that the reason they desire these regulations enacted into law is because the Supreme Court, in the case of E. A. Packer (140 U. S. Supreme Court Reports), decided that they were not the law. So the gentleman from New York must be mistaken on that point.

Mr. GAINES. Of course we can not "revise" what is not the law.

Mr. FLEMING. It seems, then, that under cover of a "revision" a part of this legislation is designed to reverse a decision of the Supreme Court.

Mr. BARTLETT. That is it exactly.

Mr. FLEMING. Now, it may be that that decision ought to be reversed. It may be that the court was right and the law was wrong. But I submit, Mr. Speaker, to the thoughtful, conservative members of this House, no matter to what party they belong, that when questions so complicated and so involved as those presented by this bill—provisions which affect every vessel, whether it be the largest steamer or the smallest rowboat on every inland creek, river, or harbor of the entire Atlantic and Pacific coasts—when such a measure is brought before us, presenting new and complicated legislation, it ought to be scanned carefully by a committee.

What faith can we place in the action of the Senate? The gentleman from New York himself states that more than a dozen imperfections have been discovered in the work of the Senate. I therefore urge again—and I put it to the gentleman from New York in good faith, for I have no desire, nor do I believe anyone on this side of the House has any desire, to obstruct the passage of this bill—I suggest to him that he ask that the bill be referred to a special committee. If gentlemen on the other side do not want all the committees appointed, let the Speaker name a special committee to take charge of this bill and report it back to the House; and if it should prove to be proper and right, we will vote for it.

The SPEAKER. The gentleman's time has expired.

Mr. FLEMING. I ask to be allowed a few minutes more—not more than five. I have another point I wish to bring out, on which I think the gentleman from New York himself may not be informed.

Mr. PAYNE. I yield the gentleman five minutes more.

Mr. FLEMING. I am not a nautical man; I am not familiar with nautical matters. I do not know whether the chairman—I was about to say the chairman of the committee, which would have been a mistake; I mean the gentleman from New York—I do not know whether the gentleman from New York is aware of the matter to which I now wish to call his attention. There are two sections of this bill which do not deal with nautical terms nor specially with matters of that kind, and I do understand something about them. I refer to the first section, embracing the enacting clause, and the last section, which undertakes to repeal certain laws.

I say that in these sections the bill is fatally defective. If this bill be passed in the form here proposed, the law will be left in a slipshod condition, which will be no credit to us and would not be any credit to a town council in the smallest city of the United States. Let me read the first section. The object of this bill is to adopt certain general legislation in reference to the navigation of inland waters, but it is not intended to apply to all inland waters. The intention is to except certain waters, mainly the tributaries of the Mississippi and the Red River of the North. Let us see what the language of the bill is.

Mr. PAYNE. The gentleman will allow me to say that I propose to offer a substitute for that section when we get to it.

Mr. FLEMING. We have already passed it.

Mr. PAYNE. Oh, no.

Mr. FLEMING. Oh, yes; we have amended several subsequent sections. The language of this section is as follows:

Be it enacted, etc., That the following regulations for preventing collision shall be followed by all vessels——

Mr. PAYNE. I did not know the gentleman was referring to that provision.

Mr. FLEMING. That is the point I am making—a point, I think, which the gentleman from New York has not observed.

Be it enacted, etc., That the following regulations for preventing collision shall be followed by all vessels navigating all harbors, rivers, and inland waters of the United States—

Now, mark the language—

except the Great Lakes and their connecting and tributary waters as far east as Montreal and the Red River of the North.

Now, I understand where Montreal is located; I can understand its longitude and latitude; but when the language of this section goes on to say, "as far east as Montreal and the Red River of the North," it shows that whoever drafted this bill was deficient either in his geography or his grammar; in one or the other he is very badly in error. The Red River of the North is nowhere near Montreal, I suppose it is 1,000 miles away, a thousand miles to the west of Montreal.

Now, what do we expect a court to do with a sentence like that? You are undertaking to describe the territory over which this bill is to go into effect, the ground over which it is to operate; and you say that you except "the Great Lakes and their connecting and tributary waters as far east as Montreal and the Red River of the North"—language which simply means nothing at all. If such language as that goes out to the country with the indorsement of the House of Representatives, it certainly can do no credit to us. An amendment is badly needed at that point.

Now, if the gentleman from New York will turn to the last section of the bill, he will find there an error of even greater moment. I call attention to section 5:

That sections 4233, 4412 (with the regulations made in pursuance thereof, except the rules and regulations for the government of pilots of steamers navigating the Red River of the North.

Evidently the scope of this bill is not limited to steam vessels at all. It expressly applies to all craft. Yet, when you come to insert the repealing clause you repeal everything except those laws relating to pilots of steam vessels; so that a raft or ferryboat or rowboat on those waters would not be affected in any way whatever; the act would only apply to the pilots of steam vessels.

Not only is the language of that section confused and inaccurate with reference to what is intended as to the character of the vessel, but by comparing this section with the previous section you will find it is inaccurate also with reference to the men who are managing the vessel. In section 4 a liability is to be placed on every pilot, engineer, mate, or master of any vessel. But when you come to the repealing clause, in section 5, you except only the pilots of steam vessels.

I make these remarks for the purpose merely of enforcing the view that gentlemen on the other side ought not to insist on putting through this House a bill of this kind in an imperfect condition. It ought to be perfected by somebody——

The SPEAKER. The time of the gentleman has expired.

Mr. PAYNE. Mr. Speaker, I ask for the previous question on the amendment.

The previous question was ordered.

The SPEAKER (having put the question on the amendment). The ayes seem to have it.

Mr. FLEMING. I call for a division.

The question being again taken, there were—ayes 57, noes 18.

Mr. FLEMING. I raise the point that no quorum has voted.

The SPEAKER. The Chair overrules the point.

Mr. FLEMING. I make the point that there is no quorum present.

The SPEAKER. That is a different point. [Having counted the House.] There are 130 members present—not a quorum. Under the rules of the House, the yeas and nays will be considered as ordered, and at the same time there will be a call of the House. The Doorkeeper will close the doors. Members are not at liberty to leave the Hall during the call. The Clerk will call the roll. Those members who are in favor of the amendment will, when their names are called, answer "aye," and those opposed "no."

The question was taken; and there were—yeas 94, nays 39, answered "present" 49, not voting 170; as follows:

Harmer,	Mahon,	Smith, Ill.	

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. PAYNE. Mr. Speaker, I offer the following as a substitute for the pending bill.

The substitute, to strike out all after the enacting clause and substitute in lieu thereof the following, was read:

That the following regulations for preventing collision shall be followed by all vessels navigating all harbors, rivers, and inland waters of the United States, except the Great Lakes and their connecting and tributary waters as far east as Montreal and the Red River of the North and rivers emptying into the Gulf of Mexico and their tributaries, and are hereby declared special rules duly made by local authority.

PRELIMINARY.

In the following rules every steam vessel which is under sail and not under steam is to be considered a sailing vessel, and every vessel under steam, whether under sail or not, is to be considered a steam vessel.

The word "steam vessel" shall include any vessel propelled by machinery.

A vessel is "under way," within the meaning of these rules, when she is not at anchor, or made fast to the shore, or aground.

RULES CONCERNING LIGHTS, ETC.

The word "visible" in these rules, when applied to lights, shall mean visible on a dark night with a clear atmosphere.

ARTICLE 1. The rules concerning lights shall be complied with in all weathers from sunset to sunrise, and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

ART. 2. A steam vessel when under way shall carry—

(a) On or in front of the foremast, or, if a vessel without a foremast, then in the fore part of the vessel, a bright white light so constructed as to show an unbroken light over an arc of the horizon of twenty points of the compass, so fixed as to throw the light ten points on each side of the vessel, namely, from right ahead to two points abaft the beam on either side, and of such a character as to be visible at a distance of at least 5 miles.

(b) On the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of ten points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles.

(c) On the port side a red light so constructed as to show an unbroken light over an arc of the horizon of ten points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the port side, and of such a character as to be visible at a distance of at least 2 miles.

(d) The said green and red side lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

(e) A seagoing steam vessel when under way may carry an additional white light similar in construction to the light mentioned in subdivision (a). These two lights shall be so placed in line with the keel that one shall be at least 15 feet higher than the other, and in such a position with reference to each other that the lower light shall be forward of the upper one. The vertical distance between these lights shall be less than the horizontal distance.

(f) All steam vessels (except seagoing vessels and ferryboats) shall carry in addition to green and red lights required by article 2 (b), (c), and screens as required by article 2 (d), a central range of two white lights; the after light being carried at an elevation at least 15 feet above the light at the head of the vessel. The headlight shall be so constructed as to show an unbroken light through twenty points of the compass, namely, from right ahead to two points abaft the beam on either side of the vessel, and the after light so as to show all around the horizon.

ART. 3. A steam vessel, when towing another vessel, shall, in addition to her side lights, carry two bright white lights in a vertical line, one over the other, not less than 3 feet apart, and when towing more than one vessel shall carry an additional bright white light 3 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed, exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light mentioned in article 2 (a) or the after range light mentioned in article 2 (b).

Such steam vessel may carry a small white light abaft the funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

ART. 5. A sailing vessel under way or being towed shall carry the same

lights as are prescribed by article 2 for a steam vessel under way, with the exception of the white lights mentioned therein, which they shall never carry.

ART. 6. Whenever, as in the case of vessels of less than 10 gross tons under way during bad weather, the green and red side lights can not be fixed, these lights shall be kept at hand, lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side, nor, if practicable, more than two points abaft the beam on their respective sides. To make the use of these portable lights more certain and easy the lanterns containing them shall each be painted outside with the color of the light they respectively contain, and shall be provided with proper screens.

ART. 7. Rowing boats, whether under oars or sail, shall have ready at hand a lantern showing a white light which shall be temporarily exhibited in sufficient time to prevent collision.

ART. 8. Pilot vessels when engaged on their station on pilotage duty shall not show the lights required for other vessels, but shall carry a white light at the masthead, visible all around the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes.

On the near approach of or to other vessels they shall have their side lights lighted, ready for use, and shall flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side nor the red light on the starboard side.

A pilot vessel of such a class as to be obliged to go alongside of a vessel to put a pilot on board may show the white light instead of carrying it at the masthead, and may, instead of the colored lights above mentioned, have at hand, ready for use, a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed above.

Pilot vessels, when not engaged on their station on pilotage duty, shall carry lights similar to those of other vessels of their tonnage.

ART. 9. (a) Fishing vessels of less than 10 gross tons, when under way and when not having their nets, trawls, dredges, or lines in the water, shall not be obliged to carry the colored side lights; but every such vessel shall, in lieu thereof, have ready at hand a lantern with a green glass on one side and a red glass on the other side, and on approaching to or being approached by another vessel such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

(b) All fishing vessels and fishing boats of 10 gross tons or upward, when under way and when not having their nets, trawls, dredges, or lines in the water, shall carry and show the same lights as other vessels under way.

(c) All vessels, when trawling, dredging, or fishing with any kind of drag-nets or lines, shall exhibit, from some part of the vessel where they can be best seen, two lights. One of these lights shall be red and the other shall be white. The red light shall be above the white light, and shall be at a vertical distance from it of not less than 6 feet and not more than 12 feet; and the horizontal distance between them, if any, shall not be more than 10 feet. These two lights shall be of such a character and contained in lanterns of such construction as to be visible all round the horizon, the white light a distance of not less than 3 miles and the red light of not less than 2 miles.

"(d) Rafts, or other water craft not herein provided for, navigating by hand power, horsepower, or by the current of the river, shall carry one or more good white lights, which shall be placed in such manner as shall be prescribed by the Board of Supervising Inspectors of Steam Vessels."

ART. 10. A vessel which is being overtaken by another, except a steam vessel with an after-range light showing all around the horizon, shall show from her stern to such last-mentioned vessel a white light or a flare-up light.

ART. 11. A vessel under 150 feet in length when at anchor shall carry forward, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light, in a lantern so constructed as to show a clear, uniform, and unbroken light visible all around the horizon at a distance of at least 1 mile.

A vessel of 150 feet or upward in length when at anchor shall carry in the forward part of the vessel, at a height of not less than 20 and not exceeding 40 feet above the hull, one such light, and at or near the stern of the vessel, and at such a height that it shall be not less than 15 feet lower than the forward light, another such light.

The length of a vessel shall be deemed to be the length appearing in her certificate of registry.

ART. 12. Every vessel may, if necessary, in order to attract attention, in addition to the lights which she is by these rules required to carry, show a flare-up light or use any detonating signal that can not be mistaken for a distress signal.

ART. 13. Nothing in these rules shall interfere with the operation of any special rules made by the government of any nation with respect to additional station and signal lights for two or more ships of war or for vessels sailing under convoy, or with the exhibition of recognition signals adopted by shipowners, which have been authorized by their respective governments, and duly registered and published.

ART. 14. A steam vessel proceeding under sail only, but having her funnel up, may carry in daytime, forward, where it can best be seen, one black ball or shape 2 feet in diameter.

SOUND SIGNALS FOR FOG, ETC.

ART. 15. All signals prescribed by this article for vessels under way shall be given:

1. By "steam vessels" on the whistle or siren.

2. By "sailing vessels" and "vessels towed" on the fog horn.

The words "prolonged blast" used in this article shall mean a blast of from four to six seconds' duration.

A steam vessel shall be provided with an efficient whistle or siren, sounded by steam or by some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog horn; also with an efficient bell. A sailing vessel of 20 tons gross tonnage or upward shall be provided with a similar fog horn and bell.

In fog, mist, falling snow, or heavy rainstorms, whether by day or night, the signals described in this article shall be used as follows, namely:

(a) A steam vessel under way shall sound, at intervals of not more than one minute, a prolonged blast.

(c) A sailing vessel under way shall sound, at intervals of not more than one minute, when on the starboard tack, one blast; when on the port tack, two blasts in succession, and when with the wind abaft the beam, three blasts in succession.

(d) A vessel when at anchor shall, at intervals of not more than one minute, ring the bell rapidly for about five seconds.

(e) A steam vessel, when towing, shall, instead of the signals prescribed in subdivision (a) of this article, at intervals of not more than one minute, sound three blasts in succession, namely, one prolonged blast followed by two short blasts. A vessel towed may give this signal and she shall not give any other.

(f) All rafts or other water craft, not herein provided for, navigating by hand power, horse power, or by the current of the river, shall sound a blast of the fog horn, or equivalent signal, at intervals of not more than one minute.

SPEED OF SHIPS TO BE MODERATE IN FOG, ETC.

ART. 16. Every vessel shall, in a fog, mist, falling snow, or heavy rainstorms, go at a moderate speed, having careful regard to the existing circumstances and conditions.

A steam vessel hearing, apparently forward of her beam, the fog signal of a vessel the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

STEERING AND SAILING RULES.

PRELIMINARY—RISK OF COLLISION.

Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change, such risk should be deemed to exist.

ART. 17. When two sailing vessels are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other as follows, namely:

(a) A vessel which is running free shall keep out of the way of a vessel which is closehauled.

(b) A vessel which is closehauled on the port tack shall keep out of the way of a vessel which is closehauled on the starboard tack.

(c) When both are running free, with the wind on different sides, the vessel which has the wind on the port side shall keep out of the way of the other.

(d) When both are running free, with the wind on the same side, the vessel which is to the windward shall keep out of the way of the vessel which is to the leeward.

(e) A vessel which has the wind aft shall keep out of the way of the other vessel.

ART. 18. RULE I. When steam vessels are approaching each other head and head, that is, end on, or nearly so, it shall be the duty of each to pass on the port side of the other; and either vessel shall give, as a signal of her intention, one short and distinct blast of her whistle, which the other vessel shall answer promptly by a similar blast of her whistle, and thereupon such vessels shall pass on the port side of each other. But if the courses of such vessels are so far on the starboard of each other as not to be considered as meeting head and head, either vessel shall immediately give two short and distinct blasts of her whistle, which the other vessel shall answer promptly by two similar blasts of her whistle, and they shall pass on the starboard side of each other.

The foregoing only applies to cases where vessels are meeting end on or nearly end on, in such a manner as to involve risk of collision; in other words, to cases in which, by day, each vessel sees the masts of the other in a line, or nearly in a line, with her own, and by night to cases in which each vessel is in such a position as to see both the side lights of the other.

It does not apply by day to cases in which a vessel sees another ahead crossing her own course, or by night to cases where the red light of one vessel is opposed to the red light of the other, or where the green light of one vessel is opposed to the green light of the other, or where a red light without a green light or a green light without a red light is seen ahead, or where both green and red lights are seen anywhere but ahead.

RULE III. If, when steam vessels are approaching each other, either vessel fails to understand the course or intention of the other, from any cause, the vessel so in doubt shall immediately signify the same by giving several short and rapid blasts, not less than four, of the steam whistle.

RULE V. Whenever a steam vessel is nearing a short bend or curve in the channel, where, from the height of the banks or other cause, a steam vessel approaching from the opposite direction can not be seen for a distance of half a mile, such steam vessel, when she shall have arrived within half a mile of such curve or bend, shall give a signal by one long blast of the steam whistle, which signal shall be answered by a similar blast, given by any approaching steam vessel that may be within hearing. Should such signal be so answered by a steam vessel upon the farther side of such bend, then the usual signals for meeting and passing shall immediately be given and answered; but if the first alarm signal of such vessel be not answered, she is to consider the channel clear and govern herself accordingly.

When steam vessels are moved from their docks or berths, and other boats are liable to pass from any direction toward them, they shall give the same signal as in the case of vessels meeting at a bend, but immediately after clearing the berths so as to be fully in sight they shall be governed by the steering and sailing rules.

RULE VIII. When steam vessels are running in the same direction, and the vessel which is astern shall desire to pass on the right or starboard hand of the vessel ahead, she shall give one short blast of the steam whistle as a signal of such desire, and if the vessel ahead answers with one blast, she shall put her helm to port; or if she shall desire to pass on the left or port side of the vessel ahead, she shall give two short blasts of the steam whistle as a signal of such desire, and, if the vessel ahead answers with two blasts, shall put her helm to starboard; or if the vessel ahead does not think it safe for the vessel astern to attempt to pass at that point, she shall immediately signify the same by giving several short and rapid blasts of the steam whistle, not less than four, and under no circumstances shall the vessel astern attempt to pass the vessel ahead until such time as they have reached a point where it can be safely done, when said vessel ahead shall signify her willingness by blowing the proper signals. The vessel ahead shall in no case attempt to cross the bow or crowd upon the course of the passing vessel.

Rule IX. The whistle signals provided in the rules under this article for steam vessels meeting, passing, or overtaking are never to be used except when steamers are in sight of each other, and the course and position of each can be determined in the daytime by a sight of the vessel itself, or by night by seeing its signal lights. In fog, mist, falling snow, or heavy rain storms, when vessels can not so see each other, fog signals only must be given.

ART. 19. When two steam vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

ART. 20. When a steam vessel and a sailing vessel are proceeding in such directions as to involve risk of collision, the steam vessel shall keep out of the way of the sailing vessel.

ART. 21. Where, by any of these rules, one of the two vessels is to keep out of the way, the other shall keep her course and speed.

ART. 22. Every vessel which is directed by these rules to keep out of the way of another vessel shall, if the circumstances of the case admit, avoid crossing ahead of the other.

ART. 23. Every steam vessel which is directed by these rules to keep out of the way of another vessel shall, on approaching her, if necessary, slacken her speed or stop or reverse.

ART. 24. Notwithstanding anything contained in these rules, every vessel overtaking any other shall keep out of the way of the overtaken vessel.

Every vessel coming up with another vessel from any direction more than two points abaft her beam, that is, in such a position, with reference to the vessel which she is overtaking, that at night she would be unable to see either of that vessel's side lights, shall be deemed to be an overtaking vessel; and

no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these rules, or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

As by day the overtaking vessel can not always know with certainty whether she is forward of or abaft this direction from the other vessel, she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

ART. 25. In narrow channels every steam vessel shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which lies on the starboard side of such vessel.

ART. 26. Sailing vessels under way shall keep out of the way of sailing vessels or boats fishing with nets, or lines, or trawls. This rule shall not give to any vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing vessels or boats.

ART. 27. In obeying and construing these rules due regard shall be had to all dangers of navigation and collision, and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

SOUND SIGNALS FOR VESSELS IN SIGHT OF ONE ANOTHER.

ART. 28. When vessels are in sight of one another, a steam vessel under way whose engines are going at full speed astern shall indicate that fact by three short blasts on the whistle.

NO VESSEL UNDER ANY CIRCUMSTANCES TO NEGLECT PROPER PRECAUTIONS.

ART. 29. Nothing in these rules shall exonerate any vessel, or the owner or master or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper lookout, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

ART. 30. The exhibition of any light on board of a vessel of war of the United States or a revenue cutter may be suspended whenever, in the opinion of the Secretary of the Navy, the commander-in-chief of a squadron, or the commander of a vessel acting singly, the special character of the service may require it.

DISTRESS SIGNALS.

ART. 31. When a vessel is in distress and requires assistance from other vessels or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, namely:

IN THE DAYTIME.

A continuous sounding with any fog-signal apparatus, or firing a gun.

AT NIGHT.

First. Flames on the vessel, as from a burning tar barrel, oil barrel, etc.

Second. A continuous sounding with any fog-signal apparatus, or firing a gun.

SEC. 2. That the supervising inspectors of steam vessels and the Supervising Inspector-General shall establish such rules to be observed by steam vessels in passing each other and as to the lights to be carried by ferryboats and by barges and canal boats when in tow of steam vessels, not inconsistent with the provisions of this act, as they from time to time may deem necessary for safety, which rules, when approved by the Secretary of the Treasury, are hereby declared special rules duly made by local authority, as provided for in article 30 of chapter 802 of the laws of 1890. Two printed copies of such rules shall be furnished to such ferryboats and steam vessels, which rules shall be kept posted up in conspicuous places in such vessels.

SEC. 3. That every pilot, engineer, mate, or master of any steam vessel, and every master or mate of any barge or canal boat, who neglects or refuses to observe the provisions of this act, or the regulations established in pursuance of the preceding section, shall be liable to a penalty of $50, and for all damages sustained by any passenger in his person or baggage by such neglect or refusal: *Provided*, That nothing herein shall relieve any vessel owner or corporation from any liability incurred by reason of such neglect or refusal.

SEC. 4. That every vessel that shall be navigated without complying with the provisions of this act shall be liable to a penalty of $100, one-half to go to the informer, for which sum the vessel so navigated shall be liable and may be seized and proceeded against by action in any district court of the United States having jurisdiction of the offense.

SEC. 5. That sections 4233 and 4412 (with the regulations made in pursuance thereof, except the rules and regulations for the government of pilots of steamers navigating the Red River of the North and rivers emptying into the Gulf of Mexico and their tributaries, and except the rules for the Great Lakes and their connecting and tributary waters as far east as Montreal) and 4413 of the Revised Statutes of the United States and chapter 202 of the laws of 1893 and sections 1 and 3 of chapter 102 of the laws of 1895, and sections 5, 12, and 13 of the act approved March 3, 1897, entitled "An act to amend the laws relating to navigation," and all amendments thereto, are hereby repealed so far as the harbors, rivers, and inland waters aforesaid (except the Great Lakes and their connecting and tributary waters as far east as Montreal and the Red River of the North and rivers emptying into the Gulf of Mexico and their tributaries) are concerned.

SEC. 6. That this act shall take effect four months from the date of its approval.

Mr. PAYNE. Mr. Speaker, I have offered this amendment, substituting this language after the enacting clause, commencing with line 3 of page 1 of the bill, for the double purpose of including in it, as I have, all the amendments heretofore adopted by the House, including the one offered by the gentleman from Tennessee [Mr. RICHARDSON]. I have also included four other substantial amendments here, reenacting the rules now in force and which have been in force for some time under the direction of the board appointed in the Treasury Department according to law, consisting of the Inspector-General of Steam Vessels, the Commissioner of Navigation, and one or two other officers.

These rules and the new Rule IX, which the House heard read, and another rule or rules read now, are reenacted in this law, for the purpose of having them posted as a part of the law, and for that reason only. I have also offered an amendment to section 5—two or three amendments to section 5—by striking out as many semicolons and inserting in place thereof the word "and," so as to improve the text of the bill. I have also added in section 5 an exception, excepting the Mississippi River, its tributaries, the Great Lakes, and the Red River of the North from the operations of the bill.

This is done to cure the question raised not only by the gentleman from Georgia [Mr. FLEMING], but by other gentlemen who have considered the question, and to remove any possibility of doubt of the bill being confined to the waters bordering on the high seas and excluding the great Western rivers and the Great Lakes. Another amendment was suggested by the gentleman from Wisconsin [Mr. MINOR], when the bill was up two days ago, to section 3 of the bill—that section which makes the engineer, mate, master, etc., liable for damages in any case of collision from disobedience to these rules. The gentleman from Wisconsin raised the question whether enacting that these different officers should be liable for damages might not relieve the vessel or owner of the vessel from damages.

I am very clearly of the opinion that the language, as it stands, does not change the liability of the owner of the vessel or of the vessel itself; and I have simply adopted this amendment because the gentleman from Wisconsin is in doubt upon that subject. It does not change the present status of the bill if it should become law in its original form, and does not change the law in that respect; and for that reason I have adopted the suggestion of the gentleman from Wisconsin.

Now, Mr. Speaker, I have moved the substitution of this language after the enacting clause for the purpose of incorporating the additional amendments which I wished to bring before the House, and in order to save the time of the House by requiring a separate vote on each one of these amendments; and I now ask the previous question on this substitute, to the third reading of the bill, and on the bill to its final passage.

Mr. RICHARDSON. I ask the gentleman to withdraw that motion for four or five minutes. I only ask for that time, and I am not making any fight on the bill itself.

Mr. PAYNE. I will withdraw my motion for the present, and yield five minutes to the gentleman from Tennessee.

Mr. RICHARDSON. Mr. Speaker, I shall not use the time in opposition so much to this measure, because I stated yesterday, and repeat it again here to-day, that there are not three members on either side of the House who understand what this measure is. Now, the gentleman from New York has set aside the work which we thought he had gotten up to his notion when he brought this bill forward, and he has now offered a substitute which has not been printed, and which we do not understand as well as we did the original bill.

But, Mr. Speaker, I want to call the attention of this House and the country simply to the fact that the majority party of this House deem it wise to set aside all pending legislation in order that this one measure may receive consideration in this House. We have none of the ordinary instrumentalities of legislation here by which a particular measure can be brought forward and offered in antagonism to this bill. This bill is brought here by the Committee on Rules.

Now, why is it more important, Mr. Speaker, than any other measure pending here? I ask gentlemen on that side of the House why it is that they sit silently there and make no protest of any kind or character against the course of the management of this House, by which hundreds of other meritorious measures are utterly ignored by the Committee on Rules and this measure is forced and pressed upon the attention of the House? What is the matter with all those bills for the relief of old soldiers of this country?

The Senate has passed over a hundred bills, many of them giving pensions to meritorious soldiers of the late war. Are you willing for every one of those measures to be ruthlessly set aside by the dominating committee of this House, the only committee that can bring a measure to our attention, and that they shall force this measure upon Congress? Are you going back to your constituencies and say to them that this bill is far more important to the country and to their interests than those pension measures? That is what you are doing when you stand up here and support the leaders of that side of the House in the course the majority is pursuing here.

You say you are very happy in it. I do not believe it, gentlemen. I do not believe you are happy in it. Here are nearly 100 pension bills passed by the Senate for the relief of the soldiers and the widows of soldiers of the late war, yet you utterly ignore them, while you press this measure upon our attention. But that is not all. Here are the Cuban resolutions which were passed by the Senate of the United States and sent here. The country is clamoring for the consideration of those resolutions, but you treat them as of no importance; you set them aside and decline to consider them, while you bring in a rule here and force the consideration for three or four days of this unimportant bill—unimportant compared with the measures I have mentioned, and others that are ready for consideration.

You even pay no attention to the respectful recommendations of your own President, who has sent two or three messages to this Congress urging action upon several important matters. I called attention to them on Tuesday last. One important question in respect to which the President has sent a message is the boundary

line between this Republic and the Republic of Mexico, but you pay no attention to that. Another matter has been deemed of such importance that the President has sent a special message urging upon Congress its consideration, but you set it aside, pay no attention to it, and bring in a rule requiring the House to give two or three days to this pending bill.

Mr. Speaker, there are more than 3,400 bills that have been introduced by the members of this House, and that are sleeping to-day without receiving, and without the prospect of receiving, any consideration at the hands of this body. Are you willing to go before the country and say that you applaud your leaders when they set aside these thousands of bills and yet can find time for the consideration of a bill no more important than the one that is now pending? Is that satisfactory to you? I do not believe it is. I will not occupy time in going into details of the measures to which I have referred. I simply desire to challenge the attention of the House and the country to this unusual condition of affairs.

[Here the hammer fell.]

Mr. ROBINSON of Indiana. Mr. Speaker, will the gentleman from New York yield me five minutes?

Mr. PAYNE. If the gentleman is going to speak on the same line as the gentleman who has just sat down, no; if he wants time to discuss the pending bill, yes.

Mr. ROBINSON of Indiana. My remarks would not be in the same line as those of the gentleman from Tennessee.

Mr. PAYNE. Does the gentleman want time for discussion in relation to this bill?

Mr. ROBINSON of Indiana. My remarks would be in reference to the old soldiers' widows who are asking me to secure consideration for them here.

Mr. PAYNE. I decline to yield, Mr. Speaker. I wish to say a word to the House in reply to the gentleman from Tennessee. He wants to know if members on this side of the House are satisfied with the action of certain of their leaders, or supposed leaders.

Mr. RICHARDSON. I did not say "supposed leaders." I admit your leaders.

Mr. PAYNE. Well, "supposed leaders" was my language. I would not accuse the gentleman from Tennessee of saying "supposed leaders," because——

Mr. RICHARDSON. But you did accuse me of it.

Mr. PAYNE. Oh, no; I would not accuse the gentleman of using that expression, because it might be considered as reflecting upon somebody on that side of the House—somebody nearer home. [Laughter.]

Mr. Speaker, this side is satisfied with the action of the House during the time it has been assembled in this session, It is satisfied with it, because this side of the House and the members on this side seem to have an intelligent appreciation of the situation. We came together in this extra session for a specific purpose, a great purpose, namely, to provide revenue sufficient to pay the expenses of the Government from week to week and from month to month. We came to do what the other side had failed to do when they had the power, and what the country wants done as soon as it can be done. Our object was to bring forward a revenue bill here and enact it into law at the first possible moment.

We did that. We sent the bill to the Senate on the 1st day of April, and it has been there ever since. Of course I will not say anything here about what is done at the other end of the Capitol, but I will say, for the members on this side of the House of Representatives, that we do not mean to lay a single straw in the way of the other branch of Congress which can in any manner delay the passage of that bill and its enactment into law. [Applause on the Republican side.] The country wants relief, and the members of the majority of the House of Representatives are, to a man, anxious to have that relief given to the country at the first possible moment, and now——

Mr. RICHARDSON. Do you want the Dingley bill or the Senate bill?

Mr. PAYNE. I hope the gentleman will allow me to complete my sentence.

Mr. RICHARDSON. Certainly; but you had concluded your sentence when I interrupted you in a respectful manner.

Mr. PAYNE. The gentleman from Tennessee is very anxious about the old soldiers and their claims. Mr. Speaker, the old soldiers are content to wait until we can get money enough in the Treasury to pay their claims, and when that is done we will take care of them, as this side of the House has always taken care of them since the close of the war. [Applause on the Republican side.]

Mr. ROBINSON of Indiana. Does not the gentleman know——

Mr. PAYNE. I decline to be interrupted in every sentence.

The SPEAKER pro tempore. The gentleman from New York declines to yield.

Mr. PAYNE. Gentlemen on the other side of the House are very anxious that this body should mark out a policy for the Executive. Mr. Speaker, we have confidence in our Executive. [Applause on the Republican side.] Unlike the gentlemen on the other side, we have confidence in our present Executive, as we have always had confidence in our Executive ever since the war.

Have you gentlemen on the other side ever had any confidence in your Executive since the war? You do not seem to understand our position. We are willing to trust our Executive to deal with the Cuban question, and we are willing to give him time enough to examine into it before he declares his policy.

Mr. GAINES. How much more time do you want?

Mr. PAYNE. We want at least time enough for him to send a man down there who can investigate and return and make his report to the Executive before any policy is declared. Gentlemen on the Democratic side are very anxious about the Cuban question, and some gentlemen not far from this Hall seem to manifest the same kind of anxiety. [Laughter.]

Anxious about it, why? Simply because they think they are appealing to the prejudices of the populace; that is all. They think that popular opinion is that way; that the popular tide is running in that direction, and they are jumping to catch at some straw in order to try to resurrect themselves from the oblivion that seems to have come over them because of their record in the past.

Now, Mr. Speaker——

Mr. KING. Did the Republicans take that view in voting on the belligerency resolution?

Mr. PAYNE. I do hope I may be permitted to proceed five minutes without being interrupted.

The SPEAKER pro tempore (Mr. HEPBURN). The House will be in order. The gentleman from New York declines to yield.

Mr. PAYNE. Now, we on this side of the House propose to go right on in our own way. We have stood by the Speaker to a man. We have sat here and seen him insulted from day to day, because we knew that the insults coming from that side of the House could not harm the Speaker anywhere in this country. Why, sir, that was tried in 1890 and 1891. The gibes and the threats and the foul names and the violations of every rule of decency coming from some men—and one or two of them are still left on that side of the House—recoiled upon their authors; and the country sustained the Speaker of this House in every ruling made in the Fifty-first Congress. And you came back here and made haste to adopt every rule of that Congress and reaffirm every ruling that the Speaker had made. And so you stand by, without argument——

Mr. RICHARDSON. Will the gentleman permit an interruption?

Mr. PAYNE. I wish the gentleman would allow me to finish my sentence, and after I am through I will allow him to interrupt me to his heart's content.

Mr. RICHARDSON. Will the gentleman yield at the end of the sentence?

Mr. PAYNE. I decline to yield now.

Mr. RICHARDSON. The remarks of the gentleman have misrepresented the position of the Democratic party.

Mr. PAYNE. If the gentleman had followed me attentively, he would have seen that I was not at the end of the sentence, but was in the midst of it.

A MEMBER (on the Democratic side). Will the gentleman permit an interruption when the sentence is ended?

The SPEAKER pro tempore. The gentleman from New York declines to be interrupted; and interruptions of this kind are not in order.

Mr. PAYNE. And now some of those gentlemen on that side seem to think that they can get some of the fame that came to members of the Fifty-first Congress by standing in their places and hurling insult after insult at the Speaker of the House, simply because he is in the chair, where he can not answer their gibes and their insults.

Why, sir, the Fifty-first Congress was succeeded by the Fifty-second and the Fifty-third; and some of these men were members of the Fifty-second and the Fifty-third Congresses. And when the gentleman who had been Speaker of the House became simply "the gentleman from Maine," they were very careful how they crossed swords with him, because he was on the floor to defend himself. [Applause on the Republican side.]

Now, Mr. Speaker, criticism is made about bringing up this bill. Gentlemen on the other side do not seem yet to understand the nature of the bill. They have forgotten the legislation in Congress on this subject. They have forgotten what made it necessary that a bill of this kind should be passed. In 1888 Congress took action for the representation of this Government in an international commission. In 1889 that commission met and adopted "rules of the road" applicable to the high seas, and it was necessary that the lawmaking power of each of the nations taking part in that conference should ratify those rules before they could go into effect.

We have had the subject up time and again in Congress until finally the 1st day of next month has been fixed for those rules to take effect. Then it was found that some of our rules applicable to the inland waters bordering on the high seas conflicted with

the rules applicable on the high seas, and consequently there was danger of marine collisions with loss of property and life. So these same gentlemen who have been engaged in framing the international rules sat down to revise the rules for the inland waters, so as to make them correspond to the rules applicable to the high seas; and at the same time they incorporated in one body all the rules that they wished to preserve applicable to the inland waters, so that the whole legislation on the subject might be in one compact statute.

This proposed law was presented here. Congress happened to be in session for another purpose. The Senate passed this bill and sent it over to us. It has been brought up here now, under a special rule, and we are about to pass it. But gentlemen on the other side say, "No, you must not pass this bill; you must not save human life; you must not remove these dangers at sea until the measure has been submitted to a committee of the savants of this House and passed upon by them."

Suppose a committee were appointed to pass upon these rules. Why, sir, there are one or two men in this House who have a little practical knowledge on this question, and when they have read these rules they have been so modest as not to engage in debate at all on the question, because they knew the rules were right. But a committee, if appointed, would have to take the word of these experts on the question, because the experts understand this technical subject, and gentlemen on the committee would not understand it.

There is no reason for referring this bill to a committee. If the House had been in session, with the committees appointed, and this bill had gone to a committee, the committee would have adopted the suggestions of these gentlemen familiar with the subject; and the bill would have come in here and gone through without criticism, as similar bills did in the last Congress, when there was not found a man on the other side of the House to try to obstruct them.

Why, then, do gentlemen try to obstruct this bill? Why is it that they oppose it? They are vainly endeavoring to make some capital out of the situation. If they will go home to their constituents, if they will consult the people of the country, they will find that ninety-nine out of a hundred of their fellow-citizens are anxious for Congress to pass a tariff bill and leave every other matter until the tariff bill is passed. [Applause on the Republican side.]

A MEMBER (on the Democratic side). Why do not you do it?

Mr. PAYNE. Well, gentlemen over there do not seem to know yet that the tariff bill passed the House on the 31st day of March last. This is the style of question which gentlemen are anxious to interject into my remarks—why? Has some new leader come to town? [Laughter.] Some new man who wants to take command of their forces? The gentleman from Washington [Mr. LEWIS] is still here. You can not get any patent on his prerogative. The gentleman from Kansas does not seem to be in his seat to-day, but he will hasten back if any new leader tries to get in his place. Do not attempt it. Do not try to enter into that rivalry.

Now, gentlemen, I hope I have made myself sufficiently clear. I hope you understand the situation, and I hope you understand this bill. I hope you will be able to vote intelligently upon it. I now renew my motion for the previous question.

The SPEAKER pro tempore (having put the question on ordering the previous question). The ayes seem to have it.

Mr. FLEMING and others called for a division.

The question being again taken, there were—ayes 75, noes 45.

Mr. FLEMING. I make the point that there is no quorum present.

Mr. PAYNE. I call for the regular order.

The SPEAKER pro tempore. It is quite evident that there is no quorum in the House.

Several MEMBERS. Oh, yes.

Mr. PAYNE. The regular order is for the Chair to make a count.

The SPEAKER pro tempore (having counted the House). One hundred and forty-one members are present—not a quorum.

Mr. RICHARDSON. I move that the House do now adjourn.

The motion was rejected.

The SPEAKER pro tempore. The Doorkeeper will close the doors. The Clerk will call the roll. Gentlemen favoring the pending proposition will, as their names are called, answer "aye;" those opposed, "no." Those not desiring to vote will answer "present."

The question was taken; and there were—yeas 84, nays 66, answered "present" 27, not voting 175; as follows:

The SPEAKER. The Clerk has noted as present Mr. MEYER of Louisiana, Mr. VANDIVER, Mr. YOUNG of Virginia, and Mr. COUSINS. The vote is—yeas 84, nays 66, present in addition to those announced 27. The ayes have it. The previous question is ordered, and the question is on agreeing to the substitute.

The question being taken, on a division (demanded by Mr. RICHARDSON) there were—ayes 88, noes 11.

Accordingly, the substitute was agreed to.

The bill was ordered to a third reading; and it was accordingly read the third time, and passed.

On motion of Mr. PAYNE, a motion to reconsider the last vote was laid on the table.

INDIAN APPROPRIATION BILL.

Mr. SHERMAN. Mr. Speaker, I desire to present a conference report on the Indian appropriation bill.

Mr. STEPHENS of Texas. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Texas [Mr. STEPHENS] rise?

Mr. STEPHENS of Texas. I rise to ask unanimous consent

for the present consideration of Senate resolution 45, for the relief of the El Paso flood sufferers.

Mr. SHERMAN. I think this conference report will take but a moment. We have given way twice for other matters, anyhow.

The SPEAKER. The Chair will recognize the gentleman from Texas [Mr. STEPHENS] as soon as this matter is disposed of. The Clerk will read the conference report and then the statement of the House conferees.

The conference report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate numbered 10 to the bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations for the fiscal year ending June 30, 1898, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said House amendment insert the following:

"The Secretary of the Interior is hereby directed to allot agricultural lands in severalty to the Uncompahgre Ute Indians now located upon or belonging to the Uncompahgre Indian Reservation in the State of Utah, said allotments to be upon the Uncompahgre and Uintah reservations or elsewhere in said State. And all the lands of said Uncompahgre Reservation not theretofore allotted in severalty to said Uncompahgre Utes shall, on and after the 1st day of April, 1898, be open for location and entry under all the land laws of the United States, excepting, however, therefrom all lands containing gilsonite, asphalt, elaterite, or other like substances. And the title to all of the said lands containing gilsonite, asphaltum, elaterite, or other like substances is reserved to the United States."

And the House agree to the same.

J. S. SHERMAN,
CHARLES CURTIS,
Managers on the part of the House.

R. F. PETTIGREW,
F. M. COCKRELL,
Managers on the part of the Senate.

The statement of the House conferees was read, as follows:

Statement to accompany conference report No. 4, Indian appropriation bill.

Conference of the disagreeing committees of the two Houses on Senate amendment numbered 10:

This amendment is in regard to the gilsonite, which has been before the House upon several occasions. By this agreement provision is made for the allotment of agricultural lands in severalty to the Uncompahgre Indians and for the opening for location and entry, under all the land laws of the United States, all the land of the Uncompahgre Reservation not allotted prior to April 1, 1898, excepting the lands containing gilsonite, asphalt, elaterite, and other like substances, the title of which, by this amendment, is reserved to the United States.

This suspends the opening of the gilsonite lands, and leaves that question subject to the disposition of Congress at some future time.

Mr. SHERMAN. Mr. Speaker, this report leaves the gilsonite and asphaltum deposits still undisposed of. The title of all lands containing any of these deposits, about which we have had so much discussion heretofore, is retained in the United States, and the matter is left for future action by Congress.

Mr. SAYERS. There is, then, no legislation whatever in this bill respecting those lands?

Mr. SHERMAN. None whatever, so far as these deposits are concerned. I move the adoption of the report.

Mr. SHAFROTH. I will state to the gentleman from Texas [Mr. SAYERS] that there is legislation in this concerning these lands, but it withdraws from entry entirely, and reserves the title in the United States. I am opposed to it, but nevertheless I do not see that we can make anything by fighting it further at this time.

Mr. SHERMAN. I ask for a vote, Mr. Speaker.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

On motion of Mr. SHERMAN, a motion to reconsider the last vote was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed the following resolutions; in which the concurrence of the House was requested:

Resolved by the Senate (the House of Representatives concurring), That there be printed as a document the report of the United States Boundary Commission, pursuant to the convention between the United States and Mexico touching the re-marking of the boundary line between those two countries west of the Rio Grande, and in addition thereto 300 copies of said report for the use of the Department of State.

Also:

Resolved by the Senate (the House of Representatives concurring), That there be printed and bound 3,000 copies of a special report describing the methods and results of the investigations conducted at the astrophysical observatory of the Smithsonian Institution, entitled Annals of the Astrophysical Observatory, of which number 500 copies shall be for the use of the Senate, 1,000 copies for the use of the House of Representatives, and 1,500 copies for distribution by the Smithsonian Institution.

The message also announced that the Senate had passed a bill of the following title; in which the concurrence of the House was requested:

A bill (S. 479) to provide for the purchase of a site and the erection of a public building thereon at Nashua, in the State of New Hampshire.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to an enrolled bill of the following title:

A bill (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes.

RELIEF OF EL PASO FLOOD SUFFERERS.

The SPEAKER. The Chair recognizes the gentleman from Texas [Mr. STEPHENS].

Mr. STEPHENS of Texas. I now ask unanimous consent for the present consideration of Senate joint resolution 45, authorizing an appropriation for the relief of flood sufferers at El Paso, Tex.

The SPEAKER. The gentleman asks unanimous consent for the present consideration of Senate joint resolution 45, which will be reported to the House by the Clerk.

The joint resolution was read, as follows:

Joint resolution (S. R. 45) authorizing the Secretary of War to use rations for the relief of destitute persons in the district overflowed by the Rio Grande River at and near El Paso, Tex.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the sum of $10,000 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be expended by and under the direction of the Secretary of War in the purchase and distribution of subsistence stores to such destitute persons as may require assistance in the district overflowed by the Rio Grande River at and near El Paso, Tex.

Mr. STEPHENS of Texas. Mr. Speaker, I have a telegram here which I wish to have read for the information of the House.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. LOUD. Mr. Speaker, reserving the right to object, I should like to have some information on the subject.

The SPEAKER. The gentleman from California [Mr. LOUD], reserving his right to object, asks for information.

Mr. STEPHENS of Texas. I ask for the reading of the telegram which I have sent to the Clerk's desk.

The SPEAKER. The Clerk will read the telegram.

The Clerk read as follows:

EL PASO, TEX., *May 28, 1897.*

JOHN A. STEPHENS, *M. C.:*

The Rio Grande has overflowed lower part of city, inhabited by poorer classes. Five hundred houses destroyed; 3,000 people homeless and destitute. Suffering too great and widespread for local charity. Many will suffer hunger, perhaps starvation, if not relieved immediately. Ask Congress to appropriate $10,000, to be expended under War Department, to feed them.

JOSEPH MAGOFFIN,
Mayor.
W. N. VILOS,
President Board of Health.
CHAS. S. DAVIS,
Collector Customs.

Mr. STEPHENS of Texas. Mr. Speaker, I wish to state to the House that I am personally acquainted with the gentlemen sending this telegram. I know that they would not ask for this appropriation unless it was needed.

The city of El Paso is situated on this side of the Rio Grande River. The flood is greater than it has been for the last forty years, and, as stated in the telegram, these 3,000 people are destitute and homeless. We ask for the passage of this resolution.

Mr. LOUD. Mr. Speaker, I should like to make a suggestion or two. I do not think I shall object to the consideration of this resolution, because there seems to be a strong sentiment here endeavoring to prevail upon me to not object to its consideration. I want to call the attention of the House to the position in which we are placed in regard to this matter. Of course, first coming to Congress the overflooded sections of the Mississippi River, covering many States, and appeals having been made here in days gone by to relieve a condition that no locality could relieve, we have pursued this course, Mr. Speaker, of relieving sections of the country until we are asked to devote $10,000 of public money to relieve the people within the precincts of one city in the United States, and it has proceeded up to this position, that hereafter when any creek in the United States shall overflow its banks and drown out any citizen, he has just as much right to appeal to Congress to relieve him as has the city of El Paso. The first step taken, permit me to say to my Democratic friends, is in contradiction of their interpretation of the constitutional privileges vested in the House.

We have taken the first step. Now you have seen the absurd, logical conclusion of the whole proposition. Texas is a great State, rich in its great resources, and I am surprised that that State should come here, or any portion of that State should come here, and appeal to the nation to relieve one or two hundred people who are now in distress. In the case of every conflagration that takes place in the country that shall burn out a hundred people, why should not they come to Congress and ask to be relieved?

That, Mr. Speaker, is what it will inevitably lead to. I am informed that I should not object; that the sentiment of this House

is willing to go to the extreme of relieving in one city two or three hundred people that are temporarily in distress. Then let the House assume the responsibility. I shall content myself by voting against it. It is wrong.

Mr. GROSVENOR. Mr. Speaker, I want to ask the gentleman from Texas a question.

Mr. STEPHENS of Texas. Certainly.

Mr. GROSVENOR. Are you acquainted with the town of El Paso?

Mr. STEPHENS of Texas. I am well acquainted with that town.

Mr. GROSVENOR. How many people are there in El Paso?

Mr. STEPHENS of Texas. About 15,000. I will state this further, that the portion of the town that has been flooded is occupied entirely by poor people. Their houses were situated under this levee, and, as I have said, they have been washed out. The houses were adobe, made of sun-dried brick. They melt at once when the waters have surrounded them. The levee, I will state, was thrown up by the city, and these people built their homes under that levee.

Mr. FERGUSSON. Mr. Speaker, I also am well acquainted with that valley of the Rio Grande, and with the condition existing at El Paso, which is just across the river from New Mexico. This flood has been caused by unusual warm spring rains in the mountains of Colorado and New Mexico. It is just like the Johnstown flood again. The houses that have been washed away——

Mr. DALZELL. I would like to say to the gentleman that the Johnstown flood sufferers were taken care of by the people of the State of Pennsylvania.

A MEMBER. They were helped by the whole country.

Mr. TERRY. They were assisted by people all over the United States. I know they were from my town.

Mr. DALZELL. I think not.

Mr. FERGUSSON. The second ground upon which this resolution ought to be passed is that this is a very unusual flood, because all the snows in the mountains have been washed away at one time. The melted snow has poured down the valley, and the houses that have been washed away are not able to resist a flood. Floods in that country are not at all usual. These houses are built of adobe, and the moment the water strikes the foundation the whole house crumbles and falls into the flood. I am also acquainted with the people who live in the district which has been flooded, and am able to say that they are the poorest class of citizens in that town. I believe that this is a meritorious proposition, and from the facts stated to me and as published in the papers there are not less than 3,000 people who are sufferers from the flood. This information I get from sources independent of that which the gentleman has had read here.

In reference to the Johnstown flood, I will remind the gentleman that contributions were sent in from the whole country to assist at that time.

Mr. SLAYDEN. Mr. Speaker, I also am very familiar with the condition that exists upon the Rio Grande. I know that the unfortunate people who have suffered the loss of practically all the property that they possessed in the world in this flood are composed of the poorest people, possibly, in this entire Union, people least able to meet misfortunes of that sort; and I do hope that in this instance, in view of the present misfortunes and great distress prevailing there, that the House will not abandon the precedent which was established the other day in sending a large contribution from the country, backed up by public expenditures, to the people of India, a dependency of that country which boasts itself to be the richest in the world.

If this Congress can afford to vote money to relieve the sufferings of the East Indian people, it certainly can afford to help to sustain temporarily 3,000 of the people of our own country who have had their homes and fortunes washed away by a flood.

Mr. HILL. I wish to ask a question for information. I understand that this flood occurred about a week ago. Has the city of El Paso, with its 15,000 inhabitants, or has the State of Texas contributed anything officially for the relief of the sufferers; or is this application to Congress the first movement that has been made to relieve them?

Mr. SLAYDEN. I can not say whether the municipality of El Paso itself has contributed or not, but I know that the citizens of El Paso have done so.

Mr. HILL. Oh, the citizens always contribute under such circumstances.

Mr. BALL. Mr. Speaker, in reply to the inquiry of the gentleman from Connecticut, I will say that the governor of the State of Texas, replying to a telegram from the mayor of El Paso, stated that he would lay the matter before the State of Texas, and I have no sort of doubt that they will do their duty and do it liberally.

Mr. CANNON. Was the legislature in session?

Mr. BALL. It was not in session at the time.

Mr. HILL. It seems to me that Congress might very well wait until action is taken by the State of Texas in this matter.

Mr. FERGUSSON. I will state in reply to the gentleman that the legislature of the State of Texas has appropriated $5,000.

Mr. FISCHER. Cash? [Laughter.]

The SPEAKER. Is there objection to the present consideration of this joint resolution?

There was no objection.

Mr. CANNON. Mr. Speaker, I offer a substitute for the joint resolution, and after it is read I shall ask to be heard for a moment.

The proposed substitute was read, as follows:

Joint resolution reappropriating the sum of $10,000 not expended for the relief of sufferers by the floods of the Mississippi River.

Resolved by the Senate and House of Representatives, etc., That so much of the appropriation made by the joint resolution approved April 7, 1897, for the relief of sufferers by the overflow of the Mississippi River and its tributaries as remains unexpended, not exceeding the sum of $10,000, may be used by the Secretary of War in the purchase and distribution of subsistence and payment for necessary transportation to aid in the relief of destitute persons in the district overflowed by the Rio Grande River in the vicinity of El Paso, Tex.

Mr. STEPHENS of Texas. Mr. Speaker, I will ask the gentleman whether that money is at present available?

Mr. CANNON. Mr. Speaker, I ask to have read the telegram which I send to the desk.

The telegram was read, as follows:

WAR DEPARTMENT, *June 1, 1897.*

To Hon. J. G. CANNON:

About $94,000 of flood sufferers' appropriation remains unexpended.

SULLIVAN, *Commissary-General.*

Mr. CANNON. Now, Mr. Speaker, a word. We appropriated, if I recollect aright, $150,000 for the relief of the flood sufferers in the Lower Mississippi Valley. The appropriation was extended so as to apply to sufferers from the overflow of the Red River of the North, but as I understand (relying upon newspaper reports) no portion of that money was in fact expended for the flood sufferers along the Red River of the North.

There was, however, a portion of the $150,000 expended for the relief of the flood sufferers of the Lower Mississippi. Gentlemen understand that from Cairo south to the Gulf the Mississippi River passes through many States and that the bottoms on each side extend to an average of from 60 to 100 miles, so that the great body of water which comes down that river in flood time sweeps over large portions of the valley, where there are many poor people, and the legislatures of many of the States not being in session at such time, there is great suffering.

Having these facts in view, Congress made an appropriation for relief. I am glad to say that it seems not to have been necessary to expend more than about one-third of that appropriation in taking care of the suffering in that great section of country reaching from Cairo to the Gulf. Now, I do not object to the consideration of the pending resolution, but I want to submit one observation upon it. We are told that since the flood the legislature of the great Empire State of the South—and it is a great Empire State, of which its citizens are justly proud and of which the citizens of the whole country are proud—we are told that the legislature of Texas has assembled, and we are informed by another gentleman that $5,000 has been appropriated by that body for the relief of the identical sufferers.

Whether the legislature of Texas is still in session I do not know. Whether the $5,000 was sufficient I do not know. Whether there is a disposition to appropriate more I do not know. During the Administration of President Cleveland one of his most signal acts was connected with one of these relief appropriations. It was relatively, perhaps, a small matter, but it attracted attention. There was a great drought in Texas, and an appropriation was made, so far as the House and Senate could make an appropriation, for the purpose of buying seeds for distribution to the people in the area that was affected by that drought.

The then President of the United States, Mr. Cleveland, vetoed that appropriation, and, upon the whole, I believe we are all, whether in Texas or out of Texas, glad that he did veto it. It is true, Mr. Speaker, that in the presence of extraordinary calamity in this country humanity prompts us to appropriate money to relieve suffering. It is true that humanity prompted us a short time ago to make an appropriation to send supplies to relieve suffering outside of our own territory, to relieve the suffering poor in India. It is true that humanity prompted us again the other day to make an appropriation for the relief of suffering American citizens in Cuba.

Now, I am not going to oppose this appropriation, but with the Texas legislature in session, and that legislature having acted, I have some doubt as to whether this calamity is of such a grade or size as to require action by Congress. Still, if the gentleman in charge of this joint resolution, after having considered the matter, thinks that it is, I am not here to say no. I would say no, I suspect, if it were not for one consideration. Some years ago there was a great flood in the Ohio River and in the Wabash. An appropriation was made for the relief of the flood sufferers along the Ohio. Some of the money was distributed in Pennsylvania, some in Ohio, and some in Indiana. And I am sorry to

say—it has been a source of regret to every Representative, I believe, from Illinois from that time to this, and substantially to every citizen of Illinois—I am sorry to say a small measure of relief was given to some of the citizens about Shawneetown, in my State. Those citizens were suffering, it is true; yet we felt that, after all, our great and powerful Commonwealth of Illinois, rich in material prosperity, should have taken care itself of that small block of sufferers. The case was not like that of great suffering, extending over hundreds of miles, running through many States.

I wanted to say just this much—not by way of criticism, but because I felt it my duty to say it. I have offered the substitute; and, if anything passes, I hope the substitute will pass.

Mr. LOUD. Will the gentleman allow me a question?

Mr. CANNON. Certainly.

Mr. LOUD. The gentleman says he will not oppose this resolution. Are we to assume that, because we have been doing wrong in large degree in days gone by, he is willing to continue a little further, and run this sort of thing into the absurd?

Mr. CANNON. I will say to the gentleman from California [Mr. LOUD] that all my life—in an individual capacity in a small way, or in a representative capacity—when suffering from hunger or cold has appealed to me, I have been slow to say "no." [Applause.]

Mr. LOUD. That was highly commendable, if the gentleman contributed the relief out of his own pocket.

Mr. CANNON. I am not defending this proposition; but I have felt it my duty to say just what I have said.

In matters of this kind, involving the appropriation of money, Congress has unlimited power. Gentlemen on one side or the other may say that measures of this kind violate the Constitution; yet when we make an appropriation, we are the judges of the propriety of the appropriation; and there is no power to withhold the money when once appropriated. The appropriation of this sum of $10,000 is not very important one way or the other, except to the persons who may need this relief. I have made my remarks with reference to their possible effect on the future, hoping that our people everywhere will take care of the suffering citizens in their various sections, unless, in the presence of some great disaster, it may not be practicable for the local authorities to give the necessary relief.

Mr. STEPHENS of Texas. I accept the substitute offered by the gentleman from Illinois [Mr. CANNON].

The SPEAKER. The House will have to vote on the question.

Mr. FLEMING. May I ask the date of the telegram from El Paso which was read?

The SPEAKER. The telegram from the War Department is dated June 1.

Mr. FLEMING. I mean the telegram from El Paso.

The SPEAKER. The Chair is unable at present to give the gentleman the information.

Mr. FLEMING. Very well; it is not of material importance.

The question being taken, the substitute of Mr. CANNON was agreed to.

The joint resolution as amended by the adoption of the substitute was ordered to a third reading; there being—ayes 98, noes 11.

The joint resolution was accordingly read the third time, and passed.

The SPEAKER. The Clerk will read the proposed amendment to the title.

The Clerk read as follows:

Joint resolution reappropriating the sum of $10,000 not expended for the relief of the sufferers by the floods of the Mississippi River.

The amendment of the title was agreed to.

On motion of Mr. STEPHENS of Texas, a motion to reconsider the vote by which the resolution was passed was laid on the table.

PAYMENT OF HOUSE EMPLOYEES.

Mr. ODELL. On behalf of the Committee on Accounts, I ask the adoption of two resolutions which I send to the desk, affecting the business of the House.

The SPEAKER. The first resolution sent to the desk will be read.

The Clerk read as follows:

Resolved, That the Clerk of the House be, and he is hereby, directed to pay to A. E. Wurner, W. O. Detrick, L. E. Bridgeman, Joseph Hannan, Frederick Elleby, P. B. Johnson, George Cluggish, D. J. Williams, and Paul Bray for extra service from March 5 to March 14, inclusive, in the House post-office for such services, at the rate of $100 per month each.

The SPEAKER. Is there objection to the consideration of this resolution?

Mr. RICHARDSON. I hope the gentleman from New York [Mr. ODELL] will make some explanation, the right of objection being meanwhile reserved.

Mr. ODELL. The resolution has the approval of the Committee on Accounts.

Mr. BARTLETT. Allow me to state that the gentlemen named in this resolution did special work necessary to be done from the beginning of this session until March 14, inclusive—ten days; they did it with the understanding that they were to be paid, and it is right that they should be paid. The Committee on Accounts has approved the resolution.

Mr. CANNON. As I understand, this service would not have been performed, except in contemplation of the extra session.

Mr. BARTLETT and Mr. ODELL. That is true.

There being no objection, the House proceeded to the consideration of the resolution; which was adopted.

On motion of Mr. ODELL, a motion to reconsider the last vote was laid on the table.

The SPEAKER. The Clerk will now read the other resolution sent to the desk by the gentleman from New York [Mr. ODELL].

The Clerk read as follows:

Resolved, That the Postmaster be, and he is hereby, authorized to employ three messengers, at $100 per month each, during the sessions of the Fifty-fifth Congress, to be paid out of the contingent fund of the House.

The SPEAKER. Is there objection to the present consideration of this resolution?

Mr. SAYERS. Let us have some explanation of it.

Mr. ODELL. This resolution contemplates the reemployment of messengers who have heretofore been employed in the post-office during the sessions of the House. There is at present no provision for the pay of these messengers, although they are rendering service. This resolution is to provide for their compensation during the sessions of the House.

Mr. SAYERS. These are not additional officers to those heretofore employed?

Mr. ODELL. Two of these gentlemen have been provided for regularly. The Postmaster has asked for one additional messenger. His letter to me can be read.

The Clerk read as follows:

HOUSE OF REPRESENTATIVES, UNITED STATES,
Washington, D. C., April 15, 1897.

SIR: At your earliest convenience please secure the passage of a resolution to provide for the employment and payment of three messengers to serve in the House post-office through the sessions of the Fifty-fifth Congress only, at salaries of $100 a month.

Two of these messengers are now in the service, having been employed in the Fifty-fourth Congress. They were continued from the first day of the present extra session, but they can draw no pay until the resolution authorizing their employment has been passed.

It has been the custom for years, at the beginning of the first session of Congress, to authorize by resolution the employment of two additional men for the House post-office. One of these, however, has been classed and paid as a laborer, while in fact he has at all times performed the duties of messenger, and it seems but reasonable that he should be sworn and paid as messenger.

I now renew the request made at the first session of the Fifty-fourth Congress, that three extra or additional messengers be authorized in place of two, as heretofore. The increasing amount of mail matter, documents, and seeds coming through this office makes it absolutely necessary for the convenient and efficient handling of the Congressional mails that an additional messenger be added to the force in the House post-office.

This will be apparent to any member of Congress who will take the pains to call at the office and examine the records kept there, and the documents handled and accounted for daily by a single man, all this in addition to distributing and delivering four mails daily to 200 Congressmen, with no assistance save what the messenger who carries the branch mail from the Capitol to the city post-office can furnish.

The following session messengers were employed in the House post-office through the vacation, from March 5 to March 14, inclusive, but no appropriation has been made to pay them; they are each entitled to ten days' pay, at the rate of $100 a month, to wit: A. E. Werner, W. O. Detrick, L. E. Bridgeman, Joseph Hannam, Frederick Elleby, P. B. Johnson, George Cluggish, D. J. Williams, Paul Bray.

The above-named messengers are a part of the regular post-office force, and their services were indispensable to keep up the work and handle the unusually heavy mails, augmented as they were at the time by the presence of 125 ex-members' mails, which we were compelled to handle and forward to their respective homes, etc. So great was the increase of Congressional mails in the month of March that the postmaster at the city office was compelled to increase his force in that department.

Please include in a resolution an appropriation for the payment of these nine messengers who served through the vacation from March 5 to 15.

Yours, very respectfully,

J. C. McELROY,
Postmaster House of Representatives.

Hon. B. B. ODELL,
Chairman Committee on Accounts, House of Representatives.

There being no objection, the House proceeded to the consideration of the resolution; which was adopted.

On motion of Mr. ODELL, a motion to reconsider the last vote was laid on the table.

BRIDGE ACROSS THE CLINCH RIVER, TENNESSEE.

Mr. RICHARDSON. I ask unanimous consent for the present consideration of the bill (S. 1944) to authorize the construction of a bridge across the Clinch River, Kingston, Tenn.

The bill was read, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the county of Roane, in the State of Tennessee, in its corporate capacity, is hereby authorized and empowered to construct and maintain a bridge over and across the Clinch River at or near the town of Kingston, so as to connect said town of Kingston with the opposite or north bank of said river.

SEC. 2. That said bridge shall be so constructed that a reasonably free and unobstructed passageway may be secured to all water craft navigating said river at the point aforesaid: and if said bridge shall be constructed as a draw-bridge, the draw shall be opened promptly, upon reasonable signal, for the passage of boats and vessels; and whatever kind of bridge is constructed, the

owners thereof shall maintain, at their own expense, from sunset to sunrise, such lights or other signals thereon as the Light-House Board shall prescribe.

SEC. 3. That said bridge shall not be built or commenced until the plans and location of the same shall have been approved by the Secretary of War; and no change shall be made in this construction, and no alteration of it shall be made after its construction, unless such change or alteration shall in like manner receive the approval of the Secretary of War.

SEC. 4. That the Secretary of War, upon receiving the design, drawings, and specifications of said bridge, and a map of the location, and such other information as he may call for, and upon being satisfied that the bridge, when built according to such designs and drawings, will be in accordance with the requirements of this act, and will not unreasonably obstruct the navigation of said river, be, and is hereby, authorized and directed to approve said design, drawings, and specifications, and to so notify said county of Roane. Upon receiving such notification the said county of Roane may proceed to construct said bridge, conforming strictly to the approved design, drawings, and specifications.

SEC. 5. That any bridge built under this act, according to its limitations, shall be a lawful structure, and shall be recognized and known as a post route, upon which the mails, troops, and munitions of war of the United States shall be transmitted free of charge.

SEC. 6. That the right is hereby expressly reserved to alter, amend, or repeal this act.

SEC. 7. That this act shall be null and void if actual construction of the bridge herein authorized be not commenced within one year and completed within three years from the date hereof.

Mr. PAYNE. Is this bill in the usual form, and has it been submitted to the Secretary of War?

Mr. RICHARDSON. I so understand. The matter has been more immediately under the charge of my colleague [Mr. BROWNLOW], but I am informed by him that such is the fact.

Mr. GROSVENOR. Reserving the right to object, I wish to inquire of the gentleman from Tennessee [Mr. RICHARDSON] whether he does not think this bill ought to go to a committee to be examined before we pass it? [Laughter.]

Mr. RICHARDSON. This is a very simple bill, and I think it can safely be passed without reference to a committee.

Mr. GROSVENOR. If the gentleman thinks it ought to pass, I will not object.

There being no objection, the House proceeded to the consideration of the bill; which was ordered to a third reading, read the third time, and passed.

On motion of Mr. RICHARDSON, a motion to reconsider the last vote was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. BARNEY, indefinitely, on account of important business.

To Mr. STURTEVANT, for two weeks, on account of important business.

To Mr. MCCORMICK, for fifteen days, on account of sickness.

To Mr. HENRY of Indiana, until June 22, on account of important business.

Mr. PAYNE. I move that the House adjourn.

The motion was agreed to; and accordingly (at 3 o'clock and 50 minutes p. m.), the House adjourned, pursuant to its standing order, until Monday next at 12 o'clock noon.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. SLAYDEN: A bill (H. R. 3402) to provide for the extension of the thoroughfare known as Dwyer avenue, San Antonio, Tex., through the property of the United States known as the arsenal grounds, in said city—to the Committee on Military Affairs.

By Mr. HENRY of Texas: A bill (H. R. 3403) to amend section 5278 of the Revised Statutes of the United States—to the Committee on the Judiciary.

By Mr. KETCHAM: A joint resolution (H. Res. 62) authorizing and requiring the Secretary of War to contract with Charles Stoughton for the improvement of the Harlem Kills, New York City, by a canal to connect the lower Harlem River with Long Island Sound, 3,400 feet in length, 300 feet in width, and 15 feet in depth, at mean low water, or by a similar canal 18 feet in depth at mean low water, in strict conformity with the survey and report made thereon in 1881 by Col. John Newton—to the Committee on Rivers and Harbors.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. BABCOCK: A bill (H. R. 3404) granting a pension to Second Lieut. Henry Fenner—to the Committee on Invalid Pensions.

By Mr. BOTKIN: A bill (H. R. 3405) granting a pension to James J. Darnall—to the Committee on Invalid Pensions.

By Mr. COOPER of Texas: A bill (H. R. 3406) for the relief of the heirs of Valentine Burch, deceased—to the Committee on Claims.

Also, a bill (H. R. 3407) to confirm certain Rio Hondo claims unto Pedro Flores, Elizabeth Lafitte, Maria Cordova, Louis Lafitte, Antoine Dubois, and Vital Flores—to the Committee on Private Land Claims.

By Mr. HUNTER: A bill (H. R. 3408) to increase pension of James A. McGaughey—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3409) granting a pension to Emma M. Elliott—to the Committee on Invalid Pensions.

By Mr. LIVINGSTON: A bill (H. R. 3410) granting a pension to James R. Ward—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3411) granting a pension to George D. Boyd—to the Committee on Invalid Pensions.

By Mr. LOUDENSLAGER: A bill (H. R. 3412) for the relief of the heirs of certain seamen lost in the foundering of light vessel No. 37—to the Committee on Claims.

By Mr. PRINCE: A bill (H. R. 3413) granting an honorable discharge to Robert Henry McNeal—to the Committee on Military Affairs.

By Mr. SHAFROTH: A bill (H. R. 3414) to increase the pension of Henry H. Geiger—to the Committee on Invalid Pensions.

By Mr. TAYLER of Ohio: A bill (H. R. 3415) granting an honorable discharge to Benjamin F. Hildenbittle—to the Committee on Military Affairs.

Also, a bill (H. R. 3416) restoring to the pension rolls the name of Mary A. Rusher—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3417) granting an honorable discharge to William Sinclair—to the Committee on Military Affairs.

Also, a bill (H. R. 3418) granting an honorable discharge to David Clancy—to the Committee on Military Affairs.

Also, a bill (H. R. 3419) granting an honorable discharge to George G. Patterson—to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ACHESON: Petitions of L. A. Rice and other citizens of Duquesne; Robert V. Malone and others, of Canonsburg; Clark G. Reece and others, of Wooddale, and R. S. Shannon and others, of Boston, in the State of Pennsylvania, favoring the passage of a bill to further restrict immigration—to the Committee on Immigration and Naturalization.

By Mr. BENNER of Pennsylvania (by request): Petition of the Brotherhood of the Union, in favor of American ownership of American land, and for other purposes—to the Committee on Labor.

Also, petitions of citizens of Carlisle, Gettysburg, York, Riverton, and Dallastown, State of Pennsylvania, favoring the passage of a bill for the further restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. BURTON: Resolution of the Tippecanoe Club, of Cleveland, Ohio, protesting against the passage of House bill No. 30 and Senate bill No. 1575, restricting the right to buy and sell railroad tickets—to the Committee on Interstate and Foreign Commerce.

By Mr. CLARKE of New Hampshire: Petition of 52 citizens of Gilsum, N. H., asking for legislation restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. GAINES: Petition of bankers, merchants, and other citizens of Nashville, Tenn., asking for reform in currency and banking laws—to the Committee on Banking and Currency.

By Mr. HENRY of Connecticut: Petition of citizens of Coventry, Conn., for free delivery of mails in country districts—to the Committee on the Post-Office and Post-Roads.

By Mr. HOWELL: Petitions of 78 citizens of Neptune Township and of 17 citizens of Milestone Township, Monmouth County, N. J., urging the enactment of legislation restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. KIRKPATRICK: Petition of Almer C. Huff and other citizens of Bethlehem, Pa.; also petition of Frank F. Heller and others, of Hecktown, Pa., favoring the passage of an immigration bill similar to that passed in the Fifty-fourth Congress, vetoed by President Cleveland—to the Committee on Immigration and Naturalization.

By Mr. MCCLEARY: Protest of the William Bierbauer Brewing Company, of Mankato, Minn., against the proposed increase in the tax on beer—to the Committee on Ways and Means.

By Mr. MEYER of Louisiana: Resolutions of the Louisiana Sugar Planters' Association, in favor of the abrogation of the Hawaiian reciprocity treaty—to the Committee on Foreign Affairs.

By Mr. POWERS: Petition of citizens of Bethel, Windsor County, Vt., praying for the passage of a bill restricting immigration—to the Committee on Immigration and Naturalization.

By Mr. PRINCE: Petition of F. C. Phillips and 100 other citizens of Moline, Ill., for a more rigid immigration law—to the Committee on Immigration and Naturalization.

Also, petition of brewers of Peoria, Ill., protesting against an increased revenue tax on beer—to the Committee on Ways and Means.

By Mr. ROBINSON of Indiana: Petition of machinists of Garrett, Ind., to investigate the discharge of union men at the Brooklyn Navy-Yard—to the Committee on Naval Affairs.

By Mr. WILLIAM A. STONE: Petition of George H. Greiner and other citizens of Carnot, Allegheny County, Pa., favoring more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

SENATE.

FRIDAY, *June 4, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. HOAR, and by unanimous consent, the further reading was dispensed with.

PAYMENTS TO CHEROKEE FREEDMEN.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, in response to a resolution of the 25th ultimo, copies of all papers in relation to the payment, and of the correspondence in connection therewith, showing the reason why the payment to the Cherokee freedmen was suspended, and the action taken by the Department to complete the same; which, with the accompanying papers, was referred to the Committee on Indian Affairs, and ordered to be printed.

REPORTS OF COMMITTEES.

Mr. STEWART, from the Committee on Claims, to whom was referred the bill (S. 759) for the relief of William H. Crook, reported it without amendment, and submitted a report thereon.

Mr. WARREN, from the Committee on Claims, to whom was referred the bill (S. 1016) for the relief of the Atlantic Works, of Boston, Mass., reported it without amendment, and submitted a report thereon.

Mr. PRITCHARD, from the Committee on Civil Service and Retrenchment, to whom was referred the amendment submitted by Mr. GALLINGER on the 20th ultimo, intended to be proposed to the general deficiency appropriation bill, reported it with amendments, and moved that it be referred to the Committee on Appropriations and printed; which was agreed to.

Mr. TILLMAN, from the Committee on Interstate Commerce, to whom was referred the bill (S. 224) to limit the effect of the regulation of commerce between the several States and with foreign countries in certain cases, reported it with amendments.

BILLS INTRODUCED.

Mr. PETTIGREW introduced a bill (S. 2073) to reward certain Sioux Indians for the rescue of white captives, and their compensatory payment of ponies; which was read twice by its title, and referred to the Committee on Indian Affairs.

Mr. WHITE introduced a bill (S. 2074) providing for the erection of an addition to the public building at Los Angeles, Cal., and appropriating money therefor; which was read twice by its title, and referred to the Committee on Public Buildings and Grounds.

AMENDMENTS TO DEFICIENCY APPROPRIATION BILL.

Mr. STEWART submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. STEWART. I present two letters to accompany the amendment just submitted by me, which I move be printed as a document and referred to the Committee on Appropriations.

The motion was agreed to.

Mr. SMITH submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was ordered to be printed, and, with the accompanying papers, referred to the Committee on Appropriations.

ASSISTANT CLERK TO COMMITTEE ON FOREIGN RELATIONS.

Mr. DAVIS submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Foreign Relations have authority to employ an assistant clerk, to be appointed by its chairman and to be paid at the rate of $1,440 a year out of the contingent fund of the Senate.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries, announced that the President had on the 1st instant approved and signed the following joint resolutions:

A joint resolution (S. R. 43) in amendment of the joint resolution of April 7, 1897, authorizing the Secretary of the Navy to transport contributions for the relief of the famishing poor of India; and

A joint resolution (S. R. 44) making an appropriation to supply a deficiency in the appropriations for public printing and binding for the fiscal year 1897.

REPORT OF THE COMMISSIONER OF LABOR.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, with the accompanying papers, referred to the Committee on Education and Labor, and ordered to be printed.

To the Senate and House of Representatives:

I transmit herewith the ninth special report of the Commissioner of Labor, which report relates to the social and economic condition of the Italians in Chicago.

WILLIAM MCKINLEY.

EXECUTIVE MANSION,
Washington, D. C., June 4, 1897.

THE TARIFF BILL.

The VICE-PRESIDENT. The morning business appears to be closed.

Mr. ALLISON. I move that the Senate proceed to the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The VICE-PRESIDENT. Is there any objection to the motion of the Senator from Iowa? The Chair hears none, and the bill is before the Senate as in Committee of the Whole.

Mr. MANTLE. I gave notice the other day that I would like to address the Senate with particular reference to Schedule K, or what is known as the wool schedule, and if there is no objection I will now proceed with my remarks upon that subject.

Mr. PETTIGREW. I suggest the absence of a quorum.

The VICE-PRESIDENT. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allison,	Gallinger,	Kenney,	Quay,
Bate,	Gear,	McMillan,	Rawlins,
Berry,	Gorman,	Mallory,	Shoup,
Burrows,	Gray,	Mantle,	Spooner,
Carter,	Hanna,	Mills,	Stewart,
Chandler,	Harris, Kans.	Mitchell,	Thurston,
Clay,	Hawley,	Perkins,	Vest,
Davis,	Heitfeld,	Pettigrew,	White.
Faulkner,	Hoar,	Pettus,	
Frye,	Jones, Ark.	Pritchard,	

The VICE-PRESIDENT. Thirty-eight Senators have answered to their names. No quorum is present.

Mr. GRAY. I move that the Sergeant-at-Arms be directed to request absent members to attend the session of the Senate.

The motion was agreed to.

The VICE-PRESIDENT. The Sergeant-at-Arms will execute the order of the Senate.

After a little delay, Mr. TILLMAN, Mr. CULLOM, Mr. CANNON, Mr. COCKRELL, Mr. SEWELL, Mr. CHILTON, and Mr. MORGAN entered the Chamber and answered to their names.

The VICE-PRESIDENT. Forty-five Senators have answered to their names. A quorum is present.

Mr. GRAY. I move that the order to the Sergeant-at-Arms, made a moment ago, be vacated.

The motion was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the bill (S. 1944) to authorize the construction of a bridge across the Clinch River, Kingston, Tenn.

The message also announced that the House had passed the joint resolution (S. R. 45) authorizing the Secretary of War to use rations for the relief of destitute persons in the district overflowed by the Rio Grande River at and near El Paso, Tex., with an amendment in which it requested the concurrence of the Senate.

PUBLIC BUILDING AT WILKESBARRE, PA.

Mr. QUAY. The Senator from Montana is entitled to the floor to make some remarks on the pending tariff bill, and he has consented to yield to me for the purpose of calling up the bill (S. 1271) for a public building at the city of Wilkesbarre, Pa., and appropriating money therefor, the bill which I had laid over two or three mornings at the request of the Finance Committee.

The VICE-PRESIDENT. Is there objection to the present consideration of the bill indicated by the Senator from Pennsylvania?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to purchase by private sale or secure by condemnation a site for and cause to be erected thereon a suitable building, with fireproof vaults therein, for the accommodation of the United States post-office and other Government offices at the city of Wilkesbarre, county of Luzerne, Pa. The plans, specifications, and full estimate for the building shall be previously made and approved according to law, and shall not exceed for the site and building complete the sum of $225,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RELIEF OF SUFFERERS BY OVERFLOW OF THE RIO GRANDE.

Mr. MILLS. A joint resolution has just been returned from the House of Representatives that passed the Senate the other day providing for the relief of sufferers by the overflow of the Rio Grande. As it is a matter of pressing importance, I ask that the joint resolution may be taken up and the amendments of the House concurred in.

The VICE-PRESIDENT. The Chair lays before the Senate the amendments of the House of Representatives to the joint resolution (S. R. 45) authorizing the Secretary of War to use rations for the relief of destitute persons in the district overflowed by the Rio Grande River at and near El Paso, Tex.

The amendments of the House of Representatives were to strike out all after the resolving clause and insert:

That so much of the appropriation made by the joint resolution approved April 7, 1897, for the relief of sufferers by the overflow of the Mississippi River and its tributaries as remains unexpended, not exceeding the sum of $10,000, may be used by the Secretary of War in the purchase and distribution of subsistence and payment for necessary transportation to aid in the relief of destitute persons in the district overflowed by the Rio Grande River in the vicinity of El Paso, Tex.

And to amend the title so as to read: "A joint resolution reappropriating the sum of $10,000 not expended for the relief of the sufferers by the floods of the Mississippi River."

The VICE-PRESIDENT. The question is on concurring in the amendments made by the House of Representatives to the joint resolution.

The amendments were concurred in.

PETITIONS AND MEMORIALS.

Mr. NELSON presented a petition of the Union Veterans' League of Minneapolis, Minn., praying for the repeal of the present civil-service law; which was referred to the Committee on Civil Service and Retrenchment.

Mr. LODGE presented a petition of 19 citizens of Marblehead, Mass., praying for the passage of the so-called Lodge immigration bill; which was ordered to lie on the table.

He also presented a memorial of 33 shipowners of Boston, Mass., remonstrating against lowering the duties on aniline colors; which was ordered to lie on the table.

He also presented a petition of 33 citizens of South Hadley Falls, Mass., and a petition of 76 citizens of Boston, Mass., praying for the speedy passage of the pending tariff bill; which were ordered to lie on the table.

Mr. FORAKER presented 55 petitions, containing 3,608 signatures of railway employees in the United States, praying for the passage of Senate bill No. 1479, to amend an act entitled "An act to regulate commerce," approved February 4, 1887; which were referred to the Committee on Interstate Commerce.

THE TARIFF BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. MANTLE. Mr. President, I should not have presumed to take up the time of the Senate with a discussion of the wool question at this time but for the fact that, owing to the very brief time allotted for the discussion of the pending measure in the other branch of Congress, the wool schedule was not reached at all, hence no discussion whatever of this most complicated and important of all the tariff schedules was had in the debate in that body, and no public opportunity was therefore afforded for the presentation of the woolgrowers' side of the question.

If the provisions of the House bill or of the Senate amendments had been at all satisfactory to the million or more men engaged in this industry, there would, of course, be no necessity for me to ask the indulgence of the Senate, but as both the House and Senate provisions are regarded by the woolgrowers as utterly inadequate to afford them the protection they require, and which has been promised them, it is manifestly the duty of some one here to speak in their behalf. There are many here who could do this far more ably and effectively than I can hope to, but as I have the honor to represent in part the largest sheep-owning and wool-producing State in the Union, it is perhaps not inappropriate that I should undertake the task, which I do, however, with many misgivings as to my ability to discharge it in a manner befitting the extent and magnitude of the interests concerned.

WHAT IS JUST AND PROPER.

The question of what are just and proper duties to be laid upon the different classes of wool is one of the most important we have to consider for many reasons, chief among them being that, in so far as the universal lowering of prices, shrinkage of values, and consequent loss and suffering which have prevailed for the past few years may have resulted from adverse tariff legislation, the woolgrowers of the country have been peculiarly and disastrously affected. This statement is borne out fully by the statistics bearing upon sheep and wool production, which show that since 1893 there has been a decrease in the number of sheep in the country of 10,809,148, and a loss in their value of $63,919,776. Last year the domestic wool clip had decreased in amount 76,063,430 pounds as compared with the wool clip of 1893. The farm value of the American wool production in 1892 was $47,185,283. In 1896 it had fallen to $20,800,000. The total estimated loss of the woolgrowers upon wool in the last four years, as compared with the prices of 1892, has reached the enormous sum of $178,793,121.

Of course I do not pretend to assert that all this loss is due to the free-wool provisions of the Wilson law. Much of it is, beyond doubt, attributable to the constant fall of prices which has been going on all over the world since 1891-92, due to the general depression which has existed everywhere, as well as to increased production. It can not, however, be denied that under adequate protection the number of sheep and the quantity of wool produced have always steadily increased, and there is no reason to doubt but that with a just protective tariff, which shall be so framed and adjusted that the protective benefit will actually reach the woolgrower, instead of finding its way into the pocket of the importer and manufacturer, the flocks of sheep will increase and the production of wool gradually be enlarged, until finally the principle of protection as applied to this most important industry will find its vindication, just as it has in the steel-rail industry, so well described by the distinguished Senator from Rhode Island in his opening speech the other day, and just as we hope it will in the near future find its vindication in the development of the sugar-growing and other industries.

Another reason why the wool duty is important is because the great body of men engaged in producing it, numbering from one to two millions, are farmers, and I think it will be admitted that no class of our citizens are more entitled to the earnest consideration of the Congress of the United States than they are. They constitute the foundation upon which all our commercial and industrial interests rest; and unless they are made fairly prosperous, there can be no permanent prosperity for this country. Unfortunately, from the nature of their occupation, the character of their products, and the circumstances of their environment, the benefits of a protective tariff can not, in a large number of instances, be conferred directly upon them. A large surplus of their chief products can find no market at home, and is therefore compelled to seek the open markets of the world, there to compete with the products of the cheap labor of other lands and to be sold at prices which practically fix their prices at home. Hence, whenever a protective tariff is framed, it should miss no just opportunity to correct, in so far as tariff legislation may accomplish it, these disadvantages under which this numerous element of our people rest.

Then, again, it is well known that in anticipation of tariff legislation the woolgrower is being injured beyond all others whose interests are affected by the enormous quantities of wool which have been and are now being imported. A careful computation, based upon the known stock on hand, and taking into account the increase in domestic production and consumption, shows that if not another pound of wool should be imported there would still be a surplus of at least 100,000,000 pounds on hand January 1, 1899. It can, therefore, readily be seen that under the most generous treatment the American woolgrower is likely to receive but slight benefit from a tariff for three years to come.

We must bear in mind, also, that when a tariff law is to be enacted the powerful manufacturing interests of the country, with their compact and effective organizations, are always to be found upon the ground pressing their claims and pushing their interests at every opportunity, while upon the other hand the farmer and the woolgrower, and the producers of what is called "raw material" generally, are from the very nature of their vocation, which widely separates and isolates them, lacking in this essential particular. Hence their interests are not always presented with the same force and persistency and plausibility as are the interests of others. The result of this has been that in past protective-tariff legislation they have not always received the consideration which was due them in fairness and equity.

But, Mr. President, because I speak of the unfortunate condition of the farmers of the country I do not wish anyone to think that I do so from any desire to pander to any prejudice, to draw any class lines, or to create any class distinctions among the people. I realize that there is depression and suffering everywhere, in the cities as well as in the country, in the factories as well as upon the farms, and that all are entitled to whatever relief can possibly come to them through tariff legislation. But I do sincerely believe that there is greater stringency and more poverty and suffering in many of the agricultural sections of the country than is generally supposed or known.

In this connection, I want to present a letter, which I shall not stop to read, written by Hon. William E. Dodge, of New York. Mr. Dodge was a delegate to the late Indianapolis monetary convention—a gold delegate. His letter treats of the conditions which exists in the country among the agricultural classes particularly,

and he gives a most vivid picture of the conditions as related to him by delegates to that convention congregated from all over the Union. The letter treats more particularly of monetary conditions, and as I do not care to mix up these questions, I will simply insert the letter, and I trust it will be read.

I was fortunate enough to be appointed as one member of the delegation to Indianapolis, and while acting on the committee on rules and regulations, to which all the business was referred, I was shut up for two days with representatives from twenty-eight different States, and I had an opportunity of free and unrestricted intercourse and conference with those gentlemen, and the information received there was confirmed afterwards in Washington, where, as chairman of the arbitration committee, I had conferences with a number of Senators from those same States, and I came back very deeply impressed with the conviction that I had not been entirely informed, and those living in the East were not entirely informed, as to the condition of things in very large portions of our country.

I was surprised, sir, to find the assertion constantly made by men from the far Western States and the South and Southwestern States that it was not Mr. Bryan and that it was not silver that they were in favor of, but they needed some change to bring relief from the terrible condition of poverty and scarcity of money under which they labored. They felt that their condition was so extreme and so painful that any change would be of value, and when I came to look into the matter and to talk in a friendly and kindly way with them, they all confirmed the same feeling which I had found at a long conversation in the Treasury Department at Washington, that the circulation of the country is quite out of joint, that the lungs and heart are congested, and that the extremities of the country are absolutely without any blood.

I found that there were great sections of the Southern and Western country where there was absolutely no money at all; where the most primitive forms of barter obtained; where everything was most disorganized. One gentleman told me that in his county, which was quite a rich agricultural country, by some happy accident a fifty-dollar bank bill had come down into the county and that he had taken a horse and buggy and spent four days in visiting all the towns in the county striving to get it changed into smaller bills, but had been unable to do so, and finally was obliged to send it to Richmond. There were Senators who told me that their constituents never saw a dollar of money from the beginning of the year to the end, with the result that they had constantly to go into debt to the local storekeepers. The local storekeepers received their pay in kind. In fact, everything was drifting back to the old times before money was invented. And this was not in one section of the country only, but in large sections.

We can quite easily understand that where there is not sufficient money to establish a national bank under the very onerous laws at present in force, there is nothing else to take the place. The same difficulty has come up in other parts of the world.

In this country every man has a chance to care for the Government, and unless we instruct our good friends and show our sympathy with them and understand that when any part of the country suffers the whole country suffers, we are sure to have difficulty ahead. It was brought out at the Indianapolis convention that after the first sad, serious mistake made necessary by the exigencies of the civil war, we had gone on with makeshifts ever since. One bit of legislation necessary to bridge us over a particular crisis has been met with another; with every issue of bonds and of greenbacks, and with every other form of currency, legislative enactments have been made, and they contradict and overlap each other, and the business of the Treasury is exceedingly hard and difficult.

I came away from Indianapolis with this very firm impression, and I have only ventured to submit it because I feel it so deeply that unless those of us in more favored parts of the country understand the condition of our brothers and our fellow-citizens in the other parts of the country, unless we wisely instruct and educate them and bring about some wise methods for their relief, when the year 1900 comes we shall be swamped by an infinitely more powerful vote against us than during this last election. I think the change will be a very serious one. Every man that I met emphasized that fact. Therefore I make the motion that a committee be appointed to act with that commission, so that we can bring back to New York and to our friends here such information as may lead them to give their advice and experience and help to any wise efforts determined upon by the Government. [Applause.]

Here it is appropriate to say:

"Princes and lords may flourish or may fade,
A breath can make them, as a breath has made;
But a bold peasantry, their country's pride,
When once destroyed, can never be supplied."

Mr. President, a very effective way in which the farmers can be aided is to create, if possible, a home demand for some of their surplus products. This, of course, is the understood purpose and intent of protective legislation in general, but it can, to some extent, be given direct and almost immediate effect by affording to the woolgrower such practical and effective protection as will at once stimulate the growth of sheep.

With its present population, this country requires annually 630,000,000 pounds of wool, to produce which would require from 110,000,000 to 125,000,000 sheep. With this number of sheep upon the farms and ranches of this country, a market would be created for the surplus crops of corn, oats, and hay which are now rotting and wasting in the granaries and in the stacks in Ohio and Michigan and Indiana and other middle Western States.

Next to being able to feed itself, there is no question so directly affecting the welfare and prosperity and independence of a nation as its ability to clothe itself. A nation that can both feed and clothe itself out of the production of its own soil and by the labor of its own citizens occupies an impregnable position. It can never successfully be assailed from without, and has the best possible guaranty against dissensions within.

In this view of the subject it is therefore our duty as a nation to pursue such a policy as shall enable our people to produce all the wool necessary to clothe themselves, to the end that in this vital particular we may be independent and free from the danger and vicissitudes which await upon those who rely upon others to do for them that which they may do for themselves.

Of course, Mr. President, in making these remarks upon the subject I am speaking as one who believes in the policy of a protective tariff. I believe in the doctrine of protection as a correct economic principle for this country, as a broad national policy intended to promote the development of the resources of the nation, and, by diversifying our industries, to furnish employment for labor. Therefore it is as a protectionist that I venture to criticise the provisions of the pending tariff bill.

The great majority of the woolgrowers of the country are protectionists and Republicans. They may, I think, fairly be said to constitute the backbone of the Republican party in many of the middle West and far Western States. They have always stood by the Republican party, although they have more than once thought that the Republican party had not always stood by them in the adjustment of its tariffs. In the far West 95 per cent of them are believers in the doctrine of independent bimetallism for this country, and a large majority of those in the middle West hold the same financial views. The issues of free coinage and protection, however, were divided in the last national campaign, and those who believed in both principles were compelled to make a choice. The Republican platform contained a specific promise to the woolgrowers of "ample protection for wool" in the event of Republican success. Believing protection to be the paramount issue, and relying upon the pledge thus made to them, the woolgrowers gave their support to the Republican party; and it is beyond question that in the doubtful States of the middle West it was to this element of the Republican party, which then believed and still believes in the free coinage of both gold and silver by the independent action of this country, that the Republican party owes its victory last year.

The law of 1890 in its wool schedules was very unsatisfactory to the woolgrowers, as experience under it demonstrated that it did not afford them the necessary protection, for reasons which I will discuss later, and so they have by numerous petitions and memorials presented to this body at different times protested earnestly against its reenactment. The Republican majority in the House, however, ignoring these petitions and memorials, and despite the promise of "ample protection" contained in the national platform, have seen fit to substantially reenact the law of 1890 in relation to wool, while the Republican members of the Senate Finance Committee have shown their total disregard of their party pledges by reducing the House rates on wool of the first and second class, which is the chief product of the American woolgrower, 3 cents per pound—a cut of 25 per cent. To compensate for this wholesale reduction, they made some insignificant concessions on skirted and third-class wools, which, however, utterly fail to offset the enormous cut made on the two higher grades, particularly as all the original loopholes for fraud and evasions are still left in the bill, such as admitting washed second-class and scoured third-class wools without additional duty.

As a result of this treatment the woolgrowers of the country are naturally and justly indignant. They feel that they have asked for bread and have thus far been given a stone. They are outspoken in their condemnation of the proposed schedule of rates, and are not slow to proclaim that they have been deceived and that the pledge of "ample protection" under which their votes were secured when badly needed has already been broken by the Republicans in both branches of Congress. They believe, too, that this result has been accomplished at the behest and to satisfy the demands of the wool manufacturers, whose interests lie in securing their raw wool as cheaply as possible, while obtaining for their own products a high protective duty.

I have not the slightest ill will toward the wool manufacturers. I suppose they are simply following a natural instinct of humanity in striving to get the best of the bargain. But after reading many of their statements before the Committee on Ways and Means, to which I shall refer hereafter, I am fully convinced that very many of them are selfishly inclined to regard any duty upon wool as burdensome and injurious to their business, and their efforts now, as in the past, are in the direction of securing the lowest possible duties in opposition to the wishes of the woolgrowers.

I am sorry to feel compelled to say this, for I believe, with the distinguished Senator from Massachusetts [Mr. HOAR], that the interests of the woolgrower and the wool manufacturer are identical and ought to be one. The woolgrower knows that he can not prosper unless the manufacturer prospers. Hence he never attempts to dictate what the duty on the manufacturer's product shall be. He is quite willing that the manufacturer should have the "most ample protection" necessary to maintain his industry.

This is the condition of affairs at this moment, and I do not hesitate to predict that if the proposed wool schedule, either as presented by the House or Senate, is enacted into law it will result in the loss of thousands of votes to the Republican party. However, it is not yet too late, and I hope that my Republican friends will reconsider their action and conclude to accept amendments that shall put the measure more in accord with the woolgrowers' necessities and more in consonance with the pledges in their party platform.

In his very able address at the opening of this debate, the Senator from Rhode Island stated that "in dealing with the wool schedule the committee have suggested more liberal rates to the domestic woolgrower than they have recommended for the producer of any manufactured article in the schedule; they have also suggested for him a more effective protection than he has ever received under any tariff law of the United States at the time of its enactment."

I very much fear that with their past experience under the laws of 1883 and 1890 the distinguished Senator will have a difficult task indeed in convincing the woolgrowers of the country of the correctness of this statement, and especially as to that portion of it where he says the woolgrowers have been treated more liberally than the manufacturers. I think a full examination of the details of the subject will disprove this statement and will show that the manufacturer, as usual, will get much the best of the proposed rates as compared with the wool producer.

The Senator in charge of the pending bill further says that the committee have aimed to give the woolgrowers a rate of duty which will average from 10 to 20 per cent higher than the tariffs of 1883 or 1890. So far as I am able to discover, this statement is not borne out by the statistics on the subject.

The average ad valorem rate on first-class wools from 1884 to 1890 was 48.8 per cent, and from 1891 to 1894 it was 57 per cent.

The value per pound of importations of first-class wools for 1895 and 1896 was 16 cents. On this basis the proposed Senate rate of 8 cents would be exactly 50 per cent, and would be but 1.2 per cent higher than the tariff of 1883 and 7 per cent lower than the tariff of 1890, which was unsatisfactory to the woolgrowers and did not afford them the necessary protection. Of course, if the value per pound of wool imports rises, the ad valorem per cent will be lower; if it falls, the ad valorem per cent will be higher. But the prime consideration to be kept in mind in this connection is that because of the unusually low price of his product and the discouraging future prospects, due to the enormous stocks of wool already laid in, the woolgrower is in need of greater protection than he has heretofore received. This, of all periods, is not the time to cut him down.

The Senator from Rhode Island lays great stress upon the changes made in the carpet-wool schedule, and the advantages which he says are to accrue to the woolgrower; but here again I can find no confirmation of his expectations from an examination of the statistics bearing upon the subject after a most careful investigation. To the extent that the duties are changed from ad valorem to specific there is a direct gain to the woolgrower, but the rate proposed is so low as to not materially change the result. The average unit of value of the imports of carpet wools from 1884 to 1891 was 10.1 cents per pound. From 1891 to 1894 the average unit of value was less than 9 cents per pound.

The average unit of value in 1895 and 1896 under free wool was 9.5 cents per pound, the specific equivalent of an ad valorem rate of 32 per cent being 3.04 cents per pound. Therefore, on the basis of the import valuation under free wool, the Senate committee has increased the rate on third-class wools less than 1 cent per pound, and when we remember that these wools are to come in washed and scoured, without any additional duty, we see at once how trifling and insignificant this alleged concession is. The lowering of the dividing line of value from 13 to 10 cents per pound is of no consequence whatever, for the reason that from 1890 up to 1896, 98 per cent of all these wools have come in at an average value of about 9 cents per pound.

On the other hand, the rate of 7 cents on these wools above 10 cents in value is an actual lowering instead of raising of the rate, for the reason that the average value of imports has been not less than 15 cents per pound, which, under the ad valorem duty of 50 per cent in the House bill, would give a specific rate of 7½ cents, which would be one-half a cent a pound higher than the rate now proposed by the Senate committee's amendment. I therefore deny most emphatically that the Senate bill, as stated by the distinguished Senator from Rhode Island, "gives the American woolgrower greater and more effective protection than he has ever before received in an American tariff." It gives him far less than the act of 1890 gave him, and the woolgrower failed to prosper under that law. As bearing directly upon the statement of the Senator from Rhode Island, I here wish to have read a letter from Theodore Justice, of the wool firm of Justice, Bateman & Co., of Philadelphia. Mr. Justice is probably as well informed as any living man upon many phases of the wool question, and he takes direct issue with the Senator from Rhode Island as to the protective benefit of the proposed Senate rate.

The Secretary read as follows:

PHILADELPHIA, *May 26, 1897.*

DEAR SIR: When I had the pleasure of seeing you in Washington last week on the subject of the tariff, I showed you a table in which the imports of wool from January up to the time of the passage of the tariff bill were estimated, which revealed the fact that there would be very little revenue from wool nor protective benefits to the woolgrower until the 1st of January, 1900. The latter has an important bearing on the continuation in power of the Republican party, as it may alter the views of woolgrowers with regard to the efficacy of Republican protection to his industry.

I now have the official Treasury figures of wool imports for the first four months of this year, which greatly exceed the statements of my previous paper, and I therefore inclose herein an amended copy. In the latter I have provided for a 5 per cent annual increase in the consumption of wool over the 463,000,000 pounds which was the average of the McKinley period, which is indicated by the lower hands on the inclosed schedule. No account whatever has been taken in this calculation of the imports that will arrive between the 30th of April and the passage of the tariff bill. Without taking any of the latter into consideration, there seems likely to be over 80,000,000 pounds of wool on hand on the 1st of January, 1900.

The lesson which this table teaches is, first, that the cost of clothing to the consumer is not likely to be much increased owing to the high duties upon wool and the compensatory duties upon manufactures thereof. Therefore, the Senate need not hesitate to generously accord adequate protection to woolgrowers out of fear of the cost of clothing to the consumer being increased, for the enormous supply of cheap foreign wool now here, and being increased by daily arrivals, will keep down the price of clothing to the consumer, and will also keep down the price of domestic wool, and our woolgrowers are bound to be disappointed with the results of the new tariff under any circumstances. The least, therefore, that you can possibly do to modify his disappointment is to concede to him the benefit of the McKinley rates of the House bill on wool of the first and second classes.

Senator ALDRICH has revealed his unfamiliarity with the subject of duties upon wool in his statement on the floor of the Senate that the Finance Committee rate of 8 cents would give the woolgrower from 10 per cent to 20 per cent more protection than he had ever had at the time of the passage of any previous tariff bill. The Senator can not substantiate this statement, for if it were true, the duties would have to be from 13½ to 15 cents instead of 8 cents in order to be 10 per cent or 20 per cent more than the tariff law of 1867. They would have to be from 11 to 12 cents instead of 8 cents to be 10 per cent or 20 per cent more than the tariff law of 1883, and they would have to be from 12.2 to 13.2 cents instead of 8 cents to be 10 per cent or 20 per cent more than the tariff law of 1890.

Thus it will be seen that the Senator's recommendation with regard to wool is utterly without value, and if his suggestion were followed the present Administration would be blamed for withholding the relief which this great industry requires, an industry conspicuous for the serious injury sustained from the hand of the Cleveland Administration.

Yours, truly,

THEODORE JUSTICE.

Hon. LEE MANTLE,
United States Senate, Washington, D. C.

Mr. MANTLE. I may state, Mr. President, that Mr. Justice is a Republican and a very ardent protectionist. He has great familiarity with many branches of the wool question. I do not always agree with him in some of his conclusions, particularly with reference to the protective benefits which the woolgrowers of this country have enjoyed under former tariff acts, because I do not think he makes proper allowances for many of the disadvantages under which they labor, especially in competition with the importations of foreign wool. However, all the statistics and all the information which I can gather from an examination of the statistics bear him out in the statements made in the letter.

I also present here a valuable table prepared by Mr. Justice, showing the amount of surplus wool on hand at this time, making due allowance for increased consumption and production, which shows that there will be 80,000,000 pounds surplus of wool on hand if not another pound is imported between this and January 1, 1900. This takes no account of the enormous quantities of wool which have been imported during the month of April and which are still being imported. I have seen it stated somewhere that in Boston they are taxed for warehouse room in which to store the vast quantities of wool which are now being imported prior to the enactment of this tariff law.

The table referred to is as follows:

Comparison of the supply and consumption for 1895 and 1896, with estimates for 1897, 1898, and 1899, showing that there will be little or no revenue from imported wool, nor will the domestic producer receive the full amount of the protective advantage of the tariff much before the year 1900.

	1895.	1896.	1897.	1898.	1899.
	Pounds.	*Pounds.*	*Pounds.*	*Pounds.*	*Pounds.*

Carried over into next year	231,724,651	448,986,523	490,413,114	290,361,557	‡80,307,422

*American clip and American consumption estimated for 1898 and 1899, at 5 per cent increase over each previous year.

†Wool and shoddy imports from January 1 to April 30, 1897.

‡Estimated surplus on hand January 1, 1900, without importing another pound. This calculation takes no account of the wool to be imported after April 30, which, before the enactment of the tariff bill, may reach 20,000,000 pounds more.

Mr. DAVIS. I should like to ask the Senator what the average annual importations of wool have been for the last three or four years?

Mr. MANTLE. I can not state in exact amounts, but I suppose in the last three or four years under normal conditions it would require from one hundred and fifty to two hundred million pounds annually, not including the wool in imported manufactured clothing, in order to make up the difference between the

home production and the consumption. I state this in round numbers. Under the free-wool provision of the Wilson law, especially last year, these importations increased enormously, and latterly, during the past few months, they bear no legitimate relation whatever to the normal importation. They are out of proportion. There has been already imported a great deal more this year than was imported during all of last year, and the importation is still going on at an increased rate. Of course this is in anticipation of the enactment of the present bill into law imposing a duty upon wool.

(See appendix for importations.)

I also wish to include here a table showing the increase and decrease, respectively, of the number of sheep in the country at different periods under the operation of the different tariff laws.

I wish to say in this connection that the increase under the operation of the McKinley law seems to have been about 13 per cent. That increase was not brought about by the prosperous conditions following the enactment of the McKinley law to the woolgrower, but it was brought about as a result of very large investments in sheep about the time of the enactment of that law, under the impression that sheep growing and wool raising were going to be a prosperous business. However, the woolgrowers were utterly disappointed in the result.

WHAT THE MANUFACTURERS WANT.

It must be manifest to those who have followed former tariff debates and who have read the hearings before the Ways and Means Committee of the House that there always has been and is now a wide difference of opinion between the wool producer and the wool manufacturer as to what are just duties upon wool. The woolgrower bases his request upon his experience under former tariffs; he knows how they have affected him in the past, and what he may expect in the future under the same conditions.

The manufacturer is intent upon securing his raw material at the lowest possible cost, and out of this condition of affairs arises an irrepressible conflict. The manufacturers' position and contention may be briefly summed up as follows:

First. That ad valorem duties on all wools would be preferable, but are essential on those of the third class.

Second. That the values of wool, like those of wheat and cotton, are so well and universally known that frauds are practically impossible to any marked degree under an ad valorem rate.

Third. That the practice of skirting imported wool does not materially increase its value.

Fourth. That cheap third-class wools do not enter into the manufacture of clothing to any appreciable extent, and do not compete with domestic wools.

Fifth. That the compensatory duties do not compensate him for the additional cost of his material and other disadvantages under which he claims to suffer because of the tariff on wool.

Sixth. That while ad valorem duties are necessary and proper on wool, they lead to frauds, and are unjust and improper on manufactures of wool.

Seventh. That generally speaking, a tariff on wool is a great disadvantage to him; that it restricts his choice and adds to his price; that it widens the field and cheapens the price to his foreign competitor; and that the restrictions and limitations in the classifications of wools are placed there for the sole purpose of embarrassing him.

Mr. President, in order that it may not be said that I am misrepresenting the manufacturer, I have taken from the Tariff Hearings a few extracts from statements made by some of the largest wool-manufacturing concerns in the country.

Here I desire to add that, so far as I can discover from their statements, while a majority of them hold the views which I have just enumerated, there are a few who seem to be fair in their treatment of the subject, and seem to be willing that the woolgrower shall enjoy a degree of protection commensurate with that which they ask themselves, but their number is very limited.

Abbott & Co., wool manufacturers, of Graniteville, page 1627, Tariff Hearings, say:

> Whatever the duty, we desire it to be so levied that we shall not be restricted by the American definitions of washing, skirting, or sorting. * * * and the duties on these wools should be an ad valorem duty, as was the case under the tariff act of 1890.

Mr. Arthur T. Lyman, of the Lowell Carpet Company, page 1631, says:

> With free wool we can make an ingrain carpet so cheap that it is much harder to pass off a cotton and hair carpet on the consumer. In carpets and all woolens the buyer at retail is easily deceived.
>
> We are satisfied with the present conditions of the tariff. I think there is not a big mill in Lowell or Lawrence that cares to have the present tariff disturbed, though there is, of course, a preference for specific duties upon goods. The advanced rates of the McKinley bill did much harm by starting reckless competition at home. The wool-carpet trade is specially liable to injury from high duties, as its whole supply comes from abroad. If the duty is not over 30 per cent, I think all wool-carpet makers would prefer one uniform rate on all wools, ad valorem.
>
> As treasurer of the Lowell Carpet Company, of Lowell, I wish also to protest against any form of duty on wool except one uniform ad valorem rate on all wools, without regard to class, or mixture, or skirting, or sorting; and especially against any system of duties based on dividing lines of value.

Edward F. Mason, of Schofield & Mason, carpet manufacturers, Philadelphia, page 1633, says:

> The duty should be ad valorem on third-class wools, not specific, the same objections not existing to ad valorem duty on raw material as in the manufactured articles, where much greater opportunity for fraud exists.
>
> There should be no change in the classification of carpet wools unfavorable to the manufacturers. * * * A very high duty should be placed on all oriental fabrics, such as high-class rugs, jute rugs, mattings, carpetings, etc.

This gentleman, with a candor and modesty alike refreshing, insists that there shall be no change unfavorable to the manufacturer in the classification of carpet wools, but demands a very high duty on such manufactured products as come into competition with his own.

William M. Wood, of the Washington Mills Company, of Boston, Mass., which he states is the largest consumer of wool in the United States, on page 1633 says:

> The demands of the woolgrowers for protection, as expressed by Judge Lawrence, appeal to me as absurd and unjust toward the manufacturer. * * * In our experience it is unjust for the woolgrowers to demand a specific duty on wool. * * * A specific duty on wool arbitrarily placing * * * any rate per pound on wool handicaps the manufacturer.
>
> * * * * * * *
>
> I contend that the only proper and fair duty on wool should be an ad valorem one, not exceeding 25 per cent; that the duty on woolen goods remain substantially as it is, say 50 per cent ad valorem, with the proviso that the equivalent of the duty accorded wool be added as compensation, and that portion only made specific, the distinction being that wool is an article of merchandise the value of which can be easily ascertained, while that of goods is attended with much confusion, due to manipulation and adulteration, and therefore easily made the object of fraud, inviting undervaluation.

Here is a gentleman who says he represents the largest wool-manufacturing corporation in this country, denouncing the request of the million woolgrowers of the United States, as expressed through their chosen representative, for an adequate protective duty on wool, "as absurd and unjust to the manufacturers," and who, to prove his entire disinterestedness, proposes a straight ad valorem duty of 25 per cent on all wools, which would amount to a duty of from 1 to 5 cents per pound on the bulk of all importations! But while asking that the duties on the farmer's wool be cut from 40 to 70 per cent, this representative of the "largest wool-consuming corporation in the United States" demands that the rate on manufactured goods "remain substantially as it is." In other words, he is willing that the woolgrower shall have just one-half the protection he claims for himself.

The secretary of the National Wool Manufacturers' Association also appeared before the House Committee on Ways and Means. His statement is found on pages 1636 to 1655, Tariff Hearings. This gentleman is very cautious and conservative in his statements respecting what the tariff on wool should be, but it can readily be discerned that he believes an ad valorem duty on wool would be practicable and just, and that such a duty would afford relief from the embarrassments under which he claims the manufacturers have suffered and will continue to suffer because of specific duties on wool. As Mr. North is the spokesman for a very powerful organization, whose agents and representatives are always found upon the ground and in the committee rooms when tariff legislation affecting their interests is pending, and as the statements of its secretary no doubt carry great weight with the committees, I shall beg the indulgence of the Senate while I quote briefly from his testimony and answer a few of his propositions which I deem incorrect and misleading.

First, he has the following to say in favor of ad valorem duties on wools:

> I do not believe there is a commodity sold in the world of any description the market value of which is more accurately, publicly, and universally known than that of wool. It is like cotton, wheat, and other staple products in that respect. All the wools of the world, practically, which reach the public market are sold at auction. This country is the only large manufacturing country where the sale of wool is not in open market.

I deny that the market value of wool in the world is "more accurately and universally known than any other commodity." Nor is it like cotton and wheat and numerous other commodities which are so staple in character and of such comparatively limited range in quality as to permit of extensive dealing and speculation in them for future delivery. And this statement is borne out by the fact that there is no dealing in "futures" in wool, as in other commodities, for the reason that its value in the future can not be predetermined.

There are over 400 samples of wool in the Government custom-houses, representing different grades, kinds, and character of wools, and the clip from the same flock may differ materially in value from year to year. But if it were true, as alleged by manufacturers in their argument for ad valorem duties, that the value of wool is so well known and established as to render fraudulent valuations impossible, then I maintain that no better argument could be adduced in favor of specific duties, such as are laid upon iron, coal, lead, wheat, and other staples the value of which is universally known. It is true many of the wool sales in the different markets of the world are public-auction sales, but there are many private sales as well. It is also well known, and is a matter of record, that syndicates are formed in some foreign countries for the purpose of buying up the wools of certain localities for the American and European markets; and there can be

but little doubt, in the light of past experiences, that if an ad valorem rate were fixed upon all wools, as demanded by some manufacturers, both public and private sales would be so manipulated that not only would the American woolgrower be defrauded of his protection, but the Treasury would also be defrauded of its revenue.

It is to be said in this connection that the foreign holders of wool now make (in order to evade the duty, by foreign perjury and undervaluation) contracts abroad to sell delivered in our American markets, requiring no oath on this side of the water.

In a report made to the Department of State in 1887 by Thomas E. Heenan, United States consul at Odessa, Russia, he shows—

(1) That all of the wool shipped from South Russia to the United States is the property of three or four American importers.

(2) That these importers, in combination with shippers, have contrived to prevent the recognition of a market price for so-called Donskoi washed wools at Rostoff-on-Don.

(3) That the loss on duties will reach between $15,000,000 and $20,000,000 is very probable. (See Lawrence's argument in U. S. Senate Report No. 232, Fiftieth Congress, first session, October 4, 1888, Part III, page 1964.)

In the report made to the State Department by Consul E. L. Baker, dated Buenos Ayres, December 30, 1893, published in the Consular Reports for April, 1894 (Volume XLIV, No. 163, page 663), on Argentine trade, 1892–93, it is said:

But for the two items of hides and wool the exports from this country to the United States would be quite insignificant. In regard to the latter, the only wools which, owing to our high duties, it is possible to ship at a profit are the long, coarse carpet wools of Cordoba. These are included in class 3 of the schedule, and their value being 13 cents or less per pound, they are able to pay the duty of 32 per cent on the same. These wools have for many years been annually bought up by a syndicate of Massachusetts carpet manufacturers, who thus, instead of competing with each other, get the product at the lowest possible price, and then distribute the clip by some arrangement among themselves upon its arrival in Boston.

The wool manufacturers claim that there have been enormous frauds in the way of undervaluations on cloths and other fabrics under the ad valorem duties of the Wilson law, and yet, while making this claim for their own industry, they put forth the selfish and inconsistent plea that a system which cheats and defrauds them will deal honestly by the woolgrower. If the ad valorem system permits of fraudulent practices as applied to manufactures of wool, it follows logically and necessarily that the same evil results will flow from its application to wool, with its innumerable grades, classifications, and valuations. The fact is that these wool and carpet manufacturers weaken the cause of protection when they seek to impose upon the woolgrower a system of duties which they are unwilling to accept for themselves whenever they can avoid it.

Mr. North further says:

Never until he had experience under free wool did the manufacturer realize the full extent of the disadvantages he suffers by reason of the wool duty and the impossibility by any compensatory duty of fully offsetting these disadvantages.

* * * * * * *

In answer to this I might say that never until he had experienced the disadvantages which he suffered under free wool did the woolgrower realize the impossibility of offsetting this disadvantage by the compensatory benefit derived from being able to buy his clothing a few cents cheaper.

Mr. STEWART. Would it interrupt the Senator from Montana if I were to make an inquiry?

Mr. MANTLE. Not at all.

Mr. STEWART. The Senator from Montana has examined the testimony pretty thoroughly. Did he find any manufacturer who was not willing to buy in a free-trade market and to sell in a protected market?

Mr. MANTLE. I think what I have said generally answers the question of the Senator from Nevada. I have shown, or tried to show, from the hearings and statements, that the belief among many manufacturers seems to be that their industry is greatly injured by the imposition of any duty upon wool. That is the gist of their complaint, although of course they say they are perfectly willing to accord the woolgrower just and fair rates upon his product. But when we come to follow many of their arguments and examine them closely, we find that underlying them is a protest in general against the imposition of wool duties, and then a desire so to impose them that the manufacturers will become the greatest beneficiary of the duty in the end. That is the conclusion at which I arrive after a very thorough examination of what many of them have said upon this question.

Mr. PLATT of Connecticut. Will the Senator from Montana allow me for a moment?

Mr. MANTLE. Certainly.

Mr. PLATT of Connecticut. I know the Senator from Montana intends to be entirely fair, but it seems to me the remarks which he is making at the present time are scarcely fair to the great bulk of woolen manufacturers in this country. Whether they think it would be an advantage to their business to have free wool or not, I can not say. Some of them do; some of them do not; but with a very few exceptions I believe the sentiment of the woolen manufacturers of this country is that there should be a sufficiently protective duty upon wool.

Mr. MANTLE. I am quoting literally the language used before the Committee on Ways and Means by some of the very largest wool-manufacturing concerns in this country. Those statements speak for themselves.

I wish to state that I have no quarrel with the woolen manufacturers. I simply ask that justice be done the woolgrowers, and that the selfish presentation of the woolen manufacturers' side of the question—and I believe it is selfish—ought not to carry weight with the Senate of the United States or the Congress in its consideration and determination of what duty shall be imposed upon wool.

If there are any great number of manufacturers who believe that there ought to be a fully protective duty on wool, as stated by the distinguished Senator from Connecticut, they have failed to appear before the committee, or I have failed to discover their statements. I repeat that many of them do say they are not opposed to a fair and just rate of protection upon wool, but when we come to analyze the whole of their testimony we discover, underlying it, a sentiment in opposition to a just rate of duty upon wool. We find a strong sentiment in favor of ad valorem duties, which all the statistics bearing upon the subject show are utterly offensive and detrimental to the woolgrowing interests of this country. That is one proposition. We find them opposed to other features of the request of the woolgrowers, such as imposing a duty upon washed wool of the second class, which is justifiable from every point of view.

So we find them generally arrayed against the desires of the woolgrowers. That is what I am trying to bring out. I do not know that they have any active hostility, but their efforts have always been in the direction I have indicated, so far as I am able to discover from my reading and from conversations with representatives of the woolgrowers who have been upon the ground constantly during the preparation and enactment of all former tariff bills. The woolgrowers and manufacturers have met together and time and time again have parted in disagreement because of the extreme and unfair demands of the manufacturers. I have no ill will, I wish it distinctly understood, to the wool manufacturers. I simply wish to call the attention of the Senate to the conditions which exist, to this clash of interests, to the end that a fair adjustment of these rates may be had when the matter is finally adjudicated.

Of course free wool is an advantage to the wool manufacturer, just as free hides is an advantage to the tanners and the boot and shoe manufacturers, just as free lead is an advantage to the lead refiners and manufacturers, just as free "raw material" is an advantage to any manufacturer. But everyone knows full well that a protective system, to stand and to be just, must cover all interests, all sections, and all classes that require its sheltering arm. The protective policy was not devised for the benefit of the wool and carpet manufacturers solely, although some of them seem to think it was. It was designed to be a broad national policy, whose purpose is to diversify our industries, to furnish opportunity for the talent and genius and labor of our own people in every practicable and possible branch of industry, and to make us a self-supporting, self-sustaining, and independent nation.

That I conceive to be the object and purpose and general scope of the protective policy justly applied, under wise, unsectional, and unselfish laws. Laws framed in the interests of the great masses of the people, and not such as will conduce to trusts and unlawful combinations of capital for the purpose of controlling the price and supply of commodities, will beyond doubt tend to bring about these results.

The weakness of the protective policy lies in its abuse, growing out of the selfishness of individual interests, which demand more than they are entitled to receive, and especially because of the unwise contentions which arise between interests which are mutually dependent upon each other, such as wool manufacturing and woolgrowing. The manufacturer does not strengthen the cause of protection by his plaintive talk about the advantages of free wool when he is fully compensated, and, as many believe, more than compensated, for any duty which he pays upon wool by the additional duties laid upon the manufactured article. But of this I shall speak more fully later on.

The woolgrower is not finding fault with the rates of duty accorded other industries. He is not insisting upon any particular rate of duty, or special manner of levying it, upon the manufacturer's products. He is willing to leave that to the manufacturer himself and to the committees and to Congress. He asks simply that the manufacturers cease their more or less covert attacks upon him and their attempt to fix upon his product rates and methods which he knows full well have defrauded him in the past. He believes in protection. He has given the principle his support and has helped it to triumph, and he now asks for an honest redemption of the pledges made to him, uninfluenced by the selfish representations of those who seek to profit themselves at his expense.

I quote Mr. North once more, for the reason, as stated before, that he represents a great and powerful organization of manufacturers. He says:

Third. The wool duty not only restricts the choice and adds to the price of the American manufacturer, but of course correspondingly enlarges the choice and cheapens the price of the wools of the foreign manufacturer.

It would be strange, indeed, and contrary to all human experience in every other direction, if there were not some slight disadvantages to offset the numerous benefits accruing from the policy of protection. That the wool duty adds to the price that the American manufacturer must pay for his wool is of course true. It may be true, also, that the duty in a measure restricts his choice of wools in foreign markets, but he is far more than compensated for these disadvantages by the fact that protection gives him the profitable home market, which repays him over and over again for the comparatively insignificant loss and inconvenience to which the duty on wool may subject him.

Mr. MASON. And a compensatory duty, besides.

Mr. MANTLE. And a compensatory duty, as the Senator from Illinois suggests, of which I shall speak later on.

So far as the duty on wools cheapening the price of the wools of the foreign manufacturer is concerned, I may add that this statement is open to serious question. For myself I very much doubt its accuracy. It is true that a duty based on wool in its unwashed condition creates a demand in the foreign markets for light shrinking wools for the American market, for the purpose of avoiding the duty as much as possible; but after all, the price of all wool is fixed on the basis of scoured or clean wool. In other words, the value of wool depends upon its shrinking in cleaning, and, generally speaking, this shrinkage regulates its value in all the markets of the world. It is not clear, therefore, how the foreign manufacturer is greatly benefited over the home manufacturer by our laying an import duty upon wool.

Again, the secretary of the National Wool Manufacturing Association says:

All the restrictions and limitations of the old law upon the importation of wool were put there to embarrass and impede the manufacturer in his choice of wools. They do have that effect, and are thus an additional disadvantage under which he labors, and for which he gets no compensatory equivalent. Nothing akin or equivalent to them appears anywhere else in any tariff schedule. They imply that the whole business of importing wool is a fraud or tainted with fraud.

Mr. President, it is not true that the restrictions and limitations of the law were placed there to embarrass the manufacturer. They were put there, after full and careful investigation, for the purpose of giving the law effect, and for the further purpose of preventing, if possible, a repetition of the frauds which experience proved had been practiced under former laws.

These restrictions are no more embarrassing as to wool than they are to numerous other schedules of the tariff bill, which experience has rendered necessary to insure an honest compliance with the law.

Neither do these limitations and restrictions "imply that the whole business of importing wools is tainted with fraud," any more than the innumerable and inexplicable limitations and restrictions which surround the duties on the manufactures of wool imply that the business of importing these goods is tainted with fraud. No honest importer of wool will draw any such inference as indicated by Mr. North, and the opinion of dishonest importers need cause no concern.

I quote him just once more. He says:

The manufacturers for whom I speak do not appear here to resist the restoration of the wool duty. They affirmatively favor a reasonable duty upon wool, as they have always done, because they believe in the policy of protection, and are willing to make sacrifices in order that the policy may be applied to all products that need protection. * * * They have a right to ask that there shall be no return to the extreme and restrictive characteristics of previous wool schedules.

Mr. President, the manufacturers are not asked to make sacrifices in the interests of the woolgrowers or any other interest. They never have made any. What sacrifices have been made in respect to wool have been made by the woolgrower, for it is a well-known fact that he has never yet received the full protective benefit of the duty named in the law. If the woolgrowers get the equivalent of the protection given the manufacturers, they will be more than satisfied. So far they do not feel that they have ever received such equivalent protection. They do not expect to receive the same protection granted "the most-favored industry," but they do expect to receive the "ample protection" promised them in the St. Louis platform by the Republican party. They deny that there have been any "extreme and restrictive characteristics in previous wool schedules." On the contrary, they assert that hitherto the provisions of the wool schedules have been so lax as to deprive them of the benefit intended to be conferred by the spirit of the law.

FRAUDULENT UNDERVALUATIONS UNDER LAW OF 1890—AD VALOREM DUTIES.

Mr. President, I will now, with the indulgence of the Senate, endeavor, as briefly as the importance of the subject will permit, to discuss the wool question somewhat more in detail and with particular reference to the experience and the complaints of the woolgrowers under the McKinley law, which is practically reenacted in the House bill and which is modified but slightly by the Senate amendments.

The objections of the woolgrowers may be stated as follows:

1. To the so-called "skirting clause" in all the bills.
2. To the ad valorem duties on third-class wools as contained in the House bill.
3. To the admission of washed wools of the second class without the payment of additional duties as proposed in both bills.
4. To the admission of washed and scoured wools of the third class without payment of additional duty as provided in the Senate bill.
5. To the totally inadequate rates on first and second class wools as provided in the Senate bill.
6. To the imperfect classifications, which permit evasions.

There are also other objections, such as the adjustment of compensatory duties, which I shall touch upon in passing.

The woolgrowers assert that under the ad valorem duties of the McKinley law gross frauds were perpetrated in the way of undervaluations, and that, largely because of these undervaluations and the low rate of duty thus secured, great quantities of so-called carpet wools went into the manufacture of clothing, thereby displacing clothing wools of domestic growth.

Upon the general question of the wisdom and justice of ad valorem duties I need say but little. I understand the Republican party to be opposed on principle to this form of levying custom duties whenever it can be avoided, and no good reason ever existed for the adoption of this system in respect to third-class wool. It was incorporated in the law of 1890 upon the demand of the manufacturers and against the wishes of the woolgrowers. And in the same manner and through the same influences it has been made a part of the proposed new tariff act as it passed the House.

It is true the subcommittee of the Senate Finance Committee has proposed amendments in part changing these ad valorem duties to specific duties, but as this change is unsatisfactory to the manufacturers, and as a strong effort will no doubt be made upon their part to restore the House provisions, it will not be out of place for me to review this particular phase of the wool schedule and to show, by an examination of the statistics bearing upon wool importations, that the charge of fraudulent practices under the ad valorem duties of the McKinley Act of 1890, as made by the woolgrowers in respect to third-class wools, is undeniably true.

I shall not stop to read to the Senate all the statistics, tables of importations, percentages of values, and rates per pound, which I have gathered after much investigation from the Treasury reports, except to say that they bear out absolutely and beyond contradiction the statement which I have just made in reference to the practice of frauds in the matter of undervaluations and also of classifications under the McKinley law. I summarize them as follows: They show that for five years prior to 1890 the average import value of the bulk of third class wools had been 10.1 cents per pound; that immediately upon the passage of the McKinley law their importation increased enormously, while in 1893 their average value dropped to 7.6 cents per pound; that foreign prices did not fall correspondingly; that the importation of other wools did not thus increase, and that their value did not so fall; that upon the enactment of the Wilson law, with free wool, the imports of third-class wools did not materially increase the first year, and fell off heavily the second year; but that their average value increased 2 cents per pound.

That is an important point to be considered, that upon the repeal of the McKinley law, under free wool the importations of cheap third-class wools began to fall, while their value began to rise. It confirms beyond any question of doubt the statement that frauds were practiced.

The statistics further show that under free wool the imports of other wools increased enormously, while their value decreased. Hence we have the proposition that under free wool the value of third-class wools increased 2 cents per pound, while the importation fell off. On the other hand, the importation of first-class wools increased enormously and their value fell 2 cents per pound, showing conclusively that the ad valorem duties of the McKinley Act on third-class wools led to enormous importations and low values through fraudulent entries and undervaluations.

Mr. WARREN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from Wyoming?

Mr. MANTLE. Certainly.

Mr. WARREN. I take it that by the table from which the Senator has been reading he desires to show that the reason for the fall in third-class wools was because it had been fraudulently entered, and that the reason for its great consumption was not because it was used in the manufacture of carpet, but that it was used in the manufacture of clothing, thereby supplanting first and second class wools. Am I right?

Mr. MANTLE. There can be no doubt of the truth of the

statement made by the Senator from Wyoming. The enormous importations of third-class wool under the McKinley law, and especially the second year, I think, when about 130,000,000 pounds were imported, twice as much as ever before imported in one year, have never been satisfactorily accounted for. It can not be shown that the wool went into the manufacture of carpets, and the inference is logical and legitimate that it went into the manufacture of clothing and of textiles other than carpets. That is the ground of the woolgrowers' complaint. The foreign wools thereby supplanted the use of American wool. Their low rate of duty, their low valuation, all tended to drag down the price of home wool, to the injury of the home grower.

In 1890 the law of 1883 was in force, and the provision relating to third-class wools was as follows: "Value 12 cents or less, duty 2½ cents per pound; value over 12 cents per pound, duty 5 cents per pound."

There was imported in that year 61,626,656 pounds, valued at 10 cents per pound, and 18,307,429 pounds, or 29.70 per cent of all, valued at 16 cents per pound, making a total of 79,934,085 pounds, at an average value of 11.37 cents per pound.

In October, 1890, the McKinley law went into effect, the specific rates on third-class wools having been changed, on the demand of the carpet manufacturers, as stated, to ad valorem rates, as follows: "Valued at 13 cents per pound or less, 32 per cent; valued at over 13 cents per pound, 50 per cent."

In 1891 the law of 1883 was in force a portion of the fiscal year, and the law of 1890 the remainder of the year, which serves to complicate the averages; but the same general tendency is apparent after the law of 1890 went into effect. The imports in 1891 were 73,148,022 pounds at 10 cents per pound, 6,403,112 pounds at 17 cents per pound, 4,841,471 pounds at 15 cents per pound; total, 84,392,605 pounds, at 10.8 cents per pound average value.

Under the McKinley law the imports of third-class wool in 1892 were 83,697,810 pounds, valued at 10 cents per pound, while there was only 2,106,212 pounds, or 2½ per cent of all, valued at over 13 cents per pound, the total being 85,804,022 pounds. This was an increase of 5,869,937 pounds in imports; but it will be observed that 16,201,217 pounds, which had come in at a specific duty of 5 cents and a valuation of 16 cents per pound in 1890, came in below the 13-cent limit in 1892. In 1893, under the stimulus of low ad valorem duties, the importations of third-class wools had reached the enormous amount of 125,611,283 pounds, the value per pound, however, having fallen to 7.6, the duty upon which, reduced to a specific rate, would be 2.43 cents per pound.

The imports of third-class wools above 13 cents for the same year was only 3,041,337 pounds, or 2½ per cent of all, at a value of 15 cents per pound. It is noticeable, however, that while the importations of third-class wools increased enormously under the McKinley law and their value decreased, there was no such phenomenal increase in the importations of clothing wools of class 1. The reason for this is found in the fact that the duty on wools of the first class was specific, and there being no incentive for undervaluation, the value per pound of the imports of first-class wool for the years 1891, 1892, and 1893 differed but slightly from that of the five years previous.

It will no doubt be answered by those who argue for the ad valorem duties of the House bill on third-class wools that the sudden drop in the import value of these wools in 1892 and 1893 was due to a general fall in price. But an inspection of the market prices at that period will not sustain this contention. No such fall in price was indicated in the imports of first-class wools. No reasonable explanation can therefore be offered for this sudden collapse in the value of third-class wools from an average value of 10.1 cents in 1890 to 7.6 cents per pound in 1893 except fraudulent undervaluations, which were induced and made easy under the ad valorem duties.

In 1896, under free wool, the importations of third-class wool were 96,661,663 pounds, at a valuation of 9.6 cents per pound, being 2 cents per pound higher than in 1893, although the imports were 28,949,620 pounds less. In 1896, however, the imports of first-class wool amounted to 117,533,750 pounds, at a valuation of 16 cents per pound, as against 35,322,611 pounds in 1893, at a value of 18 cents per pound. Thus it appears that while the value of the importations of first-class wool had fallen 2 cents per pound from 1893 to 1896, the importations of third-class wools had actually risen in value 2 cents per pound in the same period. The reason is plain. In 1896, under free wool, there was no incentive to undervaluation, neither was there any incentive to undervaluation on imports of first-class wool in 1893, the duty then being specific. By this comparison, then, the absolute certainty of frauds under the ad valorem provisions of the law of 1890 in the importation of third-class wools is established beyond dispute.

From 1884 to 1890, inclusive, the total imports of third-class wool of a value of 12 cents or less was 417,219,849 pounds, or an average annual import of 59,602,835 pounds, of an average value of 10.1 cents per pound, paying 2½ cents per pound duty. During the same period there was imported 108,068,793 pounds of third-class wool, or an annual average of 15,438,399 pounds, at an average value of 17 cents per pound, paying 5 cents per pound duty. Under the ad valorem duties of the law of 1890 the bulk of this higher grade of third-class wool was forced in below the 13-cent limit.

I have made an examination of the importations for the first three months of this year, which bear out all I have already said upon this important point.

The imports of third-class wools for the three months ending March, 1897, were 34,722,543 pounds, valued at 10.4 cents per pound, a higher valuation than has obtained any year since 1884, thirteen years, on the lower grades of imported third-class wools.

For the same period of three months the imports of clothing wools of class 1 were 58,734,272 pounds, of a value of 15.75 cents per pound, being a reduction of one-fourth of a cent per pound from the import value of 1895 and 1896 on the same class.

In these latter figures, therefore, we find additional confirmation of the woolgrowers' contention as to the fraudulent character of third-class wool imports under the law of 1890. In the three months' imports just quoted, with free wool and no incentive to undervaluation, the value of third-class wool continues to rise, and is nearly 3 cents per pound higher than it was in 1893, while the import value of first-class wools has steadily fallen. The conclusion is inevitable that the law of 1890 led to immediate and wholesale frauds in the importation of third-class wools and ought, under no circumstances, to be incorporated in the law now under consideration.

OBJECTIONS TO AD VALOREM DUTIES.

Another conclusive objection to ad valorem duties is that their tendency is to destroy the essential principle of the protective policy; that is to say, they fail to afford protection when protection is most needed. For example, under an ad valorem duty on wool, the lower the foreign price the lower will be the duty and the less protection will be afforded; while, on the other hand, the higher the foreign price the higher will be the duty and the higher will be the protective benefit at a time when protection is needed the least.

To illustrate further: In 1895 there was imported 26,098,418 pounds of China wool, at a valuation of 5.15 cents per pound. Under the House provision this would have been dutiable at 32 per cent ad valorem, which, reduced to specific rates, would be 1.64 cents per pound—a rate so ridiculously low as to afford neither protection nor revenue. Yet, if the House ad valorem rates are retained, we shall see millions of pounds of wool, much of it available for clothing purposes, coming in at just such rates of duty.

In this connection, when we reflect upon the light shrinkage of these wools, we see at once that the duty of 1.64 would be practically cut in two again, so that it would only be one-half of that in comparison with the shrinkage of American wool.

While upon the subject of importations of China wools, I wish to state that the imports of these wools are increasing year by year. In 1870 there were but 9,106 pounds; in 1895 there were 26,089,418. They are among the very cheapest wools that come to this country, although the bulk of the imported cheap wools come from countries where labor is of the cheapest and most degraded character. And while upon the subject of cheap labor I am reminded that we exclude the Chinese because they work so cheaply that their labor undermines the labor interests of this country. In this connection, therefore, it is a pertinent inquiry whether or not the importation of cheap Chinese and other wool produced by like cheap labor, and which comes into competition with American-grown wool, at rates of duty which afford no protection whatever, is not quite as hurtful to the American woolgrower as Chinese cheap labor was to the industrial wage earners of the country?

NOTE.—Prior to 1869 there were no imports of China wools. Since then imports have gradually increased, as indicated by specified fiscal years, as follows:

Year.	Quantity.	Value.	Import price per pound.
	Pounds.		*Cents.*
1870	9,016	$1,312	10.45
1880	66,751	9,188	13.76
1890	8,587,575	814,264	9.48
1893	20,753,993	1,812,250	8.74
1894	10,186,264	818,157	8.03
1895	26,089,418	1,099,414	5.15

Note the steady decrease in the value year by year.

NOTE.—The Wool and Cotton Reporter of June 15, 1893, page 756, said:

"When the McKinley bill was under discussion, the evidence was that only a small fraction of carpet wools was used for clothing purposes, mainly for blankets, and this evidence was undoubtedly correct. Since then fashion and excessive competition in the goods market have made it possible to utilize these wools in the manufacture of clothing. A tariff that comprehends protection of domestic wool should take cognizance of these facts."

To my mind, the importation of cheap goods, produced by ill-paid and degraded labor, which come into competition with like products of our own country, without the payment of adequate protective rates, is, if possible, more harmful than the importation of the cheap laborer himself. If the laborer comes, he must at least live, and must help to consume some of the surplus products of our farms and factories. Not only this, but he becomes amenable to our laws. If he acquires property, he must pay taxes upon it, and thus contribute to the support of our Government. If he engages in business among us, he must pay for the privilege of doing so, and under these conditions there is at least some slight hope that by contact with an enlightened and progressive people, living in an atmosphere of liberty and enjoying the blessings of a free Government, he may possibly gather inspiration from his surroundings and in time become a useful citizen.

But when this cheap labor comes in the form of a box of merchandise or a bale of wool, without payment of an adequate protective duty, it monopolizes our markets, injures our producers, degrades our labor, and takes employment from our own citizens without any just compensatory advantage. If the laborer himself comes, he may perhaps be induced to cooperate with our own laborers for the protection of labor interests; he can be talked to and reasoned with; but the American wage earner can not argue with a box of cheap foreign merchandise; neither can the American farmer argue with a bale of cheap Chinese wool.

Still another reason given by the manufacturers in favor of low ad valorem duties on third-class wools is that they do not compete with domestic wools; that we do not and can not produce coarse wools of a similar character in this country, and that therefore a protective duty is not necessary, and would be of no benefit to the American woolgrower.

As a matter of fact, I may state, and it so appears in the tariff hearings before the Committee on Ways and Means, these coarse wools are even now grown in fifteen States of the Union.

Judge Lawrence, president of the National Wool Growers' Association, who speaks with great authority as a result of knowledge gained by years of study of the wool question, says that "at least one-eighth of every fleece of the mutton breeds of sheep is coarse third-class wool. A portion something less of many fleeces even of Merino sheep is of the same class. A portion of every fleece of sheep, the crosses of Merino and mutton breeds, and of crosses of common coarse-wool sheep, is also of the same class."

This means that of every flock of 800 of this class of sheep, 100 are producing coarse wools suitable for carpets and coarse clothing.

Just what proportion of these cheap third-class wools go into the manufacture of clothing is, of course, difficult to determine. Manufacturers themselves will not tell, and wool merchants and dealers, as a rule, are loath to furnish information, for fear of incurring the ill will of their customers. Then, again, different mills are engaged in the manufacture of different kinds of goods. Many of them have special lines requiring special kinds and grades of wool. It is therefore fair to assume that the manufacturers themselves, in many instances, can not tell just what character of wool is being used in other mills. Mr. Theodore Justice, the Philadelphia wool merchant, estimates that from 15 to 20 per cent are so used.

Another prominent wool merchant, John Consalus, of Troy, N. Y., estimates that 40 per cent are so used. Others equally well informed maintain that as much as 50 per cent go into the manufacture of cheap clothing, blankets, linings, window curtains, and backings for cloths of various kinds. It is certain that immense quantities of carpet wools have been imported which never went into the manufacture of carpets.

For my own part, after considerable inquiry, I am convinced that a much larger and constantly increasing proportion than is generally supposed finds its way into the manufacture of textile fabrics other than carpets.

During the three years that the McKinley law was in force there was imported 254,138,204 pounds of third-class wool, at an average value of 8¼ cents per pound. Assuming that only 25 per cent is used for other than carpet purposes, it would reach the enormous quantity of 63,534,501 pounds, which, on account of its very light shrinkage, would equal at least 127,079,002 pounds of American merino, thus displacing that amount of the domestic product.

There is manifestly but one way to remedy this wrong, and that is to increase the duty on these wools to a protective point. If this is done, it will stimulate their production in those States and Territories where the conditions are peculiarly adapted to them.

As a result of my investigation of the subject of the duties on third-class wools, I arrive at the following conclusions:

First. That because of their cheapness, changing fashions, and improved methods in manufacturing, a very large percentage of the importations find their way into the manufacture of clothing and other textile fabrics aside from carpets, thereby lowering the price and supplanting the use of American-grown wools.

Second. That as these wools may come in washed and scoured under the Senate amendment without additional duty, and there being therefore little or no shrinkage, 1 pound of this wool as imported will take the place of from 2 to 3 pounds of domestic wool, so that the proposed duty of 4 cents on wools of a value of 10 cents or less would not actually amount to more than 1 to 2 cents per pound on the basis of unwashed wool.

Third. That the Senate amendment reducing the dividing line from 13 to 10 cents is no concession, as the market value of these wools has fallen fully 3 cents since the law of 1890 was enacted. Further than this, 98 per cent of all these wools imported in 1892, 1893, and 1894 came in at an average value of 8¼ cents per pound.

Fourth. That the low ad valorem duties of the law of 1890 upon this class of wools (which are exactly reproduced in the House bill) stimulated their importation and use, and led to fraudulent undervaluations and classifications.

CARPET WOOLS.

[From the Boston American Wool and Cotton Reporter of March 18, 1897.]

Concerning the duties on carpet wools, the following is an extract from a recent letter to us by President Jesse M. Smith, of the Utah Wool Growers' Association, whose late visit in New England won him very kindly opinions from merchants and manufacturers:

LAYTON, UTAH, *March 4, 1897.*

EDITOR OF WOOL AND COTTON REPORTER:

* * * There seems to be some doubt as to what rate the manufacturers really advocated, but if it is a 6 or 7 cent rate, that so many talked of when I was down there, they might as well save their breath for other game. I was given some credit for being a reasonable man by many of them, but a woolgrower would be lost to reason if he would submit to such low rates. I do hope that the manufacturers will support us on reasonable grounds and not try to engender more strife between them and the grower. If the Western woolgrowers can not get what reason and common sense would give them under the promise of the St. Louis platform, we will be obliged to ask our Senators to vote against any tariff of any kind; and while it will not take as much to satisfy the grower of the West as it will the grower of the East, I do not believe it would be altogether right to follow strictly the idea "let every man take care of himself."

If the grower east of the Mississippi needs a farm value of 20 cents to make his business profitable, he should have a rate that would give him the price, and I believe a single duty of 11 or 12 cents on the grade of wool in the grease would do it—that is, upon merino and combing wools. Carpets wools should pay nothing short of 7 cents, and I would be shoulder to shoulder with those who asked for 8 cents. This is not a high rate upon wool. The claim that we raise no carpet wool is not entitled to as much consideration as in the past. Wool circulars are now quoting carpet wools as grown in nearly all the Western States, at least fifteen of them, at an average price of about 7½ cents, which would yield to the grower from 4 to 5 cents, according to closeness to market. It is the first year I have noticed such classifications and have attributed it to people breeding coarse wool rams for mutton since wool became profitable. The manufacturers must understand that they can not dictate the whole of the coming tariff bill. The woolgrowers are as much interested in the permanency of the measure as they, and propose to get upon a plane that will be reasonable and just to all concerned, and any opposition to this will be defeated.

NOTE.—The wool-tariff act of 1867 provided duties as follows:

On clothing wools, unwashed, value 32 cents per pound or less, 10 cents per pound and 11 per cent ad valorem; value exceeding 32 cents per pound, 12 cents per pound and 10 per cent ad valorem; washed, double duty.

On combing wools, value 32 cents or less per pound, 10 cents per pound and 11 per cent ad valorem; value exceeding 32 cents per pound, 12 cents per pound and 10 per cent ad valorem.

On carpet wools, value 12 cents per pound or less, 3 cents per pound; value over 12 cents per pound, 6 cents per pound.

On all classes scoured, treble duty.

The tariff act of 1883 provided duties as follows:

Clothing wools, value 30 cents per pound or less, 10 cents per pound; value over 30 cents, 12 cents per pound; washed wool, double duty.

Combing wool, value 30 cents per pound or less, 10 cents per pound; value over 30 cents per pound, 12 cents per pound.

Carpet wools, value 12 cents per pound or less, 2½ cents per pound: value over 12 cents per pound, 5 cents per pound.

All classes scoured, treble duty.

The rates of duty on wools in the act of 1890 were as follows:

On class 1 wools.—Merino, etc., unwashed, 11 cents per pound; merino washed, double duty; merino scoured, treble duty.

On class 2 wools.—Down and other long wools, washed or unwashed, 12 cents per pound; scoured, treble duty.

On class 3 wools.—Native coarse sheep, if of the value of 13 cents or less per pound, 32 per cent ad valorem; if the value exceed 13 cents, duty 50 per cent ad valorem.

The original McKinley bill as reported to the House of Representatives April 16, 1890, after dividing wools and other animal fibers in three classes, provided as follows:

383. The duty upon all wools and hair of the first class shall be 11 cents per pound, and upon all wools or hair of the second class shall be 12 cents per pound.

384. Wools of the third class the value whereof shall be 12 cents or less per pound, the duty shall be 3½ cents per pound.

385. Wools of the third class the value whereof shall exceed 12 cents per pound, the duty shall be 8 cents per pound.

In the tariff bill reported to the Senate October 3, 1888, page 144, by Senator Allison, as a substitute for the House "Mills bill," the duty on third-class wools was placed at 2½ cents for wools of the value of 12 cents or less, and 6 cents on wools the value whereof shall exceed 12 cents.

In all these bills the duty proposed was made double for washed of classes 1 and 3, and treble for scoured of all classes.

But the duties were all specific.

The ad valorem duties provided in the McKinley bill as finally passed were inserted on the demand of a few, and only a few, Philadelphia carpet manufacturers, and that after a prior conference of woolgrowers and wool manufacturers, including carpet manufacturers, had agreed upon specific duties as those proper for Congress to provide.

Fifth. That we have ample territory in which much of this wool can be and will be grown under the stimulus and encouragement of specific protective rates of duty.

Sixth. That as compared with clothing, carpets may fairly be considered a luxury; therefore to the extent that these wools are actually used in the manufacture of carpets, the reasons for adequate and specific duties are quite as forcible as upon any other class.

Seventh. That if ad valorem rates are to be insisted upon for these wools, then none but ad valorem duties should be laid upon manufacturers of carpets.

Eighth. That there should be no dividing line of value in the duties, as all experience heretofore proves conclusively that the great bulk of the importations will come in below the dividing line at the lower rate of duty.

"THE SKIRTING CLAUSE."

Mr. President, I now come to the consideration of a clause in the McKinley law which has been retained in the measure before us, and which has produced more antagonism upon the part of the woolgrowers than any other, and perhaps has done them more injury, and that is what is known as the "skirting clause." I dislike to detain the Senate at great length, but it is a matter of so much consequence that I have felt that it was my duty to go into this question somewhat technically, to the end that all may have a correct understanding of what skirting means and what its result is upon the American woolgrower.

Under the provision in the law of 1890 known as the "skirting clause" it is asserted wools were freely imported in what was practically a "sorted" condition, without the payment of any additional duty, thus taking from the home woolgrower a large proportion of the protection nominally given him by the law.

In considering the woolgrower's objection in this particular, it must be kept in mind that when the wool classifications were made and the duties adjusted account was taken of the conditions which surrounded the woolgrowing industry in this country, as well as the character of the competition which it had to encounter. Thus, when the duty of 12½ cents was laid on merino wool in 1896-97 and 10 cents in 1883, it was done with the full knowledge that the average shrinkage of American wool of this class was 66⅔ per cent, and the purpose and intent of the law was that the American woolgrower should receive this amount of protection on this class of wools. The evils of which the woolgrower now complains are the result somewhat of changed conditions in the character of foreign competition, but more directly of a constant and successful effort upon the part of importers to evade and defeat the true intention of the law.

The practice of "skirting" imported wools was not extensively carried on, or at least did not excite much comment or discussion in the tariff debates, prior to 1888 and 1890. By that time, however, it had developed to such an extent as to arouse and alarm the woolgrowers, who discovered that this method of improving the quality of imported wools, by rejecting the heavier and inferior portions and importing only the lighter and finer parts of the fleece, had the effect of defrauding them of a large share of the protective benefit intended to be given them by the law. They therefore went before the House and Senate committees and secured the adoption, in the law of 1890, of a provision imposing a double duty on wools which should be imported in any other than their original condition, or which, in the language of the law, should be changed in character by "sorting," or by the rejection of any part of the original fleece.

But, unfortunately, after the woolgrowers had secured the acceptance of this just and reasonable clause, some one else came along and secured the adoption of a proviso as follows:

That skirted wools as now imported are hereby excepted.

Of course the proviso absolutely nullified the intended effect of the provision for doubling the duty. Skirted wools continued to come in under the McKinley law without any penalty, and the process of cheating the woolgrower out of his protection for the benefit of the manufacturer, whose compensation was based upon the protective benefit which the woolgrower was supposed to and ought to have received, but did not, was continued.

The same misleading and deceptive provision is contained in the pending tariff bill, both in the Senate and House reports. The provision for doubling the duty on skirted and sorted wools remains in the identical language of the McKinley law, but accompanying it is the proviso, "That skirted wools as imported in 1890 and prior thereto are hereby excepted."

Mr. President, for years the woolgrowers have been pleading that this injustice to them should be corrected. They have petitioned Congress over and over again, asking that this proviso be stricken out, so that they may stand upon fair and equal terms with the foreign producer, and honestly secure in practice the protection promised them in the law. They assert that the law as it stood in 1890, and as it is now proposed to reenact it, is upon its face a "legislative lie;" that it holds out to them a pledge of protective benefits which has not and under the proposed terms never can be realized; that it is "a fraud, a delusion, and a snare," thrust upon them in spite of their earnest protest, against their wishes, and without their consent, and that, too, at the instance and demand and in the interest of an industry which has received more protection than any other in the land. They are growing tired of the constant effort of wool manufacturers to make it appear to the country that the high rates of duty accorded the manufacturing industry are a result of unusual and exorbitant duties in favor of the woolgrowers.

The woolgrower asks that whatever protective duty is laid on wool shall be so laid that he will get it. He protests against being nominally given 11 cents in the law and then being made the victim of provisos and loopholes for fraud and evasion, so that in actual practice in the States of Michigan, Indiana, and in Ohio he gets but 5 or 6 cents per pound instead of 11, and in Montana but 3 or 4. Whatever the duty is to be, he asks that it be placed in such a manner that he will in fact receive it, and so that he will not hereafter be held accountable for a rate of protective benefit which loses more than 50 per cent in the process of being filtered through the hands of others before it reaches him.

An examination of the testimony before the Ways and Means Committee of the House upon this branch of the wool question shows that the manufacturers have striven hard to make it appear that the practice of skirting imported wools does not materially reduce their shrinkage or increase their value; and in order to prove their contention they have prepared a large number of tables relating to prices and shrinkages of imported Australian merino wools, which are to be found in the testimony of the treasurer of the Arlington Worsted Mills, on pages 1593 to 1596 of Tariff Hearings. Of these tables I may say that to me they appear to be largely irrelevant and misleading, being based upon "estimates" and assumptions rather than on conditions in actual practice. The deductions drawn from them, however, by the manufacturers are that the process of skirting reduces the shrinking of a skirted fleece from five-tenths of 1 per cent to 3.8 per cent, or an average of only 2½ per cent, and that it enhances the value of a skirted fleece only 5 per cent.

Of course it must be borne in mind that "skirted" wools as imported under free wool, with no incentive to reduce the shrinkage for the purpose of evading the duty, and "skirted" wools as imported under a protective tariff are two entirely different propositions.

Referring to these tables, which are very complete and elaborate, I wish to say, with all due respect, that the results stated are absurd and preposterous upon their face. They mean in effect, if I understand them correctly, that on an Australian merino fleece, such as is imported to this country under a protective tariff, weighing say 8 pounds, less than 4 ounces would be removed in the process of "skirting," while its whole value would be increased only 7 or 8 cents.

Mr. President, I venture to assert that there is not a boy 10 years of age herding sheep in this country who does not know that to skirt a fleece—that is, to remove the stained, coarse, and matted portions from the belly, legs, neck, and hips—would necessitate the rejection of at least 20 per cent of the fleece, and frequently much more. This would amount on a fleece weighing 8 pounds to from 2 to 3 pounds, as the rejections or skirtings are by far the heaviest portions of the fleece. In per cent it would amount to at least 37½.

In this connection, I desire to state that a controversy arose some time ago between a gentleman widely known as a woolgrower in the country and a wool merchant, as to what per cent or what portion of the fleece would be removed in the process of skirting. So the woolgrower sent to Michigan and had sent to him a fleece just as it was sheared from the sheep, and brought it to Philadelphia, and there he met the wool merchant. He spread the fleece out, and he said, "Now, how shall I skirt this fleece?" The wool merchant said, "Skirt it according to your idea." And he did, and they agreed that 10 per cent had been removed. But the wool merchant said, "My dear sir, that will never pass as a skirted fleece; you must remove a great deal more than that." And before they had gotten that fleece into the condition of a "skirted" fleece, according to suggestions of the wool merchant, 40 per cent of the fleece had been removed. I cite this as illustrating the process and method of skirting.

On page 27 of the Special Consular Report on Australian Sheep and Wool, issued in 1892, will be found a very complete and accurate description of the manner in which the "skirting" and "sorting" of wool for the American market was carried on in that country.

It is a complete answer to the extraordinary statement of the manufacturers to which I have just referred. The report was written by the American consul-general, Hon. George H. Wallace, himself a practical woolgrower, and who had made a very complete and careful investigation of the subject while on the ground. Among a number of examples given in this report, I select one

which is to be found on page 27, and which deals with the entire clip taken from 30,313 sheep at a single station or ranch.

It shows that the "wool is divided into 110 sorts;" that is, a fleece is so divided, according to the Australian custom, in preparing the wool for the American market, that 47.41 per cent was what is known as "first combing"—that is to say, the choice portions of the fleece—and the remaining 52.59 per cent was what is known as "rejections," so far as the United States market was concerned; that 22.27 per cent were "stained pieces," "bellies," and locks, which were sent to be scoured, not shipped, while 32.26 per cent were "second combing," "clothing," "dingy," "broken fleece," etc., which were not shipped to this country, but which found their way to some other market. Thus, according to Mr. Wallace, the American consul-general, instead of from 4½ to 15 per cent of "rejections," as estimated by the manufacturers in the tables referred to, there was 52.59 per cent, so far as importations to the United States were concerned.

Accepting Mr. Wallace's report of the method of skirting and sorting as being correct, we find that more than 50 per cent of the imported fleece is removed by the "skirting" process, instead of 2½ per cent, as claimed by the manufacturers, and that the value of the skirted fleece is increased at least 35 per cent by the operation instead of 5 per cent, as alleged in the papers to which I have referred.

I have prepared a statement bearing upon this particular point and carrying out the matter in detail, which I will not stop to read, as it is rather technical, and which I ask leave to print with my remarks. The table is as follows.

Allowing 66⅔ per cent as the shrinkage of the whole Australian merino fleece, we shall have 33⅓ per cent of scoured wool, and accepting the manufacturer's estimate of 50 per cent shrinkage (which is generally conceded to be about the average shrinkage on imported Australian skirted merino wools, although much of it shrinks less), we get the following results as to shrinkage:

	Pounds.
47.41 pounds of "first combings," shrinking 50 per cent, yield of scoured wool	23.71
52.59 pounds of "rejections," shrinking 81.71 per cent, yield of scoured wool	9.62
Total	33.33

Which is equal to 100 pounds of wool in the grease, shrinking 66⅔ per cent.

Accepting the manufacturers' assumption that the rejections sell for one-half of the price of the skirted wool, and taking 20 cents as the price of the skirted fleece, and making the calculation on the same basis as before, we get the following results as to value:

47.41 pounds of "first combings," at 20 cents	$9.48
52.59 pounds of "rejections," at 10 cents	5.26
Total value of 100 pounds equals	14.74

Thus showing that the process of skirting had increased the value of the skirted portion the difference between 14.74 cents per pound, the average value of the whole fleece, and 20 cents per pound, the value of the skirted portion, or 35.68 per cent, instead of 5 per cent, as claimed.

In order to show in just what manner this skirting injures the American woolgrower, we will now follow this skirted fleece from Australia to the United States. The report I have just quoted shows that 100 pounds of greasy Australian merino wool has been reduced by skirting and sorting 52.59 per cent, thus leaving but 47.41 pounds to be imported to the United States. At a rate of 11 cents per pound, as provided in the House bill, this 47.41 pounds of skirted wool would pay $5.21¼ duty. Estimating the shrinkage at 50 per cent, there would be left 23.71 pounds of scoured wool, upon which had been paid a duty of but 22 cents per pound, while the theory and language of the law is that scoured wools shall pay a duty of 33 cents per pound.

This shows very conclusively how the duty upon wool is avoided, and how one-third of the duty was evaded through the process of skirting and sorting these light, shrinking Australian wools.

Here, then, we plainly see that by importing his wool skirted the American manufacturer or importer has saved just one-third of the duty which he would have to pay if he imported it in its original condition.

If, as alleged, there is some peculiarity in Australian fine merino required for the manufacture of extra fine cloths, which are worn only by the rich, then this character of wool is in effect a luxury and should pay a duty accordingly.

The distinguished Senator from Rhode Island in his opening address the other day, when touching upon the very point to which I have alluded, suggested that these very light fine Australian wools were of such a superior quality that they were essential to the American manufacturer for the production of certain very fine goods. We used to hear the argument a good while ago, not, however, from Republican sources, that these foreign wools were absolutely essential to manufacturers in this country because they were coarse and long and because they possessed some other peculiar qualifications—that they were essential to mix with American wools.

I say that argument did not come from the Republican side. Now, however, it is intimated that these wools are necessary because they are soft and fine and are required in the manufacture of very fine clothing. I simply desire in this connection to reiterate what I have already said, that if they are such they become luxuries, and they ought correspondingly to pay a higher rate of duty. In any event, whatever the duty may be under the law, the manufacturer will be compensated by a multiple of the duty upon unwashed wool, whatever it may be.

The average shrinkage of American merino, at a low estimate, is 66⅔ per cent, although far Western and Texas wools will shrink more. It is, therefore, self-evident from the foregoing that if our heavy shrinking wools are thus brought into competition with imported skirted wools that shrink only 50 per cent and less, and which pay only the single unwashed duty of 11 cents per pound, the protective benefit to the American woolgrower is reduced just one-third, and is only 7¼ cents instead of 11, a loss to him of 3.33⅓ cents per pound. And for every per cent of shrinkage below 50 per cent there is a corresponding protective loss of a little over one-eighth of a cent, very many of these imported wools shrinking less than 50 per cent.

Then, again, the process of skirting in effect "sorts" the wool and otherwise improves and perfects the fleece, thus saving the labor which would be necessary for that purpose, and still further increasing its value; and all these elements together combine to reduce the actual benefit to the home producer.

Mr. President, I here wish to include in my remarks excerpts from statements made by a number of gentlemen, wool merchants and others, who are very familiar with the subject of skirted wools, among them Mr. W. B. Thornton, wool merchant, of Chicago, who is very pronounced in his demands for an increased duty on skirted wools, and who supports his demand with strong arguments; also John Consalus, a wool merchant of Troy, N. Y.; also Hon. John T. Rich, formerly governor of Michigan, a practical woolgrower himself. Governor Rich was a member of the commission appointed in 1890 to examine and establish standard samples of wool for the use of the custom-house officials, and is therefore the best of authority upon the subject.

I also wish to include a diagram which I have taken from the consular reports of 1892, and which was prepared for Hon. George H. Wallace, consul-general to Melbourne, Australia, by one of the most expert wool sorters in that country, a member of one of the largest wool firms in Australia. It explains fully the process of "skirting" as practiced in that country, and throws a clear light upon this whole question. As bearing directly upon the question of what percentage of Australian wools constitute "rejections," I have taken from the Australasian of April 3, 1897, which contains full reports of wool sales, a few quotations, showing the respective number of bales containing the different parts of the fleece. These quotations confirm Mr. Wallace's report in respect to the percentage of rejections. I ask leave to print them with my remarks.

Hon. NELSON W. ALDRICH, *Chairman Senate Finance Committee:*

SIR: I have read your speech in explanation and defense of the tariff bill as amended by the Senate Finance Committee, and while willing to concede that to the general public that explanation and defense may seem fair and reasonable, to those who have become practically acquainted with the workings of wool tariffs and who have noted the intricacies of your proposed rates of duty, your argument will be regarded as sheer sophistry.

Allow me to refer to one or two features of the bill. Australian skirted fleece, according to the manufacturers' expert testimony, shrinks only 50 per cent in scouring, yet it takes, they claim, four pounds of it for one pound of goods—50 per cent lost in scouring and 50 per cent of the scoured lost in manufacturing. Mr. Aldrich, I know this claim is preposterous and so do you.

You give the manufacturer on his pound of goods worth not less than one dollar, 91 cents. The wool that makes this pound of goods pays, on the unwashed basis, 4½ cents per pound and no more. With a decline in foreign value of 4½ cents, how much protection will our wool get?

In third-class wools, your only object seems to be to make the term "carpet wool" so all-embracing as to include every kind of wool required by the manufacturer of clothing goods, and admit it at only free-trade rates, thus allowing him to become entirely independent of the home product. You claim that the proposed duty of 8 cents will give the American woolgrower better protection than he has ever secured under any former tariff; that is, your 8 cents is better than the 11 cents of the law of '90, or the 13 cents of the law of '67, periods when foreign wool was much higher in price than now, and consequently less protection required. Yet you argue that the lower the foreign price the more protection we get. So if the foreign article is so low in price that, notwithstanding the 8 cents duty, it can be imported, take possession of our market and drive us out, we still have "better protection than ever."

The entire scheme is in the interest of the manufacturing trust and is a vile fraud on American farmers.

Yours, DAVIS COSSITT.

ONONDAGA, N. Y., 1897.

Shipment.	Number of bales.	Description.	Percentage of bales of rejections to bales of skirted wools.
Shipment No. 1	49	Skirted	
	33	Pieces	47.87
	12	Bellies	
Shipment No. 2	148	Skirted	
	76	Pieces	40.87
	18	Bellies	
	8	Locks	
Shipment No. 3	120	Skirted	
	64	Pieces	43.96
	21	Bellies	
	17	Locks	
Shipment No. 4	94	Skirted	
	62	Pieces	40.50
	12	Bellies	
Shipment No. 5	120	Skirted	
	91	Pieces	47.90
	33	Locks	

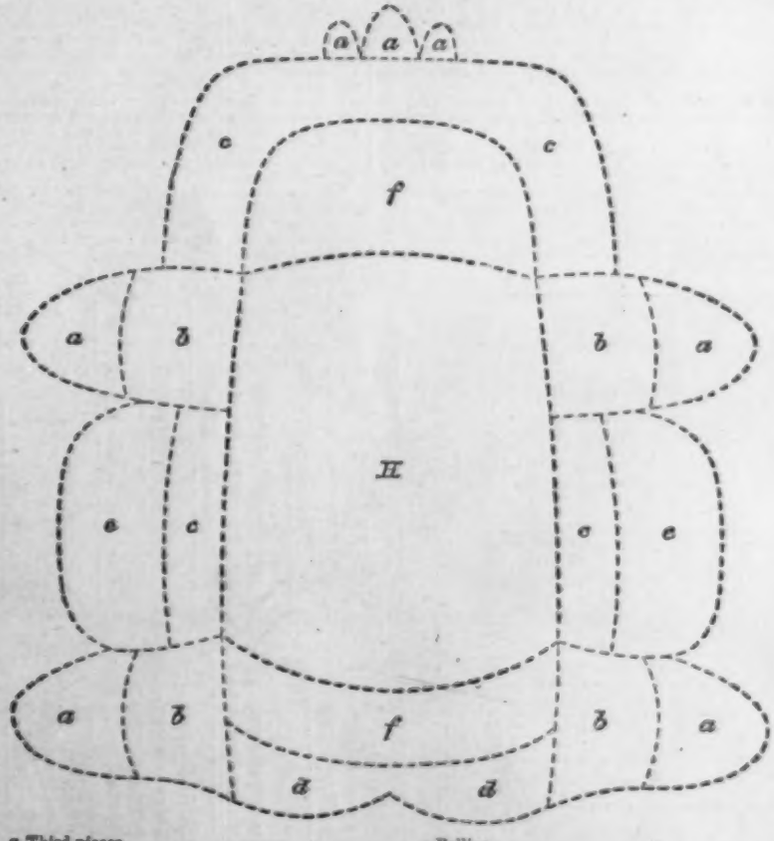
It must be borne in mind that the bales of "rejections" weigh much more than the bales of skirted wool, as they are made up of the heaviest part of the fleece; hence the percentage by weight is higher than by bales.

I wish to state that these tables which I have prepared, taken from this late number of that journal, completely bear out the statement made by Consul-General Wallace, which I have heretofore referred to. They show the percentage of the bales of "rejections"—that is, of the inferior portions of the fleece—in the whole number of bales.

SORTING.

Mr. President, the practice of importing these wools in what is really a "sorted" condition is a matter that should appeal with peculiar force to the Republican members of this body, because it is alleged, and I believe with truth, that this practice deprives thousands of American wool sorters of employment.

The evil would not be so glaring if the Government received any compensatory advantage in the way of increased revenue. But I have shown that it does not. I have shown that "skirting" and "sorting" are largely synonymous terms, and that both practices, as carried on, are evasions of the law, and result in defrauding the Government of revenue, cheating the woolgrower out of his legitimate protection, and depriving American labor of employment which rightfully belongs to it. Upon the subject of sorting there was much interesting testimony before the Committee on Ways and Means. It was shown that 71,627,131 pounds of wool were imported from Australia alone last year, the sorting and scouring of which would distribute among our own working people $716,271. If all imported wools were sorted and scoured here, it would mean the distribution of millions of dollars among American workingmen which are now paid to foreigners. Therefore our policy should be to so frame the law as to induce the importation of wools in their unimproved condition.



Among others, a Philadelphia wool sorter—a workingman—appeared before the committee, and this is what he said:

How does this skirted wool affect the workingman who is a wool sorter? In this wise: Before skirted Australian was known I was paid $1 per hundred pounds for sorting Australian fleece. I have known men refuse and leave a shop rather than sort it for 90 cents, and yet in this same wool room I have seen a laborer and boy, whose combined pay was $2.08 per day, put down to the wool washer from five to seven thousand pounds of this skirted wool in a day. This same wool is used by many manufacturers as assorted wool. It takes the place of sorted wool. Therefore, if the manufacturers want their wool sorted in Australia, I think in justice to the wool sorters, who are far more numerous than manufacturers and dealers combined, that they ought to be willing to pay for it in the shape of extra duty on skirted Australian.—*Senate Document No. 17*, December, 1896, pages 40, 42, 129, 155.

Mr. President, I think I have fully shown that the practice of permitting imported wools to come in "skirted" without the payment of adequate increased duties is exceedingly detrimental, looked at from the protective as well as the revenue-producing

NOTE.—Skirting as practiced to evade the duty consists in cutting out of the center of the fleece the choicest, lightest, most valuable part, equal to about one-half the fleece. Hon. George H. Wallace, United States consul-general to Melbourne, in his special consular report to the State Department on Australasian sheep and wool, August 5, 1892, gives a diagram of the Australasia fleece showing the extent of the skirting, as follows:

An Australian sorted fleece.

a Third pieces.
b Second pieces.
c First pieces (necks and skirts.
d Stained pieces.
e Bellies
f Broken fleece.
H Fleece.

And he says, page 24:

"The greatest factor in determining the value per pound of a fleece of wool is the per cent of shrinkage or loss it will sustain in being scoured, and it was found the larger part of this loss was sustained from the extremities or rim of the fleece; so the skirting, which originally consisted in removing only the stained portions, was enlarged and a portion was removed from the legs and a strip around the whole outside of the fleece, which was called 'pieces.'

"There was also another reason for this increased skirting in the trefoil bur,

standpoint, and that the complaint of the woolgrower that it defrauds and robs him of his protection is a just complaint, and entitled to our earnest consideration.

The argument of the manufacturers and importers touching this matter is founded largely upon estimates and figures of their own selection, made to suit the occasion, and not upon actual conditions as they exist in practice. But if the contention of the manufacturers that skirting does not increase the value of the imported fleece is correct, then it is pertinent to inquire, Why do they so strenuously oppose an additional duty on skirted wools? If skirting is not an advantage to them, why do they antagonize the woolgrower and deprive American labor of employment by insisting upon the proviso that skirted wools shall not be subject to an additional duty? Mr. Theodore Justice concedes that skirting increases the value 1 cent per pound, and following his suggestion the Senate subcommittee have offered an amendment providing for an additional duty of 1 cent per pound on skirted wools. This is an admission that the skirting process does enhance the value, but a 1 cent per pound penalty is utterly inadequate to equalize the difference.

Mr. Justice makes a much larger allowance for rejections than the manufacturers, but he falls into the same error of computing the shrinkage of the rejections on the basis of the shrinkage of the whole fleece, whereas, in fact, under a tariff, it is very much more. Then, again, his allowance of one-fifth in weight for skirting is too little, as practical woolgrowers all know, and as the Australian statistics prove. Another common error in the computations of those who oppose an additional duty on skirted wools is that they all insist upon taking into the calculation the percentage of shrinkage and value of the rejections. I maintain, however, that this has nothing to do with the question, so far as the American woolgrower is concerned. The rejections or skirtings are not brought here when there is a tariff on wool in force, and therefore do not come into competition with the domestic product.

---

which was introduced from South America. This spread over many of the runs, and being a low-growing plant, became attached to the fleece when the sheep lay down. The presence of this bur decreased the value of the wool in which it was found 2d. (4 cents) per pound, and the practice grew into always removing burry portions. As this practice was extended to a greater or less degree, there was obtained a third 'sort' of wool for market. But the spirit of rivalry among both breeders and woolgrowers brought about a still greater amount of 'skirting,' and the neck being slightly coarser wool was torn from the fleece and added to the pieces. The odds and ends and sweepings were sacked separately and called 'locks.' The custom of the Melbourne market in 1890 was to put up the entire clip from any one station and sell as one lot, including all fleeces, lambs, pieces, and locks. The price at which it sold was so much per pound for the fleeces and lambs' wool, two-thirds of such price for the pieces, and one-half of the same for the locks.

All wool at this time was washed on the sheep's back. To-day at shearing the sorter is often a highly paid man, who has been educated in a mill in England, is an adept in (1) classifying, (2) sorting, and (3) judging wool. His skill is such that the fleece after passing through his hands is, as stated in the Manufacturer, published in Philadelphia, January 2, 1892:

"so well *skirted* on the station as to need no sorting at the mill, and the shrinkage is reduced from 48 to 52 per cent."

"* * * In the market of Melbourne it has been the rule of buyers for the American mills to refuse all wools which show a shrinkage of much, if any, over 52 per cent, and this action has no doubt had much to do with continuing and even increasing the amount of skirting and sorting done."

Mr. Wallace, in his article of the January, 1897, number of the Quarterly Bulletin of the National Wool Growers' Association, page 18, says:

"It has been asserted, and never contradicted, that unwashed Australian wool has been imported so manipulated in the processes of skirting and sorting, or, as our law expressed it, 'skirted wool as now and heretofore practiced,' as to be clean enough to go on the cards without any washing—wool without any shrinkage."

A Troy, N. Y., wool merchant, John Konsalus, says:

"I consider wools that are 'skirted' worth fully 20 per cent more than unskirted.

"The merino wools of South America and Cape of Good Hope shrink in scouring an average of 67 per cent; the Australian imported into this country only from 42 to 50 per cent.

"If all wools except Australian should be made dutiable at 10 cents per unwashed pound, the Australian should pay 15 cents; and if the duty on others be 12 cents, Australian should be 17 cents."

Another wool merchant, William H. B. Thornton, of Chicago, in a letter published in the Inter-Ocean of March 15, 1897, says:

1. There is very little merino wool from Australia that comes into this country unskirted. The wool skirted is merely a blind used by importers so as to bring in sorted wool, which was intended in the McKinley Act of 1890 to pay a double duty. What wools were admitted under that act as skirted was a subterfuge to deceive the producer of wool. Any Australian merino wools unskirted would bring in Boston or the Chicago market 5 or 6 cents per pound more than any American merino that is grown east of the Mississippi River; or, in other words, Australian merino unskirted, grading X and above, would sell in the markets mentioned at about 19 to 20 cents in the grease, while for American merino we could only realize 13 to 14 cents for the same quality of stock in the grease, or, as termed, unwashed.

2. There would be about the same difference in value between Australian and American delaine unwashed merino if the former came in unskirted.

3. Australian merino, unwashed, that comes in skirted is simply sorted wool in disguise, and, if combing stock, there is a difference in prices between this choice unwashed merino product from Australia and American unwashed merino as produced east of the Mississippi River of the same grade and classificatoin as sold in the Boston market at 10 to 13 cents per pound. These are facts which defy contradiction. It shows conclusively with what pernicious reasoning large Eastern manufacturers are trying to delude those representing Western interests. * * *

Think of it! Australian unwashed skirted merino staple wool in Boston sells from 24 to 28 cents per pound in the grease, while American unwashed wools of merino blood only bring from 14 to 15 cents per pound, also in the grease.

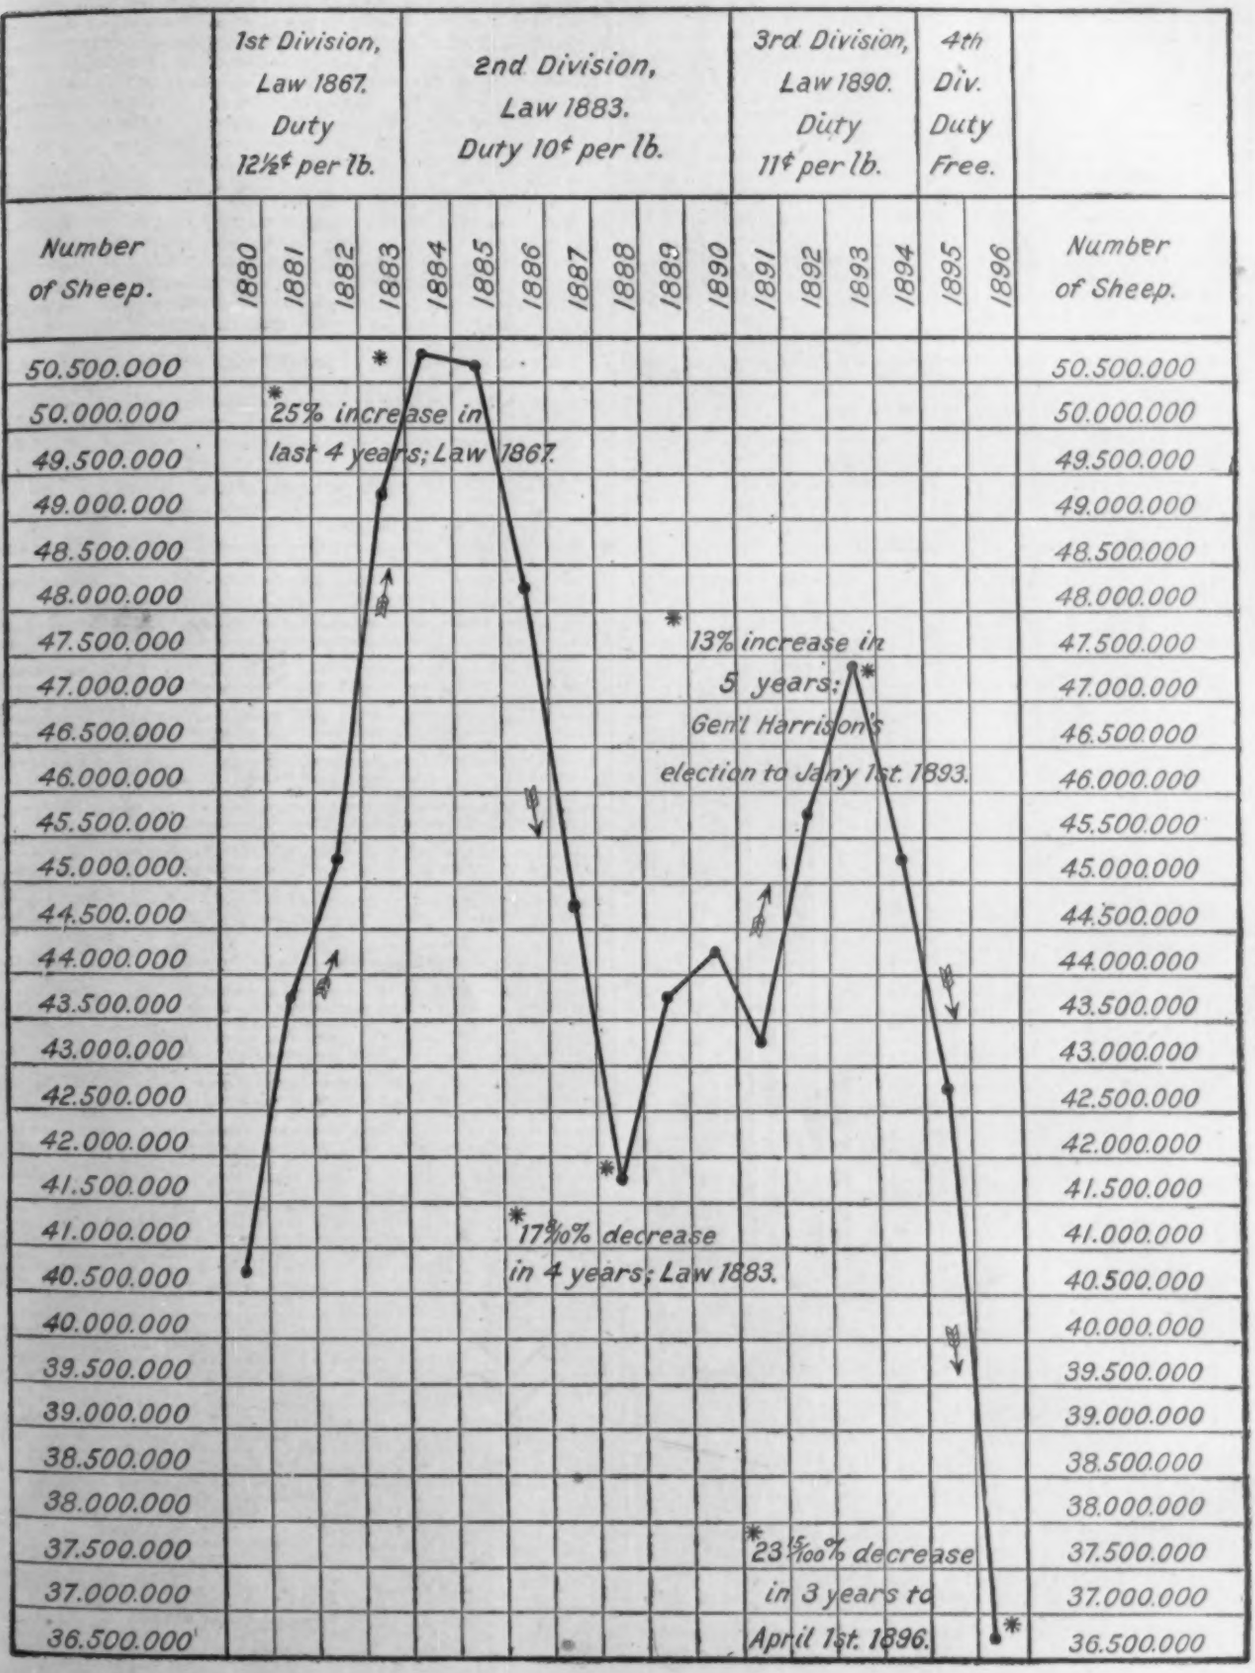
An editorial in the New York Weekly Tribune, of February 17, 1897, properly says:

"The skirting clause [of the McKinley act of 1890] was made the means of defeating the plain object of the law to a large extent."

Here is what was said by Hon. John T. Rich, governor of Michigan, in an address to the National Woolgrowers' Association at Chicago, September 28, 1893:

"The Fifty-first Congress (1890) enacted a law which was intended to give raw wool a fair measure of protection against foreign competition. Like the race between the safe manufacturers and the burglars is the race between tariff lawmakers and tariff lawbreakers, and it takes some years after any new law is passed before it is finally settled by Department decisions just what the law really provides. So far as the fine-wool interests are concerned what is known as the 'skirting clause' has proven to be the weakest part of the fence. Section 383 carefully provides against the sorting of wool to avoid the duty, but after having done this a proviso is inserted 'that skirted wools as now imported are hereby excepted.' The effect of this proviso is to let in wool worth quite as much as Ohio washed fleece at a duty of only 11 cents per pound, when, if it came in whole fleeces, washed, it would pay 22 cents per pound."

The following table is taken from the published statement of the Boonoke Ranche, or Station, in the Riverina section, Australia, and gives all the details of skirting and sorting, showing number of "sorts" to be 110. The lighter portions of this clip were bought for a number of years for export to the United States.



Average sheet, Boonoke, 1888.

Page 27, Consular Report on Australian Sheep and Wool, Department of State, August, 1892.
The above shows the skirted portion to be 47.41 per cent and the "rejections" or "skirtings" 52.59 per cent.

Diagram illustrating the experience with four tariff laws, demonstrating that the flocks always decreased when duties were not above 10 cents per pound and increased when they were over 10 cents per pound.

PROTECTIVE BENEFIT TO WOOLGROWERS UNDER HOUSE AND SENATE RATES AND LAW OF 1890.

I submit herewith an elaborate table prepared by Mr. Justice, showing the actual protective benefits which the woolgrowers received under the McKinley law, and what they would receive under the Senate amendment of 8 cents on first-class unwashed wool. This table shows that with a duty of 8 cents, as proposed by the Senate amendment, the increase in price of Ohio XX washed wool would be only 8¼ cents per pound, whereas it should be 16 cents. It shows that on far Western wools the increase would be but about 5 cents on the average; and when we consider the increased cost of getting Western wools to market we find that the protection under the Senate amendment would be reduced to 2¼ cents per pound, which is worse than no protection at all. If the woolgrower had no protection, he would go out of the wool-growing business and give up at once rather than try to struggle along under an alleged protective duty, which is utterly inadequate, which simply enables him to live along, struggle along, and eventually become bankrupt.

The table referred to is as follows:

The following is an estimate of the increase in price, or protection benefit, on nineteen leading grades of domestic wool that would result from a duty of 8 cents per pound, as proposed by the Finance Committee of the Senate, together with the protective benefit that resulted from 11 cents per pound duty under the law of 1890, and that which would have resulted with the same conditions under the 10-cent duty of the law of 1883 and under the 12¼-cent duty of the law of 1867. This clearly demonstrates that Senator ALDRICH was very much mistaken when he stated that the reduction of over 25 per cent in the duties provided for by the Senate amendments to the House bill would give a protective benefit to the woolgrower equal to 10 or 20 per cent more than that received by him at the time of the passage of any previous tariff law. This table shows that the House rates on wool of the first and second classes should be restored without any hesitation whatever:

Grade.	Protective benefit resulting from increase in prices caused by a duty of—			
	8 cents per pound (Senate amendments).	11 cents per pound (McKinley law of 1890).	10 cents per pound (law of 1883).	Over 12¼ cents per pound (law of 1867).
	Cts.	*Cts.*	*Cts.*	*Cts.*
Ohio XX washed	8¼	12	11	13½
Ohio medium washed	10½	14	12½	16
Ohio coarse washed (quarter blood)	10½	14	12½	16
Ohio fine unwashed	6½	8½	7½	9½
Michigan and New York X washed	7½	10	9	11½
Indiana and Missouri fine unwashed	6	8½	7½	9½
Indiana and Missouri medium unwashed	7½	10½	9½	12½
Indiana and Missouri coarse unwashed	8	9½	8½	11
Nevada, Utah, Oregon, and Montana heavy fine, shrink 75 per cent	5½	7½	6½	8½
Texas, Utah, Oregon, and Montana average fine, shrink 70 per cent	5½	8	7½	9
Texas, Utah, Oregon, and Montana fine medium, shrink 65 per cent	5½	8	7½	9
Texas, Utah, Oregon, and Montana low medium, shrink 60 per cent	6½	9	8½	10½
Ohio XX scoured	20½	28	25½	31½
Ohio medium scoured	16	22	20	25
Ohio quarter-blood scoured	13	18	16½	20½
Nevada, Utah, Oregon, and Montana fine scoured	19½	27	24½	30½
Texas, Utah, Oregon, and Montana fine medium scoured	17½	24	21½	27½
Texas, Utah, Oregon, and Montana low medium scoured	16½	23	21	26½
Texas, Utah Oregon, and Montana coarse (common)	13	18	16½	20½

The protective benefit of the House bill (McKinley law) was about 37½ per cent higher than the Senate amendments (proposed).

PROTECT THE WOOL SORTERS.—WHY ROB AMERICAN LABORERS?

Theodore Justice has said:

While it is true that the skirting of wool has deprived 20,000 American wool sorters of employment, it is a change that marks an advance in the method of marketing wool and benefits the buyer of wool, just as the invention of a sewing machine deprived hundreds of sewing women of employment, but benefits mankind. It is in the march of improvement.—*Tariff Hearings*, page 1570.

"The march of improvement"—"benefits the wool buyer!" How about the woolgrower? How about the wool sorters? The wool buyers object to giving employment to 20,000 American wool sorters, do they?—*Senate Document No. 56*, April 14, 1897, page 97.

WHY WOOL SORTERS DO NOT APPEAL TO CONGRESS.

Judge William Lawrence suggested to a prominent wool sorter that he procure from wool sorters a petition to Congress asking for increased duties on skirted wool. Here is his answer.

FEBRUARY 24, 1897.

Hon. W. LAWRENCE.

DEAR SIR: It will be impossible for me to get such a petition as you require, for the simple reason that many sorters fear to sign it on account of losing their work, and I am sorry to say that I think their fears are well founded. I know from the stand I have taken that in many mills where I am known, if I applied for work, I should be ordered off the premises.—*Senate Document No. 56*, April 14, 1897, page 17.

SECOND-CLASS WASHED GOODS.

Mr. MANTLE. I come now to another very objectionable and unjust provision, which has been found in every wool tariff from 1867 to this time. I refer to the admission of washed wools of the second class at the single or unwashed rate of duty. This concession was granted to the manufacturers in the first instance for the purpose of aiding and encouraging the worsted industry, but the necessity for this exemption from the payment of a just duty has long since passed. The improvements in machinery and in methods have placed the worsted manufacturers upon an equal footing with all others, and to-day there is not a single good reason which can be advanced why they should enjoy this bonus at the expense of the woolgrowers.

But it is not alone the woolgrowers who now object to this free gift of 12 cents a pound duty on second-class washed wool to the worsted manufacturers. I find on page 1608 of Tariff Hearings a most earnest and forcible protest, signed by fifty firms of woolen manufacturers and spinners of Philadelphia, against the injustice done them by giving the worsted manufacturers this unfair advantage over them.

I ask that that protest be printed with my remarks. I shall not stop to read it. It is a very forcible and most emphatic protest against this inequality in rates and the injustice done the woolgrowers and the favoritism shown the worsted manufacturers.

The paper referred to is as follows:

STATEMENT SUBMITTED BY THE WOOLEN MANUFACTURERS AND SPINNERS OF PHILADELPHIA, PA.

PHILADELPHIA, *January 11, 1897.*

Committee on Ways and Means:

The tariff act of 1890, otherwise known as the McKinley bill, it has been stated before your committee, was satisfactory to the woolen manufacturers. We do not so consider it. Having had experience under its operation, we have found that it discriminates against us.

The nature of our fabrics is such that we have to compete in our markets with fabrics and cloth manufactured of worsted. We would respectfully call your attention to the following statement of facts relating to the operation of the act of 1890 as to woolen goods:

In Schedule K, the classification of wools: Class No. 1, clothing wools, and class No. 2, combing wools, are the only classes of wools in which the woolen manufacturers are vitally concerned. The term "woolen manufacturer" here is understood to mean the production of woolen goods by the carding process of wool, and not the combing, and does not include what is termed worsted goods. Under the act of 1890, the McKinley Act, class No. 1 wools are divided into three classes, unwashed, washed, and scoured, the duty upon unwashed being 11 cents per pound; washed, 22 cents per pound; scoured, 33 cents per pound. Class No. 2 being divided into three classes, unwashed, washed, and scoured; the duty upon unwashed and washed, 12 cents per pound; scoured, three times the duty upon unwashed.

We desire to call your attention to the fact of the manifestly unjust disadvantage under which the woolen manufacturer was laboring on account of the inconsistency of the duty on the washed clothing wool of 22 cents per pound, while under the same act permitting the worsted manufacturer to obtain his washed combing wools at 12 cents per pound. The duty upon combing wool being taken at 12 cents, the shrinkage by scouring upon these being, for example, 25 per cent, the result is the duty of 16 cents per pound on clean wool; the clothing wool washed, 22 cents per pound duty. The shrinkage by scouring, assuming it to be the same (although it will be in actual practice in excess), the result will be a duty of 29½ cents, a difference in favor of the worsted manufacturer on imported combing wools of 13½ cents per pound, or 83½ per cent more duty on the clothing wool after scouring than on combing wool after scouring, this being, of course, to the extent as stated, to the disadvantage of the woolen manufacturer.

The intent of the tariff being the protection of all industries, and the laborers dependent upon said industries, by the just and equitable levying of the duties, by the example as cited previously, the conclusion must be that there is a radical injustice being done to the grower of the combing wool or the consumer of the washed clothing wool, to the advantage of the worsted manufacturer and to the detriment of the consumer of goods. The advantage of the worsted manufacturer in obtaining his wools at relatively lower rates of duty enables him to manufacture his goods and place the same upon the market at such a price that precludes the successful competition of the woolen manufacturer.

While we do not desire to antagonize either the woolgrower or the worsted manufacturer, yet it does appear to us that here was an inconsistency in our tariff laws that should not continue in the new bill now under contemplation. Either the grower of the washed combing wool should have placed upon his product the same rate of duty as the grower of washed clothing wool receives, thereby giving to him the same measure of protection (by which means one of the intents of the tariff will be fulfilled—the stimulating of an industry that is capable of indefinite expansion), or the woolen manufacturer should not be asked to pay an excess of duty upon his washed clothing wool over and above the duty paid upon the raw stock of his competitors. The merging of class No. 1 and class No. 2 wools would result in eradicating the discriminating duties to which objection is here made, and would also simplify the schedule.

The Leicester Mills Company (Incorporated), woolen knit goods and yarns, Germantown, Philadelphia, Wilson H. Brown, treasurer; Joseph Scatchard Sons, yarns, Germantown, Philadelphia; E. M. Cope & Co., underwear manufacturers, Germantown, Philadelphia; J. Randall & Bro., manufacturers of yarns, Germantown, Philadelphia; George Pebudy, manufacturer of knit goods, Germantown, Philadelphia; Joseph Fling's Sons, yarns, Germantown, Philadelphia; Benjamin W. Greer, Germantown, goods; J. & B. Allen, Germantown, yarns and goods; Samuel Wood, Germantown, yarns; Hamill & Co., Germantown, yarns and goods; Cruyens, Button & Co., Germantown, manufacturing yarns; David Barrows & Son, manufacturing yarns; A. Platt & Son, yarns, Manayunk; Clayton G. Rice, Manayunk, yarns; Sevill Schofield, yarns and fabrics; Arkonia Manufacturing Company, fabrics, Philadelphia; Albert Crenshaw, fabrics, Philadelphia; John Norris, fabrics, Philadelphia; Bower & Kaufmann, hosiery, Philadelphia; Thos. A. Pearce & Co., knit goods, Philadelphia; Beswick & Kay, woolen yarns; The E. H. Godshalk Company, knit goods; B. F. Boyer & Co., yarns; Henry B. Farrell, yarns; Jonathan Ring & Son, yarns; Henry Grant & Son, yarns; H. P. Rinehart, yarns;

Wm. Ernsley & Bro., yarns, Philadelphia; McGinley & Klenk, yarn manufacturers, Adams and Emerald streets, Philadelphia; J. N. Landenberger & Co., knit goods; Credential Manufacturing Company, hosiery manufacturers; Moore Manufacturing Company, woolen and worsted goods manufacturers; J. Levis Moore, Jno. G. Canuth & Co., goods; W. A. Gardner, goods; John Dalton & Co., yarns and goods; A. Erskine, goods; Wm. Rhodes & Son, manufacturers of woolen shawls; A. Oliver, manufacturer of underwear; Star and Crescent Mills Company, Lehigh avenue and Hanover; W. B. Thuapleton, Howard and Huntingdon, manufacturers of hosiery; Chas. M. McCloud & Co., yarn manufacturers.

Mr. MANTLE. The effect of this discrimination against the woolen manufacturer is as follows: He imports 100 pounds of unwashed clothing wool of the first class, shrinking 50 per cent, upon which, under the House rate, he pays a duty of $11, and from which he gets 50 pounds of scoured wool.

On the other hand, the worsted manufacturer imports 100 pounds of washed wool of the second class, which shrinks only 25 per cent, upon which he pays a duty of $12 and from which he gets 75 pounds of scoured wool. Thus, by the payment of only $1 more duty, he gets 25 pounds more of clean wool; or, in other words, he gets, on the payment of 12 cents in duty, what costs his competitor 16⅓ cents.

Its effect on the woolgrower is, however, far more disastrous, for the reason that 16,000,000, or nearly 50 per cent, of the sheep in the United States, are producing crossbred wools with which these imported washed second-class wools come into direct competition. I may state that this estimate is based upon the judgment of woolgrowers and wool merchants who are very familiar with the character of the domestic product.

Our wool product last year was 272,000,000 pounds, and it is therefore safe to assume that at least 100,000,000 pounds of this is of a character that competes directly with the imported washed second-class wools.

The second-class washed wools from Canada and the United Kingdom shrink only 25 per cent, while the domestic crossbreds shrink fully 50 per cent. The woolgrowers of Ohio, Indiana, Michigan, Kentucky, Illinois, Wisconsin, Iowa, New York, West Virginia, and Pennsylvania, who grow what are known as the mutton breeds of sheep, are the ones who suffer chiefly from this unfair competition, which practically reduces their protection one-half.

The imports of second-class washed wools for the year ending June 30, 1896, were 15,756,318, valued at $3,509,736.

	Pounds.	Value.
From the United Kingdom (London), shrinking 25 per cent	6,505,645	24.5
From the Dominion of Canada, shrinking 25 per cent	3,817,100	20.8
From Argentina (heavier shrinkage)	3,273,075	14.1
From other countries	2,160,438	.....

This is equivalent to 20,000,000 pounds of American crossbred wool shrinking 50 per cent.

CLASSIFICATIONS.

Much dissatisfaction also existed among woolgrowers over the classifications of the law of 1890, the belief among them being that, owing to defective descriptions, many varieties of wools from Europe, Asia, and Africa which properly belonged in the first class were passed through the custom-house as third class, thus avoiding the higher rate of duty.

The difficulty, however, in this respect, was not wholly due to the faulty classifications of the law. Some of it had arisen out of the fact that since the passage of that law changing fashions and improved processes of manufacture have made it possible to utilize many of these low-grade wools in the manufacture of textiles other than carpets. Hence many of these wools have to all intents and purposes become clothing wools.

In the House bill an attempt has been made to correct these defects in former classifications, and to remove the causes of complaint by transferring to the first class some of the wools which have heretofore been included in class 3.

Table showing scoured wool values of fine wool in London and Boston, differences of same, scoured wool duties, and number of sheep in the United States each year, 1880 to January 1, 1894.

[Compiled from official sources.]

Year.	Scoured wool values.		Difference.	Duty on scoured wool.	Number of sheep in United States.
	Boston.	London.			
1880	$1.02½	$0.60	$0.42½	$0.366	40,765,900
1881	.95½	.53	.42½	.358	43,576,899
1882	.90½	.53	.37½	.358	45,016,225
1883	.86	.51	.35	.30	40,237,291
1884	.80½	.46	.34½	.30	50,626,626
1885	.71½	.41	.30½	.30	50,360,243
1886	.74	.41	.33	.30	48,322,331
1887	.73½	.42	.31½	.30	44,759,514
1888	.68	.42	.26	.30	43,544,755
1889	.73½	.48	.25½	.30	42,599,079
1890	.73½	.44	.29½	.30	44,336,072
1891	.70½	.40	.30½	.33	43,431,136
1892	.63	.34	.29	.33	44,938,365
1893	.55	.33	.22	.33	47,273,553
1894	.50	.32	.18	.33	45,048,017

It takes 3 pounds of unwashed wool to yield 1 pound of scoured or clean wool. The duty on 1 pound of unwashed merino wool being 11 cents, the price of scoured wool in Boston, in order to secure to the American woolgrower the full protective duty intended by the law, should be 33 cents more than the London price. By reference to the foregoing table, however, it will be seen that under the McKinley law the difference in the two prices—London and Boston—steadily grew less, until in 1894 it was only 18 cents, which meant that the duty of 11 cents per pound on unwashed merino wool had dwindled to 6 cents.

Statement of Mauger & Avery, wool dealers:

NEW YORK, *July 24, 1896.*

S. N. D. NORTH, Esq., *Boston.*

DEAR SIR: Your favor of the 21st instant is received, inclosing proof slip of the letter and tables prepared by us a year ago for the Senate Finance Committee, with the request to make the calculations with which said letter concludes, based upon the prices of Ohio fine washed fleeces and Port Phillip (Australian) good average grease as these prices stood July 1, 1893.

Continuing that same basis of calculation, we reach the following result, viz:

Ohio fine washed fleece costing 24 cents July 1, 1893, and shrinking 55 per cent, costs 53⅓ cents per scoured pound.

Port Phillip good average grease, costing in London July 1, 1893, 18 cents, and also shrinking 55 per cent, costs in the United States, duty and charges paid, 67½ cents per scoured pound, as follows:

Wool	$0.18
Duty	.11
Charges	.0150
Cost	.3050

or 67½ cents per scoured pound.

Cost in London, 40 cents per scoured pound.

The difference between 53⅓ cents and 40 cents, or 13⅓ cents, is the amount by which the price of Ohio fine scoured wool is enhanced because of the duty and charges. This, on fine Ohio, shrinking 55 per cent, is equivalent to 6 cents in the washed condition.

If we assume the duty of 11 cents per pound removed, and take the prices of Ohio and Port Phillip that ruled July 1, 1893, as the basis of another calculation, viz:

Ohio fine-washed fleece costing 24 cents and shrinking 55 per cent gives clean cost 53⅓ cents, and

Port Phillip, good average, costing in London	$0.18
Freight and charges added	.0150
Making cost landed in the United States	.1950

which, shrinking 55 per cent, gives clean cost of 43⅓ cents, we still find Ohio fine washed costing more than Port Phillip on this calculation, 10 cents per scoured pound more; but it would really be greater, inasmuch as Ohio fine washed fleece is not skirted, and its cost is thereby increased over that of Port Phillip at least 3 cents per scoured pound, in our opinion. The difference of, say, 13 cents per scoured pound is, on fine Ohio, shrinking 55 per cent, equivalent to about 6 cents per pound in the washed condition.

* * * * * * *

Yours truly,

MAUGER & AVERY.

This estimate was on prices as they stood July 1, 1893—that is, on Port Phillip. London price, 18 cents per pound, and the New York price, same date, of Ohio unwashed merino, 24 cents.

The effect of the 11 cents per pound duty then was:

(1) It gave no protective benefit to Ohio unwashed merino.

(2) It gave to Ohio washed, shrinking 55 per cent in scouring, a protective benefit of 6 cents per pound.

(3) On scoured Ohio merino the protective benefit was about 12 cents.

The foregoing results are verified by the statement of the Government in the Treasury Department, as follows, in answer to the inquiry from William Lawrence:

WASHINGTON, D. C., *January 11, 1897.*

SIR: Please answer for use before the Committee on Ways and Means in Congress on the following facts the questions thereto appended. The value of wool as shorn in the grease depends on the clean product it will yield in scouring. The Australian unwashed merino, as imported, shrinks in scouring an average of 50 per cent. Ohio merino unwashed shrinks in scouring 63½ per cent. It has been demonstrated by Mauger & Avery that a tariff rate of 11 cents per pound gave to Ohio washed merino, shrinking 55 per cent, a protective benefit of 6 cents in competition with Australian, as conditions and prices stood July 1, 1893.

1. What is the protective benefit to an unwashed pound of such Ohio merino?

2. What is the protective benefit to a pound of scoured wool?

ANSWER.

Assuming that the price of such Australian Port Phillip washed was, July 1, 1893, 18 cents per pound, and that Ohio washed was, in Boston, 24 cents per pound; then, owing to the different shrinkage of the wools, the prices of the several stages of the wool would be as follows:

	London (Port Phillip).	Boston (Ohio).	Protective benefit.
	Cents.	*Cents.*	*Cents.*
Unwashed	12	12	0
Washed	18	24	6
Scoured	24	36	12

* * * * * * *

Yours, respectfully,

JOSEPH S. McCOY,
Government Actuary.

JOS. S. McCOY, Esq., *Government Actuary.*

In the report accompanying the House bill from the Ways and Means Committee I find the following:

The wool and woolen schedule is substantially that of the tariff of 1890, except that a few kinds of wool classed under that and previous acts as carpet wools, which have been largely used for clothing purposes and whose use for a purpose not intended by the old classification has caused much irritation among woolgrowers, have been transferred from third-class to first-class wools.

It will be observed that the House report confirms the claim of the woolgrowers that these cheap third-class wools have been largely used for clothing purposes.

I find on examination that six varieties of wool have been transferred from class 3 to class 1, as follows:

1. Bagdad wool;
2. China wool;
3. Castel Branca;
4. Adrianople skin wool or buther's wool;
5. Egypt; and
6. Morocco.

According to a London wool circular of last December the average value of these six classes was 15.66 cents per pound.

I find, however, quoted in the same circular six other varieties of third-class wools of the same kind, which it is asserted can be used for clothing purposes, the average price being 14.8 cents per pound, and still fifteen more of the same grade or character, the average price of which is 15.23 cents per pound. I also find in the same circular eight varieties of unwashed merino wools, the average price of which is only 12½ cents per pound, showing that there are more than twenty kinds of third-class wools of very light shrinkage, the value of which is from 2 to 2½ cents per pound higher in the London market than unwashed merino wools.

Manufacturers will not, of course, buy American or other merino wools under a duty of 8 or 11 cents per pound whenever they can supplant them with these third-class wools, shrinking only a quarter as much, and get them in at a duty of 32 per cent ad valorem, or 4 cents per pound specific.

In this view of the matter, therefore, it appears that the transfer of six classes of third-class wools to the first-class by the House bill will not result in much relief to the woolgrower in the way of removing this character of competition, since there is a wide field not enumerated from which the manufacturer and importer may still select. Not only this, but it is asserted by experts on wools who are familiar with the practice in the customs department that the specific mention by name in class 1 of such wools as "Bagdad," "Morocco," "China lambs' wool," "Adrianople skin wool," and "Castel Branca," will operate inferentially to exclude a great many wools of the same character which are grown in contiguous localities, and that therefore the change in classification, while designed to benefit the woolgrower, will in practice, as has so often been the case before, actually result in his injury.

This is the opinion of Hon. E. A. Greene, who was the president of the commission appointed in 1890 to examine and classify standard samples of wools for use in the Government custom-houses. There is no better authority than Mr. Greene, and this is what he says upon the subject:

It is a mistake to mention Morocco or Adrianople wools in the first class; they have never been anything else under any bill, and by naming them specifically it leaves an opportunity to get in other African and Turkish wools as third class.

Mr. Green's opinion is that all European wools (with two exceptions) and all wools from Turkey in Asia and from Africa should be included in the first class, where they properly belong, and in this opinion he is joined by Mr. Justice.

The same objection lies against the classification of goat hair. "Angora goat" is especially mentioned in the second class, and thus a large number of mohairs of practically the same quality as Angora will be excluded if this designation is permitted to stand. Mr. Green says, in a letter to Judge William Lawrence:

2225 TRINITY PLACE, PHILADELPHIA, *March 30, 1897.*

MY DEAR JUDGE: * * * I wish we could have a duty on wool of 15 cents, but the people will not stand it; therefore whatever is settled on I want to see the law so there will be no evasion. Herdwick is a wool raised in Yorkshire. There are third-class wools in Holland, Germany, Austria, Portugal, Spain, and Italy, but advantage has been in the past taken of the classification to bring in second-class wools as third from Germany and Holland. Donskoi is essentially a carpet wool, very stiff, and is a necessity. No duty would ever lead to its being grown here, but many third-class wools can be, and if they were it would help the Merino and English blood sheepmen.

It is said that the Herdwick is as good mutton as the best Down. They are hardy and could be raised to advantage on our Northern land, and many Asiatic wools could be grown to advantage in the States and Territories I have before named. What I mean by excluding European third-class wools is by adding to the first-class paragraph also all native European wools, except Black-face Highland, and Donskoi. Also all native African wools. This confines third class to Asia and South American. * * * I do not think it would hurt carpet men with compensating duties to have a high rate on wools, but they are afraid that it can not be gotten through. If it did, it would bring a big revenue to the Government.

Sincerely, yours,

EDWARD A. GREENE.

PHILADELPHIA, 2225 TRINITY PLACE, *April 1, 1897.*

MY DEAR JUDGE: * * * Castel Branca has been third class. Butchers' wool is commercially known as Kassapbutaleteca—Turkish for butcher; with the exception of coarsest grade, was first class under McKinley bill. You can not be too extreme to suit me, but we must keep so the people will not kick. The public think sheep require no care, and wool duty is not considered with favor. Only a few days ago a Republican said to me, "I think it an outrage to put a duty on wool; it requires no labor." And he was astonished when I showed him that the percentage of labor cost was greater in wool than many kinds of goods.

Sincerely, yours,

EDWARD A. GREENE.

Another apparent inconsistency in the classification is that, while "China lamb's" wool is placed in the first class, all other China wools are relegated to the third class. A practical woolgrower can easily understand why a lamb's wool, being much softer and finer, should command a higher price than the fleece from a matured animal, but he fails utterly to comprehend how the fleece from the same individual sheep, which pays a duty of 11 cents this year, can so change its nature and character as to be admitted at a duty of from 2 to 4 cents next year. He knows full well that no such sudden metamorphosis can possibly occur in an American sheep in so brief a time, and he naturally wonders what reasons influenced the committee in making this remarkable classification.

I mention these objections for the purpose of showing the necessity of amending the proposed bill in these important particulars, so that the purpose of the law will not again be defeated in its administration.

ADMINISTRATION OF THE LAW.

It must be borne in mind that in the administration of the customs laws the importer is always upon the ground to defend his interests and protect his claim. The wool importers are largely aliens, they owe no allegiance to this country. They are here simply for the purpose of making money. As a rule, they are possessed of great influence, which they do not hesitate to bring to bear whenever doubtful questions are to be passed upon by custom-house officials.

But while the importer is on the ground, ready to take advantage of every technicality which the wording of the law may afford, the woolgrowers, who have such a vital interest in the question, are scattered all over the United States. They are upon their farms and ranches looking after their flocks and herds, and have no special agent to protect their interests. They must rely entirely upon the Government agents at New York, Boston, and Philadelphia. These officials are men of the strictest integrity. Their honesty is not questioned.

But when we consider the magnitude of the transactions involved in the business of importing wools, the wide latitude left for the exercise of the judgment of the Government inspectors, and reflect that the pressure is all from one side, it is not a matter of surprise that in the general administration of the law the importer always gets the benefit of the doubt. It is wise, therefore, to profit by past experience and remove as far as possible all ambiguities and doubtful phrases from the classification clauses of the pending bill.

Wool imports for 1895-96—One year.

This table shows that the great bulk of the imports of wools of class 1 come from the United Kingdom, British Australasia, British Africa, and South America, in the order named. The value of those from British Africa and South America is much lower than the others, due principally to their heavier shrinkage. It must be remembered, however, that the above imports were under free wool. Under a protective tariff the value of all these wools as imported will be increased by skirting, sorting, and otherwise cleaning, as far as can possibly be done in order to reduce the shrinkages, and thus avoid the payment of duty. Of course as their value is thus increased the ad valorem equivalent of the specific rate of duty will be lowered. And what is true of wools of class 1 is also true of class 2.

The bulk of wools of class 3 come from the United Kingdom, China, South America, Turkey, and Russia. An examination of the above statistics, together with the testimony of Mr. Edward A. Green, chairman of the commission which selected the standard samples of wool for the Government customs-houses, and other competent authorities will, I think, show that the transfer of the six classes referred to in the House report will be of but slight advantage to the home grower, as but a comparatively small quantity is involved.

By far the simplest, most effective, and most equitable method of treating third-class wools is to place a single rate of duty upon them without any dividing line of value, and this rate should not be less than 8 cents. This rate would be protective, and would result in a handsome revenue to the Government.

With a dividing line of value it is absolutely certain that the bulk of the importations will come in at the lower rate of duty. This has been the experience under every arrangement of this kind heretofore as to wool. The dividing line of value, therefore, leads to fraudulent undervaluations, and we ought not deliberately to again open the door to a repetition of the frauds which have been practiced in the past.

COMPENSATORY DUTIES.

Mr. President, in consideration of the fact that a large number of woolen and worsted manufacturers are opposed to a just duty on raw wool, it may not be amiss to glance for a few moments at the matter of the compensatory duties which these manufacturers receive to indemnify them for the duties they are supposed to have paid upon wool.

In order to make this matter as plain as possible, I may again repeat that the McKinley law placed a duty of 11 cents per pound on unwashed wool of the first class, and then, to compensate the manufacturer for the duty he was thus compelled to pay upon wool and to place him upon an equal footing with the foreign manufacturer who gets his wool free, he was allowed a "compensatory" duty of four times the duty on 1 pound of unwashed wool of the first class, which would be equal to 44 cents upon 1 pound of finished cloth, the presumption being that it took 4 pounds of greasy wool, shrinking 66⅔ per cent in scouring, to make 1 pound of cloth.

Thus, if the manufacturer imports 100 pounds of unwashed wool of the first class, shrinking 66⅔ per cent, he will pay $11 duty and will get out of it 33⅓ pounds of scoured wool, out of which he will make 25 pounds of finished cloth on the basis of 4 pounds of greasy wool to 1 pound of cloth.

If, however, he imports 100 pounds of unwashed skirted wool of the first class, shrinking only 50 per cent, he will still pay but $11 duty, but he will get from it 50 pounds of scoured wool instead of 33⅓ pounds, and he will make out of it 37½ pounds of finished cloth instead of 25 pounds. He has thus gained 12½ pounds of cloth without any increase in the amount of duty paid, and has saved out of his compensatory duty of 44 cents 14.6 cents, which is a clear protective gain.

Then again, it must be remembered in this connection that while washed wools of the first class are required to pay double duty washed wools of the second class are not. They come in at the single rate, which was 12 cents per pound in the McKinley law, and is the same in the House bill. The average shrinkage of this second-class washed wool, as imported, is less than 25 per cent. It is used in the manufacture of worsted cloths, and the compensatory duties are the same as upon other cloths. Therefore, if the manufacturer imports 100 pounds of second-class washed wool, he will pay $12 duty and will get out of it 75 pounds of scoured wool, out of which he will make 56¼ pounds of finished cloth. He has thus gained 31¼ pounds of cloth upon the payment of but $1 additional duty, and has saved out of his compensatory duty of 44 cents 24 cents, which is again a net protective gain.

Of course I make this computation upon the assumption that the manufacturer actually puts the scoured product of 4 pounds of unwashed wool of the first class into a pound of finished cloth. If he puts less, which he often does, or if he uses cotton and cheap substitutes for wool, which he very often does, or if he uses in part the cheap third-class wools with their very light shrinkage and very low duties, which no doubt he does whenever he can, he saves still more out of his compensation, which goes to him as clear protective profit.

This compensatory duty provided for the manufacturers in the several paragraphs of the woolen schedule in the pending bill varies from one and one-half times the duty on 1 pound of unwashed wool of the first class to four and one-half times, according to the weight, character, and value of the goods.

For instance, paragraph 364 of the House bill, relating to "knit fabrics," "cloths," etc., provides that when the value is not more than 30 cents per pound the duty shall be three times the duty on 1 pound of unwashed wool of the first class (which in the House bill is 11 cents), and in addition thereto 6 cents per pound and 20 per cent ad valorem. I find that the unit of value of the importations of this class of goods in 1895 was 25 cents per pound. The whole duty to the manufacturer, therefore, would be as follows:

Three times the duty on 1 pound of unwashed wool, at 11 cents per pound	$0.33
Additional specific duty	.06
Twenty per cent ad valorem on value of 25 cents	.05
Making the total specific protection on 1 pound of goods valued at 25 cents per pound	.44

If we reduce this to an ad valorem basis, we find it to be 175 per cent.

It will be noticed that the compensatory duty which the manufacturer is to get in this case is 33 cents, or 7 cents more than the average value of this class of imports in 1895. Of course it must be assumed that 3 pounds of unwashed wool goes into the manufacture of 1 pound of these "cloths" and "knit fabrics" in order to justify this compensatory duty. But the language of the law reads "made wholly or in part of wool," and as a matter of fact it is well known that these low-priced goods are not made wholly

of wool, but that every sort of cheap adulterant, such as cotton, rags, shoddy, and other substitutes for wool, including the cheap third-class wools, are used in their manufacture.

It is manifestly unreasonable to suppose, however, that the scoured product of 3 pounds of unwashed wool of the first class goes into a pound of these goods, as the wool itself would be worth much more than the value of the finished product. But no matter how small the percentage of wool actually used, the manufacturer receives a compensatory duty on this grade of goods of three times the duty on unwashed wools of the first class just the same. And what is true of the case I have cited is also true of all grades of manufactured woolens and worsteds. Cheap substitutes for wools and cheap third-class wools enter to a greater or less extent in their make-up, but the manufacturer gets his compensatory duty on the basis of two, three, four, or four and a half times the duty on 1 pound of unwashed wool of the first class, whether that amount of wool goes into the manufacture of the goods or not. Therefore it is perfectly plain that in many instances a large part of the so-called compensatory duty given the manufacturer is, in fact, protection pure and simple, and ought not to be charged up to the woolgrower, which it is.

I have made the foregoing computation upon the rates contained in the House bill, but the relation between the woolgrower and the manufacturer is not changed by the proposed Senate amendments, except simply that the compensatory duties are lowered in the same proportion as the duties on wool are lowered. In other words, the cut all comes off the woolgrower and but little from the manufacturer.

Mr. President, I am not prepared to say that the manufacturer gets too much protection. I am not finding fault with the rates proposed on manufactured woolens. I am simply trying to show the relation which these compensatory duties bear to the woolgrower, and to prove that they are by no means a true indication of the amount of protection which the woolgrower actually receives, and must not be accepted as the basis upon which to measure the protection accorded him.

In all the tariff acts which have been considered from 1864 to the present time the woolgrowers have never so much as offered a suggestion as to what the manufacturers' rates should be, while, on the other hand, they have never yet come before Congress to express their wishes that they have not found themselves confronted with the active opposition of the wool manufacturers more or less openly expressed. In short, the manufacturers have heretofore written the wool tariff for the woolgrower, and the indications seem to point to the conclusion that they are striving to do so again.

Mr. President, in what I have said upon this subject I have but imperfectly presented the woolgrowers' side of this contention as to what are just and proper rates on wool. The woolgrowers themselves have given the subject much consideration, and have formulated a bill which embodies their views, and which I have heretofore introduced as an amendment to the wool schedule of the pending measure. This bill has received the sanction and indorsement of the woolgrowers of the whole country, and has been approved by the National Wool Growers' Association. It is charged by the manufacturers that the rates proposed are excessive, but for my own part I am convinced that if viewed from the true protective standpoint of desiring to stimulate and encourage the woolgrowing industry so as to produce all the wool we consume, the woolgrowers' bill is a just, sound, and defensible measure.

If, however, the Senate in its wisdom shall decide not to grant the request of the woolgrowers by accepting their amendment, then I respectfully suggest that simple justice at least demands that the House rates on the first and second classes shall be adhered to; that an additional duty of at least 3 cents per pound shall be laid on the light, shrinking, skirted Australian wools; that washed wools of the second and third classes shall pay double duty the same as those of the first; that scoured wools of the third class shall pay treble duty the same as those of the second; that a single specific rate of not less than 8 cents be placed upon third-class wools, but that if the dividing line of value is to be retained, it shall be reduced to 8 cents; that the minimum rate below 8 cents shall be raised to 5 cents, and that the maximum rate above be raised to 8 cents; that the classification be amended so as to include all wools from Turkey in Europe, all wools from Africa, and also China wools, and that such penalties be provided as will insure a strict and impartial administration of the law.

These amendments, while falling short of what woolgrowers require, will go far toward remedying the imperfections and inequalities of the pending bill.

And now, Mr. President, with many apologies for having detained the Senate so long, but giving as my excuse the urgent need of the worthy class of men for whom I speak, and the gross injustice done them in former tariff legislation, I will bring my remarks to a close by quoting a few sentences in favor of adequate protection to woolgrowers from two of the ablest and most distinguished members of the Republican party, one of them the recognized champion and great defender of "protection," who now fills most worthily the highest place within the gift of the American people as a result of his advocacy of the protective policy, the other one of the ablest and most honored members of this body, whose words always command the most profound attention and respect.

Speaking to a convention of woolgrowers at Columbus on January 12, 1893, President McKinley said:

> More than once they have demonstrated their power in this State. I do not fail to recall what punishment you inflicted upon the Republican party in 1883 for having in a tariff act of that year reduced wool from 12 cents and more, according to value, to 10 cents per pound. You defeated the Republican candidate for governor and elected the Democratic candidate. You carried the legislature for the Democratic party by a great majority, and thereby placed in the Senate of the United States a Democratic Senator. You did all this. You organized to do it, as you had a right to do, because you believed the Republican party in this slight reduction on wool had done your interest a positive injury. * * * You have made yourselves felt more than once and given evidence of your power. * * * You are entitled to full and adequate protection, just as every other interest is entitled to the protection of its own Government against competing products, and you should express your convictions in this respect in every possible and legal and constitutional way. * * *

This was the language of President McKinley, addressed to the woolgrowers of Ohio in 1893. He tells them they "are entitled to full and adequate protection." I commend these utterances to the earnest consideration of the Republican members of the Senate, and particularly to the distinguished Senator from that State whose reelection to this body will depend upon the result of this fall's campaign. The woolgrowers of Ohio are watching the action of Congress with vision sharpened by long suffering and great loss, and if Republican pledges shall fail of materialization they will again "defeat the Republican candidate for governor" and again "carry the legislature for the Democratic party by a great majority," and once again "place in the Senate of the United States a Democratic Senator from Ohio."

In the Senate, on February 26, 1896, the honorable Senator from Massachusetts used these words, which possess an added force and significance at this moment. He said:

> I have always been one of those who, in a public life now lasting nearly twenty-eight years in this and the other House, have voted in accordance with the desires of the representatives of the woolgrowing communities in this country. There has, so far as I remember, never been a discussion of that subject in which I have not given my voice and my vote for the largest protection on wool and on other interests of those communities that they have themselves desired. * * * I believe that when, as a permanent policy in this country, protection to wool is doomed, protection is doomed. As I had the honor to say when the Wilson bill was pending in the Senate, it is with protection and wool as in Byron's prophecy:
>
> "While stands the Coliseum, Rome shall stand;
> When falls the Coliseum, Rome shall fall."
>
> And he is a purblind manufacturer, whether in New England or elsewhere, who supposes that the American people will consent to continue the protection on his own industry which is denied to the farmer and the woolgrower of the great West.

And again, on the 14th day of April last, upon the occasion of the presentation of the woolgrowers' memorial, the distinguished Senator used the following language:

> Without a proper tariff on wool there will never be a protective system in this country of any value, and the question, What is a proper tariff on wool? from the necessities of the case, from the consideration as to where the political power in this country is lodged and is to be lodged—I am not speaking now of parties, but parts of the country—has to be settled in accordance with the sound and sober judgment of the farmers who grow wool. We have got to take that, to act upon it, and trust to the fact that the same sound and sober judgment will induce them to see that wool is not protected if woolens are let in from abroad without proper duties, because if that is done it will overthrow the woolgrowing of this country just as much as if it came in in the shape of wool.

I commend these utterances of the senior Senator from Massachusetts to the careful consideration of the protectionists in this body. They are words of wisdom, uttered with a full knowledge of the requirements of the situation and of the necessities of the great body of farmers and flockmasters whose interests are involved.

Mr. President, no protective tariff can hereafter endure that does not fully guard the interests of the great mass of producers of what are known as "raw materials." Protection to wool is the keystone in the grand arch of protection, and unless it be well guarded and preserved the whole structure must fall to the ground.

NOTE.—John Consalus, of Troy, N. Y., a wool merchant, says:

About 40 per cent imported as carpet wools are used in the manufacture of clothing goods.

While the manufacturer of clothing goods obtains only about 30 to 35 per cent clean wools from imported South American or Cape of Good Hope merino, the importer of carpet wools gets 80 to 90 per cent of scoured wool.

Hence the clean wool from 100 pounds of carpet wool is worth often more than the scoured wool from 100 pounds of the South American or Cape merino; hence should pay as much duty as merino.

I have a letter from a Russian wool dealer who proposes to shirt and dry his carpet wool and guarantee it not to shrink over 15 per cent in scouring.

The merino wools of South America and Cape of Good Hope shrink in scouring an average of 67 per cent, the Australian imported into this country only from 42 to 50 per cent. (See Tariff Hearings, 1616.)

NOTE.—The agreement as to 4 pounds of greasy wool shrinking 66⅔ per cent being the basis of compensatory duties was made law in 1867.

APPENDIX 1.

The Mouflon (Ovis aries), even yet found wild in the mountains of Sardinia, Corsica, Barbary, Greece, and Asia Minor, with short, course fleece resembling hair quite as much as wool, is the parent stock—the genus—from which all our various breeds of sheep have been evoluted by domestication and breeding. (One Hundred Years of American Commerce, Chapter XXXV.) New York, D. O. Haynes & Co., 1895.

The sheep of the world may now be placed in three general classes (Tariff Hearings, 1404):

The first and best are the Merino, with their subvarieties of Saxony, producing the picklock wool, the delaine merino, and various other varieties, with superiority of wool in the order stated. The wools are frequently quoted simply as "fine" wools or "clothing" wools.

The second, the sheep of English blood, the mutton breeds, embracing Leicester, Cotswold, Lincolnshire, Shropshire, and others of the Down varieties, including the Canada long wool, etc. These for convenience may be designated by the general name Down sheep, their wool down wool, generally but improperly called "combing" wools, since all wools now can be "combed."

The third, the Mouflon, the sheep of the parent stock, but generally much improved by domestication and breeding in the progress of evolution. These include the Russian Donskoi, native South American, native Mexican, native Smyrna, etc. This class of sheep is found in Russia, Greece, Mexico, and elsewhere.

The value of all wool as shorn from the sheep depends on (1) its quality and (2) on the scoured or cleaned product. All wools, as shorn, without cleansing—called "grease" wools—shrink in scouring. The clean product is called "scoured" or "clean" wool. Wool washed on the sheep's back is advanced only one stage in the process of scouring.

Wools quoted in foreign wool circulars as "fleece" wool is wool washed, generally spout washed. The average merino wools of the world will shrink in scouring 67 per cent, the down wools generally less than 30 per cent. (Tariff Hearings, pp. 1360-1362, 1403; Senate Doc. No. 17, December, 1895, p. 50, Fifty-fourth Congress, first session.)

The merino and down wools are both used in the manufacture of clothing goods, both "woolen goods" and "worsted goods."

By reason of the light shrinkage of the down wools, 1 pound of these unwashed wools will give as much clean-scoured wool as 2 pounds of average unwashed merino; hence the duty should be much more than on merino wools.

APPENDIX 2.

The following table shows the effect of the free-wool act of August 27, 1894, resulting in a loss to flock owners of $178,706,121, with items thus:

Year.	Number of sheep.	Value.	Loss on value of sheep.	Number pounds wool.	Farm value.	Loss on wool.
1893	44,938,365	$116,121,270	----------	333,018,405	$47,185,283	----------
1896	47,273,553	125,909,204	----------	348,538,138	23,164,040	$24,021,243
1894	45,048,017	89,188,110	$36,723,154	325,210,712	22,122,528	25,002,755
1895	42,294,064	66,685,767	22,500,343	294,290,726	23,543,738	23,641,545
1896	36,464,405	61,989,488	4,696,279	270,474,706	20,800,000	26,385,283
Total	----------	----------	63,919,776	----------	----------	99,110,821

The prevailing sentiment of the woolgrowers of the West is expressed by their leading journal, Wool Markets and Sheep, published in Chicago. The following extract is from an editorial article in its issue of May 13:

"The bill as reported to the Senate is a tricky, deceptive measure, and places the woolgrower in a still worse position than the Dingley bill which was perforated with innumerable loopholes for fraud. Wool men who have the growers' interests at heart are commencing to realize the dastardly attempt on the part of the East to control both Houses of Congress to defeat Western interests by giving to New England all she wants. The measure, as agreed upon by the Finance Committee, is an insult to the great Western domain, and which should be rebuked by all who follow in the wake of agriculture.

"The West is tired of this one-sided legislation. It is too much East. The Ways and Means Committee of the House of Representatives and the Finance Committee of the Senate have experts only from Eastern corporations to assist them in making wool duties. They take for their clerk S. N. D. North, secretary of the National Woolen Manufacturers. They use a prominent wool dealer, who is not only interested in the importation of Australian wools, but has brothers-in-law who are large manufacturers of imported stock. How can the woolgrower get justice at the hands of such a combine as this? Is it not time to cry shame for the lukewarmness upon the part of many of our Western Senators and Representatives who look on and submit to this treachery upon the part of the East, who are backed up by traitors in the West? The Dingley bill, as amended by the Finance Committee, will not suit the woolgrower. Better no bill at all than such an unfair act to become a law. There would be no protection to the woolgrower, for under its deceptive influence millions of pounds of wool would be brought into this country so greatly undervalued that disaster and bankruptcy would follow in its wake."

APPENDIX 3.

Number of sheep on hand each year from 1860 to 1897.

January 1—	Number.	January 1—	Number.
1860	22,471,275	1880	40,765,900

1879	38,123,800		

a Estimate of National Association Woolen Manufacturers.
b Estimate of W. B. Snow, formerly statistician of Agricultural Department.

APPENDIX 4.

Total consumption of wool.

Total consumption of wool for years ending June 30—	Domestic wool clip of previous year.	Imported wool.	Wool imported in shape of goods, shoddy, rags, and waste.	Total.
	Pounds.	*Pounds.*	*Pounds.*	*Pounds.*
1891	309,474,857	129,303,647	123,180,240	561,958,744
1892	307,101,507	148,670,652	106,697,637	562,469,796
1893	330,018,405	172,433,838	117,145,545	619,597,788
1894	364,156,666	55,152,558	55,318,050	474,627,274
1895	328,437,858	203,708,635	107,254,143	639,400,636
1896	294,295,727	230,811,473	230,000,000	755,007,200

Allowing that some of the wool imports of 1895 and 1896 were stored in warehouses, it is safe to estimate that the people of this country now need for annual consumption under normal conditions 660,000,000 pounds raw wool, which would require 110,000,000 sheep for its production. The "Statistical Abstract of the United States, 1895," frontispiece, gives the population June 1, 1895, at 69,753,000, with a per capita consumption of 6.32 pounds, of which 46.1 per cent was foreign wool. But this does not include the wool in imported woolen manufactures. North's Wool Book for 1894, page 36, gives the per capita consumption at $9\frac{1}{10}$ pounds.

Total consumption of wool.

These are the imports from the *countries of production*, but do not necessarily include all the wool which comes from those countries. Wools from various countries are taken to London for sale and export.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. C. R. MCKENNEY, one of its clerks, announced that the House had passed the bill (S. 1886) to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States, with an amendment in which it requested the concurrence of the Senate.

INCOME TAXES.

Mr. BUTLER. I ask that the joint resolution which I introduced yesterday morning, to amend the Constitution so as to give Congress the power to lay and collect income taxes, may be laid before the Senate and be read.

The VICE-PRESIDENT. The Chair lays before the Senate the joint resolution, which will be read.

The Secretary read the joint resolution (S. R. 47) to amend the Constitution of the United States, giving Congress the power to lay and collect income taxes, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article be proposed to the legislatures of the several States as an amendment to the Constitution of the United States, which, when ratified by three-fourths of said legislatures, shall be valid as a part of the Constitution, namely:

"ARTICLE XVI.

"The Congress shall have power to lay and collect taxes on all incomes regardless of the source from which the income is derived or acquired; but all income taxes shall be uniform throughout the United States."

Mr. ALLISON. What is the request of the Senator from North Carolina?

The VICE-PRESIDENT. The joint resolution is laid before the Senate in pursuance of the notice given yesterday by the Senator from North Carolina that to-day, immediately upon the conclusion of the morning business, he would submit a few remarks on the joint resolution.

Mr. ALLISON. Does the Senator from North Carolina wish to go on now?

Mr. BUTLER. Yes; I will say to the Senator that I have no prepared speech, and I shall not detain the Senate long.

The VICE-PRESIDENT. The Senator from North Carolina will proceed.

Mr. BUTLER. Mr. President, I offered the joint resolution and asked that it be not referred to the Judiciary Committee, but that it might lie on the table, to be taken up for consideration by the Senate at an early day. I do this because there is a joint resolution to the same effect now before the committee, and has been since the beginning of this session. Besides, a similar resolution was before the committee during the two sessions of the Fifty-fourth Congress. It is an important matter. It ought to be passed upon by the Judiciary Committee, and I trust it will be. But the fact stands that we have no report from that committee. Over two years ago the Supreme Court decided, in a famous decision, that Congress has no power to lay and collect income taxes; that is, without apportioning them among the States, which would be monstrous and absurd.

Only a few weeks ago the same court rendered a decision on the anti-trust law which is a little embarrassing to the great transportation lines of the country. At once a movement was started to have the decision of the court set aside by legislative action—I might say with almost indecent haste. The power of those great transportation companies was focused on Washington. A half dozen, or at least several, bills have already been introduced to nullify the decision. The Committee on Interstate Commerce has been holding constant meetings considering the bills that have been offered to set aside the decision.

We have been expecting daily for a week or two a pooling bill to be reported from the Committee on Interstate Commerce for the consideration of Congress at the earliest possible day. In fact, it seemed at one time as if the tariff might have to stand to one side to give this matter, important to the transportation companies, the right of way.

Why is it that we, the representatives of the people in Congress——

Mr. CULLOM. Will the Senator from North Carolina allow me to interrupt him?

Mr. BUTLER. Certainly.

Mr. CULLOM. The Senator from North Carolina has been making statements here about which, in my judgment, he knows very little.

Mr. BUTLER. The Senator from North Carolina would be very glad to have information, as it is a matter of importance.

Mr. CULLOM. The Senator says that a half dozen bills have

been introduced in the Senate to cure a condition brought about by a decision of the Supreme Court, and that they have been introduced with indecent haste. I believe that was the term used. The truth is, one bill was presented looking to the subject of pooling, with amendments to other provisions of the law, which have been urged upon the attention of the Senate for years, to strengthen the act to regulate commerce, or, in other words, to strengthen the power of the commission in the administration of its duties.

Mr. GEAR. Let me suggest to the Senator from Illinois that the bill was introduced prior to the decision of the court.

Mr. CULLOM. I think it was.

Mr. GEAR. I know it was.

Mr. CULLOM. I introduced one bill myself, which was sent to me by a number of gentlemen or an association of gentlemen not connected with the railroads at all, I understand, except so far as it is their duty to deal with the railroads in handling freight. Those two bills have been before the Committee on Interstate Commerce.

The further truth is that from time to time for very many months the committee have considered just such bills in the hope that we might agree upon what was best in our judgment in the interest of the public welfare, and we have never met except at our regular meetings. Once a week, like other committees, meetings are held, unless possibly in one week there were two meetings, although I am not sure about that. So when the Senator states that so far as the Committee on Interstate Commerce are concerned we have been appearing to act with indecent haste, if he applies that remark to the committee, he entirely misrepresents the committee. The committee have the subject now under consideration. We met yesterday, I believe it was, and had the matter under consideration. We adjourned as we usually do, and as other committees do, when 12 o'clock came, and if the committee meet next week, we will consider the matter again, with other bills which we have there.

I desire to say to the Senator that whatever his judgment may be about the matter, the committee are not disposed to act with indecent haste, but that when they do act, if they report a bill, they will report according to their best judgment in the premises, looking to the public welfare.

Mr. BUTLER. Will the Senator from Illinois answer a question before he takes his seat?

Mr. CULLOM. Certainly.

Mr. BUTLER. Is the bill which the committee is now considering the same kind of a bill as the bills introduced before the decision of the court on the antitrust law?

Mr. CULLOM. Most assuredly. It is just such a bill as has been before the Committee on Interstate Commerce many times before. Such bills have heretofore been considered, and once or twice have been reported to this body.

For the information of the Senate, I will state that the Committee on Interstate Commerce, or a portion of its membership, anticipated that the Supreme Court would render a decision which might to some extent weaken the authority of the Interstate Commerce Commission in the enforcement of the interstate-commerce law, and one of the purposes of the bill now is to amend the law so that the decision of the Supreme Court, which holds that under the present act the Commission has not the power to make rates, if you please, in cases of disputes between the railroads and the people, shall not apply to the law as we propose to amend it—in other words, that the Commission shall have power to say not only that a given rate is too high, but that another rate would be regarded by the Commission as reasonable and just.

Mr. BUTLER. The bill will legalize pooling.

Mr. CULLOM. The bill also has such a provision in it, and similar bills have been before the committee almost time out of mind.

Mr. CHILTON. Will the Senator from North Carolina permit me to make a statement?

Mr. BUTLER. Certainly.

Mr. CHILTON. The controversy between the Senator from Illinois and the Senator from North Carolina, so far as it relates to the form of expression used, is one in which I have no interest, but I do not think it would be just for the impression to be created that the pooling bill has not been pushed, and was not immediately pushed upon the rendition of the decision of the Supreme Court. I have been a member of the Interstate Commerce Committee for two years, and I for one have never been called upon to vote for the report of a pooling bill until since the Supreme Court of the United States delivered its recent opinion in which transportation lines were held subject to the provisions of the antitrust law.

Sir, I differ in toto with the chairman of the Interstate Commerce Committee in the statement that the bill which is now pending before the Interstate Commerce Committee would strengthen the hands of the Interstate Commerce Commission. He is entitled to his opinion; I am entitled to mine. Not only does the proposed bill contain a pooling provision, but it also contains an amendment of the present law which, in my judgment, is calculated to undermine the efficiency of interstate-commerce regulation. I refer to the amendment which provides that railroad managers and agents shall not be punished for violations of that law by imprisonment except for a second offense.

The present interstate-commerce law provides punishment by imprisonment. The transportation lines of this country litigated in all the courts of the country the right of the courts to compel witnesses to give testimony which might criminate themselves, even though they were exempted from punishment in consequence of that testimony. After the Supreme Court of the United States, upon the termination of long litigation, held that it is within the power of the court to compel witnesses to testify under such circumstances, and in consequence convictions seemed probable, then we find a bill introduced here and sent to the Interstate Commerce Committee changing the law so that the imprisonment clause was omitted.

That bill was reported favorably at the last session of Congress. At this session, though that particular bill has not been reported again, there is incorporated in the measure, which the chairman of the committee tells us will strengthen the Interstate Commerce Commission, a clause which provides that the penalty for the first offense of violating the terms of the interstate-commerce law shall not include imprisonment. As a matter of course, you will never get the same man a second time. The same manager or the same agent will never commit the second offense. It will always be some other agent or some other manager. So much in connection with that subject.

I am a member of the Interstate Commerce Committee. I am very much opposed to the pooling bill. I think it would be very detrimental to the public interests. I think it would be a vicious experiment; and so believing, I am not willing—and that is the only interest I feel, and it is my only excuse for interfering here between the Senator from North Carolina and the Senator from Illinois—that the impression shall be created that the pooling bill has not been pressed since the Supreme Court of the United States decided that the Sherman antitrust law applies to railroad companies.

Mr. GEAR. May I suggest to the Senator from North Carolina that it was pressed before?

Mr. CHILTON. It was not pressed before since I have been a member of the committee—two years.

Mr. GEAR. I beg pardon.

Mr. CULLOM. Will the Senator from North Carolina allow me to say a word further?

Mr. BUTLER. Certainly.

Mr. CULLOM. I regret to interrupt the Senator, but I did not feel that I could afford to let his remarks go by without some notice.

First, in reply to the Senator from Texas, who is a member of the Committee on Interstate Commerce, I will say, as the Senator well knows, that the amendment proposed to the fifteenth section of the present measure under consideration in the committee does strengthen the law in taking into account the recent decision made by the Supreme Court with reference to the powers of the commission. Does he not know that?

Mr. CHILTON. It is very true that a proposition to strengthen the law is pending before the Interstate Commerce Committee.

Mr. CULLOM. Exactly.

Mr. CHILTON. But I am talking about the pooling clause of the law.

Mr. CULLOM. That is another subject entirely. I wish to state that such a provision has been in a dozen bills before the present one now in the hands of the committee and under consideration. Whether an amendment to the pooling section, if it may be so called, would strengthen the law or weaken it is a question about which Senators and other people differ. That is a question under consideration.

But when the Senator intimates that, so far as the chairman or any action of the committee is concerned, we are attempting to crowd things through in a way before unheard of in that committee, I desire simply to state that he and I differ upon the question.

The Senator says, in referring to the decision of the Supreme Court of the United States as to the antitrust law, that the railroads rushed here to secure an amendment of the law, so as to get around the decision. The bill was introduced, as I said, before the last decision, but perhaps not until after the antitrust decision was made; but is it an unheard-of thing that bills shall be introduced to amend statutes in view of what the Supreme Court may have decided in reference to such statutes? Take the case I have just referred to, the Supreme Court decision a week ago on the question of the power of the Commission. I anticipated that decision, or the committee did, and we sought to get an amendment to the law continuing the power of the Commission so that it might grapple with the railroads, and where a rate was made too high might not only say that it was too high, but determine what a reasonable rate would be and fix it for the guidance of the railroad company.

Therefore, so far as that branch of the subject is concerned, I insist that neither the Senator from North Carolina nor the Senator from Texas has any ground for attacking the action of the Interstate Commerce Committee, which has now under consideration these several bills. There are other bills there which the committee is considering, as well as the one referred to by the Senator from North Carolina, but I will not take up his time longer. I do not desire to interfere with his speech.

Mr. CHILTON. Will the Senator from North Carolina permit me to make one further statement? I take no part in the controversy concerning the action of the Interstate Commerce Committee. I would have made no allusion to it. But there was a point in the remarks of the Senator from Illinois which I thought needed correction, and I only referred to the action of the committee because it was necessary to do so to meet the inference I thought might be drawn from his remarks. That was, that we had been considering the matter of pooling from time to time, and that the action of the Supreme Court in deciding that railroad companies fell within the antitrust law had not spurred on the Interstate Commerce Committee in considering the proposed pooling bill.

I repeat, that I have been a member of the committee for two years. I have endeavored to attend every meeting of the committee. Never in that time was my attention called to a pooling bill until after the decision of the Supreme Court was rendered, a short time ago. I know that three or four years ago there was a proposition pending in Congress to grant railroad companies the right to pool, but I refer to what has happened within the last two years, since I have been a member of the committee. I am clear that the subject was not brought up in committee until after the decision of the Supreme Court of the United States was rendered.

I thought it was due to the members of the committee who are opposed to the pooling bill that there should be no uncertainty in respect to that matter.

I have no interest in the contention between the Senator from Illinois and the Senator from North Carolina. Whether the haste which has been displayed is indecent or not is, of course, a matter of opinion, but as to the facts I think there certainly should be no controversy.

Mr. CULLOM. I merely wish to state that the Senator from Texas has been a very good member of the Interstate Commerce Committee, and I hope he will continue to be so. I trust we will produce such a result from our committee in the way of legislation to be presented to the Senate as shall benefit the great masses of the people of this country. I hope the Senator from North Carolina will now go on to make his speech on his joint resolution.

Mr. BUTLER. Whether my statement was too harsh, whether it was fully justified or not, I will allow the statement of facts made by the Senator from Texas, which the Senate will observe has not been contradicted by the chairman of the committee, to stand as my verification and justification. The facts as stated by him speak for themselves, and I am willing for the Senate and the country to decide what terms or adjectives should be used to describe the hasty procedure to get through some bill to relieve the transportation lines from the effect of the decision of the Supreme Court.

When the Senator from Texas states that he has been a member of the committee for two years, and that the question was never brought up and pushed before the committee or even considered, I believe he said, at all until after the decision of the court, it speaks for itself.

I am not a member of the Interstate Commerce Committee, I am sorry to say, but, if my memory serves me right, a pooling bill was pressed in Congress before the Senator from Texas and I served in this body. The bill was defeated, I think, in the closing days of the Fifty-third Congress. Then thirty-one great transportation lines, in defiance of law, formed a pool, or a joint traffic association. Thus the railroads have been pooling in defiance of law until the recent decision of the court frightened them. During this time no pooling bill was pressed in Congress because the railroads did not need it as long as they were allowed to pool without it. But when the court decided that the law prohibited pooling, then the indecent haste began to have Congress to pass a pooling bill. These are about the facts.

Mr. President, there is a feeling in this country, whether justified or not, and it is pretty widespread, that the antitrust decision of the court was expected to affect certain other parties, but it was not supposed it would affect the railroads any longer than Congress could give them relief from it, and that any other person or parties whom the decision affected might appeal in vain for relief, just as the people appeal for it, from the decision of the court on the income-tax matter.

I am glad the Senator from Illinois favors strengthening the interstate-commerce law and giving the commission more power, for certainly the law is a farce as it stands. But let us take care, when we are passing a so-called strengthening act, that we do not give more power and license to the transportation lines than we give to the commission to check and regulate them. Let us be careful that it is not a tub thrown to the whale.

I do not intend this morning, however, to discuss the interstate-commerce act. I will do that when the pooling bill is reported. I wish now to call attention specially to the difference in the course pursued by Congress when a decision of the court is rendered which affects great corporations and one is rendered that affects 69,000,000 American people by imposing unjust taxation. The Committee on the Judiciary has had before it this joint resolution ever since the first session of Congress after the income-tax decision was rendered. No action has been taken on it. If there is any hope of amending the Constitution of the United States, it would seem that it could be amended so as to remove this most monstrous decision of our highest court. It takes a long time to amend the Constitution if the lawmaking power moves speedily. Then why should we wait two years, three years, four years, to give the legislatures of the States a chance to pass upon this question? We can not take up the matter in Congress until the committees report. We can not even speak upon the question as before the body until the committees report, unless I do as I have done this morning, offer a joint resolution and ask that it lie on the table, and then be forced to go further and ask the Senate to take up and consider so important a matter as a constitutional amendment without ever having a report from a committee.

Mr. President, the proposed amendment to the Constitution that I have offered is very plain and simple. It is as follows:

ARTICLE XVI.

The Congress shall have power to lay and collect taxes on all incomes, regardless of the source from which the income is derived or acquired; but all income taxes shall be uniform throughout the United States.

There is no doubt about the average American citizen understanding what it means. But I wanted the help of the Judiciary Committee to frame an amendment that the courts could not misunderstand. If the committee does not see proper to report upon a measure of this kind, then I shall ask the Senate, at as early a day as possible, to take up in Committee of the Whole this resolution, to consider it in Committee of the Whole, and to pass upon it.

I want to say further, Mr. President, that in view of the facts which I have stated, I will ask the Senate to pass upon this question before a pooling bill ever comes to a vote in this body. I will ask the Senate to go on record as to whether it will first give the American people a chance to say whether they want, as a part of their fundamental law, the Congress to have power to lay and collect income taxes, a power which we had till the court stabbed the Constitution, or whether, first, we shall grant to the transportation lines of this country the legal right and power to become a mammoth and despotic trust.

The proposed pooling bill will create, if it becomes a law, the most gigantic trust that the world has ever seen; a trust composed of the great transportation lines of the country, which are the throbbing arteries of commerce, the prosperity of every State and section largely depending upon them, every citizen in America affected by their management directly or indirectly; a trust with twelve billions of capital (including water) controlling the highways of the nation; a trust that might possibly collect more money in the shape of tolls and fares from the American people than all other trusts put together. The sugar trust is an infant compared to a trust of the transportation lines of the country. The Standard Oil trust is a pigmy compared to a trust that would hold the commerce of the nation in its grasp.

This pooling legislation is asked so that the railroads can be relieved of the last vestige of competition. They are asking Congress to keep them from competing with each other. They do not compete now except at terminal points, when they fall out. A railroad line runs from here south. Take the Southern Railway. On how many points of the Southern Railway is there competition? At every small station their power is absolute to charge whatever rates and fares they see fit. It is only where two great trunk lines come together, say at Atlanta, that they are subject to competition now. It is to escape competition at even these terminal points, so that there can be no competition anywhere, so that they can have absolute power to raise and fix rates and have no competition, that this pooling legislation is asked.

We have been told in excuse for allowing private corporations to own and operate the transportation lines of the country and run them as private property for private gain that the protection of the public was competition. We have had competition rung into our ears every time that anyone's voice has been raised to point to this monopoly of transportation. Every time anyone who believes that great public functions like these, so necessary to the welfare of every citizen, should be operated as a function of the Government at cost for the benefit of the public, has so stated, we have been told that competition cured all the evils and prevented all danger.

Now, these transportation lines come and ask us to relieve them

of all competition. Whenever they reach the point to say to Congress and to the country that competition is a thing of the past, that it is detrimental to their business, then they confess that private corporations should no longer be intrusted with the management of the great transportation lines of the country. When there can be no competition, then every excuse for private ownership is gone; the time for public ownership has arrived. Congress must now decide whether it is best for the American people to allow the great transportation lines to be manipulated by private corporations and further allow them to form one mammoth syndicate, one gigantic transportation trust, or best for the public to own and control this great transportation system in the interest of all the people.

Now, I am not an advocate of the competitive system, for there can be no competition that will result in justice and equity to the shipper and the general public.

I think it best for all the railroad lines of the country to be operated as one system, provided that system is operated as a public function at cost for the public good. I think the transportation lines should be operated as one united, harmonious, and complete system, just as the mail lines are operated in one perfect postal system. But how any sane man who has any regard for the public welfare can want to see such a monopoly, such a trust, in private hands is more than I can understand. Public ownership and not pooling is the remedy. The railroad corporations want a legalized trust for their own profit and power, not for the welfare of the public. This is what they are demanding from the Interstate Commerce Committee to avoid the decision of the court, that was a little inconvenient to them. This is the demand that is being pushed with indecent haste.

What is the other proposition that the Committee on the Judiciary have not had time to consider since the decision of the court over two years ago? It is a proposition to equalize taxation to some extent; a proposition to allow Congress, if the people's representatives see fit, to levy a fair rate of taxation on incomes, on accumulated wealth earning a big profit. Simply a proposition for the wealth of the country to bear its fair share of the taxation necessary to support the Government.

If I were the special guardian and spokesman in the Senate of the very people who would pay an income tax, if I were here as a special representative of the small per cent of the people of this country who have enormous incomes, and if I were asked what my advice would be for the better protection of their property and for the better government of the country in which they live, I should tell them that it was to their interest that taxation should be equalized by an income tax. The rich, if they were wise, would not oppose an income tax, but would favor it and cheerfully pay it.

One of the justices of the Supreme Court in his dissenting opinion on the income-tax decision took the same position. The position of those who enjoy the protection of our Government, who have amassed large fortunes, and who enjoy princely incomes, in using their influence and power to prevent their property from bearing its share of taxation, is shortsighted and unwise for them individually. If they are wise, they will lose no further time in putting themselves on a footing with every other American citizen and pay their fair share of taxation.

The men who would pay this income tax contribute freely to political campaigns. They give freely when they are called upon by the leaders of the political parties, I am informed. But when called upon under the law to contribute to bear the burdens of taxation they revolt and exert their power to prevent Congress, if not to try to influence the court to save them from paying a fair share of the burdens of taxation. They contribute liberally in campaigns. It must be because they expect a princely return. They refuse to contribute, if they have the power to prevent it, to support the Government, though they expect the Government to call out soldiers if necessary to protect their property, if such an emergency should arise. Let them remember that the ninety-nine out of every hundred of such soldiers are the men who are to-day forced to pay double taxes in order that the rich and powerful privileged few may escape taxation.

Mr. President, it is astonishing, when we stop to look where the wealth of this country is located, to see that the court should feel justified in straining and perverting the Constitution to prevent the majority of the wealth of the country from paying taxes. It is astonishing that Congress does not move its hand to correct the wrong. But a little over 1 per cent of the people of the United States own 70 per cent of the property of this country. Over 98 per cent of the people have left distributed among them less than 30 per cent of the wealth of the country. Under any system of tariff taxation the bulk of the duties collected and the burden of taxation falls upon that 98 per cent who own only 30 per cent of the wealth.

The doctrine that is preached in support of protection and high tariff duties is that we must protect American labor against the pauper labor of Europe and American industries against foreign industries where pauper labor is employed. I suppose pauper labor is labor that has to work cheap under competition, because no laborer works for less than what would support him if he can help himself. Now let us see how the pauper labor of America compares with the pauper labor of Europe. In Europe the average of tenant farmers, the average of men who do not own homes, who rent houses, who work for their daily living, is about 40 per cent of the population. How is it in this country? Between 70 and 75 per cent of the American people are tenants and renters. We have a larger per cent of people who do not own homes and who work one day for their next day's bread than the cheap pauper-labor countries of Europe have, and yet under the false promise of protection we continue to lay the burden of taxation upon the shoulders of that class of people and allow to go scot free those who own 70 per cent of the wealth and who are each year accumulating to themselves nearly all that labor produces. They own more wealth than they know what to do with, yet they object to paying a fair share of the taxes for the support of the Government, and Congress acquiesces.

History tells us that every country that has gone down under commercialism reached the stage of decay when less than 10 per cent of the people owned nine-tenths of the property. We have already passed that period, that danger line, long ago. If we had a fair and just income tax on the statute books, it would not remove the conditions, the special privileges, that to-day are concentrating the wealth in the hands of a few. It would simply equalize taxation. The evils that make an unfair distribution of the wealth created would still remain. Other legislation would still be needed to remedy that.

The wealth of this country has doubled since 1880. We had then about $43,000,000,000 worth of property. To-day we have over eighty-six billions. How has that wealth been distributing itself while it has been created? Out of every dollar, Mr. President, that has been added to the wealth of this country since 1880 it has gone about as follows: To one man out of twenty, two-thirds of that dollar has gone; to the other nineteen out of twenty, only one-third of that dollar has gone, to be divided among the nineteen, less than two cents for each; and the fact stares us in the face that the nineteen who have gotten one-third out of every dollar's worth of property created since 1880 have been the producers of wealth and the others have been the speculators and accumulators of wealth by special privileges granted by Congress in unjust and vicious laws.

Now, Mr. President, this disproportion, as I have said, is not due entirely to the want of an income tax. It is due chiefly to other causes. Those causes should be removed. There are great financial and transportation problems before the country that Congress will be called upon soon to consider. The causes that have brought about this startling disproportion of the distribution of the wealth must be removed if our Republic is to be preserved. But even if these causes were already removed and there was equal opportunity offered every citizen to work and enjoy the fruits of his labor, still the duty and responsibility of Congress would be just as great to see that taxation was so levied and collected that each individual would pay in proportion to his ability to pay. The income tax is the fairest and most just method of accomplishing this.

Inasmuch as the tariff bill is now under consideration, and inasmuch as the last tariff bill had an income-tax provision, and it was that provision that the court rendered its decision upon, it will probably not be out of the way to read an extract from the dissenting opinion of Mr. Justice Harlan. He is a Republican. He no doubt believes in the principle of protection. If he is a Republican such as the majority on this floor is, he was not even satisfied with the high protection of the Wilson bill. Now, what does he say about the tariff bill being a fair measure of taxation? In speaking of striking the income-tax provision out of the Wilson law he says:

> It nevertheless results that those parts of the Wilson Act that survive the new theory of the Constitution evolved by these cases are those imposing burdens upon the great body of the American people who derive no rents from real estate, and who are not so fortunate as to own invested personal property, such as the bonds or stocks of corporations that hold within their control almost the entire business of the country.

He recognized the fact that the Wilson bill with the income-tax provision struck out was not a fair and equitable measure of taxation. He recognized the fact that it laid the burdens most heavily upon those who did not own much property and who had not the means to pay.

In this connection I might call attention to the fact that whether it is a Democratic tariff or a Republican tariff, whether it is a tariff for protection or a tariff for revenue, yet a tariff is still practically a poll tax. In every State in this Union we raise our taxes by a tax on the poll and a tax on property. Why? We recognize the fact that every man, whether he owns property or not, receives certain protection from the Government as an individual. Therefore we place a uniform tax on each individual on his head and call it a poll tax, so that everyone, even if he has nothing but his limbs and his muscle, is called upon to contribute

so much to support the Government. Then, in order to equalize taxation, we turn to the individual and look at his property, and we tax him according to the amount of his property, a certain per cent on his property.

How is it with the Federal Government? We raise nearly all of our taxes by a tariff; that is, a tax on a man's necessities, a tax on his mouth, on his back. Therefore each individual is taxed on what he consumes and wears. He is taxed not according to his means but according to his necessities, without any regard to the amount of property he owns. If the man worth $1,000,000 eats no more than the man who mauls rails for 50 cents a day and does not own a dollar's worth of property, if a man worth $1,000,000 wears no more clothes than a man who mauls rails for 50 cents a day and does not own a dollar's worth of property, then they both contribute exactly the same to support the Federal Government. To that extent the tariff may be called, for it is the nearest illustration you can give to the system of State taxes, a poll tax—not literally, but near enough for illustration. Now, will we raise all of the money necessary to run this Government upon the individual; that is, by a poll tax?

I have a tenant. He owns nothing but a little personal property, which he moves from one tenant house to another when he moves. He has ten children. He buys more pairs of shoes, if he buys any for his children at all, in a year than I buy. The mills that you want to open now in order to restore prosperity depend upon being kept open on his power to buy, upon his power to consume. He has his wife and his children, and his children are increasing. His power to purchase is less now than it was five years ago, though his family is larger and his necessities greater. Shall we place upon that man, in order to increase his capacity to consume, burdens of taxation out of proportion to his ability to pay? If your American manufacturers prosper and keep their mills open, it must be because the American people are able to consume and to purchase. When we raise all of our taxes by tariff, then we not only put a poll tax on the tenant, but an additional poll tax on his wife and on each one of his ten children—a poll tax on every mouth that is fed and on every back that is clothed. Then we make this poll tax very high, high enough to raise all the tax necessary without placing a dollar of tax on property. Is that fair, is it just?

Mr. President, it is clear that the burdens of taxation to-day fall largely upon that great mass of the American people who are not accumulating wealth—men of moderate means and men who work for daily wages. For what reason I will not stop now to discuss, but they fall largely upon that great mass of American citizens who work more hours in a day than they should be forced to work in order to supply their families with the necessities of life. The wealth that is accumulated by the fortunate few in this country, whether honestly or dishonestly, is not a question to be considered with reference to an income tax, but that wealth should certainly pay in proportion to its amount with the man who has accumulated only a small amount, and who is forced to be a daily toiler and producer.

I had intended reading several extracts from the decision of the court, and also from the four very able and convincing dissenting opinions. I will not take the time of the Senate to do so now, but I will at a future time when this joint resolution is taken up for action. However, I will call the attention of the Senate to the fact that the Chief Justice in rendering the decision of the court which struck down the Constitution seemed to realize that it was necessary to apologize for the decision. Therefore, he said:

> If it be true that the Constitution should have been so framed that a tax of this kind could be laid, the instrument defines the way for its amendment. In no part of it was greater sagacity displayed.

The Chief Justice in rendering the decision felt called upon to apologize for it by pointing out that the American people, if they did not like it, could amend the Constitution so as to nullify the decision.

Mr. MASON. You can hardly call that an apology.

Mr. BUTLER. Well, I will not, at the suggestion of the Senator from Illinois, but I will simply state that he did call attention to the fact that the American people could by an amendment restore the Constitution as it stood for over a hundred years. The Chief Justice realized that he was rendering a decision in the face of every decision of the Supreme Court for a hundred years on this point; he realized that he was for the first time questioning that the Constitution gave Congress the power to equalize taxation by levying an income tax.

Further, the justices in dissenting called attention to the fact that taxation could not be equalized in this country until the Constitution was amended after this decision. The minority of the court was so shocked at the decision that they used stronger language, I think, than has ever been used by a justice of the Supreme Court in rendering a dissenting opinion before. I do not think any Senator on the floor of the Senate has ever shown stronger feeling or used stronger language about that decision than did the able jurists who dissented from it. They seemed to realize, and it appears through every line of these dissenting opinions, that here was an opinion from the highest court in the land which would not only tie the hands of Congress—for they used that language—and prevent Congress from equalizing taxation, but they realized that the court was rendering a decision that struck at the very foundation stone of the Republic, and that would shake the confidence of the American people in the highest tribunal in the land.

Mr. President, no man can read those dissenting opinions without feeling that every justice who rendered them would have been astonished if he had been told when that decision was rendered that two years would pass before either branch of Congress adopted a resolution to submit an amendment to the Constitution. Justice Harlan, in his dissenting opinion, said that the decision was deeply to be deplored, and was a national calamity, and we could not too soon amend the Constitution to restore the national authority.

It begins to look as if the Constitution may never be again amended by submitting an amendment to the States. Surely if this amendment can not be submitted to the States, then no amendment in the interests of good government and justice will ever be submitted, unless there is a radical change in the American Congress.

There is more public sentiment, founded on the commonest and broadest principles of equity, behind this question of an income tax than behind any other question that I can conceive of that will have to be submitted to the people as a constitutional amendment. If we can not amend our Constitution; if the court can render decisions digging holes in it from time to time, and the old hulk of the Constitution has to stand with the life taken and amended out of it by judicial decisions; if with the progress of events we can not amend the Constitution to keep pace with the development of civilization and commerce, then the quicker the American people know it the better.

If we can not submit to the legislatures of the States this amendment providing for an income tax, then there is one other way of amending the Constitution, and the people ought to know, and know quickly, that their only hope is through a constitutional convention. A constitutional convention, if called, Mr. President, will not be called under the auspices of a political party; it will not be called when voters can be appealed to on the ground of standing by "the dear old party." Men will vote their honest judgment; the evil effects of party machinery that warp men's judgments will not be in play then; and the delegates, coming fresh from the people, will not be so easily controlled by corporations and trusts as some members of Congress are. The delegates in a constitutional convention will stand nearer the people than Congress now does. The privileged few, who now enjoy so many unjust advantages, had best submit to a just income tax a dozen times than force the people to call a constitutional convention.

Such a convention would destroy the evils that cause the unequal distribution of wealth. I shall press this amendment, but I would prefer to see a convention held. If the privileged classes were wise, they would help me to pass this amendment. But they will not, and I wish simply to call the attention of that class of our citizens, and of those who sympathize with them so strongly as to probably be unable to do exact justice between all our citizens, to the fact that this amendment is a small reform compared to what the American people will demand in constitutional convention, if they meet—and they surely will meet soon, unless Congress measures up nearer to its duty—and that then there will be a supreme effort of the American people to go back to first principles and place this Government where its founders thought they had placed it, and better guard it, and, I think, more carefully, than our ancestors were able to do in the primitive stages of our Republic.

Mr. President, I have talked longer than I intended to, for at a later day I intend to ask the Senate to take up this question. I intend then to address the Senate at some length. I have now called it up, this proposed amendment, for the purpose of attracting attention to how long it has been since the Supreme Court rendered the anti-income-tax decision, and the difference between the procedure in Congress with reference to this decision and the recent antitrust decision, and also to say that unless the Judiciary Committee may see its way to give us a report on this proposition, which is before them, I shall be forced to ask the Senate in Committee of the Whole to take up the question, and, further, I shall ask the Senate to do it before the pooling bill is considered by this body.

THE TARIFF BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The reading of the bill was resumed at line 9, page 58, and paragraphs 184 and 185 were read, as follows:

184. Pens, metallic, except gold pens, 12 cents per gross.
185. Penholder tips, penholders or parts thereof, and gold pens, 25 per cent ad valorem.

Mr. PETTIGREW. I inquire what was done with paragraphs 182 and 183, relating to mica and nickel?

Mr. ALLISON. They were passed over.

The VICE-PRESIDENT. Those paragraphs were passed over last evening.

Mr. PETTIGREW. I desire to offer an amendment to those two paragraphs, and I think I might as well do it now and submit what I wish to say upon the subject. I do not care, however, to have those paragraphs disposed of at this time.

Mr. PRITCHARD. I hope that those paragraphs will not be disposed of now.

Mr. PETTIGREW. I do not care to press my amendment to a vote now.

Mr. ALLISON. We have agreed to pass over those paragraphs, but, of course, if the Senator desires to make some observations upon them, he can do so.

Mr. PETTIGREW. Very briefly, and that with regard to mica. The House provision with regard to mica was:

182. Mica, 2 cents per pound on dimensions of 1 square inch or less, and 2 cents per pound additional for each additional square inch: *Provided*, That the maximum rate of duty shall in no case exceed 30 cents per pound.

That is proposed to be changed by the Senate committee to 40 per cent ad valorem, which will be pretty nearly equivalent to no duty at all because of the low valuations placed by the exporters upon these articles.

We can produce in this country all the mica used in the United States, and there would be no necessity for importing any whatever if a sufficient protective duty were placed upon the article to make up for the difference between the cost of labor in India, from which it is shipped, and the cost of labor in this country. India mica is mined by labor which costs from 10 to 15 cents a day; the mines are owned by Englishmen and Americans, and the mica is shipped to this country unassorted and unmanufactured, and valued at about 17 cents a pound; so that the duty would be about 8 cents a pound. It is here manufactured or parted into sheets, and much of it—the larger sheets—brings a price of from $3 to $5 a pound while it comes in at this exceedingly low price, but the refuse which is cut off from the sheet is sold for electrical purposes, and therefore the mica industry in this country has suddenly declined under this tremendous competition.

In North Carolina there are inexhaustible beds of this material, and in South Dakota there is enough of it to supply the United States for all time to come; but we can not furnish it and pay two dollars and a half a day for labor and compete with the India mica, with labor there at 10 to 15 cents a day.

If we are going to pass a protective-tariff measure, its benefits and advantages should extend from Delaware to the Dakotas, and embrace every industry within this country. There is no justification, because an industry has been established by a protective tariff in Delaware or in New Jersey, or in any Eastern State, for its continuance, unless the benefits as well as the burdens are shared with the people of the Dakotas. I therefore desire that this paragraph shall be amended by providing that there shall be a duty upon mica of 10 cents a pound and, in addition thereto, 40 per cent ad valorem.

Whilst I am not much of an advocate of ad valorem duties, I think perhaps such duties are fully as applicable to this article as to almost any other in this bill, and for the reason that mica may be worth 2 cents a pound, that is, the scraps and remnants, or it may be worth $4.50 a pound, and all made out of the same sheets. The refuse, the trimmings of sheets, used for stoves and other purposes, are worth 2 cents a pound, while the sheets themselves, according to their size, are worth from $2.50 to $5 per pound.

As I said before, I shall not press a decision of this matter at this time. I simply wish to submit a statement now in regard to it, which I desire to have printed in the RECORD in connection with my remarks; and I give notice that I shall ask for a vote at some future time upon the amendment which I have offered.

The statement referred to is as follows:

MICA.

North Carolina now produces a considerable portion of the mica mined in this country, although good deposits have been uncovered and worked in New Hampshire, Alabama, New Mexico, and the Black Hills of South Dakota. The domestic product now averages in value $78,691 per year, while importations average $161,759 per year. Ten years ago the domestic product was sixteen times greater in quantity than the importations. During the six years ended 1885 the average annual value of American-mined mica was $240,000, while importations of mica for the same period averaged annually in value less than $15,000. It will thus be seen that the industry is in its decadence, and requires in its behalf the application of a high-tariff stimulus. The Seventeenth Annual Report of the Geological Survey says:

"The opinion has sometimes been expressed by mica men that all of the valuable mica deposits in the southern Appalachian region have been discovered and worked to a depth where the supply of water and the increasing hardness of the rock add so greatly to the expense of mining as to make it unprofitable, and consequently that this region would no longer be a conspicuous factor in the world's supply of mica. The opening of several new mines, however, during 1895 and the early part of 1896 has encouraged the belief that other workable deposits may be found in the near future if careful search is made. And when the fact is borne in mind that much the greater part of the mica-bearing areas of this southern Appalachian Mountain region from Alabama to Virginia is still covered with an accumulation of humus and living plants, it is seen that the region has been as yet only partially explored, and there must be numerous undiscovered mica veins which will yield as rich returns as those already discovered and partially worked. * * * There can be but little doubt that in the case of a considerable number of these mines, by the use of the steam pump, the steam drill, and other modern appliances, a number of these old mica mines could be opened up anew and worked at considerable profit."

But the market need not depend wholly upon the old mica deposits of this country for its supply. In the Black Hills of South Dakota there is a large area rich in this important mineral, which would be opened to the profit of human toil under the influence of an adequate protective duty. To some extent these Black Hills mines have been worked for several years and they produce an excellent quality of mica. For reasons best known to dealers, South Dakota mica is sold as North Carolina mica; so the State I represent has never acquired the reputation it deserves in connection with this product. The employment of mica in the construction of electrical dynamos has enlarged the field of its usefulness, and its production has become an industry well worth the fostering care of the Government.

Mr. PRITCHARD. I wish to call the attention of the Senator to the fact that an electrical supply company has stated that that mica could not be used for electrical purposes, and to ask him whether he has inquired into the truth of that statement?

Mr. PETTIGREW. I have had occasion to inquire into that subject, and I find that our mica is, if anything, superior for electrical purposes to that which is imported. Not only that, Mr. President, but mica is imported from India and sold in this country as North Carolina mica in order to give it credit and character; and it is the same with South Dakota mica, which is sold as North Carolina mica, because the North Carolina mica is regarded as the best in the world, though the Dakota mica is equal to it, but it has not gained as much reputation and notice, and, therefore, because our mica is sold for North Carolina mica it has not attracted the attention that it would otherwise have attracted. We have produced large quantities of it, and are continuing to produce it each year, however, in more and more limited quantities, owing to this East Indian competition.

Mr. PRITCHARD. In this connection, I desire to have the letter which I send to the desk read, which fully corroborates the statement of the Senator from South Dakota.

Mr. PETTIGREW. I am obliged to the Senator for questioning me.

Mr. PRITCHARD. I only desire to have this information brought out.

Mr. PETTIGREW. I am very glad to have it.

The VICE-PRESIDENT. In the absence of objection, the letter referred to by the Senator from North Carolina [Mr. PRITCHARD] will be read.

The Secretary read as follows:

PHILADELPHIA, *April 12, 1897.*

DEAR SIR: I have been requested by Mr. W. S. Harvey to write to you concerning what I know as to the production of mica in the United States, and whether or not the statement, which he informs me has been made by the New York Micanite Company, that no mica is found suitable for electrical work in the United States in large quantities.

I beg to assure you that I know that excellent mica for electrical purposes is found in large quantities in North Carolina, New Hampshire, and elsewhere.

Very respectfully, yours,

EDWIN J. HOUSTON.

Hon. J. C. PRITCHARD,
United States Senate, Washington, D. C.

Mr. PRITCHARD. I also desire to have read a letter from Dr. Holmes, the State geologist of North Carolina, bearing upon this subject.

The Secretary read as follows:

NORTH CAROLINA GEOLOGICAL SURVEY,
Chapel Hill, N. C., April 8, 1897.

DEAR SIR: Your telegram is received. In reply, I beg to say that I am informed by dealers in North Carolina mica, and I believe their testimony to be correct, that a large part of the North Carolina mica now being mined is shipped to electrical companies, and is being used by them both in the construction and in the repair of electrical apparatus. I am further informed by these parties that the companies so using this mica from the North Carolina mines have pronounced it equal to any on the market for electrical purposes; and the analyses of the North Carolina micas, and comparison with those from other States in the United States and from Canada and India, lead me to believe that for electrical purposes it is equal to any.

It may be true that the larger electrical companies in New York do not now use North Carolina mica in their business, for the reason that by the system of undervaluation which they have practiced on all their imported micas in the past few years and by the use of cheap foreign labor in the mining and preparation of this mica they have been enabled to import foreign micas much cheaper than they could buy the American mica. And I beg to submit the counter proposition that if they are allowed to continue that sort of practice the time will soon come when the statement which you quote the electrical companies as now making will be literally true, and the numerous deposits of mica which are known to exist in North Carolina, Virginia, Maryland, Pennsylvania, New Hampshire, Wyoming, South Dakota, Washington, California, Colorado, and New Mexico will remain undeveloped as long as Congress is willing for these American interests to remain in a dormant condition, because the American miner and laborer can not afford to compete with foreign labor, which is paid not more than 8 cents per day.

I think the proposed specific duty on mica is right and fair, because (1) I believe in this sort of protection for American labor. (2) Owing to the large number of deposits of mica which are known to exist in different States, there is every reason to believe that if properly protected this American industry will develop into one of much larger proportions than it ever has in the past, and that ultimately the introduction of better mining methods and

improved mining machinery will finally reduce the cost of producing American mica so that it can be mined and sold at prices lower than those now ruling without injury to the mining interests. (3) The increased duty on mica at the present time need not at all increase the cost of stoves or electrical apparatus, for the reason that the importers of foreign mica put on it so low a value before they import it and so high a value after it is imported that they can afford to increase considerably their import values without increasing the price at which they sell mica to the manufacturers of stoves and electrical apparatus, and besides this, the cost of the mica is so small a part of the cost of a stove or an electric motor or dynamo that it really enters but little into the total cost. (4) I regard this fight over the proposed increased duty on mica as a contest between plain, poor, scattered American miners on the one hand, and on the other hand a combination of wealthy mica dealers who are endeavoring to control the mica market and supply it with foreign mica, which they can mine so cheaply that it costs them but little and yet they can sell it at whatever price they may choose.

My only objection to the duty proposed in the Dingley bill on mica is that it is not high enough.

I beg to refer you to page 427 of the CONGRESSIONAL RECORD for March 30, 1897, for additional information.

Yours, very truly,

J. A. HOLMES, *State Geologist.*

Hon. J. C. PRITCHARD,
United States Senate, Washington, D. C.

Mr. PRITCHARD. I have taken a good deal of pains to investigate this matter and have prepared the amendment which I offered the other day, which reads as follows:

Mica cut into rectangular or other definite shapes, 30 cents per pound; sheet mica, 20 cents per pound; mica in blocks of other forms not specified, 15 cents per pound.

I think this amendment would come nearer meeting the demands of the mica interests than the amendment offered by the Senator from South Dakota.

Mr. PETTIGREW. I shall be glad to support that amendment in preference to my own, and shall therefore not offer my amendment.

Mr. PRITCHARD. I have every reason to believe that the committee will adopt this amendment in the end, and that we shall get it incorporated into the bill.

Mr. CHANDLER. Mr. President, I only want to say that it seems to me that mica presents a very plain case, first, for a protective duty, and, secondly, for a specific duty.

There are, as has been stated in the communications which have been read to the Senate, mica mines in New Hampshire. The Senator from South Dakota [Mr. PETTIGREW] says there are mica mines in South Dakota sufficient to supply the whole American demand. There are such mines in New Hampshire also, but it is absolutely impossible to work those mines profitably and pay from $1 to $1.50 a day to the individual laborer, when the East India mica is mined with wages at from 10 to 20 cents a day. The mica is here in this country in abundance; it is here in large sheets sufficient for every purpose; but you can not get capital and labor to take it out of the ground in competition with this cheap mica of East India, where labor is from 10 to 20 cents a day.

Secondly, the necessity for a specific duty on mica grows out of the fact that it is almost impossible to raise the valuation of the mica coming from the East Indies. It is valued as being of low price at the port of exportation. There is no way of confuting the prices which are named, and mica comes in substantially at any valuation, however low, which the importer chooses to put upon it. So it is absolutely necessary, if American mica mines are to be successfully developed, that there shall be not only a duty, but that it shall be a specific duty. A large nominal ad valorem duty is of little value. A very moderate specific duty upon uncut sheets of mica, upon cut sheets of mica, and upon mica waste or ground mica will give the protection which is necessary.

I supplement what has been said by the Senators from North Carolina and South Dakota by urging the committee to adopt a schedule of specific duties. It does not so much matter what they are as that they should be specific and not ad valorem.

Mr. STEWART. Mr. President, I think the committee can take it for granted that there is no doubt whatever that there is an abundance of mica in the United States. Mica mines are found more generally over the United States than almost any other kind of mines. There is mica in Nevada, California, Oregon, and I believe nearly all of those Western States contain mines of mica, which has been a well-known fact for years. The question is constantly discussed whether they can be worked at a profit. That we have abundance of mica mines, there is no doubt. Recently I have received a large number of letters—I have not them here now—describing these mines, and suggesting that we make the duty specific. So far as getting a supply of mica in this country at a price that would pay the workmen there if we had a sufficient duty, there is no doubt.

Mr. CHANDLER. If the Senator from Nevada will allow me, I will call his attention to the fact that this 10 and 20 cent East India labor, with which mica is got out in the Orient, is paid for in silver; that it is silver 10-cent and silver 20-cent a day wages which gets out the mica, and that is only 5 and 10 cent labor in gold.

Mr. STEWART. I am aware of that.

Mr. CHANDLER. I was afraid the Senator had overlooked that fact. [Laughter.]

Mr. STEWART. I am aware that they buy our silver for 5 cents and sell it for 10 cents; and that is the way they make money.

Mr. BUTLER. Mr. President, I do not intend to address the Senate on this matter, but as to the duty on mica, I agree with my colleague [Mr. PRITCHARD] and also with the Senator from South Dakota [Mr. PETTIGREW]. I intended to call especial attention to the fact just brought out by the Senator from New Hampshire [Mr. CHANDLER], that it has always been a recognized factor in tariff bills, where you are protecting American industry or American labor against the competition of a silver-using country, that the duty has to be higher than when you are protecting against competition in other countries. It has been recognized in every tariff bill that has been here that the rate of duty that would protect an article in this country against Europe, for instance, would not protect it as against India or any other part of Asia, but that you have to make the duty higher on account of the difference of exchange. This is a case where we have to compete with the labor of silver-using countries, and therefore calls for a higher duty than in a case where the competition is between American and European labor.

Mr. PETTIGREW. I also wish to call attention to paragraph 183.

Mr. VEST. Before the Senator proceeds to another paragraph, I want to call attention to the enormous increase which he proposes upon this raw material of mica. The Dingley bill provides for 2 cents per pound, and the Senate committee propose 40 per cent ad valorem. I understand the Senator from South Dakota now to propose 10 cents a pound and 40 per cent ad valorem.

Mr. PETTIGREW. I accepted the amendment offered by the Senator from North Carolina [Mr. PRITCHARD], which, I think, makes the rate even higher than that.

Mr. VEST. I did not hear what that rate was.

The VICE-PRESIDENT. The Secretary will state the amendment proposed by the Senator from North Carolina.

Mr. ALLISON. Let that question be passed over.

Mr. VEST. Let us be heard just a minute about it. I am waiting to hear what the amendment of the Senator from North Carolina was.

Mr. PRITCHARD. I have an amendment, which I offered a moment ago.

Mr. JONES of Arkansas. What is the proposition?

Mr. PRITCHARD. The amendment proposes on uncut mica—that is, mica in the rough—15 cents a pound, on sheet mica 20 cents per pound, and on mica cut into rectangular or other definite forms 30 cents per pound.

Mr. JONES of Arkansas. I should like to ask the Senator what is the value of mica in the market?

Mr. PRITCHARD. It varies according to the size. It runs from 90 cents a pound up to $13 a pound in certain cases.

Mr. JONES of Arkansas. The comparative statement furnished by the Treasury Department to the Senate shows that there were 1,031,499 pounds of mica imported last year at a cost of 19 cents a pound.

Mr. CHANDLER. Undoubtedly, and that is the very thing that we complain of—the enormous undervaluation.

Mr. PRITCHARD. In that connection, I desire to call the Senator's attention to the fact that while it was valued at 19 cents a pound, the same mica sold at from ten to twelve dollars a pound in the American market. That is exactly the reason why we do not want an ad valorem rate and we do want a specific rate.

Mr. VEST. Let us understand exactly what the purpose is. As I understand it now, the amendment of the Senator from North Carolina puts five times as much duty specifically as the Dingley bill upon one grade of mica and ten times as much upon the other.

Mr. PRITCHARD. I will say to the Senator from Missouri that I do not propose to have the amendment considered now, but when the committee adopts it, as I feel sure it will, I will be ready to discuss the matter with him. I think I can convince him that this rate of duty ought to be adopted. The only ones who are opposed to it are the electrical and mica companies, who constitute a trust, as the Senator very well knows. They object to it because they want to handle the mica of the country and regulate the price of it. Here is the amendment I offer.

Mr. VEST. I should be very glad indeed to know whether this enormous increase is necessary to cover the difference in labor between foreign countries and North Carolina?

Mr. PRITCHARD. I can convince the Senator of that fact without any trouble when I come to it.

The amendment reads as follows:

Mica cut into rectangular or other definite shapes, 30 cents per pound; sheet mica, 20 cents per pound; mica in block of other forms not specified, 15 cents per pound.

Mr. VEST. Without detaining the Senate, I wish to have read a letter from Mr. Weston, whose reputation as an electrician is national. He and Mr. Edison stand at the head of the electrical

profession. I submit that the Senate ought to hear from electricians who use this article, which is their raw material.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

NEWARK, N. J., *April 6, 1897.*

MY DEAR SENATOR: Permit me to bring to your attention the provision of the Dingley tariff bill which proposes to impose upon imported mica an increased duty of between 100 and 200 per cent.

The amendment which has been agreed to provides for 2 cents per pound on dimensions of 1 square inch or less, and 2 cents per pound for each additional square inch, provided that the maximum rate of duty shall in no case exceed 50 cents per pound.

In order that the electrical industry may be encouraged in this country, it appears to all interested in it that the Government should afford every facility possible for the obtaining of those materials which can not be secured in this country, and which are essential to the highest development of the art with as little expense in the way of taxation as possible.

I am informed that the effort to increase the duty on mica has been fostered by the miners of North Carolina, but it is necessary for the electrical industry to have a superior mica which will wear down to the copper, and this quality has not, thus far, been found in the United States.

Will you not kindly use your influence with the Finance Committee to prevent the duty being raised above the 15 per cent ad valorem and 3 cents per pound provided in the Dingley bill as published, or better, to have the duty remain where it is at present, 20 per cent ad valorem, if it is not among the possibilities to have mica admitted free under the classification of raw material, where it properly belongs, in my judgment.

Respectfully, yours,

EDWARD WESTON.

Hon. JAMES SMITH, Jr.,
United States Senate, Washington, D. C.

Mr. JONES of Arkansas. In this connection, I should like to call the attention of the Senate to what seems to be the effect of the effort enormously to increase the tax on mica. It seems, from the letter just read at the request of the Senator from Missouri, that mica is necessary in the great electrical industries of the country, as well as a number of other interests in which it is used.

The Senator from Nevada assures us that we may be satisfied that there is an abundance of mica in the United States. It would seem that no greater misfortune could befall a great many interests here than to find we have mica. We learn from the comparative statement submitted by the Treasury Department that the article is brought here and sold at 19 cents a pound.

Now, we must pay a tax of 15 to 30 cents a pound on the article because the Almighty has blessed us with mines of it in the hills. We must pay enormously more for it because Providence has given us a natural supply. It would be a blessing to the country and to mankind if no natural resources of this sort were furnished to us, if every time the Lord provides us with some abundant resource of this sort we are to be taxed out of sight and out of conscience, so as to enable the men who happen to own the land on which it is located to get ten times as much for it as it can be bought for abroad.

Mr. GALLINGER. Will the Senator from Arkansas permit me?

Mr. JONES of Arkansas. Certainly.

Mr. GALLINGER. I rise simply to make an observation. The Senator from Arkansas is not quite so frank as he usually is when he says that this article is sold at 19 cents a pound in the American market.

Mr. JONES of Arkansas. What I said was that the tabulated statement furnished by the Treasury Department shows the unit of value on the more than 1,000,000 pounds imported last year to be 19 cents a pound.

Mr. GALLINGER. Certainly.

Mr. JONES of Arkansas. It does not mean the American market. It means the market from which the mica was shipped. We all understand that, and I did not suppose there would be any misunderstanding about it.

Mr. GALLINGER. Certainly; but that is a very different thing. The Senator said it is sold in this country at 19 cents a pound, as the RECORD will show. It is invoiced abroad at 19 cents a pound. There is no question about that. It is brought into this market and sold for twenty times that amount or more, but there are such palpable and undisguised and outrageous frauds in the importation of mica to this country that something certainly ought to be done in the tariff bill to correct that great injustice to the American producers.

The Dingley bill, as it was sent over to the Senate—very likely attention has been called to this matter, but I have been absent from the Chamber—provides that mica shall pay 2 cents per pound on dimensions of 1 square inch or less and 2 cents additional for each additional square inch. That is a schedule which ought not to be adopted by Congress, for the reason that the foreign producers of mica will cut the mica into blocks of less than 1 square inch, and it will all, or practically all, be imported under that schedule of 2 cents per pound, because these electrical companies, who are not suffering, so far as I know, at all, but are making immense profits, beyond question, can use the mica 1 square inch in size quite as well as if it were a foot in size; in fact better, because otherwise they would have to reduce it in size, a good deal of it being used in pulverized form, I understand.

I have not given very careful attention to the amendment submitted by the Senator from North Carolina, but as the people of my State are interested in mica, as well as the people of North Carolina and Nevada and other States, I simply rose to say that some different schedule ought to be adopted than either of those found in the bill.

Mr. GRAY. Will the Senator from New Hampshire permit me?

Mr. GALLINGER. Certainly.

Mr. GRAY. Does the Senator know—and if he does, I would be very glad if he would inform the Senate, or inform me at least—what is the proportion of mica of domestic production used in the United States?

Mr. GALLINGER. I am under the impression that under the low tariff rates of the existing law the proportion of domestic mica is small. I can not give the Senator the exact proportion.

Mr. GRAY. But it is small?

Mr. GALLINGER. It is small.

Mr. GRAY. There are great frauds, the Senator says, in the operation of the tariff.

Mr. GALLINGER. There is no question but that if mica is invoiced at 19 cents a pound and comes into this country and sells in competition with domestic mica at 10 or 15 or 20 cents, there must be frauds.

Mr. LODGE. It is brought in here at 19 cents and sold at $7 a pound.

Mr. GRAY. Frauds on whom?

Mr. GALLINGER. I would say the fraud was, first, on the customs department of the Government in taking from us a revenue that properly belongs to us.

Mr. GRAY. Is that all?

Mr. GALLINGER. That is one.

Mr. GRAY. Is that the only and chief fraud that occupies the Senator's attention?

Mr. GALLINGER. I am not quite sure about that. The mica is mined by much cheaper labor than we can obtain in the United States. It is brought in here under that fraudulent valuation, and it is sold in competition with the American product, which I suppose can not be produced for less than the amount, and very likely costs more than the amount, that the mica is sold for after it is brought into this market.

Mr. PRITCHARD. Will the Senator permit me to interrupt him?

Mr. GRAY. Certainly.

Mr. PRITCHARD. I desire to suggest that the greatest fraud is the fraud perpetrated on the American mine owner.

Mr. GRAY. The American mica-mine owner?

Mr. PRITCHARD. Yes, sir.

Mr. GRAY. That is what I thought. I am glad the Senator from North Carolina said that, because I think the Senator from New Hampshire meant it, although he confined himself to the Treasury.

Mr. GALLINGER. I am not going to have the Senator from Delaware reach conclusions in my behalf. I say again that there is a fraud upon the customs department of the Government, inasmuch as we are robbed of legitimate revenue by the undervaluations, and that the mica is then brought into this country and sold for certainly as low an amount and, in my judgment, for a less amount than we can produce domestic mica for at the enhanced price of labor which we must necessarily pay in the United States.

Mr. GRAY. If the frauds are committed under the present tariff of 20 per cent, I think it is——

Mr. GALLINGER. Twenty per cent.

Mr. GRAY. And they are such as grieve all just men like the Senator from New Hampshire and myself, I think the best way to get rid of the frauds is to abolish the duty and give us free mica, and then a fraud would be entirely circumvented which is being practiced upon the great body of American consumers. The fraud upon the mica owners is insignificant in comparison with the fraud that is practiced upon the American consumers of this quite important article of commerce.

We have been told by the Senator from Nevada and others that mica is abundant in the United States; but, unfortunately perhaps, the mica is in private ownership; it is in private hands, and the abundance will not avail unless there is not only the natural compensation that comes from free commerce, but an additional law-imposed profit given to the owner. That must be done before he will let go of his abundance for the fruition of the great masses of mica consumers.

I have in mind an industry as worthy as that of the mica producer on the Atlantic Coast. Some years ago there was discovered a large deposit of mica upon the inhospitable shores of Greenland, and they sent American vessels with American laborers to get the mica out, and it came down in quantities sufficient for the purpose.

It was exceedingly good, so I am informed. It was equal to any found in this country. That was a natural bit of American enterprise; and yet that industry now, forsooth, because it has discovered the deposit of mica upon those bleak hills, is to be fined an additional fine to the 20 per cent now imposed by law for the benefit of other industries not a bit more worthy than the industry of which I speak. I believe that is a fraud on the American consumers of mica, as long as the word "fraud" has been used in

regard to this matter at all. The Senator from North Carolina says it is a fraud upon the mine owners. I say that this superimposed tax is a fraud upon those who would use, according to the possibilities that God has given them for their exercise, their faculties and their means in the way most profitable to themselves.

Mr. LODGE. Mr. President, as I understand it, the mines in India, from which the mica is brought, where it is mined with very cheap labor, are owned exclusively by English and American capitalists, persons interested either in the electrical business or the production of mica. It is all right, according to the Senator from Delaware, to select those American mine owners in India, and so to legislate as to give them an enormous profit, because they employ tropical labor; but it becomes a criminal fraud so to legislate as to give profit to the American mine owner in the United States who desires to employ American labor.

I do not see why it is so wicked to legislate in favor of a man who owns a mine or works a mine in the United States and perfectly admirable to legislate in favor of another American who happens to own a mine in India, worked with Indian labor.

Mr. GRAY. I never said I was in favor of legislating in favor of the American mine owner in India. I want no legislation. I want free opportunity, and let them take chances with the competition of the world.

Mr. LODGE. That is legislation.

Mr. GRAY. Is it?

Mr. LODGE. Of course it is legislation. Free trade is legislation. Free trade is legislation of the most distinct kind.

Mr. PRITCHARD. And in the worst form.

Mr. LODGE. And in the worst form. Legislation which would give a profit to one class of Americans, who are investing their capital and employing cheap tropical labor, is all right, but to legislate so as to give an opportunity to an American who invests his capital here and desires to employ American labor is all wrong. I can not myself see that there is any crime in so legislating as to enable American labor to be employed and American capital to be employed profitably, and it seems to me that it is better for the country that our capital should be invested in the United States and employed here than to be employed in India. I do not see any reason for talking about it as a fraud and a crime because we desire to help any class of American citizens to make money by their enterprise or their labor.

Mr. HALE. We have a great mountain of mica in Maine named for the product. Our people are a good deal interested in it, but I understand that this paragraph, by unanimous consent, has been passed over, and therefore I shall withhold anything I have to say in favor of our mountain of mica in Maine until it is actually before the Senate for consideration and a vote is to be taken. I hope the Senator in charge of the bill will succeed in going on with the measure where there are subjects in controversy and not simply for debate.

Mr. PETTIGREW. Mr. President, it seems to me that the issue of free trade or protection is not involved in this controversy. I undertake to assert, and I believe it is a fact——

Mr. HALE. I shall object to the paragraph going over unless the discussion upon it is to cease.

Mr. PETTIGREW. I have ceased to discuss it. I believe I have the floor.

Mr. HALE. I certainly shall object if this subject is to be debated after it was asked unanimously that it might go over. I shall object to its going over unless debate ceases.

Mr. PETTIGREW. I think I have unanimous consent to discuss the question at this time, and I stand upon my rights.

Mr. HALE. The Senator does not have unanimous consent if it requires my consent.

Mr. PETTIGREW. I had consent before the discussion commenced. I asked unanimous consent to submit some statements in regard to mica and nickel.

Mr. HALE. The Senator asked to have the paragraph go over.

Mr. WHITE. I suggest that the remarks of the Senator from South Dakota would apply to any paragraph in the bill. They are relevant anywhere, under our rules.

Mr. PETTIGREW. Mr. President, I do not believe there is a Senator in this body who would vote for absolute free trade. The issue of a tariff for protection or free trade was settled with the passage of the Wilson bill, which is a protective-tariff measure from the first to the last line of it. No political party will ever again carry this country if the people suppose for a moment that the issue is free trade, and no Senator can be returned to this body who is an advocate of free trade if his constituents believe he would vote for absolute free trade. Senators may vote for free trade upon Dakota mica, but they will not vote for free trade on Delaware manufactured goods. Therefore the issue of free trade or protection is not in this controversy at all. We are simply contending about the amount of duty.

It is a controversy over schedules, and that is all there is to it. There is not enough in it to make two political parties in this country, and neither can you maintain two political parties in this country on the issue whether the tariff shall be 10 cents a pound or 2. The question of schedules is too small a controversy to divide great political parties contending for the government of this great country. That issue is out of American politics. Why should we talk about it?

The great issues that are before the people of the United States to-day reach further than a controversy over the amount of tariff on any item in the pending bill. They are the great questions which determine whether we will march on in the course of freedom and liberty and maintain our Republic, or whether we will become a plutocracy—not a plutocracy of natural persons, but a plutocracy of artificial persons; whether we will continue to be what in fact we are to-day, a government of the corporations, for the corporations, and by the corporations, or whether we will go back to what we were in the past, a government of, for, and by the people.

The provision of the Senate committee in regard to nickel is equivalent to no duty at all. The Senate committee has provided as to nickel a duty of 6 cents per pound, and then has inserted in brackets "except nickel matte." Of course, under that provision, all of the nickel would come in, for nickel matte is simply the nickel extracted from the ore, with such other metals as accompany it in the ore. Then they can be separated in this country. It would all come in free, nickel matte being free. Therefore it is absolute free trade. That provision is a good deal like a good many other provisions in the bill, obscure; not intended to deceive, but having that effect. We can produce all the nickel used in this country, and yet what is the history of this industry? There are nickel mines in Missouri, Pennsylvania, Arkansas, Washington, North Carolina, Colorado, New Mexico, California, Oregon, Nevada, and South Dakota.

Mr. QUAY. The mines in Pennsylvania have been abandoned.

Mr. PETTIGREW. The Senator from Pennsylvania says that the mines in Pennsylvania have been abandoned. So they have been in every one of the States I have named. Pennsylvania is no exception. So would the Pennsylvania mills be abandoned if you had free trade. Open your doors to the low-paid labor of Asia, compensated in silver, and your mills will be abandoned; the doors will be closed. There is no question about it.

Let us see what is the history of nickel. We produced in the United States in 1885, 275,000 pounds of nickel; in 1886, 214,000 pounds; in 1887, 205,000 pounds; in 1889, 252,000 pounds; in 1890, 223,000 pounds; in 1891, 118,000 pounds; in 1892, 92,000 pounds; in 1893, 49,000 pounds; in 1894, 9,000 pounds. I have not the figures for 1896, but I understand the production went on declining, one mine after another closing throughout the country.

When they are all closed, you will pay twice what you now have to pay for nickel. What is the occasion of the decline in the industry? A deposit of nickel was discovered in Canada which is so rich in nickel and copper that the copper pays the cost of production. Therefore the nickel costs nothing. They can put the price at any figure they choose. The moment they have destroyed the industry in this country, then you will pay two prices for your nickel again, and no one will dare to open the mines of the United States in view of this known competition, because they know the moment they open the mines and invest their money in the industry the Canadians can come in and put down the price so as to wreck their enterprise and make them lose their capital.

What we want, then, is a duty upon nickel sufficiently large so that it can be produced in this country constantly and so that we shall not be in the hands of a foreign producer and so that with our high-priced labor we can continue the production. It will not shut out the Canadian nickel, because it can come to this market anyway, no matter what the duty is. Their nickel costs nothing. We have mines in Oregon, for instance, the ore from which has taken the premium, but it is not accompanied with copper in sufficient quantity so that the copper will pay for mining both. Yet men are ready to-day to go ahead, but not under the provisions of this bill, and put up works costing $150,000 to mine nickel in Oregon and Washington, provided a sufficient duty is placed upon the article so that they can mine it and be safe from absolute ruin by Canadian competition. I hold that there is justice in their claim.

We can mine nickel profitably in Dakota, but we can not do it, we can not get capital to do it, if we know that at our door is a deposit which can put the price where it will absolutely destroy all profit and not even permit us to make enough to pay the cost of production. I hold it is good policy to place a duty upon nickel sufficient so that we can keep our mines open. Then we will always keep the price at a reasonable figure. Then if the duty is enough, so that it will assure the working of the American mines, we will not be at the mercy of the foreigners to double the price when our mines are closed. I hold that it is good, patriotic policy again to open the mines which produced almost enough nickel to supply our wants in the past, and do it by a duty of 15 cents a pound upon nickel, and not admit nickel matte free.

I do not care to extend my remarks any further, but I desire to have the statements I have here in regard to the subject printed

in the RECORD. I ask unanimous consent that they may be printed in the RECORD.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and that will be the order.

The papers referred to are as follows:

NICKEL.

Deposits of nickel exist in the States of Missouri, Pennsylvania, Arkansas, Washington, North Carolina, Colorado, New Mexico, California, Oregon, Nevada, and South Dakota.

Mines have been worked and nickel produced in Lancaster County, Pa.; at Mine Lamotte, Mo.; at Lovelocks, Nev., and at Riddles, Oreg.

Competing foreign deposits of nickel exist in the Province of Ontario, Canada, and the islands of New Caledonia, South Pacific.

The nickel industry in the United States has steadily declined since the year 1876, in which year the value of the nickel product was $523,554. For the year 1894 it was $3,209. Since that year all the reduction works have ceased to operate, and no nickel is now produced in the United States.

In the new Caledonia mines and works Chinese and convict labor is employed. In Canada the copper obtained from the nickel-producing ore pays the cost of mining and reducing and gives the manufacturers a clear profit of all the nickel produced. The cost of producing nickel in the Oregon district is 12 cents per pound.

The market value of nickel is about 34 cents per pound.

The pending tariff bill provides a duty of 6 cents a pound on nickel and admits the ore and matte free. These provisions duplicate the nickel provisions of the present tariff law. The tariff law of 1890 was the same, excepting that the duty on refined nickel was 10 cents per pound instead of 6 cents per pound.

Both the Wilson and McKinley laws permit ore and matte to come in free, and this is beneficial to the Canadian operators, who mine nickel ore at Sudbury, Ontario. It is an advantage to them to bring the matte into the United States and here complete the reducing process. The Canadian mines and works are owned largely by United States capitalists, and they favor free matte and ore, while the owners of mines and works in the United States want duty on nickel matte and ore.

IMPORTS.

In the following tables are given the statistics of the imports of nickel and cobalt oxide into the United States from 1868 to 1895:

Nickel imported and entered for consumption in the United States, 1868 to 1895, inclusive.

Year ending—	Nickel.		Oxide and alloy of nickel with copper.		Total value.

NICKEL AND COBALT.

PRODUCTION.

The nickel ores of Oregon, Nevada, and elsewhere have not yet been systematically mined, and the only nickel (and cobalt) mined in the United States in 1895 was that produced at Mine Lamotte, Mo., which yielded 180,737 pounds of matte, containing 14,458 pounds of cobalt and 10,302 pounds of nickel. In addition to this, the smelting of foreign matte makes the total product of nickel larger than heretofore. The price of nickel ranged from 28 cents to 38 cents per pound, according to quantity and fineness, and that of cobalt oxide from $1.40 to $1.45 per pound.

USES.

The effect of nickel upon steel and iron has become a favorite subject of experiment, discussion, and some speculation in the last three or four years, since its use was found to be advantageous in armor plates. A paper on the manufacture, properties, and applications of nickel steel by O. Vogel, in Stahl und Eisen, 1895, page 718 et seq., gives a comprehensive review of the subject, the substance of which is here reproduced. The author quotes from a chemical work by Christofle Girtanner, published in 1792, to show that it was then known that iron would unite with nickel.

Later, in 1820, Faraday made nickel-iron alloys by melting the two metals together, and he was followed by a number of experimenters. Nickel steel seems to have been first made by a manufacturer named Wolf, in Schweinfurt, Germany, in 1833, and was described by Liebig as resembling damascened steel. It was introduced into trade, although not very extensively, under the name of "meteor" steel, but it was not until 1888–89 that nickel steel was successfully introduced into large use, when the attention of governments was drawn to it.

The preferred methods of making nickel steel consist in adding the desired proportion of nickel to the molten metal in a Martins furnace, for example, and the nickel is introduced either as oxide, together with a reducing agent, or in the metallic state as ferro-nickel.

The author gives several tables showing the composition of various nickel steels and the results of the tests made upon them. The tests were made by the Canadian Copper Company and the Cleveland Rolling Mill Company in this country, and in several places in Europe. The results show that in steels having very nearly an identical composition, except that one contains nickel while the other does not, the steel containing nickel is superior in strength and elasticity under the same conditions. One table may be given in illustration of this point.

CHICAGO, *April 27, 1897.*

GENTLEMEN: We are owners of extensive nickel deposits in the State of Oregon, which deposits have been pronounced by experts equal to any nickel deposit in the world. Notwithstanding the great extent of our ore bodies, and notwithstanding the ore is of higher grade than the Canadian ore, we are debarred from the markets of the United States by reason of the admission of the Canadian ores and matte free of duty.

We therefore ask that the tariff bill now before your committee be amended to read as follows:

"Paragraph 183. Nickel, nickel oxide, alloy of any kind in which nickel is a component material, and nickel steel, 15 cents per pound.

"New paragraph 183½. Nickel in ore, 5 cents per pound; in matte, or other crude form, not ready for consumption in the arts, 10 cents per pound on the nickel contained therein.

"Paragraph 605. Strike out the words 'nickel and nickel matte.'"

Certain persons who are interested in having the Canadian product admitted free of duty have falsely stated that there are no deposits in the United States that can be made to pay under any reasonable duty, and state that we have no workable deposits in Oregon. We had our property examined by a very eminent mining engineer, Mr. J. Elton Bott, of Manchester, England, and I quote the following from his report:

"There are thirty openings or incipient mines, and the amount of ore on their respective dumps will aggregate 5,000 tons of nickel ore. The two most important workings are tunnel No. 1, which is 175 feet long, in addition to the open cut of 50 feet. This shows an enormous vein of high-grade nickel ore, with no signs of giving out. My opinion is that from this opening alone 500,000 tons can be quarried.

"Tunnel No. 2 is 80 feet long, exclusive of the open cut 40 feet long. This also shows as rich a deposit of high-grade ore as No. 1, and I estimate that 100,000 tons can be quarried."

Our property was also examined by Mr. J. H. Pomeroy, a mining engineer in charge of the Prosser Iron Mines, near Oswego, Oreg., who reports very favorably, and submitted analyses of samples which he collected. These analyses were made by Mr. George S. Miller, analytical chemist, at the Quinton Smelting Works:

	Nickel.	Iron.
	Per cent.	*Per cent.*
1. Average ore	9.97	3.20
2. Best selected ore	14.85	1.54
3. Soil from surface	9.50	21.67
4. Concentrates from soil	11.23	18.60

At the Columbian Exposition at Chicago ore from our mine took the first premium as the best exhibit of nickel magnesian silicate, notwithstanding the fact that the mines of New Caledonia were represented with their choicest specimens. The deposits have been examined and reported on by other eminent men, who all agree as to the extent and value of the deposits, but they also agree that it is impossible to compete with the Canadian mines so long as their products come in free of duty. We have expended in the neighborhood of $150,000 on our property, which is practically a loss unless we can secure this duty. We have already installed a 300-horsepower Sterling water-tube boiler, an 18 by 48 Corliss engine, pump, heater, etc. This is housed in a large brick building. The foundations for the breaking, crushing, drying, concentrating, and smelting plant are all complete, and the machinery, consisting of breakers, roasting furnaces, dryers, blowers, and a large smelting plant are at the railroad depot at the foot of the mountain, and have been there since 1892.

If we can secure this duty, we propose to complete our plant at once, which can be done in a couple of months' time, and we can then furnish at least a portion of the nickel required in the United States, and the other mines of the country will be able to supply the balance.

Respectfully,

SAMUEL P. PARMLY.
JOHN W. SWEET.
GEO. OLIVER.
J. H. WINSLOW.
J. W. STEWART.
H. M. WEIR.
A. N. STOMMEL.
S. J. EASTMAN.

FINANCE COMMITTEE, *United States Senate.*

The company could easily produce twenty times as much as it is now, or ever has produced, and do it at a cost of not more than $20 per ton for a product containing 25 per cent copper and 25 per cent nickel, or 1,000 pounds of metal to the ton. You can be your own judge of how cheaply nickel can be produced after taking the copper out of this matte, which can be done in a refined state at a cost of not exceeding one-half cent per pound. In other words, you can take 500 pounds of fine copper out of this ton of matte for $7.50. If you add this to the whole cost of producing the ton of matte, you have 500 pounds of fine copper for less than $30 and the 500 pounds of nickel in the matte thrown in.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 186, on page 58, and insert in lieu thereof the following:

186. Pins with solid heads, without ornamentation, including hair, safety, hat, bonnet, and shawl pins; any of the foregoing composed wholly of brass, copper, iron, steel, or other base metal, not plated, and not commonly known as jewelry, 35 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 187, page 58, line 23, before the word "cents," to strike out "ten" and insert "five;" so as to read:

Quicksilver, 5 cents per pound.

Mr. ALLISON. The majority of the committee instruct me to propose 7 cents a pound in lieu of 10, and instead of 5 cents, as proposed by the committee originally.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to amend the committee amendment by striking out "five" and inserting "seven;" so as to read:

Quicksilver, 7 cents per pound.

Mr. STEWART. Let me make an inquiry as to the amendment. The bill as it came from the House provided for a rate of duty at 10 cents per pound?

Mr. ALLISON. Yes.

Mr. WHITE. Seven cents is the rate of the Wilson law, is it not?

Mr. JONES of Arkansas. Yes.

Mr. STEWART. I should like to say one word. During all the time when the price of the commodity was fluctuating, I was living in the mines where the largest demand for quicksilver was, in a mining region in California first, and afterwards in Nevada, where they consumed very large quantities. Then they developed quicksilver mines in California; in fact the Almaden was discovered before 1850, and was being worked on a small scale. When they commenced producing quicksilver in California, so that it tended to supply the market there, they put down the price which they were charging at the mine in Spain, owned by a corporation in Spain, to such a low figure that it closed the California mines.

When the mines were closed, they put up the price of quicksilver more than double—I think they got 75 cents and a dollar a pound—and made it almost prohibitory, with great embarrassment to the miners. Afterwards a tariff of 10 cents was put upon quicksilver, and then the California mines were again opened, and the price went down. They dared not open their mines, as they were liable to be destroyed by this foreign quicksilver, and the tariff in that instance saved them from a monopoly which would have proved absolute destruction to our industry. A tariff of 10 cents a pound brought it down to more than 50 cents, because the California mines were again reopened and were kept open. The tariff on this article is quite an important factor. I do not know that the tariff is the same as in the Wilson Act, but it may answer the purpose. It is not too much, I am satisfied.

Mr. WHITE. I desire to call attention to a former paragraph.

Mr. VEST. That will be all right after we get through with this particular paragraph.

Mr. ALLISON. I ask the Senate to disagree to the next amendment to this paragraph.

Mr. WHITE. I should like to state to the Senator from Iowa that by inattention, doubtless, on my part paragraph 186 was passed, and as soon as the quicksilver item is disposed of I should like to go back to that paragraph for a moment.

The VICE-PRESIDENT. The Senator from Iowa has made a motion. The Chair did not understand it.

Mr. ALLISON. I ask the Senate to disagree to the amendment striking out line 24 on page 58 and lines 1 and 2 on the next page.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. After the word "pound," in line 23, strike out the remainder of the paragraph, in the following words:

The flasks, bottles, or other vessels in which quicksilver is imported shall be subject to the same rate of duty as they would be subjected to if imported empty.

Mr. ALLISON. I ask that that amendment be disagreed to.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The VICE-PRESIDENT. The clause stands in the paragraph as it originally passed the House.

Mr. VEST. Now I want to call attention to a fact that has not been mentioned in connection with this paragraph, the quicksilver duty. Under the McKinley Act it was 10 cents a pound; under the Wilson Act it was 7 cents a pound; under the House bill 5 cents a pound, and I understand it is now proposed to put it back to the Wilson rate.

Mr. WHITE. It was 10 cents a pound under the House bill.

Mr. VEST. Yes—I beg pardon—it was 10 cents a pound under the House bill. A majority of our committee put it at 5 cents a pound, and they now go back to 7 cents a pound. Is that correct?

Mr. ALLISON. That is right.

Mr. VEST. Mr. President, I should like to ask why it is necessary to go back to a rate of 7 cents? It was too much under the Wilson bill. The comparative statement shows that we exported in 1896 $628,673 worth of quicksilver and imported $45 worth. What are we protecting against? Unquestionably we get no revenue. Our imports amount to less than $50 worth. Unquestionably we have the American market. None comes in from abroad. Now, why the necessity of putting back this duty? I take it for granted that the majority of the Finance Committee who constructed the Senate bill reduced it 2 cents for this very reason, and they were right; and now, about the time we are congratulating ourselves that we are coming together upon something like an American basis, Senators recede and put back the old duty of 7 cents, which ought never to have been put there. I remember very well when this matter was under discussion in 1894, and I insisted on a reduction of the duty, which was 10 cents a pound under the McKinley Act.

Mr. STEWART. There is a very good reason for having it 7 cents. Notwithstanding we exported last year and imported very little, that is no reason why there should not be a duty imposed on this article.

Mr. JONES of Arkansas. What is the reason for it?

Mr. STEWART. The reason for it is on account of the great combination that own the other mines of the world. They have a perfect monopoly of the quicksilver, and if there were free trade at any time, they would ship it in and put it down in this country for a short time and then force our mines to close again; and when they are closed, then the price goes up.

Mr. JONES of Arkansas. Why do they not keep us from exporting it if they would drive us out of the market?

Mr. STEWART. They are able to drive us out of the market.

Mr. JONES of Arkansas. Why do they not do it? We are exporting it and selling it in their market.

Mr. STEWART. Because we have the advantage of 7 cents.

Mr. JONES of Arkansas. We have no advantage of 7 cents when we come out into the open market with them. We make hundreds of thousands of pounds and send it out to the open market without any protection, and those people can not stop it. They can not break it up. Why do they not break it up if they have the power to do so?

Mr. STEWART. Because they are not willing to lose money permanently in that business when we have that advantage. Just take that off and they can afford to lose money for a few months until they close up our mines and get the benefit of the home market, and when they close our quicksilver mines—mines of that kind fill with water and the machinery runs down—and then they will not be opened again. That is the way it was before. They can afford to lose something, and of course they will lose something. They have a monopoly there, and they will sell at a loss in this country. They did it before. They sold at a loss until the mines were closed, and then they put it at exorbitant prices. We had an actual experience in that, and I think if the duty were taken off there would be danger that they would close the mines again. It is an article that can be operated by a monopoly in that way. They can afford to make a sacrifice and close us out.

Mr. JONES of Arkansas. I will state what would seem to me to be the plain common sense of this situation. Our people can produce quicksilver now, send it abroad, and sell it in competition with the quicksilver abroad. We want to increase the tariff here, so as to enable them to charge our consumers of quicksilver higher prices than they have to pay now. They will be protected in these exactions levied upon our people, and they will be protected by the tariff against competition abroad. But they can enter into open competition without any protection; they can go into the open market of the world and sell quicksilver at a profit in competition with these people. They simply have not an opportunity to compel our people to pay an arbitrary price raised above the natural level by the means of a tariff. It is simply enabling these people to rob the consumers in this country to that extent; that is all.

Mr. STEWART. But with free trade they would just glut the market for a little while until they broke up the small producers, and then they would again put the price back. That is the way they did before.

Mr. PERKINS. Mr. President, I desire to say only a few words in answer to my friend the Senator from Arkansas. The Rothschilds have control of all the cinnabar mines of the world excepting those in the State of California, and until we opened those

mines and developed them the average price of quicksilver was from 80 cents to $1 a pound. To-day it is 38 cents a pound in the markets of this country. The only quicksilver that we produce for export we have sent from the Pacific Coast to British Columbia and to Mexico.

It may be a crime, perhaps, that we have employed American workmen to develop the cinnabar mines of California, and have patronized the farmers and mechanics in developing those mines and sending quicksilver to Mexico and to British Columbia, but our action, I believe, meets the approval of the American people. Quicksilver to-day is cheaper than it was ever known before in this country. If my friends from Missouri and Arkansas desire to close up our mines and give the quicksilver business of the world to the Rothschilds, who, as is well known, control all the cinnibar mines abroad, I do not believe the people will sanction their action. It was one of the wise measures that prevailed in the Senate in 1894, when we defeated the report of the committee and placed a duty of 7 cents a pound upon quicksilver.

Mr. CAFFERY. Mr. President, the Senator from California is mistaken about quicksilver being lower to-day than it ever was before. It has risen from 40 cents a pound in 1893 to 60 cents a pound in 1896. He says the Rothschilds are engaged in this quicksilver business, they are crushing out the industries of California in this direction. We have been frequently treated with essays upon the baneful effects of the Rothschilds upon the importation of silver. Now we have got them into quicksilver. I should like to know of the Senator from California whether it was not as easy for them to buy up the quicksilver of California as it is alleged to be to control the money market of the world in a much greater field than quicksilver?

Mr. PERKINS. I will state to my friend, who evidently is not as well posted upon cinnabar as some others who have worked in the mines, that cinnabar in California does not average more than 2½ to 3 per cent. It is not owned by any one company or half a dozen companies, but it is divided up among twenty or thirty companies, while in the quicksilver mines of Austria and southern Spain their cinnabar yields from 15 to 20 per cent. They do not want to buy as poor mines as we have in California that pay only 2½ to 3 per cent of quicksilver.

It would not pay them to do it and pay the wages that we compensate our miners with. They prefer to employ labor in Austria and Spain for 50 cents a day and pay them in the silver that they get from other mines in the world. I will state to my friend from Louisiana further that California is the only spot on the Western Continent where quicksilver is found in paying quantities.

Mr. CAFFERY. It appears, then, that we are not asked to give protection against pauper labor or on account of the unequal natural advantages between the United States and other countries, but we are asked to protect pauper mines in this particular instance. If the mines the Senator mentions in Spain or Austria yield 15 per cent of quicksilver and those in California yield only 2½ per cent of the same article, I submit that you must have a very high protection to equalize the pauper mines of California with the richer mines of Spain and Austria. In other words, you want by artificial means, by legislation, to equalize unequal natural conditions, which I think is a matter very difficult of attainment.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee, making the rate on quicksilver 7 cents per pound.

The amendment was agreed to.

The Secretary read the next paragraph, as follows:

188. Type metal, 1½ cents per pound for the lead contained therein; new types, 25 per cent ad valorem.

Mr. JONES of Arkansas. I wish to call the attention of the Senate to the fact that in the first clause this paragraph doubles the rate on type metal in the present law and raises it from 15 to 25 per cent in the second clause. I move to strike out "1½ cents" and insert "three-fourths of 1 cent" in the first paragraph, and to strike out "twenty-five" and insert "fifteen" in the second.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. After the word "metal," in line 3, page 59, strike out the words "one and one-half" and insert "three-fourths of 1 cent," and in line 4 strike out the word "twenty-five" and insert "fifteen;" so as to read:

188. Type metal, three-fourths of 1 cent per pound for the lead contained therein; new types, 15 per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Arkansas.

Mr. JONES of Arkansas. I should like to have the yeas and nays on agreeing to the amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HARRIS of Kansas (when his name was called). I desire to announce my general pair with the junior Senator from Wyoming [Mr. CLARK].

Mr. BATE (when the name of Mr. HARRIS of Tennessee was called). I desire again to state that my colleague [Mr. HARRIS of Tennessee] is absent sick, and is paired with the Senator from Vermont [Mr. MORRILL], who is also absent sick. This announcement applies for the day.

Mr. KENNEY (when his name was called). I announce my pair with the junior Senator from Pennsylvania [Mr. PENROSE].

Mr. MALLORY (when his name was called). I desire to state that I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were here, he would vote "nay" and I should vote "yea."

Mr. TILLMAN (when his name was called). I have a pair with the Senator from Nebraska [Mr. THURSTON]. He being absent, I withhold my vote.

Mr. VEST (when his name was called). I am paired with the Senator from Minnesota [Mr. NELSON].

Mr. WILSON (when his name was called). I am paired with the Senator from Florida [Mr. PASCO]. If he were present, I should vote "nay."

The roll call was concluded.

Mr. HANNA (after having voted in the negative). I am paired with the junior Senator from Utah [Mr. RAWLINS], who has not voted, and I withdraw my vote.

Mr. WARREN. I desire to announce my pair with the junior Senator from Washington [Mr. TURNER].

Mr. BURROWS. My colleague [Mr. MCMILLAN] is paired with the Senator from Kentucky [Mr. LINDSAY].

The result was announced—yeas 18, nays 28; as follows:

YEAS—18.

Bate,	Cockrell,	Mills,	Turpie,
Berry,	Gorman,	Mitchell,	Walthall,
Caffery,	Gray,	Morgan,	White.
Chilton,	Jones, Ark.	Pettus,	
Clay,	McLaurin,	Smith,	

NAYS—28.

Allison,	Fairbanks,	Hoar,	Platt, N. Y.
Burrows,	Foraker,	Jones, Nev.	Pritchard,
Cannon,	Frye,	Lodge,	Quay,
Carter,	Gallinger,	McBride,	Sewell,
Cullom,	Gear,	Mason,	Shoup,
Davis,	Hale,	Perkins,	Spooner,
Deboe,	Hawley,	Platt, Conn.	Wetmore.

NOT VOTING—43.

Aldrich,	Hanna,	Mantle,	Stewart,
Allen,	Hansbrough,	Martin,	Teller,
Bacon,	Harris, Kans.	Morrill,	Thurston,
Baker,	Harris, Tenn.	Murphy,	Tillman,
Butler,	Heitfeld,	Nelson,	Turner,
Chandler,	Kenney,	Pasco,	Vest,
Clark,	Kyle,	Penrose,	Warren,
Daniel,	Lindsay,	Pettigrew,	Wellington,
Elkins,	McEnery,	Proctor,	Wilson,
Faulkner,	McMillan,	Rawlins,	Wolcott.
George,	Mallory,	Roach,	

So the amendment was rejected.

Mr. BACON subsequently said: Upon the vote on the amendment offered by the Senator from Arkansas [Mr. JONES] relative to type metal, on account of the confusion in the Hall at the time, the clerks failed to hear my response. While I do not ask that there shall be any correction made of the vote, as the result has been announced, I take this method of stating that I did vote, and that I voted in the affirmative.

Mr. WHITE. With the consent of the Senator from Iowa, I desire to go back to paragraph 186, which was passed by inadvertently a few moments ago. I understand that there is no objection to considering the paragraph as being reconsidered for the purpose of amendment. I move as a substitute for the amendment proposed by the committee the following:

Pins, metallic, including pins with solid or glass heads, hairpins, safety pins, and hat, bonnet, shawl, and belt pins, not commercially known as jewelry, 25 per cent ad valorem.

With reference to paragraph 186 as proposed by the committee, I desire to state that the change in the language of this paragraph from that of the Wilson Act and the McKinley Act is of such a character as to limit pins only to such as are made entirely of metal; whereas in the former acts common glass-head pins did not pay a duty at a rate exceeding 30 per cent. Under the present designation in the bill the duty on the same will be, as I am informed by General Appraiser Sharretts, 60 per cent. That officer, in a communication upon this paragraph, says:

I know of no industry in this country which demands such an exorbitant rate of duty on an article used by the poor, both for their personal use and for manufacturing purposes.

I therefore move the substitute.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed as a substitute for paragraph 186 by the Senator from California [Mr. WHITE].

The amendment was rejected.

The next amendment of the Committee on Finance was to strike out paragraph 189, as follows:

189. Watch movements having not more than seven jewels, 35 cents each; if having more than seven jewels and not more than eleven jewels, 50 cents each; if having more than eleven jewels and not more than fifteen jewels,

75 cents each; if having more than fifteen jewels and not more than seventeen jewels, $1.25 each; if having more than seventeen jewels, $3 each, and in addition thereto, on all the foregoing, 25 per cent ad valorem; watches, watch cases, and parts of watches, including watch dials, chronometers, box or ship, and parts thereof, clocks and parts thereof, not otherwise provided for in this act, whether separately packed or otherwise, 40 per cent ad valorem; all jewels for use in the manufacture of watches or clocks, 15 per cent ad valorem.

And to insert in lieu thereof the following as a new paragraph:

189. Watches, clocks, and chronometers, and parts thereof, finished or unfinished, whether separately packed or otherwise, and not specially provided for in this act, 40 per cent ad valorem; jewels for use in the manufacture of watches or clocks, 10 per cent ad valorem.

Mr. LODGE. I ask the Senator from Iowa in charge of the bill if he will be kind enough to pass over paragraph 189?

Mr. ALLISON. It may be passed over.

The VICE-PRESIDENT. Paragraph 189 will be passed over.

The next amendment of the Committee on Finance was, in paragraph 190, page 60, line 1, after the word "one," to strike out "and three-fourths cents" and insert "cent;" in line 2, after the word "sheets," to strike out "two and one-half" and insert "one and three-fourths;" and in line 4, after the word "remanufactured," to strike out "and zinc dust or ashes, 1¼ cents" and insert "1 cent;" so as to make the paragraph read:

190. Zinc in blocks or pigs, 1 cent per pound; in sheets, 1¼ cents per pound; old and worn out, fit only to be remanufactured, 1 cent per pound.

Mr. ALLISON. A majority of the committee have reconsidered this paragraph, and suggest 1¼ cents a pound in lieu of 1 cent in line 1, and 2 cents a pound instead of 1¾ cents in lines 2 and 3. I hope there will be no objection to that change. It is a small increase over the Wilson Act. The first clauses of the paragraph would then read:

Zinc in blocks or pigs, 1¼ cents per pound; in sheets, 2 cents per pound.

Mr. VEST. I object to any increase upon this article of zinc or any of its products. There is no necessity for it either for protection or revenue. The comparative statement shows that of zinc we exported in 1896 $187,318 worth and imported $29,730 worth, and of the other products there were exported $41,287 worth and imported $1,901 worth. I think I am qualified to speak in regard to this article, because it is produced more largely in Missouri than in any other State in the Union. The largest products in southwest Missouri are zinc smelters, and there is a very flourishing city there, Joplin, which is called the zinc metropolis of the Southwest. There is no necessity for this increase. It is not asked for by the parties interested in zinc mining. Why this increase should be made I am at an utter loss to know. If there had been any necessity for it, I certainly would have heard of it from some of my constituents. The town of Joplin is dependent almost entirely upon zinc mining, yet I have not received a single communication complaining of the present duty. So far as I know, the miners are entirely satisfied with it.

Mr. JONES of Arkansas. I did not understand the proposition of the Senator from Iowa.

The VICE-PRESIDENT. The Secretary will state the amendment.

The SECRETARY. In paragraph 190, page 60, line 1, after the word "one," it is proposed to insert "and one-half;" and in line 2, after the word "two," to strike out "and one-half;" so as to read:

Zinc in blocks or pigs, 1½ cents per pound; in sheets, 2 cents per pound.

The VICE-PRESIDENT. The question is on the amendment.

The amendment was agreed to.

Mr. VEST. I should like to hear that paragraph read now as amended.

The VICE-PRESIDENT. The Secretary will read the paragraph as amended.

The Secretary read as follows:

190. Zinc in blocks or pigs, 1½ cents per pound; in sheets, 2 cents per pound; old and worn-out, fit only to be remanufactured, 1 cent per pound, etc.

Mr. VEST. Will the Senator from Iowa be kind enough to tell me why he proposes to put up these duties?

Mr. ALLISON. We have only increased them a quarter of a cent a pound here over the Wilson law.

Mr. VEST. I do not ask as to the amount, but as to the reason.

Mr. ALLISON. Those who manufacture this article say the proposed rates are necessary to enable them to successfully compete in its production. I know perfectly well that for many years they have exported more or less of this article, and the Senator from Nevada [Mr. STEWART] thoroughly explained that on the paragraph relating to quicksilver, where he showed very clearly that there are certain duties that ought to be placed upon these articles, notwithstanding now and then there are exportations of them, or no importations, or very small importations.

Mr. VEST. But, Mr. President, the Senator speaks of persons who are engaged in the manufacture of these articles, and proposes to make an increase here upon zinc in blocks or pigs. Will he tell me where the miners are who have demanded this increase?

Mr. ALLISON. The miners did not appear before the committee. The zinc in the ore or the raw material is free. As the Senator very well knows, it is much more expensive to treat zinc ores than it is to treat lead ores. I think it costs four or five times as much. To convert this ore into zinc blocks or pigs is more expensive than it is to convert the ore of lead into blocks or pigs, and the duty here proposed seems to be necessary. It is a reduction of the rate in the McKinley Act, which was supposed to be a very fair protective measure, and it stands midway between the duty in the act of 1894 and the protection of 1890. Therefore I think in the line of compromise it is a proper adjustment of these duties, and it seems to me that it ought to meet with the approval of the Senator from Missouri.

Mr. VEST. If there has been any compromise, I have been so unfortunate as not to have discovered it in this bill. There has been a steady, a persistent, and a consistent increase not only over the rates of the existing law, but over those of the McKinley Act. Time and time again we have called attention to the increases over the McKinley Act, one of which escaped my attention whilst I was conversing with somebody a moment ago, that is in paragraph 186, where there is a clear increase of 5 per cent, without any necessity in the world, over the rate in the McKinley Act. Now, here is an article about which I happen to know something, because the people of my State are largely interested in it, and in my section of the State especially. Only yesterday a gentleman largely interested in zinc from southwest Missouri, one of the most distinguished men in the State, was in my committee room, and we talked about this very subject of zinc. He said: "Let it alone. We are doing well enough; we are satisfied with the existing law; and we do not want any increase upon it at all."

Now, my friend from Iowa, for whom I have the greatest respect, as he knows, contents himself in this debate by saying, without giving the authority for the increase, that the people interested in this industry desire that this increase shall be made. Here is an industry or a production—both a production and a manufacture of the raw material—perfectly satisfied, so far as I know, with the present rate, and my sources of information are equal to any other Senator's, on account of the interest of my people in the subject. This article is an article of prime necessity that goes into the poorest houses of the land, and still we have this increase, which I say can come from nothing else but force of habit—absolute force of habit.

Mr. CAFFERY. Mr. President, I call the attention of the Senator from Iowa to the fact that the duty on zinc under the McKinley law was 1¼ cents per pound; under the Wilson law, 1 cent per pound; under the Dingley bill, 1¼ cents per pound. The rate proposed by the Senate committee is equivalent to an ad valorem of 32.69 per cent. Under the McKinley law the ad valorem was 29.19. Before the increase now proposed by the Senator from Iowa is adopted, the rates under the Senate bill were an increase over the McKinley law of 1890. So the doctrine enunciated by the Senator from Rhode Island is certainly not complied with in this article of prime necessity to everybody in the United States.

Zinc in sheets is an article of common use, of valuable use, and more largely used, I believe, by the poor than the rich. About that, however, I do not know anything. But the reason given by the Senator from Iowa, which he takes from the Senator from Nevada, strikes me as being a very peculiar one. The Senator from Nevada says that these high rates under declining prices and decreased importations are necessary in order to keep off the remote danger of some foreigner somewhere sending to the United States the article and selling it below the cost of production, in order to run out the home producer.

That is a very remote stretching of protection; that goes a little further, perhaps, than I ever heard before, that you must not only protect against immediate and visible danger, but you have got to protect against remote possibility, leaving out of consideration all question as to whether or not the American can compete even upon equal conditions with the foreigner. I have to accept the explanation of the Senator from Iowa for these increases, but I submit to him that that explanation does not explain.

The VICE-PRESIDENT. The question is on the remaining amendment of the committee to paragraph 190; which will be stated.

The SECRETARY. After the word "remanufactured," in paragraph 190, line 4, the committee propose to strike out the words "and zinc dust or ashes, 1¼ cents" and insert "1 cent;" so as to read:

190. Zinc in blocks or pigs, 1¼ cents per pound; in sheets, 2 cents per pound; old and worn-out, fit only to be remanufactured, 1 cent per pound.

Mr. VEST. I am willing to substitute the Wilson rates for those other rates, and I will make that motion. I move to insert "1 cent" in line 2 and "1¼ cents" in line 3.

Mr. ALLISON. The first two amendments have been agreed to.

The VICE-PRESIDENT. The vote has been taken on those amendments.

Mr. ALLISON. The pending amendment is on lines 4 and 5, and I want to call the attention of the Senator to the fact that we reduce the rate a quarter of a cent per pound.

Mr. VEST. I do not want the yeas and nays on that, but I do want them on the first two items, and I will ask unanimous consent to have the vote again taken as to those items.

Mr. ALLISON. Then let the last amendment be agreed to, and I shall have no objection to having the vote the Senator desires.

The VICE-PRESIDENT. The Chair will then put the question upon the amendment of the committee on line 4, paragraph 190, after the word "remanufactured," to strike out "and zinc dust or ashes, 1¼ cents" and insert "1 cent."

The amendment was agreed to.

The VICE-PRESIDENT. The amendment proposed by the Senator from Missouri will now be stated.

The SECRETARY. In paragraph 190, line 1, after the word "pigs," it is proposed to strike out "1¼ cents" and insert "1 cent;" and in line 2, after the word "sheets," to strike out "two" and insert "one and one-fourth."

Mr. VEST. I call for the yeas and nays on the amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. MALLORY (when his name was called). I have a general pair with the Senator from Vermont [Mr. PROCTOR], and therefore withhold my vote.

The roll call was concluded.

Mr. HANNA. I transfer my pair with the junior Senator from Utah [Mr. RAWLINS] to the Senator from Montana [Mr. CARTER], who has temporarily left the Senate Chamber. I vote "nay."

Mr. QUAY (after having voted in the negative). I understand the Senator from Alabama [Mr. MORGAN], with whom I am paired, has not voted. I therefore withdraw my vote.

Mr. TILLMAN. I desire to announce my pair with the Senator from Nebraska [Mr. THURSTON].

The result was announced—yeas 18, nays 28; as follows:

YEAS—18.

Bacon,	Cockrell,	Mills,	Vest,
Bate,	Gorman,	Mitchell,	Walthall,
Berry,	Gray,	Pettus,	White.
Chilton,	Jones, Ark.	Smith,	
Clay,	McLaurin,	Turpie,	

NAYS—28.

Allison,	Frye,	Jones, Nev.	Platt, N. Y.
Burrows,	Gallinger,	Lodge,	Pritchard,
Cullom,	Gear,	McBride,	Sewell,
Davis,	Hale,	Nelson,	Shoup,
Deboe,	Hanna,	Penrose,	Spooner,
Fairbanks,	Hawley,	Perkins,	Stewart,
Foraker,	Hoar,	Platt, Conn.	Wetmore.

NOT VOTING—43.

Aldrich,	Faulkner,	Mallory,	Rawlins,
Allen,	George,	Mantle,	Roach,
Baker,	Hansbrough,	Martin,	Teller,
Butler,	Harris, Kans.	Mason,	Thurston,
Caffery,	Harris, Tenn.	Morgan,	Tillman,
Cannon,	Heitfeld,	Morrill,	Turner,
Carter,	Kenney,	Murphy,	Warren,
Chandler,	Kyle,	Pasco,	Wellington,
Clark,	Lindsay,	Pettigrew,	Wilson,
Daniel,	McEnery,	Proctor,	Wolcott.
Elkins,	McMillan,	Quay,	

So the amendment of Mr. VEST was rejected.

The reading of the bill was resumed at line 6, page 60, as follows:

191. Articles or wares not specially provided for in this act, composed wholly or in part of iron, steel, lead, copper, nickel, pewter, zinc, gold, silver, platinum, aluminum, or other metal, and whether partly or wholly manufactured, 45 per cent ad valorem.

Mr. JONES of Arkansas. I move to strike out "forty-five," in line 10, before the words "per centum," and insert "thirty-five.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In paragraph 191, line 10, before the words "per centum," it is proposed to strike out "forty-five" and insert "thirty-five;" so as to read:

191. Articles or wares not specially provided for in this act, composed wholly or in part of iron, steel, lead, copper, nickel, pewter, zinc, gold, silver, platinum, aluminum, or other metal, and whether partly or wholly manufactured, 35 per cent ad valorem.

Mr. JONES of Arkansas. That is the rate under the present law.

The VICE-PRESIDENT. The question is on the amendment submitted by the Senator from Arkansas [Mr. JONES].

Mr. JONES of Arkansas. I call for the yeas and nays on the amendment.

The yeas and nays were ordered; and being taken, resulted—yeas 20, nays 30; as follows:

YEAS—20.

Bacon,	Clay,	McLaurin,	Smith,
Bate,	Cockrell,	Mills,	Turpie,
Berry,	Gorman,	Mitchell,	Vest,
Caffery,	Gray,	Morgan,	Walthall,
Chilton,	Jones, Ark.	Pettus,	White.

NAYS—30.

Allison,	Gallinger,	McBride,	Quay,
Burrows,	Gear,	Nelson,	Sewell,
Cullom,	Hale,	Penrose,	Shoup,
Davis,	Hanna,	Perkins,	Spooner,
Deboe,	Hawley,	Pettigrew,	Stewart,
Fairbanks,	Hoar,	Platt, Conn.	Wetmore.
Foraker,	Jones, Nev.	Platt, N. Y.	
Frye,	Lodge,	Pritchard,	

NOT VOTING—30.

Aldrich,	Faulkner,	McMillan,	Roach,
Allen,	George,	Mallory,	Teller,
Baker,	Hansbrough,	Mantle,	Thurston,
Butler,	Harris, Kans.	Martin,	Tillman,
Cannon,	Harris, Tenn.	Mason,	Turner,
Carter,	Heitfeld,	Morrill,	Warren,
Chandler,	Kenney,	Murphy,	Wellington,
Clark,	Kyle,	Pasco,	Wilson,
Daniel,	Lindsay,	Proctor,	Wolcott.
Elkins,	McEnery,	Rawlins,	

So the amendment of Mr. JONES of Arkansas was rejected.

The reading of the bill was resumed at page 60, line 11, "Schedule D.—Wood and manufactures of." The next amendment of the Committee on Finance was, in paragraph 192, line 12, after the word "timber," to insert "hewn, sided, or squared, and round timber;" and in line 13, after the word "spars," to strike out "and" and insert "or;" so as to make the paragraph read:

192. Timber hewn, sided, or squared, and round timber used for spars or in building wharves, 1 cent per cubic foot.

Mr. JONES of Arkansas. I should be glad if the Senator from Iowa would explain just how that modifies the present law. This would seem to apply to hewn, sided, or square logs, leaving, I presume, round logs out of the paragraph.

Mr. ALLISON. Round logs come in under the free list, but the paragraph does include round timber used for spars and building wharves.

While I am up, I wish to offer an amendment in behalf of the majority of the committee, in line 13, by inserting "1½ cents" instead of "1 cent."

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa [Mr. ALLISON] will be stated.

The SECRETARY. In paragraph 192, line 13, after the word "one," it is proposed to strike out "cent" and insert "and one-half cents;" so as to read "1½ cents."

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Iowa [Mr. ALLISON].

The amendment was agreed to.

Mr. JONES of Arkansas. This does not include sawed logs, as I understand.

Mr. HALE. They are provided for in the next paragraph.

The VICE-PRESIDENT. The question recurs on the amendment of the Committee on Finance to paragraph 192, which has been stated.

Mr. ALLISON. I will say to the Senator from Arkansas that this paragraph does not include sawed logs.

Mr. GRAY. By "sawed logs," I presume I may ask the Senator from Iowa or some other Senator, is meant logs that are manufactured and brought into this country?

Mr. ALLISON. Yes.

Mr. GRAY. I wish to understand that.

Mr. HALE. Sawed logs are free.

Mr. GRAY. Free? Under the present law all lumber is free?

Mr. ALLISON. All of it is free except manufactured lumber.

Mr. GRAY. "Timber hewn, sided, or squared, and round timber used for spars," is that free?

Mr. ALLISON. It is all free.

Mr. GRAY. Is not "timber hewn, sided, or squared" manufactured lumber?

Mr. ALLISON. It is not so considered. Manufactured lumber, I believe, is not understood to include lumber sawed or hewn.

Mr. GRAY. I do not think so important an item ought to go without an explanation, and I should like to ask the Senator from Iowa why this exceedingly important raw material (if there can be any such thing as raw material, it is as near it as almost anything else) is to be taken from the free list and put upon the dutiable list?

Mr. ALLISON. Chiefly, I understand, to provide revenue, and secondly, to give a little incidental protection to that vast body of people in our own country who produce timber and manufacture it.

Mr. GRAY. I observe here that the revenue that is estimated to come from this item is $14,000. Therefore, the revenue is unimportant, and can be obtained in a great many other ways in greater abundance and without the hardship that this class of duties is going to produce inevitably.

The Senator from Iowa says, and says truly, and I think that is the gravamen of the whole proposition, that it is to protect a very worthy class of people who are engaged in producing timber. If there is any class of people who, in comparison with other classes of people in the country, can get along without this protection, it would seem to be the millionaire owners of great tracts of timber land all over the country. The white-pine timber of this country is the timber that is to be especially protected by this provision against the white-pine timber that comes across the Canadian border.

If the estimates of experts in this matter are correct, we have only about six years' supply of white-pine timber in the white-pine lands in the United States, and here is a premium offered for the destruction of white-pine forests in this country—a profit to be

given to the fortunate owners of the remaining supply in the United States, and the whole people of the United States, every man who builds an humble home, from the Atlantic to the Pacific and all along the dreary prairies of the West, are to contribute and be levied upon in order that the people who own the white-pine forests may make larger profits.

Now, sir, it is well known that those who have engaged in the white-pine lumber business are amongst the most fortunate business men of this country. They have amassed large fortunes. They do not need protection, and it is unjust that they should be mendicants upon the poor people of this country in order that their profits may be increased. They are getting along and the men they employ are getting along. I have not a word to say, of course, as to the characterization of the people who work in the pine forests as worthy people. Of course they are worthy, but they are not more worthy than the millions upon whom they seek to levy this tribute, and when you come to compare the class of people, as to importance and numbers, who seek this unjust toll on the other industries of the United States, they sink into insignificance both as to numbers and importance and in regard to the merits of the two classes.

Mr. President, I protest against the destruction of this little bit of unrestricted commerce. I protest against this legislation to artificially increase the price of an article universally used, a commodity that is a necessity all over the country, and there is no class of people anywhere who need it less than those in whose behalf the Senator from Iowa says this imposition is to be made.

Another thing. Why should we place a premium upon the destruction of our own forests? Why should not the world's supply of lumber, wherever it is available—and it is available in all those parts of this continent that are contiguous to our borders—be subject to the enterprise and to the commercial activities of our people? Why, when they reach out their hands to where they can best obtain it with most advantage to themselves, should the interfering hand of the law stay them and tell them, "You must not exercise this natural right of buying your material for a home where you can purchase it the cheapest, unless you pay toll to some so-called industry, to the men who own the land upon which the trees grow, the bounty that nature has given them?" That must be protected, forsooth, and a fine be placed upon those who would do otherwise than pay this unjust tribute to the landholders or forest owners of America.

Mr. CAFFERY. Mr. President, I presume this duty is laid with a view to the protection of American timber against the importation of Canadian timber. We are not much in the dark regarding the cost of producing white pine, of stumpage in the United States and Canada, and of milling the lumber after it is brought into the mill. In pursuance of a resolution of the Senate of April 29, 1897, which reads as follows:

Resolved, That the Commissioner of Labor be, and is hereby, directed to send to the Senate a statement of the cost per thousand feet, board measure, of producing white-pine lumber in the United States and in Canada, respectively; the statement to include the cost of lumbering, or the work in the woods, and the cost of manufacturing, or the millwork, in two separate items, including also the cost of stumpage—

The Commissioner of Labor submitted a report, with which I suppose the Senator from Iowa now in charge of the bill is perfectly familiar.

This is the report of Commissioner Wright on the resolution of the Senate of the 29th of April of the current year. He states:

In collecting information in accordance with a joint resolution approved August 15, 1894, providing for an investigation relating to the effects of machinery on labor and the cost of production, as well as the relative productive power of hand and machine labor, the cost of manual and of machine power as they are used in productive industries, and the effect upon wages of the use of machinery, the Department of Labor has secured facts in connection with the lumber industry showing wages paid and the cost of producing lumber at various places.

As a part of this work, Mr. Frank J. Sheridan, a special agent of the Department, has submitted a report on the production of white-pine lumber in certain establishments in Minnesota, Michigan, and Wisconsin, and in competing establishments in the Ottawa district in Canada, and this information answers in a general way, and in some respects specifically, the resolution of the Senate of April 29.

I submit herewith two tables, Table I giving the occupations and rates of wages of employees of four lumber-sawing establishments in the United States and four in Canada for the years 1891 to 1896, inclusive.

The absence of employees in the columns for the United States in many of the occupations, which will be noticed in studying Table I, is due in part to the use of different terms in the United States from those used in Canada, in part to the more minute classification of occupations in certain establishments both in Canada and in the United States, and further, in part to the greater general use of machinery in the United States than in Canada, thus creating a new class of occupations, which take the place of certain other occupations. It will be noticed that in the establishments for Canada there are more persons employed in certain divisions of labor than in the United States, but these remarks fairly indicate the reasons for the appearance of the table.

Table II is practically a summary of occupations and average wages of employees of the same lumber-sawing establishments in the United States and in Canada for the years 1891 to 1896, inclusive. This summary is drawn from Table I and puts the information in that table into a more compact shape.

All the wage rates given in these tables were taken from the pay rolls of the establishments involved.

The average daily wages for 1896, as they existed on a representative day in that year, were obtained from five lumber-sawing establishments in the United States and five in Canada, the concrete results being shown in the following tabular statement:

PRODUCTION OF WHITE-PINE LUMBER.

Average daily wages in five lumber-sawing establishments in the United States and five in Canada, 1896.

IN THE UNITED STATES.

Establishment number.	In mill.	In yard.	In mill and yard.
1	$1.9384	$1.5123	$1.7534
2	1.9213	1.5430	1.7385
3	2.0082	1.5700	1.8781
4	1.7130	1.3144	1.5427
5	2.0082	1.3802	1.6881
Average	1.9031	1.4623	1.7137

IN CANADA.

6	$1.4629	$1.4350	$1.4495
7	1.6786	1.4940	1.6040
8	1.3023	1.3386	1.3160
9	1.5449	1.4081	1.4907
10	1.9202	1.5257	1.7299
Average	1.4310	1.3950	1.4164

The average labor cost of 1,000 feet of white-pine lumber in the same five establishments in the United States and in the same five in Canada and for the same representative day in the year 1896 is shown in the following brief table, both for mill work and for yard work, together with the total:

PRODUCTION OF WHITE-PINE LUMBER.

Average labor cost of 1,000 feet of lumber in five lumber-sawing establishments in the United States and five in Canada, 1896.

IN THE UNITED STATES.

Establishment number.	In mill.	In yard.	Total.
1	$0.5145	$0.3080	$0.8225
2	.5489	.4124	.9613
3	.6528	.3489	1.0017
4	.6033	.3470	.9503
5	.5250	.4043	.9293
Average	.5511	.3635	.9146

IN CANADA.

6	$0.7345	$0.6682	$1.4027
7	.6431	.3881	1.0312
8	.7829	.4866	1.2695
9	.6728	.4019	1.0747
10	.7884	.5054	1.2938
Average	.7427	.4965	1.2392

In the foregoing table the cost includes labor cost only—that is, wages paid to the employees. The cost of material, management, interest, wear and tear, supplies, depreciation, and all other costs are excluded.

Mr. Sheridan remarks, relative to the foregoing table, that an examination of the pay rolls and books of sawmill establishments in the United States shows a greater production per man per day than in Canadian mills, owing to the superior machinery and better methods of handling. No wheel carts are used to haul lumber from one machine to another, the lumber being carried through the mill by machinery. He also states that an examination of the pay rolls and books of sawmill establishments in the Canadian district investigated shows low average production per man per day as compared with American mills.

In some Canadian mills old-style machinery is used, with many hand operations, and after the lumber is sawed a number of men and boys are used to load it on wheel carts and carry it to the edger saws, where it is unloaded and edged. It is then loaded and carted to the trimmers, unloaded and trimmed, and again loaded and carried to platform. The average production per man per day in the same five establishments in the United States and the same five in Canada and for the same representative day in 1896 embraced in the two preceding tables is shown in the following tabular statement:

PRODUCTION OF WHITE-PINE LUMBER.

Average production per man per day in five lumber-sawing establishments in the United States and five in Canada, 1896.

IN THE UNITED STATES.

Establishment number.	In mill.	In mill and yard.
	Feet.	*Feet.*
1	3,767	2,132
2	3,500	1,808
3	3,214	1,857
4	2,841	1,623
5	3,882	1,817
Average	3,508	1,874

IN CANADA.

6	1,992	1,053
7	2,610	1,556
8	1,663	1,037
9	2,296	1,387
10	2,435	1,248
Average	1,927	1,143

The resolution of the Senate calls for the cost of lumbering or the work in the woods. I regret that this can not be given with the same accuracy as can the wages and the cost of sawing, but Mr. Sheridan ascertained in his investigations, taking his facts from the memorandum books of American and Canadian lumbering firms, that the cost of 1,000 feet of logs, from the standing timber to the boom at mill, is in the United States $4.27½, and in Canada

$5.57½. These figures, he informs me, are derived from five establishments in the United States and four establishments in Canada, covering, entirely or in part for each establishment, the years from 1892 to 1896, inclusive. He also states that the costs, as given, include only wages paid and camp expenses, all cost of stumpage, dues, management, interest, wear and tear, depreciation, and all other costs being excluded.

The ascertainment of the cost of production of logs from the standing timber to the boom at mill was entirely incidental to the investigation being conducted by the Department. Time was not taken to make it complete, yet Mr. Sheridan, the special agent in charge of this branch of the work, feels that the figures above stated are fairly correct; but they are based on too meager data to be reported as statistically accurate, and they lack a complete exhibit of details for each item of cost, which I consider absolutely essential in arriving at a full and correct aggregate. He informs me that an examination of the pay rolls of logging establishments in the United States shows the extensive use of well-built ice roads and the employment of teams, sprinklers, and road monkeys—

I do not know what sort of monkeys they are—

to keep such roads in order, and that this, together with the use by some of the establishments in the United States of locomotives, railroad cars, and temporary rails to the skidways in the woods where the timber is cut, indicates comparatively level country and the quick hauling of logs in the district which he investigated; while an investigation of the pay rolls of logging establishments in Canada shows the absence of railroad employees in the woods, and of road monkeys or of ice-road employees, and of loaders as a leading occupation. This is accounted for by the physical characteristics of the main river, the tributaries, and the country in which the logging operations of the Ottawa mills district are carried on, and which apparently render such employment impracticable.

These characteristics show the mountainous nature of the country and make the building of logging railroads and well-equipped ice roads in the Ottawa district of Canada on the American plan quite impossible. The inaccessibility of the timber district investigated makes it necessary to ship supplies and provisions for fall operations during the previous winter, as they can not be transported by team after the rivers and streams thaw. The distance from the location of mills to the point of logging operations varies from 150 to 300 miles. The production per man, team, camp, and log driver, under such conditions, Mr. Sheridan reports, does not approach that of the northern district in the United States, where superior methods and facilities prevail; hence the greater Canadian cost of labor and supplies per 1,000 feet of logs, as shown by his statement.

I am, very respectfully, your obedient servant,

CARROLL D. WRIGHT,
Commissioner.

The PRESIDENT OF THE SENATE.

I offer these minute statistics to bear out the general results stated in this publication, and I ask that they may be incorporated in the RECORD as a part of my remarks.

Mr. ALLISON. This has already been printed as a document. I suggest to the Senator from Louisiana that it is hardly necessary to print all these pages, numbering 20, in the RECORD. The document is on our desks.

Mr. WHITE. I suggest to the Senator from Iowa that the value to be derived from this document is not only in its perusal here, but the country is entitled to know exactly what we are doing and the various arguments made pro and con on this measure.

Mr. ALLISON. Of course that is true; but I do not believe that it would be very interesting for the country to examine in detail all of these tables.

Mr. WHITE. They are valuable statistics.

Mr. HALE. Let it be printed as a document.

Mr. ALLISON. It might be printed as a document, and extra copies might be printed, or something of that sort, so that the country could get it.

Mr. CAFFERY. Ordinarily I would be satisfied with the general conclusion to be drawn from these minute statistics.

Mr. ALLISON. I understand that the Senator has read all of the report, the first six pages?

Mr. CAFFERY. Yes, sir.

Mr. ALLISON. That will appear in the RECORD, and I am perfectly willing that that shall appear; but as to printing all of the tables, I do not consider it necessary.

Mr. CAFFERY. I say ordinarily I would yield to the Senator's suggestions in that particular, but I submit to the Senator that the scanning or the reading of these statistics would be of great value as information to the people at large, for the whole minutiæ from the stump to the mill are given in these statistics. I ask leave to incorporate the whole of Senate Document No. 70 as a part of my remarks.

Mr. ALLISON. If the Senator from Louisiana thinks it is very important—and I do not know but that it is so—I shall not object to his having it printed in the RECORD, though I think it is a bad precedent.

The VICE-PRESIDENT. Without objection, the tables will be printed in the RECORD.

The tables referred to are as follows:

PRODUCTION OF WHITE-PINE LUMBER.

TABLE I.—*Occupations and rates of wages of employees of 4 lumber-sawing establishments in the United States and 4 in Canada, years 1891 to 1896, inclusive.*

Mr. CAFFERY. This official document settles the contention in regard to the labor cost in this particular industry in the United States and in Canada. Not only is the labor cost greater in the forests at the stump in Canada, but it is greater all along the line to the finished product of the mills. It will not do to say now in answer to this, as was stated by the Senator from California [Mr. PERKINS] in regard to quicksilver, that our lumber is pauper lumber. There can be no contention on that ground.

Our white pine and all other lumber in the United States is of equal value with the pine in Canada or of any other country of which I have any cognizance. Here is an authoritative official statement which, in regard to this particular industry, belies the statement that protection ought to be placed upon the industry or in behalf of the industry to protect the American labor, and the reason of it is that the American is a more efficient man both as a controller of industry and as a manual laborer.

Mr. GALLINGER. May I interrupt the Senator?

Mr. CAFFERY. Yes, sir.

Mr. GALLINGER. The Senator manifestly is not aware of the fact that there is no class of people in the world who will do as much work in the woods as the Canadian Frenchman. If Carroll D. Wright, who, I presume, is the author of the document, is correct in his statement that the labor cost is less in the United States than Canada, I should like to ask the Senator how it happens that almost every tree that is felled in the woods in New England is felled by a French Canadian?

Mr. GRAY. Then it is not American labor that you are trying to protect?

Mr. GALLINGER. Well, I am on one point now.

Mr. CAFFERY. The Senator from New Hampshire asks me a question which is answered by Mr. Carroll D. Wright. The labor cost, as shown by this careful investigation, is less in the United States than it is in Canada, and it makes no sort of difference whether the axman of the United States is imported from Canada or not. There are superior methods; they handle it better, they have better roads, they have better wagons, they have better appliances in the United States than they have in Canada; and you can not argue from the narrow basis that a Canadian axman is superior to an American axman; that therefore the American laborer is inferior to the Canadian laborer.

It is the brain, it is the inventive genius, it is the organizing capacity behind the ax and behind the axman that gives the United States laborer the advantage. Even in the matter of manual labor, notwithstanding the Senator from New Hampshire knows so much about the superiority of the Canadian laborer over the laborer in the United States with an ax, it can not be contended, if you take all these facts together, that there is any sort of ground for the imposition of a tariff upon lumber to protect the United States lumberman as against the Canadian lumberman. That fact speaks out in this paper; you can not deny it unless you impeach the efficiency of Mr. Carroll D. Wright or his care, vigilance, and ability in the matter of making this report.

Not only is this report significant in the matter of labor and the cost of timber, but it is significant all the way along the line. We are not only superior to the Canadian in the matter of logging, and in the matter of milling, but we are superior to any other men on the earth in that regard. If the statistics could be extended so as to embrace the labor cost in the United States and in Europe in any line of industry where the American genius can apply machinery, it will be found that the American product is a cheaper product, and therefore the plea that protection is needed in behalf of the American laborer against the pauper labor of Europe falls to the ground without any significance or weight.

Mr. WILSON. May I interrupt the Senator to ask him a question, not to prolong the debate?

Mr. CAFFERY. Certainly.

Mr. WILSON. The Senator has examined this report?

Mr. CAFFERY. Yes.

Mr. WILSON. He has examined it very carefully, I take it. Is there any place in the report that shows the rebate allowed by the Canadian Government for all lumber exported?

Mr. CAFFERY. Nothing that I perceive.

Mr. WILSON. It is a well-known fact, especially in British Columbia, that the Government charges 50 cents a thousand for stumpage. They do not hold the fee in the land. The fee remains in the Crown, and they pay no taxes. For all the lumber exported they get a rebate of 25 cents a thousand. They have an advantage over us not only in the rebate and in taxes, but in the shipment of their lumber by every tramp vessel, while in our coastwise trade we must ship under the American flag. They have advantages in that way, and they shipped last year over 15,000,000 feet.

Mr. CAFFERY. Even if the statement made by the Senator from Washington be true, and I have no doubt of its correctness, then your 50-cent stumpage would not equalize the advantage from this report that the American has over the Canadian, if you give the Canadian the 50-cent stumpage or rebate, whatever you call it. But I say that the instance of the Senator from Washington is a strong object lesson of the inutility and unwisdom of bounties given in any direction, for notwithstanding the bounties given in the way of this rebate to the Canadian he is unequal to the American on even lines, and no artificial protection of that kind can ever even up unequal conditions of nature or of human efficiency.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee to paragraph 192.

Mr. BACON. I do not know whether the Senator from Iowa proposes to go further this evening. I desire to say a word on this matter.

Mr. WHITE. I trust we shall have an adjournment.

Mr. ALLISON. I hope the amendment of the committee will be adopted.

Mr. BACON. What I have to say can be said on the succeeding paragraph just as well.

Mr. HALE. Let us adopt this paragraph.

Mr. ALLISON. I should like to make a little progress before we adjourn.

The VICE-PRESIDENT. The amendment to paragraph 192 will be agreed to in the absence of objection. It is agreed to.

Mr. QUAY. I wish to move an executive session.

Mr. ALLISON. It is understood that the Senator from Georgia [Mr. BACON] will have the floor to-morrow morning.

The VICE-PRESIDENT. The Senator from Georgia will be recognized.

Mr. BURROWS. I ask to have printed in the RECORD a letter from the chairman of the executive committee of the National Lumber Convention, reviewing the report of Carroll D. Wright, which has just been read. I will not stop to read it, but I ask that it be printed in the RECORD.

Mr. COCKRELL. Why not print it as a separate document, too?

Mr. BURROWS. It is brief—only two pages, with tables.

Mr. COCKRELL. Let it be printed as a separate document also.

Mr. ALLISON. The Senator from Missouri was not here when a document of some 26 pages was ordered printed in the RECORD.

Mr. BURROWS. I ask that this letter be printed in the RECORD.

Mr. HOAR. But the Senator from Missouri wants to have it printed as a separate document also.

Mr. COCKRELL. And let the other document also be printed with it.

Mr. BURROWS. I have no objection. Let the two be printed in the RECORD and also as a document.

Mr. BACON. One in conjunction with the other.

Mr. HALE. The other has already been printed as a document.

The VICE-PRESIDENT. Is there objection to printing the letter referred to in the RECORD and also as a document? The Chair hears none, and it is so ordered.

The letter referred to is as follows:

Letter from the chairman of the executive committee of the National Lumber Convention, commenting upon the report of the Commissioner of Labor relative to the cost per thousand feet, board measure, of producing white-pine lumber in the United States and Canada, in response to the resolution introduced by Senator PETTIGREW, of South Dakota, in the Senate of the United States, April 20, 1897, as follows—

Resolved, That the Commissioner of Labor be, and is hereby, directed to send to the Senate a statement of the cost per thousand feet, board measure, of producing white-pine lumber in the United States and Canada, respectively; the statement to include the cost of lumbering, or the work in the woods, and the cost of manufacturing, or the mill work, in two separate items, including also the cost of stumpage—

Printed as Senate Document No. 70, Fifty-fifth Congress, first session.

It is a regrettable fact that the information sought by our Senators and Representatives from the various Departments of the Government and their bureaux, in order to be properly advised upon matters of great public importance, is so meager as to be utterly useless for the purposes intended.

In the report under consideration, Mr. Wright admits he has no data upon which to base an answer to the question—that is, upon which to estimate the cost of producing 1,000 feet of white-pine lumber—but simply submits a report, saying that the cost of labor in the United States is 91 cents, and of logging, $4.27½, as against $1.23 for labor and $5.57½ in Canada. He states that the cost of stumpage, interest, taxes, insurance, wear and tear, supplies (except camp expenses), repairs, depreciation, management, including office and other general expenses, are not included in the estimates submitted in this report, an omission so important as to entirely nullify the value of the figures given and render his report a complete failure, so far as securing the object sought by the resolution is concerned.

In the first place, according to the recent report of the Secretary of Agriculture, from which has been deduced the opinion that there are but five or six years of white pine remaining in the United States, it is clearly shown that the entire amount of white pine to be received from Canada during the next fifteen years, the time named in that report for the exhaustion of the Canadian supply, would be barely sufficient to supply this country for six months, while facts deduced from that report and previous ones from the same Department show that the supply of lumber from the American forests is sufficient for generations to come. This would indicate that the question in a broad sense—that is, the cost of production of 1,000 feet of lumber rather than the cost of production of a particular kind of lumber—is desired for proper enlightenment on the subject.

The Commissioner starts out by saying that the information on which this report is based was gathered for the purpose of showing the relative producing power of hand and machine labor, in which he was successful in proving the economy in the use of high-class machinery in the United States as against the cruder methods prevailing in Canada.

In the table as to the cost of handling in the yard, 36 cents per thousand feet are the figures for the United States, as against 49 cents in Canada, the cost of production by Canadian labor being, therefore, 36 per cent higher than by American.

As the wages for labor in the yard are $1.39 in Canada and $1.46 in the United States, the laborer of this class in the United States receives only 3½ per cent higher wages than his Canadian competitor for 36 per cent greater efficiency. This is purely a demonstration of the actual relative efficiency of labor in the respective countries, as in neither case is any machinery used. The superior efficiency of the laborer of the United States over his Canadian neighbors seems hardly a matter within the province of an American Congress to attempt to neutralize.

The table on page 4, showing the average production per man in five establishments in Canada and five in the United States, states the average in the American mills to be 3,508 feet per man as against 1,927 feet per man in Canada, a difference in favor of the American laborer and improved methods of about 82 per cent. In American mills the wages are $1.93 as against $1.43 in Canada, the laborer in the United States receiving, therefore, 35 per cent higher wages for a superior efficiency of 82 per cent.

The table showing the result of the labor of one man in the "yard" gives for the United States 1,874 feet, as against 1,143 feet in Canada, where improved methods are not a considerable factor, an advantage to the American laborer of about 64 per cent.

These facts are sufficient, to a certain extent, to account for the difference in the cost of logging in Canada, $5.57½, as against $4.27½ in the United States, when to the latter is added the usual trackage charged for the use of logging railroads in general use in the United States, which, the Commissioner says, are not used in Canada.

The writer has no experience as to the cost of logging white pine in the United States nor in Canada, but is extensively engaged in logging in the South, where there are no physical difficulties in the way of railroad construction, and is now having logged a tract of 60,000,000 feet, 85 miles from the mill, at a contract price of $5.60 per thousand feet; another tract of 20,000,000 feet, on a 40-mile haul, for $5.02 per thousand feet. This lumber comes in competition with the white pine and spruce of Canada, as well as the white pine of the Northwest.

The most important information given in the report of the Commissioner of Labor is that given on pages 22 to 25 of the report, which are herewith reproduced for easy reference. They show that under the operations of the tariff law of 1890, when the duty on white pine was reduced from $2 to $1 (although spruce still remained at the two-dollar rate), and the more recent law of 1894, placing both spruce and white pine on the free list, a gradual reduction in the daily wages of the American wage earner took place, while the Canadians engaged in similar labor retained their rate of wages practically unchanged for the whole period, in some instances the wages in Canada being advanced, as shown by the percentages herewith tabulated, to say nothing of the enforced idleness of fully 25 per cent of the American mill operatives resulting from the operation of the tariff laws and general business depression; while the Canadians increased their exportations to the United States, which would indicate that they were constantly employed.

[Senate Document No. 70, Fifty-fifth Congress, first session.]

TABLE II.—*Summary of occupations and average wages of employees of four lumber-sawing establishments in the United States and four in Canada for the years 1891 to 1896, inclusive, showing the percentage of increase or decrease under the operation of the tariff laws of 1890, when the duty on white pine was reduced to $1, and the law of 1894, when it was placed upon the free list.*

Increase do.		1

*In Canada, wages for this class of labor remained unchanged.

Mr. FRYE. Is the tariff bill closed for the day?

Mr. HALE. We are about to have an executive session.

Mr. QUAY. I wish to move an executive session.

Mr. FRYE. I should like to have that motion postponed for five minutes.

Mr. QUAY. Very well.

REGULATIONS FOR INLAND WATERS, ETC.

Mr. FRYE. There is a bill on the Vice-President's table which I desire the Chair to lay before the Senate. It will not be necessary, in my judgment, to read it.

The VICE-PRESIDENT. The Chair lays before the Senate the amendment of the House of Representatives to the bill (S. 1886) to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States.

Mr. FRYE. The one amendment is a substitute for the Senate bill, and the substitute contains some four or five amendments which the American delegates finally concluded to have made. They are of no particular significance or importance. There are some five or six other amendments which are mere matters of form. The word "and" is inserted in two or three places where we had a semicolon in our bill. I think ours was the better, but the amendments are not material. I remember one of the amendments simply was a provision that the bill should not apply to the waters of the Great Lakes. It could not apply to the waters of the Great Lakes anyway. We have a separate provision for them entirely. I have examined the substitute with great care. I have been over every part of it. The whole bill has been read.

Mr. HOAR. How long is it?

Mr. FRYE. The House amendment is a substitute for the Senate bill. It is the entire Senate bill which was sent over, with two or three little immaterial amendments.

Mr. HOAR. How long is it?

Mr. FRYE. It would take an hour to read it, I suppose. I have written out here the changes made by the House, which I ask may be inserted in the RECORD. As I was stating, I have examined the substitute very carefully, and the Commissioner of Navigation has examined it with me. We have been over the whole of it, and there is no objection that can possibly be made to any part of it.

Mr. HOAR. I never have known a bill or an amendment to pass the Senate without being read. While I have the most absolute confidence in the Senator from Maine in the matter of accuracy and fairness and sound judgment, I think we shall get into a very great strait if we set such a precedent. I think the Senator ought, under the circumstances, to have the amendment read to the Senate.

Mr. FRYE. Shall I read the changes made in the House amendment?

Mr. HOAR. It makes no difference.

Mr. FRYE. I will read them, instead of having them read at the desk.

Mr. HOAR. I shall not insist on anything more than that, but I think the amendments should be read.

Mr. FRYE. I will read the amendments, then.

On page 5, for the words "or (e)" the words "the after range light mentioned in article 2 (f)."

That was necessary. There were two white lights mentioned in article 2, and that was a necessary amendment.

Article 9 (d) and article 15 (f), inserted by the House, provide that the present system of lights and sound signals for canal boats, rafts, etc., shall be retained. That is simply a provision that the rafts shall have certain lights. That is all right.

Article 18, the House has added inspectors' Rule IX, providing that the rules of article 18 shall not apply in fog, etc. This is entirely superfluous, as article 15 expressly establishes the fog signals, and article 18, as a matter of course, relates only to sound signals by day in clear weather. That does no harm.

Article 21 (page 15), the House has stricken out the "note." There was a little note in the Senate bill. The House struck it out, because it was asserted that it had never appeared in any legislation before. It has. They were mistaken. It appeared in the very last bill touching vessels at sea, and the note can be added by the Commissioner of Navigation in issuing his instructions. So there is no harm in that.

Section 2, page 18. The House has retained the power of the Board of Supervising Inspectors to prescribe rules for steam vessels passing each other, but they must not conflict with general provisions of law.

Section 3, pages 18 and 19. The House has added a proviso that the imposition of a fine on the pilot shall not relieve the vessel owner of liability for damages. The House provision is entirely unnecessary. The law now will continue to be so that the vessel owner would not be relieved. It does no harm.

Section 5, page 19. The House has used the word "and" where the Senate used semicolons. The Senate form is better, but of course that change does no harm. The House has also added at the end of the section the exemption of the Great Lakes, the Mississippi, etc., which is superfluous, as the same exemptions are established on the first page of the bill.

Those are all the changes made by the House amendment. I move that the Senate concur in the House amendment.

The VICE-PRESIDENT. The question is on concurring in the amendment of the House of Representatives.

The amendment was concurred in.

EXECUTIVE SESSION.

Mr. QUAY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 5 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Saturday, June 5, 1897, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate June 4, 1897.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Lawrence Townsend, of Pennsylvania, to be envoy extraordinary and minister plenipotentiary of the United States to Portugal, vice George W. Caruth, resigned.

TREASURER OF THE UNITED STATES.

Ellis H. Roberts, of New York, to be Treasurer of the United States, to succeed Daniel N. Morgan, resigned.

ASSISTANT TREASURER OF THE UNITED STATES.

Conrad N. Jordan, of New York, to be assistant treasurer of the United States at New York City, a reappointment, his commission having expired.

AUDITOR FOR TREASURY DEPARTMENT.

William E. Andrews, of Nebraska, to be Auditor for the Treasury Department, to succeed Ernest P. Baldwin, resigned.

AUDITOR FOR WAR DEPARTMENT.

William W. Brown, of Pennsylvania, to be Auditor for the War Department, to succeed T. Stobo Farrow, resigned.

PROMOTIONS IN THE NAVY.

Commander Richard P. Leary, to be captain in the Navy from the 6th day of April, 1897, vice Capt. Albert Kautz, promoted.

Lieut. Commander William Swift, to be a commander in the Navy from the 6th day of April, 1897, vice Commander Richard P. Leary, promoted.

Lieut. Herbert Winslow, to be lieutenant-commander in the Navy from the 6th day of April, 1897 (subject to the examinations required by law), vice Lieut. Commander William Swift, promoted.

Lieut. (Junior Grade) William J. Maxwell, to be a lieutenant in the Navy, from the 6th day of April, 1897 (subject to the examinations required by law), vice Lieut. Herbert Winslow, promoted.

Lieut. (Junior Grade) Franklin Swift, to be a lieutenant in the Navy, from the 29th day of April, 1897, vice Lieut. George A. Calhoun, deceased.

Lieut. Commander Henry B. Mansfield, to be a commander in the Navy, from the 16th day of May, 1897, vice Commander Timothy A. Lyons, retired.

Lieut. William H. Turner, to be a lieutenant-commander in the Navy, from the 16th day of May, 1897, vice Lieut. Commander Henry B. Mansfield, promoted.

POSTMASTERS.

John Alfred, to be postmaster at Leadville, in the county of Lake and State of Colorado, in the place of John H. Stotesbury, removed.

Nathaniel Barnes, to be postmaster at Kansas City, in the county of Wyandotte and State of Kansas, in the place of T. Fitz Hugh, removed.

Charles E. Bowman, to be postmaster at Argentine, in the county of Wyandotte and State of Kansas, in the place of George W. Killmer, resigned.

Harry H. Lusk, to be postmaster at Parsons, in the county of Labette and State of Kansas, in the place of F. W. Frye, removed.

Richard S. Oakford, to be postmaster at Herington, in the county of Dickinson and State of Kansas, in the place of Thomas M. Bixby, resigned.

Alfred York, to be postmaster at Fort Riley, in the county of Geary and State of Kansas, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1897.

Frank M. Atkinson, to be postmaster at St. Joseph, in the county of Buchanan and State of Missouri, in the place of Frank M. Atkinson, whose commission expired January 17, 1897.

Edwin Abrams, to be postmaster at Lawrence, in the county of Queens and State of New York, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1897, Mary A. S. Kavanagh nominated to the Senate and confirmed, but not commissioned.

Leroy L. Brinkley, to be postmaster at Edenton, in the county of Chowan and State of North Carolina, in the place of Leroy L. Brinkley, whose commission expired January 23, 1897.

Reuben J. Mott, to be postmaster at Port Allegany, in the county of McKean and State of Pennsylvania, in the place of George Weber, removed.

George H. Swearingen, to be postmaster at Dunbar, in the county of Fayette and State of Pennsylvania, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1897, Margaret B. Doonan nominated to the Senate and confirmed, but not commissioned.

Arthur B. Gibson, to be postmaster at Mercur, in the county of Tooele and State of Utah, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1897.

James F. Posten, to be postmaster at Elkins, in the county of Randolph and State of West Virginia, in the place of Milford M. Smith, removed.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 4, 1897.

INDIAN AGENT.

Asa C. Sharp, of Gary, Md., to be agent for the Indians of the Ponca, Pawnee, Otoe, and Oakland Agency in Oklahoma Territory.

POSTMASTERS.

Fred P. Dearth, to be postmaster at Woodsville, in the county of Grafton and State of New Hampshire.

Ezra H. Woodward, to be postmaster at Newberg, in the county of Yamhill and State of Oregon.

Charles A. Burg, to be postmaster at Livingston, in the county of Park and State of Montana.

Thomas H. Baker, to be postmaster at Louisville, in the county of Jefferson and State of Kentucky.

SENATE.

SATURDAY, *June 5, 1897.*

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. QUAY, and by unanimous consent, the further reading was dispensed with.

BOUNTIED SUGARS.

The VICE-PRESIDENT presented a communication from the Secretary of State, transmitting, agreeably to the request of the minister of Austria-Hungary, the translation of a note containing the protest of the Government of Austria-Hungary against the proposed treatment of bountied sugars; which was read.

Mr. HALE. What is the communication that has been laid before the Senate?

Mr. VEST. Let it be read again.

The communication was again read, as follows:

DEPARTMENT OF STATE, *Washington, June 4, 1897.*
